The court of appeals ruling, in the practical context of the case, requires that some indefinite number of elementary pupils will remain in predominantly black and perhaps all-black schools. The opinion for three members of the court, by Judge Butzner, states that "not every school in a unitary system need be integrated" and that while boards "must use all reasonable means to integrate the schools" sometimes "black residential areas are so large that not all schools can be integrated by using reasonable means" (189a). This view acknowledges that the black schools are the product of illegal segregation practices, but suggests that the problem is essentially intractable and that there is in effect a wrong without a remedy. The wrong is not remedied if you discount as we do, the three alternatives to integrating the black schools mentioned by Judge Butzner, *e.g.*, providing an integrated school for each child in later years, relying on the black pupils' use of a free transfer right to leave the black schools, and establishing special integrated programs at the all-black schools. None of these suggestions represents a complete substitute for the constitutional right to attend school in a system where racial identification of the schools has been removed and there are "just schools." *Green* v. *County School Board of New Kent County*, 391 U.S. 430, 442 (1958). The first method merely postpones the right and does not grant it "now and hereafter" (*Alexander* v. *Holmes County Board of Education*, 396 U.S. 19 (1969)). The second method—free transfers for blacks—has proven illusory and only a partial answer in Charlotte-Mecklenburg. *Green, supra*, and *Monroe* v. *Board of Commissioners*, 391 U.S. 450 (1958). The third method by its own terms is limited to peripheral activities not central to the daily classroom experience

of grade school children, and fails to remove the racial identifiability of the schools.

We believe that Judge McMillan was correct, and that the court below was in error, in defining an appropriate specific desegregation goal for Charlotte. Judge McMillan's findings and conclusions that the all black schools and predominantly black schools in Charlotte-Mecklenburg are unconstitutionally segregated were accepted by all members of the court below except Judge Bryan, who wrote a separate dissenting opinion. Fortunately, this case contains an unusually detailed and extensive factual record, and meticulous findings which explain how racial segregation was created in the Charlotte system. The detailed record showing how the dual system was created makes the case an appropriate one to consider the important questions relating to remedial measures. We set out in detail in the next subsection the findings about the causes of school segregation, the related findings about the governmental responsibility for housing segregation in Charlotte, and the particular findings about the effects of the denial of equal educational opportunity on black children in this locality. In a succeeding subsection we discuss the governing legal principles which support Judge McMillan's statement of the desegregation goal.

B. *The Dimensions, Causes, and Results of the Dual System in Charlotte—The Nature of the Constitutional Violation.*

Judge McMillan found that governmental authorities had created black schools in black neighborhoods in Charlotte by promoting school segregation and housing segregation. The board "gerrymandered" or manipulated school attendance areas to promote segregation, selected sites and the sizes of schools to promote segregation, and used the school transportation system to promote segregation. The court

found that the extensive residential segregation which concentrated 95% of the city's Negroes in Northwest Charlotte was promoted by public authorities, including school practices and those of other government agencies.

Judge McMillan summarized the results by noting that although the slightly more than 24,000 Negroes in the system were but 29% of the total school population, more than 16,000 Negroes were in 25 all-black or predominantly black schools, including more than 9,000 in 11 100% black schools (165a). He concluded that: "The 9,216 in 100% black situations are considerably more than the number of black students in Charlotte in 1954 at the time of the first *Brown* decision. The black school problem has not been solved" (166a). At the same time, more than two-thirds of the white pupils (45,012 out of a total of 59,828) were in 57 schools readily identifiable as white schools (165a). Less than one-fifth of the pupils in the system attended 24 schools not readily identifiable by race (165a-166a).

Judge McMillan summarized the findings about how this extensive segregation came about in these words:

> The black schools are for the most part in black residential areas. However, that does not make their segregation constitutionally benign. In previous opinions the facts repecting their locations, their controlled size and their population have already been found. Briefly summarized, these facts are that the present location of white schools in white areas and of black schools in black areas is the result of a varied group of elements of public and private action, all deriving their basic strength originally from public law or state or local governmental action. These elements include among others the legal separation of the races in schools, school busses, public accommodations and housing; racial restrictions in deeds to land; zoning

ordinances; city planning; urban renewal; location of public low rent housing; and the actions of the present School Board and others, before and since 1954, in locating and controlling the capacity of schools so that there would usually be black schools handy to black neighborhoods and white schools for white neighborhoods. There is so much state action embedded in and shaping these events that the resulting segregation is not innocent or *'de facto'* and the resulting schools are not 'unitary' or desegregated (166a-167a).

The Fourth Circuit accepted these conclusions (186a-187a), and also pointed out as one aspect of this, that North Carolina Courts had enforced racial restrictive covenants on property prior to *Shelley* v. *Kraemer*, 334 U.S. 1. See e.g. *Phillips* v. *Wearn*, 226 N.C. 290, 37 S. E. 2d 895 (1946) (involving property in Mecklenburg); *Eason* v. *Buffaloe*, 198 N.C. 520, 142 S.E. 496 (1930); *Vernon* v. *R. J. Reynolds Realty Co.*, 226 N.C. 58 36 S. E. 2d 710 (1946). These racial restrictive covenants enforced by injunctions and damage suits were the functional and practical equivalent of residential segregation laws and ordinances.[33]

Nor was the decision below unique in recognizing the interrelationship between school segregation and state responsibility for residential segregation. See *Holland* v. *Board of Public Instruction of Palm Beach County*, 258 F. 2d 730, 732 (5th Cir. 1958); *Dowell* v. *Board of Education*, 244 F.

---

[33] *Shelley* was argued in this Court on this basis (by the Solicitor General among others) as Mr. Justice Black has described:

> This type of agreement constituted a restraint on alienation of property, sometimes in perpetuity, which, if valid, was in reality the equivalent of and had the effect of state and municipal zoning laws accomplishing the same kind of racial discrimination as if the State had passed a statute instead of leaving this objective to be accomplished by a system of private contracts. (*Bell* v. *Maryland*, 378 U.S. 226, 329 (1964), Mr. Justice Black, dissenting.)

Supp. 971, 975-977 (W.D. Okla. 1965), affirmed 375 F. 2d 158 (10th Cir. 1967), cert. denied 387 U.S. 931 (1967), both involving residential segregation ordinances. Cf. *Brewer* v. *School Board of the City of Norfolk,* 397 F. 2d 37, 41-42 (4th Cir. 1968).

Judge McMillan also made explicit findings based upon his examination of the local system about the harm that segregation was inflicting upon black children. Judge McMillan found "that segregation in Mecklenburg County has produced its inevitable results in the retarded educational achievement and capacity of segregated school children." (66a-67a). Sixth grade students in black schools were on the average achieving at a fourth grade level, whereas there were substantially higher levels in integrated and white schools. (20a; 67a; 97a-99a). The District Judge wrote that:

> "This alarming contrast in performance is obviously not known to school patrons generally.
>
> It was not fully known to the court before he studied the evidence in the case.
>
> It can not be explained solely in terms of cultural, racial or family background without honestly facing the impact of segregation.
>
> The degree to which this contrast pervades all levels of academic activity and accomplishment in segregated schools is relentlessly demonstrated.
>
> Segregation produces inferior education, and it makes little difference whether the school is hot and decrepit or modern and air-conditioned.
>
> It is painfully apparent that "quality education" can not live in a segregated school; *segregation itself is the greatest barrier to quality education.*
>
> As hopeful relief against this grim picture is the uncontradicted testimony of the three or four experts who testified, some for each side, and the very interest-

> ing experience of the administrators of the schools of Buffalo, New York. The experts and administrators all agreed that transferring underprivileged black children from black schools into schools with 70% or more white students produced a dramatic improvement in the rate of progress and an increase in the absolute performance of the less advanced students, without material detriment to the whites. There was no contrary evidence. (In this system 71% of the students are white and 29% are black.) (67a-68a)

Legally, of course, the case does not depend on any such local findings of harm. "The right of a student not to be segregated on racial grounds in schools so maintained is indeed so fundamental and pervasive that it is embraced in the concept of due process of law." *Cooper* v. *Aaron*, 358 U.S. 1, 19 (1958). But it is well to remember that the segregation system condemned by *Brown* is a massive intentional disadvantaging of the Negro minority by the white majority. See Black, "The Lawfulness of the Segregation Decisions," 69 Yale L. J. 421 (1960). That disadvantage is not dissipated so long as the dual system is intact. The district judge perceived that its elimination is an urgent task.

C. *The Decision Below Conflicts With Applicable Decisions of This Court.*

The district court's decision that each of the predominantly black and all-black schools in Charlotte-Mecklenburg must be reorganized on an integrated basis is in conformity with this Court's decisions defining the nature of the duty to desegregate public schools which was first declared sixteen years ago in *Brown* v. *Board of Education*, 347 U.S. 483 (1954). *Brown II* spoke of the need "to achieve a system of determining admission to the public schools on

a nonracial basis." *Brown* v. *Board of Education*, 349 U.S. 294, 300-301 (1955). In *Cooper* v. *Aaron*, 358 U.S. 1, 7 (1958), the Court wrote of the duty of "initiating desegregation and bring about the elimination of racial discrimination in the public school system." *Green* v. *County School Board of New Kent County*, 391 U.S. 430 (1968), made it clear that *Brown* requires more than nondiscriminatory admission of Negroes to "white" schools. *Green* held that *Brown* was addressed to the whole system of segregation in which "racial identification of . . . schools was complete, extending not just to the composition of student bodies . . . but to every facet of school operations . . ." (391 U.S. at 435). Under *Green* these dual systems must be abolished; the task is the "dismantling of well-entrenched dual systems" (391 U.S. at 437), and "disestablishing state-imposed segregation" (*id.* at 439). The *Green* decision states that a "unitary, non-racial system of public education was and is the ultimate end to be brought about" (*id.* at 436), that discrimination must be eliminated "root and branch" (*id.* at 438), and that the Constitution required "abolition of the system of segregation and its effects" (*id.* at 440). The courts are to render decrees "which will so far as possible eliminate the discriminatory effects of the past as well as bar like discrimination in the future" (*id.* at 438, note 4). The courts are to "retain jurisdiction until it is clear that state-imposed segregation has been completely removed" (*id.* at 439). A call for the complete abolition of racially identifiable schools is sounded by the command that the plan "promise realistically to convert promptly to a system without a 'white' school and a 'Negro' school, but just schools" (*id.* at 442).

Judge McMillan addressed himself to the most obvious remaining characteristic of the dual system in Charlotte—the 25 black schools which serve the bulk of the black population. By the time Judge McMillan wrote his opinion

on December 1, 1969, the school board had failed despite three orders to present a plan which eliminated the black schools. Judge McMillan perceived that school segregation could not be justified or excused on the basis of segregated neighborhood patterns where the state itself was responsible for Fourteenth Amendment purposes for the housing segregation as well as the school segregation.[33] Thus he faced the practical problem of formulating specific instructions and criteria for the men preparing a desegregation plan. He believed that the concern was "primarily not with the techniques of assigning students or controlling school populations, but with *whether those techniques get rid of segregation of children in public schools.* The test is pragmatic, not theoretical" (61a). In order to guide his court appointed consultant in preparing a plan, Judge McMillan stated simple legal guidelines and criteria. They are in the spirit of *Green* and are entirely unexceptionable:

> 2. Drawing school zone lines, like "freedom of transfer," is not an end in itself; and a plan of geographic zoning which perpetuates discriminatory segregation is unlawful . . . [citations omitted].
>
> • • •
>
> 12. Fixed ratios of pupils in particular schools will not be set. If the board in one of its three tries had

---

[33] *Dowell* v. *Board of Education*, 244 F. Supp. 971, 975-977 (W.D. Okla. 1965), *affirmed*, 375 F.2d 158 (10th Cir. 1967), *cert. denied*, 387 U.S. 931 (1967); *Holland* v. *Board of Public Instruction of Palm Beach County*, 258 F.2d 730, 732 (4th Cir. 1968). Geographic zoning plans are acceptable only if they tend "to disestablish rather than reinforce the dual system of segregated schools." *United States* v. *Greenwood Municipal Separate School District*, 406 F.2d 1086, 1093 (5th Cir. 1969); *Henry* v. *Clarksdale Municipal Separate School Dist.*, 409 F.2d 682 (5th Cir. 1969); *United States* v. *Indianola Municipal Separate School District*, 410 F.2d 626 (5th Cir. 1969); *Keyes* v. *School District Number One, Denver*, 303 F. Supp. 279 and 289 (D. Colo. 1969), *stay vacated*, 396 U.S. 1215 (1969) (Justice Brennan in Chambers). And see this Court's decision in *Northcross* v. *Board of Education of Memphis*, 397 U.S. 232 (1970).

presented a plan for desegregation, the court would have sought ways to approve variations in pupil ratios. In default of any such plan from the school board, the court will start with the thought, originally advanced in the order of April 23, that efforts should be made to reach a 71-29 ratio in the various schools so that there will be no basis for contending that one school is racially different from the others, but to understand that variations from that norm may be unavoidable.

• • •

14. Where pupils live must not control where they are assigned to school, if some other approach is necessary in order to eliminate racial segregation . . . [citations omitted].

15. On the facts in this record and with this background of *de jure* segregation extending full fifteen years since *Brown I*, this court is of the opinion that all the black and predominantly black schools in the system are illegally segregated . . . [citations omitted].

• • •

17. Pairing of grades has been expressly approved by the appellate courts . . . [citations omitted]. Pairing, grouping, clustering, and perhaps other methods may and will be considered and used if necessary to desegregate the schools.

18. Some 25,000 out of 84,000 children in this county ride school busses each day, and the number *eligible* for transportation under present rules may be more than 30,000. A transportation system already this massive may be adaptable to effective use in desegregating schools.

The court of appeals decision that some indefinite number of black schools may remain conflicts with *Green*. There

is no warrant in *Green* for anything less than complete dismantling of the dual system. The holding that racial identifiability of schools need not be redressed threatens, as Judge Sobeloff has suggested, to water down or temper the duty to convert to a unitary system (203a). The conclusion that the board need accomplish only so much desegregation as seems "reasonable" poses a fundamental threat to the principle of *Brown I*. As Judge Sobeloff wrote, dissenting, "the conclusion of the majority that, all things considered, desegregation of this school system is not worth the price" is a "conclusion neither we nor school boards are permitted to make" (210a).

The district court had power under the *Green* decision to require much more than a minimal sort of plan. The court was not bound to accept school board proposals designed to search out the gray area between a dual system and a unitary system to satisfy minimum desegregation requirements. On the contrary, the court was empowered to strike at the roots as well as the branches of the segregated system. The court was empowered to root out segregation so thoroughly that it is unlikely to occur again. The opinion below in part recognizes this by approving the trial judge's efforts to prevent re-segregation of desegregated schools at the high school level.[34] But the essential thrust of the decision conflicts with this idea. It seems clear that the opinion approves the continuation of some majority black schools. But experience in Charlotte has demonstrated the difficulty of maintaining stable desegregation in majority black schools. Frequently such schools fast become all-black as neighborhood patterns change in an oft-repeated pattern of white flight from Negro neighborhoods and

[34] The court below approved the trial judge's effort "to stabilize the system by eliminating an almost totally white school in a zone to which other whites might move with consequent 'tipping' or resegregation of other schools" (195a).

schools. Judge McMillan's plan was designed to cope with this problem by eliminating all racially identifiable schools so that this factor would no longer play a part in the community.

The court of appeals' goal of obtaining as much integration as is "reasonable" in the jurisdiction must leave every board or court which seeks to apply the formula essentially at sea. The standard of reasonableness was adopted, says the court, because "some cities . . . have black ghettos so large that integration of every school is an improbable, if not unattainable, goal." But, of course, the Finger plan demonstrates that this goal is not unattainable in Charlotte-Mecklenburg. And Charlotte-Mecklenburg, the largest school system in North Carolina, is fairly representative of the desegregation problem in the cities of the Fourth Circuit. The United States Commission on Civil Rights had recently made the same point:

> It is a mistake to think of the problems of desegregation and the extent that busing is required to facilitate it solely in the context of the Nation's relatively few giant urban centers such as Chicago, New York, or Los Angeles. In most of our cities the techniques necessary to accomplish desegregation are relatively simple and creates no hardships. The experience in communities which have successfully desegregated could easily be transferred to cities of greater size. (Statement of the United States Commission on Civil Rights Concerning the "Statement by the President on Elementary and Secondary School Desegregation", April 12, 1970.)

Judge Butzner's decision suggests that complete desegregation can be obtained only in "towns, small cities, and rural areas" by the available techniques. But this very

record demonstrates that the technology is available to design desegregation plans for a city the size of Charlotte which will do the job of desegregating the schools. In part II which follows, we shall discuss the evidence about the workability of this plan.

II.

The Court Below Erred in Not Accepting the District Court's Decision That Its Desegregation Plan Was Feasible and in Setting It Aside as "Unreasonable," Particularly in the Absence of Any Equally Effective and Expeditious Alternate Plan.

The district judge in this case faced an acute practical problem in formulating a remedy to redress the violations of the Constitutional rights of black children in the Charlotte-Mecklenburg system. The system is large with 84,542 pupils in 106 schools. School segregation is still extensive with more than three-fourths of the children still in racially identifiable "white" schools or "black" schools. Some of the integrated schools have rapidly moved through a temporary integration to an all-black re-segregated situation. The free transfer plan was a conspicuous failure. To make matters worse, the school board refused to accept its duty of preparing an adequate plan. The board attacked the judge's decisions in public forums and the state legislature enacted an anti-busing law to nullify his decisions. The board did not even deliver on desegregation promises in its interim plan for 1969-70. In the summer of 1969 the black community had protested "one-way" desegregation in the interim plan by which only black pupils were bused to white schools and formerly black schools were abandoned. White parents groups were aroused against "busing" by televised school board meetings decrying the destruction

of "neighborhood schools." Against this background in October 1969, the board requested a delay in filing a desegregation plan. The judge regretfully concluded:

> The school board is sharply divided in the expressed view of its members. From the testimony of its members, and from the latest report, it cannot be concluded that a majority of its members have accepted the court's orders as representing the law which applies to the local schools. By the responses to the October 10 questions, the Board has indicated that its members do not accept the duty to desegregate the schools at any ascertainable time; and they have clearly indicated that they *intend not to do it* effective in the fall of 1970. They have also demonstrated a yawning gap between predictions and performance." (90a-91a)

Judge McMillan had no choice but to deny the requested delay in view of this Court's then recent decision in *Alexander* v. *Holmes County Board of Education*, 396 U.S. 19 (October 29, 1969). The school board then filed a third plan which the court later held "contains no promise or likelihood of desegregating the schools" (93a).

The singular thing about this case is that faced with this panoply of obstacles and difficulties, the district judge promptly found a means to completely integrate every school. He adopted the reasonable procedure of: (1) writing detailed legal guidelines for the preparation of a desegregation plan, (2) appointing the court's own expert consultant to devise a plan, and (3) ordering the professional staff of the Charlotte school system to work with the court's expert and give him full cooperation.[35] The

[35] The board was ordered to provide the consultant with work space, pay his fees and expenses, give him stenographic assistance, the help of business machines, draftsmen, and computers, as well as

procedure worked. By February 5, 1970, about two months after the expert's appointment, the court was able to approve the plan. Over plaintiffs' objection, and at the board's request, implementation was postponed until later in the spring to enable the board to make further preparation.[35]

The decision of the court of appeals approved the plan for junior and senior high schools rejecting the school board's appeal in this regard. But the elementary school plan was struck down because three judges of the court below held it was not "reasonable," and a fourth judge thought the plan undertakes the illegal objective of "achieving racial balance" by busing pupils.

To summarize petitioners' position briefly, we think the ground for disapproving the elementary plan—that the bus-

---

access to all the board's studies, including computer studies, of desegregation plans. The school staff was ordered to provide the consultant with "full professional, technical and other assistance" (110a). The Fourth Circuit approved this procedure citing Justice Brandeis' opinion *In the Matter of Peterson*, 253 U.S. 300 (1920). See also, *Scott* v. *Spanjer Bros., Inc.*, 298 F.2d 928 (2nd Cir. 1962); 9 Wigmore, Evidence § 2484 (3rd Ed. 1940), 2 Wigmore, Evidence § 563; McCormick, *Some Observation Upon the Opinion Rule and Expert Testimony*, 23 Texas L. Rev. 109, 131 (1945) (cases recorded as early as the 14th Century); cf. Rule 28 Fed. R. Crim. P., 18 U.S.C. (providing for court appointed experts in criminal cases). The appointment of a court-appointed expert panel to devise a school desegregation plan was approved in *Dowell* v. *Board of Education*, 244 F. Supp. 971, 973 (W.D. Okla. 1965), *aff'd* 375 F.2d 158, 162 (10th Cir. 1967), *cert. denied*, 387 U.S. 931 (1967). If a court has the equity power to award plaintiffs counsel fees against a foot-dragging school board (*Bell* v. *School Board of Powhatan County, Va.*, 321 F.2d 494 (4th Cir. 1963)), *a fortiori*, the court can take the milder course of taxing costs necessary to enable the judge to frame his decree. This is all the more appropriate because the case so plainly involves the public interest.

[35] After the court of appeals stayed part of the plan pending appeal, the district judge concluded that the integration requirement was no longer so urgent and postponed the entire plan until September 1970. Petitioners unsuccessfully opposed each delay and cross-appealed the delay order. The school year ended without any Fourth Circuit action on petitioners' motion to set aside the stay.

ing involved is too onerous for the board—is in Judge Winter's phrase, "insubstantial and untenable" (218a). Judge McMillan has ordered a very feasible and sensible plan. It promises to eliminate segregation immediately. There is no other plan in the record which is equally effective. The district court's determination that the plan is feasible is supported by substantial evidence and the findings to this effect were accepted on appeal as not clearly erroneous. Acceptable procedures were used to formulate the plan. There is no basis for concluding as a matter of law that the plan is "unreasonable." There was no abuse of discretion in formulating the remedy. The arguments about illegal busing to achieve racial balance and the neighborhood school theory are also legally insubstantial.

The district court acted within the limits of its discretion in fashioning an equitable remedy for the present unconstitutional system. The Finger Plan meets the principal test established by *Green* v. *County School Board of New Kent County*, 391 U.S. 430 (1968), in that it does promise to dismantle the dual system and provide a unitary system of schools. It will produce a system without a single school which might be labeled a "white" school or a "black" school. The elimination of racially identifiable schools promised by this plan produces the *result* called for by *Green, supra.*

If there was some proposal in the record which would be *equally effective or more effective* in eliminating segregation, there would be room for discussion about which plan is most desirable. But, Judge McMillan demonstrated that he was prepared to accept school board alternatives which produced equal results in accomplishing desegregation. He preferred such "home-grown products" even where he believed the expert consultant's proposals were more efficient. But an essential finding which supports the Finger Plan for elementary schools is Judge McMillan's conclusion that it

was *necessary* to adopt a plan of this type to accomplish the result of desegregation. The court found:

> Both Dr. Finger and the school board staff appear to have agreed, and the court finds as a fact, that for the present at least, there is no way to desegregate the all-black schools in Northwest Charlotte without providing (or continuing to provide) bus or other transportation for thousands of children. All plans and all variations of plans considered for this purpose lead in one fashion or another to that conclusion. (146a)

Judge Sobeloff's dissenting opinion, noted that "The point has been perceived by the counsel for the board, who have candidly informed us that if the job must be done then the Finger plan is the way to do it" (204).

The elementary plan ought to be upheld if the case is governed by the traditional rule for appellate review of a chancellor's decree in equity. The prevailing rule is that equitable discretion in framing remedies is necessarily broad and that a strong showing of abuse of discretion must be made to reverse such a decree. *United States* v. *W. T. Grant Co.*, 345 U.S. 629 (1953); *Continental Illinois Nat. Bank & Trust Co.* v. *Chicago R. I. & P. Co.*, 294 U.S. 648, 677 (1935); *United States* v. *Corrick*, 298 U.S. 435 (1936); *Rogers* v. *Hill*, 289 U.S. 582 (1933). In order to set aside the equity decree the appellant "must demonstrate that there was no reasonable basis for the district judge's decision," and thus that the remedy is so lacking in rationality as to amount to an abuse of discretion. *United States* v. *W. T. Grant Co., supra*, 345 U.S. at 634.

This Court's decisions in school cases have relied on traditional equitable principles on remedial issues. In the second *Brown* decision the Court invoked the tradition of

equity which was said to be "characterized by a practical flexibility in shaping its remedies and by a facility for reconciling public and private needs" (349 U.S. at 300). The *Brown II* Court cited with approval a passage in *Alexander* v. *Hillman*, 296 U.S. 222, 239 (1935), stating.

> Treating their established forms as flexible, courts of equity may suit proceedings and remedies to the circumstances of cases and formulate them appropriately to safeguard, conveniently to adjudge and properly to enforce substantial rights of all the parties before them.

In *Griffin* v. *School Board*, 377 U.S. 218, 232-233 (1964), the Court said that "relief needs to be quick and effective," and that a federal court could require a county to levy taxes if necessary to maintain a non-discriminatory public school system. *Green* v. *County School Board*, 391 U.S. 430, 439 (1968), emphasized that in formulating a remedy district courts were to assess "the circumstances present and the options available in each instance." In *United States* v. *Montgomery County Board of Education*, 395 U.S. 225, 235 (1969), the Court emphasized that "in this field the way must always be left open for experimentation." In the *Montgomery County* case the Court reversed a court of appeals decision which labeled the district judge's order too rigid and inflexible in favor of the trial court's "more specific and expeditious order." Finally, in decisions this term the Court has limited the discretion of the courts to delay relief by making it plain that the "standard of allowing 'all deliberate speed' for desegregation is no longer constitutionally permissible." *Alexander* v. *Holmes County Board of Education*, 396 U.S. 19 (1969); *Carter* v. *West Feliciana Parish School Board*, 396 U.S. 290 (1970); *Dowell* v. *Board of Public Education of Oklahoma City*, 396 U.S. 269 (1969).

There is nothing in this development of school desegregation law since *Brown* which warrants the departure from the traditional rule of appellate review announced by the plurality opinion of Judge Butzner for the court below. This new test of "reasonableness" enables the reviewing court to set aside the trial court's discretion on the ground that the appeals court majority would prefer another mode of relief albeit less effective. This runs exactly counter to the spirit of *Green* which declares that the result—actual desegregation—is the imperative thing and that the methodology of desegregation plans is secondary. It also runs counter to the philosophy of *Alexander, Carter* and *Dowell, supra,* which place a premium on the immediate implementation of constitutional rights pending the completion of litigation. The reasonableness test allows so much scope for unpredictable reversals of those decrees which accomplish actual desegregation as to substantially nullify *Alexander.* The reasonableness test signals the need for trial courts to adopt a "go-slow" cautious approach. Although busing is approved in principle in the opinion below, the result makes it clear that busing must be limited. The standard of "reasonableness" is broad and vague, but it does not allow broad discretion for trial courts to order busing. Any plan found objectionable by a school board can colorably be said to be "unreasonable" justifying at least a stay pending appeal. The "reasonableness" test is "deliberate speed" in a new guise.

The district court's decision that the Finger Plan is feasible is in any event supported by substantial evidence. It was error for the court of appeals to substitute its own finding of "unreasonableness" where there was no claim that the district court's findings were clearly erroneous. Cf. *Northcross* v. *Board of Education,* 397 U.S. 232, 235 (1970) As Judge Sobeloff has shown, in dissent, "there is no genuine dispute" on the feasibility of the plan; it is "simple and quite efficient" (206a). Here are the facts.

The Finger Plan requires transportation of pupils to accomplish desegregation. The system now transports 23,600 pupils by school bus and another 5,000 by common carrier.[37] The school board's proposed plan would bus about 5,000 additional children[38] but still would not desegregate the system, leaving 10 Negro schools.[39] The board's plan by busing about 8,000 more children than the board's proposal (a total of about 13,000 more than at present)[40] will eliminate racial identifiability from every school in the system. The court of appeals affirmed the order as to secondary students (1,500 senior high and 2,500 junior high pupils), but reversed the requirement as to elementary pupils (9,300 pupils, including 1,300 in schools to be simply rezoned, and 8,000 involved in cross busing between paired schools).[41]

The court carefully considered the busing from the standpoint of the children. The crucial finding is this:

> The court finds that from the standpoint of distance travelled, time en route and inconvenience, the children bussed pursuant to the court order will not as a group travel as far, nor will they experience more inconvenience than the more than 28,000 children who are already being transported at state expense. (143a)

At present the *average* one-way trip in the system is over 15 miles requiring one hour and fourteen minutes.[42] Eighty percent of the buses in the system require more than one

---

[37] See 138a.

[38] See 155a.

[39] The board plan would produce 9 elementary schools 83% to 100% black *serving over half of the entire black elementary population* (120a). In this plan Piedmont Junior High would be 90% black and shifting toward 100% black; segregation would actually increase by 1% more black pupils (124a).

[40] See 157a.

[41] *Ibid.*

[42] See 142a, 153a.

hour for a one-way trip now.[43] The average one-way trip under the court plan "for elementary students is less than seven miles, and would appear to require not over 35 minutes at most, because no stops will be necessary between schools."[44]

Judge Butzner's opinion approves "bussing [as] a permissible tool for achieving integration, but . . . not a panacea." He wrote that in deciding on busing boards "should take into consideration the age of the pupils, the distance and time required for transportation, the effect on traffic, and the cost in relation to the board's resources." This ruling is enlightened and progressive as used to approve busing plans for secondary schools. But it fails to satisfy constitutional requirements, if it means, as it apparently does, that these factors are to be weighed in determining whether schools will be integrated at all. There is no suggestion in the opinion that the majority found the Finger plan wanting in terms of the "age of the pupils", since busing elementary pupils is an established tradition in this system. There was no suggestion that the times and distances involved were excessive since they plainly compared favorably with the present practice. The determination to reverse the elementary plan is put entirely on the cost factor.

To begin with, the court below states the cost issue not in dollar terms, but in terms of the increased percentage of busing. Thus the cost is not considered in terms of its "relation to the board's resources" but only in relation to present expenditures for busing. Even on this basis the plan will require less busing in Charlotte than the statewide average of 54.9% of the pupils (137a). But the

---

[43] See 142a.

[44] See 153a. "The average *straight line* mileage between the elementary schools paired or grounded under the 'cross-bussing' plan is approximately 5½ miles." (183a) The *trip* mileage was arrived at by the bus superintendent's method of taking straight line mileage and adding 25%.

"board's resources" in this context are much broader than the local funds because in North Carolina transportation costs are largely met by the State, which replaces all buses after the local authorities make the first purchase, and bears most of the operating costs. The total annual cost per pupil is about $20 in the system. (Note that the $39.92 figure mentioned several times in opinions is erroneous and is corrected to $20 at 181a-182a.) Virtually the entire cost is borne by the State, except for one-time bus purchase costs and incidental administrative costs and parking expenses. The capital outlay required for the elementary busing is $5,400 per bus for 90 vehicles, or $486,000. This investment will bring not only vehicles with useful lives of ten or more years but also the right to have them perpetually replaced at no further local cost by the state board of education. Operational costs (reimbursed by the State) for the added elementary busing were found to be $186,000 annually (191a, 181a-182a).

When these expenditures are considered in the context of the local budget figures and the state budget figures they are so small as to be insignificant. The 1969-70 budget for Charlotte-Mecklenburg is $57,711,344, and future years may bring even larger expenditures. Between six and seven million dollars represents capital outlay and debt service. School construction is not included in these figures. In 1968-69 the state's education budget was over 3.59 billion dollars and this included over $14 million spent on transportation for an average of 610,760 pupils daily. Given this financial framework, the decision below that there is a financial barrier to integrating the local school system cannot be sustained. The appropriate principle was stated in *Cooper* v. *Aaron*, 358 U.S. 1, 19, where a unanimous court declared that:

> State support of segregated schools through any arrangement, management, funds or property cannot be

squared with the Amendment's command that no state shall deny to any person within its jurisdiction the equal protection of the laws.

We live in a society where it is a commonplace for government to spend vast sums to protect the constitutional rights of our citizens. New York City in recent weeks is reported to have spent a million dollars for overtime police protections for pro- and anti-war demonstrators in the streets. Examples could be proliferated. The rights of black children to an equal educational opportunity cannot be sacrificed on the ground that it costs too much to grant equal treatment. If necessary, the federal courts may even command that the money be levied and spent to redress denial of constitutional rights. *Griffin* v. *School Board*, 377 U.S. 218 (1964). But this case involves merely a decision about how existing resources are allocated. As a matter of fact, at the time of the judge's supplemental findings of March 21, 1969, the state board of education (a defendant in this case) had "approximately 40 brand new school busses and 375 used busses in storage, awaiting orders from school boards" (157a). "The problem is not one of availability of busses but of unwillingness of Mecklenburg to buy them and of the state to furnish or make them available until final decision of this case" (157a-158a).

Judge Sobeloff found the majority's conclusion with respect to the elementary plan so inconsistent with the decision approving the use of busing, satellite zoning, and similar techniques for secondary students that he said the "decision totally baffles me" (211a). The major distinction between the busing which is approved and that which is rejected is that the secondary plans primarily increased busing of black students to formerly white schools while the elementary plan requires busing of white children as well as Negroes. We are unlikely to ever end the dual

school systems until it becomes accepted that the inconveniences incident to reorganizations of the school systems will not be borne by black pupils alone but will be shared by the white community. Equal protection does require that desegregation plans be generally equitable and not place the entire burden on blacks. Judge McMillan announced at the time he approved the interim plan for 1969-70 that he would not again approve a plan for one-way busing (69a-70a). He wrote that:

> If, as the school superintendent testified, none of the modern, faculty-integrated, expensive, "equal" black schools in the system are suitable for desegregation now, steps can and should be taken to change that condition before the fall of 1970. Unsuitability or inadequacy of a 1970 "black" school to educate 1970 white pupils will not be considered by the court in passing upon plans for 1970 desegregation. (70a)

Judge McMillan's plan should be approved as an intelligent effort to comply with the *Brown* decision. When first considering the idea of eliminating all racially identifiable schools by a percentage formula he pointed out that:

> . . . it would be a great benefit to the community. It would tend to eliminate shopping around for schools; all the schools, in the New Kent County language, would be "just schools"; it would make all schools equally "desirable" or "undesirable" depending on the point of view; it would equalize the benefits and burdens of desegregation over the whole county . . . ; it would get the Board out of the business of lawsuits and real estate zoning and leave it in the education business; and it would be a tremendous step toward the stability of real estate values in the community and the progress of education of children. Though seemingly radical in nature, if viewed by people who live in totally segregated neighborhoods, it may like sur-

> gery be the most conservative solution to the whole problem and the one most likely to produce good education for all at a minimum cost.

This record shows that there is no reason not to use school buses to integrate the schools except to keep them segregated. Busing is a legitimate technique of educational administration. In Charlotte schools today, the walk-in neighborhood school is primarily a phenomenon in the black neighborhoods. Of 17,000 children in black schools, only about 541 are now transported to school (142a); no black school depends very much on school buses. By contrast, white schools have the opposite pattern, and "suburban schools, including the newest ones, have been located far away from black centers, and where they cannot be reached by many students without transportation" (*ibid.*). The Center for Urban Education recently said that "Riding the yellow school bus is as much a symbol of American education in 1970 as the little red schoolhouse was in 1900. And, until recently, it had conveyed no emotional overtones other than nostalgia for lost youth." ("On the Matter of Busing: A Staff Memorandum from the Center for Urban Education", February 1970.) The Civil Rights Commission has made the same point:

> Thus the arguments that some now make about the evils of busing would appear less than ingenuous. The plain fact is that every day of every school year 18 million pupils—40 percent of the Nation's public school children—are bused to and from school, and the buses log in the aggregate more than two billion miles—nine billion passenger miles—each year. It also should be understood that the overwhelming majority of school busing has nothing to do with desegregation or achieving racial balance. The trend toward consolidation of schools, for example, particularly in rural areas, requires extensive busing. It causes no

disruption to the educational routines of the children and is treated as normal and sensible.

• • •

In the Commission's view, the emphasis that some put on the issue of busing is misplaced. As most Americans would agree, it is the kind of education that awaits our children at the end of the bus ride that is really important.

(Statement of the United States Commission on Civil Rights Concerning the "Statement by the President on Elementary and Secondary School Desegregation", April 12, 1970)

CONCLUSION

For the foregoing reasons it is respectfully submitted that the petition for certiorari should be granted to review the judgment of the United States Court of Appeals for the Fourth Circuit.

Respectfully submitted,

Opinion and Order dated April 23, 1969 Regarding Desegregation of Schools of Charlotte and Mecklenburg County, North Carolina

Preliminary Summary

The case, originally filed in 1965, is now before the court under the "Motion for Further Relief" filed by the plaintiffs on September 6, 1968. The motion seeks greater speed in desegregation of the Charlotte-Mecklenburg schools, and requests elimination of certain other alleged racial inequalities. Evidence was taken at length on March 10, 11, 12, 13, 17 and 26, 1969. The file and the exhibits are about two and one-half feet thick, and have required considerable study. In brief, the results of that study are as follows:

The Charlotte-Mecklenburg schools are not yet desegregated. Approximately 14,000 of the 25,000 Negro students still attend schools that are all black, or very nearly all black, and most of the 24,000 have no white teachers. As a group Negro students score quite low on school achievement tests (the most objective method now in use for measuring educational progress); and the results are not improving under present conditions. The system of assigning pupils by "neighborhoods," with "freedom of choice" for both pupils and faculty, superimposed on an urban population pattern where Negro residents have become concentrated almost entirely in one quadrant of a city of 270,000, is racially discriminatory. This discrimination discourages initiative and makes quality education impossible. The quality of public education should not depend on the economic or racial accident of the neighborhood in which a child's parents have chosen to live—or find they must live—nor on the color of his skin. The neighborhood school concept never *prevented* statutory racial segrega-

tion; it may not now be validly used to *perpetuate* segregation.

Since this case was last before this court in 1965, the law (or at least the understanding of the law) has changed. School boards are now clearly charged with the affirmative duty to desegregate schools *"now"* by positive measures. The Board is directed to submit by May 15, 1969 a positive plan for faculty desegregation effective in the fall of 1969, and a plan for effective desegregation of pupil population, to be predominantly effective in the fall of 1969 and to be completed by the fall of 1970. Such plan should try to avoid any re-zoning which tends to perpetuate segregated pupil assignment. The Board is free to consider all known ways of desegregation, including bussing (the economics of which might pleasantly surprise the taxpayers); pairing of grades or of schools; enlargement and re-alignment of existing zones; freedom of transfer coupled with free transportation for those who elect to abandon *de facto* segregated schools; and any other methods calculated to establish education as a public program operated according to its own independent standards, and unhampered and uncontrolled by the race of the faculty or pupils or the temporary housing patterns of the community.

The Law Which Governs

This case vitally affects 83,000 school children of Charlotte and Mecklenburg County—and their families. That means virtually all of us. The School Board and this court are bound by the Constitution as the Supreme Court interprets it. In order that we think in terms of law and human rights instead of in terms of personal likes and preferences, we ought to read about what the Supreme Court has said.

Before 1954, public education in North Carolina was segregated by law. "Separate but equal" education was acceptable. This *de jure* segregation was outlawed by the two decisions of the Supreme Court in *Brown* v. *Board of Education*, 347 U. S. 483 (1954) and 349 U. S. 294 (1955).

The first *Brown* opinion held that racial segregation of schools by law was unconstitutional because racial segregation, even though the physical facilities and other tangible factors might be equal, deprives Negro children of equal educational opportunities. The Court recalled prior decisions that segregation of graduate students was unlawful because it restricted the student's "ability to study, to engage in discussions and exchange views with other students, and, in general, to learn his profession." The Court said:

> "Such considerations apply with added force to children in grade and high schools. To separate them from others of similar age and qualifications solely because of their race generates a feeling of inferiority as to their status in the community that may affect their hearts and minds in a way unlikely ever to be undone."

Quoting a lower court opinion, the Supreme Court continued:

> "'Segregation of white and colored children in public schools has a detrimental effect upon the colored children. The impact is greater when it has the sanction of the law; for the policy of separating the races is usually interpreted as denoting the inferiority of the Negro group. A sense of inferiority affects the motivation of a child to learn. Segregation with the sanction of law, therefore, has a tendency to [retard]

the educational and mental development of Negro children and to deprive them of some of the benefits they would receive in a racial[ly] integrated school system.'

"We conclude that in the field of public education the doctrine of 'separate but equal' has no place. Separate educational facilities are inherently unequal. . . ."

The second *Brown* case, decided May 31, 1955, directed school boards to do whatever was necessary to carry out the Court's directive as to the pending cases "with all deliberate speed" (349 U. S. 301).

North Carolina's most significant early response to *Brown* was the Pupil Assignment Act of 1955-56,[1] under which local school boards have the sole power to assign pupils to schools, and children are required to attend the schools to which they are assigned.

It is still to this day the local School Board, and not the court, which has the duty to assign pupils and operate the schools, subject to the requirements of the Constitution.

---

[1] N.C.G.S., § 115-176. Authority to provide for assignment and enrollment of pupils; rules and regulations.—Each county and city board of education is hereby authorized and directed to provide for the assignment to a public school of each child residing within the administrative unit who is qualified under the laws of this State for admission to a public school. Except as otherwise provided in this article, *the authority of each board of education in the matter of assignment of children to the public schools shall be full and complete*, and its decision as to the assignment of any child to any school shall be final. . . . No child shall be enrolled in or permitted to attend any public school other than the public school to which the child has been assigned by the appropriate board of education. In exercising the authority conferred by this section, each county and city board of education shall make assignments of pupils to public schools so as to provide for the *orderly and efficient administration* of the public schools, and *provide for the effective instruction*, health, safety, and general welfare of the pupils. Each board of education may adopt such reasonable rules and regulations as in the opinion of the board are necessary in the administration of this article. (Emphasis added.)

It is the court's duty to assess any pupil assignment plan in term of the Constitution, which is still the Supreme law of the land.

Some token desegregation of Charlotte city schools occurred during the late 1950's. In 1961, upon economic and administrative grounds not connected with questions of segregation, the Charlotte City schools and the Mecklenburg County schools were consolidated into one school administrative unit under one nine-member board known as the Charlotte-Mecklenburg Board of Education. By 1964 a few dozen out of more than 20,000 Negro school children were attending schools with white pupils.

This suit was filed on January 19, 1965, by Negro patrons, to seek orders expediting desegregation of the schools. At that time, serious questions existed whether *Brown* required any positive action by school boards to eliminate segregated schools or whether it simply forbade active discrimination. An order was entered in 1965 by the then District Judge in line with the law as then understood, substantially approving the Board's plan for desegregation. The Fourth Circuit Court of Appeals affirmed the order.

Pursuant to the approved plan the Board closed certain all-Negro schools, established school zones, built some new schools, and set up a freedom of choice arrangement for the entire system. The students in a zone surrounding each school are assigned to that school; a period is allotted each spring to request assignment to another school; no reason for transfer need be given; all transfer requests are honored unless the requested schools are full; no transportation is available to implement such transfer.

In appraising the results under this plan in 1969, four years later, we must be guided by some other and more recent things the Supreme Court has said.

In *Green* v. *New Kent County School Board*, 391 U. S. 430 at 435 (1968), the Supreme Court held unlawful a county school pupil assignment system which maintained a black school and a white school for the same grades. The Court said:

> "It was such dual systems that 14 years ago *Brown I* held unconstitutional and a year later *Brown II* held must be abolished; school boards operating such school systems were *required* by *Brown II* 'to effectuate a transition to a racially nondiscriminatory school system.' 349 U. S., at 301. It is of course true that for the time immediately after *Brown II* the concern was with making an initial break in a long-established pattern of excluding Negro children from schools attended by white children. The principal focus was on obtaining for those Negro children courageous enough to break with tradition a place in the 'white' schools. See, *e. g., Cooper* v. *Aaron*, 358 U. S. 1. Under *Brown II* that immediate goal was only the first step, however. *The transition to a unitary, nonracial system of public education was and is the ultimate end to be brought about;* . . ."
>
> • • • • •
>
> "It is against this background that 13 years after *Brown II* commanded the abolition of dual systems we must measure the effectiveness of respondent School Board's 'freedom-of-choice' plan to achieve that end.
>
> • • • • •
>
> ". . . In the light of the command of that case, what is involved here is the question whether the Board has achieved the 'racially nondiscriminatory school system' *Brown II* held must be effectuated in order

to remedy the established unconstitutional deficiencies of its segregated system. *In the context of the state-imposed segregated pattern of long standing, the fact that in 1965 the Board opened the doors of the former 'white' school to Negro children and of the 'Negro' school to white children merely begins, not ends, our inquiry whether the Board has taken steps adequte to abolish its dual, segregated system. Brown II* was a call for the dismantling of well-entrenched dual systems tempered by an awareness that complex and multifaceted problems would arise which would require time and flexibility for a successful resolution. *School boards such as the respondent then operating state-compelled dual systems were nevertheless clearly charged with the affirmative duty to take whatever steps might be necessary to convert to a unitary system in which racial discrimination would be eliminated root and branch. . . .*"

• • • • •

"*. . . 'The time for mere "deliberate speed" has run out,' Griffin* v. *County School Board,* 377 U. S. 218, 234; *'the context in which we must interpret and apply this language* [of *Brown II*] *to plans for desegregation has been significantly altered.'*"

• • • • •

"*. . . The burden on a school board today is to come forward with a plan that promises realistically to work, and promises realistically to work now.*

"The obligation of the district courts, as it always has been, is to assess the effectiveness of a proposed plan in achieving desegregation. . . ."

• • • • •

"We do not hold that 'freedom of choice' can have no place in such a plan. We do not hold that a 'freedom-of-choice' plan might of itself be unconstitutional, although that argument has been urged upon us. Rather, all we decide today is that *in desegregating a dual system a plan utilizing 'freedom of choice' is not an end in itself.* As Judge Sobeloff has put it,

> "'*Freedom of choice' is not a sacred talisman; it is only a means to a constitutionally required end—the abolition of the system of segregation and its effects.* If the means prove effective, it is acceptable, but if it fails to undo segregation, other means must be used to achieve this end. The school officials have the continuing duty to take whatever action may be necessary to create a 'unitary, nonracial system.'" *Bowman* v. *County School Board,* 382 F. 2d 326, 333 (C. A. 4th Cir. 1967) (concurring opinion).

". . . Although the general experience under 'freedom of choice' to date has been such as to indicate its ineffectiveness as a tool of desegregation, there may well be instances in which it can serve as an effective device. Where it offers real promise of aiding a desegregation program to effectuate conversion of a state-imposed dual system to a unitary, nonracial system there might be no objection to allowing such a device to prove itself in operation. On the other hand, if there are reasonably available other ways, such for illustration as zoning, promising speedier and more effective conversion to a unitary, nonracial school system, 'freedom of choice' must be held unacceptable."

* * * * *

"... The Board must be required to formulate a new plan and, in light of other courses which appear open to the Board, such as zoning, fashion steps which promise realistically to convert promptly to a system without a 'white' school and a 'Negro' school, but just schools."

(All emphasis added except for the word "required" in the first quoted paragraph and the word "now" in the fifth quoted paragraph.)

It is obvious that between 1955 and 1968 the meaning and the force of the constitutional guaranty that education if tax paid be equal for all has been intensified. The duty now appears as not simply a negative duty to refrain from active legal racial discrimination, but a duty to act positively to fashion affirmatively a school system as free as possible from the lasting effects of such historical *apartheid*. It is in this light that the actions of school boards must now be studied.

Findings of Fact

Some Facts About the Charlotte-Mecklenburg School System:

a) *General Information.*—The system covers 550 square miles and serves more than 82,000 pupils. It is 43rd in size among the school administrative units of the United States. The county population is over 335,000. The population of Charlotte is now about 270,000. The student population increases at a rate betwen 2,500 and 3,000 students per year. The schools are 107 in number, including 76 elementary schools (grades 1 through 6), 20 junior high

schools (grades 7 through 9) and 11 senior high schools (grades 10 through 12). The Board also operates a learning academy, 4 child development centers (kindergartens for the underprivileged) and 3 psycho-educational clinics.

The students on the rolls as of January 1969 include 44,835 elementary students, 20,675 junior high students and 16,690 senior high students. Of these students, about 29% are Negro and about 71% are white. The ratio of black to white of all ages in the county is about one to three.

The 5,880 school employees include 3,553 classroom teachers; 404 other members of the instructional staff including principals, directors and special staff members. These include 60 guidance counselors and 114 librarians. Other employees include 325 secretaries and other clerical employees, 995 cafeteria employees, 357 janitors and maids, 219 maintenance and transportation workers and 27 people assigned to educational television work. The school system is the largest employer in the state's most populous county.

The nine members of the Board of Education are elected three every two years on a non-partisan basis for six-year terms.

Over 18% of the 3,553 classroom teachers have graduate certificates. Some 2,870 or nearly 81% have Class A certificates. Some 852 teachers are men.

Of 1968's 4,095 high school graduates, about 62% or 2,539 entered college. The drop-out rate for the past two years has been approximately 2.3% of the total enrollment of the schools.

The operating budget for the system (not counting construction costs) was nearly $40,000,000 last year. Average per pupil expense was over $530. Teachers' salaries range

from $5,669 to $10,230.25. School funds come 58% from the state, 35% from local sources, and 7% from federal funds.

Class size averages approximately 28 students in elementary schools (the first six grades); 26.4 in junior high schools and 29.3 in senior high schools.

All schools have libraries. The total number of books in the libraries is over 806,000, which is nearly 10 books per pupil, with a value estimated at $2,677,804. (This may be compared with the average of roughly one-half a book per pupil in the schools of the District of Columbia a couple of years ago.) These are not the textbooks which are furnished free by the state for individual use, but are library books for general circulation. Circulation last year was 2,884,252, or an average per pupil of 36 books.

The Board operates the largest food service industry in the state, serving over 70,000 meals a day on a budget of four and one-half million dollars.

Nearly one-fourth of the students (almost 20,000 last year) attend classes at the planetarium in the Children's Nature Museum. This is reportedly more children than attend regular classes at any other planetarium in the country.

Special consultants and teachers are provided in special areas such as art, music, languages, social studies, science, mathematics and physical education. Special teachers are employed to teach classes for the gifted, the mentally retarded and the physically handicapped. Guidance counselors, school psychologists and social workers are available where needed.

Faculty salaries are higher in Mecklenburg County than in most other counties of the state, by virtue of a substantial salary supplement from local taxpayers.

b) *History and Geography; Background of De Facto Segregation.*—Charlotte (270,000-plus) sits in the center of Mecklenburg County (550 square miles, total population over 335,000). The central city may be likened to an automobile hub cap, the perimeter area to a wheel, and the county area to the rubber tire. Tryon Street and the Southern Railroad run generally through the county and the city from northeast to southwest. Trade Street runs generally northwest to southeast and crosses Tryon Street at the center of town at Independence Square. Charlotte originally grew along the Southern railroad tracks. Textile mills with mill villages, once almost entirely white, were built. Business and other industry followed the highways and the railroad. The railroad and parallel highways and business and industrial development formed something of a barrier between east and west.

By the end of World War II many Negro families lived in the center of Charlotte just east of Independence Square in what is known as the First Ward—Second Ward—Cherry—Brooklyn area. However, the bulk of Charlotte's black population lived west of the railroad and Tryon Street, and north of Trade Street, in the northwest part of town. The high priced, almost exclusively white, country was east of Tryon Street and south of Trade in the Myers Park—Providence—Sharon—Eastover areas. Charlotte thus had a very high degree of segregation of housing before the first *Brown* decision.

Among the forces which brought about these concentrations should be listed the original location of industry along and to the west of the Southern railroad; the location of Johnson C. Smith University two miles west of Tryon Street; the choice of builders in the early 1900's to go south and east instead of west for high priced dwelling construction; the effect of private action and public law on choice of dwelling sites by black and by white pur-

chasers or renters; real estate zoning which began in 1947; and the economics of the situation which are that Negroes have earned less money and have been less able to buy or rent expensive living quarters.

Local zoning ordinances starting in 1947 generally allow more varied uses in the west than in the east. Few if any areas identified as black have a residential restriction stronger than R-6, which means that a house can be built on a lot as small as 6,000 square feet. Zoning restrictions in other areas go as high as 12,000 and 15,000 square feet per lot. Nearly all industrial land in the city is in the west. The airport in the southwest with its jet air traffic inhibits residential development. Many black citizens live in areas zoned industrial, which means that the zoning law places no restriction on the use of the land. The zoning laws follow the pattern of low cost housing and industry to the west and high cost housing with some business and office developments to the east.

City planning has followed the same pattern.

Tryon Street and the Southern railroad were not built to segregate races. In the last fifteen years grade crossings have been eliminated at great expense at Fourth Street, Trade Street, Twelfth Street and Independence Boulevard; and an elevated half-mile bridge, the Brodie Griffith Skyway, is now being built across the railroad in North Charlotte at a cost of more than three million dollars. The ramparts are being pierced in many spots and inner-city highways now under construction will make communication much simpler.

However, concentration of Negroes in the northwest continues. Under the urban renewal program thousands of Negroes were moved out of their shotgun houses in the center of town and have relocated in the low rent areas to the west. This relocation of course involved many ad

hoc decisions by individuals and by city, county, state and federal governments. Federal agencies (which hold the strings to large federal purses) reportedly disclaim any responsibility for the direction of the migration; they reportedly say that the selection of urban renewal sites and the relocation of displaced persons are matters of decision ("freedom of choice"!) by local individuals and governments. This may be correct; the clear fact however is that the displacement occurred with heavy federal financing and with active participation by local governments, and it has further concentrated Negroes until 95% or so of the city's Negroes live west of the Tryon—railroad area, or on its immediate eastern fringes.

Onto this migration the 1965 school zone plan with freedom of transfer was superimposed. The Board accurately predicted that black pupils would be moved out of their midtown shotgun housing and that white residents would continue to move generally south and east. Schools were built to meet both groups. Black or nearly black schools resulted in the northwest and white or nearly all white schools resulted in the east and southeast. Freedom of students of both races to transfer freely to schools of their own choices has resulted in resegregation of some schools which were temporarily desegregated. The effect of closing the black inner-city schools and allowing free choices has in overall result tended to perpetuate and promote segregation.

SOME BOARD ACTIONS FOUND NOT TO BE DISCRIMINATORY

No racial discrimination or inequality is found in the following disputed matters:

1. *The use of federal funds for special aid to the disadvantaged.* The testimony and the exhibits failed to show

that federal money was used with any discrimination by race or with any improper displacement of local money.

2. *Use of mobile classrooms.* In recent years the system has required the addition of nearly two classrooms per week. Mobile classrooms have been used to provide extra space temporarily to cope with shifts and growth in school population. Mobiles are not inferior in quality and comfort to permanent classrooms, and recent models are superior in many ways to many existing permanent classrooms. Their use and location are matters to be determined by the Board in light of the court's instructions hereafter on the preparation of a new plan for pupil assignment.

3. *The quality of the school buildings and equipment.* The evidence showed the per pupil value of the land and buildings and equipment of the various schools. Average value of these items per pupil for elementary schools was $861; for junior high schools $1,229; and for senior high schools $1,567. Schools described by witnesses as "white" ranged well up and down on both sides of that average figure and schools described by witnesses as "black" showed a similar variation. Several of the oldest and most respected "white" elementary schools in the county (Sharon Road and Steele Creek, for example) have very low per pupil facilities values. One of the newest but still all black high schools (West Charlotte) has one of the highest per pupil facilities values. The highest priced school (Olympic High) is totally desegregated (522 white and 259 black students). No racial discrimination in spending money or providing facilities appears.

4. *Coaching of athletics.* Coaches at the predominantly black schools are usually black. Coaches at the predomi-

antly white schools are usually white. Several black coaches have been employed at "white" schools. No black coach was shown to have applied and been refused a job. No pattern of discrimination appears in the coaching ranks.

5. *Parent-Teacher Association contributions and activities.* Parents contribute to school projects through voluntary Parent-Teacher Associations. This voluntary parental action is not racial discrimination against children whose parents are less able to make such contributions, and it does not come about through state action.

6. *School fees.* It was contended that the school fee system is discriminatory. For example, at the elementary level, grades 1 through 6, each student is supposed to bring a dollar to school at the beginning of the year to provide some extra learning aids in the form of paper, art materials and the like. In poor communities collection of this fee averages only about 50%, whereas nearly all wealthy children pay all the fees assessed in their schools. This non-payment of school fees by the poor is not a racial discrimination against the poor. The schools where people are poorer have other funds by which this 50¢ per pupil can be made up.

7. *School lunches.* School lunches are provided free to needy students. The court finds that no one has ever knowingly been denied a free lunch on racial grounds if he could not pay for it.

8. *Library books.* Library books of comparable quality and content are available to all students, black and white, in all schools in an average number of nearly ten per pupil.

9. *Elective courses.* Some elective courses such as German are offered at some but not all of the high schools. They are offered at a school only if enough students express a desire for the course. Not all schools therefore have all elective courses every year. This situation is not the result of discrimination on account of race.

10. *Individual Evaluation of Students.* Individual students are evaluated annually in terms of achievement in particular subjects, and divided into groups for the study of particular subjects in accordance with their achievement. (This is not, truly described, the "track" system which was elaborately criticized by Judge Skelly Wright in his 119-page opinion in *Hobson* v. *Hansen*, 269 F. Supp. 401 (D.C. D.C., 1967).) Few black students are in the advanced sections and most are in regular or slow sections. Assignments to sections are made by the various schools based not on race but on the achievement of the individual students in a particular subject. There is no legal reason why fast learners in a particular subject should not be allowed to move ahead and avoid boredom while slow learners are brought along at their own pace to avoid frustration. It is an educational rather than a legal matter to say whether this is done with the students all in one classroom or separated into groups.

11. *Gerrymandering.* Gerrymandering was contended in the 1965 hearing of this case. Perhaps the evidence comes closer to proving it this time. The court is not by this order foreclosing the later assertion of that contention or for that matter any other contention which may be advanced, because it is the court's duty to keep the matter under advisement. However, in view of the court's orders herein which are expected to produce substantial changes in the

pupil assignment system and a reappraisal of all zoning considerations, it is believed that nothing in particular need be said here about specific school district lines.

SOME COMMENT ON SPECIFIC ISSUES

a) *The Present State of Desegregation.*—Defendant's Exhibit Seven (attached as an appendix to this opinion) shows pupil and faculty population for each school in the system, by races, in March of 1965 and in October of 1968. From this and other evidence the following facts are apparent:

1) *The Rural Schools Are Largely Desegregated.* Of the 32,000 rural children of all twelve grades, some 23,000, black and white, are being hauled by bus to desegregated schools. No rural schools are all-black. The only all-white county schools are four new schools in the south and east portions of the county: Beverly Woods, Devonshire, Idlewild and Lansdowne.

2) *The City Schools are Still Largely Segregated.* A few city schools, Elizabeth (58% Negro); Highland (13% Negro); Plaza Road (19% Negro); Randolph (28% Negro); Sedgefield (19% Negro); Spaugh (18% Negro) and Harding (17% Negro) have a substantial degree of apparently stabilized desegregation. However, most of the fully desegregated city schools are not stable in that situation, but are rapidly moving (through a temporary desegregation) from an all-white to an all-black condition. Dramatic examples are Barringer (84% Negro); Villa Heights (86% Negro); Piedmont (89% Negro); Tryon Hills (50% Negro); Hawthorne Junior High (52% Negro); Lakeview (65% Negro); and apparently Dilworth (39% Negro) and Wilmore (33% Negro).

3) *More Than Three-Fourths of the Children Attend Schools Which Have One or More Children of the Opposite Race.* In Cornelius (49% Negro), Dilworth (39% Negro), Elizabeth (58% Negro) and a few others, the races are close to being balanced in numbers. However, most schools have only a small handful of the minority race. Illustrations are: Second Ward High School (1,139 black and three white); Midwood (522 white, one black); Lincoln Heights (817 black, two white).

4) *Most Black Students Attend Totally or Almost Totally Segregated Schools.* Out of 24,000 black students:

4,780	attend nine all-black elementary schools;
3,380	attend six elementary schools which are more than 99% black;
2,491	attend three all-black junior high schools;
727	attend York Road with only six white fellow junior high students;
1,569	high school students attend all-black West Charlotte; and
1,139	black Second Ward High School students have only three white classmates.
14,086	

In other words, of the 24,000 or so black students, 14,086 of them attend school daily in schools that are all-black unless at York Road they see one of the six white students or at Second Ward they see one of the three white students, who were enrolled there last October.

5) *Most White Students Attend Largely or Completely Segregated Schools.* Thirteen elementary schools with 8,044 pupils are 100% white; eighteen other elementary schools with a pupil enrollment of 10,651 have only 150 black students. The total number of white elementary students is only 31,545. At the junior high level, 7,641 out of 14,741 white students attend school with only 193 black students in six schools. In the high schools, 12,310 white students attend school with 1,642 blacks, while 2,735 black students at West Charlotte and Second Ward attend school with three white students.

b) *The Opinions of Experts.*—Doctors Larson, Finger and Passy, all from Rhode Island College, of Providence, Rhode Island, testified at length. They submitted a 55-page report which outlines several possible plans for realignment of school zones and for provision of transportation; for pairing schools; for setting up feeder systems; for educational parks; and other approaches towards desegregation. None was as familiar with the local situation as the local Board and school administrators. All drew certain conclusions from the Coleman Report, which is a collection of statistics on performance of school children in certain areas about the country. Some said that kindergarten for all children would help the situation. Some said underprivileged children should start getting public education several years before first grade age. Some said that improving the faculty was important. Available statistics and expert opinion agreed that Negro students as a group do noticeably worse on achievement tests than students generally. The experts agreed that if children are underprivileged and undercultured, their school performance will be generally low. One expert, Dr. Passy, said that socio-

economic-cultural background is the sole major determinant of school performance. The Abraham Lincoln-Charles Kettering theory of the rise of Americans from poor backgrounds received small support.

One point on which the experts all agree (and the statistics tend to bear them out) is that a racial mix in which black students heavily predominate tends to retard the progress of the whole group, whereas if students are mingled with a clear white majority, such as a 70/30 ratio (approximately the ratio of white to black students in Mecklenburg County), the better students can hold their pace, with substantial improvement for the poorer students.

c) *The "Neighborhood School" Theory.*—Recently, the School Board has followed what it calls the "neighborhood school" theory. Efforts have been made to locate elementary schools in neighborhoods, within walking distance of children. The theory has been cited to account for location and population of junior and senior high schools also.

"Neighborhood" in Charlotte tends to be a group of homes generally similar in race and income. Location of schools in Chalotte has followed the local pattern of residential development, including its *de facto* patterns of segregation. With a few significant exceptions, such as Olympic High School (about ⅓ black) and Randolph Road Junior High School (28% black), the schools which have been built recently have been black or almost completely black, or white or almost completely white, and this probability was apparent and predictable when the schools were built. Specific instances include Albemarle Road Elementary (99%+ white); Beverly Woods (100% white); Bruns Avenue (99%+ black); Hidden Valley (100% white); Olde Providence (98% white); Westerly Hills (100+ white); Albemarle Road Junior High (93% white).

Today people drive as much as forty or fifty miles to work; five or ten miles to church; several hours to football games; all over the county for civic affairs of various types. The automobile has exploded the old-fashioned neighborhood. Parents with children of all ages may be members of two or three separate and widely scattered school "communities." *Putting a school in a particular location is the active force which creates a temporary community of interest among those who at the moment have children in that school.* The parents' community with the school ordinarily ends the day the youngest child graduates.

If this court were writing the philosophy of education, he would suggest that educators should concentrate on planning schools as educational institutions rather than as neighborhood proprietorships. The neighborhood school concept may well be invalid for school administrative purposes even without regard for racial problems. The Charlotte-Mecklenburg School Board today, for example, is transporting 23,000 students on school buses. First graders may be the largest group so transported. If a first grader lives far enough from school to ride a bus, the school is not part of his neighborhood.

When racial segregation was required by law, nobody evoked the neighborhood school theory to *permit* black children to attend white schools close to where they lived. The values of the theory somehow were not recognized before 1965. It was repudiated by the 1955 North Carolina General Assembly and still stands repudiated in the Pupil Assignment Act of 1955-56, which is quoted above. The neighborhood school theory has no standing to override the Constitution.

d) *Bussing.*—Under North Carolina General Statutes, §115-180, the Board is expressly authorized to operate

school busses to transport school children. The state pays bus expenses only for rural children and for some who have been annexed into the city in recent years. This apparent discrimination against city dwellers is reportedly under attack in another court. This Board already transports 23,000 students to school every day out of the 32,000 who live in the area presently eligible for bus service. The present cost of school bussing is about $19 for bus operation plus the cost of the bus which at $4,500 per bus should not exceed $20 per pupil a year. In other words, it costs about $40 a year per pupil to provide school bus transportation, out of total per pupil school operating costs of about $540. The income of many black families is so low they are not able to pay for the cost of transportation out of segregated schools to other schools of their choice.

The Board has the power to use school buses for all legitimate school purposes. Buses for many years were used to operate segregated schools. There is no reason except emotion (and I confess to having felt my own share of emotion on this subject in all the years before I studied the facts) why school busses cannot be used by the Board to provide the flexibility and economy necessary to desegregate the schools. Busses are cheaper than new buildings; using them might even keep property taxes down.

e) *Faculty Desegregation.*—The Board employs over 2,600 white teachers and over 900 black teachers. New teachers hired last year numbered 700. Technically their contracts are with the Board of Education to teach where assigned. The Board makes no sustained effort to desegregate faculties. The choice where to teach is a matter between the principal and the prospective teacher. The Board assumes white teachers will tend to choose white schools and black teachers black schools.

The results of this passive selection policy are obvious. Of the thirteen all-black schools in the system serving 8,840 students, only four have any white teachers. Those four have ten white teachers and 161 black teachers for 3,662 students. Few predominantly black schools have any substantial number of white teachers, except a few schools which serve areas rapidly turning from white to black. Eight other schools 99% or more black had only six white teachers among them for 5,246 black and 24 white pupils. Second Ward and West Charlotte High Schools, with 2,700 black students and three white students, have 131 black teachers and only nine white teachers.

All of the white elementary schools have at least one and in a few cases as many as three or four black teachers. The proportions of black teachers in the junior and senior high schools run slightly higher. The system has not operated, however, to produce any substantial teaching of black students by white teachers.

Desegregation of faculties does not depend upon proof of superiority of one group of teachers or students over the other. Whatever the discrimination that may result from a segregated faculty, it will be eliminated only when a child attending any school in the system will face about the same chances of having a black or a white teacher as he would in any other school. Mecklenburg schools pay a sizeable salary supplement. Desegregation is proceeding in other counties and school districts. It can not be assumed and should not be a tacit part of Board policy that white school teachers are opposed to equality of education or that they will refuse to teach in black schools. In fact, white and black teachers are working together in substantial numbers in several schools of this system and there was no evidence at the hearing of any friction or

difficulty caused by a bi-racial faculty. It is from the teachers that children learn their first glimmerings of the right to equality of opportunity which still constitutes America's chief contribution to modern civilization. The right of all children to equal education is part of that right. It is believed that if the Board takes a stand that requires faculty desegregation and treats all teachers equally in working towards that end, the teachers will participate wholeheartedly.

f) *Metropolitan High School.*—Supported by impressive recommendations from Engelhart, Engelhart & Leggett, educational consultants, the Board has planned and has two million dolars on hand to build Metropolitan High School at or near the location of present Second Ward High School. In addition to being a school for conventional high school work, it is to be a center for vocational training and special courses in music, the creative and performing arts and other special subjects not practical to offer in all the high schools. Second Ward is now a 99%+ black school in the Brooklyn urban renewal area four or five blocks south of the Court House and City Hall. The First Baptist Church and the School Board itself have buildings under way on adjacent or nearby land. This is near the geographical and traffic center of the city and county, one-half a mile from the central business district, a few blocks from Central Piedmont Community College and within easy travel distance of most of the city. The location and proposed purposes appear ideal.

Plaintiffs' attorneys object to Metropolitan High School. Some present school patrons want the school built. The School Board has announced a stoppage of work on that school pending this decision.

All three groups may be proceeding upon an erroneous assumption—that the school if built will be a black school because the pupil and faculty populations will be governed by freedom of transfer and school zones as presently administered. That assumption should no longer be entertained. Pupils for regular and vocational subjects can travel or be transported to and from this area, in all directions, with greater ease than is true of any other location in the county. The nearest other high schools, Harding, West Charlotte, Garinger, East and Myers Park, form a hollow pentagon six or seven miles on the side surrounding Second Ward. It would be tragic to refrain from building a needed educational facility simply upon the assumption that it has to be an all-black school and therefore either unlawful or unattractive. The School Board is advised to make plans for desegregation of this school along with other schools in the system. With the unrestricted statutory power to assign pupils and provide transportation, the only thing necessary to build Metropolitan High School according to the dreams of its planners is the decision to do so.

g) *The Percentage Racial Mix.*—Counsel for the plaintiffs says that since the ratio of white to black students is about 70/30, the School Board should assign the children on a basis 70% white and 30% black, and bus them to all the schools. This court does not feel that it has the power to make such a specific order. Nevertheless, the Board does have the power to establish a formula and provide transportation; and if this could be done, it would be a great benefit to the community. It would tend to eliminate shopping around for schools; all the schools, in the *New Kent County* language, would be "just schools"; it would make all schools equally "desirable" or "undesirable" de-

pending on the point of view; it would equalize the benefits and burdens of desegregation over the whole county instead of leaving them resting largely upon the people of the northern, western and southwestern parts of the county; it would get the Board out of the business of lawsuits and real estate zoning and leave it in the education business; and it would be a tremendous step toward the stability of real estate values in the community and the progress of education of children. Though seemingly radical in nature, if viewed by people who live in totally segregated neighborhoods, it may like surgery be the most conservative solution to the whole problem and the one most likely to produce good education for all at minimum cost. It would simply put the all-white and all-black school people in the same school situation now being experienced by patrons of Cornelius, Davidson, Ranson, Long Creek, Dilworth, Olympic, Huntersville, Pineville, Randolph Road Junior High, Statesville Road, and similar schools. Such action would be supported by the unanimous testimony of all the experts and by inferences from the Coleman Report that although mixing a few whites and a heavy majority of blacks retards the whole group, nevertheless mixing a *substantial majority of whites* and a few blacks helps the blacks to advance without retarding the whites.

h) *A Word About the School Board.*—The observations in this opinion are not intended to reflect upon the motives or the judgment of the School Board members. They have operated for four years under a court order which reflected the general understanding of 1965 about the law regarding desegregation. They have achieved a degree and volume of desegregation of schools apparently unsurpassed in these parts, and have exceeded the performance of any school board whose actions have been re-

viewed in appellate court decisions. The Charlotte-Mecklenburg schools in many respects are models for others. They are attractive to outside teachers and offer good education. The problem before this court is only one part (albeit a major part) of the educational problem. The purpose of this court is not to criticize the School Board, but to lay down some legal standards by which the Board can deal further with a most complex and difficult problem. The difference between 1965 and 1969 is simply the difference between *Brown* of 1955 and *Green* v. *New Kent County* of 1968. The rules of the game have changed, and the methods and philosophies which in good faith the Board has followed are no longer adequate to complete the job which the courts now say must be done "now."

Conclusions of Law

1. Since 1965, the law has moved from an attitude barring discrimination to an attitude requiring active desegregation. The actions of school Boards and district courts must now be judged under *Green* v. *New Kent County* rather than under the milder lash of *Brown* v. *Board of Education*. The court has outlined changes which should be made in the activity and theory of the local Board.

2. The manner in which the Board has located schools and operated the pupil assignment system has continued and in some situations accentuated patterns of racial segregation in housing, school attendance and community development. The Board did not originate those patterns; however, now is the time to stop acquiescing in those patterns.

3. Freedom of transfer as operated in this system does not answer the problems of racial segregation. The evidence shows that the black students as a group have very low incomes. Freedom of transfer without transportation is to such a student often an empty right.

4. The faculties have not been adequately desegregated as directed. This permits and promotes inequality of education.

5. The court does not find any inequality based upon racial motives or reasons in the use of federal funds; the use of mobile classrooms; quality of school buildings and facilities; athletics; PTA activities; school fees; free lunches; books; elective courses; nor in individual evaluation of students. The problem of alleged gerrymandering of district lines need not be covered separately from the general order herein made.

6. There has been substantial desegregation in many areas—mostly the rural areas—of this large and complicated school system. A majority of the black students, however, still attend segregated schools and seldom, if ever, see a white fellow student. Many all-black and all-white schools still remain. The neighborhood school concept and freedom of choice as administered are not furthering desegregation.

7. The School Board has an affirmative duty to promote faculty desegregation and desegregation of pupils, and to deal with the problem of the all-black schools.

8. The School Board is free and encouraged to use school busses or other public transportation and to use

mobile classrooms as needed to provide equality of educational opportunity.

9. The Board has assets and experience beyond the reach of a judge to deal with all these problems, and should be requested to formulate a plan and time table of positive action.

ORDER

1. All findings or statements of fact in this opinion and order shall be deemed conclusions of law, and all conclusions of law shall be deemed to be findings of fact as necessary in support and furtherance of this order. All competent and relevant evidence in the record has been considered in support of this order.

2. The defendant is directed to submit by May 15, 1969, a plan for the active and complete desegregation of teachers in the Charlotte-Mecklenburg school system, to be effective with the 1969-70 school year. Such plan could approach substantial equality of teaching in all schools by seeking to apportion teachers to each school on substantially the same ratio (about three to one) as the ratio of white teachers and black teachers in the system at large. It is suggested that teachers' preferences not be especially sought and that teachers be assigned as a routine matter for the purpose of accomplishing this equalization of the application of educational manpower and womanpower in the public schools. Such a plan should provide safeguards against racial discrimination in the discharge of any teachers whose jobs might be changed or abolished. Such safeguards should include provisions that if anyone has to be discharged, his qualifications will be weighed against

those of all personnel in the system rather than simply against those in the capacity in which he has been working; no teacher should be dismissed or demoted or denied employment or promotion because of race or color. In other words, the Board will be expected to see to it that teachers displaced by virtue of this order will not be discriminated against on account of race.

3. The defendant is directed to submit by May 15, 1969, a plan and a time table for the active desegregation of the pupils, to be predominantly effective in the fall of 1969 and to be completed by the fall of 1970. Freedom of choice and zoning may be used in such a plan provided they promote rather than defeat desegregation. If freedom of choice is retained in such plan, it should include provision for transportation free for any student who requests transfer out of a school where his race is in the majority, and to any school where his race is in the minority, and a means of insuring that all students have full and timely knowledge of the availability of such transportation.

4. In formulating its plan the Board is, of course, free to use all of its own resources and any or all of the numerous methods which have been advanced, including pairing of grades and of schools; feeding elementary into junior high and into senior high; combinations of zone and free choice where each method proceeds logically towards eliminating segregation; and bussing or other transportation. The Board may also consider setting up larger consolidated school units freely crossing city-county lines to serve larger areas. There is no magic in existing school zone lines nor in the present size of any school. The Board is encouraged to get such aid as may be available from state and federal agencies including the offices

of the Department of Health, Education and Welfare. The court does not direct a treaty with the Department, but does suggest that since its employees are in the business of dealing with these problems, they have a store of technical assets and manpower and information which could be useful in the Board's making any particular judgment or analysis.

5. The plan should be the plan of the Board for the effective operation of the schools in a desegregated atmosphere, removed to the greatest extent possible from entanglement with emotions, neighborhood problems, real estate values and pride. The court's task has not been easy, but it is fully realized that the task facing the Board is far more difficult and will require a conspicuous degree of further public service by the Board's members.

This the 23rd day of April, 1969.

Order dated June 3, 1969

The defendants have filed a proposed plan of action pursuant to the court order of April 23, 1969. The plaintiffs have filed a motion requesting restraint on further school construction until the school board has dealt satisfactorily with the segregation question. A further hearing is indicated. The court has two weeks of criminal court starting June 2; and Monday, June 16, 1969 is the earliest predictable time that a hearing could be conducted.

All parties are therefore notified that a hearing will be held in the United States Court House in Charlotte starting on Monday, June 16, 1969, at 10:00 a.m. All parties are requested to be present.

Under the law the burden is upon the school board to come forward with a plan which "promises realistically to work now" to eliminate segregation in the Charlotte-Mecklenburg schools. The obligation of the court under the law is "to assess the effectiveness of a proposed plan in achieving desegregation." Evidence will be received from all parties on these general subjects.

Without limiting any party in the scope and type of relevant evidence which he may wish to produce, the court directs the parties to come forward with exhibits, statistics, records, and other information so that the court will be in adequate position to make findings upon the following subjects, among others:

1. What has been accomplished, by June 16, toward achieving the duty which the defendants have accepted of "achieving substantial faculty desegregation," and what the plan proposed by the defendants may be expected to accomplish further along that line by September, 1969.

2. What school zones may fairly be said to have been gerrymandered (either by control of their boundary lines

or by control of their student capacity or both) so as to fit a particular pocket or community of all- or nearly all-black or all- or nearly all-white students; and what could be done to reduce or eliminate segregation in those zones.

3. What progress if any toward desegregation of pupils may reasonably and predictably be expected by September, 1969, from the pupil plan presented by the defendants.

4. What effect if any the pupil plan may be expected to have upon the present large group of all-black or 99%+ black schools, and upon the more than 14,000 children who still attend them.

5. Why students allowed to transfer from one zone to another to avoid racial discrimination should be penalized by being required to wait a year before taking part in varsity athletics, as the proposed pupil plan requires, which self-admitted "penalty" is lifted if they return to the zone originally assigned by the defendants.

6. The actual meaning of the "free transfer" plan—the numerical extent to which the plan requires that students wishing to transfer and being supplied transportation to transfer will actually find space in the schools of choice if they exercise their option to transfer. This is not a trick question but one directed to the ambiguity of the plan and the conflicts in the language used in the plan. Clarification is requested.

7. What steps will be followed to insure that the transfer-with-transportation choice is actually communicated personally to children who may be entitled to the choice, and to their parents, and affirmatively accepted or rejected by them.

8. Statistics on school population by race in the system for the years since consolidation and similar statistics for the separate county and city units from 1954 until consolidation.

9. The facts about school bussing operations of the Charlotte-Mecklenburg school system, including such records as already exist on bus routes, year by year, since 1961, including where the busses get the pupils and where they take them, and the races of the pupils transported.

10. The pupil attendance zones or school zones, year by year, for all years since 1954.

11. What the pending school construction programs will do in terms of creating pupil accommodations, and whether the programs will tend to perpetuate or to alleviate segregation in the schools.

12. Why decision on the construction and purposes of Metropolitan High School should not be postponed until after a final court ruling, appellate or otherwise, has been rendered, so that the decision on the educational questions can be made in a quieter and non-racial atmosphere. Also, why the defendants should not retain any land or control over any land they may now have, pending such decision.

13. Why no action has been taken by the defendants on the various possible methods for further reduction of segregation such as re-examination of zones, enlargement or combination of school zones, reorganizing the existing 23,000 pupil bus system, pairing of schools, consultation with the Department of Health, Education and Welfare, and other possible methods.

Order Dated June 3, 1969

14. Scholastic aptitude tests and achievement tests and intelligence tests for all grades for which such data are available in all schools in the county and city since 1954.

15. What concrete and specific steps, if any, plaintiffs would have the defendants adopt in order to comply with the Constitution. The court is not interested in a restatement of the previous demand of plaintiffs that all the schools in the system be populated on a 70/30 basis, because as previously stated the court does not have the power to make such an order and the defendants have served notice that they will not undertake such an assignment themselves. What is desired is some tough and detailed thinking and planning as to detailed methods to reduce and promptly eliminate segregation in the Charlotte-Mecklenburg schools.

The above questions and requests, insofar as they call for facts and figures, call for the production—not the creation—of the desired information. Counsel are requested to advise the court immediately if the production of already existing records does not provide any of the statistical information mentioned above. It is not the intention of the court to put the parties to work creating new charts nor re-assembling existing statistics, but rather to make available existing information.

This the 3rd day of June, 1969.

/s/ James B. McMillan
James B. McMillan
United States District Judge

Order Adding Additional Parties dated June 3, 1969

Several changes in the personnel of the defendant school board have taken place since this suit was instituted. In order that all parties may be fully before the court and that there be no avoidable technical irregularity.

IT IS ORDERED that all the present members of the Charlotte-Mecklenburg Board of Education be and they are hereby made formal parties to this action; that copies of the MOTION FOR FURTHER RELIEF filed September 6, 1968 be served upon them and that there also be served upon them copies of all orders and motions that have been filed since that time.

Service of these motions and orders (including this order making new parties and the order of this same date regarding the further hearing of June 16, 1969) should be made by the United States Marshal. The members of the school board and their addresses are:

Mr. William E. Poe, Chairman
2101 Coniston Place (Home)
1014 Law Building (Office)
Charlotte, North Carolina

Mr. Henderson Belk
529 Hempstead Place

This the 3rd day of June, 1969.

/s/ JAMES B. MCMILLAN
James B. McMillan
United States District Judge

Opinion and Order dated June 20, 1969

Pursuant to notice dated June 4, 1969, a hearing was held in Charlotte on June 16, 17 and 18, 1969, on various matters including (1) the motion of the individual defendants for dismissal; (2) the motion of the plaintiffs for contempt citations against the individual defendants; (3) the proposals offered by the defendants pursuant to the April 23, 1969 order as a plan for desegregating the Charlotte-Mecklenburg schools; and (4) the motion of the plaintiffs for an order restraining further school construction until the segregation issue has been satisfactorily resolved.

I.

The Motion of the School Board Members to Dismiss.

The motion of the individual defendants, members of the school board, to dismiss was and is denied. This is a suit under the Civil Rights Act involving questions of equal protection of laws and racial discrimination and segregation in the public schools. The individual defendants are proper parties and their presence is appropriate and desirable.

II.

The Motion for a Contempt Citation.

The motion of the plaintiffs that the individual defendants be found in contempt of the court is on this record denied. The board is badly divided and many of its recent decisions appear to be made by a five to four vote. Supreme Court judges now and then make five to four decisions. (Fortunately their votes in all major school segregation cases appear to have been unanimous.) The members of

the board have had uncomplimentary things to say about each other and about the court, and many of them obviously disagree with the legality and propriety of the order of the court; but these latter sentiments may be regarded by the court as evidence of disagreement with rather than contempt for the court who is himself not far removed from active participation in the time-honored custom of criticizing a judge who has ruled against him. Moreover, on an issue of such significance, the amount of foot-dragging which has taken place, up to now at least, should not be considered as contempt of court.

III.

The Plan of the Defendants.

1. *The history of the plan.*—The order of this court directing a further plan for desegregation was entered April 23, 1969. Within hours, various of the defendants expressed sharp views pro and con. The board met on April 28, 1969, and for the first time briefly discussed the order. By a five to four margin, apparently, they decided informally not to try to appeal immediately, upon the basis that the right of appeal from the order to prepare a plan was doubtful. The school superintendent was instructed to prepare a desegregation plan. No express guidelines were given the superintendent. However, the views of many members expressed at the meeting were so opposed to serious and substantial desegregation that everyone including the superintendent could reasonably have concluded, as the court does, that a "minimal" plan was what was called for, and that the "plan" was essentially a prelude to anticipated disapproval and appeal. In a county and city criss-

crossed by school bus routes for 23,000 pupils, more than twenty thousand citizens, mostly from affluent suburbia, many of whose children undoubtedly go to school on school busses, signed petitions against "involuntary" bussing of students. The frenzy of parents received a ready forum in televised meetings of the board. The staff were never directed to do any serious work on re-drawing of school zone lines, pairing of schools, combining zones, grouping of schools, conferences with the Department of Health, Education and Welfare, nor any of the other possible methods of making real progress towards desegregation.

The superintendent revealed the general terms of his plan within a few days and later presented it formally on May 8, 1969. It provided for full faculty desegregation in 1969, which the superintendent said he considered feasible. It provided moderate changes in the pupil assignment plans; and it contemplated future study of the other methods of desegregation suggested in the April 23, 1969 order.

The board then met, struck out virtually all the effective provisions of the superintendent's plan, and asked for more time from the court, which had previously been promised.

The board's committee on buildings and sites, newly reconstituted, met and voted to cancel the long standing plans for Metropolitan High School, and voted to build it as only a specialty and vocational school without including the comprehensive high school which consultants and experts, including the school board's staff and superintendent, had recommended and still recommend. No new facts except the order of court had developed to account for the sudden change of plan. The stated reason for the change was that a general high school in Second Ward (though not a vocational or technical school) would necessarily be black and

therefore should not be built. [The Second Ward school site, where Metropolitan is scheduled to be built, is squarely in the center of the city's population; is a scant four blocks from the south boundary of its zone; and is apparently the easiest high school in town to desegregate; its boundaries could easily be re-drawn by extending its southern boundary (Morehead Street) and its eastern boundary (Queens Road) a few blocks.]

Thereafter, on May 28, 1969, the plan was filed. Volunteers were requested among the teachers; pupil transfer requests were set out; and data on the workings of the plan began to accumulate.

During the early debate over the court order, events transpired between the chairman and the superintendent which were thought by an assistant superintendent and others to threaten the superintendent's job if he pushed for compliance with the court's order. A few days before this hearing, the board committee on personnel declined to accept the superintendent's recommendation that Robert Davis, a Negro, be appointed principal of one of the schools. This was the first time such a recommendation had not been accepted. After some debate, the decision was postponed, with the superintendent requested to bring in alternate names. The publicly stated reasons for not approving the appointment were that Davis, whose training, experience and qualifications were unquestioned, is a plaintiff in this case and a member of the Negro Classroom Teachers Association and has spoken out publicly in favor of compliance wth this court's order—including one television appearance before the board itself to which the board had invited interested citizens. Davis, according to the press, was eventually confirmed for the job on June 19, 1969, but only after a "loyalty oath" had been exacted. The

effect of the so-called "job threat" and the Davis incident, following the public statements of board members, is a clear message: School employees voice opinion contrary to the board majority on desegregation at personal risk.

2. *The June 16, 1969 hearing.*—The defendants, under the law, had the burden of showing that their plan would desegregate the schools. To carry that burden they introduced a short written brief and some statistical data and rested their case without live testimony. The plaintiffs called all members of the school board and the Rhode Island expert, Dr. Finger, who testified at the March hearing, and a few other witnesses. There was some rebuttal from the board.

3. *Findings as to General Board Policy.*—

a) The board does not admit nor claim that it has any positive duty to promote desegregation.

b) School sites and school improvements have not been selected nor planned to promote desegregation and the board admits no such duty.

c) Board policy is that the Constitution is satisfied when they locate schools where children are and provide "freedom of transfer" for those who want to change schools.

d) Despite its inclusion in the "Plan," the decision of the board about Metropolitan High School is not really a final one; several members consider the issue in doubt, and the full board has not formally considered it.

4. *The Pupil Assignment Plan.*—The plan now proposed is the plan previously found racially discriminatory, with the addition of one element—the provision of transportation for children electing to transfer out of schools where their races are in a majority to schools where they will be in a minority. Such provision of transportation is approved.

Another provision of the plan makes high school athletes who transfer from one school to another ineligible for varsity or junior varsity athletics until they have been a year in the new school. For the current year, with the returns almost complete, only two white students out of some 59,000 have elected to transfer from white schools to black schools. Some 330 black students out of some 24,000 have elected to transfer to white schools. Only the tiniest handful of white students have ever in any year asked to transfer to black schools. The effect of the athletic penalty is obvious—it discriminates against black students who may want to transfer and take part in sports, and is no penalty on white students who show no desire for such transfers. The defendants' superintendent considers athletics an important feature of education. This penalty provision is racially discriminatory. The board is directed not to enforce it any more and to give adequate individual notice to all rising 10th, 11th and 12th grade students that they may reconsider their previous choice of schools in light of the removal of the penalty.

Freedom of transfer increases rather than decreases segregation. The school superintendent testified that there would be, net, more than 1,200 additional white students going to predominantly black schools if freedom of transfer were abolished. The use of a free transfer provision is a decision for the board; it may make desegregation more palatable to the community at large; it is not, per se,

if the schools are desegregated, unconstitutional. Nevertheless, *desegregation of schools is something that has to be accomplished independent of freedom of transfer.* This is a fact which because of the complexity of the statistics has only become clear to the court since the previous order was issued.

5. *The Faculty Assignment Plan.*—The plan originally proposed by the superintendent would have desegregated the faculty as a routine matter in 1969. The plan proposed by the board however is not materially different from the already existing plan. It continues to rely upon voluntary transfers and it contemplates affirmative assignment of teachers to black schools only late in the day after a hopeful routine of filling vacancies (some of which do not exist) has been followed. The board has not taken a position of leadership with the teachers and the results are apparent. Only 28 out of 2,700 white teachers, and only 38 out of 900 black teachers, had on June 18, 1969 indicated a willingness to transfer to schools of the opposite race. Testimony of the board members who comprise the majority of the board suggests that they do not really contemplate substantial faculty desegregation and that they may consider figures of "10%"; or one black teacher to each white school and one white teacher to each black school; or filling vacancies from the opposite race as they arise, to be compliance with the needs of the situation. None of these ideas, of course, amounts to desegregation of the faculty. The evidence submitted by the board does not demonstrate that the faculty plan will work. Several board members said that the plan to assign teachers is not an "idle promise."

All that it takes to make the faculty plan work is timely decision by the board to implement the assignment of teach-

ers. Board members are requested in this connection to consider the latest unanimous Supreme Court decision, *United States* v. *Montgomery County Board of Education* (October Term 1968), Case No. 798, decided June 2, 1969, reversing the Fifth Circuit Court of Appeals and upholding a district court order for faculty desegregation under a mathematical formula. Ruling on the factulty plan will therefore be deferred until after August 4, 1969, by which time the board is directed to file a report stating in detail what the plan has done and what the status of faculty assignments then is. The court considers the faculty assignment plan to be important and agrees with the superintendent of schools that immediate desegregation of the faculty is feasible. This is a substantial improvement which is available without arousing ghosts of "bussing," "neighborhood schools," or additional expense.

IV.

Gerrymandering

This issue was passed over in the previous opinion upon the belief which the court still entertains that the defendants, as a part of an overall desegregation plan, will eliminate or correct all school zones which were created or exist to enclose black or white groups of pupils or whose population is controlled for purposes of segregation. However, it may be timely to observe and the court finds as a fact that no zones have apparently been created or maintained for the purpose of promoting desegregation; that the whole plan of "building schools where the pupils are" without further control promotes segregation; and that certain schools, for example Billingsville, Second Ward, Bruns Avenue and Amay James, obviously serve school

zones which were either created or which have been controlled so as to surround pockets of black students and that the result of these actions is discriminatory. These are not named as an exclusive list of such situations, but as illustrations of a long standing policy of control over the makeup of school population which scarcely fits any true "neighborhood school" philosophy.

• • • • •

The findings of fact in the April 23, 1969 order and all statements in this opinion are treated as findings of fact in support of the order. All of the evidence in the case is considered in support of the order.

ORDER

Based upon the evidence and upon the foregoing findings of fact the orders of the court are as follows:

1. The motion of the individual defendants to dismiss is denied.

2. No citations for contempt are made.

3. Decision on the faculty assignment plan is deferred pending receipt of a progress report from the board on or before August 4, 1969.

4. The one year penalty on transferring high school athletes is disapproved with direction as above for appropriate personal communication to rising high school students.

5. The provision of transportation for students transferring from a majority to a minority situation is approved.

6. The board is directed to proceed no further with action on Metropolitan High School pending a showing by the board that the school if constructed will be adequately desegregated and a finding by the court to that effect. This is based upon the previous findings that the board's decision on Metropolitan was unduly affected by racial considerations and that the board has not accepted its affirmative legal duty to build school facilities so as to promote desegregation.

7. As to the other building projects referred to in the motion for restraint on construction, the burden remains upon the defendants to show that these programs will produce desegregation. The written material tendered by the defendants on this subject is lengthy, and does not appear to sustain that burden. However, decision on the request for injunction against projects other than Metropolitan will be delayed pending further study of the evidence.

8. It is further ordered that the defendants proceed to prepare and submit by August 4, 1969, a positive plan for desegregation of the pupils of the Charlotte-Mecklenburg school system, as originally directed on April 23, 1969. A witness, Dr. Finger, described in detail a plan for desegregation by changing certain school zone lines and merging certain schools into districts and using certain schools as feeders for others. This plan shows a high degree of realism in that it minimizes the necessity for long-range transportation and takes substantial advantage of location and makeup of populations. Local school administration consider such a plan feasible. The local school administrative staff are also better equipped than Dr.

Finger, a "visiting fireman," to work out and put into effect a plan of this sort. It is believed that if the resources of the board can be directed as originally ordered toward preparing a Charlotte-Mecklenburg plan for the Charlotte-Mecklenburg schools, desegregation of both faculties and students may be accomplished in an orderly fashion. Counsel are requested to notify the court promptly if more time beyond August 4, 1969 is needed.

This is the 20th day of June, 1969.

JAMES B. MCMILLAN
James B. McMillan
United States District Judge

Supplemental Findings of Fact in Connection With the Order of June 20, 1969 (Dated June 24, 1969)

The relatively complete extent of the segregation of the schools in this system is demonstrated by study of the defendants' statistics which were attached to and included in the original opinion of this court of April 23, 1969. There are about 24,000 black students in the county. As near as can be estimated, approximately 21,000 of these attend schools within the City of Charlotte. When *Brown* v. *Board of Education* was decided in 1954, the City of Charlotte had less than 7,500 black students. Today within the City of Charlotte 14,086 black students attend 21 schools which are totally black or more than 99% black. An additional 2,895 black students attend six schools whose black population is between 50% and 86% black. These schools are all rapidly moving to a totally or near-totally black condition under present policies. When all this is put together and understood, it becomes clear that of the City's 21,000 or so black students, nearly 17,000 of them according to the figures, and certainly more than 17,000 when the population trends are considered, are attending racially identifiable black schools.

This the 24th day of June, 1969.

JAMES B. MCMILLAN
James B. McMillan
United States District Judge

Order dated August 15, 1969

Preliminary Summary

Pursuant to this court's June 20, 1969 order, the defendants submitted on July 29, 1969 an amended plan for desegregation of the Charlotte-Mecklenburg schools, including a highly significant policy statement accepting for the first time the Board's affirmative constitutional duty to desegregate students, teachers, principals and staffs "at the earliest possible date." On August 4, 1969, a report was filed in connection with the plan. A hearing was conducted on August 5, 1969. The plan is before the court for approval.

Because the schools must open September 2, and because the Board's plan includes both substantial action and genuine assurance of sustained effort toward prompt compliance with the law of the land, the plan of operation, for 1969-70 only, is approved and as indicated below, the defendants are directed to prepare and file by November 17, 1969, detailed plans and undertakings for completion of the job of desegregating the schools effective in September, 1970.

The Amended Plan—And Its Reception

The plan proposes, among other things, to close seven old all-black inner-city schools and to assign their 3,000 students to various outlying schools, now predominantly white, mostly in high rent districts.

This technique of school closing and reassignment has been employed in dozens of school districts to promote school desegregation. It is not original with the local School Board.

The school closing issue has provoked strident protests from black citizens and from others; evidence showed that

n estimated 19,000 names are listed on a petition denounc-
ng the plan as unfair and discriminatory. The signers add
heir own brand of protest to that of the 21,000 whites who
ast May (though protesting their acceptance of the princi-
les of desegregation) raised a "silk-stocking" community
utcry against bus transportation except to schools of in-
ividual choice. Another 800 white Paw Creek petitioners
ave joined in protest against a part of the plan under
hich some 200 fifth and sixth grade pupils would be as-
gned to re-opened Woodland, a new unused (and formerly
lack) school. Comment from people who have not studied
he evidence tends to ignore the law—the reason this ques-
on is before a *court* for decision—and to concentrate on
ublic acceptance or what will make people happy. A cor-
espondent who signs "Puzzled" inquires:

> "If the whites don't want it and the blacks don't want it, why do we have to have it?"

The answer is, the Constitution of the United States.

THE CONSTITUTION—THE LAW OF THE LAND—REQUIRES DESEGREGATION OF PUBLIC SCHOOLS

North Carolina reportedly refused to ratify the United
tates Constitution until the Bill of Rights had been in-
orporated into it. The Fourteenth Amendment to that
onstitution, now part of the Bill of Rights, guarantees to
l citizens the "equal protection of laws." In *Brown* v.
oard of Education, 347 U. S. 483 (1954), 349 U. S. 294
1955), the Supreme Court held that racial segregation in
ublic schools produces inferior education and morale, re-
ricts opportunity for association, and thus violates the
ual protection guaranty of the Constitution and is un-
wful. In *Green* v. *New Kent County School Board*, 391

U. S. 430 (1968), and two other simultaneous unanimous decisions, the Supreme Court held that school boards have the *affirmative duty* to get rid of dual school systems, to eliminate "black schools" and "white schools," and to operate "just schools." The Court said:

> "The burden on a school board today is to come forward with a plan that promises realistically to work and promises realistically to work *now*." (Emphasis on the word *"now"* was put in the text by the Supreme Court.)

For years people of this community and all over the south have quoted wistfully the statement in *Briggs* v. *Elliott* by Judge John J. Parker (who at his death was one of my few remaining heroes) that though the Constitution forbids segregation it does not require integration. Passage of time, and the revelation of conditions which might well have changed Judge Parker's views if he had lived, have left Judge Parker's words as a landmark but no longer a guide. The latest decision on this subject by the Fourth Circuit Court of Appeals (which is the court that first reviews my actions) contains this statement:

> "The famous Briggs v. Elliott dictum—adhered to by this court for many years—that the Constitution forbids segregation but does not require integration, is now dead." *Hawthorne* v. *Lunenburg*, Nos. 13,283, 13,284, Fourth Circuit Court of Appeals, *July 11, 1969*.

"Freedom of choice," as this court has already pointed out, does not legalize a segregated school system. A plan with freedom of choice must be judged by the same standard as a plan without freedom of choice—whether or not the plan desegregates the public schools. The courts are concerned primarily not with the techniques of assigning

students or controlling school populations, but with *whether those techniques get rid of segregation of children in public schools.* The test is pragmatic, not theoretical.

Continued Operation of Segregated Public Schools Is Unlawful

The issue is one of law and order. Unless and until the Constitution is amended it is and will be unlawful to operate segregated public schools. Amending the Constitution takes heavy majorities of voters or lawmakers. It is difficult to imagine any majority of Supreme Court, of Congress or of popular vote in favor of changing the Constitution to say that public school pupils may lawfully be kept in separate schools because they are black. A community bent on "law and order" should expect its school board members to obey the United States Constitution, *and should encourage them in every move they make toward such compliance.* The call for "law and order" in the streets and slums is necessary, but it sounds hollow when it issues from people content with segregated public schools.

The questions is not whether people like desegregated public schools, but what the law requires of those who operate them.

The Duty to Observe the Constitution and Desegregate the Schools Cannot Be Reduced or Avoided Because of Soothing Sayings From Other Government Officials Nor Outcries From Those Who Want the Law to Go Away.

The rights and duties of the parties to this suit are in this court for decision according to *law*—not according to HEW guidelines or public clamor. The court and the school board are bound by the Constitution. *So are the legislative and executive branches of government.* No one in Washing-

ton or Raleigh or local government is above or beyond the Constitution. None have power to change it except by lawful means. None have *or claim* the power to interfere with the courts in cases like this one. The malleable HEW "guidelines" put out by the President's administrator for educational affairs, and dubious inferences from statements of other officials, however highly placed, are irrelevant to the constitutional rights of the parties in this case. Also irrelevant are soothing sayings of the Vice President (who has the duty in this area) to black-tie political audiences, and the not-so-soothing sayings of citizens who erroneously talk as if the school segregation issue were a simple matter of political pressure and short-term public opinion. As for the Attorney General of the United States, he has just filed the biggest desegregation suit of all—*against the whole State of Georgia!* Segregation of children in public schools, whether they be black or white, and regardless of whether they do or don't want to stay apart, is unlawful. As the Supreme Court said in *Brown II*:

> "... the vitality of these constitutional principles can not be allowed to yield simply because of disagreement with them."

THE SCHOOL BOARD'S NEW PLAN REPRESENTS SUBSTANTIAL PROGRESS.

Against this background the Board's new plan is reviewed:

1. The most obvious and constructive element in the plan is that the School Board has reversed its field and has accepted its affirmative constitutional duty to desegregate pupils, teachers, principals and staff members "at the earliest possible date." It has recognized that where people

live should not control where they go to school nor the quality of their education, and that transportation may be necessary to comply with the law. It has recognized that easy methods will not do the job; that rezoning of school lines, perhaps wholesale; pairing, grouping or clustering of schools; use of computer technology and all available modern business methods can and must be considered in the discharge of the Board's constitutional duty. This court does not take lightly the Board's promises and the Board's undertaking of its affirmative duty under the Constitution and accepts these assurances at face value. They are, in fact, the conclusions which necessarily follow when any group of women and men of good faith seriously study this problem *with knowledge of the facts of this school system and in light of the law of the land.*

2. In the second place, by the following actions the Board has demonstrated its acceptance of its stated new policies:

a) The desegregation of faculties and the non-racial reassignment of principals and employees from newly closed schools. In the formerly all-black faculties the Board has dramatically exceeded its goal. It is assumed by the court that this process of faculty desegregation will continue and that the goal for 1970-71 will be that faculties in all schools will approach a ratio under which all schools in the system will have approximately the same proportion of black and white teachers.

b) The closing of seven schools and the reassignment of 3,000 black pupils to schools offering better education.

c) The reassignment of 1,245 students from several overcrowded primarily black schools to a number of outlying predominantly white schools.

d) The announced re-evaluation of the program of locating and building and improving schools, so that each project or site will produce the "greatest degree of desegregation possible."

e) The Board correctly and constructively concluded that the so-called "anti-bussing law" adopted by the General Assembly of North Carolina on June 24, 1969, does not inhibit the Board in carrying out its constitutional duties and should not hamper the Board in its future actions. Leaving aside its dubious constitutionality (if it really did what its title claims to do) the statute contains an express exception which renders it ineffectual in that it does not prevent "any transfer necessitated by overcrowded conditions or *other circumstances which in the sole discretion of the School Board require reassignment.*"

f) The elimination without objection of the former provision which had the effect of inhibiting transfer rights of black would-be athletes.

g) Quite significantly, the Board calls upon the Planning Board, the Housing Authority, the Redevelopment Commission and upon real estate interests, local government and other interested parties to recognize and share their responsibility for dealing with problems of segregation in the community at large as well as in the school system.

h) The proposals for programs of "compensatory education" of students, and for teacher orientation and

exchange of activities among black and white students. The court assumes that these somewhat vaguely stated ideas will become implemented with concrete action.

3. *The Seven School Problem.*—The Board plan proposes to close Second Ward High School, Irwin Avenue Junior High School and five inner-city elementary schools (five of which were already marked for abandonment) and to reassign their 3,000 students to outlying white schools. This part of the plan has struck fire from black community leaders and some other critics. Counsel for the plaintiffs contend that it puts an unconstitutional and discriminatory burden upon the black community with no corresponding discomfort to whites. One spokesman for a large group of dissenting and demonstrating black citizens was allowed to express his views at the August 5, 1969 hearing. Threats of boycotts and strikes have been publicized.

This part of the plan is distasteful, because all but 200* of the students being reassigned *en masse* are black. It can legitimately be said and has been eloquently said that this plan is an affront to the dignity and pride of the black citizens. Pride and dignity are important. If pride and dignity were all that are involved, this part of the plan ought to be disapproved. The court, out of forty-year memory of four years of transportation on an unheated Model-T school but thirteen miles each way from a distant rural community to high school in a "city" of 4,000, is fully aware how alien and strange are the sensations experienced by a school child who is hauled out of his own community and into a place where the initial welcome is uncertain or cool.

---

* The 200 students being reassigned from Paw Creek to Woodland are white.

However, this part of the plan is not compulsory. Students who want to remain in the comfort of their familiar area may elect to attend the Zebulon Vance School instead; alternatives are also provided for the junior high school students.

Moreover, as one of the attorneys remarked at the first hearing in a discussion about reassignments and school busses: "The question is really not one of 'bussing' but whether what the child gets when he gets off of the bus is worth the trouble."

I personally found the better education worth the bus trip.

Despite their undoubted importance, pride and dignity should not control over the Constitution and should not outweigh the prospects for quality education of children. The uncontradicted evidence before the court is that segregation in Mecklenburg County has produced its inevitable results in the retarded educational achievement and capacity of segregated school children. By way of brief illustration a table follows showing the contrasting achievements of sixth grade students in five of the closed schools (Bethune, Fairview, Isabella Wyche, Alexander Street and Zeb Vance) and in five of the schools to which black students are going to be transferred:

Order dated August 15, 1969

AVERAGE ACHIEVEMENT TEST SCORES

SIXTH GRADE—1968-69

	SP.	*LANG.*	*ACM. (Math)*	*WM (Word Meaning)*
Bethune	45	34	41	41
Ashley Park	61	62	56	58
Fairview	46	38	42	39
Westerly Hills	61	61	52	57
Isabella Wyche	41	34	40	38
Myers Park	80	84	58	73
Alexander Street	45	38	34	40
Shamrock Gardens	57	62	53	56
Zeb Vance	38	34	39	42
Park Road	71	75	58	66

This alarming contrast in performance is obviously not nown to school patrons generally.

It was not fully known to the court before he studied e evidence in the case.

It can not be explained solely in terms of cultural, racial family background without honestly facing the impact segregation.

The degree to which this contrast pervades all levels academic activity and accomplishment in segregated hools is relentlessly demonstrated.

Segregation produces inferior education, and it makes ttle difference whether the school is hot and decrepit or odern and air-conditioned.

It is painfully apparent that "quality education" can t live in a segregated school; *segregation itself is the reatest barrier to quality education.*

As hopeful relief against this grim picture is the un-ntradicted testimony of the three or four experts who

testified, some for each side, and the very interesting experience of the administrators of the schools of Buffalo, New York. The experts and administrators all agreed that transferring underprivileged black children from black schools into schools with 70% or more white students produced a dramatic improvement in the rate of progress and an increase in the absolute performance of the less advanced students, without material detriment to the whites. There was no contrary evidence. (In this system 71% of the students are white and 29% are black.)

Moreover, the Board's announced policy and the uncontradicted testimony of the superintendent show that serious arrangements are being made to welcome, rather than rebuff, the transferees into all school activities. This is something new and important.

No legal authority is cited that the Constitution prohibits transport of consenting black children from an inferior educational environment into a better educational environment for the purpose of complying with the constitutional requirement of equal protection of laws.

The choice of how to do the job of desegregation is for the School Board—not for the court.

The Board has wide discretion in choosing methods; many effective methods are described in the evidence; the court's duty is simply to pass on the legality of the Board's actions. It appears to the court that the improvement in the education of 4,200 school children is the one most obvious result of the Board's plan of action for 1969-70, and that this is more important constitutionally than other considerations which have been advanced.

It is not the intention of this court to endorse or approve any future plan which puts the burden of desegregation primarily upon one race. However, there is not time before September 2, 1969 to do a complete job of reassign-

ing pupils; the plan is a step toward more complete compliance with the law; the court reluctantly votes in favor of the 4,200 school children and approves the plan on a one-year basis.

The Major Task Lies Ahead This Fall

The big job remains to be done. After implementation of the current plan, further large scale faculty transfers will still be necessary. Sixteen years after *Brown* v. *Board of Education,* some thirteen thousand school children will remain in black or nearly all-black schools. Most white students will remain in substantially all-white schools. The failure of the plan to deal with those problems of course can not be approved. The failure of the plan to include a time table for the performance of specific elements of the program of course can not be approved, *Felder, et al.* v. *Harnett County Board of Education, et al.,* 409 F. 2d 1070 (4th Cir., 1969). These matters must be covered by specific instructions to the Board.

All findings of fact in the previous orders of April 23, 1969, and June 20, 1969, and the supplemental findings of June 24, 1969, are incorporated herein to the extent that they are consistent with the findings, conclusions and orders herein reached and given. All evidence at all hearings is considered in reaching these conclusions.

Order

1. The policy statement of the Board is approved.

2. The faculty desegregation program is approved.

3. The plan to desegregate pupils by closing seven all-black schools and assigning their pupils to outlying white

schools is approved only (1) with great reluctance, (2) as a one-year, temporary arrangement, and (3) with the distinct reservation that "one-way bussing" plans for the years after 1969-70 will not be acceptable. If, as the school superintendent testified, none of the modern, faculty-integrated, expensive, "equal" black schools in the system are suitable for desegregation now, steps can and should be taken to change that condition before the fall of 1970. Unsuitability or inadequacy of a 1970 "black" school to educate 1970 white pupils will not be considered by the court in passing upon plans for 1970 desegregation. The defendants contended and the court found in its April 23, 1969 order that facilities and teachers in the various black schools were not measurably inferior to those in the various white schools. It is too late now to expect the court to proceed upon an opposite assumption.

4. The plan to reassign 1,245 students from presently overcrowded black schools is approved.

5. Reassignment of the Paw Creek students to Woodland is approved.

6. The proposals of the Board for restructure of attendance lines; for consideration of pairing and grouping schools; for review of the construction programs; and for support programs, student exchange and faculty orientation are approved in principle, although for lack of specific detail and time table they are not approved as presented.

7. The Board is directed to prepare and present by November 17, 1969, the following:

(1) Plan for complete faculty desegregation for 1970-71.

(2) Plan for student desegregation for 1970-71, including making full use of zoning, pairing, grouping, clustering, transportation and other techniques, complete with statistics and maps and other data showing precisely what (subject to later movement of pupils) the assignment of pupils and teachers will be for the year 1970-71, having in mind as its goal for 1970-71 the complete desegregation of the entire system to the maximum extent possible. (The assumption in the Board's report that a school is desegregated when it has as many as 10% of a minority race in its student body is not accepted by the court, and neither the Board nor the court should be guided by such a figure.) "Possible" as used here refers to educational—*not* "political"—possibility. If Anson County, two-thirds black, can totally desegregate its schools in 1969, as they have now done, Mecklenburg County should be able to muster the political will to follow suit.

(3) A detailed report showing, complete with figures and maps, the location and nature of each construction project proposed or under way, and the effect this project may reasonably be expected to have upon the program of desegregating the schools.

8. Since a mid-city high school may prove most desirable, the Board is directed pending further orders of court not to divest itself of any land, options, rent arrangements or other access to or control over real estate which it may now have in the Second Ward area.

9. Jurisdiction is retained.

This the 15th day of August, 1969.

James B. McMillan
United States District Judge

Order dated August 29, 1969

The School Board's amended plan for desegregation of the Charlotte-Mecklenburg schools was approved by order of court dated August 15, 1969. The Board has now tendered a modification to this plan which was filed today, August 29, 1969.

The modification relates to the facilities to be provided for those black children whose parents exercise freedom of choice to attend a black elementary school in the inner city instead of attending the white schools listed in the July 29, 1969 plan which has already been approved by the court.

The amendment calls for using the building of former Irwin Avenue Junior High School with certain minor renovations, instead of Zeb Vance School, and a limit of six hundred students upon those who would be admitted to this program at Irwin Avenue School. This part of the motion to amend is approved. The choice of building, *per se,* is a matter for the School Board, not the court.

The amendment proposes that the Irwin Avenue School would be operated "as an innovative school." The court does not know what this means. If by this phrase is meant that anything will be done to make this school more attractive to the black students than the black schools they have been attending, then the program will constitute the location and use of a school facility for the purpose of promoting segregation which by previous decisions of this and other courts the defendants have been fully advised is unconstitutional. *Felder, et al.* v. *Harnett County, North Carolina,* 409 F.2d 1070 (4th Circuit, 1969) (decided April 22, 1969), and cases cited therein. The addition of "innovations" at Irwin Avenue School will not be approved by the court unless these "innovations" have been arranged and

provided for all the black students who transfer to white schools under the July 29, 1969 plan of the Board previously approved. The phrase "innovative" may refer to what the Board has heretofore called "compensatory education." The court has not yet been advised of any performance by the Board in line with the undertaking in its July 29, 1969 plan to provide "compensatory education" for pupils who lag behind their classmates in academic achievement. Unless and until the court can be informed and satisfied that this "compensatory education" is provided in the other schools, the court is of the opinion that providing it in the Irwin Avenue School would set up a magnet to attract black children away from desegregated assignments and therefore on the present record at least that part of the plan is disapproved.

The proposal to provide transportation for any of the students attending Irwin Avenue School is expressly disapproved. The effect of providing transportation is to subsidize at tax payers' expense those who are actively seeking to defeat the constitutional mandate to desegregate the schools. No authority is advanced or suggested to justify such a flagrant violation of the law, and none has been imagined by the court. The Board is expressly restrained from and enjoined against providing transportation in any form to any student in the system, black or white, which may or might enable him to travel any part of the distance from his home to or from any school elected by or for him under "freedom of transfer" or "freedom of choice," except that the Board may provide transportation as previously ordered by this court to those students who elect to transfer or who are transferred by the Board from a school in which their race is in a majority to a school in which their race

is in the minority. As this court pointed out before, bus transportation has too long been used as a tool to promote segregation. The year 1969 is too late in the day to start using this tool for that purpose in new situations.

This the 29th day of August, 1969.

/s/ JAMES B. MCMILLAN
James B. McMillan
United States District Judge

Order dated October 10, 1969

On April 23, June 20 and August 15, 1969, orders were entered directing the defendants to submit a plan and a time table for the desegregation of the Charlotte-Mecklenburg schools, to be completed by the fall of 1970. Nearly six months after the original order, faculty desegregation is well along and there have been a number of substantial improvements in the stated policies of the Board, including the stated assumption of duty by the Board to desegregate the schoools "at the earliest possible date." Limited steps have been taken toward compliance with the pupil desegregation provisions of that original order. However, the major part of the job remains undone, and no plan for desegregation of the entire system has apparently been voted on by the Board.

The latest order set November 17, 1969, as the revised date for defendants to file a complete plan and time table. Defendants have now filed a 15-page motion and supporting affidavit asking the court to extend by another two and one-half months, to February 1, 1970, the time for compliance with the orders. Plaintiffs oppose the extension.

The justification advanced for this delay is that they have hired a systems analyst to re-draw attendance lines, and that the three months between August 15 and November 17 are not enough time to program a computer and prepare a plan.

It would be a happy day if the job could be turned over to a computer. A computer, if programmed objectively, could produce objective results; all could blame the machine (in addition to the court) for any unpleasant decisions. Also, the court would like to avoid unnecessary pressure on the school staff and administrators.

However, the information thus far available is inadequate to justify the extension. Computers are for time-*saving*,

not delay. The computer work was estimated by the Board's chosen systems analyst, Mr. Weil, to require ninety man days of work. He proposes to consume ninety calendar days with this job! The Board's motion says that their decisions about construction and location of 21 building projects (involving many millions of dollars) are to be held up pending development of the plan. The school budget approaches fifty million dollars. The question fairly arises why the Board should not employ or assign more than one person at a time to feed the computer. Mr. Weil's original plan, which is in evidence, was prepared in a very few days. The court has on file also three or four other plans, including at least one which local school officials say is educationally and technically feasible, which were prepared in a few days each. The use of a computer does not appear to justify the delay.

Moreover, computers cannot make political nor legal decisions; they react to what is fed into them; and the request for postponement leaves the court to speculate over what will be fed into the computer. The motion does not say that Mr. Weil has been instructed by the Board to frame a plan to desegregate the schools; his commission, by a Board committee only, is limited to re-drawing attendance lines; the vague references in the Board's motion to his instructions as to travel limitation and specified school capacities and desirable racial balance permit the inference, in fact, that his mission could be *re*-segregation of much of the system.

The motion also contains no commitment on the part of the Board to adopt any plan that the computer may produce; it gives no information about the Board's intentions as to other desegregation methods it will use; and it promises no *result* from the delay except *consideration* by the

Board of a computer plan for re-arranging school lines.

The motion is preoccupied with one *method,* and silent about *results.*

Before passing on the motion, the court has a duty to discover what the Board has accomplished since its July 29 promises were made, and whether the extra time will promote genuine progress toward compliance with the Constitution or whether it will just be time lost.

The Board is therefore directed to file with the court by October 29, 1969, the following information:

1. A full statistical report on the results of the closing of the inner-city schools and where the 4,200 black pupils the Board proposed on July 29 to transfer to white schools are actually going to school as of October 10, 1969.

2. The figures regarding the effect of freedom of transfer on the desegregation proposed in the July 29, 1969 plan for closing inner-city schools and transferring their students.

3. A report on freedom of choice or freedom of transfer: How many children, by school or location and race, chose to transfer out of and into the various schools for the 1969-70 year.

4. Full reports on the current numbers and races of the children and teachers in the system, school by school, with percentages of each race for each school.

5. A report on the children being provided bus transportation, school by school.

6. A description of what has been done to provide the compensatory education programs proposed in the July 29 plan and policy statement.

7. A copy of all September and October, 1969, reports of the Board to the Department of Health, Education and Welfare.

Unless the Board has made the hard decisions needed to desegregate the schools, the time spent on a computer plan may well be just more time lost, and delaying decision may simply compress into fewer months next year the decisions that should have already been made. Therefore, in addition to the above, the Board is directed to answer by October 29, 1969, the following questions:

1. What, in verbatim detail, are the instructions that have been given to Mr. Weil?

2. What is Mr. Weil's assigned mission or goal?

3. What areas of the district is he directed to include in his program of re-drawing attendance lines?

4. What areas, if any, is he directed to exclude?

5. What schools will his program affect?

6. Will pairing, grouping or clustering of schools be used by the Board as needed to supplement the computer plan?

7. Will the Weil program of re-drawing attendance lines produce desegregation of all the schools by September, 1970?

8. If the Weil program does not produce desegregation of all the schools by September, 1970, what does the Board plan to do to produce that result?

9. Will any plan produced by the Weil method or any other re-drawing of attendance lines desegregate

the schools if unrestricted freedom of transfer or freedom of choice is retained?

The value of the answers to these nine questions is substantially dependent on whether they are made by vote of the full Board or by non-voting representatives such as attorneys or other agents.

Pending receipt of the above information, the court will defer action on the request for time extension. Action will also be deferred for the present on the motions which have been filed by the plaintiffs which include requests for abolition of freedom of choice and appointment of an outside expert to devise a plan in default of Board action.

This the 10th day of October, 1969.

James B. McMillan
United States District Judge

Order dated November 7, 1969

On October 29, 1969, the United States Supreme Court announced its decision in the Mississippi school case, *Alexander* v. *Holmes County,* Case No. 632. That decision, the most significant in this field since *Brown* v. *Board of Education,* peremptorily reversed an order of the Fifth Circuit Court of Appeals which, upon request of the United States Attorney General, had postponed until 1970 the effective desegregation of thirty Mississippi school districts, and had extended from August 11 to December 1, 1969, their deadline for filing desegregation plans. The Supreme Court held that the Court of Appeals

> "* * * *should have denied all motions for additional time* because continued operation of *segregated schools* under a standard of allowing all deliberate speed for desegregation is no longer constitutionally permissible. *Under explicit holdings of this Court, the obligation of every school district is to terminate dual school systems at once and to operate now and hereafter only unitary schools. Griffin* v. *School Board,* 377 U. S. 218, 234 (1964); *Green* v. *School Board of New Kent County,* 391 U. S. 430, 439, 442 (1968)." (Emphasis added.)

The Supreme Court further directed the Fifth Circuit Court of Appeals to make such orders as might be necessary for the *immediate* start in each district of the operation of a "totally unitary school system for all eligible pupils without regard to race or color."

It is this court's opinion that the word "dual" in the Supreme Court opinion is another word for "segregated," and that "unitary" is another word for "desegregated" or "integrated." It is also this court's opinion that although,

as defendants say, this is not Mississippi, nevertheless the Supreme Court's prohibition against extension of time as laid down in *Alexander* v. *Holmes County* is binding upon this court and this school board, and bars the exercise of the court's usual discretion in such matters, and that to allow the request of the defendants for extension of time to comply with this court's previous judgments would be contrary to the Supreme Court's decision and should not be done.

Therefore, and based also upon the considerations set out in the memorandum opinion to be filed contemporaneously herewith, the motion of the defendants for extension of time for compliance with the court's August 15, 1969 order is denied. Ruling on all other pending motions is deferred.

This the 7th day of November, 1969.

/s/ James B. McMillan
James B. McMillan
United States District Judge

Memorandum Opinion dated November 7, 1969

Preliminary Statement

On Wednesday, October 29, 1969, the United States Supreme Court announced its decision in the Mississippi school case (*Alexander* v. *Holmes County*, Case No. 632). That decision peremptorily reversed an order of the Fifth Circuit Court of Appeals which, upon request of the United States Attorney General, had postponed until 1970 the effective desegregation of thirty Mississippi school districts, and had extended from August 11 to December 1, 1969, their deadline for filing desegregation plans. The Supreme Court held that the Court of Appeals

> "* * * *should have denied all motions for additional time* because continued operation of *segregated schools* under a standard of allowing all deliberate speed for desegregation is no longer constitutionally permissible. *Under explicit holdings of this Court, the obligation of every school district is to terminate dual school systems at once and to operate now and hereafter only unitary schools. Griffin* v. *School Board*, 377 U. S. 218, 234 (1964); *Green* v. *School Board of New Kent County*, 391 U. S. 430, 439, 442 (1968)." (Emphasis added.)

The Supreme Court further directed the Fifth Circuit Court of Appeals to make such orders as might be necessary for the *immediate* start in each district of the operation of a "totally unitary school system for all eligible pupils without regard to race or color."

The Mississippi school districts in the *Holmes County* case had degrees of desegregation ranging from nearly zero to about 16% of the Negro pupils. They like Mecklenburg hoped that their "freedom of choice" plans would satisfy the Constitution.

Memorandum Opinion dated November 7, 1969

The request for time extension, and all later proceedings in this cause, must be considered in light of the Supreme Court's reaffirmation of the law which this court has been following, and in light of the urgency now required by the *Holmes County* decision.

THE RESULTS OF THE 1969 PLAN

For pupil desegregation, the July 29, 1969 plan proposed to close seven black inner-city schools (most or all of which had previously been ear-marked for eventual "phase-out") and to transfer their 3,000 students in specified numbers to named suburban schools. All the transferee schools except West Charlotte were white. In addition, 1,245 black students, in specified numbers, were to be transferred from eight black or largely black schools to other designated suburban white schools.

The plan was accepted and approved because of its apparent promise to extend the opportunities of a desegregated education to over 4,000 new black students.

The plan has not been carried out as advertised: (a) Only 73 of the 1,245 scheduled for transfer from overcrowded black schools have been so transferred; those 73 were transferred not to the schools designated, but to other schools not mentioned in the plan. (b) It is now revealed that the closed schools, which were billed in July to produce 3,000 black students for transfer, actually had only 2,627 students in them when the schools closed in June! (c) The Board allowed full freedom of choice for students from the closed schools, and those students in large numbers elected to go to Harding High School, and to Williams Junior High, Northwest Junior High and other black schools, instead of to the assigned white schools. As a result, Harding High School was transformed immediately

from 17% black to 47% black. This produced community consternation but no racial disorder among the students. The result may be deplorable, but the fact that the students at Harding High School have adjusted peaceably to the situation (like others before them at Cornelius, Davidson, Olympic, Randolph Road, Hawthorne and Elizabeth, and like the people of Anson and other North Carolina counties) shows that Mecklenburgers can live with desegregated schools. (d) The transfers proposed simply appear never to have been made to most of the suburban schools named in the plan. (e) *The plan therefore transferred to white schools only 1,315 instead of the promised 4,245 black pupils!* From closed schools, the elementary transferees numbered 463 instead of the advertised 1,235; junior high transferees were 273 instead of 630; and senior high transferees were 506 instead of 1,135; and from overcrowded schools 73 instead of 1,245. If Harding (47% black, 630 Negro students), Olympic (42% black, 376 Negro students), and Wilmore (49% black, 228 Negro students) should be allowed to continue their rapid shift from white to black, the net result of the 1969 pupil plan would be nearly zero.

Faculty desegregation has significantly and commendably improved since the April 27 order. Nevertheless, only six "black" schools and one "black" kindergarten have predominantly white faculties; and 98 out of the 106 schools and kindergartens in the system are today readily and obviously identifiable by the race of the heavy majority of their faculties.

The "performance gap" is wide.

Memorandum Opinion dated November 7, 1969

THE SITUATION TODAY

The following table illustrates the racial distribution of the present school population:

SCHOOLS READILY IDENTIFIABLE AS WHITE

% WHITE	NUMBER OF SCHOOLS	NUMBERS OF STUDENTS WHITE	BLACK	TOTALS
100%	9	6,605	2	6,607
98–99%	9	4,801	49	4,850
95–97%	12	10,836	505	11,341
90–94%	17	14,070	1,243	15,313
86–89%	10	8,700	1,169	9,869
	57	45,012	2,968	47,980

SCHOOLS READILY IDENTIFIABLE AS BLACK

% BLACK	NUMBER OF SCHOOLS	NUMBERS OF STUDENTS WHITE	BLACK	TOTALS
100%	11	2	9,216	9,218
98–99%	5	41	3,432	3,473
90–97%	3	121	1,297	1,418
56–89%	6	989	2,252	3,241
	25	1,153	16,197	17,350

SCHOOLS NOT READILY IDENTIFIABLE BY RACE

% BLACK	NUMBER OF SCHOOLS	NUMBERS OF STUDENTS WHITE	BLACK	TOTALS
32–49%	10	4,320	2,868	7,188
17–20%	8	5,363	1,230	6,593
22–29%	6	3,980	1,451	5,431
	24	13,663	5,549	19,212
TOTALS:	106	59,828	24,714	84,542

Some of the data from the table, re-stated, is as follows:

Number of schools	106
Number of white pupils	59,828
Number of black pupils	24,714

Memorandum Opinion dated November 7, 1969

Total pupils	84,542
Per cent of white pupils	71%
Per cent of black pupils ..	29%
Number of "white" schools	57
Number of white pupils in those schools	45,012
Number of "black" schools	25
Number of black pupils in those schools	16,197
Number of schools not readily identifiable by race	24
Number of pupils in those schools	19,212
Number of schools 98-100% black	16
Negro pupils in those schools	12,648
Number of schools 98-100% white	18
White pupils in those schools	11,406

Of the 24,714 Negroes in the schools, something above 8,500 are attending "white" or schools not readily identifiable by race. More than 16,000, however, are obviously still in all-black or predominantly black schools. The 9,216 in 100% black situations are considerably more than the number of black students in Charlotte in 1954 at the time of the first *Brown* decision. The black school problem has not been solved.

The schools are still in major part segregated or "dual" rather than desegregated or "unitary."

The black schools are for the most part in black residential areas. However, that does not make their segregation constitutionally benign. In previous opinions the facts respecting their locations, their controlled size and their population have already been found. Briefly summarized, these facts are that the present location of white schools in white areas and of black schools in black areas is the result of a varied group of elements of public and private action, all deriving their basic strength originally from

public law or state or local governmental action. These elements include among others the legal separation of the races in schools, school busses, public accommodations and housing; racial restrictions in deeds to land; zoning ordinances; city planning; urban renewal; location of public low rent housing; and the actions of the present School Board and others, before and since 1954, in locating and controlling the capacity of schools so that there would usually be black schools handy to black neighborhoods and white schools for white neighborhoods. There is so much state action embedded in and shaping these events that the resulting segregation is not innocent or *"de facto,"* and the resulting schools are not "unitary" or desegregated.

Freedom of Choice

Freedom of choice has tended to perpetuate segregation by allowing children to get out of schools where their race would be in a minority. The essential failure of the Board's 1969 pupil plan was in good measure due to freedom of choice.

As the court recalls the evidence, it shows that *no white students have ever chosen to attend any of the "black" schools.*

Freedom of choice does not make a segregated school system lawful. As the Supreme Court said in *Green* v. *New Kent County,* 391 U.S. 430 (1968):

> "• • • If there are reasonably available other ways, such for illustration as zoning, promising speedier and more effective conversion to a unitary, nonracial school system, 'freedom of choice' must be held unacceptable."

Redrawing attendance lines is not likely to accomplish anything stable toward obeying the constitutional mandate

as long as freedom of choice or freedom of transfer is retained. The operation of these schools for the foreseeable future should not include freedom of choice or transfer except to the extent that it reduces segregation, although of course the Board under its statutory power of assignment can assign any pupil to any school for any lawful reason.

The "National Standings"

The defendants filed some statistics concerning the one hundred largest school systems in the country, and say that Charlotte-Mecklenburg desegregation compares favorably with that in most of those systems. That may well be so. The court is not trying cases involving the other ninety-nine school boards, and has not studied any evidence about them and does not know their factual nor legal problems. The court in its first order of April 23, 1969 has noted the substantial desegregation achieved in certain areas in the Charlotte-Mecklenburg system, and is still aware of it. The fact that other communities might be more backward in observing the Constitution than Mecklenburg would hardly seem to support denial of constitutional rights to Mecklenburg citizens. The court doubts that a double standard exists. The Attorney General of the United States has filed suit for desegregation in Connecticut as well as in the whole State of Georgia. One of the most stringent desegregation orders on record was entered recently against a school board in the City of Chicago. Constitutional rights will not be denied here simply because they may be denied or delayed elsewhere. There is no "Dow-Jones average" for such rights. With all due deference to the complexities of this school system, which have already been fully noted

in previous opinions, the Board and the community must still observe the Constitution. The fact that the school system ranks high in some artificial "national standings" or that one-third of the Negro students do attend desegregated schools or predominantly white schools is no answer to the constitutional problems presented by sixteen thousand black Mecklenburgers still going to all-black or largely black schools in this predominantly white community.

The Prospects for the Future

The second part of the Board's report is answers to the court's questions designed to determine whether the Board has made the hard decisions necessary to desegregate the schoos.

The answers show that those decisions have not been made.

The computer expert has been given restrictions which, taken at face value, indicate that his work will not lead to desegregation of all the schools. One such restriction has the apparent effect of limiting attendance to those who live a maximum of roughly a mile and a half from the school. (This is the requirement that all grids or areas must be "contiguous to the home grid or to grids which are contiguous to the home grid.") Another is the limitation that no school attended by whites should have less than a 60% white student population. (Unless this were coupled with a further requirement that no school attended by blacks shall have more than a 40% black student population, this appears to put the black schools "off limits" for his study.) The original verified motion of the School Board contained two other limitations. Those were that "a 'desirable' racial balance should be obtained" and that "reasonable limitation on distance of travel for a child has been imposed." The

record is silent on what these limitations mean and whether they are still in effect.

The Board has not accepted pairing and grouping and clustering of schools as legitimate techniques, but has simply indicated that it will "consider" those techniques where they offer *"reasonable* prospects of producing *stable* desegregation * * *." (Emphasis added.)

The report states unconditionally that:

> *"The information supplied by the systems analysis approach will not produce desegregation of all schools by September, 1970.* Dramatic results are expected. It is *hoped* that the number of all white and all black schools will be substantially *reduced.* The number of such schools cannot be determined at this time." (Emphasis added.)

The report also says that:

> "* * * *The Board of Education does not feel that it will be possible to produce pupil desegregation in each school by September, 1970.* It is expected that faculties will fairly represent a cross section of the total faculty so that most and *possibly* all schools will not have a racially identifiable faculty. Furthermore, the restructuring of attendance lines coupled with faculty desegregation *may* satisfy constitutional requirements." (Emphasis added.)

The School Board is sharply divided in the expressed views of its members. From the testimony of its members, and from the latest report, it cannot be concluded that a majority of its members have accepted the court's orders as representing the law which applies to the local schools.

Memoranum Opinion dated November 7, 1969

By the respones to the October 10 questions, the Board has indicated tat its members do not accept the duty to desegregate th schools at any ascertainable time; and they have clealy indicated that they *intend not to do it* effective in thefall of 1970. They have also demonstrated a yawning gapbetween predictions and performance.

Withholdingor delaying the constitutional rights of children to eqal educational opportunity on such vague terms as theses not the province of the School Board nor of this court.

Furthermore since the Supreme Court has now prohibited lower ourts from granting extensions of time, it may well be tht the gradual time table laid down by this court's April 23, 1969 order contemplating substantial progress in 190 and complete desegregation by September 1970) was ands too lenient.

If the plan ndered by the School Board on November 17, 1969 is thorugh and informative, and sufficiently shows an unconditionl purpose on the part of the Board to complete its job ective by September, 1970, the Board may perhaps be alowed to adhere to the existing time table. Certainly a Mcklenburg plan ought if possible to be prepared by the lecklenburg School Board and its large and experienced stff, rather than by outside experts. Decision on that and cher pending questions must await further developments, including the Board's November 17, 1969 report.

CONCLUSIONS

The school ystem is still discriminatorily segregated by race and maitained that way by state action. In many ways it is no in compliance with the Constitution. The Board has notshown a valid basis for an extension of time

to comply with the court's judgment; it has shown no intention to comply by any particular time with the constitutional mandate to desegregate the schools; and it has suggested its intention *not* to comply by September, 1970. In spite of those facts the court would like as a matter of discretion to grant some of the time extension requested, but is of the considered opinion that in *Alexander* v. *Holmes County* the Supreme Court has prohibited the exercise of such discretion. The findings of fact in this opinion will be considered, along with facts found in previous orders, opinions and memoranda, as the basis for such future judgments and orders as may be appropriate, including such judgments and orders as may be appropriate upon receipt of the Board's November 17, 1969 plan. All statements of fact in this memorandum opinion, whether or not labeled as such, shall be deemed findings of fact, as necessary to support such judgments and orders.

This the 7th day of November, 1969.

/s/ James B. McMillan
James B. McMillan
United States District Judge

Opinion and Order dated December 1, 1969

On April 23, June 20 and August 15, 1969, the defendant school board was ordered to file plans to desegregate the schools of Charlotte and Mecklenburg County, North Carolina. The defendants have admitted their duty to desegregate the schools; considerable progress has been made toward desegregation of faculties; and progress, previously noted, has been made in some other areas. The schools, however, remain for the most part unlawfully segregated. The facts supporting that conclusion in all the court's previous orders are reiterated here.

The issue is what to do pursuant to the board's latest plan, filed November 17, 1969. The plan recites the following ostensible purpose:

> "The Board of Education has embarked upon a comprehensive program for the purpose of restructuring attendance lines involving all schools and all students served by the system. The primary purpose of this program is to achieve further desegregation in as many schools as possible * * *."

The plan says that a computer analyst has been hired to draw up various *theoretical* possible school zone attendance lines, and that school personnel, before February 1, 1970, will draw the *actual* lines.

The details of the plan show that it contains no promise nor likelihood of desegregating the schools.

The plan and the report accompanying it say (emphasis added):

> "No school district *to which white students are assigned* should have less than 60 per cent white student population to avoid 'tipping.'" (Plan, page 2.)

* * * * *

"... it is the plan of this School Board to limit schools *to which white students are assigned* to those schools in which it is possible to provide a student population which is at least 60 per cent white." (Plan, page 5.)

• • • • •

"In determining the initial attendance lines, the ratio of black to white students will not exceed 60% white–40% black WHERE THE SCHOOL IS DESEGREGATED." (Report, page 5.)

• • • • •

"*A majority of the Board of Education believes that the constitutional requirements of desegregation will be achieved by the restructuring of attendance lines, the restricting freedom of transfer, and other provisions of this plan. The majority of the Board has, therefore, discarded further consideration of pairing, grouping, clustering and transporting.*" (Plan, page 6.)

The strongest claim made in the plan with respect to the all-black schools is that among 43 elementary schools in the densely populated areas of Charlotte it is "*theoretically* [school board's emphasis] possible to populate these schools with the following ratios of black students: ... Seven (7) schools in which the black student population is 100 per cent." (Plan, pages 3 and 4.) Since the 100% black elementary schools in the system (Billingsville, Marie Davis, Double Oaks, First Ward, Lincoln Heights, Oaklawn and University Park) number exactly seven, this language obviously proposes that these seven schools will remain all-black.

The plan contains no factual information nor estimate regarding plans for desegregation of the 31 other elemen-

tary schools, the 20 junior high schools, and the 10 senior high schools in the system.

Concerning faculty desegregation the plan says:

> "*During* the 1970-71 school year, the Board of Education will staff each school so that the faculty at each school will be *predominantly* white and, *where practicable* will reflect the ratio of white and black teachers employed in the total faculty of the school system." (Plan, page 7.)

With regard to the physical facilities, the court on August 15, 1969, ordered the defendants to produce by November 17 "A detailed report showing, complete with figures and maps, the location and nature of each construction project proposed or under way, and the effect this project may reasonably be expected to have upon the program of desegregating the schools." In response to that order, the plan lists the names of 21 out of 91 projects, expresses a few opinions and conclusions about the building program, and promises a partial study by February 1, 1970 and a "general long range study" *"by June of 1970,"* but it sheds no factual light on the effect of any part of the building program on the segregation issue. Since the board has, in seven months, failed to produce a program for desegregation, it is only natural that they can not predict the effect of any particular building project on such a program. The court has yet not received information necessary to appraise the effects of current building activity on the current unprogrammed course of desegregation.

When the plan is understood, it boils down to this:

1. It proposes to re-draw school zone lines, and to restrict freedom of choice, which the court had already

advised the board to eliminate except where it would promote desegregation. It states no definable desegregation goals.

2. The "60-40" ratio is a one-way street. The plan implies that there will be no action to produce desegregation in schools with black populations above 40%, *and that no white students are to be assigned to such schools.*

3. Continued operation of all seven of the all-black elementary schools would be assured. The same would appear to be true for the entire group of 25 mostly "black" schools, mentioned in the court's November 7 order, which serve 16,197 of the 24,714 black students in the system.

4. Transportation to aid children transferring out of segregated situations (which was ordered by the court on April 23 as a condition of any freedom of transfer plan, *and which was a part of this plan as advertised in the board's October 29 report*) has been eliminated from the plan as filed with the court. Inevitable effects of this action would be to violate the court order and to leave the children recently reassigned from seven closed black inner-city schools with no way to reach the suburban schools they now attend! This is *re*-segregation.

5. Other methods (pairing, grouping, clustering of schools) which could reduce or eliminate segregation—and which the board, on October 29 when it was asking for a time extension, promised to consider—have now been expressly left out of the plan.

6. No time is set to complete the job of faculty and pupil desegregation.

7. In the written argument ("Report") filed with the plan, with the candor characteristic of excellent attorneys, the board's attorneys say:

> "It is important that the Court does not construe the information submitted in the plan relating to racial ratios of elementary schools as being in the nature of a guarantee by the Board since it is anticipated *the results of restructuring the attendance lines may produce a greater or lesser degree of desegregation, the extent of which cannot be determined at this time.*" (Report, page 4; emphasis added.)

The defendants have the burden to desegregate the schools and to show any plan they propose will desegregate the controls. They have not carried that burden. Re-drawing school zone lines won't eliminate segregation unless the decision to desegregate has first been made.

THE SCHOOLS ARE STILL SEGREGATED

The extent to which the schools are still segregated was illustrated by the information set out in previous orders including the order of November 7, 1969. Nearly 13,000 out of 24,714 black students still attend schools that are 98% to 100% black. Over 16,000 black students still attend predominantly black schools. Nine-tenths of the faculties are still obviously "black" or "white." Over 45,000 out of 59,000 white students still attend schools which are obviously "white."

THE RESULT IS UNEQUAL EDUCATION

The following table further illustrates the results. Groups A and B show that sixth graders, in the seven

100% black schools the plan would retain, perform at about fourth grade levels, while their counterparts in the nine 100% white elementary schools perform at fifth to seventh grade levels. Group C shows that sixth graders in Barringer, which changed in three years from 100% middle income white to 84% Negro, showed a performance drop of 1½ to 2 years. Group D shows however that Randolph Road, 72% white and 28% Negro, has eighth grade performance results approximately comparable to Eastway, which is 96% white, and Randolph results are approximately two years ahead of all-black Williams and Northwest. Until unlawful segregation is eliminated, it is idle to speculate whether some of this gap can be charged to racial differences or to "socio-economic-cultural" lag.

If the courts should accept the defendants' contention that all they have to do is re-draw attendance lines and allow a type of freedom of choice, two-thirds or more of the black children in Mecklenburg County would be relegated permanently to this kind of separate but unequal education.

Opinion and Order dated December 1, 1969

THE LAW STILL REQUIRES DESEGREGATION

Segregation in public schools was outlawed by the decisions of the Supreme Court in *Brown* v. *Board of Education*, 347 U. S. 483 (1954) and 349 U. S. 294 (1955).

The first *Brown* opinion (*Brown I*) held that racial segregation, even though physical facilities and other tangible factors might be equal, deprives Negro children of equal educational opportunities. The Court recalled prior decisions that segregation of graduate students was unlawful because it restricted the student's "ability to study, to engage in discussions and exchange views with other students, and, in general, to learn his profession." The Court said:

> "Such considerations apply with added force to children in grade and high schools. To separate them from others of similar age and qualifications solely because of their race generates a feeling of inferiority as to their status in the community that may affect their hearts and minds in a way unlikely ever to be undone."

Quoting a lower court opinion, the Supreme Court continued:

> " 'Segregation of white and colored children in public schools has a detrimental effect upon the colored children. The impact is greater when it has the sanction of the law; for the policy of separating the races is usually interpreted as denoting the inferiority of the Negro group. A sense of inferiority affects the motivation of a child to learn. Segregation with the sanction of law, therefore, has a tendence to [retard] the educational and mental development of Negro children

and to deprive them of some of the benefits they would receive in a racial[ly] integrated school system.'

"We conclude that in the field of public education the doctrine of 'separate but equal' has no place. *Separate educational facilities are inherently unequal.* * * *." (Emphasis added.)

* * * * *

"* * * Such segregation has long been *a nationwide problem, not merely one of sectional concern.*" (Emphasis added.)

The selection of cases for the *Brown* decision demonstrates the nationwide reach of that concern; Brown lived in Kansas and the defendant board of education was that of Topeka, Kansas; defendants in companion cases included school authorities in Delaware and the District of Columbia. Later important cases have involved not just Southern schools, but also schools in New York, Chicago, Ohio, Denver, Oklahoma City, Kentucky, Connecticut and other widely scattered places.

Court decisions setting out the principles upon which the various orders of this court have been based include the following:

SUPREME COURT CASES

Alexander v. *Holmes County* (Mississippi), No. 632 (October 29, 1969).

Brown v. *Board of Education of Topeka* (Kansas), 347 U. S. 483 (1954), 349 U. S. 294 (1955).

Cooper, Members of the Board of Directors of the Little Rock (Arkansas) *Independent School District* v. *Aaron*, 358 U. S. 1 (1958).

Opinion and Order dated December 1, 1969

Green v. *County School Board of New Kent County* (Virginia), 391 U. S. 430 (1968).

Griffin v. *County School Board of Prince Edward County* (Virginia), 377 U. S. 218 (1964).

Keyes v. *Denver* (Colorado) *School District Number 1*, Application for Vacation of Stay (Justice Brennan, Supreme Court, August 29, 1969).

Monroe v. *Board of Commissioners of the City of Jackson* (Tennessee), 391 U. S. 450 (1968).

Raney v. *Board of Education of the Gould School District* (Arkansas), 391 U. S. 443 (1968).

United States v. *Montgomery County* (Alabama) *Board of Education*, 395 U. S. 225 (1969).

CIRCUIT COURT CASES

Brewer v. *School Board of City of Norfolk* (Virginia), 397 F.2d 37 (4th Cir., 1968).

Felder v. *Harnett County* (North Carolina) *Board of Education*, 409 F.2d 1070 (4th Cir., 1969).

Wanner v. *County School Board of Arlington County* (Virginia), 357 F.2d 452 (4th Cir., 1966).

Henry v. *Clarksdale* (Mississippi) *Municipal Separate School District*, 409 F.2d 682 (5th Cir., 1969) (*petition for cert. filed*, 38 U.S.L.W. 3086) (U. S. 9/2/69) (No. 545).

United States v. *Greenwood* (Mississippi) *Municipal Separate School District*, 406 F.2d 1086 (5th Cir., 1969) (*cert. denied*, 395 U. S. 907 (1969)).

United States v. *Hinds County School Board*, Nos. 28030 and 28042 (5th Cir., July 3, 1969).

Clemons v. *Board of Education of Hillsboro, Ohio*, 228 F.2d 853 (6th Cir. 1956) (*cert. denied*, 350 U. S. 1006).

United States v. *School District 151 of Cook County, Illinois* (Chicago), 404 F.2d 1125 (7th Cir., 1968) (*rehearing denied*, January 27, 1969).

DISTRICT COURT CASES

Eaton v. *New Hanover County* (North Carolina) *Board of Education*, No. 1022 (E.D. N.C., July 14, 1969).

Keyes v. *School District Number One, Denver* (Colorado), 303 F. Supp 289 (D. Colo., 1969).

Some of these principles which apply to the Charlotte-Mecklenburg situation are:

1. Racial segregation in public schools is unlawful, *Brown I; Green* v. *New Kent County, Virginia; Clemons* v. *Hillsboro, Ohio*. Such segregation is unlawful even though not required nor authorized by state statute, *Clemons* v. *Hillsboro*. Acts of school boards perpetuating or restoring separation of the races in schools are *de jure*, unlawful discrimination, *Cooper* v. *Aaron; Keyes* v. *Denver, Colorado School Board* (August 14, 1969), approved by the Supreme Court of the United States two weeks later, *Keyes* v. *Denver*, U. S. Supreme Court, August 29, 1969.

2. Drawing school zone lines, like "freedom of transfer," is not an end in itself; and a plan of geographic zoning which perpetuates discriminatory segregation is unlawful, *Keyes* v. *Denver; Brewer* v. *Norfolk; Clemons* v. *Hillsboro; Henry* v. *Clarksdale, Mississippi; United States* v. *Hinds County; United States* v. *Greenwood*.

3. No procedure, plan, method or gimmick will legalize state maintained segregation. The constitutional test of a plan is whether it gets rid of segregation in public schools, and does it "now," *Green* v. *New Kent County; Monroe* v. *Jackson; Alexander* v. *Holmes County.*

4. Good faith of the school authorities, if it exists, does not excuse failure to desegregate the schools. ". . . The availability to the Board of other more promising courses of action may indicate a lack of good faith; and at the least *it places a heavy burden upon the Board to explain its preference for an apparently less effective method.*" *Green* v. *New Kent County.* (Emphasis added.)

5. "Natural boundaries" for school zones are not constitutionally controlling. If a zone encloses a black school in a district like this one where white students are in a heavy (71% white, 29% black) majority, the "naturalness" of the boundary or the existence of reasons for the boundary unrelated to segregation does not excuse the failure to desegregate the school, *Keyes* v. *Denver, Colorado; Henry* v. *Clarksdale; Clemons* v. *Hillsboro.*

6. It is appropriate for courts to require that school faculties be desegregated by formula, if necessary, and by a definite time or on a definite schedule, *United States* v. *Montgomery.* Faculty assignments so that each school has approximately the same ratio of black teachers as the ratio of black teachers in the school system at large are appropriate and necessary to equalize the quality of instruction in this school system, *United States* v. *Montgomery; United States* v. *Cook County; Eaton* v. *New Hanover County* (North Carolina).

Opinion and Order dated December 1, 1969

7. Bus transportation as a means to eliminate segregation results of discrimination may validly be employed, *Keyes* v. *Denver; United States* v. *Cook County,* Illinois, 404 F.2d 1125, 1130 (1969).

8. Race may be considered in eliminating segregation in a school system, *Wanner* v. *Arlington County, Virginia; United States* v. *Cook County; Green* v. *New Kent County.*

9. ". . . Whatever plan is adopted will require evaluation in practice and the court should retain jurisdiction until it is clear that state imposed segregation has been completely removed." *Green* v. *New Kent County; Raney* v. *Board of Education.*

10. The alleged high cost of desegregating schools (which the court does not find to be a fact) would not be a valid legal argument against desegregation, *Griffin* v. *School Board; United States* v. *Cook County, Illinois.*

11. The fact that public opinion may oppose desegregating the schools is no valid argument against doing it, *Cooper* v. *Aaron, Green* v. *New Kent County; Monroe* v. *Jackson.*

12. Fixed ratios of pupils in particular schools will not be set. If the board in one of its three tries had presented a plan for desegregation, the court would have sought ways to approve variations in pupil ratios. In default of any such plan from the school board, the court will start with the thought, originally advanced in the order of April 23, that efforts should be made to reach a 71-29 ratio in the various schools so that there will be no basis for contending that one school is racially different from the others, but to understand that variations from that norm may be unavoidable.

13. School location and construction and renovation and enlargement affect desegregation. Courts may properly restrain construction and other changes in location or capacity of school properties until a showing is made that such change will promote desegregation rather than frustrate it, *Felder* v. *Harnett County.*

14. Where pupils live must not control where they are assigned to school, if some other approach is necessary in order to eliminate racial segregation, *Green* v. *New Kent County; Keyes* v. *Denver; Eaton* v. *New Hanover County, North Carolina Board of Education.*

15. On the facts in this record and with this background of *de jure* segregation extending full fifteen years since *Brown I,* this court is of the opinion that all the black and predominantly black schools in the system are illegally segregated, *Green* v. *New Kent County; Henry* v. *Clarksdale; United States* v. *Hinds County.*

16. The school board is endowed by Chapter 115, Section 176 of the General Statutes of North Carolina with "full and complete" and "final" authority to assign students to whatever schools the board chooses to assign them. The board may not shift this statutory burden to others. In *Green* v. *New Kent County,* the Supreme Court said of "freedom of choice":

> "Rather than foster the dismantling of the dual system the plan has operated simply to burden children and their parents with a responsibility which *Brown II* placed squarely on the School Board. The Board must . . . fashion steps which promise realistically to convert

promptly to a system without a 'white' school and a 'Negro' school but just schools."

17. Pairing of grades has been expressly approved by the appellate courts, *Green* v. *New Kent County; Felder* v. *Harnett County*. Pairing, grouping, clustering, and perhaps other methods may and will be considered and used if necessary to desegregate the schools.

18. Some 25,000 out of 84,000 children in this county ride school busses each day, and the number *eligible* for transportation under present rules may be more than 30,000. A transportation system already this massive may be adaptable to effective use in desegregating schools.

19. The school board has a duty to promote acceptance of and compliance with the law. In a concurring opinion in *Cooper* v. *Aaron*, 358 U. S. at 26 (1958), Justice Frankfurter said:

> *"That the responsibility of those who exercise power in a democratic government is not to reflect inflamed public feeling but to help form its understanding, is especially true when they are confronted with a problem like a racially discriminating public school system.* This is the lesson to be drawn from the heartening experience in ending enforced racial segregation in the public schools in cities with Negro populations of large proportions. Compliance with decisions of this Court, as the constitutional organ of the supreme Law of the Land, has often, throughout our history, depended on active support by state and local authorities. It presupposes such support. To withhold it, and indeed to use political power to try to paralyze the supreme Law,

precludes the maintenance of our federal system as we have known and cherished it for one hundred and seventy years.

"Lincoln's appeal to 'the better angels of our nature' failed to avert a fratricidal war. But the compassionate wisdom of Lincoln's First and Second Inaugurals bequeathed to the Union, cemented with blood, a moral heritage which, when drawn upon in times of stress and strife, *is sure to find specific ways and means to surmount difficulties that may appear to be insurmountable.*" (Emphasis added.)

Order

It is Ordered, Adjudged and Decreed as follows:

1. All facts found in this and previous orders, and all competent evidence including plans, reports and admissions in pleadings in the record are relied upon in support of this order.

2. The November 17 plan entitled "Amendment to Plan for Further Desegregation of Schools" is disapproved.

3. The defendants are directed to desegregate faculties in all the schools effective not later than September 1, 1970, so that the ratio of black teachers to white teachers in each school will be approximately the same as the ratio of black teachers to white teachers in the entire school system.

4. A consultant will be designated by the court to prepare immediately plans and recommendations to the court for desegregation of the schools. The legal and practical considerations outlined in detail in earlier parts of this opinion and order are for his guidance.

5. The defendants are directed to cooperate fully with the consultant. This cooperation will include but not be limited to providing space at the headquarters of the board of education in which he may work; paying all of his fees and expenses; providing stenographic assistance and the help of business machines, draftsmen and computers if requested, along with telephone and other communications services. He shall have full access to maps, drawings, reports, statistics, computer studies, and all information about all phases of the school system which may be necessary to prepare plans or reports. He shall be supplied with

any studies and plans and partial plans for desegregation of the schools which the defendants may have. The defendants will provide this consultant with full professional, technical and other assistance which he may need in familiarizing himself with the school system and the various problems to be solved in desegregating the schools. Any and all members of the board of education who wish to cooperate in the preparation of such a plan may do so. The cooperation of the school administrators and staff will be requested and will be appreciated.

6. Action on the motion of plaintiffs for an order directing immediate desegregation of the entire system is deferred.

7. Further orders with reference to restraining construction and enlargement of schools are deferred.

8. Motion has been filed for a citation of the school board members for contempt of court. Litigants are bound by court orders and may be punished for disobedience of such orders even though such orders may ultimately be reversed on appeal, *Walker* v. *Birmingham,* 388 U. S. 307 (1967). The evidence might very well support such citations. Nevertheless, this is a changing field of law. Despite the peremptory warnings of *New Kent County* and *Holmes County,* strident voices, including those of school board members, still express doubt that the law of those cases applies to Mecklenburg County. This district court claims no infallibility. Contempt proceedings against uncompensated public servants will be avoided if possible. Action on the contempt citation is deferred.

9. If the members of the school board wish to develop plans of their own for desegregation of the schools, with-

out delaying or interfering with the work of the consultant, they may proceed to do so, and if they wish any guidance from the court they will find their guidance in the previous opinions and orders of this court and in the court decisions and principles set out in this opinion and order.

10. Jurisdiction is retained for further orders as may be appropriate.

This is the 1st day of December, 1969.

/s/ JAMES B. MCMILLAN
James B. McMillan
United States District Judge

Order dated December 2, 1969

The court appoints as a consultant under the terms outlined in the court's order of December 1, 1969, Dr. John A. Finger, Jr., of Providence, Rhode Island.

The school board and staff are directed to cooperate with Dr. Finger as set out in the December 1, 1969 order.

This the 2nd day of December, 1969.

/s/ JAMES B. MCMILLAN
James B. McMillan
United States District Judge

Order dated February 5, 1970

On December 2, 1969, this court appointed Dr. John A. Finger, Jr., of Providence, Rhode Isand, to study the Charlotte-Mecklenburg school system and advise the court how the schools could be desegregated. The defendant school board, by order of December 1, 1969, had been extended a fourth opportunity to submit a plan if they wished. Dr. Finger went to work; the school staff worked with him; and they have produced some extremely useful information and reports, which will be referred to in this order as the Board plan and the Finger plan.

Hearings on the plans were conducted on February 2 and February 5, 1970.

The Board plan, prepared by the school staff, relies almost entirely on geographic attendance zones, and is tailored to the Board's limiting specifications. It leaves many schools segregated. The Finger plan incorporates most of those parts of the Board plan which achieve desegregation in particular districts by re-zoning; however, the Finger plan goes further and produces desegregation of all the schools in the system.

Taken together, the plans provide adequate supplements to a final desegregation order.

The court would like again to express appreciation to Dr. Finger for the intelligence, resourcefulness and tact with which he has pursued his difficult assignment, and to Dr. William Self, Superintendent of the schools, and to his able staff, for the excellent work done by them in their difficult role of helping prepare one plan to comply with what the court believes the law requires, and simultaneously preparing another plan to suit the majority of the School Board who, at last reckoning, still did not appear to accept the court's order as representing the law of the land.

Order dated February 5, 1970

The court is also grateful to the Board's outside consultant, Mr. Weil, of Systems Associates, Inc., whose two hundred days of work and whose computer studies formed the building blocks, or points of departure, for much of the work of the others.

Recent appellate court decisions have hammered home the message that sixteen years of "deliberate speed" are long enough to desegregate tax supported schools. On October 29, 1969, in *Alexander* v. *Holmes County*, 369 U.S. 19, the Supreme Court ordered numerous Deep South school districts to be completely desegregated by January 1, 1970; schools in Atlanta, Miami and parts of Chicago have been ordered totally desegregated; the Supreme Court in January ordered February 1, 1970, desegregation of 300,000 pupils in six Gulf Coast states; the Fourth Circuit Court of Appeals in *Nesbit* v. *Statesville*, —— F.2d. —— (December 2, 1969), ordered elimination by January 1, 1970, of the racial characteristics of the last black schools in Durham, Reidsville and Statesville, North Carolina; and in *Whittenberg* v. *Greenville, South Carolina*, the Fourth Circuit Court of Appeals, in an opinion by Chief Judge Clement F. Haynsworth, Jr., has just last month ordered the desegregation by February 16, 1970, of the 58,000 students in Judge Haynsworth's own home town. Judge Robert Martin of Greenville, pursuant to that mandate, on February 2, 1970, ordered all the Greenville schools to be populated by February 16, 1970, on a basis of 80% white and 20% black.

In the *Greenville* opinion the court said:

> "These decisions leave us with no discretion to consider delays in pupil integration until September 1970. Whatever the state of progress in a particular school

district and whatever the disruption which will be occasioned by the immediate reassignment of teachers and pupils in mid-year, there remains no judicial discretion to postpone immediate implementation of the constitutional principles as announced in *Green* v. *County School Board of New Kent County*, 391 U.S. 430; *Alexander* v. *Holmes County Bd. of Educ.*, 396 U.S. 19 (Oct. 29, 1969); *Carter* v. *West Feliciana Parish School Bd.*, —— U.S. —— (Jan. 14, 1970)."

These decisions are binding on the United States District Court for the Western District of North Carolina. Unless that were true, the Constitution would mean whatever might be the temporary notion of whichever one of 340-odd federal judges happened to hear the case. This is a matter of law, not anarchy; of constitutional right, not popular sentiment.

The order which follows is not based upon any requirement of "racial balance." The School Board, after four opportunities and nearly ten months of time, have failed to submit a lawful plan (one which desegregates all the schools). This default on their part leaves the court in the position of being forced to prepare or choose a lawful plan. The fairest way the court knows to deal with this situation was stated clearly in the December 1, 1969 order, as follows:

> "In default of any such plan from the school board, the court will start with the thought, originally advanced in the order of April 23, that efforts should be made to reach a 71-29 ratio in the various schools so that there will be no basis for contending that one school is racially different from the others, but to

understand that variations from that norm may be unavoidable."

THEREFORE, and in accordance with the specific, detailed, numbered guidelines of this court's order of December 1, 1969, IT IS ORDERED:

1. That the defendants discontinue the operation of segregated schools.

2. That the defendants take such action as is necessary to desegregate all the schools—students and faculty.

3. That desegregation of faculty be accomplished, as previously ordered, by assigning faculty (specialized faculty positions excepted) so that the ratio of black and white faculty members of each school shall be approximately the same as the ratio of black and white faculty members throughout the system.

4. That teachers be assigned so that the competence and experience of teachers in formerly or recently black schools will not be inferior to those in the formerly or recently white schools in the system.

5. That no school be operated with an all-black or predominantly black student body.

6. That pupils of all grades be assigned in such a way that as nearly as practicable the various schools at various grade levels have about the same proportion of black and white students.

7. That transportation be offered on a uniform nonracial basis to all children whose attendance in any school

is necessary to bring about the reduction of segregation, and who live farther from the school to which they are assigned than the Board determines to be walking distance. Estimates of the number of children who may have to be transported have run as high as 10,000 or more. Since the cost to the local system is about $18 or $20 a year per pupil, and the cost to the state in those areas where the state provides transportation funds is about another $18 or $20 a year per pupil, the average cost for transportation is apparently less than $40 per pupil per year. The local school budget is about $45,000,000 a year. It would appear that transporting 10,000 additional children, if that is necessary, and if the defendants had to pay it all, would add less than one per cent to the local cost of operating the schools. The significant point, however, is that the cost is not a valid legal reason for continued denial of constitutional rights.

8. That if geographic zones are used in making school assignments, the parts of a zone need not be contiguous.

9. That the defendants maintain a continuing control over the race of children in each school, just as was done for many decades before *Brown* v. *Board of Education*, and maintain the racial make-up of each school (including any new and any re-opened schools) to prevent any school from becoming racially identifiable.

10. That "freedom of choice" or "freedom of transfer" may not be allowed by the Board if the effect of any given transfer or group of transfers is to increase the degree of segregation in the school from which the transfer is requested or in the school to which the transfer is desired.

11. That the Board retain its statutory power and duty to make assignments of pupils for administrative reasons, with or without requests from parents. Administrative transfers shall not be made if the result of such transfers is to restore or increase the degree of segregation in either the transferor or the transferee school.

12. That if transfers are sought on grounds of "hardship," race will not be a valid basis upon which to demonstrate "hardship."

13. That the Board adopt and implement a continuing program, computerized or otherwise, of assigning pupils and teachers during the school year as well as at the start of each year for the conscious purpose of maintaining each school and each faculty in a condition of desegregation.

14. That the defendants report to the court weekly between now and May 15, 1970, reporting progress made in compliance with this order; and that they report thereafter on July 15, August 15, September 15 and November 1, 1970, and on February 1 and May 1, 1971.

5. That the internal operation of each school, and the assignment and management of school employees, of course be conducted on a non-racial, non-discriminatory basis.

16. The duty imposed by the law and by this order is the desegregation of schools and the maintenance of that condition. The *plans* discussed in this order, whether prepared by Board and staff or by outside consultants, such as computer expert, Mr. John W. Weil, or Dr. John A. Finger,

Jr., are *illustrations of means or partial means to that end.*[1] The defendants are encouraged to use their full "know-how" and resources to attain the *results* above described, and thus to achieve the constitutional end by any means at their disposal. The test is not the method or plan, but the *results.*

17. The choice or approval or partial approval of any proposed desegregation plan is subject to all the requirements and restrictions of the preceding sixteen paragraphs, as well as to any later requirements or restrictions set out in this order.

18. Subject to the above, the Board's pupil assignment plan for senior high school pupils is approved, with one

---

1. The following are exhibits to this order:
   - A. The Board's map of proposed senior high school attendance zones.
   - B. The Board's list of proposed senior high school populations.
   - C. The Board's map of proposed junior high school attendance zones.
   - D. The Board's list of proposed junior high school populations.
   - E. Dr. Finger's map of proposed junior high school attendance zones.
   - F. Dr. Finger's list of proposed junior high school populations.
   - G. The Board's map of proposed elementary school attendance zones.
   - H. The Board's list of proposed elementary school populations.
   - I. Dr. Finger's map of proposed elementary school attendance zones.
   - J. Dr. Finger's list of proposed elementary school populations.
   - K. Dr. Finger's list of pairing and grouping of elementary schools and grades.

exception. This exception is that black students, some 300 in number, should be assigned from map grids 294D, 295C, 295D, and 318A, to attend Independence High School.

19. Although the Board junior high school plan is inferior in design and results to Dr. Finger's plan, it is a purely "home grown" product and the court would like to approve it, if it can be brought into compliance with law by desegregating Piedmont Junior High School, and by adding transportation as above indicated, and by increasing the black attendance at several outlying schools. The Board may if it wishes consider (1) re-zoning; (2) two-way transporting of pupils between outlying schools and Piedmont; (3) closing Piedmont and assigning the pupils to Albemarle Road, Carmel, McClintock and Quail Hollow. Unless the court has been notified in writing by noon of February 6, 1970, of an affirmative decision adopting one of these choices by formal Board action, the junior high schools are directed to be desegregated according to Dr. Finger's plan, as illustrated by exhibits E and F.

20. The Board's plan for elementary schools, illustrated by exhibits G and H, cannot be approved because (1) it retains nine schools 83% to 100% black, serving over half the black elementary pupils, and (2) it leaves approximately half the 31,500 white elementary students attending schools that are 86% to 100% white; and (3) it promises to provide little or no transportation in aid of desegregation, even though the plan's zones in some cases are apparently five or six miles long. The Board plan for elementaries openly rejects the duty to eliminate all the black schools.

The Finger plan uses many of the same basic attendance lines as the Board plan; however, it does not stop short of

the constitutional requirements, and by pairing and clustering groups of schools it achieves full desegregation of the elementary schools. The school staff worked out the details of this plan and are familiar with it. Its attendance zones are illustrated on the map, exhibit I; its elementary school populations are listed in exhibit J; and the pairing and grouping of the outlying and inner-city schools, grade by grade, are shown in detail on exhibit K. Subject to the qualifications previously stated, the Board is directed to follow the Finger plan with reference to elementary schools.

21. THE TIME TABLE: Deadlines to complete various phases of the program required in this order are as follows:

SENIOR HIGH SCHOOLS.—Seniors may remain in their present schools until the end of the school year; the Board may make any decision they deem wise about allowing seniors to transfer before graduation to schools where their race will be in the minority. *Eleventh and tenth graders* will be transferred to their new schools not later than the 4th day of May, 1970.

JUNIOR HIGH SCHOOLS (Grades 7, 8, 9).—Complete desegregation shall be accomplished not later than the 1st day of April, 1970.

FACULTY.—Complete desegregation of the various faculties shall be accomplished by the various times set out above for desegregation of the student bodies.

22. MODIFICATIONS.—The intention of this order is to put on the Board the full duty to bring the schools into compliance with the Constitution as above outlined, but to leave maximum discretion in the Board to choose methods that will accomplish the required result. However, it is directed

that leave of court be obtained before making any material departure from any specific requirement set out herein. The court will undertake to rule promptly on any such requests for deviation from prescribed methods.

23. APPEAL.—The court claims no infallibility and does not seek to prevent appeal from all or any part of this order, and will allow the making of any record needed to present on appeal any contention the parties desire to make, and will do what this court can to expedite such appeal. However, in accordance with *Whittenberg* v. *Greenville, supra,* this order will not be stayed pending appeal, and immediate steps to begin compliance are directed.

24. All evidence in the cause and all findings and conclusions in previous orders which support or tend to support this order are relied upon in support of this order.

25. Jurisdiction of this cause is retained for further orders.

This the 5th day of February, 1970.

.....

James B. McMillan
United States District Judge

Amendment, Correction or Clarification of Order of February 5, 1970 dated March 3, 1970

Paragraph 7 of the February 5, 1970, order read in part as follows:

> "7. That transportation be offered on a uniform non-racial basis to all children whose attendance in any school is necessary to bring about the reduction of segregation, and who live farther from the school to which they are assigned than the Board determines to be walking distance. Estimates of the number of children who may have to be transported have run as high as 10,000 or more."

Since February 5, estimates have been made by defendants that paragraph 7 would require transporting more than 23,000 pupils rather than 10,000 to 14,000, as estimated at the hearing. Upon reviewing the evidence introduced since that hearing, it appears that these higher estimates may be based on construing the above language of paragraph 7 so as to require an offer of transportation to all children who live more than 1½ miles from their school, including city children who are not now entitled to transportation. These, according to the testimony, may number as many as 13,000.

The court regrets any lack of clarity in the order which may have given rise to this interpretation. Paragraph 7 was never intended to require transportation beyond that now provided by law for city children who are not reassigned, nor for those whose reassignments are not required by the desegregation program.

Accordingly, paragraph 7 of the February 5, 1970 order is amended by deleting the words "attendance in any school" and inserting the words "reassignment to any school," in the first sentence.

This the 3rd day of March, 1970.

/s/ James B. McMillan
James B. McMillan
United States District Judge

Court of Appeals Order Granting Stay Order of March 5, 1970

ORDER

An application for a stay pending appeal of the order of the District Court dated February 5, 1970 made to Judge Craven was by him referred to the entire Court pursuant to Rule 8 of the Federal Rules of Appellate Procedure.

Upon consideration by the full Court, it appears that disposition of this appeal will depend in part upon a resolution of factual questions as yet undetermined in the District Court. Specifically, the parties are in wide disagreement as to the impact of the order upon the School Board's transportation system, the number of pupils for whom transportation will be required under the order, the number of school buses needed to provided such transportation, their availability, and the cost of their acquisition and operation. The resolution of such factual issues is necessary to an orderly consideration of the issues on appeal insofar as they are directed to the order's requirement that transportation be provided for pupils reassigned under the order.

To facilitate the hearing and the disposition of this appeal, the District Court is requested, after such evidentiary hearings as may be necessary, to make supplemental findings of fact respecting the general issue of busing and the effect of its order with respect to the number of pupils transported, the number of buses required, their availability, and the additional capital and operating costs of transportation.

The District Court is requested, if possible, to file a supplemental order or memorandum, including such findings of fact, by March 20, 1970.

Court of Appeals Order Granting Stay Order of March 5, 1970

This appeal is accelerated. The hearing of the appeal will be scheduled in the Court of Appeals in Richmond, Virginia, on April 9, 1970 and the attorneys for all parties are directed to file their briefs in the office of the Clerk of the Court of Appeals for the Fourth Circuit not later than Tuesday, April 7, 1970.

Since it appears that the appeal cannot be heard and determined prior to April 1, 1970, the date for implementation of the first phase of the order of the District Court, and since the Court of Appeals is presently unable to appraise, in the absence of the requested additional findings of fact, the impact of the busing requirements,

IT IS NOW ORDERED that the order of the District Court dated February 5, 1970 be, and it hereby is, stayed insofar as it requires the reassignment of pupils for whom transportation would be required under the order but who are now not transported or who are now being transported at substantially less distance and at substantially less expense, such reassignments being those arising out of the pairing and clustering of schools with resulting cross-busing.

To the extent that the stay granted by this order requires other modifications in the District Court's order, such modifications as may appear appropriate to the District Court to achieve a cohesive and efficient system of public education are authorized.

Except with respect to the busing requirements of the order which are hereby stayed and the resulting necessary modifications hereby authorized, the application for a stay is denied, and implementation of the order of the District Court is directed at the times and in the manner specified

Court of Appeals Order Granting Stay Order of March 5, 1970

therein, subject to the further orders of this Court and the ultimate disposition of the appeal. This is in conformity with the general direction of the Supreme Court that orders of the District Court shall be implemented pending the hearing and determination of appeals from such orders. Alexander v. Holmes County Board of Education, 396 U.S. 19; Carter v. West Feliciana Parish School Board, — U.S. — (January 14, 1970).

By direction of the Court.

/s/ CLEMENT L. HAYNSWORTH, JR.
Chief Judge, Fourth Circuit

Supplementary Findings of Fact dated March 21, 1970

Pursuant to the March 5, 1970 order of the Fourth Circuit Court of Appeals, the court makes the following supplemental findings of fact:

1. Paragraph seven of this court's order of February 5, 1970, as amended, reads:

> "7. That transportation be offered on a uniform non-racial basis to all children whose reassignment to any school is necessary to bring about the reduction of segregation, and who live farther from the school to which they are assigned than the Board determines to be walking distance. Estimates of the number of children who may have to be transported have run as high as 10,000 or more. Since the cost to the local system is about $18 or 20 a year per pupil, and the cost to the state in those areas where the state provides transportation funds is about another $18 or $20 a year per pupil, the average cost for transportation is apparently less than $40 per pupil per year. The local school budget is about $45,000,000 a year. It would appear that transporting 10,000 additional children, if that is necessary, and if the defendants had to pay it all, would add less than one per cent to the local cost of operating the schools. The significant point, however, is that cost is not a valid legal reason for continued denial of constitutional rights."

2. A bird's-eye picture of the indispensable position of the school bus in public education in North Carolina, and especially in the school life of grades one through six (elementary students) is contained in a summary by the de-

fendant Dr. Craig Phillips entitled "RIDING THE SCHOOL BUSES" (Plaintiffs' Exhibit 15), published January 1, 1970, which reads as follows:

"The average school bus transported 66 students each day during the 1968-69 school year; made 1.57 trips per day, 12.0 miles in length (one way); transported 48.5 students per bus trip, including students who were transported from elementary to high schools.

"During the 1968-69 school year:

610,760 pupils were transported to public schools by the State

54.9 percent of the total public school average daily attendance was transported

70.9 percent were elementary students

29.1 percent were high school students

3.5 students were loaded (average) each mile of bus travel

The total cost of school transportation was $14,293,-272.80, including replacement of buses: The average cost, including the replacement of buses, was $1,541.05 per bus for the school year—181 days; $8.51 per bus per day; $23.40 per student for the school year; $.1292 per student per day; and $.2243 per bus mile of operation." (Emphasis added.)

In Mecklenburg County, the average daily number of pupils currently transported on state school busses is approximately 23,600—plus another 5,000 whose fares are paid on the Charlotte City Coach Lines.

Supplemental Findings of Fact dated March 21, 1970

3. Separate bus systems for black students and white students were operated by the defendant Mecklenburg County Board of Education for many years up until 1961. Separate black and white bus systems were operated by the combined Charlotte-Mecklenburg Board from 1961 until 1966 (Defendants' answers to Plaintiffs' requests for admissions, Nos. 1 and 8, filed March 13, 1970).

4. Pertinent figures on the local school transportation system include these:

Number of busses	280
Pupils transported on school busses daily	23,600
Pupils whose fares are paid on Charlotte City Coach Lines, Inc.	5,000
Number of trips per bus daily	1.8
Average daily bus travel	40.8 miles
Average number of pupils carried daily, per bus	83.2
Annual per pupil transportation cost	$19—$20
Additional cost (1968-69) per pupil to state	$19.92
Total annual cost per pupil transported	$39.92
Daily transportation cost per pupil transported	$0.22

5. Information about North Carolina:

Population	4,974,000
1969-71 total state budget	$3,590,902,142

Supplemental Findings of Fact dated March 21, 1970

1969-71 total budgeted state funds for public schools	$1,163,310,993
1968-69 amount spent by state on transportation (including replacement busses)	$14,293,272.80
1969-71 appropriation for purchase of school busses	$6,870,142
Average number of pupils transported daily, 1968-69	610,760
Average number of pupils transported daily per bus—statewide	66

6. The 1969-70 budget of the Charlotte-Mecklenburg school system is $57,711,344, of which nearly $51,000,000 represents operational expense and between $6,000,000 and $7,000,000 represents capital outlay and debt service. These funds come from federal, state and county sources, as follows:

Federal	State	County	Total
$2,450,000	$29,937,044	$25,324,300	$57,711,344

The construction of school buildings is not included in these budget figures (see Plaintiffs' Exhibit 6).

7. State expenditures in the past ten years have usually not equalled appropriations. There has been a sizeable operating surplus in the state budget for every biennium since 1959-60 (State Budget, page 86).

8. The state superintendent of public instruction in his biennial report (Plaintiffs' Exhibit 12) for the years 1966-68 recommended that "city transportation should be pro-

vided on the same basis as transportation for rural children as a matter of equity."

9. The 1969 report of the Governor's Study Commission on the Public School System of North Carolina (Plaintiffs' Exhibit 13) recommended that transportation be provided for all school children, city as well as rural, on an equal basis. Signatory to that report was one of the present defendants, the state superintendent of public instruction.

10. The basic support for the public schools of the state comes from the State Legislature.

11. Some 5,000 children travel to and from school in Mecklenburg County each day in busses provided by contract carriers such as Charlotte City Coach Lines, Inc. (Morgan's deposition of February 25, 1970, page 36).

12. Upon the basis of data furnished by the school board and on the basis of statistics from the National Safety Council, it is found as a fact that travel by school bus is safer than walking or than riding in private vehicles.

13. Traffic is of course heavy all over the 540 square miles of the county. Motor vehicle registration for 1969 was 191,165 motor vehicles (161,678 automobiles and 29,487 trucks).

14. Many children eligible for transportation do not accept that transportation. Estimates have been made that this number of those who do not accept transportation is in the neighborhood of 50% of those who are eligible.

Supplemental Findings of Fact dated March 21, 1970

15. Approximately 5,000 children in the system attend school outside the school zone in which they reside. Although requested of the defendants by the court on March 7, 1970, information as to where these children go to school has not been forthcoming and the defendants have indicated that it is impossible to produce it.

16. As the state transportation regulations* are understood by the court, the state will bear its share (about half) of transportation costs for children who live more than 1½ miles from their school, as follows:

(a) All rural children, wherever they attend school;

(b) All perimeter children (those living in territory annexed by the city before 1957), wherever they attend school; and

(c) All inner city children assigned to schools in either the perimeter or the rural areas of the system.

17. The defendants submitted information on the number of children who live within 1½ miles of the schools which are to be desegregated by zoning. This information shows that East Mecklenburg, Independence, North Mecklenburg, Olympic, South Mecklenburg and West Mecklenburg high schools, and Quail Hollow and Alexander junior high schools, with total student populations of 12,184, have in the aggregate only 96 students who live within 1½ miles from the schools. Some 12,088 then are eligible for transportation. These same schools among them provide bus transportation for 5,349 students. This information illustrates the importance of the bus as one of the essential

* General Statutes of North Carolina, Chapter 115, §180-192.

elements in the whole plan of operation of the schools. It also shows the wide gap between those entitled to transportation and those who actually claim it. There is no black school in the system which depends very much upon the school bus to get the children to school. The total number of children transported in October, 1969, to schools identifiable as black was 541 out of total population in those black schools of over 17,000. Black schools, including the new black schools, have been located in black areas where busses would be unnecessary. Suburban schools, including the newest ones, have been located far away from black centers, and where they can not be reached by many students without transportation.

18. Bus travel in both urban and rural areas takes time. An analysis of the records of bus transportation, based upon the reports of school principals, is contained in the extensive exhibits bearing Plaintiffs' Exhibit numbers 22, 23, 24, 25, 26 and 27. For the month of October, 1969, by way of illustration, these principals' reports when analyzed show that out of some 279 busses carrying more than 23,000 children both ways each day:

The average one way trip is one hour and fourteen minutes;

80% of the busses require more than one hour for a one way trip;

75% of the busses make two or more trips each day; Average miles traveled by busses making one round trip per day is 34½; and

Average bus mileage per day for busses making two trips is 47.99.

Supplemental Findings of Fact dated March 21, 1970

19. It was the testimony of Dr. Self and Dr. Finger, and the courts finds as a fact, that transportation provided by the school board's plans, which include narrow corridors several miles long and in places only one-half mile wide, proceeding in straight lines diagonally across streets and other obstacles, would be more expensive per capita than transportation under the satellite zone plan. The court plan calls for pick-ups to be made at a few points in each school district, as testified to by Dr. Self, and for non-stop runs to be made between satellite zones and principal zones. There will be no serious extra load on downtown traffic because there will be no pick-up and discharge of passengers in downtown traffic areas.

20. The court finds that from the standpoint of distance travelled, time en route and inconvenience, the children bussed pursuant to the court order will not as a group travel as far, nor will they experience more inconvenience than the more than 28,000 children who are already being transported at state expense.

21. On July 29, 1969 (pursuant to the court's April 23, 1969 order that they frame a plan for desegregation and that school busses could be used as needed), the defendants proposed a plan for closing seven inner-city black schools and bussing 4,200 students to outlying schools. The plan was approved. It had some escape clauses in it, and the defendants in practice added some others; but *as presented,* and as approved by the court, the "freedom of choice" contemplated was very narrowly restricted; and bussing of several hundred students has taken place under that plan.

22. Evidence of property valuations produced by the defendants shows that the value of the seven school proper-

ties closed under the July 29, 1969 plan, and now for the most part standing idle, was over three million dollars.

23. The all-black or predominantly black elementary schools which the board plan would retain in the system are located in an almost exclusively Negro section of Charlotte, which is very roughly triangular in shape and measures about four or five miles on a side. Some are air-conditioned and most are modern. Virtually none of their patrons now ride busses; the schools were located where the black patrons were or were expected to be. These schools, their completion dates, and representative academic performances of their sixth grade graduating classes are shown in the following table:

The information shown in the first three columns below was taken from answers to interrogatories, Nos. 1-f, 1-g and 1-h, filed October 25, 1968.

GRADE 6 AVERAGE ACHIEVEMENT TEST SCORES, SHOWN IN GRADE EQUIVALENT (such as 6.2 = 6th grade, 2nd month), 1968-69.

Supplemental Findings of Fact dated March 21, 1970

24. Both Dr. Finger and the school board staff appear to have agreed, and the court finds as a fact, that for the present at least, there is no way to desegregate the all-black schools in Northwest Charlotte without providing (or continuing to provide) bus or other transportation for thousands of children. All plans and all variations of plans considered for this purpose lead in one fashion or another to that conclusion.

25. In the court's order of April 23, 1969, a suggestion was made that the board seek consultation or assistance from the office of Health, Education and Welfare. The board refused to do this, and as far as the court knows has not sought help from HEW.

26. Some 600 or more pupils transfer from one school to another or register for the first time into the system during the course of each month of the typical school year. It is the assignment of these children which is the particular subject of the reference in paragraph 13 of the order to the manner of handling assignments within the school year.

27. No plan for the complete desegregation of the schools was available to the court until the appointment of Dr. John A. Finger, Jr. and the completion of his tactful and effective work with the school administrative staff in December 1969 and January 1970. Dr. Finger has a degree in science from Massachusetts Institute of Technology and a doctor's degree in education from Harvard University, and twenty years' experience in education and educational problems. He has worked in a number of school desegregation cases and has a rare capacity for perception and solution of educational problems. His work with the staff had

the catalytic effect of freeing and inducing the staff to work diligently in the preparation of plans that would accomplish the result required, and which would be cohesive and efficient from an educational point of view.

28. Hearings on the "Finger" plans and on the board's proposed plans were conducted on February 2 and February 5, 1970. These plans may best be understood if they are considered in four divisions:

29. *The plan for senior high schools.*—The plan ordered to be put into effect May 4, 1970 is the board's own plan for desegregation of the senior high schools in all particulars except that the order calls for the assignment to Independence High School of some 300 black children. The board contends the high school plans will call for additional transportation for 2,497 students and will require 69 busses. The court is unable to accept this view of the evidence. All transportation under both the board and the court plan is covered by state law.

30. *The plan for junior high schools.*—A plan for junior high schools was prepared by the board staff and Dr. Finger and was submitted to the court as Dr. Finger's plan. The board submitted a separate plan. Both plans used the technique of re-zoning. The school board's plan after all of their re-zoning had been done left Piedmont Junior High School 90% black and shifting towards 100% black. The plan designed by Dr. Finger with staff assistance included zoning in such a way as to desegregate all the schools. This zoning was aided by a technique of "satellite" districts. For example, black students from satellite districts in the central city area around Piedmont Courts will be assigned to Alexander Graham Junior High,

which is predominantly white. Black students from the area around Northwest Junior High School (all-black) will be similarly transferred to Wilson Junior High, northwest of the air port. These one-way transfers, essentially identical in nature to the board's July 29, 1969 plan, will result in the substantial desegregation of all the junior high schools, which are left under this plan with black student populations varying from 9% at J. H. Gunn to 33% at Alexander and Randolph.

The court order did not require the adoption of the Finger plan. In paragraph 19 of the order the board were given four choices of action to complete the process of desegregating the junior high schools. These choices were (1) Re-zoning; (2) Two-way transporting of pupils between Piedmont and white schools; (3) Closing Piedmont and assigning the black students to other junior high schools; or (4) Adoption of the Finger plan.

The board elected to adopt and did adopt the Finger plan by resolution on February 9, 1970.

The defendants have offered figures on the basis of which they ask the court to find that 4,359 students will have to be transported under the junior high school plan and that 84 busses will be required. The court is unable to find that these contentions are borne out by the statistics and other evidence offered.

Dr. Self, the school superintendent, and Dr. Finger, the court appointed expert, both testified that the transportation required to implement the plan for junior highs would be less expensive and easier to arrange than the transportation proposed under the board plan. The court finds this to be a fact.

Two schools may be used to illustrate this point. Smith Junior High under the board plan would have a contigu-

ous district six miles in length extending 4½ miles north from the school itself. The district throughout the greater portion of its length is one-half mile wide and all roads in its one-half mile width are diagonal to its borders. Eastway Junior High presents a shape somewhat like a large wooden pistol with a fat handle surrounding the school off Central Avenue in East Charlotte and with a corridor extending three miles north and then extending at right angles four miles west to draw students from the Double Oaks area in northwest Charlotte. Obviously picking up students in narrow corridors along which no major road runs presents a considerable transportation problem.

The Finger plan makes no unnecessary effort to maintain contiguous districts, but simply provides for the sending of busses from compact inner city attendance zones, non-stop, to the outlying white junior junior high schools, thereby minimizing transportation tie-ups and making the pick-up and delivery of children efficient and time-saving.

It also is apparent that if the board had sought the minimum departure from its own plan, such minimum result could have been achieved by accepting the alternative of transporting white children into and black children out of the Piedmont school until its racial characteristics had been eliminated.

In summary, as to junior high schools, the court finds that the plan chosen by the board and approved by the court places no greater logistic or personal burden upon students or administrators than the plan proposed by the school board; that the transportation called for by the approved plan is not substantially greater than the transportation called for by the board plan; that the approved plan will be more economical, efficient and cohesive and easier to administer and will fit in more nearly with the

transportation problems involved in desegregating elementary and senior high schools, and that the board made a correct administrative and educational choice in choosing this plan instead of one of the other three methods.

31. *The plan for elementary schools.*—The elementary school desegregation program is best understood by dividing it into two parts: (a) The 27 schools being desegregated by zoning; and (b) The 34 schools being desegregated by grouping, pairing and transportation between school zones.

32. *The re-zoned group.* Two plans were submitted to the court. The school board plan was prepared for the board by its staff. It relied entirely upon zoning with the aid of some computer data supplied by Mr. Weil, a board employed consultant. It did as much as could reasonably be accomplished by re-zoning school boundaries. It would leave nine elementary schools 83% to 100% black. (These schools now serve 6,462 students—over half the black elementary pupils.) It would leave approximately half the white elementary students attending schools which are 86% to 100% white. In short, it does not tackle the problem of the black elementary schools in northwest Charlotte.

The "Finger plan" was the result of nearly two months of detailed work and conference between Dr. Finger and the school administrative staff. Dr. Finger prepared several plans to deal with the problem within the guidelines set out in the December 1, 1969 order. Like the board plan, the Finger plan does as much by re-zoning school attendance lines as can reasonably be accomplished. However, unlike the board plan, it does not stop there. It goes further and desegregates all the rest of the elementary schools by the technique of grouping two or three outlying schools with one black inner city school; by transporting black

students from grades one through four to the outlying white schools; and by transporting white students from the fifth and sixth grades from the outlying white schools to the inner city black school.

The "Finger plan" itself in the form from which in principle the court approved on February 5, 1970, was prepared by the school staff and was filed with the court by representatives of the school board on February 2, 1970. It represents the combined thought of Dr. Finger and the school administrative staff as to a valid method for promptly desegregating the elementary schools, if such desegregation is required by law to be accomplished.

This plan was drafted by the staff and by Dr. Finger in such a way as to make possible immediate desegregation if it should be ordered by an appellate court in line with then current opinions of appellate courts.

The testimony of the school superintendent, Dr. Self, was, and the court finds as a fact, that the zoning portion of the plan can be implemented by April 1, 1970 along educationally sound lines and that the transportation problems presented by the zoning portion of the plan can be solved with available resources.

The court has reviewed the statistics supplied to it by the original defendants with regard to elementary schools to be desegregated by re-zoning. These schools have been zoned with compact attendance areas and with a few exceptions they have no children beyond 1½ miles distance from the school to which they are assigned. Although some transportation will be required, the amount is not considerable when weighed against the already existing capacity of the system. The court specifically finds that not more than 1,300 students will require transportation under this portion of the program and that the bus trips would be so

short and multiple bus runs so highly practical that 10 school busses or less will be adequate.

33. *The pairing and grouping of 54 elementary schools.* —This part of the plan as previously described would group an inner city black school with two or more outlying white schools and assign children back and forth between the two so that desegregated fifth and sixth grades would be established in the presently black schools and desegregated grades one through four would be established in the presently white schools. The estimate of Dr. Finger and Dr. Self, the superintendent, was that this program would require transporting roughly 5,000 white pupils of fifth and sixth grade levels into inner city schools. The board in its latest estimate puts the total figure at 10,206. Just what is the net additional number of students to be transported who are not already receiving transportation is open to considerable question.

34. *The Discount Factors.*—The court accepts at face value, for the most part, the defendants' evidence of matters of independent fact, but is unable to agree with the opinions or factual conclusions urged by counsel as to the numbers of additional children to be transported, and as to the cost and difficulty of school bus transportation. The defendants in their presentation have interpreted the facts to suggest inconvenient and expensive and burdensome views of the court's order. Their figures must be discounted in light of various factors, all shown by the evidence, as follows:

(a) Some 5,000 children daily are provided transportation on City Coach Lines, in addition to the

23,600 and more who ride school busses. These have not been considered in the defendants' calculations.

(b) Not all students eligible for transportation actually accept it. The board's estimates of transportation, however, assume that transportation must be provided daily for all eligible students.

(c) Not all registered students attend all schools every day. The board's figures appear to assume they do. Statewide, average daily attendance is less than 94% of initial registration.

(d) The present average number of students transported round trip, to and from school, per bus, per day, is more than 83. The board's estimates, however, are based on the assumption that they can transport only 44 or 46 pupils, round trip, per bus, per day when the bus serves a desegregation role.

(e) Busses now being used make an average of 1.8 trips per day. Board estimates to implement the desegregation plan contemplate only one trip per bus per day!

(f) The average one-way bus trip in the system today is over 15 miles in length and takes nearly an hour and a quarter. The average length of the one-way trips required under the court approved plan for elementary students is less than seven miles, and would appear to require not over 35 minutes at the most, because no stops will be necessary between schools.

(g) The board's figures do not contemplate using busses for more than one load of passengers morning or afternoon. Round trips instead of one-way trips morning and afternoon could cut the bus requirements sharply.

(h) The number of busses required can be reduced 35% to 50% by staggering the opening and closing hours of schools so that multiple bus trips can be made. This method is not considered in the board's estimates, according to testimony of J. D. Morgan, bus superintendent.

(i) Substantial economies may reasonably be expected when all phases of the bussing operation have been coordinated instead of being considered separately.

(j) In estimating how many children live more than a mile and a half from schools, and therefore are entitled to transportation, the board's transportation people have used some very short measurements. As the court measures the maps, very few of the students in the re-zoned elementary schools, for example, live more than 1½ miles from their assigned schools. If the board wants to transport children who live less than 1½ miles away they may, but if they do, it is because of a board decision rather than because of the court's order.

(k) Transportation requirements could be reduced by raising the walking distance temporarily from 1½ to perhaps 1¾ miles. This has apparently not been taken into account.

(l) Testimony of J. D. Morgan shows that busses can be operated at a 25% overload. Thus a 60-passenger bus (the average size) can if necessary transport 75 children. Some busses in use today transport far more.

35. *Findings of Fact as to Required Transportation.*— After many days of detailed study of maps, exhibits and

statistics, and after taking into account all the evidence, including the "discount factors" mentioned above, the court finds as facts that the maximum number of additional children who may conceivably require transportation under the court ordered plans, and the maximum numbers of additional busses needed are as follows:

	Net Additional Transportees	*Number of Busses Needed*
Senior Highs	1,500	20
Junior Highs	2,500	28
Elementaries:		
Re-zoned	1,300	10
Paired and Grouped	8,000	80
Totals	13,300	138

36. These children (all but a few hundred at Hawthorne, Piedmont, Alexander Graham, Myers Park High School, Eastover, West Charlotte and a few other places), *if assigned to the designated schools, are entitled to transportation under existing state law, independent of and regardless of this court's order respecting bussing.*

37. The court also finds that the plan proposed by the board would have required transportation for at least 5,000 students in addition to those now being transported.

38. *Separability.—Each of the four parts of the desegregation plan is separable from the other.* The re-zoning of elementaries can proceed independent of the pairing and grouping. The pairing and grouping can take place independent of all other steps. *The implementation of the*

pairing and grouping plan itself can be done piecemeal, one group or several groups at a time, as transportation becomes available. It was planned that way.

39. *The Time Table.*—The February 5, 1970 order followed the time table requested by the defendants. At the February 2 hearing, the school board attorney requested until April 1, 1970 to desegregate the elementary schools (T. 20); he requested that high school seniors be allowed to graduate where they are (T. 21); he proposed continuing junior high students and grades 10 and 11 in their present schools until the third week before the end of school (T. 21). The request of Dr. Self, the school superintendent, was identical as to elementaries and 12th graders; he preferred to transfer 10th and 11th graders about two weeks before school was over (T. 95). Availability of transportation was the only caveat voiced at the hearing.

40. The February 5 order expressly provided that "racial balance" was not required. The percentage of black students in the various parts of the plans approved vary from 3% black at Bain to 41% black at Cornelius.

41. *Cost.*—Busses cost around $5,400.00 each, varying according to size and equipment. Total cost of 138 busses, if that many are needed, would therefore be about $745,200.00. That is much less than one week's portion of the Mecklenburg school budget. Busses last 10 to 15 years. The state replaces them when worn out.

Some additional employees will be needed if the transportation system is enlarged.

Defendants have offered various estimates of large increased costs for administration, parking, maintenance, driver education and other items. If they choose to incur

excess costs, the court can not prevent it. However, the evidence shows that school bus systems in Charlotte and other urban North Carolina counties tend to operate at lower costs per student than rural systems. Adding a larger number of short-range capacity loads should not tend to increase the present overall per capita cost of $40 a year.

It is the opinion and finding of the court that the annual transportation cost per student, including amortization of the purchase price of the busses, will be at or close to $40.00, and that the total annual cost, which is paid about half by the state and half by the county, of implementing this order, will not exceed the following:

For zoned Elementaries	(1,300)	$ 52,000
For paired Elementaries	(8,000)	320,000
For Junior Highs	(2,500)	100,000
For Senior Highs	(1,500)	60,000
		$532,000*

41. *Availability.*—The evidence shows that the defendant North Carolina Board of Education has approximately 40 brand new school busses and 375 used busses in storage, awaiting orders from school boards. None had been sold at last report. The state is unwilling to sell any of them to Mecklenburg because of the "anti-bussing" law. No orders for busses have been placed by the school board.

If orders to manufacturers had been placed in early February, delivery in 60 or 90 days could have been anticipated. The problem is not one of availability of busses

* The local system's share of this figure would be $266,000.00, which at current rates is only slightly more than the annual interest or the value of the $3,000,000.00 worth of school properties closed in 1969.

but of unwillingness of Mecklenburg to buy them and of the state to furnish or make them available until final decision of this case.

This the 21 day of March, 1970.

/s/ JAMES B. MCMILLAN
James B. McMillan
United States District Judge

Supplemental Memorandum dated March 21, 1970

Pursuant to the order of the Fourth Circuit Court of Appeals, filed March 5, 1970, this memorandum is issued.

Previous orders cover more than one hundred pages. The motions and exhibits and pleadings and evidence number thousands of pages, and the evidence is several feet thick. It may be useful to reviewing authorities to have a brief summary of the case in addition to the supplemental facts on the questions of transportation.

Before 1954, the schools in Charlotte and Mecklenburg County were segregated by state law. The General Assembly, in response to Brown v. Board of Education, adopted the Pupil Assignment Act of 1955-56, North Carolina General Statutes, §115-176, which was quoted in the April 23, 1969 order and which is still the law of North Carolina. It provides that school boards have full and final authority to assign children to schools and that no child can be enrolled in nor attend a school to which he has not been so assigned.

"Freedom of choice" to pick a school has never been a right of North Carolina public school students. It has been a courtesy offered in recent years by some school boards, and its chief effect has been to preserve segregation.

Slight token desegregation of the schools occurred in the years following *Brown*. The Mecklenburg County and the Charlotte City units were merged in 1961.

This suit was filed in 1965, and an order was entered in 1965 approving the school board's then plan for desegregation, which was substantially a freedom of choice plan coupled with the closing of some all-black schools.

There was no further court action until 1968, when a motion was filed requesting further desegregation. Most

white students still attended "white" schools and most blac students still attended "black" schools. The figures o this subject were analyzed in this court's opinion o April 23, 1969 (300 F.Supp. 1358 (1969)), in which th background and history of local segregation and its co tinuing discriminatory nature were analyzed at lengt In that order the court ruled that substantial progress ha been made and that many of the alleged acts of discrimin tion were not proved.

However, certain significant findings and conclusio were made which have been of record without appeal fo eleven months. These include the following:

1. The schools were found to be unconstitutionall segregated.

2. Freedom of choice had failed; no white child ha chosen to attend any black school, and freedom o choice promoted rather than reduced segregation.

3. The concentration of black population in nort west Charlotte and the school segregation which a companied it were primarily the result of discrimin tory laws and governmental practices rather than natural "neighborhood" forces. (This finding was r affirmed in the order of November 7, 1969.)

4. The board had located and controlled the si and population of schools so as to maintain segreg tion.

5. The plan approved and put into effect in 19 had not eliminated unlawful segregation.

6. The defendants operate a sizeable fleet of busse serving over 23,000 children at an average annual co (to state and local governments combined) of not mo than $40 per year per pupil.

Supplemental Memorandum dated March 21, 1970

7. Transportation by bus is a legitimate tool for school boards to use to desegregate schools.

8. Faculties were segregated, and should be desegregated.

9. Under *Green* v. *New Kent County School Board*, 391 U.S. 430 (1968), there was now an active duty to eliminate segregation.

The board was directed to submit a plan to desegregate the schools.

The order produced a great outcry from school board members and others. It also produced a plan which called for the closing of Second Ward, the only black high school located near a white neighborhood; and it produced no rezoning, no elimination of gerrymandering, and only minor changes in the pupil assignment plan. It did produce an undertaking to desegregate the faculties. The plan was reviewed in the court order of June 20, 1969, in which the court approved the provision for offering transportation to children transferring from majority to minority situations and directed the preparation of a plan for pupil desegregation.

The court also specifically found that gerrymandering had been taking place; and several schools were cited as illustrations of gerrymandering to promote or preserve segregation.

In June of 1969, pursuant to the hue and cry which had been raised about "bussing," Mecklenburg representatives in the General Assembly of North Carolina sought and procured passage of the so-called "anti-bussing" statute, N.C. G.S. 115-176.1. That statute reads as follows:

"§115-176.1. Assignment of pupils based on race, creed, color or national origin prohibited. —No person shall be refused admission into or be excluded from any public school in this State on account of

race, creed, color or national origin. No school attendance district or zone shall be drawn for the purpose of segregating persons of various races, creed, colors or national origins from the community.

"Where administrative units have divided the geographic area into attendance districts or zones, pupils shall be assigned to schools within such attendance districts; provided, however, that the board of education of an administrative unit may assign any pupil to a school outside of such attendance district or zone in order that such pupil may attend a school of a specialized kind including but not limited to a vocational school or school operated for, or operating programs for, pupils mentally or physically handicapped, or for any other reason which the board of education in its sole discretion deems sufficient. No student shall be assigned or compelled to attend any school on account of race, creed, color or national origin, or for the purpose of creating a balance or ratio of race, religion or national origins. Involuntary bussing of students in contravention of this article is prohibited, and public funds shall not be used for any such bussing.

"*The provisions of this article shall not apply* to a temporary assignment due to the unsuitability of a school for its intended purpose nor *to any assignment or transfer necessitated by overcrowded conditions or other circumstances which, in the sole discretion of the school board, require assignment or reassignment* .

"The provisions of this article shall not apply to an application for the assignment or reassignment by the parent, guardian or person standing in loco parentis of any pupil or to any assignment made pursuant to a choice made by any pupil who is eligible

to make such choice pursuant to the provisions of a freedom of choice plan voluntarily adopted by the board of education of an administrative unit. (1969, c. 1274.)"

The board's next plan was filed July 29, 1969, and was approved for 1969-70 by the order of August 15, 1969. The August 15 order contained the following paragraph:

> "The most obvious and constructive element in the plan is that the School Board has reversed its field and has accepted its affirmative constitutional duty to desegregate pupils, teachers, principals and staff members 'at the earliest possible date.' It has recognized that where people live should not control where they go to school nor the quality of their education, and that transportation may be necessary to comply with the law. It has recognized that easy methods will not do the job; that rezoning of school lines, perhaps wholesale; pairing, grouping or clustering of schools; use of computer technology and all available modern business methods can and must be considered in the discharge of the Board's constitutional duty. This court does not take lightly the Board's promises and the Board's undertaking of its affirmative duty under the Constitution and accepts these assurances at face value. They are, in fact, the conclusions which necessarily follow when any group of women and men of good faith seriously study this problem *with knowledge of the facts of this school system and in light of the law of the land.*"

The essential action of the board's July 29, 1969 plan was to close seven inner-city black schools and to re-assign their pupils to designated white suburban schools, and to

transport these children by bus to these suburban schools. In addition, it was proposed to re-assign 1,245 students from named black schools to named suburban white schools and provide them transportation.

The total of this one-way transportation of black students only to white schools under this plan was stated to be 4,245 children.

No problem of transportation or other resources was raised or suggested.

The evidence of the defendants is that the property value of the schools thus closed exceeds $3,000,000. For the most part, that property stands idle today.

The "anti-bussing" law was not found by the board to interfere with this proposed wholesale re-assignment and "massive bussing," of black children only, for purposes of desegregation.

The plan, by order of August 15, 1969, was approved on a one-year basis only, and the board was directed to prepare and file by November 17, 1969, a plan for complete desegregation of all schools, to the maximum extent possible, by September 1, 1970.

The defendants filed a motion asking that the deadline to prepare a plan be extended from November 17, 1969, to February 1, 1970. The court called for a report on the results of the July 29, 1969 plan. Those results were outlined in this court's order of November 7, 1969. In substance, the plan which was supposed to bring 4,245 children into a desegregated situation had been handled or allowed to dissipate itself in such a way that only about one-fourth of the promised transfers were made; and as of now only 767 black children are actually being transported to suburban white schools instead of the 4,245 advertised when the plan was proposed by the board. (See defendants'

Supplemental Memorandum dated March 21, 1970

March 13, 1970 response to plaintiffs' requests for admissions.)

The meager results of eight months of planning were further set out in this court's November 7, 1969 order, as follows:

"THE SITUATION TODAY

"The following table illustrates the racial distribution of the present school population:

SCHOOLS READILY IDENTIFIABLE AS WHITE

% WHITE	NUMBER OF SCHOOLS	NUMBERS OF STUDENTS WHITE	BLACK	TOTALS
100%	9	6,605	2	6,607
98-99%	9	4,801	49	4,850
95-97%	12	10,836	505	11,341
90-94%	17	14,070	1,243	15,313
86-89%	10	8,700	1,169	9,869
	57	45,012	2,968	47,980

SCHOOLS READILY IDENTIFIABLE AS BLACK

% BLACK	NUMBER OF SCHOOLS	NUMBERS OF STUDENTS WHITE	BLACK	TOTALS
100%	11	2	9,216	9,218
98-99%	5	41	3,432	3,473
90-97%	3	121	1,297	1,418
56-89%	6	989	2,252	3,241
	25	1,153	16,197	17,350

SCHOOLS NOT READILY IDENTIFIABLE BY RACE

% BLACK	NUMBER OF SCHOOLS	NUMBERS OF STUDENTS WHITE	BLACK	TOTALS
32-49%	10	4,320	2,868	7,188
17-20%	8	5,363	1,230	6,593
22-29%	6	3,980	1,451	5,431
	24	13,663	5,549	19,212
TOTALS:	106	59,828	24,714	84,542

Supplemental Memorandum dated March 21, 1970

Some of the data from the table, re-stated, is as follows:

Number of schools	106
Number of white pupils	59,828
Number of black pupils	24,714
Total pupils	84,542
Per cent of white pupils	71%
Per cent of black pupils	29%
Number of "white" schools	57
Number of white pupils in those schools	45,012
Number of "black" schools	25
Number of black pupils in those schools	16,197
Number of schools not readily identifiable by race	24
Number of pupils in those schools	19,212
Number of schools 98-100% black	16
Negro pupils in those schools	12,648
Number of schools 98-100% white	18
White pupils in those schools	11,406

"Of the 24,714 Negroes in the schools, something above 8,500 are attending 'white' schools or schools not readily identifiable by race. *More than 16,000, however, are obviously still in all-black or predominantly black schools.* The 9,216 in 100% black situations are considerably more than the number of black students in Charlotte in 1954 at the time of the first *Brown* decision. The black school problem has not been solved.

"The schools are still in major part segregated or 'dual' rather than desegregated or 'unitary.'

"The black schools are for the most part in black residential areas. However, that does not make their segregation constitutionally benign. In previous opinions the facts

respecting their locations, their controlled size and their population have already been found. Briefly summarized, these facts are that the present location of white schools in white areas and of black schools in black areas is the result of a varied group of elements of public and private action, all deriving their basic strength originally from public law or state or local governmental action. These elements include among others the legal separation of the races in schools, school busses, public accommodations and housing; racial restrictions in deeds to land; zoning ordinances; city planning; urban renewal; location of public low rent housing; and the actions of the present School Board and others, before and since 1954, in locating and controlling the capacity of schools so that there would usually be black schools handy to black neighborhoods and white schools for white neighborhoods. There is so much state action embedded in and shaping these events that the resulting segregation is not innocent or *'de facto,'* and the resulting schools are not 'unitary' or desegregated.

"Freedom of Choice

"Freedom of choice has tended to perpetuate segregation by allowing children to get out of schools where their race would be in a minority. The essential failure of the Board's 1969 pupil plan was in good measure due to freedom of choice.

"As the court recalls the evidence, it shows that *no white students have ever chosen to attend any of the 'black' schools.*

"Freedom of choice does not make a segregated school system lawful. As the Supreme Court said in *Green* v. *New Kent County,* 391 U. S. 430 (1968):

"'. . . If there are reasonably available other ways, such for illustration as zoning, promising speedier and

more effective conversion to a unitary, nonracial school ysstem, "freedom of choice" must be held unacceptable.'

"Redrawing attendance lines is not likely to accomplish anything stable toward obeying the constitutional mandate as long as freedom of choice or freedom of transfer is retained. The operation of these schools for the foreseeable future should not include freedom of choice or transfer except to the extent that it reduces segregation, although of course the Board under its statutory power of assignment can assign any pupil to any school for any lawful reason."

(The information on the two previous pages essentially describes the condition in the Charlotte-Mecklenberg schools today.)

Meanwhile, on October 29, 1969, the Supreme Court in *Alexander* v. *Holmes County*, 396 U. S. 19 (1969), ordered thirty Mississippi school districts desegregated immediately and said that the Court of Appeals

> "... *should have denied all motions for additional time* because continued operation of *segregated schools* under a standard of allowing all deliberate speed for desegregation is no longer constitutionally permissible. *Under explicit holdings of this Court, the obligation of every school district is to terminate dual school systems at once and to operate now and hereafter only unitary schools. Griffin* v. *School Board*, 377 U.S. 218, 234 (1964); *Green* v. *School Board of New Kent County*, 391 U. S. 430, 439, 442 (1968)." (Emphasis added.)

Because of this action and decision of the Supreme Court, this court did not feel that it had discretion to grant the requested time extension, and it did not do so.

Supplemental Memorandum dated March 21, 1970

The board then filed a further desegregation plan on November 17, 1969. The plan was reviewed in the order of December 1, 1969. It was not approved because it rejected the goal of desegregating all the schools or even all the black schools. It proposed to concentrate on methods such as rezoning and freedom of choice and to discard any consideration of pairing, grouping, clustering and transporting or other methods. It proposed to retain numerous all-black schools.

The performance results, set out in previous orders, show that the all-black schools lag far behind white schools or desegregated schools.

The court, in an order dated December 1, 1969, reviewed the recent decisions of courts and laid out specific guidelines for the preparation of a plan which would desegregate the schools. A consultant, Dr. John A. Finger, Jr., was appointed to draft a plan for the desegregation of the schools for use of the court in preparing a final order. The school board was authorized and encouraged to prepare another plan of its own if it wished.

Dr. Finger worked with the school board staff members over a period of two months. He drafted several different plans. When it became apparent that he could produce and would produce a plan which would meet the requirements outlined in the court's order of December 1, 1969, the school staff members prepared a school board plan which would be subject to the limitations the board had described in its November 17, 1969 report. The result was the production of two plans—the board plan and the plan of the consultant, Dr. Finger.

The detailed work on both final plans was done by the school board staff.

The high school plan prepared by the board was recommended by Dr. Finger to the court with one minor change.

This change involved transporting three hundred inner city black children to Independence High School. As to high school students, then, the plan which was ordered by the court to take effect on May 4, 1970 *is* the school board's plan, with transportation added for three hundred students. The proportion of black children in the high schools varies from 17% to 36% under this plan.

For junior high schools, separate plans were prepared by Dr. Finger and by the board. The board plan would have used zoning to desegregate all the black junior high schools except Piedmont, which it would have left 90% black. The Finger plan employed re-zoning as far as appeared feasible, and then provided for transportation between inner city black zones and outlying white schools to desegregate all the schools, including Piedmont.

The court offered the school board the options of (1) re-zoning, or (2) closing Piedmont, or (3) two-way transport of students between Piedmont and other schools, or (4) accepting the Finger plan which desegregates all junior high schools.

The board met and elected to adopt the Finger plan rather than close Piedmont or rearrange their own plan. The Finger plan may require the transportation of more students than the board plan would have required, but it handles the transportation more economically and efficiently, and does the job of desegregating the junior high schools. The percentage of black students in the junior high schools thus constituted will vary from 9% to 33%.

The transportation of junior high students called for in the plan thus adopted by the board pursuant to the court order of February 5, 1970, is essentially the same sort that was adopted without hesitation for 4,245 black children when the seven black inner city schools were closed in 1969.

Supplemental Memorandum dated March 21, 1970

For elementary schools the problem is more complicated. Dr. Finger prepared several plans to desegregate the elementary schools and reviewed them with the school staff. It was apparent that even the gerrymandering considered by the board could not desegregate all the elementary schools, and that without transportation there is no way by which in the immediate future the continuing effects of state imposed segregation can be removed. Dr. Finger prepared a plan which proposed re-zoning of as many schools as could be desegregated by re-zoning and which then proposed pairing or grouping of schools. By pairing or grouping, a black school and one or more white schools could be desegregated by having grades one through four, black and white, attend the white schools, and by having grades five and six, black and white, attend the black school, and by providing transportation where needed to accomplish this.

The original Finger plan proposed to group black inner city schools with white schools mostly in the south and southeast perimeter of the district.

The school staff drafted a plan which went as far as they could go with re-zoning and stopped there, leaving half the black elementary children in black schools and half the white elementary children in white schools.

In other words, both the plan eventually proposed by the school board and the plan proposed by Dr. Finger went as far as was thought practical to go with re-zoning. The distinction is that the Finger plan goes ahead and does the job of desegregating the black elementary schools, whereas the board plan stops half way through the job.

In its original form the Finger plan for elementary schools would have required somewhat less transportation than its final form, but would have been more difficult to

put into effect rapidly. The pressure of time imposed by decisions of the Supreme Court and other appellate courts had become such that there was concern lest there be an order from one of the appellate courts for immediate February or March desegregation of the entire system. The school staff therefore, based on Finger's guidelines, prepared a final draft of his plan incorporating pairing, grouping and transporting on a basis which would better allow for early implementation with a minimum of administrative complications, in lieu of his original plan.

The result is that the plan for elementary schools which is known as the "Finger plan" was prepared in detail by the school staff and incorporates the thought and work of the staff on the most efficient method to desegregate the elementary schools.

The time table originally adopted by this court in April of 1969 was one calling for substantial progress in 1969 and complete desegregation by September 1970. However, on October 29, 1969, in *Alexander* v. *Holmes County*, the Supreme Court ordered immediate desegregation of several Deep South school systems and said that the Court of Appeals *"should have denied all motions for additional time."* The Supreme Court adhered to that attitude in all decisions prior to this court's order of February 5, 1970. In *Carter* v. *West Feliciana Parish*, —— U. S. —— (January 14, 1970), they reversed actions of the Fifth Circuit Court of Appeals which had extended time for desegregating hundreds of thousands of Deep South children beyond February 1, 1970. In *Nesbit* v. *Statesville, et al.*, 418 F.2d 1040, the Fourth Circuit Court of Appeals on December 2, 1969, ordered the desegregation by January 1, 1970, of schools in Statesville, Reidsville and Durham, North Carolina. Referring to the *Alexander* v. *Holmes County* decision, the Fourth Circuit said:

Supplemental Memorandum dated March 21, 1970

"The clear mandate of the Court is immediacy. *Further delays will not be tolerated in this circuit.*" (Emphasis added.)

In that opinion the Court directed this district court to adopt a plan on December 19, 1969, for the City of Statesville, effective January 1, 1970, which *"must provide for the elimination of the racial characteristics of Morningside School by pairing, zoning or consolidation. . . ."* As to Durham and Halifax, Virginia, courts were ordered to accomplish the necessary purpose by methods including pairing, zoning, reassignment or *"any other method that may be expected to work."*

In *Whittenburg* v. *Greenville County, South Carolina,* —— F.2d —— (January 1970), the Fourth Circuit Court of Appeals, citing *Holmes County* and *Carter* v. *West Feliciana Parish,* said:

"More importantly the Supreme Court said emphatically it meant precisely what it said in *Alexander* that general reorganization of school systems is requisite now, that *the requirement is not restricted to the school districts before the Supreme Court in Alexander, and that Courts of Appeals are not to authorize the postponement of general reorganization until September 1970.*" (Emphasis added.)

As to *Greenville,* in a case involving 58,000 children, the Court said that

"The plan for *Greenville* may be based upon the revised plan submitted by the school board *or upon any other plan that will create a unitary school system.*" (Emphasis added.)

Supplemental Memorandum dated March 21, 1970

The Court further said:

> *"The District Court's order shall not be stayed pending any appeal which may be taken to this court,* but, in the event of an appeal, modification of the order may be sought in this court by a motion accompanied by a request for immediate consideration."

Upon rehearing the Fourth Circuit Court of Appeals said on January 26, 1970:

> *"The proper functioning of our judicial system requires that subordinate courts and public officials faithfully execute the orders and directions of the Supreme Court.* Any other course would be fraught with consequences, both disastrous and of great magnitude. *If there are appropritae exceptions,* if the District Courts and the Courts of Appeals are to have some discretion to permit school systems to finish the current 1969-1970 school year under current methods of operation, *the Supreme Court may declare them, but no member of this court can read the opinions in* CARTER *as leaving any room for the exercise by this court in this case of any discretion* in considering a request for postponement of the reassignment of children and teachers until the opening of the next school year.
>
> "For these reasons the petition for rehearing and for a stay of our order must be denied." (Emphasis added.)

The above orders of the Supreme Court and the Fourth Circuit Court of Appeals are the mandates under which this court had to make a decision concerning the plan to be adopted and the time when the plan should be implemented.

Supplemental Memorandum dated March 21, 1970

This court conducted hearings on February 2 and February 5, 1970, upon the content and the effective date of the plans for desegregation of the Charlotte-Mecklenburg schools. On February 2nd, Mr. Waggoner, the attorney for the school board, requested the court to adopt a time table under which the elementary schools would be desegregated immediately after Easter (about April 1st) and the junior highs and senior highs would be desegregated in May, about the third week before the end of school. Dr. Self, the school superintendent, requested essentially the same time table.

Dr. Self testified that the job could be done as to all students in the times requested if transportation could be arranged; and he and Mr. Waggoner indicated that by staggering hours of school and by effective use of busses the transportation problem might be solved.

The Supreme Court in *Griffin* v. *Prince Edward County*, 377 U. S. 218 (1964), had held that a school board could and should validly be required by a district court to reopen a whole county school system rather than keep it closed to avoid desegregation, even though levying taxes and borrowing money might be necessary.

In view of the decisions above mentioned and the facts before the court, it appeared to this court that the undoubted difficulties and inconveniences and expense caused by transferring children in mid-year to schools they did not choose would have to be outweighed by the mandates of the Supreme Court and the Fourth Circuit Court of Appeals and that this court had and has a duty to require action now.

On February 5, 1970, therefore, a few days after the second *Greenville* opinion, this court entered its order for desegregation of the schools.

Supplemental Memorandum dated March 21, 1970

The time table set in the February 5, 1970 order is precisely the time table suggested by Mr. Waggoner, the attorney for the defendants, in the record of the February 2, 1970 hearing.

Paragraph 16 of the February 5, 1970 order reads:

> "The duty imposed by the law and by this order is the desegregation of schools and the maintenance of that condition. The *plans* discussed in this order, whether prepared by Board and staff or by outside consultants, such as computer expert, Mr. John W. Weil, or Dr. John A. Finger, Jr., are *illustrations of means or partial means to that end.* The defendants are encouraged to use their full 'know-how' and resources to attain the *results* above described, and thus to achieve the constitutional end by any means at their disposal. The test is not the method or plan, but the *results.*"

The above summary is an outline only of the most significant steps which have brought this case to its present position. Details of all the developments mentioned in this summary appear in previous orders and in the lengthy evidence.

Pursuant to the direction of the Circuit Court, this court has made and is filing contemporaneously herewith supplemental detailed findings of fact bearing on the transportation question.

This the 21st day of March, 1970.

/s/ James B. McMillan
James B. McMillan
United States District Judge

Order dated March 25, 1970

In the original order of April 23, 1969, and in the order of August 15, 1969, the projected time for completion of desegregation of the schools was set for September 1970. The court did not then consider and never has at any time considered that wholesale mid-year or mid-term transfers of pupils or teachers were desirable. Furthermore, it was contemplated by all parties that this time table would allow time for orderly development of plans as well as for appeal by all who might wish to appeal.

On October 29, 1960, in *Alexander* v. *Holmes County,* the Supreme Court ordered the immediate desegregation of schools involving many thousands of Mississippi school children. In *Carter* v. *West Feliciana Parish,* —— U. S. —— (January 14, 1970), the Supreme Court reversed the Fifth Circuit Court of Appeals and set a February 1, 1970 deadline to desegregate schools in Gulf Coast states involving many thousands of children. In *Nesbit* v. *Statesville,* 418 F.2d 1040, on December 2, 1969, the Fourth Circuit read *Alexander* as follows:

> "The clear mandate of the Court is immediacy. Further delays will not be tolerated in this circuit."

In *Whittenburg* v. *Greenville County, South Carolina,* —— F.2d ——(January 1970), the Fourth Circuit Court of Appeals read *Alexander* to say that

> ". . . general reorganization of school systems is requisite now, that the requirement is not restricted to the school districts before the Supreme Court in *Alexander,* and that Courts of Appeals are not to authorize the postponement of general reorganization until September 1970.

• • •

Order dated March 25, 1970

> *"The District Court's order shall not be stayed pending any appeal which may be taken to this court, . . .* (Emphasis added.)

On January 26, 1970, on re-hearing, the Fourth Circuit Court of Appeals said:

> "The proper functioning of our judicial system requires that subordinate courts and public officials faithfully execute the orders and directions of the Supreme Court. . . . no member of this court can read the opinions in *Carter* as leaving any room for the exercise by this court in this case of any discretion in considering a request for postponement of the reassignment of children and teachers until the opening of the next school year."

The petition of Greenville for a stay of the order was again denied, and the Greenville schools were desegregated as of February 16, 1970.

The last *Greenville* decision was ten days old at the time of this court's order of February 5, 1970. These were the mandates under which it was ordered that the Charlotte-Mecklenburg schools should be desegregated before the end of the spring term, and that the mandate should not be stayed pending appeal.

Since that time, several suits have been filed in state court seeking to prevent implementation of the February 5, 1970 order, and decision by the three-judge court now considering the constitutionality of the "anti-bussing" law, North Carolina General Statutes, §115-176.1, does not appear likely before April 1, 1970. The appeal of the defendants in the *Swann* case to the Fourth Circuit Court of Appeals is not scheduled to be heard until April 9,

1970, and there is no way to predict when a decision on that appeal will be rendered. There is also no way to predict when a final decision by the Supreme Court will be made on any of these issues, nor what the final decision may be.

Furthermore, notwithstanding the *Holmes County, Greenville, Carter* and *Statesville* decisions, the Fourth Circuit Court of Appeals has now rendered a stay as to certain portions of the February 5, 1970 order, and a petition to vacate that stay has been denied by the Supreme Court. The Fourth Circuit Court of Appeals and the Supreme Court have now demonstrated an interest in the cost and inconvenience and disruption that the order might produce—factors which, though bussing was not specifically mentioned, appear not to have been of particular interest to either the Fourth Circuit Court or the Supreme Court when *Holmes County, Carter, Greenville* and *Statesville* were decided.

The only reason this court entered an order requiring mid-semester transfer of children was its belief that the language of the Supreme Court and the Fourth Circuit above quoted in this order, given its reasonable interpretation, required district courts to direct desegregation before the end of this school year.

The urgency of "desegregation now" has now been in part dispelled by the same courts which ordered it, and the court still holds its original view that major desegregation moves should not take place during school terms nor piecemeal if they can be avoided.

Thereforefore, IT IS ORDERED, that the time table for implementation of this court's order of February 5, 1970 be, and it is hereby modified so that the implementation of the various parts of the desegregation order will not be

required until September 1, 1970, subject, however, to any different decisions that may be rendered by appellate courts and with the proviso that the school board may if they wish proceed upon any earlier dates they may elect with any part or parts of the plan.

This is the 25th day of March, 1970.

United States District Judge

Further Findings of Fact on Matters Raised by the March 26, 1970, Motions of Defendants dated April 3, 1970

On March 26, 1970, the defendant school board filed "OBJECTIONS AND EXCEPTIONS TO SUPPLEMENTARY FINDINGS OF FACT OF MARCH 21, 1970, AND MOTION FOR MODIFICATION AND CLARIFICATION THEREOF." The court has reviewed the questions raised in that document and makes further findings of fact with reference to certain of its numbered paragraphs as follows:

¶¶ 1, 4, 16, 40. The annual school bus cost per pupil transported, including everything except the original cost of the bus, parking arrangements and certain local administrative costs, for the 1968-69 year, was $19.92. The state reimburses the Charlotte-Mecklenburg school system approximately this $19.92 per pupil. The April 23, 1969, and February 5, 1970, findings of fact estimated the original cost and periodic replacement of the busses themselves at $18 to $20 per pupil per year, which, added to the $19.92, resulted in the estimate of $40 as the total annual per pupil transportation cost. That estimate assumed that the local schools would have to pay for periodic *replacement* of busses as well as for their original purchase. Since it is now clear from the deposition of D. J. Dark that the replacement of worn out or obsolescent busses is *included* in the $19.92 figure, the overall estimate of $40 per pupil per year is far too high. Instead of a *continuing* annual local per pupil cost of $18 or $20 to supply and replace busses, as the court originally understood, the local board will have to bear only administrative and parking expenses, plus the original, one-time purchase of the busses. This cuts the annual cost of bus transportation from nearly $40 per pupil per year as originally estimated, to a figure closer

to $20 per pupil per year, and reduces the capital outlay required of the local board to the one-time purchase of about 138 busses at a cost of about $745,200.00, plus whatever may prove to be actually required in the way of additional parking facilities. Paragraphs 1, 4, 16 and 40 of the supplemental findings of fact are amended accordingly.

¶¶ 2, 4, 11, 34. Although the evidence concerning the 5,000 children currently transported by City Coach Lines lacks clarity, the court agrees with the defendant that it should not be inferred that they are the source of payment for this transportation, and the court specifically corrects the previous finding so as to delete any reference to the source of payment for this transportation.

¶ 21. The school board's July 29, 1969 plan (see pages 457-459 of the record on appeal) proposed the transfer and transportation of over 4,200 black children. The court on November 7, 1969, on the basis of the then evidence, found that the number actually transferred was 1,315. The affidavit of J. D. Morgan dated February 13, 1970 (paragraph 4, page 770 of the record on appeal), indicated that the number of these students being transported was 738, requiring 13 busses. The findings of fact proposed by the defendants gave the number as "over 700." The J. D. Morgan affidavit of March 21, 1970, indicated that the number of busses was 30 instead of 13. From this conflicting evidence the court concluded that "several hundred" was as accurate as could be found under the circumstances.

¶ 33. Paragraph 33 is amended as requested by adding after the word "schools" in the eleventh line of the paragraph:

Further Findings of Fact on Matters Raised by the March 26, 1970, Motions of Defendants dated April 3, 1970

"—and about 5,000 black children, grades one through four, to outlying white schools."

¶ 34(f). The average *straight line* mileage between the elementary schools paired or grouped under the "cross-bussing" plan is approximately 5½ miles. The average bus *trip* mileage of about seven miles which was found in paragraph 34(f) was arrived at by the method which J. D. Morgan, the county school bus superintendent, testified he uses for such estimates—taking straight line mileage and adding 25%.

As to the other items in the document, the court has analyzed them carefully and finds that they do not justify any further changes in the facts previously found.

This the 3rd day of April, 1970.

United States District Judge

Opinions of Court of Appeals dated May 26, 1970

UNITED STATES COURT OF APPEALS

FOR THE FOURTH CIRCUIT

No. 14,517

No. 14,518

JAMES E. SWANN, *et al.*,

Appellees and Cross-Appellants,

—versus—

CHARLOTTE-MECKLENBURG BOARD OF EDUCATION, *et al.*,

Appellants and Cross-Appellees.

Appeals from the United States District Court for the Western District of North Carolina, at Charlotte. James B. McMillan, District Judge.

(Argued April 9, 1970. Decided May 26, 1970.)

Before HAYNSWORTH, Chief Judge, SOBELOFF, BOREMAN, BRYAN, WINTER, and BUTZNER, Circuit Judges, sitting en banc.*

BUTZNER, Circuit Judge:

The Charlotte-Mecklenburg School District appealed from an order of the district court requiring the faculty and student body of every school in the system to be racially mixed. We approve the provisions of the order deal-

* Judge Craven disqualified himself for reasons stated in his separate opinion.

ing with the faculties of all schools[1] and the assignment of pupils to high schools and junior high schools, but we vacate the order and remand the case for further consideration of the assignment of pupils attending elementary schools. We recognize, of course, that a change in the elementary schools may require some modification of the junior and senior high school plans, and our remand is not intended to preclude this.

I.

The Charlotte-Mecklenburg school system serves a population of over 600,000 people in a combined city and county area of 550 square miles. With 84,500 pupils attending 106 schools, it ranks as the nation's 43rd largest school district. In *Swann* v. *Charlotte-Mecklenburg Bd. of Ed.*, 369 F.2d 29 (4th Cir. 1966), we approved a desegregation plan based on geographic zoning with a free transfer provision. However, this plan did not eliminate the dual system of schools. The district court found that during the 1969-70 school year, some 16,000 black pupils, out of a total of 24,700, were attending 25 predominantly black schools, that faculties had not been integrated, and that other administrative practices, including a free transfer plan, tended to perpetuate segregation.

Notwithstanding our 1965 approval of the school board's plan, the district court properly held that the board was impermissibly operating a dual system of schools in the

[1] The board's plan provides: "The faculties of all schools will be assigned so that the ratio of black teachers to white teachers in each school will be approximately the same as the ratio of black teachers to white teachers in the entire school system." We have directed other school boards to desegregate their faculties in this manner. See Nesbit v. Statesville City Bd. of Ed., 418 F.2d 1040, 1042 (4th Cir. 1969); cf., United States v. Montgomery County Bd. of Ed., 395 U.S. 225, 232 (1969).

light of subsequent decisions of the Supreme Court, *Green* v. *School Bd. of New Kent County*, 391 U.S. 430, 435 (1968), *Monroe* v. *Bd. of Comm'rs*, 391 U.S. 450 (1968), and *Alexander* v. *Holmes County Bd. of Ed.*, 396 U.S. 19 (1969).

The district judge also found that residential patterns leading to segregation in the schools resulted in part from federal, state, and local governmental action. These findings are supported by the evidence and we accept them under familiar principles of appellate review. The district judge pointed out that black residences are concentrated in the northwest quadrant of Charlotte as a result of both public and private action. North Carolina courts, in common with many courts elsewhere, enforced racial restrictive covenants on real property[2] until *Shelley* v. *Kraemer*, 334 U.S. 1 (1948) prohibited this discriminatory practice. Presently the city zoning ordinances differentiate between black and white residential areas. Zones for black areas permit dense occupancy, while most white areas are zoned for restricted land usage. The district judge also found that urban renewal projects, supported by heavy federal financing and the active participation of local government, contributed to the city's racially segregated housing patterns. The school board, for its part, located schools in black residential areas and fixed the size of the schools to accommodate the needs of immediate neighborhoods. Predominantly black schools were the inevitable result. The interplay of these policies on both residential and educational segregation previously has been recognized by this and other courts.[3] The fact that similar forces operate in cities

[2] E.g., Phillips v. Wearn, 226 N.C. 290, 37 S.E.2d 895 (1946).

[3] E.g., Henry v. Clarksdale Munic. Separate School Dist., 409 F.2d 682, 689 (5th Cir.), *cert. denied*, 396 U.S. 940 (1969); United States v. School Dist. 151 of Cook County, 404 F.2d 1125, 1130

throughout the nation under the mask of *de facto* segregation provides no justification for allowing us to ignore the part that government plays in creating segregated neighborhood schools.

The disparity in the number of black and white pupils the Charlotte-Mecklenburg School Board busses to predominantly black and white schools illustrates how coupling residential patterns with the location of schools creates segregated schools. All pupils are eligible to ride school buses if they live farther than 1½ miles from the schools to which they are assigned. Overall statistics show that about one-half of the pupils entitled to transportation ride school buses. Only 541 pupils were bussed in October 1969 to predominantly black schools, which had a total enrollment of over 17,000. In contrast, 8 schools located outside the black residential area have in the aggregate only 96 students living within 1½ miles. These schools have a total enrollment of about 12,184 pupils, of whom 5,349 ride school buses.

II.

The school board on its own initiative, or at the direction of the district court, undertook or proposed a number of reforms in an effort to create a unitary school system. It closed 7 schools and reassigned the pupils primarily to increase racial mixing. It drastically gerrymandered school

zones to promote desegregation. It created a single athleti league without distinction between white and black school or athletes, and at its urging, black and white PTA council were merged into a single organization. It eliminated school bus system that operated on a racial basis, an established nondiscriminatory practices in other facets o the school system. It modified its free transfer plan t prevent resegregation, and it provided for integration o the faculty and administrative staff.

The district court, after a painstaking analysis of th board's proposals and the relevant authorities, disapprove the board's final plan, primarily because it left ten school nearly all black. In reaching this decision, the district cour held that the board must integrate the student body of ever school to convert from a dual system of schools, which ha been established by state action, to a unitary system.

The necessity of dealing with segregation that exist because governmental policies foster segregated neighbor hood schools is not confined to the Charlotte-Mecklenbur School District. Similar segregation occurs in many othe cities throughout the nation, and constitutional principle dealing with it should be applied nationally. The solutio is not free from difficulty. It is now well settled tha school boards operating dual systems have an affirmativ duty "to convert to a unitary school system in which racia discrimination would be eliminated root and branch." Gree v. School Bd. of New Kent County, 391 U. S. 430, 43 (1968). Recently the Supreme Court defined a unitar school system as one "within which no person is to b effectively excluded from any school because of race o color." Alexander v. Holmes County Bd. of Ed., 396 U. S 19, 20 (1969). This definition, as the Chief Justice noted i Northcross v. Board of Ed. of Memphis, 90 S.Ct. 891, 89

(1970), leaves open practical problems, "including whether, as a constitutional matter, any particular racial balance must be achieved in the schools; to what extent school districts and zones may or must be altered as a constitutional matter; to what extent transportation may or must be provided to achieve the ends sought by prior holdings of the Court."

Several of these issues arise in this case. To resolve them, we hold: first, that not every school in a unitary school system need be integrated; second, nevertheless, school boards must use all reasonable means to integrate the schools in their jurisdiction; and third, if black residential areas are so large that not all schools can be integrated by using reasonable means, school boards must take further steps to assure that pupils are not excluded from integrated schools on the basis of race. Special classes, functions, and programs on an integrated basis should be made available to pupils in the black schools. The board should freely allow majority to minority transfers and provide transportation by bus or common carrier so individual students can leave the black schools. And pupils who are assigned to black schools for a portion of their school careers should be assigned to integrated schools as they progress from one school to another.

We adopted the test of reasonableness—instead of one that calls for absolutes—because it has proved to be a reliable guide in other areas of the law. Furthermore, the standard of reason provides a test for unitary school systems that can be used in both rural and metropolitan districts. All schools in towns, small cities, and rural areas generally can be integrated by pairing, zoning, clustering, or consolidating schools and transporting pupils. Some cities, in contrast, have black ghettos so large that integra-

tion of every school is an improbable, if not an unattainable, goal. Nevertheless, if a school board makes every reasonable effort to integrate the pupils under its control, an intractable remnant of segregation, we believe, should not void an otherwise exemplary plan for the creation of a unitary school system. Ellis v. Board of Public Instruc. of Orange County, No. 29124, Feb. 17, 1970 —— F.2d —— (5th Cir.)

III.

The school board's plan proposes that pupils will be assigned to the system's ten high schools according to geographic zones. A typical zone is generally fan shaped and extends from the center of the city to the suburban and rural areas of the county. In this manner the board was able to integrate nine of the high schools with a percentage of black students ranging from 17% to 36%. The projected black attendance at the tenth school, Independence, which has a maximum of 1400 pupils, is 2%.

The court approved the board's high school plan with one modification. It required that an additional 300 pupils should be transported from the black residential area of the city to Independence School.

The school board proposed to rezone the 21 junior high school areas so that black attendance would range from 0% to 90% with only one school in excess of 38%. This school, Piedmont, in the heart of the black residential area, has an enrollment of 840 pupils, 90% of whom are black. The district court disapproved the board's plan because it maintained Piedmont as a predominantly black school. The court gave the board four options to desegregate all the junior high schools: (1) rezoning; (2) two-way transportation of pupils between Piedmont and white schools; (3) closing Piedmont and reassigning its pupils and (4)

adopting a plan proposed by Dr. John A. Finger, Jr., a consultant appointed by the court, which combined zoning with satellite districts. The board, expressing a preference for its own plan, reluctantly adopted the plan proposed by the court's consultant.

Approximately 31,000 white and 13,000 black pupils are enrolled in 76 elementary schools. The board's plan for desegregating these schools is based entirely upon geographic zoning. Its proposal left more than half the black elementary pupils in nine schools that remained 86% to 100% black, and assigned about half of the white elementary pupils to schools that are 86% to 100% white. In place of the board's plan, the court approved a plan based on zoning, pairing, and grouping, devised by Dr. Finger, that resulted in student bodies that ranged from 9% to 38% black.

The court estimated that the overall plan which it approved would require this additional transportation:

	No. of pupils	No. of buses	Operating costs
Senior High	1,500	20	$ 30,000
Junior High	2,500	28	$ 50,000
Elementary	9,300	90	$186,000
TOTAL	13,300	138	$266,000

In addition, the court found that a new bus cost about $5,400, making a total outlay for equipment of $745,200. The total expenditure for the first year would be about $1,011,200.

The school board computed the additional transportation requirements under the court approved plan to be:

	No. of pupils	No. of buses	Operating costs
Senior High	2,497	69	$ 96,000
Junior High	4,359	84	$116,800
Elementary	12,429	269	$374,000
TOTAL	19,285	422	$586,000

In addition to the annual operating cost, the school board projected the following expenditures:

Cost of buses	$2,369,100
Cost of parking areas	284,800
Cost of additional personnel	166,200

Based on these figures, the school board computed the total expenditures for the first year would be $3,406,700 under the court approved plan.[4]

---

[4] The school board computed transportation requirements under the plan it submitted to be:

	No. of pupils	No. of buses	Operating cost
Senior High	1,202	30	$ 41,700
Junior High	1,388	33	$ 45,900
Elementary	2,345	41	$ 57,000
TOTAL	4,935	104	$144,600

The board estimated that the breakdown of costs for the first year of operation under its plan would be:

Cost of buses		$589,900
Cost of parking areas		56,200
Operating expenses of	$144,600	
Plus depreciation allowance of	31,000	
		175,600
Cost of additional personnel		43,000

The estimated total first-year costs are $864,700.

Both the findings of the district court and the evidence submitted by the board are based on estimates that rest on many variables. Past practice has shown that a large percentage of students eligible for bus transportation prefer to provide their own transportation. However, it is difficult to accurately predict how many eligible students will accept transportation on the new routes and schedules. The number of students that a bus can carry each day depends in part on the number of trips the bus can make. Scheduling two trips for a bus generally reduces costs. But student drivers may not be able to spend the time required for two trips, so that adult drivers will have to be hired at substantially higher salaries. It is difficult to accurately forecast how traffic delays will affect the time needed for each trip, for large numbers of school buses themselves generate traffic problems that only experience can measure.

The board based its projections on each 54-passenger bus carrying about 40 high school pupils or 54 junior high and elementary pupils for one roundtrip a day. Using this formula, it arrived at a need of 422 additional buses for transporting 19,285 additional pupils. This appears to be a less efficient operation than the present system which transports 23,600 pupils with 280 buses, but the board's witnesses suggest that prospects of heavier traffic justify the difference. The board also envisioned parking that seems to be more elaborate than that currently used at some schools.

In making its findings, the district court applied factors derived from present bus operation, such as the annual operating cost per student, the average number of trips each bus makes, the capacity of the buses—including permissible overloads, and the percentage of eligible pupils who use other forms of transportation. The district court also found no need for expensive parking facilities or for

additional personnel whose costs could not be absorbed by the amount allocated for operating expenses. While we recognize that no estimate—whether submitted by the board or made by the court—can be absolutely correct, we accept as not clearly erroneous the findings of the district court.

Opposition to the assignment of pupils under both the board's plan and the plan the court approved centered on bussing, which numbers among its critics both black and white parents. This criticism, however, cannot justify the maintenance of a dual system of schools. Cooper v. Aaron, 358 U.S. 1 (1958). Bussing is neither new nor unusual. It has been used for years to transport pupils to consolidated schools in both racially dual and unitary school systems. Figures compiled by the National Education Association show that nationally the number of pupils bussed increased from 12 million in the 1958-59 school year to 17 million a decade later. In North Carolina 54.9% of all pupils are bussed. There the average daily roundtrip is 24 miles, and the annual cost is over $14,000,000. The Charlotte-Mecklenburg School District presently busses about 23,600 pupils and another 5,000 ride common carriers.

Bussing is a permissible tool for achieving integration, but it is not a panacea. In determining who should be bussed and where they should be bussed, a school board should take into consideration the age of the pupils, the distance and time required for transportation, the effect on traffic, and the cost in relation to the board's resources. The board should view bussing for integration in the light that it views bussing for other legitimate improvements, such as school consolidation and the location of new schools. In short, the board should draw on its experience with bussing in general—the benefits and the defects—so that it may intelligently plan the part that bussing will play in a unitary school system.

Viewing the plan the district court approved for junior and senior high schools against these principles and the background of national, state, and local transportation policies, we conclude that it provides a reasonable way of elminating all segregation in these schools. The estimated increase in the number of junior and senior high school students who must be bussed is about 17% of all pupils now being bussed. The additional pupils are in the upper grades and for the most part they will be going to schools already served by busses from other sections of the district. Moreover, the routes they must travel do not vary appreciably in length from the average route of the system's buses. The transportation of 300 high school students from the black residential area to suburban Independence School will tend to stabilize the system by eliminating an almost totally white school in a zone to which other whites might move with consequent "tipping" or resegregation of other schools.[5]

We find no merit in other criticism of the plan for junior and senior high schools. The use of satellite school zones[6]

[5] These 300 students will be bussed a straight-line distance of some 10 miles. The actual bus routes will be somewhat longer, depending upon the route chosen. A reasonable estimate of the bus route distance is 12 to 13 miles. The principal's monthly bus reports for Independence High School for the month from January 10, 1970 to February 10, 1970 shows the average one-way length of a bus route at Independence is presently 16.7 miles for the first trip. Buses that make two trips usually have a shorter second trip. The average one-way bus route, including both first and second trips, is 11.7 miles. Thus the distance the 300 pupils will have to be bussed is nearly the same as the average one-way bus route of the students presently attending Independence, and it is substantially shorter than the system's average one-way bus trip of 17 miles.

[6] Satellite school zones are non-contiguous geographical zones. Typically, areas in the black core of the city are coupled—but not geographically linked—with an area in white suburbia.

as a means of achieving desegregation is not improper. District Courts have been directed to shape remedies that are characterized by the "practical flexibility" that is a hallmark of equity. See Brown v. Board of Ed., 349 U.S. 294, 300 (1955). Similarly, the pairing and clustering of schools has been approved. Green v. County School Bd. of New Kent County, 391 U.S. 430, 442 n. 6 (1968); Hall v. St. Helena Parish School Bd., 417 F.2d 801, 809 (5th Cir.), *cert. denied,* 396 U.S. 904 (1969).

The school board also asserts that §§ 401(b) and 407(a)(2) of the Civil Rights Act of 1964 [42 U.S.C. §§ 2000c(b) and -6(a)(2)] forbid the bussing ordered by the district court.[7] But this argument misreads the legislative history of the statute. Those provisions are not limitations on the power of school boards or courts to remedy unconstitutional segregation. They were designed to remove any implication that the Civil Rights Act conferred new jurisdiction on courts to deal with the question of whether school boards were obligated to overcome *de facto* segregation. See generally, United States v. School District 151, 404

---

[7] Title 42 U.S.C. § 2000c(b) provides that as used in the subchapter on Public Education of the Civil Rights Act of 1964:

> " 'Desegregation' means the assignment of students to public schools and within such schools without regard to their race, color, religion, or national origin, but 'desegregation' shall not mean the assignment of students to public schools in order to overcome racial imbalance."

Title 42 § 2000c-6(a)(2) states in part:

> "[P]rovided that nothing herein shall empower any official or court of the United States to issue any order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another or one school district to another in order to achieve such racial balance, or otherwise enlarge the existing power of the court to insure compliance with constitutional standards."

F.2d 1125, 1130 (7th Cir. 1968); United States v. Jefferson County Board of Ed., 372 F.2d 836, 880 (5th Cir. 1966), *aff'd on rehearing en banc* 380 F.2d 385 (5th Cir.), *cert. denied, sub nom.* Caddo Parish School Bd. v. United States, 389 U.S. 840 (1967); Keyes v. School Dist. No. One, Denver, 303 F.Supp. 289, 298 (D. Colo.), *stay pending appeal granted,* —— F.2d —— (10th Cir.); *stay vacated,* 396 U.S. 1215 (1969). Nor does North Carolina's anti-bussing law present an obstacle to the plan, for those provisions of the statute in conflict with the plan have been declared unconstitutional. Swann v. Charlotte-Mecklenburg Bd. of Ed., —— F. Supp. —— (W.D.N.C. 1970).[8]

The district court properly disapproved the school board's elementary school proposal because it left about one-half of both the black and white elementary pupils in schools that were nearly completely segregated. Part of the difficulty concerning the elementary schools results from the board's refusal to accept the district court's suggestion that it control experts from the Department of Health, Education, and Welfare. The consultants that the board employed were undoubtedly competent, but the board limited their choice of remedies by maintaining each school's grade structure. This, in effect, restricted the means of overcoming segregation to only geographical zoning, and as a further restriction the board insisted on contiguous zones. The board rejected such legitimate techniques as

[8] The unconstitutional provisions are:

"No student shall be assigned or compelled to attend any school on account of race, creed, color or national origin, or for the purpose of creating a balance or ratio of race, religion or national origins. Involuntary bussing of students in contravention of this article is prohibited, and public funds shall not be used for any such bussing." N.C. Gen. Stat. § 115-176.1 (Supp. 1969).

pairing, grouping, clustering, and satellite zoning. Moreover, the board sought to impose a ratio in each school of not less than 60% white students. While a 60%-40% ratio of white to black pupils might be desirable under some circumstances, rigid adherence to this formula in every school should not be allowed to defeat integration.

On the other hand, the Finger plan, which the district court approved, will require transporting 9,300 pupils in 90 additional buses. The greatest portion of the proposed transportation involves cross-bussing to paired schools—that is, black pupils in grades one through four would be carried to predominantly white schools, and white pupils in the fifth and sixth grades would be transported to the black schools. The average daily roundtrip approximates 15 miles through central city and suburban traffic.

The additional elementary pupils who must be bussed represent an increase of 39% over all pupils presently being bussed, and their transportation will require an increase of about 32% in the present fleet of buses. When the additional bussing for elementary pupils is coupled with the additional requirements for junior and senior high schools, which we have approved, the total percentages of increase are: pupils, 56%, and buses, 49%. The board, we believe, should not be required to undertake such extensive additional bussing to discharge its obligation to create a unitary school system.

IV.

Both parties oppose a remand. Each side is adamant that its position is correct—the school board seeks total approval of its plan and the plaintiffs insist on implementation of the Finger plan. We are favorably impressed, however, by the suggestion of the United States, which at

our invitation filed a brief as amicus curiae, that the school board should consider alternative plans, particularly for the elementary schools. We, therefore, will vacate the judgment of the district court and remand the case for reconsideration of the assignment of pupils in the elementary schools, and for adjustments, if any, that this may require in plans for the junior and senior high schools.

On remand, we suggest that the district court should direct the school board to consult experts from the Office of Education of the Department of Health, Education, and Welfare, and to explore every method of desegregation, including rezoning with or without satellites, pairing, grouping, and school consolidation. Undoubtedly some transportation will be necessary to supplement these techniques. Indeed, the school board's plan proposed transporting 2,300 elementary pupils, and our remand should not be interpreted to prohibit all bussing. Furthermore, in devising a new plan, the board should not perpetuate segregation by rigid adherence to the 60% white-40% black racial ratio it favors.

If, despite all reasonable efforts to integrate every school, some remain segregated because of residential patterns, the school board must take further steps along the lines we previously mentioned, including a majority to minority transfer plan,[9] to assure that no pupil is excluded from an integrated school on the basis of race.

---

[9] The board's plan provides:

"Any black student will be permitted to transfer only if the school to which he is originally assigned has more than 30 per cent of his race and if the school he is requesting to attend has less than 30 per cent of his race and has available space. Any white student will be permitted to transfer only if the school to which he is originally assigned has more than 70 per cent of his race and if the school he is requesting to

Alexander v. Holmes County Bd. of Ed., 396 U.S. 19 (1969), and Carter v. West Feliciana School Bd., 396 U.S. 290 (1970), emphasize that school boards must forthwith convert from dual to unitary systems. In Nesbit v. Statesville City Bd. of Ed., 418 F.2d 1040 (4th Cir. 1969), and Whittenberg v. School Dist. of Greenville County, — F.2d —— (4th Cir. 1970), we reiterated that immediate reform is imperative. We adhere to these principles, and district courts in this circuit should not consider the stays which were allowed because of the exceptional nature of this case to be precedent for departing from the directions stated in *Alexander, Carter, Nesbit,* and *Whittenberg.*

Prompt action is also essential for the solution of the remaining difficulties in this case. The school board should immediately consult with experts from HEW and file its new plan by June 30, 1970. The plaintiffs should file their exceptions, if any, within 7 days, and the district court should promptly conduct all necessary hearings so that the plan may take effect with the opening of school next fall. Since time is pressing, the district court's order approving a new plan shall remain in full force and effect unless it is modified by an order of this court. After a plan has been approved, the district court may hear additional objections or proposed amendments, but the parties shall comply with the approved plan in all respects while the

---

attend has less than 70 per cent of his race and has available space."

This clause, which was designed to prevent tipping or resegregation, would be suitable if all schools in the system were integrated. But since the board envisions some elementary schools will remain nearly all black, it unduly restricts the schools to which pupils in these schools can transfer. It should be amended to allow these elementary pupils to transfer to any school in which their race is a minority if space is available.

district court considers the suggested modifications. Cf. Nesbit v. Statesville City Bd. of Ed., 418 F.2d 1040, 1043 (4th Cir. 1969).

Finally, we approve the district court's inclusion of Dr. Finger's consultant fee in the costs taxed against the board. See In the Matter of Peterson, 253 U.S. 300, 312 (1920). We caution, however, that when a court needs an expert, it should avoid appointing a person who has appeared as a witness for one of the parties. But the evidence discloses that Dr. Finger was well qualified, and his dual role did not cause him to be faithless to the trust the court imposed on him. Therefore, the error, if any, in his selection, was harmless.

We find no merit in the other objections raised by the appellants or in the appellees' motion to dismiss the appeal. The judgment of the district court is vacated, and the case is remanded for further proceedings consistent with this opinion.

SOBELOFF, Circuit Judge, with whom WINTER, Circuit Judge, joins, concurring in part and dissenting in part:

Insofar as the court today affirms the District Court's order in respect to the senior and junior high schools, I concur. I dissent from the failure to affirm the portion of the order pertaining to the elementary schools.

I

THE BASIC LAW AND THE PARTICULAR FACTS

All uncertainty about the constitutional mandate of *Brown* v. *Board of Education*, 347 U.S. 483 (1954) and 349 U.S. 294 (1955), was put to rest when in *Green* v. *County School Board of New Kent County* the Supreme Court spelled out a school board's "affirmative duty to take

whatever steps might be necessary to convert to a unitary system in which racial discrimination would be eliminated root and branch," 391 U.S. 430, 437-438 (1968). "Disestablish[ment of] state-imposed segregation" (at 439) entailed "steps which promise realistically to convert promptly to a system without a 'white' school and a 'negro' school, but just schools" (at 442). If there could still be doubts they were answered this past year. In *Alexander* v. *Holmes County Board of Education*, the Court held that "[u]nder explicit holdings of this Court the obligation of every school district is to terminate dual school systems at once and to operate now and hereafter only unitary schools," 396 U.S. 19, 20 (1969). The command was once more reaffirmed in *Carter* v. *West Feliciana School Board*, 396 U.S. 290 (1970), requiring "relief that will at once extirpate any lingering vestiges of a constitutionally prohibited dual school system." (Harlan, J., concurring at 292).

We face in this case a school district divided along racial lines. This is not a fortuity. It is the result, as the majority has recognized, of government fostered residential patterns, school planning, placement, and, as the District Court found, gerrymandering. These factors have interacted on each other so that by this date the black and white populations, in school and at home, are virtually entirely separate.

As of November 7, 1969, out of 106 schools in the system 57 were racially identifiable as white, 25 were racially identifiable as black.[1] Of these, nine were all white schools and eleven all black. Of 24,714 black students in the system 16,000 were in entirely or predominantly black schools.

---

[1] In the entire system, 71% of the pupils are white, 29% of the pupils are black. The District Judge deemed a school having 86% or greater white population identifiable as white, one with 56% or greater black population identifiable as black.

There are 76 elementary schools with over 44,000 pupils. In November 1969, 43 were identifiable as white, 16 as black, with 13 of the latter 98% or more black, and none less than 65%. For the future the Board proposes little improvement. There would still be 25 identifiably white elementary schools and approximately half of the white elementary students would attend schools 86 to 100% white. Nine schools would remain 83 to 100% black, serving 6,432 students or over half the black elementary pupils.

To call either the past or the proposed distribution a "unitary system" would be to embrace an illusion.[2] And the majority does not contend that the system is unitary, for it holds that "the district court properly disapproved the school board's elementary school proposal because it left about one-half of both the black and white elementary pupils in schools that were nearly completely segregated." The Board's duty then is plain and unarguable: to convert to a unitary system. The duty is absolute. It is not to be tempered or watered down. It must be done, and done now.

---

[2] In its application to us for a stay pending appeal, counsel for the School Board relied heavily on Northcross v. Board of Education of Memphis, — —F.2d —— (6th Cir. 1970), as a judicial ruling that school assignments based on residence are constitutionally immune. The defendant tendered us a statistical comparison of pupil enrollment by school with pupil population by attendance area for the Memphis school system.

Since then the Supreme Court in *Northcross* has ruled that the Court of Appeals erred insofar as it held that the Memphis board "is not now operating a 'dual school system' • • • ." 38 L.W. 4219.

II

The Court-Ordered Plan

A. *The Necessity of the Court-Ordered Plan*

The plan ordered by the District Court works. It does the job of desegregating the schools completely. This "places a heavy burden upon the board to explain its preference for an apparently less effective method." *Green, supra* at 439.

The most significant fact about the District Court's plan is that it—or one like it—is the only one that can work. Obviously, when the black students are all on one side of town, the whites on the other, only transportation will bring them together. The District Judge is quite explicit:

> Both Dr. Finger and the school board staff appear to have agreed, and the court finds as a fact that for the present at least, there is no way to desegregate the all-black schools in Northwest Charlotte without providing (and continuing to provide) bus or other transportation for thousands of children. All plans and all variations of plans considered for this purpose lead in one fashion or another to that conclusion.

The point has been perceived by the counsel for the Board, who have candily informed us that if the job must be done then the Finger plan is the way to do it.

The only suggestion that there is a possible alternative middle course came from the United States, participating as amicus curiae. Its brief was prefaced by the following revealing confession:

> We understand that the record in the case is voluminous, and we would note at the outset that we have been unable to analyze the record as a whole. Although we have carefully examined the district court's various opinions and orders, the school board's plan, and those pleadings readily available to us, we feel that we are not conversant with all of the factual considerations which may prove determinative of this appeal. Accordingly, we here attempt, not to deal extensively with factual matters, but rather to set forth some legal considerations which may be helpful to the Court.

Nowithstanding this disclaimer, the Government went on to imply in oral argument—and has apparently impressed on this court—that HEW could do better. No concrete solution is suggested but the Government does advert to the possibility of pairing and grouping of schools. Two points stand out. First, pairing and grouping are precisely what the Finger plan, adopted by the District Court, does. Second, in the circumstances of this case, these methods necessarily entail bussing.

I am not "favorably impressed" by the Government's performance. Its vague and noncommital representations do little but obscure the real issues, introduce uncertainty and fail to meet the "heavy burden" necessary to overturn the District Court's effective plan.[3]

---

[3] A federal judge is not required to consult with the Department of Health, Education and Welfare on legal issues. What is the constitutional objective of a plan, and whether a unitary system has been or will be achieved, are questions for the court. HEW's interpretation of the constitutional command does not bind the courts.

> [W]hile administrative interpretation may lend a persuasive gloss to a statute, the definition of constitutional standards

B. *The Feasibility of the Plan*

Of course it goes without saying that school boards are not obligated to do the impossible. Federal courts do not joust at windmills. Thus it is proper to ask whether a plan is feasible, whether it can be accomplished. There is no genuine dispute on this point. The plan is simple and quite efficient. A bus will make one pickup in the vicinity of the children's residences, say in the white residential area. It then will make an express trip to the inner-city school. Because of the non-stop feature, time can be considerably shortened and a bus could make a return trip to pick up black students in the inner city and to convey them to the outlying school. There is no evidence of insurmountable traffic problems due to the increased

---

controlling the actions of states and their subdivisions is peculiarly a judicial function.

Bowman v. County School Board of Charles City County, 382 F.2d 326 (1967).

Although the definition of goals is for the court, HEW may be able to provide technical assistance in overcoming the logistical impediments to the desegregation of a school system. Thus it was quite understandable that at the outset of this case the District Court invited the Board to consult with HEW. Desegregation of this large educational system was likely to be a complex and administratively difficult task, in which the expertise of the federal agency might be of help. However, after a substantial period of time and the beginning of a new school year, it became clear that the Board had no intention of devising a meaningful plan, much less seeking advice on how to do so. At that point (December 1969) with the need for speed in mind, the Judge appointed an expert already familiar with the school system to work with the school staff in developing a plan.

Whether to utilize the assistance of HEW is ordinarily up to the district judge. Consultation in formulating the mechanics of a plan is not obligatory. The method used by the Judge in this case was certainly sufficient. Moreover, now that a plan has been created and it appears that there are no real alternatives, a remand for HEW's advice seems an exercise in futility.

bussing.[4] Indeed, straight line bussing promises to be quicker. The present average one-way trip is over 15 miles and takes one hour and fourteen minutes; under the plan the average one-way trip for elementary students will be less than seven miles and 35 minutes. The cost of all of the additional bussing will be less than one week's operating budget.[5]

C. *The Standard of Review*

In *Brown* II, the Supreme Court charged the district courts with the enforcement of the dictates of *Brown* I.

---

[4] The only indication I have encountered that a serious traffic problem will be occasioned by the additional bussing is found in an affidavit by the City Director of Traffic Engineering. His statement is based on the exaggerated bus estimate prepared by the Board and rejected by the District Court. See note 5, *infra*. Moreover, he appears to have relied to a large extent on the erroneous assumption that under the plan busses would pick up and discharge passengers along busy thoroughfares, thus causing "stop-and-go" traffic of slow moving school busses in congested traffic."

A later affidavit of the same official, filed at the request of the District Court, affords more substantial data. It reveals that the total estimated number of automobile trips per day in Charlotte and Mecklenburg County (not including internal truck trips) is 869,604. That the 138 additional busses would gravely aggravate the congestion is dubious, to say the least.

[5] The District Judge rejected the Board's inflated claims, and found that altogether the Finger plan would bus 13,300 new students in 138 additional busses. The Board had estimated that 19,285 additional pupils would have to be transported, requiring 422 additional busses. This estimate is disproportionate on its face, for presently 23,600 pupils are transported in 280 busses. As indicated above, the direct bus routes envisioned by the Finger plan should accomplish increased, not diminished, efficiency. The court below, after close analysis, discounted the Board's estimate for other reasons as well, including the "very short measurements" used by the Board in determining who would have to be bussed, the failure of the Board to account for round-trips, staggering of opening and closing hours, and overloads.

The lower courts were to have "a practical flexibility in shaping * * * remedies." 349 U.S. at 300. Thus, in subsuming these cases under traditional equity principles, the Supreme Court brought the desegregation decree within the rule that to be overturned it "must [be] demonstrate[d] that there was no reasonable basis for the District Judge's decision." *United States* v. *W. T. Grant Co.*, 345 U.S. 629, 634 (1953). This court has paid homage to this maxim of appellate review when, in the past, a district Judge has ordered less than comprehensive relief. *Bradley* v. *School Board of the City of Richmond*, 345 F.2d 310, 320 (1965), *rev'd*, 382 U.S. 103 (1965). What is called for here is similar deference to an order that would finally inter the dual system and not preserve a nettlesome residue. As the Supreme Court made clear in *Green*, *supra*, those who would challenge an effective course of action bear a "heavy burden." The Finger plan is a remarkably economical scheme when viewed in the light of what it accomplishes. There has been no showing that it can be improved or replaced by better or more palatable means. It should, then, be sustained.

III

Objections Raised Against the Court-Ordered Plan

A. *The "Illegal" Objective of the Plan*

My Brother Bryan expresses concern about the plan, regardless of cost, because it undertakes, in his view, an illegal objective: "achieving racial balance." Whatever might be said for this view abstractly or in another context, it is not pertinent here. We are confronted in this case with no question of bussing for mere balance unrelated to

a mandatory constitutional goal. What the District Court has ordered is compliance with the constitutional imperative to disestablish the existing segregation. Unless we are to palter with words, desegregation necessarily entails integration, that is to say integration in some substantial degree. The dictum to the contrary in *Briggs* v. *Elliott*, 132 F. Supp. 776 (E.D.S.C. 1955), was rejected by necessary implication by the Supreme Court in *Green, supra*, and explicitly by this court in *Walker* v. *County School Board of Brunswick Co.*, 413 F.2d 53, 54 n.2 (4th Cir. 1969).

As my Brother Winter shows, there is no more suitable way of achieving this task than by setting, at least initially, a ratio roughly approximating that of the racial population in the school system. The District Judge adopted this *ad hoc* measurement as a starting guide, expressed a willingness to accept a degree of modification,[4] and departed from it where circumstances required.

B. *The "Unreasonableness" of the Plan*

The majority does not quarrel with the plan's objective, nor, accepting the findings of the District Court, does it really dispute that the plan can be achieved. Rather, we are told, the plan is an unreasonable burden.

---

[4] The District Judge wrote in his December 1 order that

> Fixed ratios of pupils in particular schools will not be set. If the board in one of its three tries had presented a plan for desegregation, the court would have sought ways to approve variations in pupil ratios. In default of any such plan from the school board, the court will start with the thought, originally advanced in the order of April 23, that efforts should be made to reach a 71-29 ratio in the various schools so that there will be no basis for contending that one school is racially different from the others, but to understand that variations from that norm may be unavoidable.

This notion must be emphatically rejected. At bottom it is no more than an abstract, unexplicated judgment—a conclusion of the majority that, all things considered, desegregation of this school system is not worth the price. This is a conclusion neither we nor school boards are permitted to make.

In making policy decisions that are not constitutionally dictated, state authorities are free to decide in their discretion that a proposed measure is worth the cost involved or that the cost is unreasonable, and accordingly they may adopt or reject the proposal. This is not such a case. Vindication of the plaintiffs' constitutional right does not rest in the school board's discretion, as the Supreme Court authoritatively decided sixteen years ago and has repeated with increasing emphasis. It is not for the Board or this court to say that the cost of compliance with *Brown* is "unreasonable."

That a subjective assessment is the operational part of the new "reasonableness" doctrine is highlighted by a study of the factors the majority bids school boards take into account in making bussing determinations. "[A] school board should take into consideration the age of the pupils, the distance and time required for transportation, the effect on traffic, and the cost in relation to the board's resources." But, as we have seen, distance and time will be comparatively short, the effect on traffic is undemonstrated, the incremental cost is marginal. As far as age is concerned, it has never prevented the bussing of pupils in Charlotte-Mecklenburg, or in North Carolina generally, where 70.9% of all bussed students are elementary pupils.

If the transportation of elementary pupils were a novelty sought to be introduced by the District Court, I could understand my brethren's reluctance. But, as is conceded,

bussing of children of elementary school age is an established tradition. Bussing has long been used to perpetuate dual systems.[7] More importantly, bussing is a recognized educational tool in Charlotte-Mecklenburg and North Carolina. And as the National Education Association has admirably demonstrated in its brief, bussing has played a crucial role in the evolution from the one-room schoolhouse in this nation. Since the majority accepts the legitimacy of bussing, today's decision totally baffles me.

In the final analysis, the elementary pupil phase of the Finger plan is disapproved because the percentage increase in bussing is somehow determined to be too onerous.[8] Why this is so we are not told. The Board plan itself would bus 5,000 additional pupils. The fact remains that in North Carolina 55% of all pupils are now being bussed. Under the Finger plan approximately 47% of the Charlotte-Mecklenburg student population would be bussed. This is well within the existing percentage throughout the state.

The majority's proposal is inherently ambiguous. The

---

[7] For some extreme examples, see: School Board of Warren County v. Kelly, 259 F.2d 497 (4th Cir. 1958); Corbin v. County School Bd. of Pulaski County, 117 F.2d 924 (4th Cir. 1949); Griffith v. Bd. of Educ. of Yancey County, 186 F. Supp. 511 (W.D.N.C. 1960); Gains v. County School Bd. of Grayson County, 186 F. Supp. 753 (W.D.a. 1960), *stay denied*, 282 F.2d 343 (4th Cir. 1960). *See also*, Chambers v. Iredell Co., —— F.2d —— (4th Cir. 1970) (dissenting opinion).

[8] The majority calculates the elementary school portion of the plan to mean a 39% increase in bussed pupils, 32% increase in busses; the whole package, it is said, would require a 56% pupil increase and 49% bus increase.

These figures are accurate but do not tell the whole story. If one includes within the number of students presently being transported those that are bussed on commercial lines (5000), the increase in pupils transported would not appear to be as large. Thus the plan for elementary schools would entail a 33% bussed pupil increment, the whole Finger plan, 47%.

court-ordered plan is said to be unreasonable. Yet the School Board's own plan has also been disapproved. Does the decision—that the Finger plan is unreasonable—depend on the premise that an intermediate course is available? Would the amount of segregation retained in the School Board's plan be avowedly sanctioned if it were recognized that nothing short of the steps delineated in the District Court's plan will suffice to eliminate it? Since there is no practicable alternative, must we assume that the majority is willing to tolerate the deficiencies in the Board plan?

These questions remain unresolved and thus the ultimate meaning of the "reasonableness" doctrine is undefined. Suffice it to say that this case is not an appropriate one in which to grapple with the theoretical issue whether the law can endure a slight but irreducible remnant of segregated schools. This record presents no such problem. The remnant of racially identifiable elementary schools, to which the District Court addressed itself, encompasses over half the elementary population. This large fraction cannot be called slight; nor, as the Finger plan demonstrates, is it irreducible.

I am even more convinced of the unwisdom of reaching out to fashion a new "rule of reason," when this record is far from requiring it, because of the serious consequences it would portend for the general course of school desegregation. Handed a new litigable issue—the so-called reasonableness of a proposed plan—school boards can be expected to exploit it to the hilt. The concept is highly susceptible to delaying tactics in the courts. Everyone can advance a different opinion of what is reasonable. Thus, rarely would it be possible to make expeditious disposition of a board's claim that its segregated system is not "reasonably" eradicable. Even more pernicious, the new-born rule furnishes a powerful incentive to communities to perpetuate and

deepen the effects of race separation so that, when challenged, they can protest that belated remedial action would be unduly burdensome.

Moreover, the opinion catapults us back to the time, thought passed, when it was the fashion to contend that the inquiry was not how much progress had been made but the presence or absence of good faith on the part of the board. Whether an "intractable remnant of segregation" can be allowed to persist, apparently will now depend in large measure on a slippery test: an estimate of whether the Board has made "every reasonable effort to integrate the pupils under its control."[1]

---

[1] Both in its characterization of the facts and in its treatment of the case the majority implies that the actions of this Board have been exemplary. I feel constrained to register my dissent from this view although on no account do I subscribe to the proposition that the disposition of the case depends on this issue.

On April 23, 1969 the District Judge declared the Charlotte-Mecklenburg School District illegally segregated. He found it unnecessary at that time to decide whether the Board had deliberately gerrymandered to perpetuate the dual system since he believed that the court order to follow would promote substantial changes. The Board was given until May 15 to devise a plan eliminating faculty and student segregation.

A majority of the Board voted not to take an immediate appeal and the school superintendent was directed to prepare a plan. His mandate was hazy. According to the court below—

> No express guidelines were given the superintendent. However, the views of many members expressed at the meeting were so opposed to serious and substantial desegregation that everyone including the superintendent could reasonably have concluded, as the court does, that a "minimal" plan was what was called for, and that the "plan" was essentially a prelude to anticipated disapproval and appeal.
>
> • • • • •
>
> The staff were never directed to do any serious work on redrawing of school zone lines, pairing of schools, combining zones, grouping of schools, conferences with the Department of Health, Education and Welfare, nor any of the other

The Supreme Court having barred further delay by its insistent emphasis on an immediate remedy, we should not lend ourselves to the creation of a new loophole by attenuating the substance of desegregation.

---

possible methods of making real progress towards desegregation.

The superintendent's plan was submitted to the Board on May It was quite modest in its undertaking. Nevertheless, the Boar "struck out virtually all the effective provisions of the superintendent's plan." The plan ultimately filed by the Board on Ma 28 was "the plan previously found racially discriminatory wit the addition of one element—the provision of transportation fo [majority to minority transfers.]" The Board also added a ru making a student who transfers to a new high school ineligible fo athletics for a year. As the District Judge found,

> [t]he effect of the athletic penalty is obvious—it discriminat against black students who may want to transfer and tal part in sports, and is no penalty on white students who sho no desire for such transfers.

In the meantime the Board for the first time refused to acce a recommendation of the superintendent for the promotion of teacher to principal. The reason avowed was that the teache who was black and a plaintiff in the suit, had publicly express his agreement with the District Court order. The job was wit held until the prospective appointee signed a "loyalty oath."

The District Judge held a hearing on June 16 and ruled June 20. He declined to find the Board in contempt but did no that "[t]he board does not admit nor claim that it has a positive duty to promote desegregation." The Judge also turned to the issue of gerrymandering and found "a long standi policy of control over the makeup of school population whi scarcely fits any true 'neighborhood school philosophy.'"

On July 29, the Board returned with a new plan. The Distri Judge was pleased to learn that "the School Board has revers its field and has accepted its affirmative constitutional duty desegregate pupils, teachers, principals and staff members 'at t earliest possible date.'" In view of this declaration and of t late date, the court "reluctantly" approved for one year only plan whereby seven all black inner-city schools would be clos and a total of 4245 black children bussed to outlying white schoo

Albert V. Bryan, Circuit Judge, dissenting in part:

The Court commands the Charlotte-Mecklenburg Board of Education to provide bussing of pupils to its public schools for "achieving *integration*". (Accent added.) "[A]chieving *integration*" is the phraseology used, but actually, achieving racial *balance* is the objective. Bussing

---

The Board was directed to file a plan for complete desegregation in November.

By November, the District Judge was able to survey the results achieved under the plan adopted for the year. He found that "only 1315 instead of the promised 4245 black pupils" had been transferred. (Later information revealed that the number was only 767.) Furthermore, he found that

> The Board has indicated that its members do not accept the duty to desegregate the schools at any ascertainable time; and they have clearly indicated that they intend not to do it effective in the fall of 1970. They have also demonstrated a yawning gap between predictions and performance.

On November 17, the Board filed a plan. It "discarded further consideration of pairing, grouping, clustering and transporting." Ostensibly "to avoid 'tipping,'" the plan provided that white students would not be assigned schools where they would find themselves with less than 60% whites. This was, as the District Court found, a one-way street in view of the fact that the plan contemplated no effort to desegregate schools with greater than 40% blacks. The plan also dropped the earlier provision of transportation for students transferring out of segregated situations. Thus the Board nullified the one improvement it had made in its May 8 plan. It also left those black students who had transferred to outlying schools pursuant to the July 29 plan without transportation. Understandably, the court labeled this "re-segregation."

In the face of this total lack of cooperation on the part of the Board, the court was compelled to appoint an expert to devise a plan for desegregation. The Finger plan was the result.

It appears from the record that on most issues the Board was sharply divided. Of course I mean to cast no aspersions on those members—and there were some—who urged the Board forthrightly to shoulder its duty. But the above recital of events demonstrates beyond doubt that this Board, through a majority of its members, far from making "every reasonable effort" to fulfill its constitutional obligation, has resisted and delayed desegregation at every turn.

to prevent racial imbalance is not as yet a Constitutional obligation. Therefore, no matter the prior or present utilization of bussing for this or other reasons, and regardless of cost considerations or duplication of the bus routes, I think the injunction cannot stand.

Without Constitutional origin, no power exists in the Federal courts to order the Board to do or not to do anything. I read no authority in the Constitution, or in the implications of Brown v. Board of Education, 347 US 483 (1954), and its derivatives, requiring the authorities to endeavor to apportion the school bodies in the racial ratio of the whole school system.

The majority opinion presupposes this racial balance, and also bussing to achieve it, as Constitutional imperatives, but the Chief Justice of the United States has recently suggested inquiry on whether "any particular racial balance must be achieved in the schools; . . . [and] to what extent transportation may or must be provided to achieve the ends sought by prior holdings of the Court." See his memorandum appended to Northcross v. Board of Education of the Memphis, Tennessee, City Schools, —— US ——, 38 USLW 4219, 4220 (March 9, 1970).*

Even construed as only incidental to the 1964 Civil Rights Act, this legislation in 42 United States Code § 2000c-6 is necessarily revealing of Congress' hostile attitude toward the concept of achieving racial balance by bussing. It unequivocally decried in this enactment "any order [of a Federal court] seeking to achieve a racial balance in any

---

* On remand the District Court in *Northcross* has held there was no Constitutional obligation to transport pupils to overcome a racial imbalance. Northcross v. Board of Education of the Memphis City Schools, —— FS —— (W.D.Tenn., May 1, 1970) (per McRae, J.). In the same Circuit, see, too, Deal v. Cincinnati Board of Education, 419 F2d 1387 (6 Cir. 1969).

school by requiring the transportation of pupils or students from one school to another . . . to achieve such racial balance . . . ."

I would not, as the majority does, lay upon Charlotte-Mecklenburg this so doubtfully Constitutional ukase.

WINTER, Circuit Judge, concurring in part and dissenting in part:

I would affirm the order of the district court in its entirety.*

In a school district in which freedom of choice has patently failed to overcome past state policy of segregation and to achieve a unitary system, the district court found the reasons for failure. They included resort to a desegregation plan based on geographical zoning with a free transfer provision, rather than a more positive method of achieving the constitutional objective, the failure to integrate faculties, the existence of segregated racial patterns partially as a result of federal, state and local governmental action and the use of a neighborhood concept for the location of schools superimposed upon a segregated residential pattern. Correctly the majority accepts these findings under established principles of appellate review. To illustrate how government-encouraged residential segregation, coupled with the discriminatory location and design of schools, resulted in a dual system, the majority demonstrates that in this locality busing has been employed as a tool to perpetuate segregated schools.

---

* Certainly, if the district court's order with respect to high schools and junior high schools is affirmed, the district court should not be invited to reconsider its order with respect to them. The jurisdiction of the district court is continuing and it may always modify its previous orders with respect to any school upon application and for good cause shown.

In complete compliance with *Carter* v. *West Feliciana School Board*, —— U. S. —— (1970); *Alexander* v. *Holmes County Bd. of Ed.*, —— U. S. —— (1969); *Green* v. *School Bd. of New Kent County*, 391 U. S. 430 (1968), and *Monroe* v. *Bd. of Comm'rs.*, 391 U. S. 450 (1968), the majority concludes that the existing high school and junior high school system must be dismantled and that the constitutional mandate can be met by the use of geographical assignment, including satellite districts and busing.

The majority thus holds that the Constitution requires that this dual system be dismantled. It indicates its recognition of the need to overcome the discriminatory educational effect of such factors as residential segregation. It also approves the use of zones, satellite districts and resultant busing for the achievement of a unitary system at the high school and junior high school levels. Nevertheless, the majority disapproves a similar plan for the desegregation of the elementary schools on the ground that the busing involved is too onerous. I believe that this ground is insubstantial and untenable.

At the outset, it is well to remember the seminal declaration in *Brown* v. *Board of Education (Brown II)*, 349 U. S. 294, 300 (1955), that in cases of this nature trial courts are to "be guided by equitable principles" in "fashioning and effectuating decrees." Since *Brown II* the course of decision has not departed from the underlying premise that this is an equitable proceeding, and that the district court is invested with broad discretion to frame a remedy for the wrongful acts which the majority agrees have been committed. In *Green* v. *School Board of New Kent County*, 391 U. S. at 438, the Supreme Court held that the district courts not only have the "power" but the "duty to render a decree which will, so far as possible, eliminate the dis-

criminatory effects of the past, as well as bar like discrimination in the future." District courts were directed to "retain jurisdiction until it is clear that disestablishment has been achieved." *Raney* v. *Board of Education*, 391 U. S. 443, 449 (1968). Where it is necessary district courts may even require local authorities "to raise funds adequate to reopen, operate, and maintain without racial discrimination a public school system." *Griffin* v. *School Board*, 377 U. S. 218, 233 (1964). Thus, the Supreme Court has made it abundantly clear that the district courts have the power, and the duty as well, to fashion equitable remedies designed to extirpate racial segregation in the public schools. And in fashioning equitable relief, the decree of a district court must be sustained unless it constitutes a clear abuse of discretion. *United States* v. *W. T. Grant Co.*, 345 U. S. 619 (1953).

Busing is among the panoply of devices which a court of equity may employ in fashioning an equitable remedy in a case of this type. The district court's order required that "transportation be offered on a uniform non-racial basis to all children whose attendance in any school is necessary to bring about reduction of segregation, and who lives farther from the school to which they are assigned than the Board determines to be walking distance." It found as a fact, and I accept its finding, that "there is no way" to desegregate the Charlotte schools in the heart of the black community without providing such transportation.

The district court's order is neither a substantial advance nor extension of present policy, nor on this record does it constitute an abuse of discretion. This school system, like many others, is now actively engaged in the business of transporting students to school. Indeed, busing is a widespread practice in the United States. U. S. Commission on

Civil Rights, *Racial Isolation in the Public Schools* 180 (1967). Between 1954 and 1967 the number of pupils using school transportation has increased from 9,509,699 to 17,271,718. National Education Association, National Commission on Safety Education, *1967-68 Statistics on Pupil Transportation* 3.

Given its widespread adoption in American education, it is not surprising that busing has been held an acceptable tool for dismantling a dual school system. In *United States* v. *Jefferson County Board of Education*, 380 F.2d 385, 392 (5 Cir.) (en banc), *cert. den.* sub. nom. *Caddo Parish School Bd.* v. *United States*, 389 U. S. 840 (1967), the court ordered that bus service which was "generally provided" must be routed so as to transport every student "to the school to which he is assigned" provided that the school "is sufficiently distant from his home to make him eligible for transportation under generally applicable transportation rules." Similarly, in *United States* v. *School Dist. 151*, 286 F. S. 786, 799 (N.D. Ill. 1968), *aff'd.*, 404 F.2d 1125 (7 Cir. 1968), the court said that remedying the effects of past discrimination required giving consideration to "racial factors" in such matters as "assigning students" and providing transportation of pupils. In addition, the Eighth Circuit in *Kemp* v. *Beasley*, —— F.2d —— (8 Cir. 1970), recognized that busing is "one possible tool in the implementation of unitary schools." And, finally, *Griffin* v. *School Board, supra*, makes it clear that the added cost of necessary transportation does not render a plan objectionable.

I turn, then, to the extent and effect of busing of elementary school students as ordered by the district court.

Presently, 23,600 students—21% of the total school population—are bused, excluding some 5,000 pupils who travel to and from school by public transportation. The school

board operates 280 buses. The average cost of busing students is $39.92 per student, of which one-half is borne by the state and one-half by the board. Thus, the average annual cost to the board is about $20.00 per student. The total annual cost to the board for busing is approximately $500,000.00 out of a total operating budget of $51,000,000.00. The cost of busing is thus less than 1% of the total operating budget and an even smaller percentage of the $57,700,000.00 which this school district expends on the aggregate of operations, capital outlay and debt service and this cost also represents less than 2% of the local funds which together with state and federal money constitute the revenue available annually to the school board.

The total number of elementary school pupils presently bused does not appear, but under the district court's order an additional 9,300 elementary school pupils would be bused. The additional operating cost of busing them would not exceed $186,000.00 per year. They would require not more than 90 additional buses, and the buses would require an additional capital outlay of $486,000.00. The increased operating cost of the additional elementary school pupils required to be bused amounts to less than 1% of the board's school budget, and the one-time capital outlays for additional buses amounts to less than 1% of the board's total budget. The combined operational and capital cost represents less than 1.2% of the board's total budget. I am, therefore, unable to see how the majority could consider the additional cost unbearable.

Perhaps more importantly, the tender years of elementary school students requires a consideration of the impact of the district court's order on the average student. While this board transports 21% of the total school population, it is providing transportation to a far lower per-

centage of pupils than the average North Carolina school board. In North Carolina 54.9% of the average daily attendance in the public schools was transported by bus during the 1968-69 school year.

The average distance traveled by elementary school pupils presently bused does not appear, but the district court found overall with respect to the children required to be bused by its order that they "will not as a group travel as far, nor will they experience more inconvenience than the more than 28,000 children who are already being transported * * *." While the district court did not make separate findings with regard to the average length of travel for the additional elementary school pupils required to be bused, it did find that the average one-way bus trip in the system today is over 15 miles in length and takes nearly an hour and a quarter. In contrast, the court found that under its plan the average one-way trip for elementary school students would be less than 7 miles and would require not over thirty-five minutes.

When I consider that busing has been widely used in this system to perpetuate segregation, that some busing was proposed even under the unacceptable board plans, that the cost of additional busing to the system as required by the court's order, both in absolute terms and in relation to its total expenditures is so minimal, and that the impact on the elementary school pupils is so slight, I discern no basis for concluding that the district court abused its discretion with respect to the elementary school.

Two other aspects of the majority's opinion require my comment.

First, the majority attempts to answer the query of the Chief Justice in his separate opinion in *Northcross* v. *Board*

of Ed. of Memphis, —— U. S. —— (1970), as to whether "any particular racial balance must be achieved in the schools" by holding "that not every school in a unitary school system need be integrated • • •." To me, the holding is premature and unwise. There is not in this case either the intractable problem of a vast urban ghetto in a large city or any substantial basis on which it may be said that the cost or the impact on the system or on the pupils of dismantling the dual system is insupportable.

The district court wisely attempted to remedy the present dual system by requiring that pupil assignment be based "as nearly as practicable" on the racial composition of the school system, 71% white and 29% black. The plan ordered fell short of complete realization of this remedial goal. While individual schools will vary in racial composition from 3% to 41% black, most schools will be clustered around the entire system's overall racial ratio. It would seem to follow from *United States* v. *Montgomery Board of Education*, 395 U. S. 225, 232 (1968), that the district court's utilization of racial ratios to dismantle this dual system and remedy the effects of segregation was at least well within the range of its discretion. There the Supreme Court approved as a requirement of faculty integration that "in each school the ratio of white to Negro faculty members is substantially the same as it is throughout the system." It did so recognizing that it had previously said in *New Kent County*, 391 U. S. at 439, "[t]here is no universal answer to complex problems of desegregation; there is obviously no one plan that will do the job in every case. The matter must be assessed in light of the circumstances present and the options available in each instance." If in a proper case strict application of a ratio is an approved device to achieve faculty integration, I know of no reason

why the same should not be true to achieve pupil integration, especially where, as here, some wide deviations from the overall ratio have been permitted to accommodate circumstances with respect to particular schools.

In addition to *Montgomery*, the same conclusion can be deduced from the mandate of *West Feliciana* and *Holmes County* to dismantle immediately a dual system. Schools cease to be black or white when each reflects the overall pupil racial balance of the entire system. What imbalances may be justified after a unitary system has once been established, and what departures from an overall pupil racial balance may be permitted to accommodate special circumstances in the establishment of a unitary system, should be developed on a case-by-case basis and the facts of record which each case presents.

The other aspect of the majority's opinion which troubles me greatly is its establishment of the test of reasonableness. My objections to this test do not spring from any desire to impose *un*reasonable, irrational or onerous solutions on school systems; I, too, seek "reasonable" means with which to achieve the constitutionally required objective of a unitary system.

My objections are two-fold.

First, this is an inappropriate case in which to establish the test. On this record it cannot be said that the board acted reasonably or that there is any viable solution to the dismantling of the dual system other than the one fashioned by the district court. Neither the board nor HEW has suggested one. So that, again, I think the majority is premature in its pronouncement and I would find no occasion to discuss reasonableness when there is no choice of remedies.

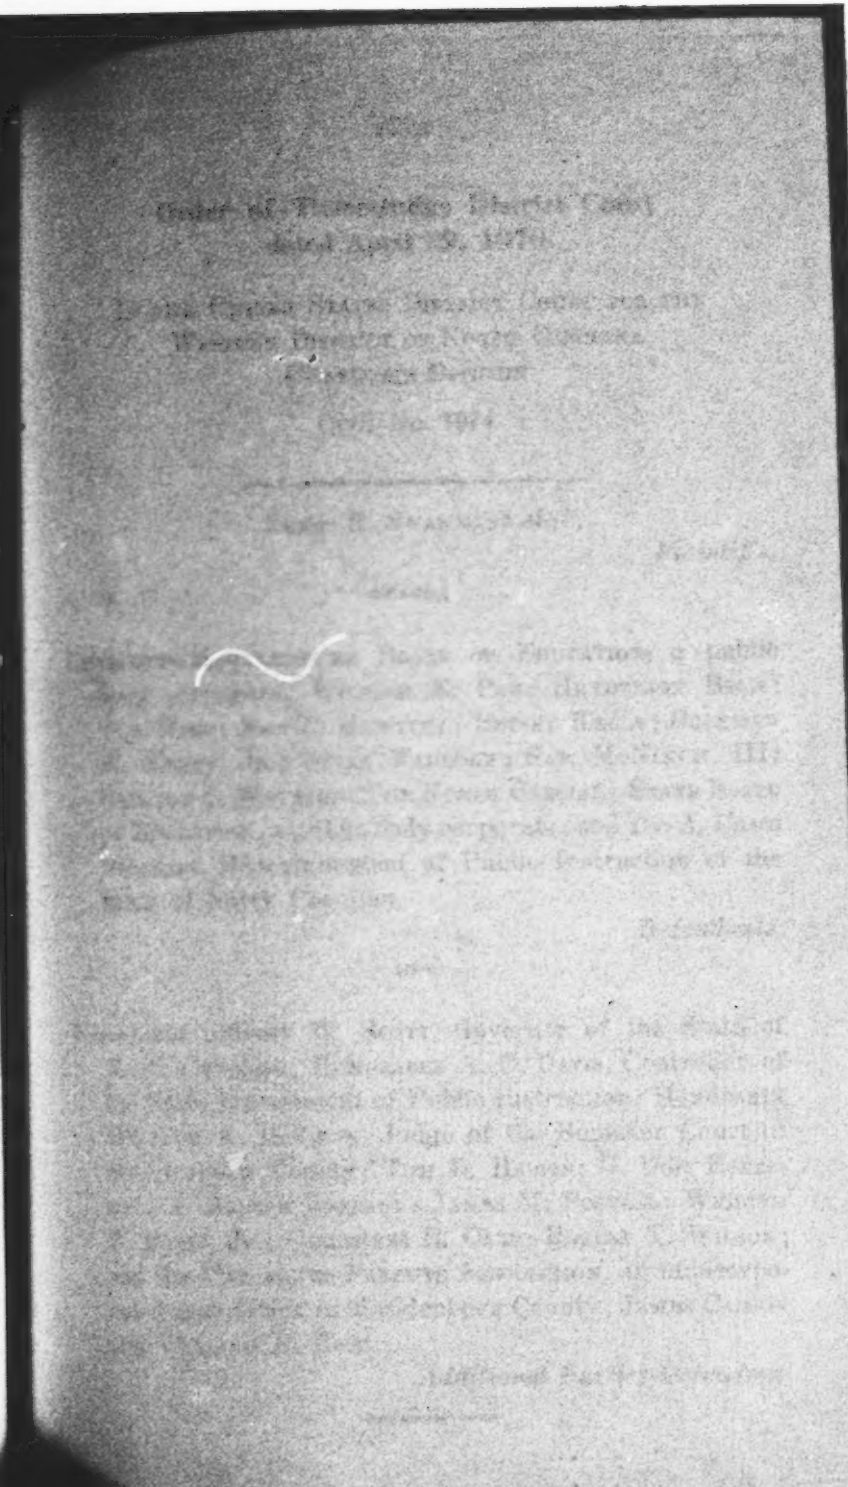
Second, the majority sets forth no standards by which to judge reasonableness or unreasonableness. The majority

approves the district court's plan as to high schools and junior high schools, yet disapproves as to elementary schools. The only differences are increased busing with attendant increased cost, time and distance. The majority subjectively concludes that these costs are too great to permit the enforcement of the constitutional right to a unitary system. I would find them neither prohibitive nor relatively disproportionate. But, with the absence of standards, how are the school boards or courts to know what plans are reasonable? The conscientious board cannot determine when it is in compliance. The dilatory board receives an open invitation to further litigation and delay.

Finally, I call attention to the fact that "reasonableness" has more than faint resemblance to the good faith test of *Brown II*. The 13 years between *Brown II* and *New Kent County* amply demonstrate that this test did not work. Ultimately it was required to be rejected and to have substituted for it the absolute of "now" and "at once." The majority ignores this lesson of history. If a constitutional right exists, it should be enforced. On this record the constitutional rights of elementary school pupils should be enforced in the manner prescribed by the district court, because it is clear that the district court did not abuse its discretion.

Judge Sobeloff authorizes me to say that he joins in these views.

Judgment of Court of Appeals dated May 26, 1970



This cause came on to be heard on the record from the United States District Court for the Western District of North Carolina, and was argued by counsel.

On consideration whereof, it is ORDERED and ADJUDGED that the judgment of the District Court appealed from, in this case, be, and the same is hereby, vacated; and the case is remanded to the United States District Court for the Western District of North Carolina, at Charlotte, for further proceedings.

Judge Bryan joins Haynsworth, C.J. and Boreman, J. in voting to vacate the judgment of the District Court, and to remand the case in accordance with the opinion written by Butzner, J. He does so for the sake of creating a clear majority for the decision to remand. It is his hope that upon reexamination the District Court will find it unnecessary to contravene the principle stated in Judge Bryan's dissent herein, to which he still adheres. Screws v. United States, 325 US 91, 135 (1945).

By direction of the Court.

SAMUEL W. PHILLIPS
Clerk

Order of Three-Judge District Court dated April 29, 1970

IN THE UNITED STATES DISTRICT COURT FOR THE WESTERN DISTRICT OF NORTH CAROLINA CHARLOTTE DIVISION

Civil No. 1974

JAMES E. SWANN, *et al.*,

Plaintiffs,

versus

CHARLOTTE-MECKLENBURG BOARD OF EDUCATION, a public body corporate; WILLIAM E. POE; HENDERSON BELK; DAN HOOD; BEN F. HUNTLEY; BETSEY KELLY; COLEMAN W. KERRY, JR.; JULIA MAULDEN; SAM MCNINCH, III; CARLTON G. WATKINS; THE NORTH CAROLINA STATE BOARD OF EDUCATION, a public body corporate; and DR. A. CRAIG PHILLIPS, Superintendent of Public Instruction of the State of North Carolina,

Defendants,

and

HONORABLE ROBERT W. SCOTT, Governor of the State of North Carolina; HONORABLE A. C. DAVIS, Controller of the State Department of Public Instruction; HONORABLE WILLIAM K. MCLEAN, Judge of the Superior Court of Mecklenburg County; TOM B. HARRIS; G. DON ROBERSON; A. BREECE BRELAND; JAMES M. POSTELL; WILLIAM E. RORIE, JR.; CHALMERS R. CARR; ROBERT T. WILSON; and the CONCERNED PARENTS ASSOCIATION, an unincorporated association in Mecklenburg County; JAMES CARSON and WILLIAM H. BOOE,

Additional Parties-Defendant.

Order of Three-Judge District Court dated April 29, 1970

Civil No. 2631

MRS. ROBERT LEE MOORE, *et al.*,

Plaintiffs,

versus

CHARLOTTE-MECKLENBURG BOARD OF EDUCATION and WILLIAM C. SELF, Superintendent of Charlotte-Mecklenburg Public Schools,

Defendants.

THREE-JUDGE COURT

(Heard March 24, 1970 Decided April 29, 1970.)

Before CRAVEN and BUTZNER, Circuit Judges, and McMILLAN, District Judge.

CRAVEN, Circuit Judge:

This three-judge district court was convened pursuant to 28 U.S.C. § 2281, et seq. (1964), to consider a single aspect of the above-captioned case: the constitutionality and impact of a state statute, N. C. Gen. Stat. § 115-176.1 (Supp. 1969), known as the antibussing law, on this suit brought to desegregate the Charlotte-Mecklenburg school system. We hold a portion of N. C. Gen. Stat. § 115-176.1 unconstitutional because it may interfere with the school board's performance of its affirmative constitutional duty under the equal protection clause of the Fourteenth Amendment.

I.

On February 5, 1970, the district court entered an order requiring the Charlotte-Mecklenburg School Board to de-

segregate its school system according to a court-approved plan. Implementation of the plan could require that 13,300 additional children be bussed.[1] This, in turn, could require up to 138 additional school buses.[2]

Prior to the February 5 order, certain parties filed a suit, entitled *Tom B. Harris, G. Don Roberson, et al.* v. *William C. Self, Superintendent of Charlotte-Mecklenburg Schools and Charlotte-Mecklenburg Board of Education,* in the Superior Court of Mecklenburg County, a court of general jurisdiction of the State of North Carolina. Part of the relief sought was an order enjoining the expenditure of public funds to purchase, rent or operate any motor vehicle for the purpose of transporting students pursuant to a desegregation plan. A temporary restraining order granting this relief was entered by the state court, and, in response, the *Swann* plaintiffs moved the district court to add the state plaintiffs as additional parties defendant in the federal suit, to dissolve the state restraining order, and to direct all parties to cease interfering with the federal court mandates. Because it appeared that the constitutionality of N. C. Gen. Stat. § 115-176.1 (Supp. 1969) would be in question, the district court requested designation of this three-judge court on February 19, 1970. On February 25, 1970, the district judge granted the motion to add additional parties. Meanwhile, on February 22, 1970, another state suit, styled *Mrs. Robert Lee Moore, et al.* v. *Charlotte-*

[1] On March 5, 1970, the Fourth Circuit Court of Appeals stayed that portion of the district court's order requiring bussing of students pending appeal to the higher court.

[2] There is a dispute between the parties as to the additional number of children who will be bussed and as to the number of additional buses that will be needed. For our purposes, it is immaterial whose figures are correct. The figures quoted are taken from the district judge's supplemental findings of fact, filed March 21, 1970.

Mecklenburg Board of Education and William C. Self, Superintendent of Charlotte-Mecklenburg Schools, was begun. In this second state suit, the plaintiffs also requested an order enjoining the school board and superintendent from implementing the plan ordered by the district court on February 5. The state court judge issued a temporary restraining order embodying the relief requested, and on February 26, 1970, the *Swann* plaintiffs moved to add Mrs. Moore, *et al.*, as additional parties defendant in the federal suit. On the same day, the state defendants filed a petition for removal of the *Moore* suit to federal court. On March 23, 1970, the district judge requested a three-judge court in the removed *Moore* case, and this panel was designated to hear the matter. All the cases were consolidtaed for hearing, and the court heard argument by all parties on March 24, 1970.

II.

N. C. Gen. Stat. § 115-176.1 (Supp. 1969) reads:

> Assignment of pupils based on race, creed, color or national origin prohibited.—No person shall be refused admission into or be excluded from any public school in this State on account of race, creed, color or national origin. No school attendance district or zone shall be drawn for the purpose of segregating persons of various races, creeds, colors or national origins from the community.
>
> Where administrative units have divided the geographic area into attendance districts or zones, pupils shall be assigned to schools within such attendance districts; provided, however, that the board of education of an administrative unit may assign any pupil to a school outside of such attendance district or zone in order that such pupil may attend a school of a

specialized kind including but not limited to a vocational school or school operated for, or operating programs for, pupils mentally or physically handicapped, or for any other reason which the board of education in its sole discretion deems sufficient. No student shall be assigned or compelled to attend any school on account of race, creed, color or national origin, or for the purpose of creating a balance or ratio of race, religion or national origins. Involuntary bussing of students in contravention of this article is prohibited, and public funds shall not be used for any such bussing.

The provisions of this article shall not apply to a temporary assignment due to the unsuitability of a school for its intended purpose nor to any assignment or transfer necessitated by overcrowded conditions or other circumstances which, in the sole discretion of the school board, require assignment or reassignment.

The provisions of this article shall not apply to an application for the assignment or reassignment by the parent, guardian or person standing in loco parentis of any pupil or to any assignment made pursuant to a choice made by any pupil who is eligible to make such choice pursuant to the provisions of a freedom of choice plan voluntarily adopted by the board of education of an administrative unit.

It is urged upon us that the statute is far from clear and may reasonably be interpreted several different ways.

(A) Plaintiffs read the statute to mean that the school board is prevented from complying with its duty under the Fourteenth Amendment to establish a unitary school system. See, *e.g.*, *Green* v. *County School Bd. of New Kent County*, 391 U.S. 430, 439 (1968). In

support of this contention, plaintiffs argue that the North Carolina General Assembly passed § 115-176.1 in response to an April 23, 1969, district court order, which required the school board to submit a plan to desegregate the Charlotte schools for the 1969-70 school year. Under plaintiffs' interpretation of the statute, the board is denied all desegregation tools except non-gerrymandered geographic zoning and freedom of choice. Implicit in this, of course, is the suggestion that zoning and fredom of choice will be ineffective in the Charlotte context to disestablish the asserted duality of the present system.

(B) The North Carolina Attorney General argues that the statute was passed to preserve the neighborhood school concept. Under his interpretation, the statute prohibits assignment and bussing inconsistent with the neighborhood school concept. Thus, to disestablish a dual system the district court could, consistent with the statute, *only* order the board to geographically zone the attendance areas so that, as nearly as possible, each student would be assigned to the school nearest his home regardless of his race. Implicit in this argument is that any school system is *per se* unitary if it is zoned according to neighborhood patterns that are not the result of officially sanctioned racial discrimination. Although the Attorney General emphasizes the expression of state policy by the Legislature in favor of the neighborhood school concept, he recognizes, of course, that the statute also permits freedom of choice if a school board voluntarily adopts such a plan. Thus, the plaintiffs and the Attorney General read the statute in much the same way: that it limits lawful methods of accomplishing desegregation

to nongerrymandered geographic zoning and freedom of choice.

(C) The school board's interpretation of the statute is more ingenious. The board concedes that the statute prohibits assignment according to race, assignment to achieve racial balance, and involuntary bussing for either of these purposes, but contends that the facial prohibitions of the statute only apply to prevent a school board from doing more than necessary to attain a unitary system. The argument is that since the statute only begins to operate once a unitary system has been established, it in no way interferes with the board's constitutional duty to desegregate the schools. Counsel goes on to insist that Charlotte-Mecklenburg presently has a unitary system and, therefore, that the state court constitutionally applied the statute to prevent further unnecessary racial balancing.

(D) Plaintiffs in the *Harris* suit contend (1) that in 42 U.S.C. §§ 2000c(b) and 2000c-6(a)(2) (1964)[3]

---

[3] § 2000c:

As used in this subchapter—

* * * * *

(b) "Desegregation" means the assignment of students to public schools and within such schools without regard to their race, color, religion, or national origin, but "desegregation" shall not mean the assignment of students to public schools in order to overcome racial imbalance.

§ 2000c-6(a):

(2) [P]rovided that nothing herein shall empower any official or court of the United States to issue any order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another or one school district to another in order to achieve such racial balance, or otherwise enlarge the existing power of the court to insure compliance with constitutional standards.

Congress expressly prohibited assignment and bussing to achieve racial balance, (2) that to compel a child to attend a school on account of his race or to compel him to be involuntarily bussed to achieve a racial balance violates the principle of *Brown* v. *Bd. of Ed. of Topeka,* 347 U.S. 483 (1954), and (3) that N. C. Gen. Stat. § 115-176.1 merely embodies the principle of the neighborhood school in accordance with *Brown* and the Civil Rights Act of 1964. We may dispose of the first contention at once. The statute "cannot be interpreted to frustrate the constitutional prohibition [against segregated schools]." *United States* v. *School Dist. 151 of Cook Co.,* 404 F.2d 1125, 1130 (7th Cir. 1968).

(E) Plaintiffs in the *Moore* suit argue that the district court order of February 5, 1970, was in contravention of *Brown* and, therefore, that the state court order in their suit was justified. However, the *Moore* plaintiffs also argue that certain parts of the second and third paragraphs in the state statute are unconstitutional because they give the school board the authority to assign children to schools for whatever reasons the board deems necessary or sufficient. The *Moore* plaintiffs interpret these portions of the statute as permitting assignment and bussing on the basis of race contrary to *Brown* and the Fourteenth Amendment.

III.

Federal courts are reluctant, as a matter of comity and respect for state legislative judgment and discretion, to strike down state statutes as unconstitutional, and will not do so if the statute reasonably can be interpreted so as not

to conflict with the federal Constitution. But to read the statute as innocuously as the school board suggests would, we think, distort and twist the legislative intent. We agree with plaintiffs and the Attorney General that the statute limits the remedies otherwise available to school boards to desegregate the schools. The harder question is whether the limitation is valid or conflicts with the Fourteenth Amendment. We think the question is not so easy, and the statute not so obviously unconstitutional, that the question may lawfully be answered by a single federal judge, see *Turner* v. *City of Memphis*, 369 U.S. 350 (1962); *Bailey* v. *Patterson*, 369 U.S. 31 (1962), and we reject plaintiffs' attack upon our jurisdiction. *Swift & Co.* v. *Wickham*, 382 U.S. 111 (1965); C. Wright, Law of Federal Courts § 50 at 190 (2d ed. 1970).

In *Green* v. *County School Bd. of New Kent Co.*, 391 U.S. 430 (1968), the Supreme Court declared that a school board must take effective action to establish a unitary, nonracial system, if it is not already operating such a system. The Court neither prohibited nor prescribed specific types of plans, but, rather, emphasized that it would judge each plan by its ultimate effectiveness in achieving desegregation. In *Green* itself, the Court held a freedom-of-choice plan insufficient because the plan left the school system segregated, but stated that, under the circumstances existing in New Kent County, it appeared that the school board could achieve a unitary system either by simple geographical zoning or by consolidating the two schools involved in the case. 391 U.S. at 442, n. 6. Under *Green* and subsequent decisions, it is clear that school boards must implement plans that work to achieve unitary systems. *Northcross* v. *Bd. of Ed. of the Memphis City Schools*, —— U.S. ——, 38 L.W. 4219 (1970); *Alexander* v. *Holmes*

Co. Bd. of Ed., 396 U.S. 19 (1969). Plans that do not produce a unitary system are unacceptable.[4]

We think the enunciation of policy by the legislature of the State of North Carolina is entitled to great respect. Federalism requires that whenever it is possible to achieve a unitary system within a framework of neighborhood schools, a federal court ought not to require other remedies in derogation of state policy. But if in a given fact context the state's expressed preference for the neighborhood school cannot be honored without preventing a unitary system, it is the former policy which must yield under the Supremacy Clause.

Stated differently, a statute favoring the neighborhood school concept, freedom-of-choice plans, or both can validly limit a school board's choice of remedy only if the policy favored will not prevent the operation of a unitary system. That it may or may not depends upon the facts in a particular school system. The flaw in this legislation is its rigidity. As an expression of state policy, it is valid. To the extent that it may interfere with the board's perfor-

---

[4] The reach of the Court's mandate is not yet clear:

> [A]s soon as possible . . . we ought to resolve some of the basic practical problems when they are appropriately presented including whether, as a constitutional matter, any particular racial balance must be achieved in the schools; to what extent school districts and zones may or must be altered as a constitutional matter; to what extent transportation may or must be provided to achieve the ends sought by prior holdings of the Court.

Northcross v. Bd. of Ed. of the Memphis City Schools, —— U.S. ——, 38 L.W. at 4220 (1970) (Chief Justice Burger, concurring). For our purposes, it is sufficient to say that the mandate applies to require "reasonable" or "justifiable" solutions. *See generally* Fiss, *Racial Imbalance in the Public Schools: The Constitutional Concepts*, 78 Harv. L. Rev. 564 (1965).

mance of its affirmative constitutional duty to establish a unitary system, it is invalid.

The North Carolina statute, analyzed in light of these principles, is unconstitutional in part. The first paragraph of the statute reads:

> No person shall be refused admission into or be excluded from any public school in this State on account of race, creed, color or national origin. No school attendance district or zone shall be drawn for the purpose of segregating persons of various races, creeds, colors or national origins from the community.

There is nothing unconstitutional in this paragraph. It is merely a restatement of the principle announced in *Brown* v. *Bd. of Ed. of Topeka,* 347 U.S. 483 (1954) (*Brown* I).

The third paragraph of the statute reads:

> The provisions of this article shall not apply to a temporary assignment due to the unsuitability of a school for its intended purpose nor to any assignment or transfer necessitated by overcrowded conditions or circumstances which, in the sole discretion of the school board, require assignment or reassignment.

This paragraph merely allows the school board noninvidious discretion to assign students to schools for valid administrative reasons. As we read it, it does not relate to race at all and, so read, is constitutional.

The fourth paragraph provides:

> The provisions of this article shall not apply to an application for the assignment or reassignment by the parent, guardian or person standing in loco parentis

> of any pupil or to any assignment made pursuant to a choice made by any pupil who is eligible to make such choice pursuant to the provisions of a freedom of choice plan voluntarily adopted by the board of education of an administrative unit.

This paragraph relieves school boards from compliance with the statute where they are implementing voluntarily adopted freedom-of-choice plans within their systems. It does not require the boards to adopt freedom of choice in any particular situation, but leaves them free to comply with their constitutional duty by any effective means available, including, where it is appropriate, freedom of choice. So interpreted, the paragraph is constitutional.

The second paragraph of the statute contains the constitutional infirmity. It reads:

> Where administrative units have divided the geographic area into attendance districts or zones, pupils shall be assigned to schools within such attendance districts; provided, however, that the board of education of an administrative unit may assign any pupil to a school outside of such attendance district or zone in order that such pupil may attend a school of a specialized kind including but not limited to a vocational school or school operated for, or operating programs for, pupils mentally or physically handicapped, or for any other reason which the board of education in its sole discretion deems sufficient. No student shall be assigned or compelled to attend any school on account of race, creed, color or national origin, or for the purpose of creating a balance or ratio of race, religion or national origins. Involuntary bussing of students

in contravention of this article is prohibited, and public funds shall not be used for any such bussing.

The first sentence of the paragraph presents no greater constitutional problem than the third and fourth paragraphs of the statute, discussed above. It allows school boards to establish a geographically zoned neighborhood school system, but it does not require them to do so. Consequently, this sentence does not prevent the boards from complying with their constitutional duty in circumstances where zoning and neighborhood school plans may not result in a unitary system. The clause in the first sentence permitting assignment for "any other reason" in the board's "sole discretion" we read as meaning simply that the school boards may assign outside the neighborhood school zone for noninvidious administrative reasons. So read, it presents no difficulty. The second and third sentences are unconstitutional. They plainly prohibit school boards from assigning, compelling, or involuntarily bussing students on account of race, or in order to racially "balance" the school system. *Green* v. *School Bd. of New Kent Co.*, 391 U.S. 430 (1968), *Brown* v. *Bd. of Ed. of Topeka*, 349 U.S. 294 (1955) (*Brown* II), and *Brown* v. *Bd. of Ed. of Topeka*, 347 U.S. 483 (1954) (*Brown* I), require school boards to consider race for the purpose of disestablishing dual systems.

The Constitution is not color-blind with respect to the affirmative duty to establish and operate a unitary school system. To say that it is would make the constitutional principle of *Brown* I and II an abstract principle instead of an operative one. A flat prohibition against assignment by race would, as a practical matter, prevent school boards from altering existing dual systems. Consequently, the statute clearly contravenes the Supreme Court's direction

that boards must take steps adequate to abolish dual systems. See *Green* v. *School Bd. of Kent Co.*, 391 U.S. 430, 437 (1968). As far as the prohibition against racial "balance" is concerned, a school board, in taking affirmative steps to desegregate its systems, must always engage in some degree of balancing. The degree of racial "balance" necessary to establish a unitary system under given circumstances is not yet clear, see *Northcross* v. *Bd. of Ed. of the Memphis City Schools*, —— U.S. ——, 38 L.W. at 4220 (1970) (Chief Justice Burger concurring), but because any method of school desegregation involves selection of zones and transfer and assignment of pupils by race, a flat prohibition against racial "balance" violates the equal protection clause of the Fourteenth Amendment. Finally, the statute's prohibition against "involuntary bussing" also violates the equal protection clause. Bussing may not be necessary to eliminate a dual system and establish a unitary one in a given case, but we think the Legislature went too far when it undertook to prohibit its use in all factual contexts. To say that bussing shall not be resorted to unless unavoidable is a valid expression of state policy, but to flatly prohibit it regardless of cost, extent and all other factors—including willingness of a school board to experiment—contravenes, we think, the implicit mandate of *Green* that all reasonable methods be available to implement a unitary system.

Although we hold these statutory prohibitions unconstitutional as violative of equal protection, it does not follow that "bussing" will be an appropriate remedy in any particular school desegregation case. On this issue we express no opinion, for the question is now on appeal to the United States Court of Appeals for the Fourth Circuit and is not for us to decide.

It is clear that each case must be analyzed on its own facts. See *Green* v. *School Bd. of New Kent Co.*, 391 U.S. 430 (1968). The legitimacy of the solutions proposed and ordered in each case must be judged against the facts of a particular school system. We merely hold today that North Carolina may not validly enact laws that prevent the utilization of any reasonable method otherwise available to establish unitary school systems. Its effort to do so is struck down by the equal protection clause of the Fourteenth Amendment and the Supremacy Clause (Article 2 of the Constitution).

V

As we have no cause to doubt the sincerity of the various defendants, the plaintiffs' motion to hold them in contempt for interference with the district court's orders and their request for an injunction against enforcement of the statute will be denied. We believe the defendants, including the state court plaintiffs, will, pending appeal, respect this court's judgment, which applies statewide with respect to the constitutionality of the statute.

Several of the parties have moved to be dismissed from the case, alleging various grounds in support of their motions. Because of the view we take of this suit and the limited relief we grant, the motions to dismiss become immaterial. The school board is undeniably a proper party before the court on the constitutional issue, since it is a party to the desegregation suit. We can, therefore, consider and adjudge the validity of the statute, regardless of the position of the other parties. That we consider the substantive arguments of all the parties in no way harms those who have moved to be dismissed.

An appropriate judgment will be entered in accordance with this opinion.

In the Supreme Court of the United States

OCTOBER TERM, 1969

No. 1713

JAMES E. SWANN, ET AL., PETITIONERS

v.

CHARLOTTE-MECKLENBURG BOARD OF EDUCATION, ET AL.

ON PETITION FOR A WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE FOURTH CIRCUIT

MEMORANDUM FOR THE UNITED STATES AS AMICUS CURIAE

INTEREST OF THE UNITED STATES

The United States has substantial responsibility under 42 U.S.C. 2000c–6, 2000d in the area of school desegregation. The outcome of this case will affect that enforcement responsibility. The government participated below as *amicus curiae* at the invitation of the court of appeals, and the United States Department of Health, Education and Welfare is now preparing desegregation plans for Charlotte-Mecklenburg as recommended by the court of appeals.

389-264—70

STATEMENT

The school system here involved comprises the urban area of Charlotte, North Carolina, as well as the more rural Mecklenburg County. The system serves approximately 82,500 students, of whom about 23,200 are black and 59,300 are white (123a–128a), attending 106 schools. This school district has been in desegregation litigation since 1965.

The issue raised by the plaintiffs' petition relates primarily to nine elementary schools attended by about one-half of the black elementary students, who reside in the urban area in the northwest quadrant of Charlotte. The plan proposed in the district court by the school board, while fully desegregating some other all-Negro schools, would have resulted in virtually all-Negro student bodies in these nine schools. That plan, relying solely on geographic zoning and based on the premise that no Negro school should be desegregated unless it could be at least 60 percent white, was rejected by the district court—a decision approved by the Fourth Circuit. The district court approved a plan, drawn by an educational expert recommended by the plaintiffs, based on the premise that there should be no Negro-majority schools in the entire system. The plan used the technique of noncontiguous pairing or "satellite" zoning so that black schools in northwest Charlotte would be paired with predominately white schools in suburban areas.

The court of appeals affirmed as to the high schools and junior high schools and disapproved the elementary school plan. It held:

> first, that not every school in a unitary school system need be integrated; second, nevertheless, school boards must use all reasonable means to integrate the schools in their jurisdiction; and third, if black residential areas are so large that not all schools can be integrated by using reasonable means, school boards must take further steps to assure that pupils are not excluded from integrated schools on the basis of race. * * * [189a]

The court approved such techniques for achieving desegregation as rezoning, "pairing, grouping, clustering, and satellite zoning" (198a) but held that the elementary school plan required by the district court was beyond constitutional requirements and inappropriate in the circumstances of this case.

Accordingly, inasmuch as implementation of all parts of the district court-approved plan had been stayed (135a, 177a) and the 1969–1970 school year was at an end, the court of appeals remanded the case with instructions to require, on an expedited schedule, the formulation of additional alternative plans for elementary schools. On remand, the Fourth Circuit suggested, "the district court should direct the school board to consult experts from the Office of Education of the Department of Health, Education, and Welfare

and to explore every method of desegregation, including rezoning with or without satellites, pairing, grouping, and school consolidation" (199a). The board is to submit a new plan by June 30, 1970 (200a).

DISCUSSION

While we believe that the court of appeals was correct in its formulation of the school board's obligation, we agree with the petitioners that this case presents issues of national importance requiring resolution by this Court. But we think that, in the posture of this case, determination of the merits by this Court is not appropriate at this time.

As the court of appeals noted, "Similar segregation occurs in many other cities throughout the nation, and constitutional principles dealing with it should be applied nationally" (188a). The question of the appropriate remedial standard for school districts covering large urban areas is now being presented to a number of appellate courts. Cases have recently been decided or are now pending involving Orlando and Tampa, Florida; Mobile, Alabama; Houston, Texas; Jackson, Mississippi; Little Rock, Arkansas; Oklahoma City and Tulsa, Oklahoma; Norfolk, Virginia; Alexandria, Louisiana; Memphis, Tennessee; and Cincinnati, Ohio, among others. Appellate decisions to date have not uniformly adopted a single remedial standard; and the issues as framed by the petitioners would ask this Court to address some of the questions posed by Mr. Chief Justice Burger

concurring in *Northcross* v. *Board of Education,* 397 U.S. 232, 237.

The issue here focuses on the appropriate remedies for school segregation in the context of an urban school district characterized by racial residential segregation. In view of the large number of students who would continue to attend virtually all-Negro schools under the school board's plan and the board's quite artificial limitations on that plan, namely, that no technique but rezoning would be used and that no integrated school should be less than 60 percent white, both of the courts below held that the school board's plan was not an adequate remedy. We fully agree with that conclusion.

The court of appeals declined, however, to endorse as to elementary schools the alternative plan adopted by the district court. To be sure, district courts have wide discretion in formulating appropriate remedies in school-desegregation cases. See, *e.g., Brown* v. *Board of Education,* 349 U.S. 294, 299–300; *United States* v. *Montgomery County Board of Education,* 395 U.S. 225; *Green* v. *County School Board,* 391 U.S. 430, 438 n. 4, 439, 442 n. 6; *Griffin* v. *School Board,* 377 U.S. 218, 232–234; cf. *Carter* v. *Jury Commission,* 396 U.S. 320, 336–337; *Turner* v. *Fouche,* 396 U.S. 346, 355. Indeed, this Court has authorized requiring implementation of educator-devised desegregation plans although recognizing that the particular plans were not the exclusive means of satis-

fying constitutional mandates. *Alexander* v. *Holmes County Board of Education*, 396 U.S. 19; *Carter* v. *West Feliciana Parish School Board*, 396 U.S. 290. But holding that, "if a school board makes every reasonable effort to integrate the pupils under its control, an intractable remnant of segregation * * * should not void an otherwise exemplary plan for the creation of a unitary school system" (190a), the Fourth Circuit, in effect, remanded the case to determine whether, in view of HEW alternatives,[1] remaining segregation could be eliminated by a more limited use of the available techniques. In its remand, the court of appeals did not direct, as had the district court (116a), that all schools must be majority white. For that reason, the plaintiffs seek review by this Court.

Yet, because of the importance of the question, we think the record in this case should be supplemented before this Court decides the issue. New plans will be filed in the district court by June 30, 1970. It can be anticipated that those submissions will be the subject of an evidentiary hearing held on an expedited basis and will be accorded full consideration by the district court and perhaps also the court of appeals. Those plans, in conjunction with the plans already in the record, will no doubt reflect the full range of possibilities available to desegregate this school district. Ac-

[1] Cf., *e.g.*, *Alexander* v. *Holmes County Board of Education*, *supra*; *Carter* v. *West Feliciana Parish School Board*, *supra*, at 291–293 (Harlan, J., concurring). *Singleton* v. *Jackson Municipal Separate School District*, 419 F. 2d 1211 (C.A. 5) (en banc) (per curiam); *Clark* v. *Board of Education of the Little Rock School District*, No. 19,795 (C.A. 8, May 13, 1970) (en banc).

cordingly, the plans may provide the indispensable context in which to review the Fourth Circuit's rule that "school boards must use all reasonable means to integrate the schools in their jurisdiction" (189a). It would seem inadvisable to resolve the issues of this significant case only in the abstract and without the benefit of a complete record (cf. *Northcross* v. *Board of Education, supra*), and we, therefore, suggest that plenary consideration of the merits of the case by this Court would be premature at this time.

Although we believe, as previously explained, that the court of appeals' order remanding the case for further proceedings in conformity with its opinion was proper, we recognize that the district court's decree constituted one means of accomplishing a unitary school system in the respondent district. Consequently, in accordance with this Court's opinion in *Alexander* v. *Holmes County Board of Education, supra,* that decree might well remain in effect until replaced by a modified decree also establishing a unitary system, even though there appears to be ample time for the formulation of such a modified decree prior to the re-opening of school.

We suggest, therefore, that the petition for a writ of certiorari should be granted, and that the judgment of the court of appeals should be left undisturbed insofar as it remands the case to the district court for further proceedings but that the district court's prior judgment should remain in effect pending those proceedings. In the alternative, if this Court should decide to grant plenary review at this time, we suggest

that it direct the filing with the Clerk of this Court of all plans, pleadings, proceedings, findings of fact, and conclusions of law from the district court.

Respectfully submitted.

ERWIN N. GRISWOLD,
Solicitor General.
JERRIS LEONARD,
Assistant Attorney General.

v.

CHARLOTTE-MECKLENBURG BOARD OF EDUCATION, ET AL., *Respondents*

MOTION FOR LEAVE TO FILE BRIEF AMICI CURIAE IN SUPPORT OF THE MOTION TO ADVANCE AND THE PETITION FOR WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE FOURTH CIRCUIT

The following organizations—the United Negro College Fund, Inc., the National Urban Coalition, the League of Women Voters of the United States, the League of Women Voters of the State of North

Carolina, and the League of Women Voters of Charlotte-Mecklenburg, North Carolina, the Mississippi Educational Resources Center, the Harvard Center for Law and Education, and the Washington Research Project of the Southern Center for Studies in Public Policy—hereby move pursuant to Rule 42(3) of the Rules of this Court, for leave to file the attached brief *amici curiae* in the above-entitled cause. Petitioners have consented to the filing.[1] Consent has not been granted by the respondents.

The United Negro College Fund, Inc., is an organization consisting of 34 member colleges, all but one of them in the South, which was established in 1943 to raise funds and provide other assistance to member colleges. The Fund and its members have an important and direct interest in assuring that elementary and secondary school students are well prepared for college and thus have a continuing concern about the persistence of segregated public schools.

The National Urban Coalition is an organization whose purpose is to improve opportunities and conditions of life for citizens living in urban areas of the nation. Founded in 1967, it has 47 affiliated local coalitions and representation from corporations, unions, religious, and civil rights organizations. The improvement of educational opportunity is among its prime purposes and to that end it has sponsored educational research and participated as *amicus curiae* in a case involving the equal distribution of educational resources.

---

[1] The written consent of the petitioners has been filed with the Clerk.

The League of Women Voters of the United States, the League of Women Voters of North Carolina, and the League of Women Voters of Charlotte-Mecklenburg, North Carolina, are three organizations with common aims and principles but with independent decision-making powers. Founded in 1920, the national League now has 156,000 members in all 50 states, the District of Columbia, Puerto Rico, and the Virgin Islands. As part of its overall program of encouraging informed and active participation of citizens in government, the national League has placed major emphasis upon the quality of public education and in 1970 reaffirmed its pledge to support efforts to end racial discrimination in education. The North Carolina and Charlotte-Mecklenburg Leagues have conducted studies of the quality of educational opportunity in their respective areas. Like the national League, they are committed to work for equality of opportunity in education.

The Mississippi Educational Resources Center is a private organization established in 1969 to represent professional, parent, and community groups throughout the State of Mississippi. Its membership is predominantly black. Its purpose is to assist communities and school districts in overcoming problems incident to the school desegregation process and to assure that desegregation takes place and in an orderly and positive manner.

The Harvard Center for Law and Education is an educational institution established in 1969 by Harvard University and the United States Office of Economic Opportunity to "promote reform in American education by working in the area of social policy and law." To carry out its aims, the Center has sponsored and

conducted research on various aspects of the educational process. It has also served as *amicus curiae* in several cases involving issues within the area of its expertise.

The Washington Research Project, established in 1968, is a research organization located in Washington, D. C., and affiliated with the Southern Center for Studies in Public Policy of Clark College in Atlanta, Georgia. The principal aim of the project is to assist in the establishment of equality of opportunity for all citizens through negotiation and monitoring of administrative agency programs and litigation. It is deeply concerned with educational issues, particularly with alleviating the continuing effects of racial discrimination in public schools. It has conducted a study of the impact of Federal aid to education programs on minority children and maintains a continuing effort to monitor such programs to ensure that they are conducted without discrimination.

Each of the movant organizations consists of black and white citizens. While their activities vary, all are bound together by a common commitment to strengthen public education in this country and to work for an end to racial segregation in the schools. All of the movant organizations, moreover, share a common commitment to the maintenance of the Rule of Law in this nation. They believe that the Rule of Law is threatened by continuing violations of the rights of Negro school children declared by this Court in 1954.

Movant organizations seek leave to enter this case for the purpose of supporting fully the position of the petitioners. Movants believe, however, that—by virtue of their breadth, their special interest in education and

the scope of their activities in conducting and sponsoring research on issues of education and civil rights and in evaluating the progress of school desegregation under Federal civil rights laws—they are well equipped to inform the Court with respect to issues which may not otherwise be fully explored by the parties. Specifically, movant organizations believe that they can provide information as to the impact that the decision of the court below may have upon the process of school desegregation throughout the nation and as to the educational impact upon children of the various forms of relief that are in issue in this case.

Accordingly, movant organizations respectfully request that the Court grant leave to file the attached brief *amici curiae* and that the Court consider their brief together with the petition for writ of certiorari, the petitioners' motion to advance, and with other papers in the case.

Respectfully submitted,

WILLIAM L. TAYLOR

IN THE

Supreme Court of the United States

OCTOBER TERM, 1969

No. 1713

JAMES E. SWANN, et al., *Petitioners*

v.

CHARLOTTE-MECKLENBURG BOARD OF EDUCATION, ET AL., *Respondents*

BRIEF AMICI CURIAE

for the United Negro College Fund, Inc., the National Urban Coalition, the League of Women Voters of the United States, the League of Women Voters of the State of North Carolina, the League of Women Voters of Charlotte-Mecklenburg, North Carolina, the Mississippi Educational Resources Center, the Harvard Center for Law and Education and the Washington Research Project of the Southern Center for Studies in Public Policy.

I.

INTEREST OF AMICI

Amici, as is more fully set forth in the Motion for Leave to File a Brief Amici, are all organizations with a deep interest in maintaining and improving the quality of education available to children of all

races. As a part of this interest, they have all committed themselves to work for the elimination of racial segregation and other forms of discrimination in education.

Several amici have conducted or sponsored research on problems of establishing equal educational opportunity. Others have supported and appeared in litigation involving the public schools and discrimination. Still others have undertaken to work for the full and fair enforcement of civil rights laws by Executive departments and agencies of the Federal Government.

All have a commitment to the maintenance of the Rule of Law and a deep concern about the continuing denial of constitutional rights of black school children.

II.

SUMMARY OF ARGUMENT

This is a case of crucial importance. Only a prompt hearing and disposition of the case can prevent harm from being done to thousands of black students in many areas of the nation. Unless such action is taken, when schools open in the fall these students will be assigned to segregated schools pursuant to the erroneous decision of the court below.

The refusal of the court below to sustain a workable plan for desegregating the schools of Charlotte-Mecklenburg denied the constitutional rights of petitioners. The ruling conflicts with the decision of this Court in *Brown* v. *Board of Education* and other cases. In holding that a school board must do only what is "reasonable" rather than what is necessary to desegregate the schools, the court below created a new loophole, one which would allow the rights of many black children

to be indefinitely deferred or denied completely. Even if a "reasonableness" test were permissible, the district court plan was by any standard "reasonable." It promised to remedy the harm now being inflicted on black children in segregated schools without causing harm to any child in the Charlotte-Mecklenburg school system. The alternatives to desegregation suggested by the court below would allow harm to continue to be inflicted on petitioners.

III.

ARGUMENT

A. This case must be expedited to prevent irreparable harm to petitioners and to thousands of black children in other school districts.

The holding of the court below violates the rights of petitioners and requires the earliest reversal in order to prevent the assignment of thousands of black children this fall to segregated schools in violation of the Fourteenth Amendment. Expedited action by this Court is essential to avoid massive confusion and inconsistency among desegregating districts and among various agencies enforcing school desegregation as to standards permissible under the Fourteenth Amendment.

Three times since *Brown* v. *Board of Education,* 347 U.S. 483, this Court advanced hearings or otherwise accelerated disposition of school desegregation cases to prevent circumvention or delay in vindicating the constitutional rights of black school children. *Aaron* v. *Cooper,* 358 U.S. 27; *Alexander* v. *Holmes County Board of Education,* 396 U.S. 19; *Carter* v. *W. Felici-*

ana Parish School Board, 396 U.S. 290.[1] Amici submit that the instant case is of equal importance and warrants the earliest possible decision to avoid still further delay of a desegregated education to black school children denied rights over sixteen years.

The "reasonable means" test promulgated by the court below permits school boards to continue to assign black children to all-black, or virtually all-black, schools even where it is undisputed that such segregation resulted from official public action. Such a test portends grave consequences for school desegregation this fall and hereafter. We agree with Judge Sobeloff that:

> "Handed a new litigable issue—the so-called reasonableness of a proposed plan—school boards can be expected to exploit it to the hilt. The concept is highly susceptible to delaying tactics in the courts. Everyone can advance a different opinion of what is reasonable. Thus, rarely would it be possible to make expeditious disposition of a board's claim that its segregated system is not 'reasonably' eradicable." (Plaintiffs' App., at p. 212a)

That this new rule of reasonableness is nothing more than a "new loophole" and "catapults us back" to a time when "good-faith" rather than concrete desegregation was considered the appropriate test of compli-

---

[1] In *Aaron* v. *Cooper, supra,* it was necessary for the Court to convene a Special Term during the summer recess to hear and decide the case. Other cases in which hearings have been advanced under Rule 43(4) include *United Steel Workers* v. *United States,* 361 U.S. 878; *Hannah* v. *Larche,* 361 U.S. 910, 363 U.S. 420; *Power Authority* v. *Tuscarora Indian Nation,* 360 U.S. 915, 361 U.S. 892, 362 U.S. 99; *Lurk* v. *United States,* 365 U.S. 832, 366 U.S. 712; *Katzenbach* v. *McClung,* 379 U.S. 294; *Williams* v. *Rhodes,* 393 U.S. 23.

ance seems clear (p. 213a). And to permit this decision to stand will undercut the slow progress already made, will result in further litigation and confusion, and will delay still more the endlessly delayed rights of thousands of black children to a desegregated education now. We can think of little that is "reasonable" in denying or delaying complete desegregation after sixteen years.

Hundreds of school desegregation cases are now pending in various stages of negotiation and enforcement proceedings at the Department of Health, Education and Welfare (hereinafter HEW) and in the courts.[2] The United States, which urged a position similar to that adopted by the court below, can be expected to urge similar positions in its administrative proceedings and has already begun to do so.

Several of these pending administrative cases illustrate the importance of early consideration and reversal by this Court. In Richland School District, Columbia, South Carolina,[3] HEW considered desegregation plans

[2] As of May 28, 1970, 205 school districts were involved in HEW compliance proceedings, 61 of which had undergone fund cutoffs for noncompliance. [These were all cases exclusive of those pending in the courts.] Forty-two involved districts which had received a notice of intention to initiate formal enforcement procedures; hearings had been conducted in 37 cases; in 12 a decision of noncompliance had been rendered following a hearing or default proceeding; 32 districts had an appeal pending before a reviewing authority; 19 districts had been found not to be in compliance by the reviewing authority; one had a report of the final decision filed with Congressional committees (61 had completed Title VI appeal procedures and had had their funds terminated in previous years). In addition to these 205 cases, at least 80 others were in pre-enforcement negotiations.

[3] HEW Docket No. CR 589.

for a district of 40,122 pupils, 53.3 percent of them white and 46.7 percent black. The Reviewing Authority decision of February 25, 1970, reversed a determination of the hearing examiner approving the plan filed by the school board, pointing out that there were available alternatives that were more effective. On June 5, 1970, after the decision by the court below, the Director of HEW's Office for Civil Rights reversed the Reviewing Authority and reinstated the school board's plan, which permitted 15 of the 43 elementary schools to remain more than 80 percent black and 11 schools to remain more than 80 percent white. While these segregated schools could have been eliminated by some busing, the approved school board plan excluded busing except in a few cases to relieve overcrowding.

There is grave danger of similar results being reached in other cases. A Title IV plan was submitted March 24, 1969, in Newport News, Virginia,[4] for a district of 31,138 students, 64 percent white and 36 percent black. The plan, involving pairing of schools, would have reduced the proportion of black students at two virtually all-black high schools and two virtually all-black junior high schools to 50 percent at each high school and 48 percent and 55 percent at the two junior high schools. The school board objected that the plan required "involuntary" busing and was therefore "unreasonable." The case is now pending before the HEW Reviewing Authority where, as matters now stand, it is likely to be decided under the broad "reasonableness" standard in the instant case.

In Raleigh, North Carolina,[5] a recent decision of the

---

[4] HEW Docket No. CR 669.

[5] HEW Docket No. CR 612.

Reviewing Authority refused to accept a plan which provided no busing and under which only 22 percent of the black students attended integrated schools. This decision is now subject to challenge on grounds that alternative plans involving busing would be "unreasonable." The Austin, Texas[6] school district serves 52,724 students, 65 percent white, 19 percent Mexican-American, and 16 percent black. Of the 70 schools in operation, 9 are more than 94 percent black. HEW's Title IV plan permits four elementary schools to continue a combined black and Mexican-American population of more than 94 percent. The government's brief in the HEW proceeding, at p. 8, stated that "the [Title IV] team operated under guidelines which prevented them from making any recommendations which would require busing across town in order to desegregate the Negro schools." This case is now pending before a hearing examiner and in present circumstances may well be influenced by the decision in Charlotte-Mecklenburg.

The decision of the court below is also likely to influence pending judicial proceedings. In *Beckett* v. *School Board of Norfolk,* 308 F. Supp. 1274 (E.D. Va. 1969) an appeal has been taken from a decision permitting the continuation of a substantial number of all-black schools. In oral argument before the Fourth Circuit sitting *en banc* on June 5, 1970, attorneys for the United States stated that in light of the "reasonable means" test in Charlotte-Mecklenburg, the government would no longer insist on the plan for desegregation it had previously urged.

While amici do not wish to prejudge the outcome of these cases, we cannot ignore the already clear im-

[6] HEW Docket No. CR 902.

pact of Charlotte-Mecklenburg on these other pending cases, and on the rights of black children in those districts.

If, as we believe, the "reasonable means" standard is unconstitutional, this will mean that as long as the decision stands unreversed, plans will be approved that unconstitutionally assign many thousands of black children to segregated schools. And if such plans are put into effect in the fall it will undoubtedly require all or the greater part of the school year 1970-1971 or longer to undo the harm done.

B. The refusal of the court below to sustain a district court decision eliminating segregated schools denied petitioners their constitutional rights.

1. The decision of the court below that school boards may lawfully continue to operate *de jure* segregated schools indefinitely conflicts with previous decisions of this Court.

This is not a case of *de facto* segregation. This is a case of segregated public schools continuing sixteen years after *Brown, supra,* directly as a result of discriminatory governmental action.[7] This is a case where it is possible to completely disestablish segregated

---

[7] The district court found that segregation in the public schools resulted from policies of the respondent school board and other governmental officials who helped establish patterns of residential segregation. The policies of school officials included the selection of school sites in a manner which perpetuated racial segregation. Actions of other government officials included judicial enforcement of racially restrictive covenants until ruled unconstitutional in *Shelley* v. *Kraemer,* 334 U.S. 1, discriminatory implementation of zoning ordinances in white and black residential areas, and discriminatory relocation of citizens through urban renewal programs. (pp. 13a-14a, 86a-87a)

schools and provide every school child a desegregated education.[8]

Despite these clear facts and the circuit court's explicit adoption of the findings of the district court of these facts, it nevertheless concludes "that not every school in a unitary system need be integrated" (p. 189a). This is in patent error and violates standards for school desegregation established by this Court in *Green* v. *County School Board of New Kent County, Va.*, 391 U.S. 430, 437-38 (1968), where this Court unanimously declared that school boards were "clearly charged with the affirmative duty to take *whatever steps may be necessary* to convert to a unitary system in which racial discrimination would be eliminated root and branch" (emphasis added). See also *United States* v. *Montgomery County Board of Education*, 395 U.S. 225, 230 (1969). Both cases expressed a concern that no schools be racially identifiable.[9]

The holding of the court below cannot be squared with these decisions.

---

[8] The opinion of the court below indicates that the plan prepared by Dr. Finger, an expert appointed by the district court, and which was adopted by the district court would eliminate all segregated schools. Judge Sobeloff found that:

> "The plan ordered by the district court works. It does the job of desegregating the schools completely . . . The point has been perceived by the counsel for the Board, who have candidly informed us that if the job must be done then the Finger plan is the way to do it." (p. 204a)

[9] And in *Alexander* v. *Holmes County Board of Education*, 396 U.S. 19 (1969), this Court stated bluntly:

> "Under explicit holdings of this Court the obligation of every school district is to terminate dual school systems at once and to operate now and hereafter *only unitary schools*" (emphasis added).

2. The constitutional rights of petitioners cannot be conditioned upon a "reasonable means test."

We can conceive of little, if anything, that is "reasonable," which after sixteen years denies or further delays the Fourteenth Amendment rights of black school children. Nor can we square the rights of each individual black child to a desegregated education with a result that leaves some of them—be it 100 or 10,000—in segregated black schools under a guise of reasonableness. As to them, is the Constitution not to apply?

This "rule of reason" contravenes the mandate in *Green, supra,* that imposes upon school boards the duty to take whatever steps are necessary to establish a unitary system eliminating racial discrimination *"root and branch,"* 391 U.S. 430, 438 (emphasis added). There were no qualifications placed on this mandate. It is no excuse that "vindication of these rights was rendered difficult or impossible by actions of other state officials," *Cooper* v. *Aaron,* 358 U.S. 1, 16. And, indeed, the discriminatory action of other government officials does not prevent the school board from fulfilling its duties under *Green.*

We have had "all deliberate speed" and "good faith" for sixteen years. These doctrines have been used by school boards to evade, delay and deny black children constitutional rights.[10] To be faced in 1970 with a

---

[10] Indeed, this Court formally disapproved the standard of "all deliberate speed" in *Alexander* for precisely this reason. *Cf.* the opinion of Mr. Justice Black on application to vacate the 5th Circuit's order in *Alexander,* 90 S.Ct. 14 (1969):

> " 'All deliberate speed' has turned out to be only a soft euphemism for delay."

Earlier in his opinion, he stressed the danger of the vagueness in such a standard:

new and undefined doctrine of "reasonableness" can only portend another decade of litigation, evasion, delay and denial of vital rights protected by the Constitution. This is impermissible where such important rights are at stake.

The court below mistakes the duty of the school board and offers the board such broad discretion as to violate Fourteenth Amendment rights. In its only effort to supply a standard for the doctrine of reasonableness, the court said:

> "The board should view busing for integration in the light that it views busing for other legitimate improvements, such as school consolidation and the location of new schools" (p. 194a).

This is clearly erroneous. The demands of the Constitution cannot be relegated to the same level as other educational improvements which, while desirable, are not constitutionally required.

> "Federal courts have ever since [*Brown II*] struggled with the phrase 'all deliberate speed.' Unfortunately this struggle has not eliminated dual school systems, and I am of the opinion that so long as that phrase is a relevant factor they will never be eliminated."

Id.

It is instructive that these opinions were written in 1969. As early as 1964, this Court had disapproved the phrase:

> "The time for mere 'deliberate speed' has run out, and that phrase can no longer justify denying these Prince Edward school children their constitutional rights to an education equal to that afforded by the public schools in the other parts of Virginia."

Griffin v. *County School Board of Prince Edward County*, 377 U.S. 218, 234 (1964). In 1968, this Court stated again, in *Green*, 391 U. S. at 438, that "[t]he time for mere 'deliberate speed' has run out."

3. Even if the Constitution permits a "reasonable means" test, the court below erred in rejecting as unreasonable a sound desegregation plan approved by the district court and adopting a plan perpetuating segregated schools.

This is not a case involving arbitrary and unreasonable action by a district court. This is not a case involving a hastily drafted or ineffective desegregation plan but one developed by the district court after much deliberation with the help of an expert in consultation with the school board. This is not a case of a school district unable to comply with the district court's plan. Nowhere is this contended. This is a case where the school district has had every possible opportunity to comply with *Brown, supra,* and *Green, supra.* This is a case where the school district took no action to desegregate between 1954 and 1965, took in adequate action in 1965 and then in 1969 and 1970 failed to submit an acceptable plan after ten months and four opportunities to do so (ftn. 9, p. 213a). This is a case of a school board seeking to do the minimum to comply when alternative and more effective means exist to fully and constitutionally comply with this Court's mandates.

We believe that the constitutional duty of a school board is not simply to use "reasonable means" but to do whatever is necessary to convert a dual school system into a unitary one. But, assuming *arguendo,* that it was not inappropriate for the court below to employ such a standard, the judgment requires reversal because (a) the plan approved by the district court did not exceed the bounds of "reasonableness" and (b) respondents did not meet the burden of proof required

of a school board that seeks to overturn an effective school desegregation plan.

a. Under the school board's plan, more than half of the black elementary school students in Charlotte-Mecklenburg would be assigned to schools 86 per cent to 100 per cent black and about half of the white elementary school students would be assigned to schools 86 per cent to 100 per cent white. Under the district court's plan, the racial composition of all elementary schools would range from 9 per cent to 38 per cent black (p. 191a). The court-approved plan required busing of 13,300 additional students, 8,000 more than under the school board's plan (p. 191a).

To conclude properly that the court-approved plan was "unreasonable" the court below would have to show more harm to black and white children as a result of busing than that suffered by black children who would otherwise remain in segregated schools. In fact, the court was not able to find that children would suffer *any* harm as a result of busing.

Instead, the court below attempted to judge the approved plan in light of factors which it did not relate to impact upon school children, e.g., the amount of busing, its cost in relation to the board's resources, the age of the pupils involved and distance and time (p. 194a). But here, "unreasonableness" is not shown with respect to any of these factors. Judge Sobeloff concluded that "distance and time will be comparatively short, the effect on traffic is undemonstrated, the incremental cost is marginal" (p. 210a).[11]

---

[11] The 13,300 additional children to be bused when added to the 23,600 already bused would mean total busing of 47 per cent of the school population, far less than the 55 per cent average proportion

In sum, the record makes no showing that the busing under the district court's plan is unreasonable in light of national, state, or local practices of busing or will harm pupils in any way. Nor does the record show undue burden to the school board in implementing the district court's plan.

b. In *Green,* this Court held that the availability of a plan that promises to be more effective than another plan "places a heavy burden upon the board to explain its preference for an apparently less effective method." 391 U.S. at 439. And in *Montgomery County,* 395 U.S. 225 (1969), and *Carter* v. *W. Feliciana Parish School Board,* 396 U.S. 290 (1970), this Court reversed decisions by courts of appeals which had imposed desegregation requirements which were less stringent than

---

of pupils now being bused to schools in North Carolina (p. 211a).

The court below accepted the findings of the district court as to transportation costs which, as Judge Winter pointed out in his dissent, would amount to less than 1.2 per cent of the respondent board's total budget when operating and capital costs are combined (p. 221a). In fact, the district court's estimate of 138 buses required under its plan was also adopted by the court below (pp. 191a, 194a) and exceeded the school board's estimate of 104. The average one-way trip for elementary students bused under the court-approved plan would be less than seven miles and 35 minutes (p. 207a), compared with an average one-way trip of 15 miles and one hour and fourteen minutes for students now being bused in Charlotte-Mecklenburg (p. 207a) and an average roundtrip of 24 miles for all students now bused in North Carolina (p. 194a). The court below made no findings as to the age of children to be bused or as to the impact upon traffic but it appears from the record that substantial numbers of elementary school students are already being bused in Charlotte-Mecklenburg (pp. 210a-211a) and that the possibility that the court-approved plan would cause a problem of traffic congestion is negligible (pp. 206a-207a).

those in plans available.[12] And in *Carter,* Mr. Justice Harlan, in a concurring opinion joined by Mr. Justice White, stated that school districts must demonstrate "beyond question" the unworkability of an effect proposal, 396 U.S. 290, 292. In addition, while the court below properly limited its power of review to factual questions it found "clearly erroneous" (p. 194a), it improperly rejected the district court's determination as to the burden of compliance. In *Brown II,* 349 U.S. at 299, primary responsibility for implementing school desegregation decrees is placed in the district courts. And recently in *Northcross* v. *Board of Education of Memphis, Tennessee,* 397 U.S. 232, the court of appeals was held in error for substituting its findings for that of the district court as to whether a dual school system had been effectively dismantled when the district court's findings were "supported by substantial evidence."

Under the facts of this case and in light of the District Judge's careful findings supported by the record, and this Court's previous decisions, the court below must be reversed.

C. The harm suffered by black children in segregated schools cannot be vitiated by steps short of integration.

The arguments preceding are sufficient to warrant the granting of the relief sought by petitioners. It is not necessary to argue the harm that will be suffered by the black children in the Charlotte-Mecklenburg school district who under the decision of the court below will

---

[12] In *Montgomery County,* the more effective plan had, as here, been adopted by the district court. In *Alexander* and *Carter,* the U.S. Department of Health, Education and Welfare had prepared the plans.

continue to attend segregated schools. That issue w
settled in *Brown* v. *Board of Education,* 347 U.S. 4
494 where this Court concluded:

> "To separate them [Negro children in grade a
> high school] from others of similar age and qua
> fications solely because of their race generates
> feeling of inferiority as to their status in the co
> munity that may affect their hearts and minds
> a way unlikely ever to be undone."

The court below did not dispute the applicability
this conclusion in *Brown* to the instant case, and
deed in upholding the determination of the distr
court that the segregation was of a *de jure* charac
it implicitly acknowledged that the findings of *Bro*
applied here. Nevertheless, the court strongly impli
that the harm suffered by the black children in seg
gated schools could be vitiated by remedies other th
total desegregation. Specifically, the court reco
mended that the defendants (1) employ "spec
classes, functions and programs on an integrate
basis, and (2) ensure "that pupils who are assigned
black schools for a portion of their school careers" a
assigned to integrated schools as they progress to high
grades.[13]

There was, however, no evidence to support a co
clusion that either of these steps, whether taken sing
or together, will prevent or undo the harm that bla
children suffer in segregated schools. In fact, ava

---

[13] The only other alternative suggested by the court was a
jority to minority transfer plan which allowed free volunt
transfer of blacks "to any school in which their race is a mino
if space is available." An identical provision had not worked
fore in Charlotte-Mecklenburg, and there is no reason to believ
can now have any meaningful impact.

able research on this issue leads to a contrary conclusion—that black children will continue to suffer harm so long as they are assigned to segregated schools, even if they are permitted to participate in special interracial programs and even if part of their educational experience is in integrated schools.

The fashioning of special programs, functions and classes conducted on an integrated basis for children who attend segregated schools is not a new technique. It has been tried before, usually as an aspect of compensatory programs designed to improve the quality of education for disadvantaged children. Generally, the effort is made to broaden the horizons of poor children by giving them access to activities not ordinarily within their reach—activities such as short-term exchanges of teachers and students between schools and visits and field trips to concerts and museums. In its Report on Racial Isolation in the Public Schools in 1967, the United States Commission on Civil Rights examined the results of compensatory programs and concluded that:

> "Evaluations of programs of compensatory education conducted in schools that are isolated by race and social class suggest that these programs have not had lasting effects in improving the achievement of the students. The evidence indicates that Negro children attending desegregated schools that do not have compensatory education programs perform better than Negro children in racially isolated schools with such programs." [14]

A more recent comprehensive report summarizing evaluations of compensatory programs, prepared by the New York State Education Department, reached

---

[14] Racial Isolation in the Public Schools (1967) at 205.

similar conclusions. It found that the programs "failed to show any real promise in reducing the intellectual and achievement deficits of disadvantaged children" and that in contrast comparative studies "showed integration to be superior." [15] Indeed, temporary or *ad hoc* arrangements to provide some interracial contact between students attending segregated schools may even have a counterproductive effect. The U.S. Civil Rights Commission Report noted:

> "Indeed, in one community the Commission was told that the contrasts afforded by inter-school trips between white and Negro students under compensatory programs heightened the sense of inferiority felt by the Negro students." [16]

The second alternative step put forward by the court below is the assurance that children who are assigned to segregated schools will attend integrated schools at some point in their career. In practice this means that the substantial number of black children who would attend segregated elementary schools (more than half of all black children under the respondents' plan) would then go on to integrated junior and senior high schools. Black students who attend the segregated junior high schools presumably would be assured an integrated high school experience.

It is clear, however, that the harm inflicted upon Negro children in segregated elementary schools is not undone by providing integrated schooling later on. In its Racial Isolation Report, the U.S. Commission on

---

[15] Racial and Social Class Isolation in the Schools, A Report to the Board of Regents of the University of the State of New York (1969) at 374.

[16] Racial Isolation in the Public Schools (1967) at 138.

Civil Rights examined the cumulative effects of segregation and desegregation upon student attitudes and achievement. Employing data compiled by a major survey conducted by the United States Office of Education, the report noted that the average grade-level performance for 9th grade Negro students was consistently higher when their earliest grade of attendance in desegregated schools was the 1st, 2nd or 3rd grade than when it was later.[17] The Commission concluded:

> "Both the academic performance and attitudes of Negro students, then, are affected by the duration of their school contact with whites. Students whose first contact with whites was late in elementary or early in secondary schools are at a distinct disadvantage when compared with Negroes who have had school contact with whites since the early grades."[18]

The fact that all of the available research demonstrates that the alternative steps proposed by the court will not undo the harm caused by segregation underscores the incorrectness of its decision and the danger to black children in the adoption of loose standards of "reasonableness" that permit something less than prompt and complete compliance.

---

[17] Racial Isolation in the Public Schools (1967) at 106-108. The Office of Education survey itself made a similar finding—that pupils who first entered integrated schools in the early grades recorded consistently higher scores than other groups. Office of Education, U. S. Department of Health, Education and Welfare, Equality of Educational Opportunity (1966) at 20, 32.

[18] Racial Isolation in the Public Schools at 108.

IV.

CONCLUSION

Prompt action is needed in this case if irreparable harm is not to be inflicted on petitioners and thousands of other black children. The decision below cannot stand because it allows school boards to continue to segregate schools merely because an effective remedy might cause some burden or inconvenience.

It would be tragic irony, if, after years of massive resistance, evasion, and delay the rights of black children were now denied or further delayed on grounds that ending segregation is "unreasonable."

Amici believe that under the authority of *Alexander* v. *Holmes County Board of Education,* 396 U.S. 19, a stay of the order of the Court below would be appropriate relief. But neither a stay nor the injunction *pendente lite* sought by petitioners would be an adequate substitute for an expedited hearing and disposition of the case. Only a prompt decision of this case on the merits can avert harm to thousands of black children in other districts.

Accordingly, amici urge that the Court grant the petition for writ of certiorari, and petitioners' motion to advance during the current term or if need be during such special or extended terms as may be convenient.

MOTION OF THE NATIONAL EDUCATION ASSOCIATION FOR LEAVE TO FILE BRIEF AMICUS CURIAE IN SUPPORT OF THE PETITION FOR A WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE FOURTH CIRCUIT

The National Education Association hereby moves, pursuant to Rule 42 of the Rules of the Supreme Court, for leave to file the attached brief *amicus curiae* in support of the petition for writ of certiorari filed June 18, 1970, in behalf of James E. Swann, et al., in the above-entitled cause. Consent to the filing of the brief has been sought from the petitioners and from the Charlotte-Mecklenburg Board of Education and members thereof, respondents. Petitioners have consented.[1] No response has been received to date to the requests made of the Charlotte-Mecklenburg Board of Education and the members of the Board.

---

[1]The written consent of the petitioners has been filed with the Clerk.

The National Education Association (hereinafter NEA) is an independent, voluntary organization of educators open to all professional teachers, supervisors and administrators. It presently has over one million regular members, and is the largest professional organization in the world. NEA was first organized in 1857 and was chartered by a special act of Congress in 1906. Its statutory purpose is (34 Stat. 805)–

> to elevate the character and advance the interests of the profession of teaching and to promote the cause of education in the United States.

The overall policies of NEA are determined by its Representative Assembly, a body composed of approximately 7,000 delegates representing affiliated local and state education associations.

NEA has conducted detailed studies of the educational implications of the maintenance of dual school systems based upon race. It has long been committed to the principle that racial segregation in education adversely affects the quality of the education received by both black and white students. Reflecting this position, the Representative Assembly at the June 1969 Convention adopted a formal continuing resolution providing, in part (NEA Handbook 1969-70, p. 66):

> The Association endorses the decision of the U.S. Supreme Court in Brown v. Board of Education and urges compliance with subsequent federal laws and regulations in this area . . . .

On March 20, 1970, the Executive Committee of the Association adopted a more specific resolution on desegregation in the public schools and recommended it to the Board of Directors and the 1970 Representative Assembly:

> The NEA believes it is imperative that desegregation of the nation's schools be effective. Policies and guideline statements for school desegregation in all parts of the nation must be strengthened and must comply with *Brown v. Board of Education* and subsequent judicial decisions and with civil rights legislation and decisions.

> The Association recognizes that acceptable desegregation plans will include a variety of devices such as geographic realignment, pairing of schools, grade pairing and satellite schools. These arrangements often require that some students be bussed in order to implement desegregation plans which comply with established guidelines adhering to the letter and spirit of the law.

It has long been settled that complete disestablishment of formerly *de jure* segregated school systems is required by the Constitution. This case presents to the court important issues concerning the meaning of a school board's responsibility to convert from a dual to a unitary school system and the steps which it may be required to take to accomplish that conversion. As the principal association of educators in this country, NEA can draw upon a breadth of experience to inform the court as to the reasonableness of the requirements for desegregation framed by the district court's order of February 5, 1970, when judged from the standpoint of educational considerations as well as the practices and expenditures of other school systems. Pursuant to leave granted by the court of appeals, NEA filed a brief *amicus curiae* in the proceedings below (see, *e.g.*, Appendix to Petition for Certiorari, pp. 194a, 211a) and, upon invitation, presented oral argument.[2]

Accordingly, the National Education Association respectfully requests that this Court grant leave to file the attached

---

[2]The NEA and its State associations have participated as *amicus curiae* in other major proceedings involving issues of education and race. See *Alexander v. Holmes County Board of Education*, 396 U.S. 19 (1969); *Carter v. West Feliciana Parish School Board*, No. 29745 (5th Cir. 1970); *Smuck v. Hobson*, 408 F.2d 175 (D.C. Cir. 1969); *Lee v. Macon County Board of Education*, 283 F. Supp. 194 (M.D. Ala. 1968).

brief *amicus curiae* in support of the petition for a writ of certiorari to the Court of Appeals for the Fourth Circuit.

BRIEF
AS AM
A WRI FOR THE NATIONAL EDUCATION ASSOCIATION
OF AMICUS CURIAE IN SUPPORT OF THE PETITION FOR
IT OF CERTIORARI TO THE UNITED STATES COURT
PEALS FOR THE FOURTH CIRCUIT

INTEREST OF THE NATIONAL EDUCATION ASSOCIATION

The N lational Education Association (hereinafter NEA) is an indep
cators. supervis endent, voluntary organization of professional edu-
Charter, t has over one million members, including teachers,
the interns, and administrators. As stated in the Association
cause of its purpose is "to elevate the character and advance
and its ests of the profession of teachers and to promote the
cation re education in the United States." Both the NEA
the deci embers have a deep interest in the quality of edu-
347 U.S. ceived by the children of all races. NEA endorses
segregati ion of this Court in *Brown v. Board of Education*,
tive. In 483 (1954), and considers it imperative that de-
conduct n of the nation's schools be complete and effec-
tion in pursuit of these purposes NEA has recently
d investigations of the problems of race and educa-
he school systems of Wilcox County, Alabama;

Baltimore, Maryland; some 22 counties in Louisiana; Detroit, Michigan; some 30 counties in Mississippi; Hyde County, North Carolina; and the region of East Texas. NEA has also participated in several school desegregation cases, including the appeal proceedings before the Fourth Circuit in the instant case, and in numerous others has actively supported efforts to secure judicial relief.

STATEMENT

1. **Description of the Charlotte-Mecklenburg School System.** The Charlotte-Mecklenburg School System is the forty-third largest in the United States, educating more than 84,500 pupils in 106 schools, including 76 elementary schools, 20 junior high schools, and 10 senior high schools. While the system covers the county's 550 square miles, over 50,000 of the students reside within the City of Charlotte. (Appendix to Petition for Certiorari, pp. 9a-10a, 18a, 85a-86a, 123a.)[1] The 1969-70 budget was $57,711,344, of which nearly $51,000,000 represented operational expenses (139a).[2]

Of the 84,500 students, about 29 percent, or 24,714, are Negro, and about 71 percent, or 59,828, are white (10a, 85a). Approximately 21,000 of the system's 24,714 black students attend schools within the City of Charlotte (57a). The predominant percentage of the system's black students live in a triangular area, four or five miles on a side, in the northwestern quadrant of the city. This area is almost exclusively Negro. (1a, 12a, 14a, 142a-144a.)

2. **History of Desegregation.** The Charlotte-Mecklenburg Board of Education has operated a dual system of schools based upon race (185a). A suit for desegregation was initiated in 1965 (1a), and the district court ordered into effect

---

[1]The Appendix will be cited hereinafter by page number only.

[2]Expenditures for construction of school buildings are not included in these budget figures (139a).

a plan proposed by the School Board based upon geographic zoning with a free transfer provision which was approved by the court of appeals (185a). In September 1968, following the decisions of this Court in *Green v. County School Board of New Kent County*, 391 U.S. 430 (1968), *Raney v. Board of Education*, 391 U.S. 433 (1968), and *Monroe v. Board of Commissioners of the City of Jackson*, 391 U.S. 450 (1968), the petitioners filed a motion for further relief which sought greater speed in desegregation and elimination of other racial inequities (1a). Following a hearing, the district court concluded that the "manner in which the Board has located schools and operated the pupil assignment system has continued and in some situations accentuated patterns of racial segregation in housing, school attendance, and community development" (28a); that the Board has created or controlled school zones so as to promote segregation of black students (54a); and that the Board has an affirmative duty to promote faculty desegregation and desegregation of pupils, and to deal with the problem of the all-black schools (29a). The district court ordered the Board to submit by May 15, 1969, a plan for complete desegregation of teachers to be effective with the 1969-70 school year, and for desegregation of pupils to be predominantly effective in the fall of 1969 and to be completed by the fall of 1970 (30a, 31a).

Pursuant to this and subsequent orders of the district court, the Board submitted two plans, neither of which was considered adequate by the court (51a, 55a, 68a, 69a). On August 15, 1969, because of the shortness of time before the opening of school, the district court approved an interim plan for the 1969-70 school year and directed the Board to present, on November 17, 1969, a plan for complete faculty and student desegregation for 1970-71 (70a-71a). The 1969-70 plan proposed to close seven black inner-city schools and to transfer their 3,000 students to suburban schools, all but one of which were white (83a). It also proposed to transfer 1,245 black students from eight over-crowded black or predominantly black schools to white suburban schools (64a, 83a). The Board, however,

did not carry out the plan (83a). Only 1,315 of the promised 4,245 black students were transferred to white schools (84a).

The Board's November 17, 1969 plan was disapproved by the district court which found that "it contains no promise nor likelihood of desegregating the schools" (93a). Among other provisions, the plan provided that no white students would be assigned to schools with less than 60 percent whites; and that where schools were to be desegrated, the ratio of black to white students would not exceed 60 percent white–40 percent black (94a-95a). Seven all-black elementary schools were to remain that way (94a).

The district court thereupon designated a consultant to prepare a desegregation plan in accordance with nineteen principles drawn from the decisions of this Court and the lower federal courts and set forth in the opinion and order (103a-108a). The court invited the Board to submit a further plan of its own (110a-111a).

3. The Desegregation Plan Ordered by the District Court on February 5, 1970. Reviewing the results of almost four and one-half years of court-ordered desegregation, the district court found in November 1969 that the Charlotte-Mecklenburg schools "are still in major part segregated or 'dual' rather than desegregated or 'unitary' " (86a). "Of 24,714 Negro students, something above 8,500 are attending 'white' schools or schools not readily identifiable by race"; 13,945 were still in 90-100 percent black schools;[3] and 9,216 of these were in 100 percent black schools. Of 59,828 white students, over 45,000 were attending schools which were 86-100 percent white (85a-86a). Ninety-eight of the 106 schools in the System continued to be "readily and obviously identifiable by the race of the heavy majority of their faculties" (84a).

---

[3]The court found that more than 16,000 black students were attending schools which were between 56 percent and 100 percent black (85a).

The district court found that these student assignment patterns reflected the segregation of Mecklenburg County's residential areas (86a). This segregation, it said, "is the result of a varied group of elements of public and private action, all deriving their basic strength originally from the public law or state or local governmental action. These elements include among others the legal separation of the races in schools, school buses, public accommodations and housing; racial restrictions in deeds to land; zoning ordinances; city planning; urban renewal; location of public low rent housing; and the actions of the present School Board and others, before and since 1954, in locating and controlling the capacity of schools so that there would usually be black schools handy to black neighborhoods and white schools for white neighborhoods" (86a-87a; see also 12a-14a). Based upon these findings, the district court ruled, "[t]here is so much state action embedded in and shaping these events that the resulting segregation is not innocent or '*de facto*,' and the resulting schools are not 'unitary' or desegregated" (87a).

Faced with these conditions, the district court, on February 5, 1970, framed a desegregation plan using, where it could, portions of the plan submitted by the School Board (see 119a-121a). The court held that an acceptable plan would have to be consistent with sixteen requirements set forth in the order (117a). Some of the requirements were expressed in mandatory terms, such as number five "[t]hat no black school be operated with an all-black or predominantly black student body." Others, although framed as requirements, were drawn to allow leeway for practical considerations incident to the operation of the school system. These included number six calling for the assignment of pupils so that "as nearly as practicable the various schools at various grade levels have about the same proportion of black and white students," and number seven providing that transportation be offered on a uniform non-racial basis to children who live farther from the school to which they are assigned "than the Board determines to be walking distance."

The district court then approved a desegregation plan in four separate parts, one each for the senior high schools, for the junior high schools, for 27 elementary schools for which new zones were defined, and for 34 elementary schools which were paired and assigned noncontiguous zones. For the senior high schools, the court approved a zoning plan submitted by the Board which integrated nine of the system's ten schools with percentages of black students ranging from 17 percent to 36 percent. The court ordered one modification: it required that 300 pupils be transported from the black residential area of the city to the Independence School which would have been 2 percent black and under-capacity under the Board's plan (190a, 123a).

The court disapproved the Board's rezoning plan for the junior high schools because it left the Piedmont School 90 percent black, and offered the Board various alternatives which would desegregate all the junior high schools. The Board chose to adopt the plan proposed by the court's consultant which combined zoning and satellite districts and which left the junior high schools from 9 percent to 33 percent black (125a, 190a-191a).

The Board's plan for the elementary schools was based entirely upon zoning. It would have left more than half the black elementary pupils in nine schools 86 to 100 percent black and would have assigned about one-half the white elementary pupils to schools 86 to 100 percent white (191a). Rejecting that proposal, the court adopted a plan offered by its consultant which drew new zones for 27 schools and paired 34 others, each of which was assigned noncontiguous zones. Approximately 22,400 of the 44,000 elementary pupils would attend the paired schools, 10 of which are in the city and 24 of which are outlying suburban white schools. Children in grades 1-4 from the zones surrounding all 34 schools would attend the 24 suburban schools, while those in grades 5-6 would attend the 10 city schools (133a). The racial make-up of the elementary schools would vary from 3 percent to 41 percent black (129a-131a).

Under the court-approved plan, no schools would remain all-black or predominantly black. The pairing and grouping of schools, as well as rezoning provided for in the plan, would, the court found, add a maximum of 13,300 children who "may conceivably require transportation" to the 23,600 pupils transported daily on school buses and the 5,000 whose fares on public coach lines are paid by the Board (138a, 155a). Of these 13,300 children, 1,500 would be at senior high level, 2,500 at junior high, and 9,300 at elementary school level (155a). One hundred thirty-eight additional buses would be required, 90 for the elementary students (155a). The cost of implementing the plan would be $266,000 for bus operations ($186,000 of this for the elementary school phase) and a one-time expenditure of $745,200 for additional buses ($486,000 for the elementary phase) (156a-157a, 182a, 191a).[4]

4. **The Decision of the Court of Appeals.** The court of appeals, by a vote of four to two, vacated the district court's judgment.[5] The court carefully analyzed and specifically accepted the district court's finding "that residential

---

[4]The district court did not consider the plan immutable. It stated that "the duty imposed by the law and by this order is the desegregation of schools and the maintenance of that condition. The *plans* discussed in this order, whether prepared by Board and staff or by outside consultants, . . . *are illustrations of means or partial means to that end*. [Footnote omitted.] The defendants are encouraged to use their full 'know how' and resources to attain the *results* above described, and thus to achieve the constitutional end by any means at their disposal. The test is not the method or the plan, but the *results*." The court stated its intention "to leave maximum discretion in the Board to choose methods that will accomplish the required result." (118a-119a, 121a.)

[5]Chief Judge Haynsworth and Judge Boreman concurred in an opinion of Judge Butzner. Judge Bryan wrote a separate opinion dissenting in part but joined in voting to vacate the judgment of the district court in accordance with the opinion of Judge Butzner "for the sake of creating a clear majority for the decision to remand" (226a). Judges Sobeloff and Winter concurred in part and dissented in part (201a). Judge Craven disqualified himself (184a).

patterns leading to segregation in the schools resulted in part from federal, state, and local governmental action" (186a). It concluded that "[p]redominantly black schools were the inevitable result" of the School Board's policy of locating schools and fixing their size to fit these segregated residential patterns (186a). The court of appeals recognized that this condition was not unique to Charlotte; that "[s]imilar segregation occurs in many other cities throughout the nation, and constitutional principles dealing with it should be applied nationally" (188a).

The court of appeals then declared three general principles which it would apply to resolve the issues in the case: "first, not every school in a unitary school system need be integrated; second, nevertheless, school boards must use all reasonable means to integrate the schools in their jurisdiction; and third, if black residential areas are so large that not all schools can be integrated by using reasonable means, school boards must take further steps to assure that pupils are not excluded from integrated schools on the basis of race" (189a).[6] It held bussing to be "a permissible tool for achieving integration," but declared that "[i]n determining who should be bussed and where they should be bussed, a school board should take into consideration the age of the pupils, the distance and time required for transportation, the effect on traffic, and the cost in relation to the board's resources" (194a).

Applying these principles, the court of appeals approved the desegregation plan for junior and senior high schools, holding that "it provides a reasonable way of eliminating all segregation in these schools" (195a). The appellate court also affirmed the district court's disapproval of the School Board's elementary plan because it left about one-half of

---

[6]The court identified such "further steps" to include special classes, functions and programs on an integrated basis to be made available to pupils in the black schools, majority to minority transfers with transportation provided, and assignment to an integrated school for a later portion of a black student's career (189a).

both black and white pupils in schools that were nearly completely segregated (197a).[7] However, the court of appeals found the elementary plan approved by the district court unacceptable, holding that "[t]he board . . . should not be required to undertake such extensive additional bussing to discharge its obligation to create a unitary school system" (198a).[8]

REASONS FOR GRANTING THE WRIT

1. **Introduction.** The decision of the Court of Appeals for the Fourth Circuit presents two issues of fundamental importance to the future course of school desegregation. The first issue is whether a school board, in fulfilling its obligations to establish a unitary system, must disestablish the identity of all "black" and "white" schools by reassigning students, and providing transportation where necessary, even though this will require the board to bear financial and other burdens.[9] The second issue, which arises only if this

---

[7]The court of appeals also approved the provisions of the district court's order dealing with faculties (185a).

[8]The court's use of the phrase "such extensive additional bussing" followed a recitation of the following facts: the plan would require transporting 9,300 pupils in 90 additional buses; the greatest portion would involve cross-bussing; the average daily round trip would approximate 15 miles through central city and suburban traffic; the additional elementary pupils would represent an increase of 39 percent over all pupils presently being bussed and would require an increase of about 30 percent in the present fleet of buses; and, when added to the additional bussing required under the junior and senior high plans, the total percentage increases would be: pupils, 56 percent; and buses, 49 percent (198a).

[9]As we show *infra*, pp. 16-17, the true basis of the conclusion of the court of appeals that the elementary school plan was unreasonable had to be the financial cost entailed in purchasing and operating the 90 additional buses required to transport the 9,300 additional children required to be bussed. The reasonableness of the plan judged upon the basis of the other measures referred to by the court of appeals—age of pupils, time and distance required for transportation and effect on traffic—appears clear on this record.

Court should conclude that the constitutional obligation to establish a unitary system may be circumscribed by the costs and other burdens its fulfillment would require a school board to assume, is what standards school boards and district courts should apply in framing acceptable desegregation plans.

As the court itself recognized (186a-187a), the duty of virtually every school board with responsibility for an urbanized area of any size will hinge upon the resolution of these issues. Undoubtedly too, the principle announced by the Fourth Circuit, if allowed to stand, would significantly influence the future course of desegregation of rural systems as well.[10] Thus, the case is truly one of national significance.

2. **The Duty to Disestablish Racially Identifiable Schools.** The court of appeals quite properly affirmed the district court's conclusion that the predominantly black schools in the Charlotte-Mecklenburg system are the "inevitable result" of state action (186a).[11] Having so ruled, the primary question, then, was whether, under the Equal Protection Clause of the Fourteenth Amendment, the School Board was required to reassign students so as to disestablish the racial identity of these schools.

Until this case, it was recognized that the constitutional duty of a school board under such circumstances was to terminate all vestiges of its dual system "at once and to operate now and hereafter only unitary schools." *Alexander v. Holmes County Board of Education*, 396 U.S. 19, 20

---

[10]The considerations on which the duty to disestablish the racial identity of predominantly black schools would depend—cost, for example—(see discussion, *infra*, pp. 16-17) are not unique to urban systems. History teaches that rural systems would urge them as grounds for relief from the constitutional mandate to operate unitary schools. Indeed, the court of appeals suggested that the constitutional principles "should be applied nationally" wherever segregation exists because government policies fostered segregated neighborhood schools (188a).

[11]The findings of the district court and their affirmance by the court of appeals are set forth in the Statement, *supra*, pp. 9, 11-12.

(1969). And a unitary school system had been understood to be one without schools which are racially identifiable by reason of their student bodies, *Green v. County School Board of New Kent County*, 391 U.S. 430 (1968), or their faculties, *United States v. Montgomery County Board of Education*, 395 U.S. 225 (1969). A number of other lower courts, including the Fourth Circuit itself, have interpreted these rulings to bar neighborhood student assignment plans which freeze in the effects of residential segregation resulting from state action.[12] This was the conclusion of the district court which held that an acceptable desegregation plan must provide "[t]hat no school be operated with an all-black or predominantly black student body" (Order of February 5, 1970; 116a).

3. **The Irrelevance of Monetary Costs.** Like the district court, the court of appeals recognized the obligation of the School Board to reassign students to disestablish the racial identity of the schools (189a). However, it held that where "black residential areas are so large that not all the schools

Pasadena City Bd. of Ed., No.* 68-1438-R (C.D. Calif. March 12, 1970); *Keyes v. School District No. 1, Denver*, 303 F. Supp. 279, 289 (D. Colo. 1969), *stay pending appeal granted*, ___ F.2d ___ (10th Cir. No. 432-69, Aug. 27, 1969), *stay vacated*, 396 U.S. 1215; see *Cato v. Parham*, 302 F. Supp. 129 (D. Ark. 1969). In *Brewer v. School Board of City of Norfolk*, 397 F.2d 37, 41-42 (4th Cir. 1968), the court of appeals went further, saying that it is immaterial that the residential patterns are the result of private discrimination: "The school board cannot build its exclusionary attendance areas upon private racial discrimination."

can be integrated by using reasonable means," the school board may leave those schools black.[13] The court, we believe, correctly recognized that "bussing is a permissible tool for achieving integration" (194a). *Kemp v. Beasley*, No. 19782, p. 14 (Slip Op.) (8th Cir. March 17, 1970); *United States v. Jefferson County Board of Education*, 372 F.2d 836, 898 (5th Cir. 1966); *United States v. School District No. 151, Cook County*, 286 F. Supp. 786, 799 (N.D. Ill. 1968), *aff'd*, 404 F.2d 1125 (7th Cir. 1968). It said, however, that in determining the part bussing may reasonably play in a unitary school system "a school board should take into consideration the age of the pupils, the distance and time required for transportation, the effect on traffic, and the cost in relation to the board's resources" (194a).

Viewing the plan for junior and senior high schools against these principles and the background of national, state and local transportation policies, the court found "it provides a reasonable way of eliminating all segregation in these schools" (195a). The court, however, reached the opposite conclusion with respect to the elementary plan. As we now show, a review of the plan against the five measures the court said should be taken into consideration compels the conclusion that the plan was rejected because the court of appeals found the financial cost of the bussing "unreasonable."[14]

Thus, with respect to the measures of time, distance, and traffic, the district court found that the children required to be bussed by its order "will not as a group travel as far,

---

[13]The steps the court indicated the Board might take to satisfy its constitutional duty are set forth, *supra*, p. 12, n. 6.

[14]At the most, the elementary school plan would have entailed an annual expenditure of $186,000 to operate the buses plus a one-time investment of $486,000 for the 90 additional buses (191a). In aggregate, the first-year expense would be just slightly above one percent of the system's annual budget (139a). From this there should be subtracted the value of the improvement in the education available to black children which is significant, although not easily quantifiable in dollars.

nor will they experience more inconvenience than the more than 28,000 children who are already being transported . . ." (143a), and this finding was not disturbed by the court of appeals. The average one-way bus trip per elementary pupil would be seven miles (153a), compared to an average of between 15 and 17 miles per child in the system today (153a, 195a) and 12 to 13 miles under the plan for senior high pupils (195a). The average time would be 35 minutes as against nearly an hour and a quarter today per child in the system (153a).

Insofar as the age of the pupils to be bussed is concerned, the district court found that the plan would require bussing of an additional 9,300 elementary students. This figure is just under 70 percent of the 13,300 additional students of all ages required to be bussed by the plan. Statewide in North Carolina 70.9 percent of all pupils bussed are elementary students (137a).

Thus, the reasonable inference is that cost alone was the basis for the conclusion of the court of appeals that the elementary plan was unreasonable. That this was the sole basis for rejection of the plan is confirmed by the court's statement that "[t]he board . . . should not be required to undertake such extensive additional bussing . . ." (198a).

The court of appeals has thus announced a new constitutional principle governing school desegregation: that the duty to disestablish all racially identifiable schools is a conditional one depending upon the financial costs involved. This principle conflicts with the well considered holdings of this Court which establish that "[t]he obligation of every school district is to terminate dual school systems at once and to operate now and hereafter only unitary schools." *Alexander v. Holmes County Board of Education*, 396 U.S. 19, 20 (1969). In *Green v. County School Board*, 391 U.S. 430, 442 (1968), the Court, adopting the language of the Court of Appeals for the Fifth Circuit, defined a unitary system as "a system without a 'white' school and a 'Negro' school, but just schools."

To date, this Court has never held, or even suggested, that this constitutional mandate may be avoided by showing that performance would entail monetary costs. In *Green*, this Court held that the school board was under an "affirmative duty to take *whatever steps* might be necessary to convert to a unitary system," 391 U.S. at 437-38 (emphasis added).[15] There was no suggestion that a "unitary system" was not a fixed goal established by the Constitution. Indeed, the words chosen by the Court indicated that a unitary system is one "in which racial discrimination would be eliminated root and branch." *Id.*, at 437-38. Under the decision of the court of appeals, the constitutional objective, the unitary system, would vary according to the cost of the steps available to the school board.

The interpretation given the Constitution by the court of appeals cannot withstand analysis: Thus, no State could be heard to justify a denial of a jury trial or due process of law on the grounds that fulfillment of these rights costs too much. The right to equal protection of the laws stands on the same footing. Thus, "[t]he State is forbidden to deny due process of law or the equal protection of the laws for any purpose whatsoever." *Schlesinger v. Wisconsin*, 270 U.S. 230, 240, (1926). Certainly factors such as "convenience and expediency" do not exempt the state or other governmental agencies from the requirements of the Fourteenth Amendment. *Ohio Bell Telephone Company v. Commissioner*, 301 U.S. 292, 305 (1937); *Russell-Newman Manufacturing Company v. National Labor Relations Board*, 370 F.2d 980, 984, (5th Cir. 1967); *Cella v. United States*, 208 F.2d 183, 789 (7th Cir. 1953).[16] The right to equal

---

[15]See *Griffin v. County School Board*, 377 U.S. 218 (1964), where this Court held that a school board may be ordered to spend whatever is necessary to afford the pupils in its jurisdiction desegregated education equal to that being afforded pupils in other systems throughout the State.

[16]The ruling of the court of appeals also seems inconsistent with the well recognized rule that states may not casually deprive a class of individuals of a constitutional right because of some remote admin-

tt v. Painter, supra, 339 U.S. at 635.

constitutional considerations, the unreasonableness of such an alternative is shown by the fact that maximum benefits from desegregated education come only if pupils are assigned to integrated schools at an early age. U.S. Commission on Civil Rights, *Racial Isolation in the Public Schools* 106 204 (1967).

4. The Reasonableness of the District Court's Plan for Desegregation of the Elementary Schools. NEA believes that the Court should reaffirm its ruling in *Green* that the school board is under an "affirmative duty to take whatever steps are necessary to convert to a unitary system," 391 U. S. at 437-438; and that it should reject the suggestion that the duty to disestablish separate schools based upon race may be avoided because its fulfillment will cost money. Such a ruling would dispose of this case.

However, if the court should accept the rule framed by the court of appeals, a significant issue would still remain: the court of appeals purported to apply a "rule of reason," but it did not indicate the standards it applied in reaching the judgment that the "undertakings" incident to the plans for desegregation of the senior and junior high schools were reasonable but those required for the elementary schools were not. In essence, that court struck down the elementary school plan because of the "extensive additional bussing" (198a) it would require, but failed to indicate the criteria it applied in determining how much bussing was too much—and why.[18]

---

[18]Since *Brown v. Board of Education*, 349 U.S. 294 (1955), it has been recognized that the district courts are invested with broad powers to frame relief from racial discrimination in the public schools. Indeed, the Court has declared that the district court not only has the "power" but in fact "the duty to render a decree which will so far as possible eliminate the discriminatory effects of the past as well as bar like discrimination in the future." *Louisiana v. United States*, 380 U.S. 145, 154 (1968), quoted in *Green, supra*, at 438 n.4. In our view, the district court properly fulfilled this duty and did not abuse its discretion in framing the elementary school plan.

School boards and lower federal courts are left at large by the appellate court's ruling. The vast discretion inherent in the rule is an open invitation to circumvent the constitutional right of black children to equal educational opportunity–an invitation which the 16-year history since *Brown* demonstrates is all too likely to receive wide acceptance.[19]

CONCLUSION

From *Brown* to *Alexander*, the question was one of "all deliberate speed"–the timing of transition from separate to equal schools. This case presents the question whether, now that the Court has declared the transition period closed, the constitutional objective itself is to be realized. If the decision below is allowed to stand, it forecasts a host of separate black schools in every urban community which, for the forseeable future, will be impregnable to constitutional attack.

NEA urges the Court to grant the petition for a writ of certiorari filed in behalf of James E. Swann, et al., and to

[19]The decisions In *Kemp v. Beasley*, No. 19072 (8th Cir. March 17, 1970); *United States v. School District No. 151 of Cook County*, 286 F. Supp. 786 (N.D. Ill.), *aff'd*, 404 F.2d 1125 (7th Cir. 1968); *Spangler and United States v. Pasadena City Board of Education*, Civ. No. 68-1438 (M.D. Calif. March 12, 1970); and *Keyes v. School District No. 1, Denver*, 303 F. Supp. 279 (D. Colo. 1969),___ F.2d ___ (10th Cir. No. 432-69, August 27, 1969), 396 U.S. 1215 (1969), indicate that, with the increasing focus on integration of urban schools, the need to make bussing a part of such plans will be increasingly at issue. Paradoxically, while the appellate court's decision creates a wide ambit for the exercise of discretion to limit desegregation, it severely, and NEA believes unwarrantedly, restricts the traditional discretion of the district court to frame a plan which will secure the constitutional objective. Review now by this Court will insure that no such unwarranted restriction survives.

establish an expedited schedule for briefs and argument which will permit a decision at the earliest practicable time.

ARGUMENT—

I. The Public Schools of the Charlotte-Mecklenburg School System Are Racially Segregated in Violation of the Equal Protection Clause of the Fourteenth Amendment as the Result of Governmental Action Causing School Segregation and Residential Segregation 41

A. The Schools Are Organized in a Dual Segregated Pattern 41

B. Governmental Agencies Created Black Schools in Black Neighborhoods by Promoting School Segregation and Residential Segregation 46

II. The District Court Was Correct in Ruling That the Dual Segregated System in Charlotte-Mecklenburg Must Be Disestablished by Reorganizing the System So That No Racially Identifiable Black Schools Remained. The Court of Appeals Erred in Substituting a Less Specific Desegregation Goal 54

A. This Court's Decisions Require Complete School Desegregation 54

B. The Fourth Circuit's New Reasonableness Rule Makes the Goal of Desegregation Less Complete and Specific and Threatens to Undermine *Brown* v. *Board of Education* 58

C. The Goal of Integrating Each School in Charlotte Is Consistent With Federal Statutory and Constitutional Requirements 65

PAGE

III. The District Court Acted Within the Proper Limits of Its Discretion by Ordering a Plan Consistent With the Affirmative Duty to Desegregate the Schools and the Objective of Preventing Resegregation 68

A. The Finger Plan Promises to Establish a Unitary System 68

B. The Court Ordered Plan Is Feasible 69

C. The Finger Plan Utilizes Appropriate Techniques to Achieve Pupil Desegregation 75

D. The Neighborhood School Theory Cannot Be Justified on the Basis of History and Tradition Because It Was Widely Disregarded in Order to Promote Racial Segregation 80

E. The Finger Plan Is Necessary to Accomplish the Constitutional Objective 83

F. The Court of Appeals Applied an Improper Standard for Appellate Review of the District Court's Discretionary Determination in Formulating Equitable Relief 84

CONCLUSION 87

ON WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE FOURTH CIRCUIT

BRIEF FOR PETITIONERS

Opinions Below

The opinions of the courts below are as follows:[1]

1. Opinion and order of April 23, 1969, reported at 300 F. Supp. 1358 (285a).
2. Order dated June 3, 1969, unreported (370a).
3. Order adding parties, June 3, 1969, unreported (374a).
4. Opinion order of June 20, 1969, reported at 300 F. Supp. 1381 (448a).

---

[1] Earlier proceedings in the same case are reported as *Swann* v. *Charlotte-Mecklenburg Board of Education*, 243 F. Supp. 667 (W.D. N.C. 1965), affirmed, 369 F.2d 29 (4th Cir. 1966).

5. Supplemental Findings of Fact, June 24, 1969, reported at 300 F. Supp. 1386 (459a).
6. Order dated August 15, 1969, reported at 306 F. Supp. 1291 (580a).
7. Order dated August 29, 1969, unreported (593a).
8. Order dated October 10, 1969, unreported (601a).
9. Order dated November 7, 1969, reported at 306 F. Supp. 1299 (655a).
10. Memorandum Opinion dated November 7, 1969, reported at 306 F. Supp. 1301 (657a).
11. Opinion and Order dated December 1, 1969, reported at 306 F. Supp. 1306 (698a).
12. Order dated December 2, 1969, unreported (717a).
13. Order dated February 5, 1970, reported at 311 F. Supp. 205 (819a).
14. Amendment, Correction, or Clarification of Order of February 5, 1970, dated March 3, 1970, unreported (921a).
15. Court of Appeals Order Granting Stay, dated March 5, 1970, unreported (922a).
16. Supplementary Findings of Fact dated March 21, 1970, unreported (1198a).
17. Supplemental Memorandum dated March 21, 1970, unreported (1221a).
18. Order dated March 25, 1970, unreported (1255a).
19. Further Findings of Fact on Matters raised by Motions of Defendants dated April 3, 1970, unreported (1259a).

20. The opinions of the Court of Appeals filed May 26, 1970, not yet reported, are as follows:

    a. Opinion for the Court by Judge Butzner (1262a).

    b. Opinion of Judge Sobeloff (joined by Judge Winter) concurring in part and dissenting in part (1279a).

    c. Opinion of Judge Bryan dissenting in part (1293a).

    d. Opinion of Judge Winter (joined by Judge Sobeloff) concurring in part and dissenting in part (1295a).

21. The judgment of the Court of Appeals appears at 1304a.

22. The opinion of a three-judge district court in an ancillary proceeding in this case dated April 29, 1970, not yet reported, appears at 1305a.

23. The Memorandum of Decision and Order dated August 3, 1970, unreported of the district court entered following the further proceedings directed by the Court of Appeals (1278a-1279a) and authorized by this Court (1320a) is appended to this brief.[2]

Jurisdiction

The judgment of the Court of Appeals was entered on May 26, 1970. The jurisdiction of this Court is invoked under 28 U.S.C. Section 1254(1). The petition for a writ of certiorari was filed in this Court on June 18, 1970, and was granted on June 29, 1970 (1320a).

---

[2] The appendix to the brief containing the decision on remand is herein designated "Br. A——." The other matters, including all other previous opinions are printed in separate appendix volumes and are herein designated "——a."

The Memorandum dated August 7, 1970, unreported is printed at Br. A39.

Questions Presented

1. Whether the trial judge correctly decided he was required to formulate a remedy that would actually integrate each of the all-black schools in the northwest quadrant of Charlotte immediately, where he found that government authorities had created black schools in black neighborhoods by promoting school segregation and housing segregation.

2. Whether, where a district court has made meticulous findings that a desegregation plan is practical, feasible and comparatively convenient, which are not found to be clearly erroneous, and the plan will concededly establish a unitary system, and no other acceptable plan has been formulated despite lengthy litigation, the Court of Appeals has discretion to set aside the plan on the general ground that it imposes too great a burden on the school board.

Constitutional Provisions Involved

This case involves the Equal Protection Clause of the Fourteenth Amendment to the Constitution of the United States.

Statement

1. *Introduction*

This Court has granted review[3] of an en banc[4] decision of the United States Court of Appeals for the Fourth Cir-

---

[3] The defendants have filed a cross petition for writ of certiorari which is pending. (Oct. Term 1970, No. 349.)

[4] Prior to argument, Judge Craven entered an order disqualifying himself. He had decided the case as a district judge in 1965 (243 F. Supp. 667) and was of the opinion that this previous participation barred him from hearing the case as a circuit judge. 28 U.S.C. §47.

cuit setting aside certain portions of an order of Judge James B. McMillan of the Western District of North Carolina which had required the complete desegregation of the Charlotte-Mecklenburg County public school system. Three members of the court, in a plurality opinion written by Judge Butzner, agreed with the lower court that the school board had an affirmative duty to employ a variety of available methods, including busing, to disestablish its dual school system and approved the portions of the order providing for the desegregation of the junior and senior high schools. As to the plan ordered for the elementary schools, however, they thought that the board "should not be required to undertake such extensive additional busing to discharge its obligation to create a unitary school system (1271a)." Judges Sobeloff and Winter viewed Judge McMillan's decision as appropriate in all respects and would have affirmed the decision in its entirety (1279a, 1295a). Judge Bryan who would have reversed the entire order expressed disapproval of busing to achieve racial balance which he found the order to require for junior and senior high school students as well as elementary (1293a).[5]

2. *Proceedings Below*

Black parents and students brought this action in 1965 against the local school board to desegregate the consolidated school district of Charlotte City and Mecklenburg County, North Carolina pursuant to 28 U.S.C. §1343 and 42 U.S.C. §1983. The North Carolina Teachers Association, a black professional organization, intervened seeking de-

[5] This is essentially the position of the defendants as stated in their cross petition for writ of certiorari. See note 3, supra. They not only argue that the Court of Appeals erred in approving Judge McMillan's plan for junior and senior high schools, but also disagree with the Court's conclusion that the board's elementary plan is unconstitutional.

segregation of the faculties on behalf of the black teachers in the school system. More recently, other defendants have been added, including the State Board of Education, the State Superintendent of Public Instruction and the individual members of the local board (464a, 374a, 901a). This current phase[6] of the litigation began in 1968 when the plaintiffs, relying upon the *Green* trilogy,[7] reopened the case seeking the elimination of all vestiges of the dual system (2a).

Judge McMillan first heard testimony in March, 1969 and entered his initial opinion the following month (300 F. Supp. 1358; 285a) judging the school system to be illegally segregated and requiring the board to submit a plan for desegregation. Extensive proceedings followed over the

---

[6] The case was first tried in the summer 1965. (243 F. Supp. 667 (1965).) The plaintiffs challenged an assignment plan where initial assignments were made pursuant to geographic zones from which students could transfer to schools of their choice. Plaintiffs complained that many of the zones were gerrymandered and that the zones of ten rural and concededly inferior black schools which the board claimed would be abandoned within a year or two overlapped white school zones. They also attacked a free transfer policy which had resulted in the transfer of each white child initially assigned to black schools as had the previous policy allowing for minority to majority transfers. Also under attack was the board's policy looking to the "eventual" non racial employment and assignment of teachers. Underlying plaintiffs' specific grievances was their general assertion that the Constitution required the school board to take active affirmative steps to integrate the schools.

The district court approved the assignment plan but required "immediate" non-racial faculty practices.

The court of appeals affirmed. (369 F.2d 29 (1966).) The decision noted that the 10 black schools were closed at the end of the 1965-66 school year. The court held, as it did the following year in *Bowman* v. *The School Board of Charles City County*, 382 F.2d 326 (1967), rev'd sub nom. *Green* v. *County School Board of New Kent County*, 391 U.S. 430 (1968), that the school board had no affirmative duty to disestablish the dual system.

[7] *Green* v. *County School Board of New Kent County*, 391 U.S. 430 (1968); *Monroe* v. *Board of Commissioners*, 391 U.S. 450 (1968); and *Raney* v. *Board of Education*, 391 U.S. 443 (1968).

next twelve months.[8] He rejected the first plan submitted and called for another, found the second plan inadequate but "reluctantly" accepted it as an interim measure for the 1969-70 school year, again required a new plan which after review was also found unacceptable.[9] On December 1, 1969, following the court's patient but unavailing efforts to secure from the board an acceptable plan, the failure of the board to carry out its minimal interim plan for 1969-70 and the mandate of this Court[10] that schools are to be desegregated "at once", Judge McMillan decided to appoint an educational consultant to assist him in devising a desegregation plan (698a). The following day, the court appointed Dr. John A. Finger, Jr., a Professor of

---

[8] Judge McMillan has provided an excellent summary of the proceedings in the district court prior to the decision of the court of appeals in his Supplemental Memorandum of March 21, 1970 (1221a).

[9] The first plan was rejected on June 20, 1969 (448a). The Court found that the board had sought from the staff a "minimal" and inadequate plan, that the staff produced such a plan and the board thereupon eliminated its only effective provisions before submitting it to the court.

The court found the second plan inadequate on August 15, 1969 (580a) but accepted it for the 1969-70 school year only because it promised some measure of desegregation and there did not appear to be sufficient time prior to the opening of the new school term for the development and implementation of a more effective plan. The failure of the board to accomplish what the plan had promised was determined on November 7, 1969 (657a).

The third "plan" was simply a statement of guidelines as to how the board intended to produce a plan. The guidelines promised no particular results and were thus rejected on December 1, 1970 (698a).

Judge Sobeloff traces this history in an extensive footnote (1291a, n. 9). He concludes "[T]he above recital of events demonstrates beyond doubt that this Board, through a majority of its members, far from making 'every reasonable effort' to fulfill its constitutional obligation, has resisted and delayed desegregation at every turn."

[10] *Alexander* v. *Holmes County Board of Education*, 396 U.S. 19.

Education at Rhode Island College who was directed to work with the administrative staff to prepare a plan for the court's consideration (717a). The board was again invited to submit another plan (698a).

On January 20, 1970, plaintiffs requested that Dr. Finger promptly present his plan so that the schools could be desegregated "at once" (718a).[11] The Finger plan (835a-839a) and a fourth board plan (726a) were filed with the court in early February. Judge McMillan held further hearings and entered an order on February 5 directing the desegregation of the students and teachers of the elementary schools by April 1, 1970, and of the junior and senior high schools by May 4, 1970 (819a).[12] The order was based upon the plans submitted by the board and Dr. Finger.

The school board appealed (904a) and sought a stay in the court of appeals. On March 5, 1970, the court of appeals

---

[11] Plaintiffs' request followed the controlling decisions of *Alexander* v. *Holmes County Board of Education*, 396 U.S. 19 (1969); *Dowell* v. *Board of Education of the Oklahoma City Public Schools*, 396 U.S. 269 (1969); *Carter* v. *West Feliciana Parish School Board*, 396 U.S. 290 (1970); and *Nesbit* v. *Statesville City Board of Education*, 418 F.2d 1040 (4th Cir. 1969).

This was not the first request by plaintiffs for immediate relief. In September of 1969 the plaintiffs' motion for a finding of contempt and for immediate desegregation (596a) had led to the court's finding in November that the board had not accomplished, during the 1969-70 school year, what it had been ordered to do (655a).

The plaintiffs were required to file a variety of other motions as well, such as motions for contempt (596a, 914a), objections to patently defective plans (e.g. 692a), a motion to enjoin school construction (324a), motions to vacate state court orders (see 925a), motions to add new defendants (840a, 906a) and motions to enjoin state officials from interfering with orders of the court (840a, 906a, 914a). Despite these and other efforts in the district court, the court of appeals and this Court, there has yet to be any more desegregation in the Charlotte-Mecklenburg school system than when this round of litigation commenced.

[12] The order was slightly modified on March 3, 1970 (921a).

stayed a portion of the order relating to the elementary schools and directed that the district court make additional findings concerning the cost and extent of the bussing required by the February 5 Order (922a). The plaintiffs applied to this Court to have the partial stay rescinded; the application was denied.

The district court received additional evidence pursuant to the directives of the court of appeals and entered a supplemental Memorandum (1221a) and Supplemental Findings of Fact (1198a)[13] on March 21, 1970.[14]

---

[13] The supplemental findings were amended in certain respects on April 3, 1970 (1259a), in response to a motion by defendants (1239a).

[14] During this period there were also proceedings concerning the North Carolina anti-bussing law:

> "In June of 1969, pursuant to the hue and cry which had been raised about 'bussing,' Mecklenburg representatives in the General Assembly of North Carolina sought and procured passage of the so-called 'anti-bussing' statute, N.C.G.S. 115-176.1 [supp. 1969]" (1223a).

Plaintiffs were granted leave to file a supplemental complaint in July, 1969 and to add the State Board of Education and State Superintendent of Public Instruction as defendants to attack the statute (464a). At that time the statute did not appear to the court to be a barrier to school desegregation (579a, 585a).

However, in the spring of 1970, the Governor and other state officials directed that no public funds be expended for the transportation of students pursuant to the district court order of February 5 and several state judges issued *ex parte* orders of similar effect acting under color of the state statute. (See 1305a, 1307a, 1308a).

At the plaintiff's request Judge McMillan added the Governor, other state officials and one group of state court plaintiffs as defendants (901a). He, thereafter determined that the constitutionality of the state statute was at issue and, therefore, requested and the Chief Circuit Judge appointed a three-judge court. The court convened in Charlotte on March 24. On April 29, 1970, the court entered its decision (1305a) declaring unconstitutional the portions of the statute prohibiting the assignment of any students "on account of race, creed, color or national origin, or for the purpose of creating a balance or ratio of race, religion or national

The opinions and judgment of the court of appeals were filed on May 26, 1970. The court decided by a vote of 4 to 2 to vacate and remand the judgment of the district court for further proceedings. A majority for the judgment was created by the vote of Judge Bryan joining with the three members of the court subscribing to the plurality opinion written by Judge Butzner, although Judge Bryan dissented from the views expressed in the plurality opinion (1304a).[15]

3. *Proceedings Pending Certiorari*

Judge McMillan conducted hearings from July 15 through July 24, 1970 in accordance with the order of this Court of June 29, 1970 granting certiorari, authorizing the remand directed by the Court of Appeals for further proceedings and reinstating the district court's judgment.

The school board had filed, but did not support, a plan prepared by the Department of Health, Education and Welfare (hereinafter HEW) and a plan prepared by four of the five members of the school board.

The Department of Justice appeared at the hearing as *amicus curiae* to present the HEW plan. Testimony was therefore directed to the comparative advantages and disadvantages to these plans and another plan which had been prepared by Dr. Finger during his tenure as court consultant.

---

origins," the "involuntary bussing of students in contravention of [the statute]" and the use of "public funds . . . for any such bussing."

The state and the local defendants have noted appeals to this Court.

[15] The judgment was vacated in its entirety. Judge Butzner's reason for this action was to give greater flexibility to the development of a new elementary plan (1263a). Judges Winter and Sobeloff thought it was improper to invite the reconsideration of the portions of the plan already found acceptable (1295a, n.*). The judgment expressed Judge Bryan's hope that "upon re-examination the District Court will find it unnecessary to contravene the principle stated . . ." in his dissent (1304a).

The Court entered a Memorandum of Opinion and Order (Br. A1) on August 3, 1970 in which it: rejected again the majority board plan; rejected the HEW plan as unconstitutional, and unreasonable in the context of Charlotte; accepted as constitutional and reasonable the originally ordered plan, the minority board plan and the preliminary Finger plan; and continued in effect his previous order of February 5, 1970 but allowing the board to choose to operate under one of the other plans found acceptable by the court if such a decision were made and presented to the court in writing before noon on August 7, 1970.[16]

The school board, at a meeting on August 6, 1970 decided not to exercise any of the options offered by the order of August 3 and to appeal and seek a stay in this Court and in the court of appeals (Br. A40). Upon receiving the report the court ordered the court ordered plan of February 5 be implemented (Br. A39).

4. *The Charlotte-Mecklenburg County School System in 1968-69*

In March of 1969, the plaintiffs presented to the district court detailed evidence about the school system, such as the number and location of the schools, the grades served, the kinds of programs offered, the achievement of the students in the different schools, the racial distribution of students and faculties in the system, and the changes which had occurred over the years. The plaintiffs also showed by expert testimony the rigid racial segregation of the population in Charlotte and in Mecklenburg County and its causes.[17]

---

[16] The court also allowed the board to close rather than integrate the Double Oaks School (black). There had been evidence presented at the hearing that it is difficult to get buses to the school although buses served the school during the 1969-70 school year.

[17] See the testimony of Charles L. Green (15a-27a), Daniel O. Henningan (28a-57a), Paul R. Leonard (57a-64a) and Yale Rabin (174a-241a). And see the testimony of defendants' witness, William E. McIntyre (251a-284a).

The court carefully analyzed the voluminous evidence before it. Over the course of the litigation below, the district court made extensive findings of fact.[18] Each succeeding order reflects a comprehensive analysis of new submissions of evidence by the parties and the cumulative evidence already before the court. The court of appeals has accepted the district court's findings (1262a).[19]

Judge McMillan's first opinion on April 23, 1969, gave a detailed description of the school system, the community which it serves and the extent of racial segregation within the schools (285a). We only summarize here some of the salient facts contained in the April opinion.

The Charlotte-Mecklenburg school system serves more than 84,000 pupils residing in the city of Charlotte and Mecklenburg County. In April, 1969, there were 107 schools, including 76 elementary schools (grades 1-6), 20 junior high schools (grades 7-9) and 11 senior high schools (grades 10-12). The system employed approximately 4,000 teachers and nearly 2,000 other employees. The racial composition of the students in the system was approximately 71% white and 29% black. The residential patterns of the county were sufficiently integrated so that most of the county school zones included both black and white students. No all-black schools remained in the County. In the City, however, the

---

[18] Significant findings are contained in eight of the orders leading to the decision of the court of appeals: Opinion and Order, April 23, 1969 (285a); Opinion and Order, June 20, 1969 (448a); Order, June 24, 1969 (459a); Order, August 15, 1969 (579a); Memorandum Opinion, November 7, 1969 (657a); Opinion and Order, December 1, 1969 (698a); Order, February 5, 1970 (819a); Supplemental Findings of Fact, March 21, 1970 (1198a); and Further Findings, etc. (1259a).

See also the most recent Memorandum of Opinion and Order, August 3, 1970 (Br. A1).

[19] The most recent findings (Br. A1), of course, have not been reviewed by the court of appeals.

residential areas were and are generally segregated by race,[10] and most schools were racially identifiable.

During the 1968-69 school year, students were assigned to the schools under the same plan as approved by the district court in 1965—initial assignments by geographic zones with freedom of transfer restricted only by school capacities.

The court found that 14,000 of the 24,000 black students in the system were attending schools which were at least 99% black (303a).[11] The court further found that most of the desegregated city schools were in transition from a previously all-white enrollment to all-black (302a). Seven schools which served 5,502 white pupils and no black pupils in 1954, served 5,010 pupils of which 35% were black in 1965. In 1968 they served 5,757 students, 81% of whom were black.

The school system had been growing at approximately 3,000 students per year, requiring an on-going school construction program. With few exceptions, the size and place-

---

[10] Most of the evidence concerning residential segregation was produced at the March 1969 hearings. (See note 17, *supra*.) The April order describes the housing patterns and some of the forces which created them. The matter was examined again in subsequent orders, particularly the Order of November 7, 1969 (657a). The court's conclusion was that housing segregation in Charlotte has been substantially determined by governmental action.

[11] In June, after further analysis of the data, the court concluded that approximately 21,000 of the 24,000 black students in the system lived within the city of Charlotte and that nearly 17,000 of them were attending black or nearly all-black schools (459a). The court also found that nearly 19,000 of the more than 31,000 white elementary students attended schools which were nearly all-white. (There are only 150 black students attending these schools.) More than one-half of the 14,741 white junior high school students attended schools with a total black population of 193 (453a).

ment of the recently constructed schools produced either all-white or all-black new schools.[22]

The court found faculties segregated. The great majority of the 900 black teachers were teaching in black schools. There was less than one white teacher per black elementary school. The two black high schools had teaching staffs more than 90% black.

The court concluded that the board's policies of zoning, free transfer and its school placement had contributed to and continued an unlawfully segregated public school system. It also concluded that the faculties had not been desegregated as required by the 1965 order. The board was directed to produce plans for the active desegregation of the pupils and faculties by May 15, 1969.

On appeal, Judge Butzner agreed that the system was unlawfully segregated in April of 1969:

> "Notwithstanding our 1965 approval of the school board's plan, the district court properly held that the board was operating a dual system of schools in the light of subsequent decisions of the Supreme Court . . ." (1263a-1264a).[23]

The district court further found that the impact of segregation on black students in the system had resulted in the denial of equal educational opportunities. Comparative test results showed a wide disparity in achievement between students attending all-black schools and students attending

---

[22] The new black schools were generally "walk-in" schools while the white schools were placed some distance from the areas which they serve (1203a-1204a).

[23] Both Judges Sobeloff and Winter concurred in this conclusion (1279a, 1295a).

white and integrated schools (857a-859a, 702a-704a, 1206a-1207a).[24]

The court also found that the residential segregation was far from benign or de facto. The school board by gerrymandering zone lines (455a-456a) and other practices, together with the activities of other governmental agencies, had had a significant impact upon the creation of Charlotte's ghetto. Again, the three circuit judges subscribing to the plurality opinion and Judges Sobeloff and Winter concurred in these findings. As Judge Butzner summarized:

> The district judge also found that residential patterns leading to segregation in the schools resulted in part from federal, state and local governmental action. These findings are supported by the evidence and we accept them under familiar principles of appellate review. The district judge pointed out that black residences are concentrated in the northwest quadrant of Charlotte as a result of both public and private action. North Carolina courts, in common with many courts elsewhere, enforced racial restrictive covenants on real property [footnote omitted] until *Shelley* v. *Kraemer*, 334 U.S. 1 (1948) prohibited this discriminatory practice. Presently the city zoning ordinances differentiate between black and white residential areas. Zones for black areas permit dense occupancy, while most white areas are zoned for restricted land usage.
>
> The district judge also found that urban renewal projects, supported by heavy federal financing and the active participation of local government, contributed to the city's racially segregated housing patterns. The school board, for its part, located schools in black residential areas and fixed the size of the schools to accom-

[24] The court reviewed the most recent data in July, 1970 and found wide disparities again (Br. A1).

modate the needs of immediate neighborhoods. Predominantly black schools were the inevitable result (1264a).

In addition to the activities of the governmental agencies producing the discriminatory zoning (297a, 1229a) and the urban renewal programs (297a, 1229a) mentioned by Judge Butzner, there was substantial evidence showing that long range planning by the City Council projects present segregation into the future (1229a), that public housing officials had overtly discriminated until recent years and have reinforced racial segregation by their site selection (1229a) and that those officials responsible for planning and building streets and highways have created racial barriers. (See, generally testimony of Yale Rabin (174a-241a)).

There was also significant testimony concerning "private" individual and institutional forces which have kept blacks out of white residential areas. The Rev. Daniel O. Hennigan, a black realtor testified at length concerning the enormous difficulties he had experienced over a period of four years in becoming the first—and so far only—black member on the Charlotte Board of Realtors. He finally secured membership by agreeing not to seek participation in Charlotte's multiple listing service. He also told of instances where he had negotiated the purchase of land in white areas but was unable to proceed because funds were denied his clients by the lending institutions (28a-57a).

5. *The Schools in 1969-70*

During the 1969-70 school year the schools were again operated under the board's 1965 desegregation plan as modified in its submission to the court in July 1969. The modifications provided for the transportation of 4,245 inner-city black students to outlying white schools. Of these

children 3,000 were to come from 7 schools which were to be closed and 1,245 from overcrowded black schools. The board also proposed some further faculty desegregation but would retain all other racially discriminatory features as found by the court in April. The board did propose, however, to study its building programs and such measures as altering attendance lines, pairing, clustering and other techniques in order to develop a comprehensive desegregation plan for the future.

The plaintiffs had objected to the proposal on the grounds that it left many schools segregated for yet another year and placed the full burden of desegregation upon black children.

The court, in an order entered on August 15, 1969 (579a), approved the proposed pupil reassignments for the 1969-70 school year "only (1) with great reluctance, (2) as a one year temporary arrangement and (3) with the distinct reservation that 'one-way bussing' plans for the years after 1969-70 will not be acceptable." The board was ordered to file a third plan by November 17, 1969, "making full use of zoning, pairing, grouping, clustering, transportation and other techniques . . . having in mind as its goal for 1970-71 the complete desegregation of the entire system to the maximum extent possible" (591a).[25]

Upon application of defendants, the court modified the August 15 order on August 29 to allow for the reopening of a black inner-city school to serve up to 600 inner-city children who chose not to be transported to suburban white schools (593a).

---

[25] The board explicitly refused to follow these directives. Each of the next two plans submitted by the board rejected the techniques of "pairing, grouping [and] clustering." See n. 29, *infra*. A similar directive of the court of appeals has also been ignored (Br. A1).

The plan did not accomplish what was promised. The court later found that "the 'performance gap' is wide" (659a).

> In substance, the plan which was supposed to bring 4,245 children into a desegregated situation had been handled or allowed to dissipate itself in such a way that only about one-fourth of the promised transfers were made; and as of now [March 21, 1970] only 767 black children are actually being transported to suburban white schools instead of the 4,245 advertised when the plan was proposed by the board (1226a).

In the November, 1969 Memorandum Opinion (657a) the court set out in detail the racial characteristics of the school system during the 1969-70 school year (658a-663a). The court concluded that there had been no real improvement from the segregated situation found during the previous school year.

> Of the 24,714 Negroes in the schools, something above 8,500 are attending "white" or schools not readily identifiable by race. More than 16,000, however, are obviously still in all-black or predominantly black schools. The 9,216 in 100% black situations are considerably more than the number of black students in Charlotte in 1954 at the time of the first *Brown* decision. The black school problem has not been solved.
>
> The schools are still in major part segregated or "dual" rather than desegregated or "unitary" (661a).

Analyzing the same figures in a later order (698a) the court pointed out that "Nine-tenths of the faculties are still obviously 'black' or 'white.' Over 45,000 of the 59,000 white students still attend schools which are obviously white" (702a).

The court also determined that the free transfer provision in the board's plan negated any progress which the

July plan might have produced (662a).[26] It also found that attempts to desegregate the schools by altering attendance lines would continue to fail as long as students could exercise a freedom of choice (662a-663a).

The court of appeals shared Judge McMillan's view that the system was still segregated during the 1969-70 school year (1266a, 1275a).

6. *The Plan Ordered by the District Court in Feburary, 1970*[27]

In the decision of December 1, 1969 (698a) in which the court announced that an educational consultant would be appointed, 19 principles were stated for his guidance (708a-713a). Dr. Finger's instructions included "all the black and predominantly black schools in the system are illegally segregated . . ." (711a); "efforts should be made to reach a 71-29 ratio in the various schools so that there will be no basis for contending that one school is racially different from the others, but . . . variations from that norm

---

[26] The court had made similar findings in June:

> Freedom of transfer increases rather than decreases segregation. The School Superintendent testified that there would be, net, more than 1,200 additional white students going to predominantly black schools if freedom of transfer were abolished (453a).

Moreover, during the choice period prior to the 1969-70 school year, just two white students out of 59,000 elected to transfer to black schools and only 330 black students out of 24,000 chose to transfer to white schools (*Id.*).

[27] A portion of the February order was stayed by the court of appeals on March 5 (922a) and the remainder by the district court on March 25 (1255a).

The order was reinstated by this Court on June 29 (1320a) pending further proceedings in the district court.

On August 3, 1970 the district court continued this Court's order in effect subject to options made available to the board for elementary school assignments if exercised on or before August 7, 1970 (Br. A1). Since the board declined to exercise any of the options, the court, on August 7, 1970 directed the court ordered plan of February 5 be implemented (Br. A39).

may be unavoidable" (710a); "bus transportation to eliminate segregation [and the] results of discrimination may validly be employed" (710a); and "pairing, grouping, clustering, and perhaps other methods may and will be considered and used if necessary to desegregate the schools" (712a).

Dr. Finger's work is described in the Supplemental Memorandum of March 21, 1970 (1221a):

> Dr. Finger worked with the school board staff members over a period of two months. He drafted several different plans.[28] When it became apparent that he could produce and would produce a plan which would meet the requirements outlined in the court's order of December 1, 1969, the school staff members prepared a school board plan which would be subject to the limitations the board had described in its November 17, 1969 report.[29] The result was the production of two plans—the board plan and the plan of the consultant, Dr. Finger.
>
> The detailed work on both final plans was done by the school board staff (1231a).

Both plans were presented to the court.[30]

a. *High Schools*—The school staff had developed a plan which produced a white majority of at least 64% in each

---

[28] One of his preliminary plans was introduced and described at the July, 1970 hearing (Br. A1).

[29] The board's two most significant limiting factors were: (1) Rezoning was the only method to be employed; the board rejected such techniques as pairing, grouping and clustering; (2) a school sought to be desegregated would be at least 60% white; thus, the board's plan for elementary schools produced some schools between 57% and 70% white, eight schools 1% to 17% white, two schools 0% white and no schools between 18% and 58% white.

The court of appeals found as the district court had that these limiting factors were improper (1275a-1276a).

[30] Description of the plans are found in several of the decisions below. See, Order, February 5, 1970 (819a, 825a-827a) and tables

of the ten high schools including the all-black West Charlotte High School (see Exhibit B, 829a). The board accomplished this result by restructuring attendance lines. Dr. Finger's proposal used the board's new zones and assigned an additional 300 pupils from a black residential area to Independence High School which would have had only 23 black students under the board's plan. Judge McMillan adopted the Finger modification. This portion of the plan was approved on appeal. Judge Butzner wrote:

> The transportation of 300 high school students from the black residential area to suburban Independence School will tend to stabilize the system by eliminating an almost totally white school in a zone to which other whites might move with consequent "tipping" or resegregation of other schools (1273a).

b. *Junior High Schools*—During the 1969-70 school year the board operated 19 junior high schools. Five were all or predominantly black; eight were more than 90% white. (See Exhibit D, 830a.) The board, by rezoning eliminated several of the black schools. One school, however, Piedmont, remained 90% black. Additionally, four schools would be more than 90% white.[11]

Dr. Finger devised a plan which would integrate all the junior high schools. Twenty of the schools would have white populations ranging from 67% to 79% and the re-

---

(829a-839a); Supplemental Findings, March 21, 1970 (1198a, 1208a-1214a); Supplemental Memorandum, March 21, 1970 (1221a, 1231a-1234a); Opinion of Court of Appeals (1262a, 1268a-1269a). See also the Memorandum of Opinion and Order, August 3, 1970 (Br. A1).

[11] Two new junior high schools are scheduled to open for the 1970-71 school year. Both proposed plans contemplate assigning students to these new schools. It is significant that under the board plan one of the schools would be 100% white and the other 91% white (830a).

maining school would be 91% white. The plan employed rezoning and satellite zones.[32]

The district court approved of the board's plan except as to Piedmont, and gave the board four options: (1) rezoning to eliminate the racial identity of the remaining black school, (2) two-way transportation of pupils between Piedmont and white schools, (3) closing Piedmont, or (4) adopting the Finger Plan. The board reluctantly chose to employ the Finger Plan.

Judge Butzner found the plans for junior and senior high schools by use of satellite zones together with transportation "a reasonable way of eliminating all segregation in these schools" (1273a).

c. *Elementary Schools*—The board in restructuring attendance lines for the 76 elementary schools was unable to affect a majority of the students attending racially identifiable schools. As the court of appeals observed, "Its proposal left more than half the black elementary pupils in nine schools that remained 86% to 100% black, and assigned about half of the white elementary pupils to schools that are 86% to 100% white" (1269a; see Exhibit H, 832a-834a).

The Finger Plan also employed the board's rezoning. 27 schools were rezoned, and 34 schools were desegreated by clustering and pairing with transportation.[33] Judge McMillan described the plan:

> Like the board plan, the Finger plan does as much by rezoning school attendance lines as can reasonably be accomplished. However, unlike the board plan, it does not stop there. It goes further and desegregates all the rest of the elementary schools by the technique of grouping two or three outlying schools with one black

[32] A "satellite zone" is an area which is not contiguous with the main attendance zone surrounding the school.

[33] The designated clusters are shown in Exhibit K (838a-839a). The zones of ten schools remained substantially unchanged.

inner city school; by transporting black students from grades one through four to the outlying white schools; and by transporting white students from the fifth and sixth grades from the outlying white schools to the inner city black school.

The "Finger Plan" itself . . . was prepared by the school staff. . . . It represents the combined thought of Dr. Finger and the school administrative staff as to a valid method for promptly desegregating the elementary schools. . . ." (1212a-1213a)

Under the plan the elementary schools would be from 60% to 97% white with most of the schools about 70% white. (See Exhibit J, 835a-837a.)

Judge McMillan found the board plan to be inadequate and directed that the Finger Plan or some other plan which would accomplish similar results be implemented.

The court of appeals agreed that the board plan was unacceptable. "The district court properly disapproved the school board's elementary school proposal because it left about one-half of both black and white elementary pupils in schools that were nearly completely segregated" (1275a). The court of appeals, however, decided that the board should not be required to undertake the additional transportation necessitated by the Finger Plan (1275a) and directed further proceedings for the development of another plan (1277a).

d. *Transportation*—The district court's order required additional transportation to be provided. The plurality opinion approved of the increments of transportation to accomplish the junior and senior high assignments (1273a) but determined that the elementary school busing appeared too extensive (1276a).

During the 1969-70 school year, the board operated 280 school buses transporting 24,737 of its 84,000 students.[34]

[34] Judge McMillan made detailed and elaborate findings concerning the extent and cost of busing in the Charlotte system, the state

The board reported (619a) the number of children transported, by grade level, as follows:

Pre-school	599
Elementary	10,441
Junior High	8,989
Senior High	4,708

Another 5,000 students rode public transportation at a reduced fare (1214a). The average annual cost per child was about $20.00 or about $475,000.00 out of a total budget of about 57 million dollars, almost all of which was reimbursed by the state.[35] The buses averaged 1.8 one-way trips

---

and the country, in his Supplemental Findings of March 21, 1970 (1198a). (See also Further Findings, etc. of April 3, 1970 (1259a)). The court had examined the transportation system in previous decisions as well (306a-307a, 449a-450a, 822a-823a).

Similar evidence was presented at the July, 1970 hearing with resulting findings by the court (Br. A1). These additional findings are discussed below.

[35] See Further Findings, etc., April 3, 1970 (1359a-1260a). The district court had originally understood the average cost to be about $40.00 per pupil (306a-307a, 1200a). The state reimburses local school boards for operating expenses for transportation for those students who are eligible under state law. The original cost of the bus is borne by the local board but the state replaces worn out buses (1259a-1260a).

During 1969-70 and previous years, pupils eligible for transportation were those children who lived more than 1½ miles from school and who lived either in the county or in portions of the city which had been annexed since 1957. Additionally, the state paid the transportation costs for children who lived within the pre-1957 city limits who attended schools outside of the pre-1957 limits (1203a).

For the 1970-71 school year, as a result of a decision in an unrelated case, *Sparrow* v. *Gill*, 304 F. Supp. 86 (M.D. N.C. 1969) (3-judge court), the State Board of Education has directed each school system either to offer transportation (at state rather than local expense) to *all* city children living more than 1½ miles from the school to which they are assigned or to *no* children living within the city limits.

Thus all of the children to be bused under the court approved plan would be eligible for transportation at state, rather than local expense. (See, Br. A1).

per day carrying an average of 83.2 students, averaging 40.8 miles (1200a).[36]

Judge McMillan's Findings in March (which were reaffirmed after 8 days of hearings in July, 1970) as accepted by the court of appeals show the added transportation under the plan ordered on February 5 to be:

	No. of Pupils	*No. of Buses*	*Operating*[37] *Costs*
Senior High	1,500	20	$ 30,000
Junior High	2,500	28	50,000
Elementary	9,300	90	186,000
Total	13,00	138	$266,000

The initial one-time[38] capital outlay to purchase new buses would be $745.200.[39] However, it was discovered at

---

[36] The overall figures for the state show a higher percentage of students riding buses than in Charlotte. During the 1968-69 school year about 55% of all students in North Carolina rode buses to school; 70.9% were elementary students (1199a). (Elementary students are defined by the state for these purposes as students in grades 1 through 8.)

[37] These operating cost figures are as determined by the court of appeals (1269a) by applying the district court's Further Findings, etc. of April 3, 1970 (1259a) to its Supplemental Findings of March 21, 1970 (1198a). Operating costs are reimbursed by the state.

The board had claimed much greater increases in the extent and cost of additional busing, but the district court, after carefully analyzing the data, found the board's figures to be exaggerated (see "Discount Factors," (1214a-1216a). The court's findings are also consistent with the transportation requirements projected by the board for its plan to transport 3,000 Negro children to the suburbs for the 1969-70 year (Exhibit E, 491a).

[38] Obsolete buses are replaced by the state. See note 35, *supra*.

[39] The district court observed that there was at least 3 million dollars worth of vacant school property which had been abandoned pursuant to the 1969-70 desegregation plan (1219a) and which, as the board had pointed out in its report in the summer of 1969, could be disposed of to produce necessary "desegregation" funds (Exhibit E, 491a).

the recent hearings that the board has on hand 107 buses not now being used to transport children to school.

14. Up until the July 15, 1970 hearings, the defendants had allowed the court to believe they only had 280 busses plus a few spares. On the last day of the hearing, however (July 24, 1970), some amazing testimony was developed on cross-examination of the witness J.W. Harrison, the Transportation Superintendent. He testified and the court finds as facts that *in addition to* the 280 "regular" busses, the Board's bus assets include at least the following:

(i)	Spare busses	20
(ii)	Activity busses (each driven less than 1,000 miles a year)	20
(iii)	Used busses replaced by new ones in 1969-70	30
(iv)	New busses currently scheduled for replacement purposes and expected to be delivered in near future	28
	Total:	107

(Br. A 18).

Moreover, the court found that since "early 1970 . . . there were 75 new busses available to the local school system if they wanted them, out of the 400 new busses then held by the state" and that the 400 second-hand busses in the state are "available on loan, without cost, for local school boards to use in 1970-71" that "could be safely used" (Br. A 1).

Thus no initial capital expenditures for busses is required of the local board.

"No capital outlay will be required this year to comply with the court's order. The School Board and the county government have ample surplus and other funds on hand to replace with new busses as many of the used busses as 1970-71 experience may show they actually need" (Br. A 1).

And, again, operating costs are borne by the state.

The board itself had proposed the busing of 4,200 black inner-city children for the 1969-70 school year to outlying suburban schools as a desegregation measure (584a-586a). The board's February 2 plan proposes to bus approximately 5,000 additional students, about half of whom are elementary pupils. A major portion of this busing is within the City (1217a, 1270a, n. 4). Moreover, there is nothing novel about city children riding school busses. Children living in the city but outside of the 1957 city limits have been bused. Many city boards of education, such as Greensboro, have provided transportation for all city children living more than 1½ miles from school with local funds. The present State Superintendent of Public Instruction, his predecessor and the prestigious 1969 Report of the Governor's Study Commission on the Public School System of North Carolina had all recommended that transportation be provided for children, city as well as rural, on an equal basis (1201a-1202). State policy for the 1970-71 school year is that all city children living more than 1½ miles from school will be eligible for transportation at state expense.

The bus trips required for the paired elementary schools would be straight-line non-stop trips (1205a), would be shorter and would take less time than the average bus trip in the sytem or in the state (1199a, 1205a).

34. . . .

(f) The average one-way bus trip in the system today is over 15 miles in length and takes nearly an hour and a quarter. The average length of the one-way trips required under the court approved plan for elementary students is less than seven miles, and would appear to require not over 35 minutes at the most, because no stops will be necessary between schools (1215a).[46]

Busing was a technique employed by the board to maintain its dual system as recently as 1966 (1200a); even today, school buses transport white students to outlying white schools while Negro students walk to their all-black schools (1203a-1204).

Judge McMillan's most recent memorandum includes significant findings concerning transportation. The exhaustive evidence on transportation presented in July verified beyond question the court's conclusions of March. It also revealed, even more clearly, the gross exaggerations of the Board's transportation estimates for all desegregation plans. Among the more pertinent findings are:

1. "In North Carolina the school bus has been used for half a century to transport children to *segregated consolidated schools*" (Br. A16).

2. The state now authorizes transportation at state expense for all city children living more than a mile

---

[46] The court later explained how these figures were developed:

The average *straight line* mileage between the elementary schools paired or grouped under the "cross-bussing" plan is approximately 5½ miles. The average bus trip mileage of about seven miles which was found in paragraph 34(f) was arrived at by the method which J. D. Morgan, the county school bus superintendent, testified he uses for such estimates —taking straight line mileage and adding 25%. (Emphasis in original; 1215a.)

and a half from school, causing a significant increase in the number of children riding school busses in North Carolina from the 55% who were bussed during the 1968-69 school year (Br. A16).

3. "School bus transportation is safer than any other form of transportation for school children" (Br. A16).

4. There were 17 busses carrying 700 four and five year old children to child development centers on one-way trips ranging from seven to thirty-nine miles during the 1969-70 school year (Br. A18, A24).

5. The Board's cost " 'estimates,' when heard against the actual facts, border on fantasy!" (Br. A24). Its projections do not, as claimed, reflect the Board's experience in transporting inner-city black children to outlying white schools for the 1969-70 school year.

> "[T]he evidence [shows] for example . . . that one [such] 'desegregation bus' (Bus #23, Exhibit 54) transported 99 children daily among schools as remote as Northwest Charlotte (9th and Bethune) on the one hand and Sharon Elementary and Beverly Woods Elementary on the other, with the driver then going on in the bus to South High School" (Br. A22).[41]

6. There is an emple supply of busses, new and used, money and drivers to implement the court order (Br. A18-A20, A26).[42]

---

[41] The defendants estimate for all plans are based upon the assumption that one bus will make one trip to one school with one load of 45 or less children (Br. A21-A22).

[42] The court also found to be without basis the Board's claim that: elementary children should not ride buses ("There may be more first graders than children of any other age riding school busses" (Br. A24)); that additional buses will unduly clog traffic in Charlotte (Br. A25); and that it would unduly disrupt the system if

7. *Other Elementary Plans Reviewed by the District Court in July, 1970*[42a]

Judge McMillan reviewed and compared five elementary plans at the hearings in July, 1970: (1) The majority board plan which he had rejected in February and which the court of appeals had rejected; (2) the Finger plan as ordered in February, 1970; (3) the minority board plan supported by four of the nine members of the board; (4) another plan which Dr. Finger had prepared when acting as court consultant; and (5) the HEW plan.

a. *The Majority Board Plan*—The court was of the opinion that the court of appeals had required the board to prepare and present another plan. The board chose not to do so, but relied again upon its February submission. Judge McMillan was not persuaded that he could approve a plan which left over half of the black and white elementary children in racially identifiable schools and which had been rejected by the court of appeals (Br. A27).

b. *The HEW Plan*—This plan was developed by a team of four HEW officials. They did not consult with or seek the assistance of the local staff in the preparation of the plan. The team was lead by Mr. Henry Kemp, recently hired by HEW, who had no previous experience as an educator with a school system of over 6,000-7,000 students. Charlotte was Mr. Kemp's first assignment by HEW to prepare a desegregation plan. His principal assistant was

---

it were necessary to stagger the hours of school to simplify transportation problems ("The schools already operate on staggered schedules. . . . The court finds that staggered opening and closing hours for elementary schools, and arrangement of class schedules of bus drivers for late arrival and early departure are facts of life which will not be eliminated by desegregation of the schools" (Br. A25-A26).)

[42a] At the time of the preparation of this brief, the July, 1970 proceedings have not yet been transcribed.

Mr. John Cross, a young lawyer who also had never worked upon a complete desegregation plan for a city or metropolitan school system.

The plan used the newly created zones of the majority board and Finger plans and then created several contiguous clusters each containing a black school with two or more rezoned desegregated schools with each school serving all the students within the cluster for 1, 2 or 3 grades. It left two schools all black.[43] The schools which had been desegregated by rezoning would therefore have a significantly greater black student population than under the Finger plan.

Both plaintiffs and defendants objected strenuously to the plan for substantially the same reasons. The Board's position on the HEW plan was unanimous.[44] The court described the HEW plan:

> 2. The HEW plan.—This plan proposes to adopt the basic zoning program of parts of the Board majority plan, and then to re-zone some of the black schools with some white schools, mostly in low and middle income areas, and by clustering, pairing, grouping and transportation, to produce a substantial de-

---

[43] One of these schools, Double Oaks, is in a *cul-de-sac* which was built to serve a segregated public housing project which surrounds it. Dr. Finger testified that if he were forced to decide which of the black children in Charlotte would be desegregated and which would not, he would seek initially to offer the children at Double Oaks a desegregated education.

[44] It was noted at the hearing that the Board's rejection of the HEW plan was the first unanimous action taken by the Board on a desegregation issue in a long time. Four members of the Board supported a minority plan at the July hearing which was designed to desegregate all the elementary schools so that each school would be approximately 70% white and 30% black; five supported the board plan of February which left 10 black or predominantly black schools.

segregation of the most of the black schools. The faults of the plan are obvious.

It leaves two schools (Double Oaks and Oaklawn) completely black; it leaves more than a score of other schools completely white; it would withdraw from numerous white schools the black students who were transported to those schools during the 1969-70 school year. The clusters proposed by HEW would for the most part continue to be thought of as "black" in this county because the school populations of most of the clusters would vary from 50% to 57% black and the lowest black percentage in any cluster is 36%. Recommended HEW faculty assignments to these clusters of schools contemplated faculties which in the main would be less than half white, and this would be another retrogression from the arrangements already made by the School Board for the fall term! Contrary to the orders of the district court and the Circuit Court, the HEW people limited their zoning to contiguous areas.

All witnesses except the HEW representatives themselves joined in hearty criticism of the HEW plan because of its ignorance of local problems, because of its threat of resegregation, and because it tends to concentrate upon the black and low- or middle-income community a race problem that is county wide.

In other days and other places the HEW plan would have looked good; and in those districts where black students are in the majority, much of such a plan could well be reasonable today. However, "reasonableness" has to be measured in the context; and in this context the HEW plan does not pass muster. It also on the facts of this case would fail to comply with the Constitution (Br. A28-A29).

c. *The Finger Plan, the Board Minority Plan and the Preliminary Finger Plan*—Judge McMillan found each of the three remaining plans to be basically acceptable, but found the original Finger plan to be the only finished plan.

> "The original court ordered (Finger) plan is the only complete plan before the court" (Br. A2).

The Minority plan created clusters of two or more elementary schools zones using the old (1969-70) attendance areas and included all elementary schools. Each cluster contains approximately 2,000 students with a white-black ratio in the neighborhood of 70%-30%. There is no method specified as to how the students would be assigned within the clusters, although the principal author of the plan, Dr. Carlton Watkins, testified that he favored some kind of random assignment plan which would produce the desired racial ratio at each school. He also favored having each school serve grades 1 through 6 rather than having altered grade structures as in the Finger plans where each school would serve either grades one through four or five and six.

In terms of the number of children to be transported and transportation costs the plans are not greatly different.[45]

> "All plans which desegregate all the schools will require transporting approximately the same number of children. The overall cost, if a zone pupil assignment method is adopted, the minority Board Plan may be a little cheaper than the Finger plan" (Br. A23).

---

[45] The HEW plan would require somewhat less busing at less cost because it leaves two schools all-black. If those schools were desegregated, however, the number of children to be bused would be about the same at a cost not significantly less than any of the other plans.

As to the preliminary Finger plan: "From the standpoint of economics it may be the cheapest plan available" (Br. A23).

Judge McMillan indicated the relative advantages and disadvantage, of these three plans. He judged each plan to be constitutional since each plan is feasible, reasonable and desegregates the schools. He, therefore, continued in effect the February 5 order, but allowed the Board to choose one of the other acceptable plans or some combination thereof on or before August 7, 1970. At a meeting on August 6, 1970, the board decided not to exercise any of these options (Br. A40). The court therefore ordered the February 5 plan to be implemented (Br. A39).

Summary of Argument

I

Both courts below held that the Charlotte-Mecklenburg school system was unconstitutionally racially segregated during the 1968-69 and 1969-70 school years. These holdings were clearly correct.

During the 1969-70 school year, the school board's desegregation plan which provided for the assignment of pupils by geographic attendance zones with pupils allowed a "free transfer" to other schools had resulted in: more than 16,000 of the 24,714 black pupils attending all-black or predominantly black schools; over 45,000 of the 59,000 white students attending schools which were obviously white; 16 schools were 98-100% black; 9 other schools were readily identifiable as black; 57 schools were identifiable as white; only 24 schools were not identifiable by race; and the faculties of 90% of the schools were still obviously white or black. In the elementary schools about three-fourths of the 13,010 black elementary pupils attended black or predominantly black schools. The courts below,

in applying the teachings of *Brown* v. *Board of Education*, 347 U.S. 483 (1954); *Green* v. *School Board of New Kent County*, 391 U.S. 430 (1968) and *Monroe* v. *Board of Commissioners*, 391 U.S. 450 (1968), properly found the schools to be unlawfully segregated.

The district judge found that the segregation of black students in Charlotte had produced its inevitable results in retarded achievement. Although this case does not depend upon such findings of harm to black children, *Cooper* v. *Aaron*, 358 U.S. 1, 19 (1958), these facts profoundly impressed Judge McMillan and underscored the importance of his holding that the school board has "a duty to act positively to fashion affirmatively a school system as free as possible from the lasting effects of such historical apartheid" (293a).

The courts below found that the segregation of school children in Charlotte was caused by actions of governmental officials. The school board, for its part had over the years chosen school sites, determined capacities and drawn zone lines in a fashion to promote segregation. The residential segregation found in Charlotte was in large part created and maintained by the official actions of those involved in planning, zoning, public housing, urban renewal and other activities. Neighborhoods were kept white by the use of racial covenants, the functional equivalent of racial zoning ordinances. (*Bell* v. *Maryland*, 378 U.S. 226, 329 (1964), Mr. Justice Black dissenting.) Thus, no claim that the schools should remain segregated by reference to a "neighborhood school" policy is tenable. As this Court made plain in *Cooper* v. *Aaron*, 358 U.S. 1, 16-17 (1958), school boards are agents of the state and will not be excused from their duty to guarantee the constitutional rights of Negro children because the "vindication of those rights was rendered difficult or impossible by actions of other state officials."

II

The goal set by the district court to eliminate the racial identity of the present "black" schools in the Charlotte-Mecklenburg system is in conformity with the decisions of this Court. Upon finding that the continued existence of all-black schools in Charlotte was the result of racial discrimination by the school board and other governmental agencies, the court was required to seek ways to eliminate the consequences of these discriminatory actions. This Court has said in *Green* v. *County School Board of New Kent County,* 391 U.S. 430 (1968) that "the system of segregation and its effects" (*id.* at 440) must be dismantled (*id.* 391 U.S. at 437), and eliminated "root and branch" (*id.* at 438). A desegregation plan must "promise realistically to convert promptly to a system without a 'white' school and a 'Negro' school, but just schools" (*id.* at 442) and courts are to enter decrees "which will so far as possible eliminate the discriminatory effects of the past as well as bar like discrimination in the future" (*id.* at 438, note 4).

The trial judge, therefore, when he found it was necessary to appoint a consultant to assist him in preparing a plan because of the recalcitrance of the school board, appropriately instructed the consultant that black schools were illegally segregated in Charlotte and that "efforts should be made to reach a 71-29 [white-black] ratio in the various schools so that there will be no basis for contending that one school is racially different from the others, but to understand that variations from that norm may be unavoidable." This specific, although flexible, goal for pupil assignments is exactly parallel to the kind of goal for faculty desegregation set by the district court and approved by this Court in *United States* v. *Montgomery County Board of Education,* 395 U.S. 225 (1968).

In contrast to the complete relief sought by the district court, the court of appeals has announced a new rule looking toward less than complete relief. The new principle requires that in each case a court must decide whether the goal of complete desegregation to eliminate racially identifiable schools is a "reasonable" goal in that it can be accomplished by "reasonable" means. The new rule portends serious consequences for the general course of school desegregation. It is a new litigable issue which will produce less desegregation and at a slower pace. The rule is vague and ambiguous. The only thing clear about it is that it means less desegregation than the standard which we understood to apply before, that is, whether a plan is feasible. And there is no question as to the feasibility of the plan set aside by the court of appeals.

The court of appeals agrees with the district court that the segregation sought to be dismantled is illegal, but holds that, for some reason, the remedy is not worth the price. We think such a finding is unacceptable in the United States and conflicts with *Griffin* v. *School Board*, 377 U.S. 218 (1964). The techniques to right the wrong found to exist in Charlotte are at hand as the court ordered plan so clearly demonstrates. The holding of the court of appeals threatens to water down or temper the duty to convert to a unitary system. It should be rejected.

The defendants have argued that provisions of the Civil Rights Act of 1964 (Sections 401(b) and 407(a)(2), codified as 42 U.S.C. §§2000c(b) and 2000c-(a)(2)) forbid the busing ordered by the district court. We think the disposition of this issue by the court below was clearly correct in ruling that the Civil Rights Act placed "no limitations on the power of school boards or the courts to remedy unconstitutional segregation" (1274a). This is the construc-

tion placed on the statute by all four circuits which have addressed the issue. Moreover, the district court did not impose racial balance. Under its order the schools would vary from 3% to 41% black. What the court did do was to set a specific, yet flexible goal, the purpose of which was "the compliance of this school system with the Constitution by eliminating the racial characteristics of its schools" (Br. A10).

III

The court-ordered desegregation plan meets the most important test of *Green* v. *County School Board of New Kent County,* 391 U.S. 430 (1968), in that the plan does promise to actually dismantle the dual system and provide a unitary system of schools. The principle characteristics of the dual system—the all-black schools—will be gone. The plan works.

The plan was produced because the district judge undertook the duty imposed upon him by law to seek means of desegregating the schools. It would seem beyond question that the court, having a detailed, feasible plan before it which desegregated all the schools was correct in judging that the board had failed to meet its "heavy burden . . . to explain its preference for an apparently less effective method." *Green, supra,* at 439.

We agree with the dissenters below that the proper test is whether a plan is "feasible" and whether it provides "effective relief," (*Green, supra,* at 439) not whether in the subjective judgment of a court the means are "reasonable." We do not understand the court below to question the feasibility of the plan. The plan calls for a transportation system which would be commensurate with the percentage of pupils transported in the state. The additional

busing would be for considerably shorter distances and take less time than the average distance and time for the bus trips for the 23,000 students presently transported in 1969-70. Nearly 11,000 elementary children are now being bused in the system. About 700 pre-school children are being transported great distances. The cost of the additional transportation will be a tiny fraction of the school budget. Enough buses are either on hand or available to be purchased or borrowed to implement the plan. The plan is educationally sound. The only impediment to the immediate conversion to a unitary school system under the court's plan is the board's unwillingness to do so.

The courts below approved of the techniques of pairing and clustering with transportation as appropriate and here necessary means, to desegregate the schools. Pairing was approved in *Green* (*supra* at 442, n. 6) and has been required in scores of school districts. Bus transportation is an ordinary tool of desegregation and has been required to desegregate schools. Since the constitutional imperative in this case is the desegregation of the schools, we can conceive of no reason why the courts below were wrong in holding that busing be employed.

We think that the courts below were also correct in rejecting the defendants' arguments that there is something wrong with assigning children to schools outside of their zones of residence. School boards have traditionally and necessarily reserved the right to alter attendance lines, grade structures and educational programs for their schools. As the district court's decision plainly shows, segregation can be eliminated by choosing to alter grade structures and provide transportation. The only reason for limiting assignments to adjacent zones in Charlotte would be to preserve segregation. In Charlotte only 541 of 17,000 of the children in black schools ride buses. At the white

schools, however, over 40% of the children already ride school buses. The question is not whether children will ride school buses, but where the buses will go.

The neighborhood school theory cannot be invoked now in support of segregation when it has been traditionally ignored to promote segregation. This is particularly true in a state which buses over 54% of the children in public schools.

The court of appeals has violated traditional standards of review in overturning the decision of the district court. In school desegregation cases district courts have been admonished to assess "the circumstances present and options available in each instance." *Green, supra,* at 439. And "in this field the way must always be left open for experimentation." *United States* v. *Montgomery County Board of Education, supra,* at 235. The equitable decree entered by the district court was faithful to those instructions and should not have been disturbed without a strong showing of abuse of discretion. *United States* v. *W. T. Grant Co.,* 345 U.S. 629 (1953). Instead of the traditional standards of review, the court of appeals fashioned its own subjective rule of reasonableness and vacated the district court's judgment. This new rule signals to district judges that their room for "experimentation" and their "options" are strictly limited. The signal is "go slow." We submit that the decision below has not only undercut *Green* and *Montgomery County,* but runs counter to the philosophy of *Alexander* v. *Holmes County Board of Education,* 396 U.S. 19 (1969) which requires immediate and effective relief. As Judge Sobeloff observed in dissent "reasonableness" is "all deliberate speed" in a new guise.

ARGUMENT

I.

The Public Schools of the Charlotte-Mecklenburg School System Are Racially Segregated in Violation of the Equal Protection Clause of the Fourteenth Amendment as the Result of Governmental Action Causing School Segregation and Residential Segregation.

A. *The Schools Are Organized in a Dual Segregated Pattern.*

Both courts below held that the Charlotte-Mecklenburg system was still unconstitutionally racially segregated. The record amply supports that finding and conclusion. Prior to this suit in 1965 there had been only a token break of the pattern of total racial segregation mandated by state law. The desegregation plan adopted in 1965 and continued in effect through the 1969-70 school term provided for the assignment of pupils by geographic attendance zones with pupils allowed a "free transfer" to attend the schools outside their areas of residence.[46] This is substantially the same kind of plan considered by this Court and found to be inadequate in *Monroe* v. *Board of Commissioners,* 391 U.S. 450 (1968).[47] The court below concluded that: "The neighborhood school concept and freedom of choice as administered are not furthering desegregation" (313a; 300 F. Supp. at 1372). The court concluded that the Mecklenburg "rural schools are largely desegregated" but that in

[46] The plan was approved in 1965, and affirmed on appeal. *Swann* v. *Charlotte-Mecklenburg Board of Education,* 243 F. Supp. 667 (W.D. N.C. 1965), affirmed, 369 F.2d 29 (4th Cir. 1966).

[47] A similar plan for geographic assignments and free transfers was also involved in *Northcross* v. *Board of Education of Memphis,* 397 U.S. 232 (1970).

the city of Charlotte "schools are still largely segregated" (302a; 300 F. Supp. at 1367-1368). Although the plan was modified in July 1969 to attempt to increase desegreation by closing certain black schools, there was little actual improvement.[48] Judge McMillan summarized the extent of desegregation during the 1969-70 term in these words:

> Of the 24,714 Negroes in the schools, something above 8,500 are attending "white" schools or schools not readily identifiable by race. *More than 16,000, however, are obviously still in all-black or predominantly black schools.* The 9,216 in 100% black situations are considerably more than the number of black students in Charlotte in 1954 at the time of the first *Brown* decicision. The black school problem has not been solved.
>
> The schools are still in major part segregated or "dual" rather than desegregated or "unitary" (661a).

The court found that "nearly 13,000 out of 24,714 black students still attend schools that are 98% to 100% black"; that "nine-tenths of the faculties are still obviously 'black' or 'white' "; and that "over 45,000 out of 59,000 white students still attend schools which are obviously 'white' "

---

[48] The July 29, 1969, plan, which was approved for one year only, did not produce the promised improvement and the court held that there had been a wide "gap" between the school board's promise and its performance (659a). The court found that "only 1,315 instead of the promised 4,245 black pupils" were transferred to white schools under the 1969 plan (659a). Even worse, the manner in which the free transfer feature operated threatened to transform some integrated schools into all-black schools threatening a "rapid shift from white to black, [so that] the net result of the 1969 pupil plan would be nearly zero" (659a). By March 1970, the court found even less progress: "In substance, the plan which was supposed to bring 4,245 children into a desegregated situation had been handled or allowed to dissipate itself in such a way that only about one-fourth of the promised transfers were made; and as of now only 767 black children are actually being transported to suburban white schools instead of the 4,245 advertised when the plan was proposed by the board" (1226a).

(702a). During the school term just ended there were 11 schools which were 100% black, 5 schools 98-99% black, 3 schools 90-97% black, and 6 schools 55-89% black (660a). Thus, in a school system where black pupils were but 29% of the total, there were 25 schools out of 106 which the district judge held were "readily identifiable as black" (660a).[49]

Segregation was particularly intense at the elementary school level. About three-fourths of black elementary pupils attended predominantly black or all-black schools. There were 9,718 (or 74.6%) of the 13,010 black elementary pupils in schools which were from 65% to 100% black (832a-834a) and 60.7% of all black elementary pupils attended schools that were 98-100% black (id.).[50]

The court of appeals agreed with the district court that there was still a dual segregated system saying: "Notwithstanding our 1965 approval of the school board's plan, the district court properly held that the board was impermissibly operating a dual system of schools in the light of subsequent decisions of the Supreme Court, *Green* v. *School Bd. of New Kent County*, 391 U.S. 430, 435 (1968), *Monroe* v. *Bd. of Comm'rs*, 391 U.S. 450 (1968), and *Alexander* v. *Holmes County Bd. of Ed.*, 396 U.S. 19 (1969)" (1263a-1264a).

---

[49] The judge classified 57 schools as readily indentifiable as white schools and 24 as not readily identifiable by race (660a).

[50] The 1969-70 elementary school breakdown for heavily black schools is as follows (832a-834a):

	No. of Elementary Schools	*No. of Elementary Students*		
% Black		*White*	*Black*	*Totals*
100%	8	1	5,311	5,312
98–99%	4	32	2,536	2,568
92%	1	83	902	985
65–80%	3	378	969	1,347
	16	494	9,718	10,212

The several desegregation plans proposed by the school board were rejected by the courts below because they failed to accomplish sufficient desegregation.[51] The board sought to defend its fourth plan, filed in February 1970, in the court below. But the court of appeals held that "The district court properly disapproved the school board's elementary school proposal because it left about one-half of both the black and white elementary pupils in schools that were nearly completely segregated."[52]

The district judge examined the academic achievement test results of pupils in the segregated and desegregated schools in Charlotte and concluded that black children in

---

[51] The board's May 1969 plan was the same basic plan which had been rejected in April 1969 with some modification of pupil transfer rules. The district court found that the free transfer plan did not accomplish desegregation. See 300 F. Supp. at 1384; 453a. The board's July 1969 plan was approved "reluctantly" for one year only. This plan closed 7 all-black schools and allowed pupils from the closed schools to be transported (if they so chose) to white schools. There was substantial opposition in the black community to the fact that this plan operated by one-way busing of blacks to white schools but closed black schools instead of desegregating them. The court found that the plan accomplished little increase in desegregation. The board's third proposal, the November 17, 1969, plan was rejected in the order of December 1, 1969. This plan called for rezoning. The court found that it would maintain 7 all-black schools and that most of the 25 black schools serving 16,197 of the 24,714 black children would be continued as black schools (701a).

[52] The board's senior high school plan, involving rezoning, was approved by the trial court with one exception. The court changed the zones to shift 300 black pupils in a designated area to Independence High School. This change created a satellite zone for Independence and the court of appeals rejected the board's appeal, and approved the change as one which "will tend to stabilize the system by eliminating an almost totally white school in a zone to which other whites might move with consequent 'tipping' or resegregation of other schools" (1273a). The board's proposals for junior high schools were found unacceptable because the plan would have left Piedmont Junior High 90% black and shifting toward 100% black.

Charlotte were suffering a substantial educational deprivation caused by segregation. Judge McMillan found that:

> Segregation produces inferior education, and it makes little difference whether the school is hot and decrepit or modern and air-conditioned.
>
> It is painfully apparent that "quality education" cannot live in a segregated school; *segregation itself is the greatest barrier to quality education* (588a).

The judge found that "segregation in Mecklenburg County has produced its inevitable results in the retarded educational achievement and capacity of segregated school children" (587a). Sixth grade students in black schools were on the average achieving at a fourth grade level on national achievement tests, whereas there was substantially higher levels in integrated and white schools (304a; 588a; 702a-704a).

More recent data was reviewed in the opinion entered on August 3, 1970. The gross disparities remained. Judge McMillan concluded:

> Of factors affecting educational progress of black children, segregation appears to be *the factor under control of the State,* which still constitutes the greatest deterrent to achievement (Br. A9).

As noted above, Judge McMillan was persuaded by the expert testimony[53] and by the facts of the case that "segregation itself is the greatest barrier to quality educa-

---

[53] Plaintiffs' experts had testified at the hearing in March, 1969 in agreement with the conclusion of the Civil Rights Commission that: "The evidence indicates that Negro children attending desegregated schools that do not have compensatory education programs perform better than Negro children in racially isolated schools with such programs." *Racial Isolation in the Public Schools,* A Report of the United States Commission on Civil Rights, 205 (1967).

tion" (588a). And the school board apparently does not perceive compensatory education as a viable substitute for desegregation in creating equal educational opportunities for its black children:

> The defendants have come forward with no program nor intelligble description of 'compensatory education,' and they advance no theory by which segregated schools can be made equal to unsegregated schools (Br. A16).

Whatever doubts there may be about the standardized achievement tests as measuring instruments, the results profoundly impressed the trial judge that black children in Charlotte's all-black schools were not receiving an equal education. Of course, the case does not depend as a legal matter upon such local findings of educational harm. "The right of a student not to be segregated on racial grounds in schools so maintained is indeed so fundamental and pervasive that it is embraced in the concept of due process of law." *Cooper* v. *Aaron*, 358 U.S. 1, 19 (1958). The segregation system was a massive intentional disadvantaging of the Negro minority by the white majority and its elimination is an urgent task. The district judge correctly held that the school board has "a duty to act positively to fashion affirmatively a school system as free as possible from the lasting effects of such historical apartheid" (293a).

B. *Governmental Agencies Created Black Schools in Black Neighborhoods by Promoting School Segregation and Residential Segregation.*

The findings of the district court make it plain that the existing pattern of school segregation in Charlotte-Mecklenburg is the deliberate result of state action designed to create a segregated school system. The court found that all

the school segregation in Charlotte was illegal and that there was no aspect of possibly innocent or adventitious segregation. Each and every black school in the system was held to be segregated in violation of the constitutional prohibitions against racial discrimination:

> On the facts in this record and with this background of *de jure* segregation extending full fifteen years since *Brown I*, this court is of the opinion that all the black and predominantly black schools in the system are illegally segregated, *Green* v. *New Kent County; Henry* v. *Clarksdale; United States* v. *Hinds County* (711a).

The district court made no attempt to proclaim a general principle that all-black schools are illegally segregated *per se*. He held only that the particular all-black schools in Charlotte were illegally segregated.[54] That conclusion was supported by substantial evidence and findings.

Judge McMillan found that the school board had gerrymandered school attendance areas to promote segregation, selected the sites and sizes of schools to promote segregation, and used the school transportation system toward the same end. It was held that the racial makeup of the schools had been controlled:

> . . . the court finds as a fact that no zones have apparently been created or maintained for the purpose of promoting desegregation; that the whole plan of "building schools where the pupils are" without further control promotes segregation; and that certain schools, for example Billingsville, Second Ward, Bruns Avenue and Amay James, obviously serve school

[54] Judge McMillan stressed this point in his recent opinion. See section headed, "*This is a local case in a local court—a lawsuit—to test the constitutional rights of local people*" (Br. A12).

> zones which were either created or which have been controlled so as to surround pockets of black students and that the result of these actions is discriminatory. These are not deemed as an exclusive list of such situations, but as illustrations of a long standing policy of control over the makeup of school population which scarcely fits any true "neighborhood school" philosophy (455a-456a).

The court heard extensive evidence about the extent of residential segregation in Charlotte and the governmental responsibility for the existing pattern of almost total residential separation. About 98% of the black inhabitants of Charlotte reside in the northwest quadrant of Charlotte. Judge McMillan summarized the findings about how this extensive segregation came about in these words:

> The black schools are for the most part in black residential areas. However, that does not make their segregation constitutionally benign. In previous opinions the facts respecting their locations, their controlled size and their population have already been found. Briefly summarized, these facts are that the present location of white schools in white areas and of black schools in black areas is the result of a varied group of elements of public and private action all deriving their basic strength originally from public law or state or local governmental action. These elements include, among others, the legal separation of the races in schools, school busses, public accommodations and housing; racial restrictions in deeds to land; zoning ordinances; city planning; urban renewal; location of public low rent housing; and the actions of the present School Board and others, before and since 1954, in locating and controlling the capacity of schools

so that there would usually be black schools handy to black neighborhoods and white schools for white neighborhoods. There is so much state action embedded in and shaping these events that the resulting segregation is not innocent or "*de facto*," and the resulting schools are not "unitary" or desegregated (1228a-1229a).

The Fourth Circuit accepted these findings and conclusions stating that they were "supported by the evidence" (A. 1264a). The Fourth Circuit opinion mentions that "North Carolina courts, in common with many courts elsewhere, enforced racial restrictive covenants on real property until *Shelley* v. *Kramer*, 334 U.S. 1 (1948), prohibited this discriminatory practice" (*ibid.*). See, e.g., *Phillips* v. *Wearn*, 226 N.C. 290, 37 S.E.2d 895 (1946) (involving property in Mecklenburg County); *Eason* v. *Buffaloe*, 198 N.C. 520, 152 S.E. 496 (1930); *Vernon* v. *R. J. Reynolds Realty Co.*, 226 N.C. 58, 36 S.E.2d 710 (1946). Racial restrictive covenants operated to exclude Negroes from entire areas of cities. They had the same effect and purpose as residential segregation laws and ordinances of the kind outlawed by *Buchanan* v. *Warley*, 245 U.S. 60 (1917). Indeed, restrictive covenants were the functional and practical equivalent of such segregation ordinances when they were enforced by injunctions as in *Shelley*, *supra*, or damage suits (see *Barrows* v. *Jackson*, 346 U.S. 249 (1953)). Mr. Justice Black has pointed out that *Shelley* was argued to this Court on this basis by the Solicitor General, among others:

> This type of agreement constituted a restraint on alienation of property, sometimes in perpetuity, which, if valid, was in reality the equivalent of and had the effect of state and municipal zoning laws accomplishing the same kind of racial discrimination as if the State had passed a statute instead of leaving this objective

to be accomplished by a system of private contracts. (*Bell* v. *Maryland*, 378 U.S. 226, 329 (1964), Mr. Justice Black, dissenting.)

Judge McMillan's findings about the causes of residential segregation in Charlotte are entirely corroborated by the national experience as reported by the United States Commission on Civil Rights. The Commission's formal findings were:

> 5. Within cities, as within metropolitan areas, there is a high degree of residential segregation—reflected in the schools—for which responsibility is shared by both the private housing industry and government.
>
> (a) The discriminatory practices by city landlords, lending institutions, and real estate brokers have contributed to the residential confinement of Negroes.[55]
>
> (b) State and local governments have contributed to the pattern of increasing residential segregation through such past discriminatory practices as racial zoning ordinances and racially restrictive covenants capable of judicial enforcement. Current practices in such matters as the location of low-rent public housing projects, and the displacement of large numbers of low-income nonwhite families through local improvement programs also are intensifying residential segregation.[56]
>
> (c) Federal housing programs and policies serve to intensify racial concentrations in cities. Federal policies governing low- and moderate-income housing pro-

[55] See the testimony of Daniel O. Hennigan covering this kind of discrimination in Charlotte (28a-57a).

[56] See the testimony of Yale Rabin concerning state and local actions in Charlotte (174a-241a).

grams such as low-rent public housing and FHA 221 (d)(3) do not promote the location of housing outside areas of intense racial concentration. Federal urban renewal policy is insufficiently concerned with the impact of relocation on racial concentrations within cities.

6. Individual choice contributes to the maintenance of residential segregation, although the impact of such choice is difficult to assess since the housing market has been restricted. (*Racial Isolation in the Public Schools, supra,* at 201-202.)

The Commission reported that the policy of the Federal Housing Administration in the 1930's and 1940's was a "principal impetus to housing discrimination" (*Id.* at 254).[57] The FHA not only recommended the insertion of racial covenants, but even after *Shelley* v. *Kraemer, supra,* the Commission reports, "the FHA continued to treat racial integration in housing as a reason for denying benefits to an applicant" (*id.* at 254; citing Abrams, *Forbidden Neighbors,* 233 (1955), and Weaver, *The Negro Ghetto,* 71-73 (1948)).

The court below thus accepted the finding of the trial court that the schools in Charlotte were illegally segregated. Judge Butzner wrote:

> The fact that similar forces operate in cities throughout the nation under the mask of *de facto* segregation

[57] A glaring example of the nearly inevitable effect of the policy of the federal government to promote residential segregation and the school board's policy of building schools in accommodation of that policy is the Double Oaks School. The federal housing officials and the local housing authority built a low-income housing development for blacks, leaving space for a school. The school board built a school to serve the children of that project. In 1969-70, as in previous years, only black children attended Double Oaks—over 800 (832a). This is one of the ten schools the board would leave all-black (*id.*) and is one of the two schools HEW would leave all-black.

> provides no justification for allowing us to ignore the part that government plays in creating segregated neighborhood schools (A. 1264a-1265a).

The court below thus rejected the board's argument that segregation in the Charlotte schools could be justified by reference to a "neighborhood school" policy. The Fourth Circuit cites a number of decisions where courts have reached similar conclusions about the relation between segregated housing policies and segregated schools, *e.g.*, *Henry* v. *Clarksdale Munic. Separate School Dist.*, 409 F.2d 682, 689 (5th Cir. 1969), *cert. denied*, 396 U.S. 940 (1969); *United States* v. *School Dist. 151 of Cook County*, 404 F.2d 1125, 1130 (7th Cir. 1968), *aff'g* 286 F. Supp. 786, 798 (N.D. Ill. 1968); *Brewer* v. *School Bd. of City of Norfolk*, 397 F.2d 37, 41 (4th Cir. 1968); *Keyes* v. *School Dist. No. One, Denver*, 303 F. Supp. 279 and 289 (D. Colo. 1969), *stay vacated*, 396 U.S. 1215 (1969); *Dowell* v. *School Bd. of Oklahoma City*, 244 F. Supp. 971, 975 (W.D. Okla. 1955), *aff'd*, 375 F.2d 158 (10th Cir.), *cert. denied*, 387 U.S. 931 (1967).[58]

It does not matter, for purposes of judging the constitutionality of the resulting school segregation, that agencies of the state, other than the local school board, are in part

---

[58] See also *Holland* v. *Board of Public Instruction of Palm Beach County*, 258 F.2d 730, 732 (5th Cir. 1958). In a number of recent decisions the Fifth Circuit has held that geographic zoning plans are acceptable only if they tend "to disestablish rather than reinforce the dual system of segregated schools." *United States* v. *Greenwood Municipal Sep. School Dist.*, 406 F.2d 1086, 1093 (5th Cir. 1969); *United States* v. *Indianola Municipal Sep. School Dist.*, 410 F.2d 626 (5th Cir. 1969), *cert. denied*, —— U.S. —— (1970); *Davis* v. *Board of School Comm'rs of Mobile County*, 393 F.2d 690, 694 (5th Cir. 1968); *United States* v. *Choctaw County Board of Ed.*, 417 F.2d 838 (5th Cir. 1969); *Braxton* v. *Board of Public Instruction of Duval County*, 402 F.2d 900 (5th Cir. 1968); *Valley* v. *Rapides Parish School Board*, 423 F.2d 1132 (5th Cir. 1970); *Youngblood* v. *Board of Public Instruction of Bay County, Fla.*, —— F.2d —— (5th Cir., No. 29369, July 24, 1970).

responsible for the residential segregation pattern. As this Court made plain in *Cooper* v. *Aaron*, 358 U.S. 1, 16-17 (1958), school boards are agents of the state and will not be excused from their duty to guarantee the constitutional rights of Negro children because the "vindication of those rights was rendered difficult or impossible by the actions of other state officials." Nor is the local board's responsibility relieved by the fact that private as well as governmental discrimination in housing has contributed to the segregated residential pattern. As Judge McMillan has found, the board has made choices in locating schools, fixing the sizes and grade structures of schools, determining the transportation patterns, and adopting the policy of assigning pupils by residences. The board has defined the relevant school "neighborhoods" by its own decisions. Housing segregation results in school segregation only in the context of these choices by the school board—an agency of the state. Thus, a situation which has the appearance of inevitability—school segregation in Charlotte's black ghetto—is revealed as the product of governmental decision-making. As the Fourth Circuit held in *Brewer* v. *School Board of the City of Norfolk*, 397 F.2d 37, 41-42 (4th Cir. 1968):

> If residential racial discrimination exists it is immaterial that it results from private action. The school board cannot build its exclusionary attendance areas upon private racial discrimination. Assignment of pupils to neighborhood schools is a sound concept, but it cannot be approved if residence in a neighborhood is denied to Negro pupils solely on the ground of color (Footnotes omitted).

The reasoning in *Brewer* is all the more apt where, as here, government has contributed heavily to creating the segregated housing pattern.

II.

The District Court Was Correct in Ruling That the Dual Segregated System in Charlotte-Mecklenburg Must Be Disestablished by Reorganizing the System So That No Racially Identifiable Black Schools Remained. The Court of Appeals Erred in Substituting a Less Specific Desegregation Goal.

A. *This Court's Decisions Require Complete School Desegregation.*

The district court sought to afford complete relief in this case by requiring a desegregation plan which would eliminate the racially identifiable "black" schools and leave "just schools". The trial judge's decision that each predominantly black or all-black school in Charlotte must be reorganized on an integrated basis by reassigning pupils and faculties is in conformity with this Court's decisions defining the duty to eliminate state-imposed segregation in the public schools. *Brown* v. *Board of Education*, 347 U.S. 483 (1954) (*Brown I*), and *Brown* v. *Board of Education*, 349 U.S. 294 (1955) (*Brown II*). *Brown II* speaks of the need "to achieve a system of determining admission to the public schools on a nonracial basis." (349 U.S. at 300-301) In *Cooper* v. *Aaron*, 358 U.S. 1, 7 (1958), the Court wrote of the duty of "initiating desegregation and bringing about the elimination of racial discrimination in the public school system." In 1968, in *Green* v. *County School Board of New Kent County*, 391 U.S. 430 (1968), the Court made it plain that *Brown* required more than simply a system of nondiscriminatory admission of Negroes to "white" schools. Rather, the whole system of segregation must be dismantled (*id.*, 391 U.S. at 437), and discrimination must be eliminated "root and branch" (*id.* at 438). The Con-

stitution requires "abolition of the system of segregation and its effects" (*id.* at 440).

This Court has called for the abolition of racially identifiable schools saying that desegregation plans must "promise realistically to convert promptly to a system without a 'white' school and a 'Negro' school, but just schools" (*id.* at 442). The requirement of complete relief was emphasized by the holding in *Green, supra,* that courts should render decrees "which will so far as possible eliminate the discriminatory effects of the past as well as bar like discrimination in the future" (391 U.S. at 438, note 4). Mr. Justice Brennan's opinion said that the courts should "retain jurisdiction until it is clear that state-imposed segregation has been completely removed" (*id.* at 439). Thus it ought to be entirely clear that this Court's decisions require fundamental reform of racially segregated dual systems to abolish every vestige of segregation and prevent its recurrence. The courts are not limited to requiring a mere minimum amount of desegregation which might give the bare appearance of non-discriminatory assignments. Rather, the lower courts have been admonished to strike out the roots and branches of the segregated system. The district court's decision was faithful to the duty set out in *Green, supra.*

Judge McMillan, having determined that the black schools in Charlotte were illegally segregated, directed his expert consultant to devise a plan which eliminated the black schools. Judge McMillan had to appoint his own consultant to devise a plan because of what Judge Sobeloff has aptly described as the school board's "total lack of cooperation" and the fact that the board "has resisted and delayed desegregation at every turn" (1293a; see note 9 at 1291a-1293a). Accordingly, the court set forth detailed guidelines for the court consultant to follow in preparing

the plan. Among the criteria set forth in the December 1, 1969, opinion are the following:

> 2. Drawing school zone lines, like "freedom of transfer," is not an end in itself; and a plan of geographic zoning which perpetuates discriminatory segregation is unlawful . . . [citations omitted].
>
> • • •
>
> 12. Fixed ratios of pupils in particular schools will not be set. If the board in one of its three tries had presented a plan for desegregation, the court would have sought ways to approve variations in pupil ratios. In default of any such plan from the school board, the court will start with the thought, originally advanced in the order of April 23, that efforts should be made to reach a 71-29 ratio in the various schools so that there will be no basis for contending that one school is racially different from the others, but to understand that variations from that norm may be unavoidable.
>
> • • •
>
> 14. Where pupils live must not control where they are assigned to school, if some other approach is necessary in order to eliminate racial segregation . . . [citations omitted].
>
> 15. On the facts in this record and with this background of *de jure* segregation extending full fifteen years since *Brown I*, this court is of the opinion that all the black and predominantly black schools in the system are illegally segregated . . . [citations omitted].
>
> • • •
>
> 17. Pairing of grades has been expressly approved by the appellate courts . . . [citations omitted]. Pairing, grouping, clustering, and perhaps other methods

may and will be considered and used if necessary to desegregate the schools.

18. Some 25,000 out of 84,000 children in this country ride school busses each day, and the number *eligible* for transportation under present rules may be more than 30,000. A transportation system already this massive may be adaptable to effective use in desegregating schools (708a-712a).

Petitioners urge that the desegregation goals for Charlotte which were set forth in the trial court's instructions to the expert consultant were entirely appropriate under this Court's decision in the *Green* case. This Court's decision in *United States* v. *Montgomery County Board of Education*, 395 U.S. 225 (1968), also provides a substantial precedent for the trial judge's approach in setting a concrete desegregation objective. Judge Winter's dissenting opinion below states this well (1301a-1302a):

> The district court wisely attempted to remedy the present dual system by requiring that pupil assignment be based "as nearly as practicable" on the racial composition of the school system, 71% white and 29% black. The plan ordered fell short of complete realization of this remedial goal. While individual schools will vary in racial composition from 3% to 41% black, most schools will be clustered around the entire system's overall racial ratio. It would seem to follow from *United States* v. *Montgomery Board of Education*, 395 U. S. 225, 232 (1968), that the district court's utilization of racial ratios to dismantle this dual system and remedy the effects of segregation was at least well within the range of its discretion. There the Supreme Court approved as a requirement of faculty integration that "in each school the ratio of white to Negro

faculty members is substantially the same as it is throughout the system." It did so recognizing that it had previously said in *New Kent County,* 391 U. S. at 439, "[t]here is no universal answer to complex problems of desegregation; there is obviously no one plan that will do the job in every case. The matter must be assessed in light of the circumstances present and the options available in each instance." If in a proper case strict application of a ratio is an approved device to achieve faculty integration, I know of no reason why the same should not be true to achieve pupil integration, especially where, as here, some wide deviations from the overall ratio have been permitted to accommodate circumstances with respect to particular schools.

B. *The Fourth Circuit's New Reasonableness Rule Makes the Goal of Desegregation Less Complete and Specific and Threatens to Undermine Brown v. Board of Education.*

The court below, by a narrow vote (actually, only three members of the court), has explicitly announced a new rule of law to govern all school desegregation cases. The new principle requires that in each case a court must decide whether the goal of complete desegregation to eliminate racially identifiable schools is a "reasonable" goal in that it can be accomplished by "reasonable" means. Thus we have not merely an issue about the reasonableness of particular desegregation plans or techniques, but rather, an issue about the reasonableness of the goal of desegregation.

As Judge Sobeloff has stated so clearly in his dissent, the new rule portends serious consequences for the general course of school desegregation:

. . . Handed a new litigable issue—the so-called reasonableness of a proposed plan—school boards can be expected to exploit it to the hilt.[59] The concept is highly susceptible to delaying tactics in the courts. Everyone can advance a different opinion of what is reasonable. Thus, rarely would it be possible to make expeditious disposition of a board's claim that its segregated system is not "reasonably" eradicable. Even more pernicious, the new-born rule furnishes a powerful incentive to communities to perpetuate and deepen the effects of race separation so that, when challenged, they can protest that belated remedial action would be unduly burdensome" (1290a-1291a).

We believe that the court of appeals erred by not adopting the trial court's more specific requirement that each black school in Charlotte be reorganized so that it would no longer be a racially identifiable black school. The district judge made no effort to announce a rule of law to govern any case but the Charlotte case (Br. A 12-A13). He found that the Charlotte schools were unlawfully segregated and that it was educationally feasible to desegregate each of them. The Finger Plan demonstrates that desegregation of all the schools is indeed feasible, and we

---

[59] It was only two weeks later that Judge Sobeloff's prediction was realized. The trustees of School District No. 1 of Clarendon County, South Carolina urged upon the court of appeals the "reasonableness" of a freedom of choice plan which had not worked. *Brunson* v. *Board of Trustees of School District No. 1 of Clarendon County*, No. 14571, —— F.2d —— (4th Cir., June 5, 1970) (separate concurring opinion by Judge Sobeloff):

> "This case is the lineal descendant of *Briggs* v. *Elliot*, one of the four cases consolidated in *Brown* v. *Board of Education*, 347 U.S. 483 (1954). [Footnote omitted] That it is still being litigated at this date, nineteen years since *Briggs* was initiated and sixteen years after the decision in *Brown* is a most sobering thought." *Ibid.*

do not understand the court of appeals majority to seriously question the general feasibility or educational soundness of the Finger Plan. However, the reasonableness doctrine was applied to set aside the Finger Plan for elementary schools on the ground that the board "should not be required to undertake such extensive additional busing to discharge its obligation to create a unitary school system" (1276a). At the same time, the reasonableness rule was applied to approve the Finger Plan for secondary schools involving busing, non-contiguous and satellite zoning, and similar techniques to eliminate each predominantly black secondary school.

The Fourth Circuit has explicitly attempted to formulate a legal principle to be applied in desegregation cases on a national basis. The rule was announced as one necessitated by the problem of some cities "which have black ghettos so large that integration of every school is an improbable, if not an unattainable goal" (1267a-1268a). It is particularly inappropriate and unecessary to attempt to frame such a rule in a case such as this, for Charlotte has no vast intractable desegregation problem as the Finger Plan demonstrates.[60] Desegregating the Charlotte schools is not a difficult matter in the technical sense. The technology to desegregate school systems of this size is readily available. The problem is and has been a problem of political and legal resistance to desegregation.[61] The

---

[60] Judge McMillan again found this to be so:

> There is no 'intractable remnant of segregation' in this school system. No part of the school system is cut off from the rest of it, and there is no reasonable way to decide what remnant shall be deemed intractable (Br. A18).

[61] Judge McMillan thoughtfully addressed this point in his recent decision. (See section headed *"The Issue Is One of Constitutional Law—Not Politics,* Br. A13-A14):

> Civil Rights are seldom threatened except by majorities. One whose actions reflect accepted local opinion seldom need

United States Commission on Civil Rights has recently made the point:

> It is a mistake to think of the problems of desegregation and the extent that busing is required to facilitate it solely in the context of the Nation's relatively few giant urban centers such as Chicago, New York, or Los Angeles. In most of our cities the techniques necessary to accomplish desegregation are relatively simple and create no hardships. The experience in communities which have successfully desegregated could easily be transferred to cities of greater size. (Statement of the United States Commission on Civil Rights Concerning the "Statement by the President on Elementary and Secondary School Desegregation", April 12, 1970.)

The real thrust of the "reasonableness rule" as applied to reject the elementary school plan is as Judge Sobeloff wrote:

> . . . no more than an abstract, unexplicated judgment —a conclusion of the majority that, all things considered, desegregation of this school system is not worth the price. This is a conclusion neither we nor school boards are permitted to make.

If the reasonableness of school desegregation as a goal is to be litigated in every case by a subjective assessment of

---

to call upon the Constitution. It is axiomatic that persons claiming constitutional protection are often, for the time being, out of phase with the accepted "right" thinking of their local community. If in such circumstances courts look to public opinion or to political intervention by any other branch of the government instead of to the more stable bulwarks of the Constitution itself, we lose our government of laws and are back to the government of man, unfettered by law, which our forefathers sought to avoid (Br. A14).

whether the end justifies the cost involved, then the *Brown* decision will in many places become a practical nullity.

As the National Education Association Brief *Amicus Curiae* in support of the Petition for Certiorari in this case has pointed out, the Fourth Circuit decision is paradoxical in that while it "creates a wide ambit for the exercise of discretion to limit desegregation, it severely, and NEA believes unwarrantedly, restricts the traditional discretion of the district court to frame a plan which will secure the constitutional objective." (NEA Brief *Amicus Curiae*, p. 21, note 19.)

The reasonableness rule is so vague, ill-defined, and, in Judge Sobeloff's phrase, "inherently ambiguous" (1289a) that it is "highly susceptible to delaying tactics in the courts" (1290a). The Charlotte-Mecklenburg board illustrates this by the Cross-Petition for Certiorari which defends the reasonableness rule but argues that the Fourth Circuit has misapplied its own rule in approving the junior and senior high school desegregation plans ordered by the district court. The point is that the opinion below contains no standards by which to judge the reasonableness question. The specific application in Charlotte, in which the plan for high schools and junior high schools was approved by the court of appeals, yet the elementary plan was disapproved, leaves the law in great uncertainty. The result implies that it may be legal to deny a desegregated education to some black children and that the only requirement is to offer constitutional protections to a reasonable number of them. Such a doctrine is alien to the requirement that the States shall not deny "to *any person* within their jurisdiction, the equal protection of the laws" (emphasis supplied). The reasonableness rule, if applied in this fashion, would conflict with the tradition of personal constitutional rights under the Fourteenth Amendment. (See Br. A 13.)

Judge Butzner's decision suggests that complete desegregation can be achieved only in "towns, small cities, and rural areas" (1267a). The ruling implies that some indefinite number of elementary pupils will remain in predominantly black and perhaps all-black schools, by its statement that "not every school in a unitary system need be integrated" and that while boards "must use all reasonable means to integrate the schools" sometimes "black residential areas are so large that not all schools can be integrated by using reasonable means."[42] This holding, by acknowledging that the black schools are the product of illegal segregation practices holds that the wrong is without a remedy.

We urge that this Court reject the notion that the constitutional rights of black citizens to equal protection of the laws may be left without a remedy in the courts of the United States. The concept that a state may violate the constitutional rights of citizens because it is too expensive to protect those rights is unworthy of our legal system and a betrayal of our constitutional heritage. Judge McMillan stated the correct rule: "The alleged high cost of desegregating schools (which the court does not find to be a fact) would not be a valid legal argument against desegregation, *Griffin* v. *School Board* [377 U.S. 218 (1964)]; *United States* v. *Cook County, Illinois* [404 F. 2d 1125 (7th Cir. 1968)]" (710a). See also, *Shapiro* v. *Thompson*, 394 U.S. 618 (1969); cf. *Baldwin* v. *New York*, 26 L.ed 2d 437 (1970).

The court below suggests three measures which might be taken instead of eliminating racially identifiable schools, e.g., providing an integrated school for each child in later

[42] There is perhaps some slight unclarity in the application of the rule to this case, for the court fails to state categorically that Charlotte's black residential area is of such size that schools must remain black.

years (as at the secondary school level), establishing special integrated programs in the black schools, and permitting black pupils the right of free transfer to leave the all-black schools. None of these suggestions represents a satisfactory substitute for the constitutional right to attend school in a system where racial identification of the schools has been removed and there are "just schools." *Green* v. *County School Board of New Kent County*, 391 U.S. 430, 442 (1968). The idea of providing integration in later years is merely a postponement of the right of desegregation and conflicts with this Court's determination that the dual system must be abolished "now and hereafter." *Alexander* v. *Holmes County Board of Education*, 396 U.S. 19 (1969). The provision of special integrated programs at black schools is by its terms limited to peripheral activities not central to the daily classroom experience of grade school children. The provision of free transfers for blacks has proven an unsuccessful method of desegregating the schools in Charlotte-Mecklenburg and it cannot be expected that any but a few blacks would benefit from the proposed rule allowing black students to transfer from majority black schools. *Monroe* v. *Board of Commissioners*, 391 U.S. 450 (1968). These three measures, while unobjectionable in themselves, are simply no substitute for a desegregated school system.

The reasonableness rule threatens to undermine the *Brown* decision. As Judge Sobeloff has suggested in dissent, the holding threatens to water down or temper the duty to convert to a unitary system (1281a). Sixteen years after *Brown I* there is no room for retreat from the principle that racial segregation is unconstitutional and must be abolished. This Court has just recently rejected the doctrine of "all deliberate speed" because of the long experience of evasion and delay of the duty of desegregation. *Alexander* v. *Holmes County Board of Education*, 396 U.S.

19 (1969); *Dowell* v. *Board of Education of the Oklahoma City Public Schools*, 396 U.S. 269 (1969); *Carter* v. *West Feliciana Parish School Board*, 396 U.S. 290 (1970). The new and subjective reasonableness rule portends a new era of litigation under a subjective standard sanctioning a great deal of continuing racial segregation. It should not be followed.

C. *The Goal of Integrating Each School in Charlotte Is Consistent With Federal Statutory and Constitutional Requirements.*

The defendants have argued that provisions of the Civil Rights Act of 1964 (Sections 401(b) and 407(a)(2), codified as 42 U.S.C. §§2000c(b) and 2000c-6(a)(2)) forbid the busing ordered by the district court. The court of appeals rejected this reasoning stating that the argument "misreads the legislative history of the statute," and that the sections "are not limitations on the power of school boards or courts to remedy unconstitutional segregation" (1274a). The same argument has been rejected on numerous occasions by other courts and we think the treatment of this issue by the court below is sufficient to dispose of the question (1247a-1248a). Other courts have come to the same conclusion in a number of cases: *United States* v. *Jefferson County Board of Education*, 372 F.2d 836, 880-881 (5th Cir. 1966), *aff'd en banc*, 380 F.2d 385 (5th Cir. 1967), *cert. den. sub nom. Caddo Parish School Board* v. *United States*, 389 U.S. 840 (1967); *United States* v. *Board of Trustees of Crosby Independent School District*, 424 F.2d 625 (5th Cir. 1970); *Tillman* v. *Board of Public Instruction of Volusia County*, No. 29180, —— F.2d —— (5th Cir., April 23, 1970); *Andrews* v. *City of Monroe*, No 29358 —— F.2d ——(6th Cir., April 23, 1970); *United States* v. *School District 151, Cook County, Ill.*, 404 F.2d 1125, 1130 (7th Cir. 1968), *affirming* 286 F. Supp. 786 (N.D. Ill.); *Keyes* v. *School*

District No. One, Denver, 303 F. Supp. 289, 298 (D. Colo. 1969), *stay granted,* —— F.2d —— (10th Cir. 1969), *stay vacated,* 396 U.S. 1215 (1969); *Moore* v. *Tangipahoa Parish School Board,* 304 F. Supp. 244, 250 (E.D. La. 1969).

The board's construction of the Act would render it an unconstitutional attempt by the Congress to authorize the States to violate the Fourteenth Amendment by continuing segregation. But, of course, "Congress may not authorize the states to violate the Equal Protection Clause." *Shapiro* v. *Thompson,* 394 U.S. 618, 641 (1969); *Katzenbach* v. *Morgan,* 384 U.S. 641, 651, n. 10 (1966).

This case does not present the abstract question of whether any racial balance of the schools is required. By requiring the elimination of racially identifiable schools the trial judge did not impose any strict requirement that each school be a racial microcosm of the entire system. Certainly there was no question of balance unrelated to the requirement of eliminating unconstitutional racial segregation caused by the State. The district judge did not require any fixed racial ratios of pupils. He merely adopted the racial ratio "as a starting guide, expressed a willingness to accept a degree of modification, and departed from it where circumstances required" (1287a). As he recently wrote:

> The November 7, 1969 order expressly contemplated wide variations in permissible school population; and the February 5, 1970 order approved plans for the schools with pupil populations varying from 3% at Bain Elementary to 41% at Cornelius. This is not racial balance but racial diversity. The purpose is not some fictitious "mix," but the compliance of this school system with the Constitution by eliminating the racial characteristics of its schools (Br. A10).

Petitioners do not contend that the Constitution requires that formerly segregated systems must invariably convert to an arrangement in which every school has an approximate ratio which reflects the system-wide ratio of the races. The trial judge did not proceed on the theory that any such balancing was required by the Constitution, although the board's arguments continue to characterize the holding in this manner. But petitioners do urge that it is within the discretion of district courts to adopt as a remedial goal some specific target to measure progress toward eliminating racial identifiability of schools. *United States* v. *Montgomery County Board of Education,* 395 U.S. 225 (1969). The objective of desegregation plans, to convert to a unitary system, might in some cases achieve a balanced system where every school is a racial microcosm of the entire system. Such racial balance plans may often be feasible as recent experience in Greenville, South Carolina demonstrates, for example. *Whittenberg* v. *School District of Greenville County,* C.A. No. 4396, D. S.C., Order of Feb. 4, 1970. The Greenville plan produced a ratio of about 20% black and 80% white in each school in a system with 58,000 children in 105 schools; it included transportation for pupils living more than 1½ miles from school. As we have said previously, this nation has more than adequate technology to integrate the schools and afford a quality education. It is generally possible to eliminate all-black schools by feasible desegregation plans. However, we take no absolutist position which ignores the possibility that there are exceptions to this rule. It is sufficient to decide this case to conclude that a feasible and workable plan to eliminate "black schools" and "white schools" is at hand.

III.

The District Court Acted Within the Proper Limits of Its Discretion by Ordering a Plan Consistent With the Affirmative Duty to Desegregate the Schools and the Objective of Preventing Resegregation.

A. *The Finger Plan Promises to Establish a Unitary System.*

The court-ordered desegregation plan meets the most important test of *Green* v. *County School Board of New Kent County*, 391 U.S. 430 (1968), in that the plan does promise to actually dismantle the dual system and provide a unitary system of schools. It is undisputed that the plan will eliminate the principal characteristics of the dual system—the all-black schools. This is the essential thing that a plan must accomplish in order to be an "adequate" plan under *Brown* v. *Board of Education*, 349 U.S. 294, 301 (1955), and *Green, supra*. *Green* calls for *results* in accomplishing desegregation. The trial judge understood this, stating:

> The courts are concerned primarily not with the techniques of assigning students or controlling school populations, but with *whether those techniques get rid of segregation of children in public schools.* The test is pragmatic, not theoretical. (582a)

Judge McMillan was also cognizant of this Court's advice that no "universal answer" or "one plan will do the job in every case." *Green, supra*, 391 U.S. 430, 439. He knew also that this Court had emphasized that "in this field the way must always be left open for experimentation." *United States* v. *Montgomery County Board of Education*, 395 U.S. 225, 235 (1969). Thus Judge McMillan undertook a detailed and conscientious study, aided by the

skilled and intelligent advice of an unusually capable expert consultant working with the local school administrative staff, to devise "alternatives which may be shown as feasible and more promising in their effectiveness." *Green, supra*, 391 U.S. at 439. The Finger Plan was the product of this study.[63]

Where there is an available plan which will completely desegregate the schools and the board opposes it, "that may indicate a lack of good faith; and at the least it places a heavy burden upon the board to explain its preference for an apparently less effective method." *Green, supra* at 439. The board has never sustained the "heavy burden" of opposing the Finger Plan. Indeed, the board has never had any viable legal theory. The board's arguments rest largely on ideological positions against "racial balance" which are premised on a denial of the duty to integrate the schools and are in the teeth of the *Green* decision.

B. *The Court Ordered Plan Is Feasible.*

Petitioners agree with the dissenting judges below that the "feasibility" of a desegregation plan is the proper matter for inquiry. *Green, supra,* indicates that plans must be shown to be "*feasible*" and to "provide *effective* relief" (391 U.S. at 439).

The district court made detailed findings of fact supporting the conclusion that the Finger Plan is feasible and these findings are supported by substantial evidence. It was error for the court of appeals to substitute its own

---

[63] We do not contend that the Finger Plan is the only plan which will satisfy constitutional requirements in Charlotte, nor did the court below. In February, the court ordered the board to implement the Finger Plan or any other plan it might devise which would work (824a-825a). In August, the court specifically approved two other plans which the board could employ if it chose to do so and if the details were completed (Br. A33-34).

opinion that the plan required the board to engage in too much increased bussing where there was no claim that any of the district court's findings on this issue were clearly erroneous. Cf. *Northcross* v. *Board of Education of Memphis*, 397 U.S. 232, 235 (1970). As Judge Sobeloff has shown, in dissent, "there is no genuine dispute" on the feasibility of the plan; it is "simple and quite efficient" (1284a). Here are the facts.[64]

The Finger Plan requires transportation of pupils to accomplish desegregation. The system now transports 23,600 pupils by school bus and another 5,000 by common carrier.[65] The school board's proposed plan would bus about 5,000 additional children,[66] but still would not desegregate the

---

[64] The facts discussed in this section covering the feasibility of the Finger Plan are those that were in the record in the Court of Appeals.

Many of these matters were re-litigated at the hearing in July, 1970. And the significant findings of March, 1970 were reaffirmed (Br. A16-A26).

There were some new findings, all of which support our view that the Finger Plan is feasible. 1) Funds are now available from the State for the operational costs of transportation of *all* city children who live more than 1½ miles from the school to which they are assigned (Br. A11). 2) There are sufficient buses on hand or available on loan so that *no* capital expenditures are required to implement the Finger Plan immediately (Br. A18-A20, A23, A26). 3) Pre-school children are presently bused the greatest distances (Br. A16-A17, A24-A25). 4) There is an ample supply of bus drivers (Br. A21, and see A9). 5) The plan will not cause an unwarranted traffic problem (Br. A25). 6) The board already staggers the opening of schools so that adjusting of the opening and closing hours of particular schools to accommodate the transportation system would be consistent with established practice (Br. A25). 7) The total school budget for 1970-71 is approximately $66,000,000 (Br. A21, A23). Both the county and the state have more than sufficient surplus funds to pay for any conceivable expense which might be occasioned by the Finger Plan (Br. A23).

[65] See 1200a.

[66] See 1219a.

system, leaving 10 Negro schools.[67] The Finger plan by busing about 8,000 more children than the board's proposal (a total of about 13,000 more than at present)[68] will eliminate racial identifiability from every school in the system. The court of appeals affirmed the order as to the secondary students (1,500 senior high and 2,500 junior high pupils), but reversed the requirement as to elementary pupils (9,300 pupils, including 1,300 in schools to be simply rezoned, and 8,000 involved in cross busing between paired schools).[69]

The court carefully considered the busing from the standpoint of the children. The crucial finding is this:

> The court finds that from the standpoint of distance travelled, time en route and inconvenience, the children bussed pursuant to the court order will not as a group travel as far, nor will they experience more inconvenience than the more than 28,000 children who are already being transported at state expense. (1205a)

At present the *average* one-way trip in the system is over 15 miles requiring one hour and fourteen minutes.[70] Eighty percent of the buses in the system require more than one hour for a one-way trip now.[71] The average one-way trip under the court plan "for elementary students is less than seven miles, and would appear to require not over 35 min-

---

[67] The board plan would produce 9 elementary schools 83% to 100% black *serving over half of the entire black elementary population* (826a). In this plan Piedmont Junior High would be 90% black and shifting toward 100% black; segregation would actually increase by 1% more black pupils (830a).

[68] See 1219a.

[69] *Ibid.*

[70] See 1204a, 1215a.

[71] See 1204a.

utes at most, because no stops will be necessary between schools.[72]

The court of appeals ruled that busing is "a permissible tool for achieving integration" and stated that the factors to be considered in appraising busing were "the age of the pupils, the distance and time required for transportation, the effect on traffic, and the cost in relation to the board's resources" (1272a). Only the cost factors seems to have been used to support the court's decision that the elementary school plan involved too much busing. The age of the pupils seems not to have been a decisive factor since busing elementary pupils is an established tradition in Charlotte-Mecklenburg with 10,441 elementary pupils already being bused in 1969-70 (619a). There was no suggestion that the times and distances were decisive since they compared most favorably with the present practice. The average elementary school busing distances under the Finger Plan were shorter than the average trips now made and only a little over half as long as the busing distances approved by the Court of Appeals for the black high school students assigned to Independence High School (1273a).

With respect to the costs of the Finger Plan, we believe that this ground for disapproving the elementary plan is, in Judge Winter's phrase "insubstantial and untenable."[73] The court below states the cost issue in terms of the in-

---

[72] See 1215a. "The average straight line mileage between the elementary schools paired or grounded under the 'cross-bussing' plan is approximately 5½ miles" (1201a). The *trip* mileage was arrived at by the bus superintendent's method of taking straight line mileage and adding 25%."

[73] Indeed, Judge McMillan's recent findings that *no* capital outlay will be required to immediately implement the total court ordered plan (Br. A23) would seem to dispose of the matter entirely.

creased *percentage* of pupils who will be bused. The court recites that the additional elementary pupils who must be bused represent an increase of 39% over all pupils presently bused requiring a 32% increase in the bus fleet (1276a). The court also stated that the added secondary busing which was approved brought the total percentage increases to "pupils 56%, and buses 49%" (*ibid.*). These were the facts recited to support the conclusion that the board "should not be required to undertake such extensive additional busing to discharge its obligation to create a unitary school system" (1276a).

The ruling below does not contain any discussion of the costs of the Finger Plan busing "in relation to the board's resources" but only a discussion of the cost in relation to present expenditures for busing. As we have stated elsewhere in this brief, we do on any account accept the premise that such a monetary consideration should be decisive of important individual rights. All the more does it seem clear that the prior level of expenditures in operating an unconstitutional, segregated system should not be decisive in defining what constitutes a nonsegregated unitary system. But in any event, there is no foundation in this record for a conclusion that the board lacks sufficient resources to implement the Finger Plan. The board's resources are much broader than local funds because in North Carolina transportation costs for school children are largely met by the state board of education, which bears most of the operating costs and also replaces worn out buses after local authorities make the initial purchase. The capital outlay required for the 90 buses needed in the elementary school phase of the Finger Plan will be about $5,400 per bus or $486,000, an investment which will buy not only vehicles with useful lives of up to 15 years, but also the right to have them perpetually replaced at no further cost to the

local board.[74] The State will bear the operational cost of the 90 buses which was found to be $186,000 annually. When these expenditures are considered in the context of the local education budget figures, which exceeded 57 million dollars in 1969-70,[75] and the 3.5 billion dollar state education budget, they are so small as to be insignificant.

Moreover, the discussion of these costs ignore a vital fact. *The State Board of Education, a defendant in this case, already has in its possession a sufficient number of buses to implement the Finger Plan.* The case thus involves merely a decision about whether existing state resources—buses already owned by the defendant State Board of Education—will be used to integrate the Charlotte schools. Judge McMillan found that the State Board of Education had "approximately 400 brand new school busses and 375 used busses in storage, awaiting orders from school boards" (1219a).[76] As Judge McMillan put it:

> The problem is not one of availability of busses but of unwillingness of Mecklenburg to buy them and of the state to furnish or make them available until final decision of this case (1220a).

Since the State Board of Education already owns sufficient used busses in storage to implement the Finger Plan

---

[74] And, of course, none of these vehicles need be bought immediately.

> "No capital outlay will be needed to supply buses for the 1970-71 school year. The state is ready and willing to lend the few busses the board may need; replacements can be bought after actual need has been determined under operating conditions" (Br. A23).

[75] The local budget is approximately $66,000,000 for the 1970-71 school year (Br. A21, A23).

[76] The facts as to availability of busses in July, 1970 are found at Br. A18-A20.

there really is no legitimate issue in this case about the financial burden of the plan. Even if the local board had insufficient money to pay for these busses (which is not true), desegregation may not be defeated on the basis that one agency of the state does not have sufficient funds to reimburse another state agency which has an equal duty to aid in desegregation of the public schools. The appropriate principle was stated in *Cooper* v. *Aaron*, 358 U.S. 1, 19 (1958), where the Court unanimously declared that:

> State support of segregated schools through any arrangement, management, funds or property cannot be squared with the Amendment's command that no state shall deny to any person within its jurisdiction the equal protection of the laws.

It would plainly be within the power of the district court, if it proved necessary, to require the State Board of Education to loan—or even grant—the necessary buses now in storage to the Charlotte-Mecklenburg board. Cf. *Griffin* v. *County School Board*, 377 U.S. 218 (1964), where the Court required that money be levied and spent to redress constitutional rights.

C. *The Finger Plan Utilises Appropriate Techniques to Achieve Pupil Desegregation.*

We believe that the court below was correct in rejecting the board's objections to a variety of desegregation techniques used in the court ordered plan, such as busing to promote integration, creating satellite school zones in noncontiguous areas, and creating paired or clustered schools with altered grade structures. The court below pointed to the direction in *Brown II* about using "practical flexibility" in shaping remedies, as support for use of the satellite zone technique (1247a). *Brown* v. *Board of Education*, 349 U.S.

294, 300 (1955). The court also noted that the pairing and clustering of schools was approved in *Green* v. *County School Bd. of New Kent County,* 391 U.S. 430, 442, n. 6 (1968), and *Hall* v. *St. Helena Parish School Bd.,* 417 F.2d 801, 809 (5th Cir. 1969), *cert. denied,* 396 U.S. 904 (1969). There are a great many other decisions in which courts have required use of pairing and clustering techniques, sometimes necessitating transportation, in order to accomplish desegregation.[77] Adoption of the board's argument would require repudiation of techniques widely employed to accomplish the dismantling of segregated systems.

School bussing is an ordinary tool of educational administration which may properly be employed to desegre-

---

[77] Cases where courts have employed the pairing or clustering technique include: *Nesbit* v. *Statesville City Board of Education,* 418 F.2d 1040, 1042 (4th Cir. 1969) (*en banc*); *Brunson* v. *Board of Trustees of School District No. 1,* No. 14571, —— F.2d —— (4th Cir., June 5, 1970); *Green* v. *School Board of Roanoke,* No. 14335, —— F.2d —— (4th Cir., June 17, 1970); *Brewer* v. *School Board of Norfolk,* No. 14544, —— F.2d —— (4th Cir., June 22, 1970), *cert. den.* 38 U.S.L. Week 3522; *Hall* v. *St. Helena Parish School Board,* 424 F.2d 320 (5th Cir. 1970); *United States* v. *Board of Trustees of Crosby Independent School District,* 424 F.2d 625 (5th Cir. 1970); *Mannings* v. *Board of Public Instruction of Hillsbrough County,* No. 28643, —— F.2d —— (5th Cir., May 11, 1970); *Davis* v. *Board of School Commissioners of Mobile County,* No. 29332, —— F.2d —— (5th Cir., June 5, 1970), cert. pending on other issues, No. 436, O.T. 1970; *Harvest* v. *Board of Public Instruction of Manatee County,* No. 29425, —— F.2d —— (5th Cir., June 26, 1970); *Bradley* v. *Board of Public Instruction of Pinellas County,* No. 28639, —— F.2d —— (5th Cir., July 1, 1970); *Tillman* v. *Board of Public Instruction of Volusia County,* No. 29180, —— F.2d —— (5th Cir., July 21, 1970); *United States* v. *School District 151,* Cook County, Ill., 404 F.2d 1125 (7th Cir, 1968), affirming 286 F.Supp. 786 (N.D. Ill.); *Kemp* v. *Beasley,* 423 F.2d 851, 856 (8th Cir. 1970); and *Jackson* v. *Marvell School District No. 22,* 425 F.2d 211 (8th Cir. 1970).

gat
te the schools.[78] Generalized objections to school busing
to
promote desegregation do not sustain the board's bur-
der
n. Obviously some transportation is necessary in the
sys
stem. It is plainly not a valid objection to busing that it
is
used to promote integration, for this is the constitutional
im
perative. The board has no satisfactory theory to dif-
fer
entiate that busing which is admittedly necessary from
the
at which it finds objectionable, i.e., to legally differenti-
ate
between "good" and "bad" busing.

The board attacks arrangements which involve transport-
ing
children from their zone of residence to a non-adjacent
zone
ne. But pupils have no inherent right to attend any par-
ticular school because of their place of residence. A child's
"o
wn neighborhood school zone" does not exist in the order
of
natural phenomena. It is the product of school board
de
cision, i.e., state action. Attendance areas and the grades
se
rved by particular buildings are always subject to change
and often are changed. There is no good reason not to use
av
ailable transportation facilities to desegregate the
scho
ols, or to limit that transportation to an artificial
"a
djacent" zone. Segregated schools need not inevitably
fo
llow segregated housing patterns. There is nothing in-
ex
orable about such segregation; there is merely the ap-
pearance of inevitabilty. The general case for busing to
promote integration is well stated in "On The Matter of

Bussing: A Staff Memorandum from the Center For Urban Education" (February 1970):

> Good education, as well as the moral imperatives of a pluralistic society, demands desegregation of the schools. How can school desegregation be accomplished in cities and suburbs with long-established racial housing patterns? What method can circumvent the hard fact that segregated neighborhoods foster segregated neighborhood schools? One tried and tested means is the transportation of children out of their immediate neighborhoods by school bus.
>
> Riding the yellow school bus is as much a symbol of American education in 1970 as the little red schoolhouse was in 1900. And, until recently, it had conveyed no emotional overtones other than nostalgia for lost youth. In a country as large as ours, neighborhood schools within walking distance are a relatively recent luxury of the cities.
>
> Most children take a bus or car to school. Children in rural areas ride to central schools. Children in suburbia queue up on the corner for the bus that their parents at open school board meetings insist is theirs by right. Private and parochial school pupils board school busses and ride often for half an hour to their destination. In large cities children travel public subways and busses, sometimes more than an hour each way, to special schools of music and art, performing arts, or science. And parents of handicapped children have maintained steady pressures on state legislatures to provide state-supported bussing to schools filling special educational needs. More recently, southern parents have rented their own busses to transport white children to private, segregated schools. In none of these cases have parents complained of harm to their children by the bus ride, or of the expense of the busses.

Transferring children from one school to another is literally a means to an end—the end of the bus ride should be better schooling. In cases where the transfer becomes an end in itself, the results are predictably disappointing. Other things being equal, a child from a racially isolated neighborhood will find an integrated school a better environment for learning than a school in which his classmates are equally isolated. But there is no magic in a bus ride which offsets poor planning, a teacher's dislike or lack of respect for a child, or a disregard of emergency procedures.

The poverty of the board's ideas in its arguments against busing to integrate schools is emphasized by the facts with respect to the current use of busing in Mecklenburg. Many new white schools are located so that few pupils can walk to schools. The walk-in school is basically a phenomenon of the black neighborhoods. Of 17,000 children in black schools, only about 541 are now transported to school (1204a). The white schools have the opposite pattern. For example, in six white high schools and two junior high schools with a total of 12,184 pupils, only 96 students live within the mile and a half walking distance (1203a). Some 12,088 of these pupils are eligible for transportation and 5,349 of them ride the school buses (*id.*). Many pupils use private transportation.

The more one studies the detailed facts with respect to school bus transportation in Charlotte, and the data in the record with respect to such transportation in North Carolina generally, the more it seems clear that the only reason not to use buses to integrate the schools is to keep them segregated.

Judge Sobeloff found the majority's conclusion with respect to the elementary plan so inconsistent with the deci-

sion approving the use of busing, satellite zoning, and similar techniques for secondary students that he said the "decision totally baffles me" (1289a). The major distinction between the busing which is approved and that which is rejected is that the secondary plans primarily increased busing of black students to formerly white schools while the elementary plan requires busing of white children as well as Negroes. We are unlikely to ever end the dual school systems until it becomes accepted that the inconveniences incident to reorganizations of the school systems will not be borne by black pupils alone but will be shared by the white community. Equal protection does require that desegregation plans be generally equitable and not place the entire burden on blacks. Judge McMillan announced at the time he approved the interim plan for 1969-70 that he would not again approve a plan for one-way busing (590a-591a). He wrote that:

> If, as the school superintendent testified, none of the modern, faculty-integrated, expensive, "equal" black schools in the system are suitable for desegregation now, steps can and should be taken to change that condition before the fall of 1970. Unsuitability or inadequacy of a 1970 "black" school to educate 1970 white pupils will not be considered by the court in passing upon plans for 1970 desegregation. (591a)

D. *The Neighborhood School Theory Cannot Be Justified on the Basis of History and Tradition Because It Was Widely Disregarded in Order to Promote Racial Segregation.*

Much of the argument about preserving the neighborhood school and against busing is simply a fake—a spurious attempt to suggest that there is a great traditional right that pupils have always had to go on foot to a nearby

school located conveniently to their homes. That concept has little reality in a state like North Carolina where 54.9 percent of the pupils ride a school bus every day an average trip of 12 miles one way (1199a). The real tradition of North Carolina schools, and other states in the Fourth Circuit, is a tradition not of neighborhood schools, but of separate "white" and "Negro" schools, whether or not the neighborhoods were separate.

It has not been so very many years since the Fourth Circuit solemnly assembled to hear school men attempt to justify busing Negro children not only out of their neighborhoods but out of their counties to segregated all-black schools. These cases give one an interesting perspective about the arguments current now. The following are some busing arrangements revealed in cases in the Fourth Circuit:

1. *Griffin* v. *Board of Education of Yancey County*, 186 F. Supp. 511 (W.D. N.C. 1960). The court found that Negro pupils were being bused every day an 80 mile round trip from Burnsville to Asheville. While the case was pending without any relief, the board finally built a school for the 25 Negroes in Yancey County with a *changed grade structure*: to wit, all 12 grades were taught in two rooms for 25 pupils. Judge Warlick's opinion notes that bus transportation was used extensively throughout the State.

2. *School Board of Warren County, Va.* v. *Kilby*, 259 F.2d 497 (4th Cir. 1958). The school board appealed an order requiring desegregation where some Negro pupils were bused out of the county 25 miles each way and others were bused 50 miles each way to a boarding school where they were required to remain all week and return home on weekends. We repeat: the school board appealed seeking to preserve this arrangement.

3. *Goins* v. *County School Board of Grayson County, Va.*, 186 F. Supp. 753 (W.D. Va. 1960), stay denied, 282 F.2d 343 (4th Cir. 1960). Negro pupils bused 30-40 miles out of their county.

4. *Corbin* v. *County School Board of Pulaski County, Va.*, 177 F.2d 924 (4th Cir. 1949) (bus travels out of county 60 miles per day). Eleven years later, see *Crisp* v. *County School Board of Pulaski County, Va.* (W.D. Va. 1960), 5 Race Rel. L. Rep. 721.

Similar arrangements involving out of county assignments were condemned in *Buckner* v. *County School Board of Greene County, Va.*, 332 F.2d 452 (4th Cir. 1964), and *Walker* v. *County School Board of Floyd County, Va.* (W.D. Va. 1960), 5 Race Rel. L. Rep. 714.

The conception that pupils were entitled to go to their nearest school got short-shrift in the context of the segregated system. Dual overlapping attendance areas within which blacks were often denied access to nearby white facilities were common, *Jones* v. *School Board of Alexandria, Va.*, 278 F.2d 72, 76 (4th Cir. 1960). Also common were "satellite zones" and non-contiguous attendance zones. See, e.g., *Haney* v. *County Board of Education of Sevier County, Ark.*, 410 F.2d 920 (8th Cir. 1969). See, generally, the excellent monograph commissioned by the U.S. Office of Education, Weinberg, "Race and Place, A Legal History of the Neighborhood School" (U.S. Govt. Printing Office, 1967). Weinberg recalls the non-contiguous *satellite zone* in the Arlington County, Virginia case called the "North-Hoffman Boston Zone" which was an all-black satellite zone located a 20 minute bus ride from the school:

> In much-litigated Arlington County, Va., 30 Negro children applied under the State pupil placement law for transfer to a white school. The school board re-

jected 26 of the 30 applications, claiming it based its decision on five criteria: "attendance area, overcrowding at [white] Washington and Lee High School, academic accomplishment, psychological problems, and adaptability."[26] Seven of the students had applied for transfers on the ground that three white schools were nearer to their home. As the court explained: "However, the school authorities had other factors to consider, such as the adoption of presently established school bus routes, walking distances and the crossing of highways, as well as that [all-Negro] Hoffman-Boston was but a 20 minute bus ride for these pupils."[27]

---

[26] *Thompson* v. *County School Board of Arlington County*, 166 F. Supp. 529, 532 (1958).

[27] *Ibid.* at 533.

Of course, current practices in Charlotte-Mecklenburg sanction deviations from the neighborhood school ideal to promote segregation. The district judge disapproved a board request for a modification of the 1969-70 plan saying, "As this court pointed out before, bus transportation has too long been used as a tool to promote segregation. The year 1969 is too late in the day to start using this tool for that purpose in new situations" (595a). The free transfer plan now in effect allowed 1,200 white students to transfer out of their neighborhood schools in black neighborhoods in 1968-69 (453a).

Judge McMillan was right when he ruled: "The neighborhood school theory has no standing to override the Constitution" (300 F. Supp. at 1369; 306a).

E. *The Finger Plan Is Necessary to Accomplish the Constitutional Objective.*

If there was some proposal in the record which would be *equally effective or more effective* in eliminating segrega-

tion, there would be room for discussion about which plan is most desirable. Judge McMillan demonstrated that he was prepared to accept school board alternatives which produced equal results in accomplishing desegregation. He preferred such "home-grown products" even where he believed the expert consultant's proposals were more efficient. But an essential finding which supports the Finger Plan for elementary schools is Judge McMillan's conclusion that it was *necessary* to adopt a plan of this type to accomplish the result of desegregation. The court found:

> Both Dr. Finger and the school board staff appear to have agreed, and the court finds as a fact, that for the present at least, there is no way to desegregate the all-black schools in Northwest Charlotte without providing (or continuing to provide) bus or other transportation for thousands of children. All plans and all variations of plans considered for this purpose lead in one fashion or another to that conclusion. (1208a)

Judge Sobeloff's dissenting opinion noted that "The point has been perceived by the counsel for the board, who have candidly informed us that if the job must be done then the Finger plan is the way to do it" (1282a).

F. *The Court of Appeals Applied an Improper Standard for Appellate Review of the District Court's Discretionary Determination in Formulating Equitable Relief.*

Where the constitutional objective of integration is accomplished a district court's judgments on issues relating to the feasibility of particular local arrangements should not be upset except for plain abuse of discretion. There is, of course, no "discretion" to keep schools segregated. But there must be a substantial area of discretion for trial

judges to make practical judgments about the feasibility of local school desegregation arrangements.

The Finger elementary plan ought to be upheld if the case is governed by the traditional rule for appellate review of a chancellor's decree in equity. The prevailing rule is that equitable discretion in framing remedies is necessarily broad and that a strong showing of abuse of discretion must be made to reverse such a decree. *United States* v. *W. T. Grant Co.*, 345 U.S. 629 (1953); *Continental Illinois Nat. Bank & Trust Co.* v. *Chicago R. I. & P. R. Co.*, 294 U.S. 648, 677 (1935); *United States* v. *Corrick*, 298 U.S. 435 (1936); *Rogers* v. *Hill*, 289 U.S. 582 (1933). In order to set aside the equity decree the appellant "must demonstrate that there was no reasonable basis for the district judge's decision," and thus that the remedy is so lacking in rationality as to amount to an abuse of discretion. *United States* v. *W. T. Grant Co.*, *supra*, 345 U.S. at 634.

This Court's decisions in school cases have relied on traditional equitable principles on remedial issues. In the second *Brown* decision the Court invoked the tradition of equity which was said to be "characterized by a practical flexibility in shaping its remedies and by a facility for reconciling public and private needs" (349 U.S. at 300). The *Brown II* Court cited with approval a passage in *Alexander* v. *Hillman*, 296 U.S. 222, 239 (1935), stating.

> Treating their established forms as flexible, courts of equity may suit proceedings and remedies to the circumstances of cases and formulate them appropriately to safeguard, conveniently to adjudge and properly to enforce substantial rights of all the parties before them.

In *Griffin* v. *School Board*, 377 U.S. 218, 232-233 (1964), the Court said that "relief needs to be quick and effective,"

and that a federal court could require a county to levy taxes if necessary to maintain a non-discriminatory public school system. *Green* v. *County School Board,* 391 U.S. 430, 439 (1968), emphasized that in formulating a remedy district courts were to assess "the circumstances present and the options available in each instance." In *United States* v. *Montgomery County Board of Education,* 395 U.S. 225, 235 (1969), the Court emphasized that "in this field the way must always be left open for experimentation." In the *Montgomery County* case the Court reversed a court of appeals decision which labeled the district judge's order too rigid and inflexible in favor of the trial court's "more specific and expeditious order."

There is nothing in this development of school desegregation law since *Brown* which warrants the departure announced by the plurality opinion of Judge Butzner for the court below from the traditional rule of appellate review. This new test of "reasonableness" enables the reviewing court to set aside the trial court's discretion on the ground that the appeals court majority would prefer another mode of relief albeit less effective. This runs exactly counter to the spirit of *Green* which declares that the result—actual desegregation—is the imperative thing and that the methodology of desegregation plans is secondary. It also runs counter to the philosophy of *Alexander, Carter* and *Dowell, supra,* which place a premium on the immediate implementation of constitutional rights pending the completion of litigation. The reasonableness test allows so much scope for unpredictable reversals of those decrees which accomplish actual desegregation as to substantially nullify *Alexander.* The reasonableness test signals the need for trial courts to adopt a "go-slow" cautious approach. Although busing is approved in principle in the opinion below, the result makes it clear that busing must be

limited. The standard of "reasonableness" is broad and vague, but it does not allow broad discretion for trial courts to order busing. Any plan found objectionable by a school board can colorably be said to be "unreasonable" justifying at least a stay pending appeal. The "reasonableness" test is "deliberate speed" in a new guise.

CONCLUSION

For the foregoing reasons, it is respectfully submitted that the judgment of the court of appeals should be reversed and the judgment of the district court reinstated with directions that the desegregation of the schools proceed forthwith.

Respectfully submitted,

APPENDIX

Memorandum of Decision and Order, dated August 3, 1970

I.

Summary

Pursuant to the mandates of the Supreme Court of the United States and the Fourth Circuit Court of Appeals, further hearings (eight days of them) have been conducted July 15-24, 1970, regarding methods for desegregation of the public schools of Charlotte and Mecklenburg County, North Carolina, and the known plans for desegregation of the elementary schools have been reconsidered.

The Court again finds as a fact that compliance with all parts of the desegregation order for senior high, junior high and elementary schools now in effect will require, at the most, transportation of 13,300 children on 138 busses.

The elementary portion of the order will require, at the most, transporting 9,300 children on 90 buses. The defendants already own or control at least 80 safely operable busses not in use on regular routes, *and* they expect early delivery of 28 more new ones. Such buses as may be needed beyond these 108 can be borrowed for a year without cost from the State.

No capital outlay will be required this year to comply with the court's order. The School Board and the county government have ample surplus and other funds on hand to replace with new busses as many of the used buses as 1970-71 experience may show they actually need. If they have to buy 120 new ones, at $5,500 each, the cost will approach $660,000, which is less than the cost of two days' operation of the schools.

Memorandum of Decision and Order, dated August 3, 1970

Regardless of any order of this court, all children assigned to any school more than 1½ miles from home are, under state law and regulation, now entitled to bus transport.

The 5/4 School Board majority have not obeyed the orders of the Circuit Court to prepare a new plan for elementary schools in place of their rejected plan. The court ordered plan for all schools has been in effect since June 29, 1970 under the mandate of the Supreme Court.

The School Board has not used all reasonable means to desegregate the elementary schools.

At least three reasonable plans are available to the Board: (1) the court ordered (Finger) plan; (2) the 4/5 minority Board ("Watkins") plan; and (3) an earlier draft of the Finger plan.

The Circuit Court directed this court to have a plan in effect for the opening of schools in the fall, and the Supreme Court on June 29, 1970 put this court's February 5 order back into effect pending these proceedings. The court ordered (Finger) plan is the only complete plan before the court, and it is a reasonable plan. The Board is herein directed to put the court ordered plan (with authorized modifications, if desired) into effect with the opening of school in the fall, unless they exercise the options set out herein to adopt the 4/5 minority Board plan (the "Watkins" plan) or an earlier draft of the Finger plan, or any combination of these three plus excerpts from the HEW plan, which complies with the directives in the February 5 order. The Board is directed to notify the court in writing by noon on August 7, 1970, as to the course of action which it has voted to follow.

Board plans for desegregation of the faculties of all schools and of the student bodies of the senior high schools and the junior high schools are approved.

Memorandum of Decision and Order, dated August 3, 1970

II.

Brief History of Proceedings.

On April 23, 1969, after lengthy hearings and research, an order was entered that the defendants submit a plan for the desegregation of the schools of Charlotte and Mecklenburg County, North Carolina, to be predominantly effective in the fall of 1969, and to be completed by the fall of 1970. Among other things the court found that under North Carolina law there is no "freedom of choice" to attend any school; that the Board of Education has the total control over the assignment of students to schools; and that residence has never created a right to attend a particular school. It was further found that all the black and predominantly black schools of this school system are illegally segregated. The November 7, 1969 opinion contained detailed guidelines for desegregating this particular group of schools, and included the following findings:

> "The black schools are for the most part in black residential areas. However, that does not make their segregation constitutionally benign. In previous opinions the facts respecting their *locations*, their *controlled size* and their *population* have already been found. Briefly summarized, these facts are that the present location of white schools in white areas and of black schools in black areas is the result of a varied group of elements of public and private action, all deriving their basic strength originally from public law or state or local governmental action. These elements include among others the legal separation of the races in schools, school busses, public accommodations and housing; racial restrictions in deeds to land;

> zoning ordinances; city planning; urban renewal; location of public low rent housing; and the actions of the present School Board and others, before and since 1954, in locating and controlling the capacity of schools so that there would usually be black schools handy to black neighborhoods and white schools for white neighborhoods. There is so much state action embedded in and shaping these events that the resulting segregation is not innocent or *"de facto,"* and the resulting schools are not "unitary" or "desegregated."

Segregation of black children into black schools is *not* because of residential patterns, but because of assignment and other policies of the School Board, including the call upon segregated housing and school site selection to lend respectability to those policies.

(There is attached hereto an 18-page exhibit listing approximately 65 sections of the General Statutes of North Carolina and 2 sections of its Constitution under which the segregation of the black race in North Carolina has been the policy of our Constitution and the letter of our statutes for many years. Many of these provisions were repealed by the 1969 General Assembly, but most of them were still on the books when the April 23, 1969 opinion was written.) [The exhibit referred to is not printed herein.]

A consultant, Dr. John A. Finger, Jr., was appointed by the court in December, 1969, to draw a desegregation plan after it became apparent that the defendants had no such plan and had not resolved to prepare one which would desegregate the schools. The development of the plan is described in the order of February 5, 1970, the supplemental historical memorandum of March 21, 1970, and the supple-

mental findings of fact dated March 21, 1970. Briefly stated, the court-appointed consultant prepared plans for the desegregation of all the black schools. Faced with the imminent existence of valid desegregation plans, the Board then went to work and prepared some plans of its own.

This court approved the Board's plan for senior high schools (with one minor change); it gave the School Board a choice of several plans or procedures as to junior high schools; and it disapproved the Board's plan for elementary schools, because it left half the black children in black schools, and ordered into effect one of the plans designed by the consultant, Dr. Finger, for desegregation of the elementary schools.

The Circuit Court of Appeals granted a stay as to the elementary schools and the Supreme Court left the stay in effect. The district court then, in the order of March 25, 1970, postponed until September 1, 1970, the implementation of the plans for junior and senior high schools because the stays issued by the Circuit Court and the Supreme Court had taken off the pressure for mid-year 1969-70 desegregation.

Before the appeal to the Fourth Circuit was concluded, the defendants, including the Governor and the State Board of Education, voiced strenuous opposition to compliance with the court order, basing their objections in part upon parts of the 1964 Civil Rights Law and upon North Carolina's "anti-bussing law" which had been passed by the General Assembly a few weeks after this court's original April 23, 1969 order. A three-judge court was convened and has met and has decided that the "anti-bussing law" in pertinent part is unconstitutional, and eventually issued appropriate injunctions.

The Circuit Court of Appeals then issued its opinion on May 26, 1970. It affirmed the principal findings of fact and legal conclusions of the district court, including the finding that the segregated residential housing upon which the defendants relied for defense was caused by forces deriving their basic strength from governmental action. It (1) approved the desegregation of faculties, (2) approved the plans for desegregation of junior high schools, and (3) approved the plans for desegregation of senior high schools all as ordered by the district court. It expressly *dis*approved the Board's plan for elementary schools because it left half the black elementary children in "black" schools, and it remanded the matter for the school board to prepare a new plan using all reasonable means of desegregation, and for the district court to reconsider the assignment of elementary pupils under a theory of "reasonableness". The district court was directed to put a plan into effect for the fall term 1970.

The Supreme Court on June 29, 1970, entered an order reading in pertinent part as follows:

> ". . . The petition for a writ of certiorari is granted, provided that the judgment of the Court of Appeals is left undisturbed insofar as it remands the case to the district court for further proceedings, which further proceedings are authorized, and the district court's judgment is reinstated and shall remain in effect pending those proceedings."

At the July 15-July 24 hearings the defendants announced that:

> (a) Faculties have been assigned for all schools according to the February 5, 1970 order, so that when

schools open in September all faculties will have about 75% white teachers and about 25% black teachers;

(b) The senior high schools will be desegregated this fall in accordance with the plan previously approved by the district court and by the Circuit Court;

(c) The junior high schools will be desegregated this fall in accordance with the plan previously approved by the district court and by the Circuit Court; and

(d) As to elementary schools the majority of the defendants have no official plan and no plan of action for desegregation except the plan, previously rejected by both district court and the Circuit Court, which would leave half the black elementary children in segregated schools.

Since the school board has refused to obey the Circuit Court's instructions to file a new elementary plan by June 30, 1970, it might, were this an ordinary case, have no standing to be heard further. However, the case affects numerous people who, though not Board members, are entitled to have the matter further considered as fully and fairly as possible.

This court has tried to follow faithfully the orders of the Supreme Court and the Circuit Court. This presents some unique problems; the Circuit Court's "reasonableness" order is vague; the Supreme Court's order allowing certiorari is cryptic, and raises and leaves unanswered several major questions; neither order is a clear guide for this court. However, this court believes that, regardless of the Board's continued default, this court's duty is to reconsider the elementary desegregation problem in view of

the questions whether the methods previously required by the court are reasonable and whether the Board has exhausted all reasonable methods available to it.

III.

The Extent of Continued Segregation—And Its Results.

The schools are still segregated as described in this court's memorandum opinion of November 7, 1969. Over 9,000 black children attend schools that are 100% black. Two-thirds (16,000) of the black children still attend racially identifiable "black" schools. Fifty-seven schools are "white" and twenty-five are predominantly "black."

The tangible results of segregation continue to be apparent from the 1969-70 Stanford Achievement Tests in Paragraph Meaning and Arithmetic, given during the sixth month of school, for grades 3, 6, 8 and 10. In "black" schools third graders perform at first grade or early second grade levels, while their contemporaries at "white" schools perform at levels generally from one to two grades higher. Sixth graders in the black schools (Double Oaks and Bruns Avenue, for example) perform at third grade levels while their contemporaries at Olde Providence, Pinewood, Lansdowne and Myers Park perform at seventh or eighth grade levels. In the eighth grade we see Piedmont Junior High students reading at early fifth grade levels while their contemporaries at McClintock and Alexander Graham read at early ninth grade levels. In the tenth grade, on a scale where the *average* is 50, the black high school, West Charlotte, had English scores of 38.30 and mathematics scores of 35.89; Harding, nearly half black, had scores of 42.89 and 40.76; while the obviously "white" schools had scores ranging from 43.2 to 52.2. At First Ward Elementary

School only two black *third* graders out of 119 tested scored as high as third grade, while 100 were still at first grade level of proficiency as to paragraph meaning.

Of factors affecting educational progress of black children, segregation appears to be *the factor under control of the state* which still constitutes the greatest deterrent to achievement.

IV.

The Legal Basis For Desegregation.

A. *Segregated public schools are unconstitutional.*—Desegregation is based on the Constitution as interpreted in *Brown* v. *Board of Education*, 347 U. S. 483 (1954), where the Supreme Court said:

> "'Segregation of white and colored children in public schools has a detrimental effect upon the colored children. The impact is greater when it has the sanction of the law; for the policy of separating the races is usually interpreted as denoting the inferiority of the Negro group. A sense of inferiority affects the motivation of a child to learn. *Segregation with the sanction of law, therefore, has a tendency to* [*retard*] *the educational and mental development of Negro children and to deprive them of some of the benefits they would receive in a racial*[*ly*] *integrated school system.*'
>
> • • •
>
> "We conclude that in the field of public education the doctrine of 'separate but equal' has no place. *Separate educational facilities are inherently unequal.* . . . ." (Emphasis added.)

Memorandum of Decision and Order, dated August 3, 1970

Green v. *New Kent County*, 391 U.S. 430 (1968) placed upon school boards the burden

> ". . . to come forward with a plan that promises realistically to work, and promises realistically to work *now*," [and]
>
> ". . .to convert promptly to a system without a 'white' school and a 'Negro' school, *but just schools*." (Emphasis added.)

The principal difference between New Kent County, Virginia, and Mecklenburg County, North Carolina, is that in New Kent County the number of children being denied access to equal education was only 740, whereas in Mecklenburg that number exceeds 16,000. If *Brown* and *New Kent County* and *Griffin* v. *Prince Edward County* and *Alexander* v. *Holmes County* are confined to small counties and to "easy" situations, the constitutional right is indeed an illusory one. A black child in urban Charlotte whose education is being crippled by unlawful segregation is just as much entitled to relief as his contemporary on a Virginia farm.

B. *"Racial balance" is not required by this court.*—The November 7, 1969 order expressly contemplated wide variations in permissible school population; and the February 5, 1970 order approved plans for the schools with pupil populations varying from 3% at Bain Elementary to 41% at Cornelius. This is not racial balance but racial diversity. The purpose is not some fictitious "mix", but the compliance of this school system with the Constitution by eliminating the racial characteristics of its schools.

C. *"Bussing" is still an irrelevant issue.*—Until the end of the 1969-70 school year, state law and regulations au-

thorized bus transportation for almost all public school children who lived more than 1½ miles from the school to which they were assigned. The excluded few were those inner-city children who both lived and attended school within the old (pre-1957) city limits.

If an inner-city child was assigned to a suburban or a rural school, or if a rural or suburban child was assigned to an inner-city school, he *was* entitled to bus transport.

Under those regulations, virtually all the children covered by the court order of February 5, 1970, were entitled to bus transport under *then existing* state regulations *even if the order of this court had not mentioned transportation.*

In *Sparrow* v. *Gill*, 304 F.Supp. 86 (1969), a three-judge federal court ordered an end to the discrimination against the inner-city children (and thereby in effect ordered bus transport for those children) by requiring the school authorities to discontinue transport for suburban children unless they also offered it to inner-city children.

The state authorities have announced intention and promulgated rules to comply with this decision by providing transport on the usual basis for *all* city children who live over 1½ miles from school.

The local School Board, in its last plan for partial elementary desegregation, stated that

> "Transportation will be provided to and from school for all students who are entitled thereto under state law and applicable rules and regulations promulgated by the State."

(Without such transportation even the Board's own plan would have left children, in numbers they estimate at nearly 5,000, assigned to schools too far away to reach.)

Memorandum of Decision and Order, dated August 3, 1970

In view of the above facts, every child assigned to any school over 1½ miles from his home is entitled to bus transportation in North Carolina.

The issue is not, "Shall we bus children?" but "Shall we *withhold* transportation already available?"

In *Griffin* v. *Prince Edward County*, 377 U.S. 218 (1964), the Supreme Court held that a county could be required to recreate an entire public school system rather than keep it closed to avoid desegregation. The same principle would seem to apply here.

D. *This is a local case in a local court—a lawsuit—to test the constitutional rights of local people.*—The *principles* which outlaw racial discrimination in public schools certainly are of nationwide application, but the *facts* and results may vary from case to case. This is a local suit involving actions of the State of North Carolina and its local governments and agencies. The facts about the development of black Charlotte may not be the facts of the development of black Chicago or black Denver or New York or Baltimore. Some other court will have to pass on that problem. The decision of the case involves local history, local statutes, local geography, local demography, local state history including half a century of bus transportation, local zoning, local school boards—in other words, local and individual merits.

This court has not ruled, and does not rule that "racial balance" is required under the Constitution; nor that all black schools in all cities are unlawful; nor that all school boards must bus children or violate the Constitution; *nor that the particular order entered in this case would be correct in other circumstances not before this court.*

The orders of this court have been confined to the only area they can properly embrace, and that is *the rights of*

the particular parties represented in this case, on the particular facts and history of this case.

E. *The issue is not the validity of a "system", but the rights of* INDIVIDUAL PEOPLE.—If the rights of citizens are infringed by the system, the infringement is not excused because in the abstract the system may appear valid. "Separate but equal" for a long time was thought to be a valid system but when it was finally admitted that individual rights were denied by the valid system, the system gave way to the rights of individuals.

F. *The Issue Is One Of Constitutional Law—Not Politics.*—At the hearings the defendants offered public opinion polls and testimony that parents don't like "bussing," and that this attitude produces an adverse educational effect upon the minds of the children. The court has excluded such evidence, and must continue to proceed unaffected, if possible, by this and other types of political pressure and public opinion.

This is not out of disregard for the opinions of neighbors. A judge would ordinarily like to decide cases to suit his neighbors. Furthermore, as first suggested on August 15, 1969, it may well be that if the people of the community understood the facts, as the court has been required to learn and understand them, they would reach about the same conclusions the court has reached.

To yield to public clamor, however, is to corrupt the judicial process and to turn the effective operation of courts over to political activism and to the temporary local opinion makers. This a court must not do.

In the long run, it is true, a majority of the people will have their way. The majority must be a majority of the pertinent voting group. As our slave-owning grandfathers

of the South learned in 1865, the pertinent voting group on constitutional matters includes the people and their elected representatives from the nation at large, not just the South, and not just Mecklenburg County. Methods exist to amend the Constitution. If the Constitution is amended or the higher courts rule so as to allow continued segregation in the local public schools, this court will have to be governed by such amendment or decisions. In the meanwhile, the duty of this and other courts is to seek to follow the Constitution in the light of the existing rulings of the Supreme Court, and under the belief that the constitutional rights of people should not be swept away by temporary local or national public opinion or political manipulation.

Civil rights are seldom threatened except by majorities. One whose actions reflect accepted local opinion seldom needs to call upon the Constitution. It is axiomatic that persons claiming constitutional protection are often, for the time being, out of phase with the accepted "right" thinking of their local community. If in such circumstances courts look to public opinion or to political intervention by any other branch of the government instead of to the more stable bulwarks of the Constitution itself, we lose our government of laws and are back to the government of man, unfettered by law, which our forefathers sought to avoid.

Lord Edward Coke, Chief Justice of the Court of Common Pleas of England, may have summed it up when in 1616 he wrote, responding to a peremptory demand from the King's attorney general, that he must deny the King's request because under his oath his obligation was that he

> "... shall not delay any person of common right for the letters of the King or of any person nor for any other cause ...."

G. *The duty to desegregate schools does not depend upon the Coleman report, nor an any particular racial proportion of students.*—The essence of the *Brown* decision is that segregation implies inferiority, reduces incentive, reduces morale, reduces opportunity for association and breadth of experience, and that the segregated education itself is inherently unequal. The tests which show the poor performance of segregated children are evidence showing one result of segregation. Segregation would not become lawful, however, if all children scored equally on the tests.

Nor does the validity of *Brown* depend upon whether the system contains ideal proportions of black and white students. The Charlotte-Mecklenburg system does contain a theoretical "ideal" 70-30 proportion of white and black students. This has some bearing upon the reasonableness of any particular local plan or part of such plan. However, it does not give rise to any legitimate contention that *Brown* may be ignored where you cannot have at least 60% or 70% white children in a school. The HEW plan providing for 57% black students in a group of schools may well be constitutional in some other system, though unconstitutional in Mecklenburg where a school 57% black is immediately racially identifiable as a "black" school.

V.

The Reasonableness of the Specific Methods and the Overall Plans Available to Desegregate the Black Charlotte Schools.

A. *The facts under which any question of "reasonableness" must be judged.*—From the lengthy and largely repetitious testimony at the July 15-24 hearings, and from previous evidence, the following facts bearing on "reasonableness" are found:

Memorandum of Decision and Order, dated August 3, 1970

1. In North Carolina the school bus has been used for half a century to transport children to *segregated consolidated* schools. Last year 610,000 children, comprising nearly 55% of the state's public school population, were transported daily on school busses. With the 1970 extension of transportation to inner-city children, the average daily school bus population of North Carolina this September will reach perhaps three-fifths of all public school children. Those eligible for transport are far more numerous. The "anti-bussing law" has been held unconstitutional.

2. Some 70.9% of these bussed children are in the first eight grades. There may be more first graders than children of any other age riding school busses.

3. The academic achievement tests quoted in this and previous orders show that the later desegregation is postponed in this school district the greater the academic penalties are for the black children. By the sixth grade the performance gap is several grades wide. By the eighth grade it may be four grades wide.

4. School bus transportation is safer than any other form of transportation for school children.

5. The defendants have come forward with no program nor intelligible description of "compensatory education," and they advance no theory by which segregated schools can be made equal to unsegregated schools.

6. In Charlotte-Mecklenburg approximately 23,300 children in grades one through twelve (plus more than 700 kindergarten children, ages four and five) ride some 280 schools busses to school every day. The school bus routes for the four and five years olds vary from seven miles to thirty-nine miles, one way. The average one way bus route

in the system today is about an hour and fifteen minutes. Average daily bus travel exceeds forty miles.

7. Approximately 5,000 children of all ages rode public transportation (City Coach Company) every day of the 1969-70 school year at reduced fares, or 20¢ a day (10¢ each trip).

8. The State Department of Public Instruction has announced that it will pay for transportation of children on city bus systems or by other contract carriers at whatever rate may be approved by the North Carolina Utilities Commission. City Coach Company has requested a fare increase. City Coach has indicated a capacity to transport between 6,000 and 7,000 pupils daily if they get fares and routes satisfactorily established.

9. There are only two adult male drivers out of some two hundred and eighty regular bus drivers who drove school busses during the 1969-70 school year, and only about seventeen adult women who drove kindergarten school busses during that year. The other 260-plus drivers are boys and girls, 16, 17 and 18 years old.

10. There is no black residential area in this school system which is so large that the students can not be afforded a desegregated education by reasonable means. The additional length of travel required to implement the best available plans for desegregating the system is less than the average distance of bus transportation now being provided elementary children under existing bus practices, and the travel times are less than times required by existing bus routes.

11. The offer of transportation to encourage "freedom of choice" is ineffectual. It was expressly ordered by this court on April 23, 1969, and put into effect by the defendants in the fall of 1969; and it has had no substantial effect upon the exercise by black children of freedom of choice to go to white schools.

12. There is no "intractable remnant of segregation" in this school system. No part of the system is cut off from the rest of it, and there is no reasonable way to decide what remnant shall be deemed intractable.

13. The regular bus routes are about 280 in number, including 17 bus routes transporting four and five-year-old children to child development centers (kindergartens).

14. Up until the July 15, 1970 hearings, the defendants had allowed the court to believe they only had 280 buses plus a few spares. On the last day of the hearing, however (July 24, 1970), some amazing testimony was developed on cross-examination of the witness J. W. Harrison, the Transportation Superintendent. He testified and the court finds as facts that *in addition to* the 280 "regular" busses, the Board's bus assets include at least the following:

(i)	Spare buses	20
(ii)	Activity buses (each driven less than 1,000 miles a year)	29
(iii)	Used buses replaced by new ones in 1969-70	30
(iv)	New buses currently scheduled for replacement purposes and expected to be delivered in near future	28
	Total:	107

15. It only requires, at the most, 138 busses to implement the court ordered plans for desegregation of all the high schools, junior high schools, and elementary schools in the county!

16. In addition to this, the State school Bus Transportation Department informed the local defendants in early 1970 that there were 75 new busses available to the local school system if they wanted them, out of the 400 new buses then held by the State.

17. As of July 18, 1970, it was stipulated that the State Board of Education had 105 new busses on hand and 655 new ones on order, of which some 289 had been manufactured.

18. It was stipulated that by September 1st the State Department of Education would have approximately 400 secondhand busses on hand and available on loan, without cost, for local school boards to use in 1970-71.

19. According to Defendants' Exhibit 35, a letter of July 10, 1970 from the State Superintendent of Public Instruction to the Superintendent of the Charlotte-Mecklenburg school system:

> "At the present time approximately 400 discarded busses are available at various school garages in the state *that could safely be used, if necessary,* on a temporary basis for the transportation of additional children." (Page 4) (Emphasis added.)
>
> "In the event discarded busses must be used on a temporary basis the state will expect a local school unit to replace the discarded bus pressed back into service

as early as possible and at least by the beginning of the following fiscal year." (Page 6)

• • •

"We would request school units that hold title to these [old] *busses to transfer the title without cost to the school unit needing to use these vehicles on a temporary basis."* (Page 6) (Emphasis added.)

• • •

"It would be the responsibility of the school unit requesting temporary use of old busses to put the old busses in good mechanical repair after they receive delivery of the bus." (Page 7)

20. The testimony of Mr. Harrison was that for a 54-passenger bus a set of new tires, if needed, would cost $324; a complete overhaul of the brakes with replacement of all rubber parts and working parts would cost about $25. (Mechanics are paid on a salary, not a commission, basis.)

21. The brakes, tires, lights and steering on any second-hand bus which might be put into service can be put into first-class safety condition for a figure per bus not exceeding $500. In the case of the busses already on hand in the Charlotte-Mecklenburg system, this cost should be less because the local system has an excellent preventive maintenance and parts replacement program and according to the transportation superintendent anticipates and makes repairs before trouble develops, rather than wait for breakdowns, so that the old rolling stock as well as the new is kept in good condition.

22. The transportation superintendent, Mr. Harrison, testified that he maintains, and now has, a manpower reserve of about 100 students who are qualified and available as school bus drivers, over and above the 280-odd regular drivers. More are now being trained.

23. The estimated school budget for the year 1970-71 is approximately $66,000,000, which is $8,000,000 more than the 1969-70 budget.

24. Of this $66,000,000 the amount of approximately $21,900,000 was allocated to the School Board by the county without restriction as to its use, and the School Board is free to use whatever part of it they find necessary to comply with court orders. (Blaisdell testimony.)

25. The Board's opinion evidence, including numerous exhibits, on numbers of pupils to be transported and numbers of extra busses required (526 for the entire system, 293 for elementary schools) can not be taken seriously. The pupil count was made by counting all pupils in each zone who live more than a mile and a *quarter* (not a mile and a *half*) from each school, and (with some minor but unspecified adjustments) treating all of these children as requiring transportation. This method fails to account for several factors such as (1) the 7% who are absent every day; (2) the pupils now riding City Coach busses; (3) the pupils now already receiving school bus transport; (4) those who go to school in private vehicles.

Moreover, by cutting the "walking distance" from the statutory figure of 1½ miles to 1¼ miles, the Board method reduces by 40% (from over seven square miles to just over five square miles) the area of the walking zone and thereby sharply increases those eligible for bus transport.

Memorandum of Decision and Order, dated August 3, 1970

In computing needed busses, the Board figures unwarrantedly assume: (1) that each bus can make only one round trip a day instead of the average of 1.8 round trips a day now made; (2) that each bus can only transport 46 pupils a day instead of the present average of 84.4; (3) that busses used in the desegregation program must be less efficient than the others.

All these assumptions are contrary to the evidence which, for example, shows that one "desegregation" bus (Bus #23, Exhibit 54) transported 99 children daily among schools as remote as Northwest Charlotte (9th and Bethune) on the one hand and Sharon Elementary and Beverly Woods Elementary, and Quail Hollow Junior High on the other, with the driver then going on in the bus to South High School.

The court's previous findings on these items are reaffirmed. Maximum numbers of pupils to be transported and additional busses needed, even if *Sparrow* v. *Gill* were not in the picture, remain:

	No. Pupils	*No. Busses*
Senior High	1,500	20
Junior High	2,500	28
Elementary	9,300	90
	13,300	138

(Board witnesses after refining lines and making actual pupil assignments now say that the number of senior high pupils requiring transportation is 1,815 and the number of junior high pupils requiring transportation is 2,286.)

26. All plans which desegregate all the schools will require transporting approximately the same number of children. In overall cost, if a zone pupil assignment method is adopted, the minority Board plan may be a little cheaper than the Finger plan.

27. Mecklenburg County had a July 31, 1970 surplus or "carry-forward" of approximately four million dollars, of which one million dollars are completely free of any allocation or budgeting commitment.

28. North Carolina, whose biennial 1969-71 budget is $3,590,902,142.00, regularly has a biennial surplus of many millions of dollars.

29. The annual cost of pupil transportation is approximately $20 a year per pupil; the state pays it all, except for certain minor local administrative costs, and the original purchase of the first bus for a route; thereafter, the state replaces the bus periodically. Earlier findings that the cost was $40 per pupil year were in error.

30. No capital outlay will be needed to supply busses for the 1970-71 school year. The state is ready and willing to lend the few busses the Board may need; replacements can be bought after actual need has been determined under operating conditions.

31. The $66,000,000 school budget amounts to about $366,667 a day for a 180-day school year. If the county eventually has to buy as many as 120 new busses, their cost, at $5,500 each, would be $660,000, which is less than the cost ($733,000) of two days of school operation.

32. *Age of children* has apparently never prevented their school bus transportation. There are, of course, more children between kindergarten and the sixth grade than there are in the higher grades when the dropout rate increases, and more elementary children, including first graders, receive transportation than do high schoolers.

The longest bus routes in the entire county are the routes by which four and five-year-old kindergarten children are transported to child development centers (see Principals' Monthly Bus Report, Defendants' Exhibit 63). The Pineville Child Development Center has one bus, No. 297, which travels over 79 miles a day on one round trip with four and five-year-old children. Another such trip is over 70 miles a day. The Davidson Child Development Center has five busses which travel from 48 to 60 miles a day on one round trip with five-year-old children. The Bain Elementary School has a bus route, No. 115, which travels over 61 miles on one round trip each day, requiring two hours in the morning and two hours in the afternoon with elementary children. Routes to numerous elementary schools are very long in miles and time. The more than 10,000 children in grades one through six who have been riding school busses all these years and who now ride at an average travel time of an hour and a quarter each way are not shown to have had their education damaged by the experience.

Educationally it appears unreasonable to postpone desegregation of small children until later grades. The only concrete evidence of an educational nature in the whole hearing which rose above the level of opinion is the Stanford Achievement Tests which show that the performance gap, which is ordinarily noticeable in the first grade, has become several grades wide by the time the segregated

black child reaches the sixth grade. The lasting effects of segregation are minimized if it is eliminated at an early age.

33. *Traffic problems.*—The county has over 160,000 passenger vehicles and nearly 30,000 trucks registered in it. It is estimated that the total number of automobile trips in the county daily other than truck trips is over 869,000. Traffic is heavy in most parts of the county. Since the so-called "cross-bussing" of the Finger plan or the minority plan will not contemplate pick up and discharge of pupils in the central business area, the busses added by the Finger plan or the minority Board plan will provide very little interference with normal flow of traffic. School busses are no wider than other busses (the law requires that this be so); they already use all the major streets and traffic arteries in the county and city every school morning of the year. There is no evidence to show that adding 138 school busses to the volume of existing traffic will provide any such impediment as should be measured against the constitutional rights of children. It would also appear that a school bus transporting 40 to 75 children should reduce traffic problems by cutting down on the number of automobiles that parents might otherwise be driving over the same roads.

34. The schools already operate on staggered schedules. Today, the opening and closing of schools and the class hours of school bus drivers are adjusted to serve the practical requirements of transportation. Plaintiffs' Exhibit 12 shows that the elementary schools already operate on a staggered opening and closing schedule. Some open at 8:00; some at 8:05; some at 8:10; some at 8:15; some at 8:25 and

some at 8:30 and 8:45 in the morning, and the schools close for grades one and two at hours including 1:30; 1:35; 2:00; 2:15; 2:30; 2:45; 3:00; 3:05 and 3:10. The court finds that staggered opening and closing hours for elementary schools, and arrangement of class schedules of bus drivers for late arrival and early departure are facts of life which will not be eliminated by desegregation of the schools.

35. The defendants have plenty of money, plenty of know-how, plenty of busses on hand or available upon request, and plenty of capacity to implement the court ordered plan or the minority plan or any combination of the various plans. Their contentions to the contrary, and their five million dollar "estimates," when heard against the actual facts, border on fantasy![*]

B. *Reasonableness of methods.*—"Reasonable" is variously defined in more than 1,000 words in Webster's *Unabridged Dictionary*. In the context, the most appropriate definition seems to come from Black's *Law Dictionary*: "Reasonable. Just; proper. Ordinary or usual. *Fit and appropriate to the end in view.*" (Emphasis added.)

The end in view is the desegregation of the schools. The methods available include the following: (1) consolidation of schools (which began fifty years or more ago) and for which the school bus has been the "ordinary or usual," as well as the necessary tool; (2) assignment of pupils;

---

[*] "There was a table set out under a tree in front of the house, and the March Hare and the Hatter were having tea at it.... The table was a large one, but the three were all crowded together at one corner of it. 'No room! No room!' they cried out when they saw Alice coming. 'There's *plenty* of room!' said Alice indignantly, and she sat down in a large arm-chair at one end of the table." (Lewis Carroll, *Alice's Adventures in Wonderland*.)

(3) school bussing; (4) non-contiguous zoning (before *Brown*, no black child was allowed to attend the nearest school if it happened to be white); (5) restructuring of grades in schools; (6) rezoning; (7) pairing, clustering and grouping of schools; (8) use of satellite zones; (9) freedom of choice, with appropriate restrictions; and (10) closing of schools.

All of these methods have been approved as legal by the Fourth Circuit Court of Appeals and by other courts. They work; singly and in combination they can work to accomplish the reassignment of children to eliminate segregation. If they are legal, and if they accomplish the end in view, and if they have been in use for half a century, they certainly qualify as "reasonable" methods. They are "appropriate to the end in view"; they desegregate the schools in a practical way.

C. *The various plans.*—

1. *The 5/4 Majority Board Plan.*—The original Board plan was rejected by this court and by the Circuit Court. The School Board has not obeyed the order of the Circuit Court of Appeals to file a new plan, and has not drafted nor attempted to draft another plan. The Board majority have not explored other methods of desegregation as directed by the Circuit Curt (pairing, clustering, grouping, non-contiguous zoning, re-arranging grade structures), except to discuss these matters among themselves and to offer lengthy testimony rationalizing the non-use of alternative methods. Although parts of the disapproved Board plan could be used in a current plan, the Board plan as originally proposed is still inadequate because it leaves half the black elementary students still attending black schools. The court does not find it to be reasonable.

2. *The HEW plan.*—This plan proposes to adopt the basic zoning program of parts of the Board majority plan, and then to re-zone some of the black schools with some white schools, mostly in low and middle income areas, and by clustering, pairing, grouping and transportation, to produce a substantial desegregation of most of the black schools. The faults of the plan are obvious. It leaves two schools (Double Oaks and Oaklawn) completely black; it leaves more than a score of other schools completely white; it would withdraw from numerous white schools the black students who were transported to those schools during the 1969-70 school year. The clusters proposed by HEW would for the most part continue to be thought of as "black" in this county because the school populations of most of the clusters would vary from 50% to 57% black and the lowest black percentage in any cluster is 36%. Recommended HEW faculty assignments to these clusters of schools contemplated faculties which in the main would be less than half white, and this would be another retrogression from the arrangements already made by the School Board for the fall term! Contrary to orders of the district court and the Circuit Court, the HEW people limited their zoning to contiguous areas.

All witnesses except the HEW representatives themselves joined in hearty criticism of the HEW plan because of its ignorance of local problems, because of its threat of resegregation, and because it tends to concentrate upon the black and low-or middle-income community a race problem that is county wide.

In other days and other places the HEW plan would have looked good; and in those districts where black students are in the majority, much of such a plan could well be reasonable today. However, "reasonableness" has to be

measured in the context; and in this context the HEW plan does not pass muster. It also on the facts of this case would fail to comply with the Constitution.

3. *The court order of February 5, 1970, including the Finger Plan.*—This order directs the desegregation of the schools. It offers the Finger plan as one way to do it, and encourages the Board to use its own resources to develop something better. As to the Finger elementary plan itself, the court, after eight days of further evidence and extensive further study, still finds it to be a reasonable method or collection of methods for solving the problem. The plan was designed by a qualified educator. It was drafted with technical assistance of the school staff. It does the complete job. It has a clear pupil assignment plan. It preserves a sound grade structure; it is adaptable to ungraded experimentation; it can be implemented piecemeal, in sections or by clusters of schools if necessary; it embraces local knowledge; it can be implemented immediately. It uses all reasonable methods of desegregation. It takes proper advantage of traffic movement and school capacity. It passes all tests of reasonableness.

4. *The 4/5 Minority Board Plan.*—This plan was presented intelligently and clearly by Dr. Carlton Watkins, its chief drafter, one of a 4/5 minority of the Board. It was spared any aggressive attack by Board witnesses or counsel. It is home grown. It was conceived and drafted by four members of the local Board. It uses all the techniques of the Finger plan. It desegregates all the schools. Like the Finger plan, it involves all communities of the county. It appears to the court that it can be implemented with somewhat shorter travel distances for school busses,

though perhaps a few more children might have to ride school busses than under the Finger plan. Its assignments are made with an eye toward the dynamics of community growth and shrinkage. It is spontaneous in origin and shows a willingness on the part of some of the Board to experiment. Its cost of implementation is roughly on a par with that of the Finger plan. Like the Finger plan, it can be implemented one part at a time and it does not create probabilities of resegregation of black schools. The principal fault of the minority plan is its present lack of a system of pupil assignment. Board witnesses were not willing to admit it outright, but the court has the very definite impression that they could draft a pupil assignment plan and put the minority plan into effect this fall if so directed by the Board.

5. *An earlier draft of the Finger plan.*—This draft, illustrated by Plaintiffs' Exhibit 10, is the first comprehensive recommendation of Dr. Finger to the court and to the school staff. It would require less transportation than any other plan before the court, and for shorter distances. It would have to be implemented all at once, and it does not involve all of the county in its scope. From the standpoint of economics it may be the cheapest plan available. From the standpoint of avoidance of tendencies toward resegregation and from the standpoint of total community involvement in the total community plan it is not on a par with the minority plan nor the final Finger plan. It is however, like the minority plan and the final Finger plan ordered by the court, a "reasonable" plan.

Memorandum of Decision and Order, dated August 3, 1970

VI.

A Reservation Concerning Reasonableness Versus Constitutional Rights

Reasonable remedies should always be sought. Practical rather than burdensome methods are properly required. On facts reported above, the methods required by this order are reasonable. However, if a constitutional right has been denied, this court believes that it is the constitutional right that should prevail against the cry of "unreasonableness." If a home has been illegally searched and evidence seized, the evidence is suppressed. If a defendant in a drunk driving case "takes the Fifth" and puts the state to its proof, the state has to prove its case without any testimony from him. The unreasonableness of putting the state to some expense can not be weighed against nor prevail over the privilege against self-incrimination or the right of people to be secure in their homes. If, as this court and the Circuit Court have held, the rights of children are being denied, the cost and inconvenience of restoring those rights is no reason under the Constitution for continuing to deny them. *Griffin* v. *Prince Edward County, supra.*

ORDER

1. Pursuant to the June 29, 1970 mandate of the Supreme Court of the United States, this court's order of February 5, 1970 will remain in effect pending these proceedings and except as modified herein or by later order of this court or a higher court.

2. The action of the Board in making faculty assignments in accordance with the order of February 5, 1970 is approved.

3. The action of the Board in making pupil assignments and other arrangements to operate the senior high schools in accordance with this court's order of February 5, 1970 is approved.

4. The action of the Board in making pupil assignments and other arrangements to operate the junior high schools in accordance with this court's order of February 5, 1970 is approved.

5. Numbered paragraphs 10 [823a] and 11 [824a] of the February 5, 1970 order of this court are amended by inserting the words "cumulative" and "substantially" at the appropriate points in each paragraph so that the two paragraphs will read as follows:

> "10. That 'freedom of choice' or 'freedom of transfer' may not be allowed by the Board if the cumulative effect of any given transfer or group of transfers is to increase substantially the degree of segregation in the school from which the transfer is requested or in the school to which the transfer is desired.
>
> "11. That the Board retain its statutory power and duty to make assignments of pupils for administrative reasons, with or without requests from parents. Administrative transfers shall not be made if the cumulative result of such transfers is to restore or substantially increase the degree of segregation in either the transferor or the transferee school."

6. As to the elementary schools:

(a) The order entered by this court on February 5, 1970 having been subjected to three weeks of review under the

reasonablness test is expressly found to be reasonable, and the School Board are directed to put the court ordered plan of desegregation into effect at the opening of school in the fall of 1970, *unless* they avail themselves of some of the options indicated herein.

(b) The plan for elementary school desegregation proposed by a 4/5 minority of the School Board (the Watkins plan) has been examined and is found to be reasonable, as far as it goes. It is, however, incomplete because it contains no plan for pupil assignment. The School Board are authorized to prepare an appropriate pupil assignment plan and use the minority plan for elementary school desegregation instead of the comparable portions of the plan previously ordered by the court, if they so elect.

(c) The School Board, if they so elect, may use portions of the minority plan and portions of the court ordered plan, bearing in mind that the most important single element in the order of this court on February 5, 1970 is paragraph 16, reading as follows:

> "16. The duty imposed by the law and by this order is the desegregation of schools and the maintenance of that condition. The *plans* discussed in this order, whether prepared by Board and staff or by outside consultants, such as computer expert, Mr. John W. Weil, or Dr. John A. Finger, Jr., are *illustrations of means or partial means to that end.* The defendants are encouraged to use their full 'know-how' and resources to attain the *results* above described, and thus to achieve the constitutional end by any means at their disposal. The test is not the method or plan, but the *results.*"

(d) The Board are free to incorporate into any plan they may make whatever portions of the work of the Department of Health, Education and Welfare staff, or such parts of the original partial Finger plan (Plaintiffs' Exhibit 10), which are consistent with their duty to carry out the order to desegregate the schools.

(e) If the Board elect to carry out the Finger plan, they are authorized, if they find it advisable, to close Double Oaks school and reassign its pupils in accordance with the general purposes of the February 5, 1970 order.

(f) The Board are directed to file a written report with this court on or before noon on Friday, August 7, 1970, indicating what plan or combination of plans they have voted to use.

(g) The Board are again reminded, as they were reminded during the July 15, 1970 hearings, that since the 29th day of June, 1970, they have been and still are subject to the order of the Supreme Court, which reinstated this court's February 5, 1970 order pending these proceedings, and that this court will be under some duty to measure the Board's performance against what they could have done starting on June 29, 1970.

7. The following portion of this order is taken in modified form from the recommendations in the proposed plan of the Department of Health, Education and Welfare. It has been included in part in orders of district courts to various school systems, such as the school system in Dorchester County, South Carolina. It is included in this order not with any idea of impairing or affecting any party's right of appeal, but with the thought that this community

has a difficult job of implementing a major desegregation program and that just as in the case of Greenville, South Carolina, whose schools were desegregated before any final word came from the Supreme Court, it will take leadership to do the job. Some of these suggestions of the Department of Health, Education and Welfare are therefore incorporated in this order as follows, for such aid as they may be in working through the difficult administrative and community problems which must be overcome:

SUGGESTIONS FOR PLAN IMPLEMENTATION

Successful implementation of desegregation plans largely depends upon local leadership and good faith in complying with mandates of the Courts and the laws upon which the Courts act. The following suggestions are offered to assist local officials in planning for implementation of desegregational orders.

Community

1. The Superintendent and Board of Education should frankly and fully inform all citizens of the community about the legal requirements for school desegregation and their plans for complying with these legal requirements.

2. The Board of Education should issue a public statement clearly setting forth its intention to abide by the law and comply with orders of the Court in an effective and educationally responsible manner.

3. School officials should seek and encourage support and understanding of the press and community organizations representing both races.

4. The Board of Education, or some other appropriate governmental unit, should establish a bi-racial advisory committee to advise the Board of Education and its staff throughout the implementation of the desegregation plan. Such committee should seek to open up community understanding and communication, to assist the Board in interpreting legal and educational requirements to the public.

5. The Superintendent should actively seek greater involvement of parents of both races through school meetings, newsletters, an active and bi-racial P.T.A., class meetings, parent conferences, and through home visits by school personnel.

6. The Superintendent and Board of Education should regularly report to the community on progress in implementing the desegregation plan.

School Personnel

1. The Superintendent should provide all personnel copies of the desegregation plan and arrange for meetings where the personnel will have an opportunity to hear it explained.

2. The Board of Education should issue a policy statement setting forth in clear terms the procedures it will follow in reassignment of the personnel.

3. Assignments of staff for the school year should be made as quickly as possible with appropriate followings by school principals to assure both welcome and support for personnel new to each school. Invitations to visit school before the new school year begins should be offered.

4. The Superintendent should see that a special orientation program is planned and carried out for both the professional and non-professional staffs (including bus drivers, cafeteria workers, secretaries and custodians) preparatory to the new school year. He should make every effort to familiarize new and reassigned staff with facilities, services, and building policies, and prepare them to carry out their important role in a constructive manner. The Superintendent should direct each principal to see that each teacher new to a school is assigned for help and guidance to a teacher previously assigned to that school. Such teachers should have an opportunity to meet before the school year actually begins.

5. The Superintendent should arrange an in-service training program during the school year to assist personnel in resolving difficulties and improving instruction throughout the implementation period. Help in doing this is available from the St. Augustine College in Raleigh, North Carolina.

8. The Clerk is directed to serve copies of this order on the members of the School Board individually, and upon all other parties by sending copies by certified mail to their counsel of record.

9. Subject to further orders from higher courts, jurisdiction is retained, and the attention of the parties is called to pages 27 and 28 [1278a-1279a] of the order of the Fourth Circuit Court of Appeals respecting the duties of the court and the parties with regard to any desired modification of the plan or of this order.

Memorandum of Decision and Order, dated August 3, 1970

This the 3rd day of August, 1970.

/s/ JAMES B. MCMILLAN
James B. McMillan
United States District Judge

[The "18-page exhibit listing approximately 65 sections of the General Statutes of North Carolina and 2 sections of its Constitution under which segregation of the black race in North Carolina has been the policy of our Constitution and the letter of our statutes for many years (Br. A4)" is omitted.]

Memorandum Decision, dated August 7, 1970

The defendant school board and this court are under order of the Fourth Circuit Court of Appeals to produce a plan for desegregation of the elementary schools to "take effect with the opening of school next fall."

Pending the proceedings, by order of the Supreme Court of the United States, this court's February 5, 1970, judgment, including the Finger plan, is in effect.

On August 3, 1970, after lengthy hearings, this court by order directed the defendants to elect which among several options they had voted to use to desegregate the elementary schools.

On August 7, 1970, the board reported to the court that they have authorized an appeal from this court's order of August 3, 1970; that they reject the various options from among which the court authorized them to choose; and that the board

> "has no choice but to acquiesce in the District Court's order relative to its own elementary plan of February 5, 1970 . . . In acquiescing the Board is of the firm continuing opinion that the Court ordered plan of February 5, 1970, is unreasonable."

The court accepts the board's action as its undertaking to use the plan directed on February 5, 1970, (as modified on August 3, 1970) in its desegregation of the elementary schools.

This 7th day of August, 1970.

/s/ James B. McMillan
James B. McMillan
United States District Judge

Defendants' Report of Action Taken as Directed by the Court in Its Order of August 3, 1970

The Board of Education met in public session and adopted the following resolution for submission to the Court, said resolution being as follows:

"This written report is submitted to the United States District Court for the Western District of North Carolina pursuant to its mandate dated August 3, 1970, and entered into that certain civil proceedings entitled James E. Swann, et. al., plaintiff, vs. Charlotte-Mecklenburg Board of Education, et. al., defendants.

> " 'The Board are directed to file a written report with this Court on or before Noon Friday, August 7, 1970, indicating what plan or combination of plans they have voted to use.'

That Court, in its August 3, 1970, Order, provided that as to elementary schools, Paragraph 6-A.

> " 'The Order entered by this Court on February 5, 1970, having been subjected to three weeks of review under the reasonabless test, is expressly found to be reasonable and the School Board are directed to put the Court ordered plan of desegregation into effect at the opening of school in the fall of 1970 *unless* they avail themselves of some of the options indicated herein.'

"The School Board concluded that the options referred to, the Watkins, the early Finger and the HEW plans, do not offer reasonable alternatives which comply with the standards prescribed by the Court of Appeals of the Fourth Circuit and therefore has no choice but to acquiesce in the District Court's Order relative to its own elementary plan of February 5th which, upon rehearing, the District

Court itself found to be reasonable. In acquiescing the Board is of the firm continuing opinion that the Court ordered plan of February 5, 1970, is unreasonable."

Furthermore, the Board of Education authorized the Board Attorneys to appeal the Order of August 3, 1970, as it is deemed to be unreasonable and contrary to law.

No. 281

JAMES E. SWANN, ET AL.,
Petitioners,

v.

CHARLOTTE-MECKLENBURG BOARD OF EDUCATION, ET AL.,
Respondents.

AMICUS CURIAE BRIEF OF WILLIAM C. CRAMER

AUTHORITY TO FILE

All parties having consented, this Amicus Curiae brief is filed on behalf of William C. Cramer, Member of Congress from the 8th Congressional District of Florida, author of the amendment to section 401 (b) of the Civil Rights Act of 1964 prohibiting the assignment of students to public schools to overcome racial imbalance.

QUESTIONS ADDRESSED

1. Does section 5 of the Fourteenth Amendment empower the Congress to formulate legislative guidelines for enforcing the equal protection clause of that Amendment?

2. Is Title IV of the Civil Rights Act of 1964, relating to Desegregation of Public Education, a Constitutional expression of the authority conferred by section 5?

3. Was Title IV intended to be applied nationally or sectionally?

4. Does *de facto* segregation occur in the South?

5. Does the establishment of *de jure* quotas by the Courts constitute the assignment of students to public schools in order to overcome racial imbalance in violation of section 401 (b) of Title IV of the Civil Rights Act of 1964?

6. Are officials or courts of the United States 'empowered' to issue orders to bus pupils or students from one school to another or from one school district to another to racially balance student bodies although section 407 (a) of Title IV of the Civil Rights Act of 1964 specifically prohibits such orders?

I.

THE CONSTITUTIONAL SETTING

At the time the Constitution was being discussed by the Founding Fathers, the institution of slavery was prevalent throughout the former colonies—both North and South. How slaves were to be counted in the apportionment of power divided the Constitutional Convention. At one time, it broke up over the question. At no time, however, was the issue of Negro rights in any of its present ramifications within the contemplation of the drafters of the Charter.

When continued reservations of certain key leaders forced the adoption of the first Ten Amendments, they were added as a limitation on the power of the new Federal Government rather than as an inhibition on any of the powers then reserved to the States.

In the years following ratification, the issue of slavery became critical as the Nation expanded to the West. During this period, in the landmark Dred Scott decision, the rights of Negroes were further circumscribed.

Not until the post-Civil War period were the Dred Scott disabilities legislatively removed (in 1866). And not until the approval and ratification of the 13th, 14th,

and 15th Amendments were Constitutional protections relative to the treatment of Negroes finally adopted. At the time of their approval, however, many States—North, South, and Border—continued to maintain effective dual systems of laws for blacks and whites. Consequently, while Negroes were emancipated, their rights remained proscribed in law, customs, mores and tradition. In *Plessy* v. *Ferguson*,[1] the practice of providing 'separate but equal' accommodations was given formal judicial sanction. It remained the law of the land for the next half century.

In the Thirties and Forties, cases challenging the 'separate but equal' doctrine were pressed upon the courts. Not until the first *Brown* decision in 1954, however, was the doctrine, as it applied to education, finally overturned. Since then, the courts have played an increasingly activist role in effecting an end to segregation in public education.

But, the reach of the courts in such matters is Constitutionally circumscribed. All that was prohibited by the 14th Amendment was State action denying the equal protection of the laws because of race, color, or previous condition of servitude. Once such *de jure* denials were removed, the oversight authority of Federal courts logically ceased.

As to how such disabilities were to be removed, the amendment itself leaves no doubt. Section 5 categorically states that: "The Congress shall have power to enforce, by appropriate legislation, the provisions of this Article." This language makes it abundantly clear that the framers of the Fourteenth Amendment envisioned that the Congress of the United States, that is the elected representatives of the sovereign people, would have the final say in formulating guidelines for enforcing its provisions.

---

[1] 163 U.S. 537 (1896).

[1a] *Brown* v. *Board of Education*, 347 U.S. 483 (1954).

Granted this authority, it follows that once the "power to enforce" has been exercised in accordance with the language and tenor of the amendment, the courts are duty bound to give full expression to the legislative will for, to do otherwise, would contravene the law and violate Constitutional responsibilities. By the same token, if the Congress, in exercising its "power to enforce", exceeded duly conferred Constitutional authority, then the courts would be bound to strike down such measures.

Insofar as the question of school desegregation is concerned, the Congress has seen fit to act. On July 2, 1964, after lengthy deliberations, it approved and the President signed into law the Civil Rights Act of 1964, Public Law 88-352, 88th Cong., 2d Session, 78 Stat. 241. In the years since its passage, the Act has been the subject of both Executive action and Judicial interpretation. Unfortunately, in the process, the language and purpose of the National Legislature in approving it has frequently been misconstrued. Hence, the Congressional plan has been repeatedly contravened.

The aim of this brief is to present a selective legislative history of the Civil Rights Act of 1964. By doing so, it is hoped that those misconceptions which presently cloud, and at times compromise, the full and effective implementation of the Act's Constitutionally-conferred Congressional purposes can, once and for all, be laid to rest.

II.

LEGISLATIVE HISTORY OF TITLE IV

On June 19, 1963, President Kennedy submitted to the Congress a proposed Civil Rights Act of 1963. In a message accompanying the omnibus package, the President complained of "the slowness of progress toward primary and secondary school desegregation", noting that it was more than 9 years since the Supreme Court's decision in the *Brown* case. To speed the process of school desegregation, the President called on Congress to "assert its

specific Constitutional authority to implement the 14th Amendment." [2] Specifically, he recommended the enactment of a two-pronged approach for achieving desegregation in the public schools. The first was designed to accelerate the litigation process while, at the same time, relieving private individuals of the responsibility for initiating and prosecuting school desegregation cases. As expressed by the President: "Authority would be given the Attorney General to initiate in the Federal district courts appropriate legal proceedings against local public school boards or public institutions of higher learning—or to intervene in existing cases . . ." under the conditions set forth in the measure.[3]

The second prong of the President's plan proposed a program of Federal technical and financial assistance to aid school districts in the process of desegregation. As stated in the President's Message: [4]

> "As previously recommended, technical and financial assistance would be given to those school districts *in all parts of the country* which, voluntarily or after result of litigation, are engaged in the process of meeting the educational problems flowing from *desegregation or racial imbalance* but which are in need of guidance, experienced help, or financial assistance in order to train their personnel for this changeover, cope with any difficulty and complete the job satisfactorily (including in such assistance, loans to a district where State or local funds have been withdrawn or withheld because of desegregation)." [Emphasis added]

The Administration bill was introduced in the House of Representatives by Congressman Celler, Chairman of the Committee on the Judiciary. It was designated H.R.

---

[2] House Doc. 124, 88th Cong., 1st Sess. at 6 (1963).

[3] Id. at 6 and 7.

[4] Ibid.

7152, and referred to the Judiciary Committee and, in turn, to an appropriate subcommittee for consideration.

As introduced, Title III of the bill relating to "Desegregation of Public Education" consisted of ten sections. The first, (301), contained definitions. The next 5 sections (302 through 306) dealt with technical assistance to facilitate desegregation in the public schools. Sections 303 through 306, as originally introduced, in addition to desegregation, were also concerned with "other plans designed to deal with problems of racial balance in school systems." Indeed, throughout these sections, the term "racial balance" and "measures to adjust racial imbalance" were used repeatedly, as the following language will confirm:

> Sec. 302. The Commissioner shall conduct investigations and make a report to the President and the Congress, within two years of the enactment of this title, upon the extent to which equal educational opportunities are denied to individuals by reason of race, color, religion or national origin in public educational institutions at all levels *in the United States, its territories and possessions,* and the District of Columbia.
>
> Sec. 303. (a) The Commissioner is authorized, upon the application of any school board, State, municipality, school district, or other governmental unit, to render technical assistance in the preparation, adoption, and implementation of plans for the desegregation of public schools *or other plans designed to deal with problems arising from racial imbalance in public school systems.* Such technical assistance may, among other activities, include making available to such agencies information regarding effective methods of coping with special educational problems occasioned by desegregation or racial imbalance, and making available to such agencies personnel of the Office of Education or other persons *specially equipped to advise and assist them in coping with such problems.*

(b) The Commissioner is authorized to arrange, through grants or contracts, with institutions of higher education for the operation of short-term or regular session institutes for special training designed to improve the ability of teachers, supervisors, counselors, and other elementary or secondary school personnel *to deal effectively with special educational problems occasioned by desegregation or measures to adjust racial imbalance in public school systems.* Individuals who attend such an institute may be paid stipends for the period of their attendance at such institute in amounts specified by the Commissioner in regulations, including allowances for dependents and including allowances for travel to attend such institute.

Sec. 304 (a). A school board which has failed to achieve desegregation in all public schools within its jurisdiction, *or a school board which is confronted with problems arising from racial imbalance* in the public schools within its jurisdiction, may apply to the Commissioner, either directly or through another governmental unit, for a grant or loan, as hereinafter provided, for the purpose of aiding such school board *in carrying out desegregation or in dealing with problems of racial imbalance.*

(b) The Commissioner may make a grant under this section, upon application therefor, for—

(1) the cost of giving to teachers and other school personnel inservice training *in dealing with problems incident to desegregation or racial imbalance in public schools;* and

(2) the cost of employing specialists in problems incident *to desegregation or racial imbalance and of providing other assistance to develop understanding of these problems by* parents, school children, and the general public.

(c) Each application made for a grant under this section shall provide such detailed information and be in such form as the Commissioner may require.

> Each grant under this section shall be made in such amounts and on such terms and conditions as the Commissioner shall prescribe, which may include a condition that the applicant expend certain of its own funds in specified amounts for the purpose for which the grant is made. *In determining whether to make a grant,* and in fixing the amount thereof and the terms and conditions on which it will be made, *the Commissioner shall take into consideration* the amount available for grants under this section and the other applications which are pending before him; the financial condition of the applicant and the other resources available to it; *the nature, extent, and gravity of its problems incident to desegregation or racial imbalance, and other such factors as he finds relevant.*
>
> * * * *
>
> Sec. 305. Payments pursuant to a grant or contract under this title may be made (after necessary adjustments on account of previously made overpayments or underpayments) in advance or by way of reimbursement, and in such installments, and on such conditions, as the Commissioner may determine.
>
> Sec. 306. The Commissioner shall prescribe rules and regulations to carry out the provisions of sections 301 through 305 of this title. [Emphasis added]

Although there were more complex titles in the bill, the proposed extension of technical assistance to problems related to 'racial imbalance' quite naturally focused congressional attention on Title III. Consequently, during the course of hearings on this provision, questions were repeatedly directed to witnesses in an effort to ascertain what the term 'racial imbalance' as used in the bill actually meant. Congressman Cramer, in particular, persistently sought a definition of this elusive phrase, but without success.[5]

---

[5] Hearings on H.R. 7152 before Subcom. 5 of the House Committee on the Judiciary, 88th Cong., 1st Sess. at 1782, 1888-1889, 2084-2086, 2138, 2163, 2234-2236 (1963).

Upon conclusion of the hearings, the Subcommittee met n Executive Session for 17 days to consider the omnibus ill. Ultimately, it struck out of H.R. 7152 all after the nacting clause and inserted an amendment in the nature f a substitute. The amended version was thereafter rec-mmended to the full Judiciary Committee. It contained a reworked version of old Title III, renumbered Title IV, embodying a number of major and minor changes. The most significant of these was the elimination from the Title of all authority to extend financial assistance to overcome problems of 'racial imbalance.' Various rea-sons were assigned for these deletions. As stated in the Report:[6]

> ". . . The Committee failed to extend this assistance to problems frequently referred to as 'racial imbal-ance' as no adequate definition of the concept was put forward. The Committee also felt that *this could lead to the forcible disruption of neighborhood pat-terns*, might entail inordinate financial and human cost and create more friction than it could possibly resolve." [Emphasis added]

The full Judiciary Committee, in its consideration of the bill, also adopted an amendment in the nature of a substitute. The Committee substitute was practically the same as the Subcommittee proposal relating to methods to effect desegregation in public education. As finally ap-proved, however, the renumbered Title was limited to au-thorizing suits by the Attorney General to further "the orderly achievement of desegregation in public educa-tion." As the analysis of the reported bill contained in the Committee's report confirms, all mention of or refer-ence to the controversial notion of 'racial balance' was stricken from the Title:[7]

---

[6] House Report 914, 88th Cong., 1st Sess. at 21-23 (1963).

[7] Id. at 23-24.

Section 401 contains definitions including the definition of "desegregation" as the assignment of students to public schools and within such schools without regard to their race, color, religion, or national origin.

Section 402 would direct the Commissioner of Education to conduct a survey and report to the President and Congress, within 2 years from enactment, concerning the lack of availability of equal educational opportunities by reason of race, color, religion, or national origin in public educational institutions at all levels.

Section 403 would authorize the Commissioner, upon the application of any State or local educational agency, to furnish technical assistance in the preparation, adoption, and implementation of plans for the desegregation of public schools.

Section 404 would authorize the Commissioner to arrange with colleges and universities for the operation of institutes for special training designed to improve the ability of teachers and other elementary or secondary school personnel to deal effectively with special educational problems occasioned by school desegregation. Stipends could be paid to those attending such institutes in amounts specified by the Commissioner.

Section 405 (a) would authorize the Commissioner, upon application by a school board, to make a grant to defray the cost of (1) providing inservice training to teachers and other school personnel in dealing with problems incident to desegregation, and (2) employing specialists to advise in respect of such problems.

Section 405 (b) would direct that in passing on an application for a grant, the Commissioner take into consideration the total amount available for the grant program, other pending applications, the financial condition and resources of the applicant, and the seriousness of its problems incident to desegregation.

Section 406 would authorize payments pursuant to a grant or contract under title IV to be made by the Commissioner in advance or by way of reimbursement.

Section 407 (a) would confer authority upon the Attorney General to institute civil suits in the Federal district courts in order to achieve desegregation in public schools and colleges. He could bring suit when he received a written complaint from parents that the school board in their district had failed to achieve desegregation, or from an individual that he had been denied admission to or continued attendance at a public college by reason of race, color, religion, or national origin. As a prerequisite to suit, the Attorney General would be required to certify that the signers of the complaint were "unable to initiate and maintain appropriate legal proceedings" for relief, and that the institution of an action would materially further the public policy favoring the orderly achievement of desegregation in public education. It is not intended that determinations on which the certification was based should be reviewable.

Section 407 (b) provides that the Attorney General may deem a person "unable to initiate and maintain appropriate legal proceedings" within the meaning of subsection (a) if such person is unable to bear the expense of the litigation or obtain effective legal representation, or when the Attorney General is satisfied that the institution of the litigation by such person may result in injury or economic damage to him or his family.

Section 407 (c) provides that the term "parent" includes any person standing in loco parentis.

Section 408 provides that in any action or proceeding under title IV, the United States is to be liable for costs the same as a private person.

Section 409 provides that nothing in title IV shall affect adversely the right of any person to sue for or obtain relief in any court against discrimination in public education.

Despite these changes, Congressman Cramer's fears were still not allayed. They prompted him to pen these prophetic words in the Report:[8]

> "[A]s a matter of legal craftsmanship, this bill is inexpertly drafted, imprecisely worded and imperfectly oriented to the very problems it professes to solve. The ambiguity of its language creates a cloud of obscurity which conceals its potential consequences. While we are unprepared to say that the ambiguity is deliberate and calculated, it is difficult to believe that it is altogether accidental. Statutory ambiguities require judicial interpretation. In light of the trend court decisions have taken in recent years, it is not unrealistic to predict that the interpretations the courts would make would be of the broadest possible scope. *What the courts interpret tomorrow may be altogether different from what a majority of the Members of Congress intended . . .*" [Emphasis added]

Title IV was considered on the Floor of the House of Representatives on February 6, 1964. In all, eight amendments were proposed and two were adopted. Of particular moment was one offered by Congressman Cramer providing that the definition of "desegregation" in section 401 (b) "shall not mean the assignment of students to public schools in order to overcome racial imbalance." In explaining the need for and meaning of his amendment, the Florida lawmaker declared:[9]

> "Mr. Chairman, this amendment is very simple. *It does precisely and unequivocally what the proponents of the bill indicate they wanted to do. That is, to strike 'racial imbalance' from the bill* and from this title which I otherwise, in its present form, believe is still in the bill as I have said before many times.

---

[8] House Report 914, 88th Cong., 1st Sess. at 112 (1963).

[9] 110 Cong. Rec. 2280 (1964).

"In the hearings before the committee I raised questions on 'racial imbalance' and in the subcommittee we had lengthy discussions in reference to having these words stricken in the title, as it then consisted, and to strike out the words 'racial imbalance' proposed by the administration.

"*The purpose is to prevent any semblance of congressional acceptance or approval . . . to include in the definition of 'desegregation' any balancing of school attendance by moving students across school district lines to level off percentages where one race outweighs another.*" [Emphasis added]

At the conclusion of his remarks, Congressman Celler, Chairman of the Judiciary Committee and a Floor Manager of the bill, sought recognition: [10]

"Mr. CELLER. Mr. Chairman, will the gentleman yield?

"Mr. CRAMER. I yield to the gentlemen from New York.

"Mr. CELLER. Mr. Chairman, the amendment offered by the gentleman from Florida is acceptable.

"The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (MR. CRAMER)."

The Cramer amendment was thereafter unanimously adopted by the House.

On February 10, 1964, the House passed and sent to the Senate the proposed Civil Rights Act of 1964, including amended Title IV. In that Body, supporters of the omnibus legislation moved for immediate consideration of the House bill in order to avoid referring it to the Judiciary Committee, traditionally hostile to such measures. Their efforts were successful. In the early stages of the Floor debate that followed, proponents expressed the hope that the House bill would be accepted without modification, thus obviating the necessity of extended consid-

[10] Ibid.

eration of the bill and a House-Senate Conference. This effort did not succeed, however. In consequence, the Senate deliberated on H.R. 7152 for 83 precedent-smashing days.

As in the House, one of the principal concerns of Senate Members was the meaning and application of 'racial balance' insofar as the amended version of the bill was concerned. Because of grave reservations on this score, additional clarifying amendments were demanded as the price for approval of the bill. Their literal effect was to deny any "official" or "*court*" of the United States the power "to issue any order seeking to achieve a racial balance in any school requiring the transportation of pupils or students from one school to another or one district to another in order to achieve such racial balance, or otherwise enlarge the *existing power* of the court to insure compliance with constitutional standards." [11] Since "existing power" as asserted by the courts at the time, comprehended only ending segregation in the schools, not promoting integration, Congress sought to make it crystal clear that no enlargement of that authority was contemplated by the Act. In other words, it, rather than the courts, would set the guidelines for desegregating public schools. No better elucidation of this can be found than in the amplifying remarks of then-Majority Whip Hubert Humphrey speaking for the Managers of the bill: [12]

> "Next, changes are made to resolve doubts that have been expressed about the impact of the bill on the problem of correcting alleged *racial imbalance* in public schools. *The version enacted by the House was not intended to permit the Attorney General to bring suits to correct such a situation,* and indeed, said as much in section 401 (b). However, *to make this doubly clear, two amendments* dealing with this matter are *proposed.*

[11] 110 Cong. Rec. 12714 (1964).

[12] Id. at 12717.

"The first provides that nothing in title IV 'shall empower any 'court' or 'official' of the United States to issue 'any order' seeking to achieve 'a racial balance in any school by requiring the transportation of pupils or students from one school to another or one school district to another in order to achieve such racial balance or otherwise enlarge the existing power of the court to insure compliance with constitutional standards.' *This addition seeks simply to preclude an inference that the title confers new authority to deal with 'racial imbalance' in schools, and should serve to soothe fears that title IV might be read to empower the Federal Government to order the busing of children around a city in order to achieve a certain racial balance or mix in schools.*

"*Furthermore, a new section 410 would explicitly declare that 'nothing in this title shall prohibit classification and assignment for reasons other than race, color, religion, or national origin.'*

"*Thus, classification along bona fide neighborhood school lines, or for any other legitimate reason which local school boards might see fit to adopt, would not be affected by title IV, so long as such classification was bona fide. Furthermore, this amendment makes clear that the only Federal intervention in local schools will be for the purpose of preventing denial of equal protection of the laws.*" [Emphasis added]

Senator Javits of New York, a staunch proponent of civil rights, likewise sought to reinforce these understandings: [13]

"Taking the case of the schools to which the Senator is referring, and the danger of envisaging the rule or regulation relating to racial imbalance, it is negated expressly in the bill. . . . Therefore *there is no case in which the thrust of the statute* under which the money would be given *would be directed toward . . . bringing about a racial balance in the schools.*

[13] Id. at 12714.

> If such a rule were adopted or promulgated by a bureaucrat, and approved by the President, the Senator's State would have *an open and shut case* under Section 603. *That is why we have provided for judicial review.* The Senator knows as a lawyer that we never can stop anyone from suing, *nor stop any Government official from making a fool of himself,* or from trying to do something that he has no right to do . . ." [Emphasis added]

From the foregoing, it is evident that the Senate was fully cognizant of the ambitions of some 'courts' and 'officials' to enlarge the legislative plan from one aimed at ending segregation to one seeking to end so-called racial isolation by compelling racial balance in the Nation's public schools. Both through amendments and colloquy it attempted to nip these ambitions in the bud, as witness the following exchange between Senator Robert Byrd of West Virginia and Administration-spokesman Senator Humphrey: [14]

> "Mr. Byrd of West Virginia. Can the Senator from Minnesota assure the Senator from West Virginia that under title IV school children may not be bused from one end of the community to another end of the community at the taxpayers' expense to relieve so-called racial imbalance in the schools?
>
> "Mr. Humphrey. *I do.*
>
> • • • •
>
> [Mr. Humphrey.] "[*T*]*he Constitution prohibits segregation, it does not require integration. The busing of children to achieve racial balance would be an act to effect the integration of schools. In fact, if the bill were to compel it, it would be a violation, because it would be handling the matter on the basis of race and we would be transporting children because of race.* The bill *does not attempt to integrate* the schools, but it does attempt to eliminate segregation in the school systems. *The natural factors such*

[14] Id. at 12715, 12717.

as density of population, and the distance that students would have to travel are considered legitimate means to determine the validity of a school district, if the school districts are not gerrymandered, and in effect deliberately segregated. The fact that there is a racial imbalance per se is not something which is unconstitutional." [Emphasis added]

As already mentioned, debate in the Senate went on for 83 record-breaking days. Along the way, it became obvious to all concerned that the necessary ⅔'s vote for cloture, i.e. to shut off debate, could not be obtained unless sufficient clarifications and assurances were provided by the managers of the bill and appropriate amendments had been offered and accepted. Consequently, the Senate leadership, in consultation with the Attorney General, drafted a substitute containing them. The compromise measure won over a sufficient number of Senators to secure the necessary strength to effect cloture and the filibuster was ended. Nine days later, the Senate passed and sent to Conference a reworked version of H.R. 7152 containing the anti-busing guarantees of sections 401 (b) (the Cramer Amendment) and 407 (a).

On July 2, 1964, the House concurred with Senate amendments and the Civil Rights Act of 1964 was signed into law by then-President Lyndon Johnson.

III.

JEFFERSON AND BEYOND— THE SECOND RECONSTRUCTION

A. The Promise of Uniformity

Shortly after the Civil Rights Act of 1964 became the law of the land, a three-judge panel of the Fifth Circuit Court of Appeals undertook to review a consolidated group of school desegregation cases.[18] Their "distinctive features" declared the tribunal, are that they "require us

[18] *United States* v. *Jefferson County Board of Education*, 372 F.2d 836 (C.A. 5, 1966), commonly referred to as *Jefferson I*.

to re-examine school desegregation in the light of the Civil Rights Act of 1964 and the Guidelines of the United States Office of Education, Department of Health, Education, and Welfare (HEW)." [16]

The panel evidenced its sensitivity and awareness of its role in the constitutional scheme of things when it declared in its opinion:

> "More clearly and effectively than either of the other two coordinated branches of government Congress speaks as the voice of the nation." [17]

And again, when it said:

> "When Congress declares national policy, the duty the other two coordinated branches owe to the nation requires that, within the law, the judicial and executive respect and carry out that policy." [18]

And again:

> "We shall not permit the Courts to be used to destroy or dilute the effectiveness of the Congressional policy . . ." [19]

This apparent desire and determination to conform to its constitutional role as interpreter of the Nation's laws in order to effectuate national goals was commendable. Unfortunately, performance failed to measure up to promise. As the following analysis will show, the Court, in rendering its decision, repeatedly misconstrued and misinterpreted the Congressional will. Standing alone, each of its errors of construction represented a serious departure from what Congress intended. In synergistic combination, their effect has been to provide the judicial underpinnings for a radical revamping, recasting and re-

---

[16] Id. at 845.

[17] Id. at 850.

[18] Id. at 856.

[19] Id. at 859.

ordering of Congressional priorities, policies, and purposes.

In the process, the Congressional will has been blurred and blunted and the promise and potential of the Civil Rights Act of 1964 has gone unrealized and unfulfilled.

B. The De Facto-De Jure Distinction

The goal of proponents of those provisions of the Civil Rights Act of 1964 dealing with education (Titles IV and VI) was to provide a uniform Federal approach for ending discrimination in the Nation's public schools. This aim was underscored by President Kennedy in his Message to Congress proposing enactment of the measure:

> "This is not a sectional problem—it is nationwide. . . . A national domestic crisis also calls for bipartisan unity and solutions." [20]

It was echoed in the Report of the House Judiciary Committee:

> ". . . H.R. 7152, as amended, resting upon [constitutional] authority is designed as a step toward (sic) eradicating significant areas of discrimination on a nationwide basis. It is general in application and national in scope." [21]

And re-echoed on the Floor in both Houses of Congress:

> "'E Pluribus Unum'. We want unity. Equity begats unity. We want one and the same treatment for all." [22]

The Court in *Jefferson I* exhibited its perception of the pitfalls of a piecemeal approach in this memorable passage from its opinion:

> "In sum, the lack of uniform standards has retarded the development of local responsibility for the ad-

---

[20] House Doc. 124, 88th Cong., 1st Sess. 13 (1963).

[21] House Report 914, 88th Cong., 1st Sess. at 18.

[22] Senator Pastore, a principal spokesman for the bill, 110 Cong. Rec. 7059 (1964).

ministration of schools without regard to race or color. What Cicero said of an earlier Athens and an earlier Rome is equally applicable today." [23]

But the type of uniformity it had in mind was of a peculiar variety. By judicial fiat, it was to apply to Rome and Athens, Georgia (and other communities in the South), not to the Nation as a whole. Adopting the "ingenious though illogical distinction" [24] between so-called *de facto* and *de jure* segregation, it concluded that Congress had intended that the 'equal protection clause' was to be applied unequally and that, in effect, every manifestation of racial isolation in the South constituted *de jure* segregation. Whether Congress could have passed sectionally directed legislation had it wanted to is open to serious doubt. That it never contemplated such a double standard, is not, however. For the Court to have imputed such an intention was to thwart congressional will and, in the process, raise the spectre of a Second Reconstruction in America—one effected by judicial ukase.

The Court's rationale for this divisive rendering of the Union of States was this: Since the South was the area of the Nation which had maintained dual systems of education imposed by law prior to *Brown I*, the South required special rules for rehabilitation and reform—by implication, in perpetuity.

From a purely judicial standpoint, there would, at first blush, appear to be some justification for this view. The reason: It is generally presumed that the *Brown* decisions focused on the special problems of dual school systems in the old Confederacy. As a matter of fact, however, half of the consolidated group of cases decided in *Brown* actually originated elsewhere, i.e. in Kansas and Delaware. Thus, the notion that these decisions were con-

[23] *Jefferson I* at 861.

[24] *United States* v. *Jefferson County School Board*, 380 F.2d 385 (C.A. 5, 1967), commonly referred to as *Jefferson II* at 398, Judge Gewin dissenting.

fined to the South is without foundation. So too is the unsupported proposition that the Congress intended the Civil Rights Act of 1964 to either establish or perpetuate arbitrary sectional differences. Indeed, everything the National Legislature said and did confirmed a contrary intention. In the words of Senator Pastore: "There must be only one rule to apply to every State." [25]

Yet the Court made short work of such evidences. The "similarity of pseudo *de facto* segregation in the South to actual *de facto* segregation in the North", it declared, "is more apparent than real." [26] Only "segregation resulting from racially motivated gerrymandering is properly characterized as '*de jure*' segregation", [27] it asserted. And, such gerrymandering, in the Court's lights, occurred only in the South.

The Court therefore concluded that:

> "Adequate redress . . . calls for much more than allowing a few Negro children to attend formerly white schools; it calls for liquidation of the State's system of *de jure* school segregation and the organized undoing of the effects of past segregation." [28]

Perhaps the most curious of the curious reasoning resorted to by the Court to justify the legislative lobotomy it was performing related to the role attributed to the author of section 401 (b). In commenting on his reasons for offering this provision, it blandly asserted that:

> ". . . Congressman William Cramer, who offered the amendment, was concerned that the bill as originally proposed might authorize the government to require busing to overcome *de facto* segregation." [29]

---

[25] Senator Pastore, 110 Cong. Rec. 7059 (1964).

[26] *Jefferson I* at 876.

[27] Id. at 876.

[28] Id. at 866.

[29] Id. at 879.

Having reached this conclusion, it interpreted his proposal in this way:

> "The affirmative portion of this definition, down to the 'but' clause, describes the assignment provision necessary in a plan for conversion of a *de jure* dual system to a unitary, integrated system. The negative portion, starting with 'but', excludes assignment to overcome racial imbalance, that is acts to overcome *de facto* segregation." [30]

It then determined that:

> "As used in the Act, therefore, 'desegregation' refers only to the disestablishment of segregation in *de jure* segregated schools." [31]

In effect, therefore, the Court decided that the Cramer Amendment did not mean what it said. Although the language declared that " 'desegregation' shall not mean the assignment of students to public schools in order to overcome racial imbalance", it found that the author intended only a limited prohibition. What Congressman Cramer and his colleagues wanted, according to the Court, was to prevent racial balance in *de facto* areas (all presumably in the North), not in his own constituency in the South where all separation of the races was presumed to be *de jure* in nature.

That the Court attributed such an intention to the Florida lawmaker seems hardly credible. In point of fact, what he actually sought to accomplish through his amendment was something quite different. From the debates, it is evident that the common understanding of Members of Congress at the time of its consideration was that *de facto* segregation was separation of the races by personal choice or preference and that such separation occurred in all sections of the Country—South as well as North. *De jure* segregation, on the other hand, was separation imposed by law or color of law. While primarily confined

---

[30] Id. at 878 referring to Section 401 (b) of the Act.

[31] Ibid.

o the South, it was recognized that insidious manifestations existed in all parts of the Nation. The Civil Rights Act of 1964 embodied these understandings. Its aim was o root out all forms of *de jure* segregation nationwide. *De facto* segregation, however, that is the right of free association as reflected in neighborhood living patterns, was to be left alone wherever it occurred—North or South.

The contrary holding of the three-judge panel in *Jefferson I* that the Civil Rights Act of 1964 contemplated a double standard of administration, flies in the face of these understandings. Unfortunately, it was approved by the Court of Appeals, sitting in banc, in *Jefferson II* and thereafter, in one form or other, in a steady line of cases emanating from the Fifth and other Circuits ever since. Some have even gone so far as to assert, in effect, that Black neighborhoods in the South are *de jure* segregated per se. Through such arbitrary determinations, the literal and logical distinction between *de facto* (by choice) and *de jure* (by law) segregation which Congress believed it had written into the Civil Rights Act of 1964, has been all but obliterated.

C. Desegregation and Racial Balance

The Fourteenth Amendment provides that no State shall deny to any of its citizens the equal protection of the laws. The negative character of that enjoinder has been uniformly adhered to through the years.

In 1883, for example, the Supreme Court of the United States in the *Civil Rights Cases* [22] unequivocally held that the Fourteenth Amendment is a prohibition against State action and only State action. Mr. Justice Bradley delivered the opinion of the Court in which the principle was stated:

> "It is State action of a particular character that is prohibited. . . . [The amendment] nullifies and makes

[22] 109 U.S. 3, 11 (1883).

> void all State legislation, and State action of every kind, which denies to any the equal protection of the laws. It not only does this, but, in order that the national will, thus declared, may not be a mere *brutum fulmen*, the last section of the amendment invests Congress with power to enforce it by appropriate legislation. To enforce what? To enforce the prohibition. To adopt appropriate legislation for correcting the effects of such prohibited State laws and State acts, and thus to render them effectually null, void, and innocuous. This is the legislative power conferred upon Congress, and this is the whole of it. . . ."

More recently, the Supreme Court reaffirmed those principles in *Burton* v. *Wilmington Parking Authority*[33] when it announced that the *Civil Rights Cases*, "embedded in our constitutional law" the principle "that the action inhibited by the . . . Fourteenth Amendment is only such action as may fairly be said to be that of the States."

In *Briggs* v. *Elliott*, this view was upheld when the Court, seeking to "point out exactly what the Supreme Court had decided and what it has not decided" in *Brown* declared:

> "It has not decided that the federal courts are to take over and regulate the public schools of the states. It has not decided that the states must mix persons of different races in the schools or must require them to attend schools or must deprive them of the right of choosing the schools they attend. What it has decided, and all that it has decided, is that a state may not deny to any person on account of race the right to attend any school that it maintains. . . . The Constitution, in other words, does not require integregation. It merely forbids discrimination."[34]

The same view was espoused in *Queen Cohen* v. *Public Housing Administration*, when Judge Rives, speaking for the Court, stated:

---

[33] 365 U.S. 715, 721 (1961).

[34] *Briggs* v. *Elliott*, 132 F. Supp. 776, 777 (E.D.S.C., 1955).

[e]ither the Fifth nor the Fourteenth Amendments
[o]erate positively to command integration of the
"[r]ces, but only negatively to forbid governmentally
op[p]forced segregation." [35]

[P]enident Kennedy, in submitting his Civil Rights Mes-
Pres[s] 1963, however, urged that the Congress scrap this
[a]ge in[s]ch in favor of a radical new one. What he pro-
[a]pproain effect, was that the time-honored, judicially ap-
[p]osed, distinction between desegregation and integration
[h]rovedinguished by legislative fiat and a new standard
[t]e exting racial balance substituted. In the President's
[r]equiri
[w]ords:

"[A]s previously recommended, technical and financial
[a]sistance would be given to those school districts
[a]s *all parts of the country* which, voluntarily or as
[t]he result of litigation, are engaged in the process
[o]f meeting the educational problems flowing from
desegregation or racial imbalance . . ." [36] [Emphasis
[a]dded]

[T]The language of the bill accompanying the Presidential
Messa[g]e embodied this approach. As proposed, it con-
tained a series of provisions whose enactment would have
had t[h]e effect of legislatively approving the requirement
of 'ra[c]ial balance' as an equivalent of or supplement to
desegr[e]gation. Members of Congress were, of course,
aware of the implications of President Kennedy's proposal
and t[h]ey did what they thought was necessary to elimi-
nate [s]uch provisions from the bill.

At first blush, some of the statements of the Court in *Jefferson I*, convey the impression that the National Legislature succeeded. On page 849, for example, the opinion states:

"Congress decided that the time had come for a sweeping Civil Rights advance, including *national*

---

[35] 257 F.2d 78, 78 (C.A. 5, 1958).

[36] Message to Congress, H.Doc. 124, 88th Cong., 1st Sess. at 7 (1963).

> legislation to speed up *desegregation* of public schools and to put teeth into enforcement of *desegregation*. Titles IV and VI together constitute *the congressional alternative to court-supervised desegregation*." [Emphasis added]

And again, on page 851 of the opinion:

> "In April 1965, Congress for the first time in its history adopted a law providing general federal aid—a billion dollars a year—for elementary and secondary schools. It is a fair assumption that Congress would not have taken this step had Title VI not established the principle that schools receiving Federal assistance must meet *uniform national standards* for *desegregation*." [Emphasis added]

But such statements were mere windowdressing. Far from adhering to the desegregation objectives Congress set forth, the Court, in easy stages, proceeded first to undermine and then recast them. "There is not one Supreme Court decision", it declared, "which can be fairly construed to show that the Court distinguished 'desegregation' from 'integration' in terms or by even the most gossamer implication . . ." [37] Manifestly, therefore, "the duty to desegregate schools extends beyond mere 'admission' of Negro students on a non-racial basis." [38] Having established this it was but a short step to a declaration that:

> "The Constitution is both color blind and color conscious." [39]
>
> "Here race is relevant, because the governmental purpose is to offer Negroes equal educational opportunities. The means to that end, such as disestablishing segregation among students, distributing the bet-

---

[37] *Jefferson I*, 846 n.5. It did not, of course, because at the time the decision was rendered it obviously felt that universally accepted semantic differences did not require it to.

[38] Ibid.

[39] Id. at 876.

ter teachers equitably, equalizing facilities, selecting appropriate locations for schools, and avoiding resegregation, must necessarily be based on race." [40]

And from this to citing with approval the proposition that:

"The courts and HEW cannot measure good faith or progress without taking race into account. '*When racial imbalance infects a public school system*, there is simply no way to alleviate it without consideration of race.'" [41] [Emphasis added]

In this fashion, "the unquestioned intent of Congress as illustrated by the legislative history" was obliterated, as was the former generally understood distinction between desegregation and integration.[42]

But the Court was still not content. "Some of the difficulty in understanding the Act and its legislative history", it stated, "arises from the statutory use of the undefined term 'racial imbalance'. It is clear, however, from the hearings and debates that Congress equated the term, as do the commentators, with '*de facto* segregation', that is, non-racially motivated segregation in a school system based on a single neighborhood school or all children in a definable area." [43]

Having reached this conclusion, it then went on to sanction racial balancing in non *de facto* areas i.e. all of the South, in this way:

"The provision referring to percentages (in HEW Guidelines) is a general rule of thumb or objective administrative guide for measuring progress in de-

---

[40] Id. at 877.

[41] Ibid. Citing Wright, Public School Desegregation: Legal Remedies for *De Facto* Segregation, 16 West. Res. L.Rev. 478, 489 (1965).

[42] *Jefferson II* at 407, Cox dissenting.

[43] *Jefferson I* at 878.

> segregation rather than a firm requirement that must be met." [44]

It further observed that:

> "Common sense suggests that a gross discrepancy between the ratio of Negroes to white children in a school and the HEW percentage guides raises an inference that the school plan is not working as it should in providing a unitary, integrated system." [45]

Thus was the transition made from *de facto* to *de jure*, from desegregation to integration and, finally, from ending racial classifications to *de jure* quotas and balancing.

In the years since its rendering, the misinterpretations of legislative meaning and intent reflected in *Jefferson* have been enlarged and expanded upon. In the process, what amounts to a wholesale diversion of the will of the National Legislature as expressed in the Civil Rights Act of 1964 has taken place. Thus:

Where Congress desired that the provisions of the Act be uniformly applied in all fifty States, not on a sectional basis, the Courts have limited effective coverage to the old Confederacy.

Where Congress struck the notion of racial balance as an equivalent of or supplement to desegregation from the original bill, the Courts have treated the matter as if it had never been considered.

Where Congress, seeking to accord its negative action positive standing, specifically amended the Act to provide that desegregation shall not mean the assignment of students to overcome racial imbalance, the Courts have circumvented its intention by ruling that the prohibition applied only in *de facto* areas of the North, not at all in the South where all segregation was held to be *de jure* per se.

---

[44] Id. at 886-887.

[45] Id. at 888.

Where Congress defined desegregation to mean the assignment of pupils "without regard to their race", the courts have decided that the opposite was intended; that classification by race was necessary to remove the effects of past racial classification.

Where Congress sought to forestall attempts by courts or officials to bus students to achieve racial balance, the courts have approved what amounts to *de jure* quotas to measure compliance with their orders.

Where Congress sought to preserve neighborhood schools, the courts have set the stage for dismantling them.

IV.

CONCLUSION

The fundamental purpose of the Supreme Court in *Brown I* was to end legalized discrimination in public schools in order to improve the quality of education for Negro children. For a decade, decisions of the Court echoed and re-echoed this objective.

In enacting the Civil Rights Act of 1964, the Congress sought to further this end. Its aim was to provide the legislative wherewithal to marshal the full resources of the Federal Government to enhance the educational opportunities and, in the process, the quality of life, for Black Americans.

Unfortunately, almost before the ink was dry on this landmark measure, the Courts and the Executive began to circumvent Congress' handiwork. From a measure specifically designed to end segregation in the interest of education, it was reframed and reformulated until today it is cited as a statutory prop for balancing for balance's sake, for destroying neighborhood integration in order to accomplish racial integration, and, in an Orwellian exercise in 'doublethink', for perpetuating classification by

race in order to remove the inequities created by racial classification. Small wonder, under the circumstances, that increasing numbers of Americans of both races are disillusioned, that Congress is concerned, that the Executive is confused, and that the Judiciary, as evidenced by the diversity of its opinions, is bewildered.

Ironically, the present disillusionment and disenchantment would probably never have developed had the Courts and the Executive kept their respective eyes on the educational ball and on the carefully-considered measures that the people's representatives in the National Legislature framed to assist them. When, pursuant to its constitutionally-delegated authority that it "shall have power to enforce by appropriate legislation the provisions of" the Fourteenth Amendment, Congress passed the Civil Rights Act of 1964, its stated and restated objective was to provide the means for ending *segregation* in public education. This was the aim, the ideal, the raison d'etre.

To insure that this oft-stated goal would be strictly followed, the Congress provided what it considered to be satisfactory safeguards and assurances. These included the following:

(1) the Act would be uniformly applied in all 50 States;

(2) desegregation would not comprehend the notion of racial balance as either an equivalent or supplement;

(3) no assignment of students would be made to overcome racial imbalance;

(4) neighborhood schools would be maintained.

This desegregation theme runs through Congress' deliberations in Committee, its reports, and its debate on the Floors of both Houses. Its fundamental, its sole, its exclusive aim was to make the statute conform to Judge Parker's decision in *Briggs* that the Constitution is color

lind, not color conscious."[46] Managers of the bill emhasized and re-emphasized their understandings in this egard for, had they not, the necessary votes for passage f this extremely controversial measure would never have een forthcoming.

Unfortunately for the cause of civil rights and of education, the Courts and the Executive have misconstrued the Congressional will. As a result, a widening gulf between the promise of the Act and the performance of the Executive and the Courts in implementing and interpreting it has developed.

Justice Brandeis, one of the greatest civil libertarians ever to grace the bench, once said: "Experience teaches us to be most on our guard to protect liberty when the Government's purposes are beneficent."

It would be the ultimate irony if 'beneficent' attitudes on the part of well-meaning Executive and Judicial civil rights proponents had the ultimate effect of indelibly branding into the public consciousness the false notions that Blacks had to be treated unequally in order to be equal; that they are unable to either teach or learn from one another; that they, like some American Indians, in their own interest, must be made permanent wards of an all beneficent State.

Yet, is not this precisely what is happening?

What is to be done? Obviously, the Courts are at a judicial crossroads. If their efforts to improve educational opportunities for Black Americans are not to bear rancid fruit, they simply cannot continue to ignore the political, social, constitutional, and legislative mandate of the Civil Rights Act of 1964.

Some may argue that it is already too late; that past mistakes of interpretation cannot now be undone. But

[46] *Briggs* v. *Elliott*, 132 F. Supp. 776 (E.D.S.C. 1955).

such assertions are falacious. After all, the Supreme Court waited half a century to undo *Plessy*. A mere half decade has passed since the 'balancing' trend began.

A vast reservoir of racial good will still exists. The opportunity to move ahead thus remains. If reason rules, progress will be great. But, if it does not, then a harsh night of disharmony, disruption, and discord will descend upon our land as a new era of Reconstruction—this time judicially imposed—rends the Nation assunder once again.

If this comes to pass, who can seriously argue that the cause of education for Black Americans, or for that matter, for any American, will be advanced?

Respectfully submitted,

IN THE

SUPREME COURT OF THE UNITED STATES

OCTOBER TERM, 1970

NO. 281

JAMES E. SWANN, *et al.*,

Petitioners,

v.

CHARLOTTE-MECKLENBURG BOARD OF EDUCATION, *et al.*,

Respondents.

ON WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE FOURTH CIRCUIT

BRIEF FOR THE NATIONAL EDUCATION ASSOCIATION AS AMICUS CURIAE

INTEREST OF THE NATIONAL EDUCATION ASSOCIATION

e National Education Association (hereinafter NEA) is dependent, voluntary organization of professional edu-s. It has over one million members, including teachers, visors, and administrators. As stated in the Associa- Charter, its purpose is "to elevate the character and ce the interests of the profession of teachers and to ote the cause of education in the United States." Both EA and its members have a deep interest in the qual- education received by children of all races. NEA con- it imperative that pursuant to *Brown v. Board of Ed-*

ucation, 347 U.S. 483 (1954), desegregation of the nation's schools be complete and effective. NEA has recently conducted investigations of the problems of race and education in the school systems of Wilcox County, Alabama; Baltimore, Maryland; some 22 counties in Louisiana; Detroit, Michigan; some 30 counties in Mississippi; Hyde County, North Carolina; and the region of East Texas. NEA has also participated as a party or as *amicus curiae* in several school desegregation cases, including the proceedings in the instant case before the Fourth Circuit and before this Court on the petition for certiorari, and in numerous others has actively supported efforts to secure judicial relief.

STATEMENT

This case is before the Court on certiorari to review the judgment of the court of appeals insofar as it vacated the order of the district court requiring implementation of that court's desegregation plan for the Charlotte-Mecklenburg School District. The court of appeals affirmed the district court's order to the extent that it required implementation of the desegregation plan for senior and junior high schools. That part of the court of appeals judgment is not challenged in this case. It is attacked in a cross-petition for certiorari (No. 349) that was filed by respondents herein on July 2, 1970. To date, the cross-petition has not been granted.

Accordingly, we deal in this brief with the part of the court of appeals judgment challenged by petitioners, *i.e.*, that part vacating the district court's order insofar as it provided for the assignment of elementary school pupils and remanding that aspect of the case to the district court for further proceedings. The district court has now held hearings upon the remand and on August 3, 1970, issued a new order directing the School Board to put the court's elementary school desegregation order here involved into effect at the opening of the 1970 fall term unless the Board chooses to prepare a pupil assignment plan for use with the deseg-

regation plan recently proposed by a minority of the Board or to implement portions of both the court's plan and the minority plan so as to achieve the requisite desegregation of the schools. (Memorandum of Decision and Order, August 3, 1970, pp. 32-33).[3]

[3]In pertinent part, the court's August 3 order provided:

As to the elementary schools:

(a) The order entered by this court on February 5, 1970 having been subjected to three weeks of review under the reasonableness test is expressly found to be reasonable, and the School Board are directed to put the court ordered plan of desegregation into effect at the opening of school in the fall of 1970, *unless* they avail themselves of some of the options indicated herein.

(b) The plan for elementary school desegregation proposed by a 4/5 minority of the School Board (the Watkins plan) has been examined and is found to be reasonable, as far as it goes. It is, however, incomplete because it contains no plan for pupil assignment. The School Board are authorized to prepare an appropriate pupil assignment plan and use the minority plan for elementary school desegregation instead of the comparable portions of the plan previously ordered by the court, if they so elect.

(c) The School Board, if they so elect, may use portions of the minority plan and portions of the court ordered plan, bearing in mind that the most important single element in the order of this court on February 5, 1970 is paragraph 16, reading as follows:

> 16. The duty imposed by the law and by this order is the desegregation of schools and the maintenance of that condition. The *plans* discussed in this order, whether prepared by Board and staff or by outside consultants, such as computer expert, Mr. John W. Weil, or Dr. John A. Finger, Jr., are *illustrations of means or partial means to that end.* The defendants are encouraged to use their full 'know-how' and resources to attain the *results* above described, and thus to achieve the constitutional end by any means at their disposal. The test is not the method or plan, but the *results.*

(d) The Board are free to incorporate into any plan they may make whatever portions of the work of the Department of Health, Education and Welfare staff, or such parts of the original partial Finger plan (Plaintiffs' Exhibit 10), which are consistent with their duty to carry out the order to desegregate the schools.

We understand that the entire Memorandum of Decision and Order will be printed as an Appendix to the Brief for Petitioners.

The court of appeals opinion lays down several general principles (189a):[4] First, contrary to the view of the district court, a unitary school system does not require that each and every school within the system be integrated. Second, even so, the school board "must use all reasonable means to integrate" the schools within its jurisdiction. Third, if black residential areas are so large that not all schools can be integrated by using "reasonable means," the school board "must take further steps to assure that pupils are not excluded from integrated schools on the basis of race." Specifically, the school board should make available to children in identifiably black schools (that cannot be integrated by "reasonable means") integrated special classes, functions and programs, the right to transfer, with free transportation, from a school with a majority of black students to a school with a black minority, and assignment to integrated schools as these children come up the educational ladder.

The court of appeals explained its "reasonable means" test as requiring a school board to make "every reasonable effort" to integrate each school (189a-190a). Efforts that are not "reasonable" would apparently not be required so long as the school board takes the "further steps" noted above.

"Every reasonable effort" to desegregate is all that is required under the court of appeals opinion even though the black residential areas in Charlotte that are "so large" as to defy desegregation through the use of "reasonable means" are attributable to federal, state and local governmental action (189a). The court of appeals accepted as supported by the evidence the district court's findings that the existing residential separation of the races in Charlotte had been produced in part by governmental action and that the superimposition of neighborhood school lines upon governmen-

---

tally fostered segregated neighborhoods resulted in the creation by the School Board of segregated neighborhood schools (186a-187a).

The court of appeals reviewed the different estimates of the district court and of the Charlotte-Mecklenburg School Board concerning the costs of the additional bussing required by the district court's order and affirmed the district court's findings on the issue, as well as on all other issues, as not clearly erroneous (191a-194a). This is the only discussion of bussing costs set out in the opinion. The court of appeals did observe that bussing is a permissible tool for achieving integration, that it is not new or unusual, that 54.9% of all North Carolina pupils are bussed an average daily round trip of 24 miles at an annual cost of over $14 million, and that the Charlotte-Mecklenburg School District currently busses approximately 23,600 pupils and another 5,000 ride common carriers (194a).

The court of appeals asserted that a school board should view the desirability of bussing to achieve integration in the same light as bussing is viewed in connection with other "legitimate improvements" in the school system, such as consolidating schools and locating new school facilities (194a). Specifically, the court listed five considerations that a school board should take into account in utilizing bussing as a tool for achieving integration: (1) the age of the pupils involved, (2) the distance they must be bussed, (3) the time required to bus them, (4) the effect on traffic and (5) the cost in relation to the school board's resources (194a).

Finally, the court of appeals held that the district court's order insofar as it dealt with elementary school pupils would require the respondent School Board to undertake additional bussing so extensive as to constitute an unreasonable means of desegregating the schools. In support of this holding the court of appeals reasoned that the district court's elementary school plan would require 9300 pupils to be bussed in 90 additional busses, that most of the bussed children

would be blacks in grades 1 through 4 and whites in grades 5 and 6, that the average round trip would be 15 miles through central city and suburban traffic, that the district court's plan would involve a 39% increase in the number of bussed children and a 32% increase in the size of the School Board's fleet of busses, and that the number of children bussed would be increased by 56% and the bus fleet by 49% if the additional bussing for junior and senior high school students approved by the court of appeals were included in the calculations (198a).

SUMMARY OF ARGUMENT

1. Even if the "reasonable means" test formulated by the court of appeals were an appropriate standard for review of district court desegregation orders, the court of appeals should have concluded in this case that the additional bussing required by the district court was a reasonable means to desegregate the Charlotte-Mecklenburg elementary schools. The cost of the additional bussing would be very small as compared to the resources available to the School Board, and the educational benefits that would be realized by black school children would far outweigh the relatively minor financial costs. The bussing of elementary school students is not rendered unreasonable because of their age. In North Carolina 70.9% of all bussed pupils attend elementary schools. Furthermore, the younger a black child is when he begins attending desegregated schools, the greater the substantial educational benefits arising from a desegregated education will be. The average distance that the students would be bussed under the district court's order is less than half the average distance that students are now bussed to school by the School Board. The time that would be spent on the bus is well within generally recommended limits. The effects of the additional bussing on traffic would be negligible. Finally, the percentage increase in students bussed and busses needed is directly attributable to the failure of the School Board to proceed sixteen years ago to desegregate the schools with all deliberate speed. Had the appro-

priate steps been initiated then to achieve desegregation within the school system, the increment in busing at this time would be modest indeed.

2. The "reasonable means" test is an inappropriate standard for review of a district court desegregation order. The test, at least as conceived by the court of appeals, suggests that bussing should be considered as a tool for achieving school desegregation in the same light that it is considered "for other legitimate improvements, such as school consolidation. . . ." This approach fails to recognize that the constitutional rights of Negro school children are at stake, and that school boards are charged with the duty to take "whatever steps might be necessary" to desegregate dual school systems. *Green v. School Board of New Kent County*, 391 U.S. 430, 437-38 (1968). *Green* calls for a somewhat different standard of review, one that emphasizes the "heavy burden" upon the proponent of the less effective desegregation plan before the court. This burden should be at least as heavy as the "compelling governmental interest" test applied in other equal protection cases involving fundamental constitutional rights. *E.g., Shapiro v. Thompson*, 394 U.S. 618, 634 (1969). The rights involved in this case are no less fundamental and should not be denied by rejection or modification of the most effective desegregation plan before the court unless a compelling governmental interest necessitates such rejection or modification. No compelling governmental interest was shown here.

3. Under *Green v. School Board of New Kent County, supra*, the "heavy burden" or, as we suggest, "compelling governmental interest" standard applies in all cases, without exception, where a district court has before it a more effective plan to desegregate a dual system than that proposed by the local school board. *A fortiori*, the test should apply in cases such as the one at bar. Here, as both of the lower courts found, the neighborhood schools that would remain black absent the additional bussing required by the district court are black as a result, in part, of governmentally caused residential segregation. When the School Board, under these

circumstances, insists on a "neighborhood school" system, it effectively classifies pupils on the basis of race, and racial classifications can stand, if at all, only where they are justified by a "compelling governmental interest."

ARGUMENT

I

The Additional Bussing Required by the District Court's Order Constituted a "Reasonable Means" of Desegregating the Charlotte-Mecklenburg Elementary Schools.

The "reasonable means" test applied by the court of appeals was not in our view an appropriate standard for review of the district court's order, but we shall assume that it was for the purposes of this Part I of our Argument. We deal in Parts II and III, *infra*, with what we believe the School Board's minimum burden should have been to justify reversal of the district court's ruling.

It is not at all clear from the court of appeals opinion why the court found the additional bussing required by the district court's order to impose an unreasonable burden upon the School Board. Presumably, the court applied the five factors that it said a school board should take into consideration in determining who should be bussed where. The only alternative analysis that may be made of the court of appeals opinion is that the court found the additional bussing unreasonable simply because it constituted too great a relative increase in the number of children bussed and in the number of busses needed to transport them. In either event, in the judgment of NEA based upon the analysis below, the additional bussing called for by the district court is a "reasonable means" of desegregating the schools.

A. *Costs.* Perhaps the most significant among the factors enumerated by the court of appeals is the cost of bussing in relation to a school board's resources. In this connection, the court appears to have concentrated more upon

the dollars involved than upon the sufficiency of the Board's resources to absorb their expenditure.

The district court found that the additional cost to the School Board would amount to $672,000 during the first year ($186,000 of operating expense and $486,000 in capital outlay to purchase new busses) and $186,000 for each year thereafter (156a-157a), that the School Board now spends approximately $500,000 on bussing annually, out of a total operating budget of $51 million, and that local sources (as opposed to federal and State sources) now provide about $25 million a year to the school system. (138a-139a). Thus, the cost of the existing and additional bussing would be about 1.3% of the School Board's total operating budget and about 2.7% of the local funds provided annually to the Board. Nationally, schools devote approximately 4.3% of net current expenditures to transportation. O. Furno, *et al.*, "Cost of Education Index 1969-70," *School Management* 42-43 (January, 1970).

On remand, the district court found that the School Board already had 107 of the 138 busses that would be needed to provide the additional transportation required by the court's desegregation plan for all grades, that the State of North Carolina had 400 second-hand busses that it had offered to lend without cost to school boards for use in 1970-71, that the School Board would face no immediate need to invest in new busses, that the School Board's total budget for 1970-71 was $8 million higher than for 1969-70 and provided that $21.9 million was available for unrestricted use, and that the State, which has regular budgetary surpluses, pays almost all of the costs of operating the Charlotte-Mecklenburg school busses (Memorandum of Decision and Order, August 3, 1970, pp. 18-23). In short, the additional costs involved were found well within the capability of State and local governments to bear them. See, also, the discussion at pp. 23-24, *infra.*

The reasonableness of the costs here involved must also be measured against the value of what is being purchased.

These expenditures are not made just for transportation. They also buy increased educational opportunities, particularly for the black child.

Among educators there is virtually no question that the quality of schooling for ghetto younsters should be upgraded and efforts should be made to overcome the effects of racial isolation. The value of desegregation in this connection was demonstrated in an extensive study prepared for the Office of Education (HEW). That study showed that the achievement of Negro children is strongly influenced by the "educational backgrounds and aspirations of the other students in the school." The study further found that the principal difference in the school environments of white and black students is "the composition of their student bodies." J. Coleman, *Equality of Education Opportunity* 22 (1966).

The data collected by the Office of Education were reanalyzed for the United States Commission on Civil Rights. This re-examination confirmed the "importance of the student environment of the school" and showed that "segregated Negro students are most likely attending class with other students of a very low social class." Furthermore, the study showed that even when the social class of the student and his school are held constant, there still is "an upward trend in average achievement level as the proportion of white classmates increases." Thus, improved "social class level of the school . . . may not be the only source of benefit for Negro students in desegregated situations. There is also evidence that the racial composition, as distinguished from the social class composition of the school, has an important influence." U.S. Commission on Civil Rights, *Racial Isolation in the Public Schools* Appendices 40 (1967). This, in general, may be attributable to the better educational atmosphere produced when "the majority of the children . . . do not have problems of self confidence due to race and the schools are not stigmitized as inferior." Id. at 105.

The most comprehensive compilation to date of the educational effects of desegregation concluded:

> 1. Academic achievement rises as the minority child learns more while the advantaged majority child continues to learn at his accustomed rate. Thus, the achievement gap narrows.
>
> * * * *
>
> 2. Negro aspirations, already high, are positively affected; self-esteem rises; and self-acceptance as a Negro grows.
>
> * * * *
>
> 7. Virtually none of the negative predictions by anti-desegregationists finds support in studies of actual desegregation.
>
> M. Weinberg, *Desegregation Research: An Appraisal* 378-379 (2d ed. 1970).

These conclusions rest on a study of about 300 surveys of school desegregation. See, also, the findings of the district court in this case indicating that in Charlotte blacks in desegregated schools perform better than blacks in all-Negro schools (97a-98a).

The cost of additional bussing to achieve desegregation should also be measured against the cost of compensatory education programs that may be utilized in an effort to make up for the disadvantages of a segregated school. A review of several such programs by the U.S. Commission on Civil Rights indicates that they are quite expensive. A New York City experimental project cost $80 per junior high school student and up to $250 for a student in senior high school. U.S. Commission on Civil Rights, *Racial Isolation in the Public Schools* 123 (1967). When the program was broadened to include more children, the cost ranged from $50 to $60 per child. *Id.* at 124. A Syracuse, N. Y., program experienced expenses of $100 per child for elementary and junior high students. *Id.* at 128. The lowest cost mentioned among the programs reviewed by the Commission was $35 per student in Philadelphia. *Id.* at 132. These

costs are substantially higher than the $20 per pupil cost for the additional bussing required by the district court in this case. Moreover, the results of the programs reviewed, insofar as achievement is concerned, were far less encouraging than those that can be expected from desegregated classes. *Id.* 128-140.

In short, NEA's position is that bussing costs, when incurred as part of a plan for desegregating schools, cannot be written off as mere transportation expenses. They provide real educational benefits to the disadvantaged youngsters in the ghetto, and those children, generally speaking, sorely need special attention in order to mitigate the adverse effects of racial isolation. The financial costs anticipated here are reasonable enough when viewed in connection with the financial resources available to bear them. They are more reasonable still when one considers what they will buy in the way of educational benefits for those children who have yet to realize the promise of desegregated schools, and the greater cost of less satisfactory compensatory education alternatives.

Finally, that it may cost money to vindicate the constitutional rights of black children in Charlotte's elementary schools is no reason to leave those rights in limbo. In *Shapiro v. Thompson*, 394 U.S. 618, 633 (1969), this Court held that the "saving of welfare costs" could not justify what would otherwise amount to a deprivation of an individual's right to equal protection of the laws. The costs there involved were far greater than those here in issue. And in *Griffin v. County School Board*, 377 U.S. 218, 233 (1964), the Court declared that in fashioning relief from continuing racial discrimination in connection with public education in Prince Edward County, Virginia, the district court might require the local authorities "to levy taxes to raise funds" to operate desegregated schools.

B. *Age.* Another factor considered by the court of appeals is the age of the students to be bussed. Among the findings of the district court, which were accepted by

the court of appeals, were that 9,300 additional children in grades 1 through 6 would be transported (155a) and that travel by school bus is safer than walking to school or riding there in private vehicles (140a). The district court had earlier noted that first graders "may be the largest group" among the 23,600 students that are currently being bussed by the School Board (22a). Judge Winter, concurring in part and dissenting in part in the court of appeals, observed (221a-222a) that the Charlotte-Mecklenburg School Board busses a far lower percentage (21%) of students than does North Carolina as a whole (54.9%). Statewide, 38.7% of all enrolled students (70.9% of all bussed students) are bussed to elementary schools (137a). Under the district court's order, a total of 43.6% of all Charlotte-Mecklenburg students will be bussed, and this figure includes substantial numbers of students bussed to junior and senior high schools. (186a, 138a, 157a) Thus, the percentage of elementary school students that will be bussed under the district court's order compares favorably with the percentage of elementary school students bussed statewide.

The district court's subsequent decision on August 3 included findings that currently more elementary school children than high schoolers are bussed in Charlotte-Mecklenburg and that four- and five-year olds are transported on the longest bus routes in the system (Memorandum of Decision and Order, August 3, 1970, pp. 23-24).

School children of all ages can be and are bussed to schools throughout the nation every day. During the 1969-70 school year some 18 million children were bussed to public schools in America. NEA, National Commission on Safety Education, *1968-1969 Statistics on Pupil Transportation* (1970). This amounted to approximately 39% of the estimated 45.5 million total public school population. NEA Research Division, *Estimates of School Statistics, 1969-70* (1969).

On the other hand, the age of the child probably has a crucial influence on the effectiveness of school desegrega-

tion. There is widespread, if not universal, recognition among educators that the critical years in the educational process are the early school years. In this formative period, the school system has the greatest opportunity to help the child develop mental discipline, appropriate social attitudes and fundamental skills, such as reading. See, for example, B. Bloom, *Stability and Change in Human Characteristics* 215-16 (1964).

For children from whom educational opportunity has historically been withheld, the early years are probably even more important. These children, as they progress through school, show a cumulative deficit. They often begin school with inadequate language skills, insufficient perceptual skills, shorter attention spans, and poorer motivation. With age, the child's linguistic patterns harden. The gap between his reading skills and those of his middle class peers enlarges. By the time the child reaches the eighth grade he is about three years behind the grade norms for reading, arithmetic and a variety of other subjects. B. Bloom, *et al., Compensatory Education for Cultural Deprivation* 73-74 (1965).[5]

As one would expect, then, the beneficial effects of desegregation are likely to be greatest in the lower grades. In Charlotte, as the district court found on remand, achievement test scores demonstrate that the higher the grade at which schools are first desegregated, the greater are the academic penalties that black children will incur (Memorandum

---

[5] Compare the results of a survey made by the U.S. Office of Education reported in U.S. Commission on Civil Rights, *Racial Isolation in the Public Schools* 14 (1967): "Negro and white students in metropolitan areas begin school with a noticeable difference in verbal ability. At sixth grade, the average Negro student is about one and one-half grade levels behind the average white student in verbal achievement. By the time 12th grade is reached, the average white student performs at or slightly below the 12th-grade level, but the average Negro student performs below the 9th-grade level. Thus, years of school completed has an entirely different meaning for Negroes and whites."

of Decision and Order, August 3, 1970, pp. 7-8, 16). More generally, "those [black] students who first entered desegregated schools in the early grades do generally show slightly higher average scores [on achievement tests] than the students who first came to desegregated schools in later grades." J. Coleman, *op. cit. supra,* at p. 331. To the same effect, see M. Weinberg, *op. cit. supra,* at p. 58; Report to the Board of Regents of the University of the State of New York, *Racial and Social Class Isolation in the Schools* 18, 238 (1969). Thus, if the optimum educational advantages of desegregation are to be obtained, desegregation should begin with the youngest pupils in the system.

In short, to the extent that the age of the children to be bussed to achieve desegregation is weighed in evaluating the "reasonableness" of the bussing, the younger the black child, the more he will benefit from the bussing. The added educational benefits of desegregation in the early grades more than outweigh the disadvantages, if any, that bussing might entail.

C. *Distance.* A third factor cited by the court of appeals is the distance that the children would be bussed. The district court found that the average length of a one-way bus trip in the school system was over 15 miles, while the average one-way trip for elementary school students under the court's plan would be less than 7 miles, which distance was obtained by the method used by the county school bus superintendent, *i.e.*, taking the straight line mileage and adding 25% (153a, 183a). On remand, the district court found that four- and five-year-olds today travel from 7 to 39 miles, one way, on the School Board's busses (Memorandum of Decision and Order, August 3, 1970, at p. 17).

The matter of distance, of course, involves for at least some children the question whether they are to be schooled in the "neighborhood" or at some more removed location. From the educator's viewpoint, the neighborhood school

has both advantages and disadvantages. See R. Havighurst, "The Neighborhood School: Status and Prospects," in Frazier ed., *A Curriculum for Children* 73-76 (1969) and R. Binswanger, *Address before the American Association of School Administrators*, February 13, 1967. Certainly, as the district court observed (22a), it is far from an unquestioned virtue. One of the foremost authorities in the field is of the view that "there cannot be a really good all-Negro neighborhood school in the United States today." Havighurst, *op. cit. supra*, at 82. See, also, M. Weinberg, *Race and Place* 89 n.5 (1967), and the discussion at pp. 14-15, *supra*.

It must be emphasized in this respect that the remedy fashioned by the district court is not much different than the remedy employed earlier by school authorities in the nation-wide effort to eliminate the educational deprivations of rural America. As a result of that effort the number of single-teacher schools was reduced from 156,066 in 1927-28 to 6,500 in 1965-66. NEA Research Division, *One Teacher Schools Today* 9 (1960); U.S. Office of Education, *Statistics of State School Systems, 1965-1966* 4. Similarly, the number of school systems was reduced from 127,422 in 1931-32, to 18,904 in 1969-70. NEA Research Division, *Estimates of School Statistics, 1969-70* 5-6 (1969). That consolidation eliminated nearby schools for many families and required extensive bussing of children to the villages. It involved costs and inconvenience and aroused resistance over the loss of locally-based schools. But in terms of the improved educational opportunity provided the students, it was worthwhile and constructive. In fact, the most important effect of school consolidations was the educational gains produced by bringing together laboring class children of the farms and middle-class children of the village. Swanson, "Contemporary Challenges: Monitoring Human Inputs into the Schools," *Fiscal Planning for Schools in Transition* in Proceedings of the Twelfth National Conference on School Finance 80-84 (1970).

D. *Time.* A fourth factor mentioned by the court of appeals is the time required to bus the students to and from school. The district court found that the average one-way bus trip under the district court's elementary school plan would take "not over 35 minutes at the most" whereas the average one-way bus trip in the Charlotte-Mecklenburg school system today takes "nearly an hour and a quarter" (153a).

The generally recognized limits on the amount of time that a student should be bussed were formulated in 1948 by the National Commission on School District Reorganization. That Commission laid down the minimum staff and enrollment levels which are consistent with the educational interests of the children. The Commission, however, counseled school planners that:

> In more sparsely populated areas, the need to transport children to and from school makes it desirable to modify these standards. It may be detrimental to the physical and emotional well-being of children to keep them on the road for long periods; thus, over-zealous efforts to set up desirable situations for the provisions of a good educational program may seriously undermine one of its most important elements. The best information available indicates that:
>
> 1. The time spent by elementary children in going to and from school should not exceed 45 minutes each way.
> 2. The time spent by high school pupils in going to and from school should not exceed an hour each way.
>
> NEA, Department of Rural Education, *Report of the National Commission on School Reorganization* 81-82 (1948).

No development since these standards were formulated suggests that they are outmoded. The bussing prescribed by the district court is well within them.

E. *Traffic.* Lastly, the court of appeals mentioned the effect of the bussing on traffic. The court noted that the bussing required by the district court would run through central city and suburban traffic and that (193a) "large numbers of school buses themselves generate traffic problems that only experience can measure." Judge Sobeloff, in his separate opinion dissenting in part and concurring in part, found in the record "no evidence of insurmountable traffic problems due to the increased bussing." He also doubted whether the additional busses would have very much of an impact in an area in which estimated automobile trips per day approximate 870,000. The district court found that the School Board already operates 279 busses within the school district and that the court's desegregation plan would involve "no serious extra load on downtown traffic because there will be no pickup and discharge of passengers in downtown traffic areas" (142a, 143a).[6]

F. *Percentage increase.* The additional bussing of elementary school pupils required by the district court's order

---

[6]On remand, the district court made findings which clearly establish that the traffic problem is an unreal one (Memorandum of the Decision and Order, August 3, 1970, at pp. 24-25):

> The county has over 160,000 passenger vehicles and nearly 30,000 trucks registered in it. It is estimated that the total number of automobile trips in the county daily other than truck trips is over 869,000. Traffic is heavy in most part of the county. Since the so-called "cross-bussing" of the Finger plan or the minority plan will not contemplate pick up and discharge of pupils in the central business area, the busses added by the Finger plan or the minority Board plan will provide very little interference with normal flow of traffic. School busses are no wider than other busses (the law requires that this be so); they already use all the major streets and traffic arteries in the county and city every school morning of the year. There is no evidence to show that adding 138 school busses to the volume of existing traffic will provide any such impediment as should be measured against the constitutional rights of children. It would also appear that a school bus transporting 40 to 75 children should reduce traffic problems by cutting down on the number of automobiles that parents might otherwise be driving over the same roads.

does represent a substantial percentage increase in the total number of pupils bussed by the school board (39%) and in the total number of busses needed to transport them (32%). This increase is substantial, however, simply because the district court's order in one sweep invoked measures that in large part should have been taken over the last sixteen years. Had the school board begun in the 1954-55 school year to desegregate its elementary schools by providing each year 1/17th of the additional bussing called for by the district court, so that 100% of such bussing would be provided for the first time in the 1970-71 school year, the percentage increase from 1969-70 to 1970-71 in the number of students bussed and the number of busses needed for them would be only 1.69% and 1.45% respectively. The capital outlay for new busses during the period would have been only $28,000 per year, including 1970-71. The lump-sum capital outlay that would be required *now* by the district court's order if new busses had to be purchased approaches a half million dollars simply because outlays of capital to achieve desegregation as required by law were not forthcoming during the previous sixteen years.

The sizeable percentage increase in pupils bussed and busses needed resulting from the district court's order is thus directly attributable to the failure of the School Board to desegregate the schools during the years that have elapsed since 1954. Furthermore, "the actions of the present school board and others, before and since 1954, in locating and controlling the capacity of schools so that there would usually be black schools handy to black neighborhoods and white schools for white neighborhoods" (87a) have affirmatively added to the problem. To hold with the suggestion of the court of appeals that additional bussing may not be a "reasonable means" of achieving desegregation where it involves too "extensive" an increase is to reward school districts for delaying desegregation—and augmenting separate facilities in the interim—to the point where such extensive increases are necessary. The size of the percentage

increases in bussing simply does not warrant consideration in the "reasonableness" equation.

In sum, NEA believes the desegregation plan for elementary schools ordered by the district court was a reasonable and effective means of desegregating this portion of the school system. Since there was no more effective desegregation plan before the district court, its order should have been affirmed by the court of appeals. *Green v. School Board of New Kent County*, 391 U.S. 430 (1968). Accordingly, this Court should reverse the ruling of the court of appeals and reinstate the district court's order. However, in so doing the Court should not embrace the "reasonable means" test as a standard for review of desegregation orders. We turn now to a consideration of that issue.

II.

The Court of Appeals Should Have Reviewed the District Court's Order Not by the Standard of Whether It Provided for "Reasonable Means" for Effectuating Desegregation, but by Determining Whether Its Modification Was, at the Least, Necessary To Serve a Compelling Governmental Interest.

The court of appeals' opinion appears to draw a line beyond which a district court may not go in providing effective relief to remedy the established unconstitutional deficiencies of dual school system: A district court may require whatever desegregation may be achieved by "reasonable means," but where the remnants, no matter how large, of a dual school system cannot be disestablished by "reasonable means", they need not be disestablished at all. We have demonstrated above that the additional bussing of elementary school pupils required by the district court constituted a "reasonable means" of achieving desegregation and so met the new test formulated by the court of appeals. We argue here that that test itself is an improper one.

The obligation to desegregate a dual school system may well be an absolute duty that may not be avoided in any part on any ground. We do not, however, reach that question, nor need this Court in order to reverse the decision of the court of appeals. At the least, one who seeks to overturn or modify an effective desegregation plan ordered by a district court must demonstrate that such a reversal or modification is necessary to serve a compelling governmental interest. No such interest was shown here.

What are "reasonable means" to achieve desegregation and what are not may all too easily be determined without sufficient recognition that the fundamental and immediate rights of thousands of black school children to an education in desegregated public schools is at stake. *Alexander v. Holmes County Board of Education*, 396 U.S. 19, 20 (1969). The court of appeals in this very case made just such an error. It indicated that bussing, as a means of achieving desegregation, should be viewed "in the light" that it is viewed "for other legitimate improvements, such as school consolidation and the location of new schools" (194a). Although a school board may decide against a proposed school consolidation or particular location for a new school on the ground that the proposal would require additional bussing that the school board, rightly or wrongly, deems undesirable, the constitutional rights of a large minority of the school population to a desegregated education cannot be made to rise or fall on a similarly nice policy judgment. This Court in *Green v. School Board of New Kent County*, 391 U.S. 430, 436, 437-38, 442 (1968), asserted that to vindicate the "constitutional rights of Negro school children" school boards are "clearly charged with the affirmative duty to take whatever steps might be necessary to convert a unitary system in which racial discrimination would be eliminated root and branch" and to "fashion steps which promise realistically to convert promptly to a system without a 'white' school and a 'Negro' school, but just schools." *Green* did not limit this duty to taking only the action that a school board (or court) might

consider reasonable in order to obtain other legitimate educational improvements, such as consolidating old schools or locating new ones. *Green* called for "whatever" steps may be necessary.

In addition, the "reasonable means" standard is exceedingly vague and openly invites circumvention of the constitutional right of black children to equal educational opportunities. As Judge Sobeloff observed below (212a-213a):

> Handed a new litigable issue—the so-called reasonableness of a proposed plan—school boards can be expected to exploit it to the hilt. The concept is highly susceptible to delaying tactics in the courts. Everyone can advance a different opinion of what is reasonable. Thus, rarely would it be possible to make expeditious disposition of a board's claim that its segregated system is not "reasonably" eradicable. Even more pernicious, the new-born rule furnishes a powerful incentive to communities to perpetuate and deepen the effects of race separation so that, when challenged, they can protest that belated remedial action would be unduly burdensome.

Green v. School Board of New Kent County, supra, establishes, or at least points to, a different standard by which the appropriateness of a desegregation plan ordered to be implemented by a district court should be measured. Where two plans for desegregation are before a district court, *Green* requires that the proponent of the plan that does the less effective job of desegregating the schools bear a "heavy burden" to justify its implementation. *A fortiori,* where a school board challenges a district court order requiring implementation of the more effective plan, that is, the plan that promises to work best now, it should bear a heavy burden to show why the more effective plan should not be carried out.

We read this language in *Green* as requiring a school board to carry a burden at least as heavy as this Court has imposed in equal protection cases involving fundamental constitutional rights arising in contexts other than racial discrimination, *i.e.*, rejection or modification of the more

effective desegregation plan must be shown to be necessary in order to serve a compelling governmental interest.

In *Shapiro v. Thompson*, 394 U.S. 618, 634 (1969), this Court struck down a welfare benefit waiting period because it served to penalize the exercise of the constitutional right to travel among the several states and had not been "shown to be necessary to promote a compelling governmental interest." The Court recognized that the waiting-period provisions resulted in a considerable savings of welfare costs, but this interest was not sufficiently compelling to justify inhibiting the exercise of constitutional rights. In *Williams v. Rhodes*, 393 U.S. 23, 24, 31 (1968), Ohio election laws making it "virtually impossible" for a new political party to obtain a place on the ballot to choose electors for the Presidency and Vice Presidency of the United States were invalidated. The rights of individuals to join together to advance their political beliefs and effectively to cast their votes were adversely affected by the Ohio statutes. This Court, quoting *NAACP v. Button*, 371 U.S. 415, 438 (1963), held that only a compelling state interest, which Ohio had failed to show, could justify the infringement. *Sherbert v. Verner*, 374 U.S. 398, 406 (1963), held that a state could not disqualify a person for unemployment benefits because she was unavailable to work Saturday where her unavailability was due to the exercise of her religious beliefs. The Court considered "whether some compelling state interest . . . justifies the substantial infringement of appellant's First Amendment right" and found none. See, also, *Skinner v. Oklahoma*, 316 U.S. 535, 541 (1942); *Carrington v. Rash*, 380 U.S. 89, 96 (1965); *Kramer v. Union School District*, 395 U.S. 621, 626-27 (1969); *Cipriano v. City of Houma*, 395 U.S. 701, 704 (1969); *Harper v. Virginia Board of Elections*, 383 U.S. 663, 670 (1966); *Bates v. Little Rock*, 361 U.S. 516, 524 (1960).

In this case the no less fundamental rights of Negro school children to be freed completely of the disabilities of a dual school system are in issue. *Alexander v. Holmes County Board of Education*, 396 U.S. 19, 20 (1969). These are rights that are personal to each black child assigned to a

segregated school. *Sweatt v. Painter*, 339 U.S. 629, 635 (1950). A black child assigned to a black school such as Double Oaks or Lincoln Heights (126a, 127a) is afforded little consolation—and no vindication of his personal and immediate constitutional rights—by the fact that the School Board may afford other students an integrated education. In these circumstances a compelling governmental interest must be shown to justify school assignments that would infringe upon such rights by failing to desegregate the Charlotte-Mecklenburg elementary schools as effectively as the district court's order.

The question is how far the School Board must go to see to it that the constitutional rights of black school children are in fact realized. The answer, in our view, is that the School Board must go as far as it is necessary for it to go to eliminate the racial identity of schools within the system. It may stop short, if at all, only where a compelling government interest so warrants. The governmental interests involved in this case, both educational and financial, have been reviewed in detail in Part I of this Argument. They may not fairly be described as "compelling."

III.

In Any Event, Where a Black Residential Area Has Been Created in Part by State Action, a Compelling Governmental Interest, at the Least, Must Be Shown To Justify a Failure To Disestablish the Racial Identity of the Schools Within That Area.

Certainly, where a classification is based upon race, the need to show a compelling governmental interest is underscored. *Cooper v. Aaron*, 358 U.S. 1, 16 (1958), rejected the contention that school desegregation in Little Rock, Arkansas, be postponed because otherwise civil violence and disruption, albeit inspired by state officials, would ensue. The Court observed that as far back as *Buchanan v. Warley*, 245 U.S. 60, 81 (1917), it had ruled that a zoning ordinance separating residential areas by race

could not be defended on the grounds that it would promote public peace by preventing race conflicts. See, also, *Loving v. Virginia*, 388 U.S. 1, 11 (1967); *McLaughlin v. Florida*, 379 U.S. 184, 192 (1964); *Korematsu v. United States*, 323 U.S. 214, 216 (1944); *Hirabayashi v. United States*, 320 U.S. 81, 100 (1943). A classification based upon race is precisely what is in issue here.

Only additional bussing of the magnitude required by the district court can effectively eliminate the racial identity of the elementary schools in the Charlotte black ghetto (146a, 171a). The district court found (12a-14a, 86a-87a), and the court of appeals agreed (186a), that this segregated residential area was in part the work of federal, state and local governments. If only "reasonable means" need be used to desegregate the schools in the ghetto, and if the requisite additional bussing is not such "reasonable means", governmental authorities will be authorized to perpetuate a racially segregated dual school system by dividing neighborhoods by race and drawing geographic school zones upon those segregated neighborhoods. We contend that under these circumstances a compelling governmental interest, at the least, must assuredly be shown to justify use of a plan that will not desegregate the black neighborhood schools. Otherwise government would too readily be authorized to accomplish indirectly what it could not do directly, *i.e.*, separate students by race.

The district court found that (86a-87a):

> . . . [the] facts are that the present location of white schools in white areas and of black schools in black areas is the result of a varied group of elements of public and private action, all deriving their basic strength originally from public law or state or local governmental action. These elements include among others the legal separation of the races in schools, school busses, public accommodations and housing; racial restrictions in deeds to land; zoning ordinances; city planning; urban renewal; location of public low rent housing; and the actions of the present School Board and others, before and since 1954, in locating and controlling

> the capacity of schools so that there would usually be black schools handy to black neighborhoods and white schools for white neighborhoods.

In more detail, the district court found that under the city's urban renewal program, thousands of Negroes were moved from the center of town west to the least-restrictively-zoned areas, that while this relocation involved many decisions by individuals and governments at various levels, it "occurred with heavy Federal financing and with active participation by the local governments, and it has further concentrated Negroes until 95% or so of the city's Negroes live west of the Tryon-railroad area, or on its immediate eastern fringes," and that the School Board located new schools so as separately to serve the black population relocated to the northwest and the white population moving generally south and east so that such schools became black or nearly black in the northwest and white or nearly white in the east and southeast (13a-14a).

Governmental involvement in Charlotte's residential segregation is also historically evident. After *Buchanan v. Warley*, 245 U.S. 60 (1917), outlawed compulsory residential segregation, a principal impetus to neighborhood segregation was legal recognition and judicial enforcement of racially restrictive covenants.[7] The United States has taken the position that these become "in effect a local zoning ordinance binding those in the area subject to the restric-

---

[7] The Supreme Court of North Carolina held such covenants legally enforceable as late as 1946. *Vernon v. R. J. Reynolds Realty Co.*, 226 N.C. 58, 36 S.E. 2d 710 (1946); *Phillips v. Wearn*, 226 N.C. 290, 37 S.E. 2d 895 (1946); *Eason v. Buffaloe*, 198 N.C. 520, 152 S.E. 496 (1930). In *Phillips* the Court upheld a racial restriction in a deed to a tract of land covering 380 lots in the eastern section of Charlotte, which it described as providing "[p]roperty not to be owned or occupied by persons of the negro race." 37 S.E. 2d at 896. In 1948 this Court held such covenants unenforceable. *Shelley v. Kraemer*, 334 U.S. 1.

tion . . . ."[8] Also, policies followed by the Federal Housing Authority and by local government in connection with public housing projects hage fostered residential segregation.[9]

In sum, the findings of fact made by the district court as well as the historical record of governmental action requiring and supporting residential segregation in Mecklenburg County provide ample support for that court's conclusion (87a) that Charlotte's black residential areas are the result of "so much state action . . . that the resulting segregation is not innocent or 'de facto.'" It is well established that " . . . the involvement of the State need [not] be exclusive or direct. In a variety of situations the Court has found state action of a nature sufficient to create rights under the Equal Protection Clause even though the participation of the State was peripheral or its action was only

---

[8] Brief of the United States in *Bell v. Maryland*, 378 U.S. 226 (1964), as quoted at 329 n. 16. See, also, the discussion of the grounds for decision of *Shelley v. Kraemer*, *supra*, in *Bell v. Maryland*, *supra*, at 328 *et seq.* (dissenting opinion of Mr. Justice Black).

[9] The FHA was urging racially restricted neighborhoods as late as 1938 and continued to treat racial integration as a reason to deny an application for mortgage insurance even after *Shelley v. Kraemer*, *supra*. See U.S. Commission on Civil Rights, *Racial Isolation in the Public Schools* 254-255 (1967). State and local governments likewise fostered residential segregation in their administration of public housing projects long after *Shelley*. Segregated projects in Philadelphia for Negroes and whites were approved in *Favors v. Randall*, 40 F. Supp. 743 (E.D. Pa. 1941) and in 1955, the constitutionality of segregated projects in Detroit was being contested in the courts. *Detroit Housing Commission v. Lewis*, 226 F.2d 180 (6th Cir.). Even as late as 1969, federal courts were finding cities such as Chicago and Lansing, Michigan, to have maintained racially discriminatory policies for *Gautreaux v. Chicago Housing Authority*, 196 F.Supp. 907 (N.D. Ill. 1969); *Ranjel v. City of Lansing*, 293 F. Supp. 301 (W.D. Mich. 1969), *reversed on other grounds*, 417 F.2d 321 (6th Cir. 1969), *cert. denied*, 397 U.S. 980 (1970).

only one of several cooperative forces leading to the constitutional violation." *United States v. Guest*, 383 U.S. 745, 755-756 (1966). In *Evans v. Newton*, 382 U.S. 296, 299 (1966), the Court declared, "[c]onduct that is formally 'private' may become so entwined with governmental policies or so impregnated with a governmental character as to become subject to the constitutional limitations placed upon state action." See, also, *Marsh v. Alabama*, 326 U.S. 501 (1946); *Terry v. Adams*, 345 U.S. 461 (1953); *Burton v. Wilmington Parking Authority*, 365 U.S. 715 (1961).

Under these circumstances, the Fourteenth Amendment requires that the school board avoid freezing black students into racially identifiable neighborhood schools. A State may not locate people in particular residential areas because of their race and then put them in all-black schools because of where they live. To do so is simply to put black neighborhood children in black neighborhood schools because they are black. This, under *Brown*, violates the Fourteenth Amendment.

A long line of lower court decisions holds that when residential racial segregation is caused in part by state action, a school board may not maintain neighborhood schools if to do so means perpetuation of all black schools. *Henry v. Clarksdale Munic. Sep. School District*, 409 F.2d 682, 689 (5th Cir. 1969), *cert. denied*, 396 U.S. 940 (1969); *United States v. Greenwood Munic. Sep. School District*, 406 F.2d 1086, 1093 (5th Cir. 1969), *cert. denied*. 395 U.S. 907 (1969); *Valley v. Rapides Parish School Bd.*, 423 F.2d 1132 (5th Cir. 1970); *United States v. Board of Education of Baldwin County, Ga.*, 423 F.2d 1013 (5th Cir. 1970); *Kemp v. Beasley*, 423 F.2d 851 (8th Cir. 1970). *United States v. School Dist. 151 of Cook County, Ill.*, 286 F.Supp. 786, 798 (N.D. Ill. 1968), *aff'd*, 404 F.2d 1125 (7th Cir. 1968); *Dowell v. School Board of Oklahoma City*, 244 F.Supp. 971 (W.D. Okla. 1965), *aff'd*, 375 F.2d 158 (10th Cir. 1967), *cert. denied*, 387 U.S. 931 (1967); *Spangler and United States v. Pasadena City Bd. of Ed.*, 311 F. Supp.

501 (C.D. Calif. 1970); *Keyes v. School District No. 1, Denver*, 303 F.Supp. 79, 289 (D. Colo. 1969); see *Cato v. Parham*, 302 F.Supp. 129 (E.D. Ark. 1969). But see *Deal v. Cincinnati Board of Education*, 419 F.2d 1387, 1391-92 (6th Cir. 1968).

These rulings represent an application of the accepted proposition that, by indulging in one unconstitutional act (the causing of residential segregation), a state is barred from engaging in action otherwise within its power (neighborhood student assignment) because such action would perpetuate the unconstitutionality. Thus, an otherwise valid voter qualification may not be applied where it would raise standards above those applicable at a time when Negroes were discriminatorily excluded from the franchise, at least where white persons registered during such time remain on the registration rolls. *Louisiana v. United States*, 380 U.S. 145 (1965); *United States v. Duke*, 332 F.2d 759 (5th Cir. 1964). See, also, *United States v. Ward*, 349 F.2d 795 (5th Cir. 1965) (requirement that voting applicant be identified by previously registered voters, who were all white); *United States v. Manning*, 205 F.Supp. 172, 173-174 (W.D. La. 1962) (same); *Ross v. Dyer*, 312 F.2d 191 (5th Cir. 1962) (requirement that siblings attend same school); *Board of Education Oklahoma City v. Dowell*, 375 F.2d 158 (10th Cir. 1967), *cert. denied*, 387 U.S. 931 (1967) (same); *Franklin v. Parker*, 223 F.Supp. 724 (M.D. Ala. 1963), *modified and aff'd adopting the opinion of the district court*, 331 F.2d 841 (5th Cir. 1964) (requirement that graduate student have graduated from accredited college where Negroes could not attend any accredited college in the State); *Meredith v. Fair*, 305 F.2d 343 (5th Cir. 1962), *cert. denied*, 371 U.S. 828 (1962) (requirement of alumni sponsorship where there are no black alumni); *Hunt v. Arnold*, 172 F.Supp. 847 (N.D. Ga. 1959) (same). This is also the rationale of cases like *Mapp v. Ohio*, 367 U.S. 643 (1961) and *Miranda v. Arizona*, 384 U.S. 436 (1966): Constitutional protection becomes meaningless unless courts are watchful to nullify otherwise unobjectionable actions that serve to perpetuate the constitutional wrong.

Additionally, there are cases, such as *Brewer v. School Board of City of Norfolk*, 397 F.2d 37 (4th Cir. 1968),[10] and *Spangler and United States v. Pasadena City Bd. of Ed.*, 311 F.Supp. 501 (C.D. Calif. 1970), which strongly suggest that a school board may not maintain neighborhood schools for neighborhoods that are segregated as a result of private racial discrimination. These are consistent with the cases holding that the government may not encourage, extend, build upon, or involve itself in private discrimination. *E.g., Pennsylvania v. Board of Directors of City Trusts*, 353 U.S. 230 (1957) (the State is forbidden by the Fourteenth Amendment from carrying out the racially discriminating provisions of a private will); *Reitman v. Mulkey*, 387 U.S. 369 (1967); *Keyes v. School District No. 1, Denver*, 303 F.Supp. 279, 289 (D. Colo. 1969). Here the black residential area in Charlotte was found to be the result of government action. Accepting the suggestion in *Brewer* that proof of private racial discrimination is enough, this case, where government action is involved, is *a fortiori*.

Steps short of eliminating the racial identity of ghetto schools under such circumstances will not do. *Green v. School Board of New Kent County*, 391 U.S. 430 (1968), and *Monroe v. Board of Commissioners of the City of Jackson*, 391 U.S. 450 (1968), indicate the constitutional inadequacy of at least one of the alternatives suggested by the court of appeals—freedom of transfer with transportation. Negro students may not be assigned to all-black schools

---

[10] In *Brewer*, the court instructed the district court to determine whether "the racial pattern of the districts results from racial discrimination with regard to housing" and concluded, "[a]ssignment of pupils to neighborhood schools is a sound concept, but it cannot be approved if residence in a neighborhood is denied to a Negro pupil solely on the ground of color." The court went further saying that it is immaterial that the residential patterns are the result of private discrimination: "The school board cannot build its exclusionary attendance upon private racial discrimination." 397 F.2d at 41-42.

and then asked to bear the burden of choosing a desegregated experience. *Ramey v. Board of Education of the Gould School District*. 391 U.S. 443, 447-48 (1968). The other alternatives suggested by the court of appeals are equally insufficient. Special integrated classes not only represent token desegregation that fails to comply with constitutional requirements, but they also may well be harmful to otherwise segregated blacks by reinforcing the feeling of inferiority that is so harmful to education. U.S. Commission on Civil Rights, *Racial Isolation in the Public Schools* 128 (1967). Subsequent assignment to integrated classrooms is not only contrary to the dictates of *Alexander v. Holmes County Board of Education*, 396 U.S. 19, 20 (1969), that schools be desegregated now and that no black student be "effectively excluded" from a classroom because of race, but it also deprives that student of the full benefits of a desegregated education that may be realized only if he is assigned to an integrated school at an early age. See pp. 18-19, *supra*.

In sum, where there is neighborhood segregation in part caused by state action, at the very least a school board may not retain neighborhood zones which result in segregated schools absent a compelling governmental interest necessitating the retention of those boundaries. In this case no compelling governmental interest was shown to justify such racial classifications.

CONCLUSION

For the reasons stated above, the judgment of the court of appeals should be reversed and that part of the order of the district court vacated by the court of appeals reinstated.

Counsel for the Applicants.

AMICUS CURIAE BRIEF IN SUPPORT OF APPLICATION TO EXPEDITE CAUSE AND TO CONVENE SPECIAL TERM OF COURT

TO THE HONORABLE WARREN E. BURGER, CHIEF JUSTICE OF THE SUPREME COURT OF THE UNITED STATES AND THE ASSOCIATE JUSTICES OF THE SUPREME COURT OF THE UNITED STATES:

Earl Faircloth, the duly elected Attorney General of the State of Florida, and Floyd Christian, the duly elected Commissioner of Education of the State of Florida, on behalf of all the citizens of Florida and all others similarly situated, respectfully request that this Court expedite final disposition of this cause through the convening of a Special Term of Court, pursuant to Rules 3 and 41 (4) of the Rules of this Court. Earl Faircloth and Floyd Christian further

state their intention to file yet another brief as *amicus curiae* in this cause if a Special Term is convened. Rule 42 (4). As grounds therefor, they state:

I. THIS COURT HAS AUTHORITY TO CONVENE A SPECIAL TERM OF COURT.

It is well established that this Court has the authority to convene a Special Term to hear and decide a particular case. *Ex Parte Quirin*, 317 U.S. 1 (1942); *Rosenberg v. United States*, 346 U.S. 273 (1953); *Cooper v. Aaron*, 358 U. S. 1 (1958). This authority should be exercised where "the public importance of the questions raised [necessitates consideration] without any avoidable delay." *Ex Parte Quirin*, 317 U.S. 1, 19 (1942).

II. THE PUBLIC SCHOOL DESEGREGATION CONTROVERSY HAS ALREADY BEEN FOUND TO WARRANT A SPECIAL TERM OF COURT.

This Court has already found that public school desegregation issues are questions of such great public importance as to warrant a Special Term of court. In 1958 a controversy arose over desegregation of the public schools of Little Rock, Arkansas. Review was sought of various lower federal court orders and this Court stated that since "the opening date of the High School will be September 15," (358 U.S. at 27) that convening of a Special Term was required. This Court then decided the cause in four days (petition for certiorari was filed by September 8 and the decision was announced September 12). *Cooper v.*

Aaron, 358 U.S. 5 (1958), [See 3 L.ed.2d 1-4].

Although the particular legal issues involved in that case might have been different than this one, the overriding general public concern over the desegregation issue remains the same. The perplexing issues still present in this area have escalated, not diminished, since *Cooper* was decided. Thus, this Court must, since it is composed of the only nine individuals on earth who can set these issues to rest, decide this cause now.

The chief distinction between this cause and *Cooper* is that in this cause the Court has already considered and granted the petition for certiorari and the parties have already had considerably more time to prepare their legal

arguments. Furthermore, this Court already has under consideration a motion to expedite the cause.

III. LOWER FEDERAL COURTS ARE IN HOPELESS CONFUSION OVER THE ISSUES PRESENTED BY THIS CAUSE.

The absence of any prior and clear binding pronouncement from this Court on the constitutionality *vel non* of *"de facto vs. de jure"* segregation, the requirement *vel non* of "massive busing" and other issues presented by this case, have left lower federal courts, the federal government, and the nation's school administrators without any guidelines on "the basic practical problems", *Northcross v. Board of Education*, ___U.S.___, 38 L.W. 4219, 4220 (1970) [Burger, C. J.], involved in compliance with constitutional mandates

re "a unitary school system." Chaos, confusion, resentment, defiance, and conflicting decisions have been the results.

It is not necessary to here cite at length the conflicting views adopted by various courts as they attempt to "predict" what the Constitution mandates. A significant number of them have already been collected. *Annot. 11 A. L. R. 3d 780 (1967)* [plus pocket supp.]. The courts of Florida have not found this task any easier and have met with similar conflicting results.

IV. IRREPARABLE HARM WILL OCCUR IF A SPECIAL TERM IS NOT CONVENED.

Failure to provide these "basic practical guidelines" before the next school year is well under way will result

in irreparable harm to the citizens and children of America, no matter which way this case is ultimately decided.

If this Court decides in the middle of the school year that, for example, "de facto segregation" is constitutional, then harm will be great. School districts which will have *already* been under *contrary* lower federal court orders will already have needlessly expended vast sums of taxpayers' money for extra buses, "pairing", etc. School children who will have already been picked up and moved to unfamiliar surroundings will then be told it was all unnecessary. Equally as unnecessary will have been the judicial and administrative time spent in implementing these lower court orders.

On the other hand, if this Court were to rule "de facto segregation" unconstitutional, equally irreparable harm would occur. School boards which will have *already* been under *contrary* lower federal court orders (or none at all) will suddenly have to purchase buses, pair schools, etc. Children will be forcibly moved to new and unfamiliar surroundings on a scale never before imagined. The "hiatus" which occurred last spring would be pale by comparison.

Clearly, if irreparable injury is to be avoided, this Court should provide "the basic practical guidelines" before the nation's school terms are significantly under way. In this case, to all parties concerned, "justice delayed, may well be justice denied." As this Court,

speaking through Chief Justice Marshall, noted over a century ago, in a different context:

> "The judiciary cannot, as the legislature may, avoid a measure because it approaches the confines of the Constitution. We cannot pass by it because it is doubtful. With whatever doubts, or whatever difficulties, a case may be attended, we must decide it if it be brought before us. We have no more right to decline the exercise of jurisdiction which is given, than to usurp that which is not given. The one or the other would be treason to the Constitution." *Cohens v. Va.*, 19 U.S. (6 Wheat.) 264, 403 (1821).

WHEREFORE, Earl Faircloth and Floyd Christian respectfully request that this cause be expedited and the Court be convened in a Special Term.

Respectfully submitted,

EARL FAIRCLOTH

---

BRIEF OF AMICUS CURIAE

By consent of the petitioners and the respondents and as authorized by the City Attorney of the City of Chattanooga, Tennessee, a political subdivision of the State of Tennessee, The Board of Education for the City of Chattanooga, created in 1941 by Act of the General Assembly of the State of Tennessee, files this brief, *Amicus Curiae.*

INTEREST OF THE AMICUS CURIAE

The *Amicus Curiae,* Chattanooga Board of Education, has an interest in this case in that said Board now has pending motions for further relief in the United States

District Court for the Eastern District of Tennessee, Southern Division in which racial proportions as to students in schools and classrooms, and as to faculties, are proposed as a required application of the Fourteenth Amendment of the Constitution of the United States, as interpreted in *Brown I and II* and later decisions of the Supreme Court of the United States.

A Charlotte-Mecklenburg type decision made applicable to the Chattanooga schools would have a drastic effect upon the quality of support that the voters would provide public education and upon the quality of the educational opportunity in the Chattanooga system — the only setting where the constitutional rights are given their ultimate reality — where the remedy is provided. That such would be detrimental, and substantial, is a certainty. An even more extreme prognosis cannot be rejected summarily. We prefer to err in the direction of understatement.

If the concepts reflected in Judge McMillan's opinion in Charlotte-Mecklenburg are adopted by the Supreme Court as proper constitutional principles, the Chattanooga Board can expect, based upon prior actions, that a Motion for Further Relief will be filed promptly in the District Court in Chattanooga, by plaintiffs demanding that the Charlotte-Mecklenburg concepts be implemented instanter. The Chattanooga Board can expect plaintiffs' attorneys (understandably) to give the broadest possible interpretation to a decision of the Supreme Court reflecting these concepts. The substantial factual differences between the two school systems will be ignored and any effort to explain upon such ground will be deprecated as irrelevant and suspect. It may well be impossible for the Board thereafter to defend its integrity to a substantial portion of its constituency. In a sense the Board may well have been condemned without a fair trial, and with no effective remedy.

The facts are different. Our judicial system is based upon each case being determined upon its own unique factual situations. The educational opportunity of 27,000 students is at risk.

SUMMARY OF ARGUMENT

A Charlotte-Mecklenburg type interpretation of the Fourteenth Amendment compels affirmative action by School Boards and individuals and thus threatens to exceed the capacity of judicial power (governmental power) to enforce its decisions so that the efficacy of the judiciary may suffer to the detriment of civilization. This exposure is a reality. Wisdom demands judicial restraint in the national interest.

The right involved is an equal educational opportunity. Desegregation, a unitary system, a concept expressed in varying language, only attains reality in an educational environment. Thus the former presupposes the latter. The quality of an educational opportunity is outside the ambit of judicial training, experience and competence. Thus the evaluation of factors, both beneficial and detrimental, bearing upon educational quality must repose with the duly constituted authorities selected by the citizens to perform this governmental function. School Boards exist and function (as does the Supreme Court) with the continuing consent of the governed. The judgment of a School Board arrived at in good faith should be afforded a presumption of validity where subjective judgment based upon imprecise facts is involved. Any interpretation of the reasonable limits of a constitutional right, or remedy for such right must be consistent with this basic fundamental, practical reality.

Diversity and freedom are interdependent for only when diversity exists is there a choice. And only when a choice exists, can individual freedom become more than an abstraction. Diversity is in the national interest. Diversity is essential to our way of life — the American way. Equal treatment does not mean the termination of diversity. For equal treatment does not mean the same, identical treatment for the reason that needs are met in a diversity of remedies. Communities have their similarities and their dissimilar aspects. School Boards reflect their communities. They are responsive to their communities, their constituency, their source of power. A two-school Kent County is not Charlotte. A rural system is not an urban system. An arbitrary solution capable of mathematical evaluation may be judicially feasible but it ignores our national interest in diversity. Reasonableness, rationality, judgment — all must exist and be supported.

THE CHATTANOOGA STORY

A brief summary of the Chattanooga situation is necessary to illustrate how school systems vary and pose unique factual situations.

The seven members of the Board of Education of the City of Chattanooga, Chattanooga, Tennessee have been selected by the people of the City of Chattanooga to operate their public school system. On the 10th day of the school year 1969-70, there were 27,024 students enrolled in the Chattanooga Public Schools. Of this number 12,880 or 47.7% were Negro and 14,144 or 52.3% were white. There are 48 separate schools in different locations. There are 9 junior high schools, grades 7-9; there are 5 high schools, one of which is a part of a 1-12 grade school. There are 33 elementary schools covering grades 1-6. In ad-

dition, there is one school covering grades 1-4, and one school covering grades 1-9.

There are 1322 staff members assigned to these schools, and to the central office administrative staff. Of this number 532 are black and 774 are white. 252 black or white teachers are now assigned to teaching positions where they are a minority with reference to race on the staff of the school to which they are assigned. Each teaching staff is desegregated and only one school, a junior high school, has as little as one teacher of the minority group. Nine schools have 2 teachers of the minority race on the faculty. All of the assignments have been on a voluntary basis under a policy established by the Board 4 years ago. In essence, this policy was that in filling vacancies in schools with either formerly all black faculties or formerly all white faculties, preference would be given to the employment of teachers of the minority race assuming substantially equivalent educational qualifications.

With reference to desegregation in terms of numbers of pupils, 17 of the formerly all-white elementary schools are desegregated in the sense that there is at least one black child in each such elementary school. The number of Negro children in formerly all-white elementary schools ranges from one to 672. All of the formerly all-white junior high schools with one exception have black children enrolled. Five elementary schools remain all white. All three of the formerly all-white high schools are desegregated with one school having 64 black students, one 83 black students and one 170 black students.

With reference to the formerly all-black elementary schools, 4 now have white pupils, although 5 remain composed entirely of black students. Neither of the two formerly all-black high schools have any white pupils. Two formerly all-black junior high schools have white

students and one formerly all-black junior high school remains all black at the present time.

The elementary schools and the junior high schools are zoned and transfers are and have been restricted to unusual circumstances. Transfers infiuenced by race have not been allowed for a number of years. There are no zones with reference to the high schools and such has been historical, and primarily because of the fact that the curriculum in each one of the 5 high schools vary from a technical high school education with no college preparatory aspect to a high school predominantly designed to prepare students for admission to college level work.

In the combined judgment of the Chattanooga Board of Education, the Chattanooga System is operated as "a unitary school system." No person has been "effectively excluded from any school because of race or color" within the Chattanooga system in the last 4 years. The defendant School Board has specifically requested legal counsel for the plaintiffs in the litigation continuing in the Federal District Court in Chattanooga to provide the School Board with any instances where any decision with reference to exclusion has been made on the basis of race. The Chattanooga School Board does not make decisions based upon race alone with the sole exception where vacancies exist in either formerly all-white faculties or formerly all-black faculties. In this instance, race is recognized and must be recognized and is in some instances the deciding factor in the employment and assignment of teachers.

The Chattanooga Board of Education authorized the filing of this brief Amicus Curiae because in its unanimous opinion, if the principles reflected in the *Mecklenburg* case become the law of the land, such will have an impact upon the quality of the educational process in the Chattanooga School System of an extreme and detrimental

nature. The Chattanooga Board is well aware of the fact that the precise and exact nature of the impact of the *Mecklenburg* principles upon the Chattanooga system requires the exercise of judgment and is subjective; impossible of precise approximation in advance.

Nevertheless, the Chattanooga Board of Education composed of 7 individuals is the only body legally responsible for the on-going educational process in the school system of the City of Chattanooga. Therefore, they must make this decision recognizing while making the decision that its joint judgment is at best an approximation and an educated guess. The Chattanooga Board does not see any alternative. It must exercise its best judgment for otherwise it will be abdicating its responsibility to the citizens and children of the Chattanooga Public School System.

If, given the opportunity, the Chattanooga Board could detail the basis of this judgment in a careful manner in order to give a court an opportunity to determine whether or not the 7 members of the Chattanooga Board of Education have acted in such a manner as to equate a good faith discharge of their responsibility as the appointed representative of the people of the City of Chattanooga. The Board does not insist that its decision is necessarily correct nor that its prediction or its fears will come true; the Chattanooga Board of Education merely represents that it has done its best to discharge its responsibility — and that no Board could do any more.

The Chattanooga Board sees the present conflict as one between two or more basic constitutional principles or national values. The obvious national commitment to the existence of public education, and to the ongoing effort to continually improve its quality cannot be questioned. As was said by this court in *Brown* v. *Board of Education,* 347 U.S. 483 (1954) "Public education is perhaps

the most important single function of local government." The Chattanooga Board agrees with and is committed to this basic principle. Consequently, all factors that will support the ongoing improvement of public education should be identified and placed into operation if at all possible. On the other hand, all factors having a possible destructive effect upon the cause of public education should similarly be identified and should be avoided if at all possible. Anything less than the foregoing would amount to a shoddy performance by any of the selected Board of Education. This is the cause of public education.

There is an equivalent major principle — compliance with the Constitution of the United States. We are now directing our attention to what facts in a particular school situation will be held to be compliance with the Constitution of the United States.

It is apparent that there is a conflict among the learned judges of the Federal Bench both at the district court level and at the circuit court level with reference to the exact meaning or application of the language of the Supreme Court of the United States in this particular area in interpreting the Fourteenth Amendment as the same has a bearing upon public education in the United States. Based upon the assumption that others preparing briefs in this particular litigation will more than adequately cover the degree, nature, and extent of the variances among the various districts with reference to the specific application of the constitutional principles originally enunciated in *Brown* to the various factual situations presented, no repetition of this analysis will be reflected herein. Suffice it to say that the conflict in interpretation exists and is substantial.

The seven members of the Chattanooga Board of Education each have taken an oath to uphold the Constitution of the United States. This obligation can be met only as

the members of the Board comprehend the exact meaning of the Constitution within their own judgment and intelligence and as they are advised by legal counsel and particularly where courts cannot agree. Whether or not this oath is being honored and whether or not the community believes that this oath is being honored by the Board of Education has a direct bearing upon the kind and quality of support that the community gives to the Board of Education and, through it, to the quality of the educational program in Chattanooga.

The Chattanooga Board of Education, shortly after the second *Brown* decision on May 31, 1955, met to consider an appropriate policy statement with reference to the Board's response to the decision by the Supreme Court of the United States. Under date of July 22, 1955, the Board issued a public statement in which the first two paragraphs read as follows:

> "The Chattanooga Board of Education will comply with the decision of the United States Supreme Court on the matter of integration in the public schools.
>
> "We have come to this decision after careful deliberation, believing that respect for the law of the land is essentially vital to each and every individual and to the welfare and happiness of all."

Since that date, the Board of Education has been conscientiously and honestly attempting to comply with the Constitution of the United States as elaborated upon in *Brown* to the best of their ability and within the limits of their understanding, while at the same time continuing to meet and discharge the major obligation that they have assumed as Board members, with the maintenance of the highest quality of educational opportunity in the City of Chattanooga as is possible within the means afforded to

the Chattanooga Board, the Superintendent, his staff, and the teachers.

The Chattanooga Board made an early determination that the entire community would be involved in this decision. In its statement of July 22, 1955, the following is pertinent:

> "As we seek a solution we will make every effort to acquaint the entire community in conferences and through other media of communication of the various aspects involved. This is not your Board's decision alone. It is a community decision. Although the Board will officially make the decision, each individual in our community must accept his responsibility in solving this question.
>
> "Our decision will have its influence and impact upon ever phase of our community life. It is of the utmost importance that the great majority of the people accept our decision when finally made. This will be difficult for some — we fully realize this. The thoughtless action of a few could well present situations filled with danger. We know the community hopes and prays that such can be avoided. We know our people will make every effort to see that such is avoided. It has taken more than seventy-five years to bring our public school system to its present degree of service to the children and the community. It is of the utmost importance that the public school system continue to make progress. It is important that we proceed to a solution of this problem in such a manner that the strength of the public school system is not weakened. In this endeavor we must always be mindful of each and every family, and ever protect the rights of those citizens.
>
> "We earnestly request and hope that the community will proceed in its thinking and its actions in a spirit guided by a sense of justice, respect for the law, awareness of the difficulties involved and guided by recogni-

tion of the necessity of reaching a fair and just solution. With God's help, this can be accomplished."

The Board undertook to involve the community in the process of compliance utilizing an Interrracial Advisory Committee to assist in the elucidation phase of the Board's effort to comply. A systematic in depth approach to the community was undertaken.

Litigation was instigated against the Chattanooga Board of Education by a complaint filed on April 6, 1960. During the course of this litigation at the risk of over-simplification, but in the interest of brevity, the Chattanooga Board represents that it has consistently attempted to maintain a posture of compliance with the decisions in *Brown I and II* as it understood those decisions, and as the principles enunciated in these decisions seemed to be applicable to the particular factual situation existent in the school system of Chattanooga. During the course of litigation, contrary positions were taken by the plaintiffs and plaintiff's counsel. In accordance with established legal procedures, a clarification of the two contending viewpoints were evolved through the District Court and to the Circuit Court of Appeals for the Sixth Circuit. In every instance, the Chattanooga Board of Education has reacted to an interpretation by either the District judge or the judges of the Circuit Court of Appeals for the Sixth Circuit and performed in accordance with directives reflected in such decisions. In no instance and at no time has the Chattanooga Board of Education approached a posture of defiance with reference to the Federal Judiciary or the Constitution of the United States as interpreted by the Supreme Court of the United States.

As of the moment that this brief is being prepared, the Board of Education and its legal counsel are of the opinion that the Chattanooga Board of Education is in compliance

with the Constitution of the United States and the Fourteenth Amendment, in particular, and as the *Brown* decisions and other cases have been interpreted by the judges of the United States Court of Appeals for the Sixth Circuit.

ARGUMENT

The basic issues before the court upon this writ arising out of *Mecklenburg* are the questions of racial balance with reference to students in schools and classrooms and racial balance in the makeup of faculties in individual schools.

No matter what is said or how this issue may be avoided and postponed for whatever reasons, this is the issue. The bussing aspect of the decision is only a means to an end and illustrates the extreme nature of the affirmative responsibility argued for by the plaintiffs as a constitutional requirement in order to comply with the Fourteenth Amendment.

There is no ambiguity with reference to what the Court of Appeals for the Sixth Circuit believes to be a correct, constitutional interpretation on these points. We refer to *Deal* v. *Cincinnati Board of Education,* 419 F.2d 1387 (1969) at page 1388.

> "* * * the Board of Education was not required by the Constitution to bus Negro or white children out of the neighborhoods, or to transfer classes, for the sole purpose of alleviating racial imbalance which was not caused by any act of discrimination on the part of the Board, but resulted from the racial concentrations in the neighborhoods in which the schools were located, and further, that the Board had no like duty to select new school sites solely in furtherance of such a purpose."

And again with reference to bussing at page 1390:

"It is the contention of the appellants that the Board owed them a duty to bus white and Negro children away from the districts of their residences in order that the racial complexion would be balanced in each of the many public schools in Cincinnati. It is submitted that the Constitution imposes no such duty. Appellants are not the only children who have constitutional rights. There are Negro, as well as white, children who may not want to be bussed away from the school districts of their residences, and they have just as much right to attend school in the area where they live. They ought not to be forced against their will to travel out of their neighborhoods in order to mix the races."

With reference to racial balance on teaching staffs, see page 1393 where the Court had the following to say:

"Appellants further complain of discrimination in hiring and assigning of school personnel. As of 1964-65, Negroes comprised 626.5 or 21.20% of the teaching staff. We find no evidence of discrimination. There was no constitutional duty on the part of the Board to balance the races in teachers' employment and assignments. Teachers should be selected primarily on the basis of merit."

See also *Goss* v. *Board of Education, City of Knoxville, Tennessee,* 406 F.2d 1183 (6th Cir. 1969).

This brief reference to the evidence of the Sixth Circuit's interpretation of *Brown* should be sufficient to sustain the representation that the Chattanooga Board of Education at the present time is in compliance with the Constitution of the United States and as such has discharged its oath to support the Constitution of the United States. If the Chattanooga Board of Education had been situate within the Fourth Circuit or the Fifth Circuit, a contrary conclusion would probably have been required although the fac-

tual distinctions should not be lightly cast aside and disregarded.

What are the alternatives available to this Court? One extreme is the philosophy set forth in *Mecklenburg* by District Judge McMillan. The Court could support the reasoning of the Sixth Circuit and that of decisions in the Seventh and Eighth Circuits. In the area in between, the Court could limit this decision to as narrow a ground as possible postponing further amplification of the constitutional principles to a later date and under differing and perhaps better developed factual situations.

In *Brown* v. *Board of Education of Topeka,* 347 U.S. at 493 the Court had this to say:

> "Today education is perhaps the most important function of state and local governments."

The Chattanooga Board of Education believes this statement to be true. The actual allocation of local financial resources to the cause of public education supports the commitment given by the community to the cause of public education.

Once we accept the validity of this basic commitment as a reflection of our national value system, it follows that all factors that support the continuing improvement in the quality of the educational process should be identified and implemented. It also follows that any factors that may have a detrimental effect upon the quality of public education should also be identified and avoided or excluded if at all possible.

And compliance with the Constitution of the United States at all levels of our national life is also of substantial and primary importance. *Brown I and II* are now a part of the Constitution of the United States, but the exact nature of the principles enunciated in these two cases have

not finally been determined and are the subject of the presentations to the Court. To exclude any child from any part of the public educational process solely because of the color of that child's skin violates the Constitution of the United States.

The factual situation in *Brown* was magnificent in its simplicity.

The reason for the exclusion was evident and could not be contradicted. Once the court found that segregated schools were unequal, (in an obvious reference to quality) then the logical decision in *Brown I and II* followed in a simple, forthright manner.

The above represents a decision by the state, followed by the action by the state, followed by detriment as a result of this action. And the final fact is that the decision had only one basis and that was that a black child was involved.

It is a long way from the factual situation in *Brown I and II* (and the philosophy involved) to the arbitrary actions required under Judge McMillan's decision in *Mecklenburg* where race continues to be the deciding factor with reference to the assigning of new pupils and teachers and the bussing of pupils. Race was used to penalize and to deny in *Brown I and II*. If race is used as a basis for preference or apparent preference or preferred treatment, is such any less demeaning than the exclusion from an activity because of race? Does the fact that race brings forth a preferred reaction make the importance of race any less demeaning?

At one time the Constitution of the United States was said to be color blind. If the decision in *Mecklenburg* becomes a correct interpretation of the Constitution of the United States, then obviously the Constitution is no longer color blind for color becomes the key decision with reference to the school that you may attend or may not attend no matter what neighborhood your parents selected in which to live.

If this court interprets the Constitution of the United States to mean in effect that it is color blind, then race cannot be recognized as a factor for the purpose of the creation of a category and thus the black-white ratios with reference to students and faculty as evidenced by the *Mecklenburg* decision are no longer constitutionally possible.

An in-between or temporary posture could be approved, such as that the color blind facet of the Constitution must be temporarily neutralized until the continuing result of dual school systems has been eliminated root and branch. If the Court decides that the color blind concept is still valid, but should be relaxed in order to alleviate the continuing evidences of an old wrong, then difficult areas of proof are created and they will demand resolution. In a sense, an additional Pandora's Box will be uncovered should the temporary exception to a constitutional principle be ratified and approved. What does the description of "vestigial remains of a dual school system" include? What do the vestiges of a dual system look like for this determination must be made before one can determine whether or not these vestiges have been removed. In many instances the fact of removal of a vestigial remain will be the determining factor when the Constitution can return to its color-blind attitude. The elimination of the vestigial remains of a dual school system will terminate the temporary period in which an unconstitutional principle is allowed to function.

Within a particular school system, the Board will have to determine at what day or under what circumstances the required vestigial remains have been removed from its system. Undoubtedly this judgment or factual decision will be disputed by one or more groups in the community. Should this dispute be substantial, then investigation and a final determination will be required. This will continue conflict and uncertainty.

Again, a part of the Pandora's outpourings will be the recognition that certain constitutional principles are capable of temporary suspension under limited circumstances. What encouragement will this give to future efforts to undermine constitutional principles when the cause and facts are particularly appealing and a time in our national life when a particular situation appears to have persuasive justification.

Should the Court come to the conclusion that there is no constitutional requirement that governmental agencies be color blind, such would remove one objection to the necessity for creating certain racial balance in schools and classrooms with reference to students and in faculties with reference to teachers.

On the other hand, racial proportions in classrooms will require school boards to make decisions as to what individual students are to be removed from their normal neighborhood schools and placed in a school in a different area. This will call for certain students to be exposed to the additional burden of travel time both to and from a school while some of their neighbors will not have to spend time in such fashion since they will attend the neighborhood school. This is a form of unequal treatment.

In addition, such will require capital expenditures of a substantial amount by school systems with regard to buses. It will increase the annual operational costs of the school system. Given an adequate opportunity, it could be proven that the assignment of students outside of their neighborhood creates a resentment among the parents and the students. It could also be proven that this resentment reflects itself in a negative way with reference to the total support of public education in the community. It could also be proven that the time required in waiting for bus transportation and in being transported was time that could be used for more productive educational processes.

It could also be proven to the satisfaction of a court that most school systems have serious financial deficiencies and have seldom even approached having adequate facilities to implement current knowledge with reference to approved educational procedures and techniques. The amount of money that is required for the acquisition of buses, plus the amount of money that is required for the operation of the buses would often have to be diverted from other aspects of the school systems that have been believed to be of substantial importance. For example, an educable mentally retarded program which is more expensive than the ordinary classroom activity could well have to be curtailed or discontinued in order to achieve the necessary bussing to balance classrooms and schools. Certainly those parents whose children were in the category of educable mentally retarded would be convinced that the quality of the educational process for their children had approached zero – because of the necessity of achieving racial desegregation.

Although opportunity has not yet been provided for the orderly presentation of proof upon this particular matter, the Court should be aware of the fact that should racial balance in the classrooms, schools, and bussing along with racial balance in faculties be required in school systems throughout the country, there will be a resentment against public education of an intensity and breadth that no person would welcome. The Chattanooga Board of Education is fearful of the impact upon its school system should the *Mecklenburg* decision become the approved interpretation of the Fourteenth Amendment of the Constitution of the United States. Believing this to be a reasonable consequence of the interpretation of the Constitution, this Board was under an obligation to make the results of its

joint judgment known to its constituency and to others that would listen.

The enunciation of the constitutional principle is the responsibility of the Supreme Court. The front line of implementation of these principles is the responsibility of the local school board. What degree of detriment to a public school system is acceptable in order to achieve a mathematical racial balance? Administratively, the use of racial balance and statistics make for a simple method of determining whether or not a particular school system is or is not in compliance with a constitutional principle. But is this administrative feasibility of sufficient importance to justify the exposure of the school system to substantial deterioration? And what body makes the assessment with reference to the degree of exposure? How does one determine in advance with any degree of accuracy the manner in which a community will express its resistence and the nature of the detrimental impact upon the school system as a result of this manner or method of expressing resentment? It would not seem to be wise to ignore this possibility. On the other hand, the possibility of a substantial negative reaction should not mean that the Constitution of the United States cannot be made applicable to a given situation, but the area in between these two postulates can be difficult, but important, particularly to the children whose daily educational opportunity is at stake.

It is true that the Supreme Court has said in *Brown II* ". . . the vitality of these constitutional principles cannot be allowed to yield simply because of disagreement with them." This same idea was expanded in *Cooper* v. *Aaron*, 358 U.S. 1 (1958). In this case the School Board relied upon the existence of "extreme public hostility, which . . . had been engendered largely by the official attitudes and actions of the Governor and the Legislature . . . ."

The Court went on to say on page 6, "The record before us clearly establishes that the growth of the Board's difficulties to a magnitude beyond its unaided power to control is the product of State action." Later on, the Court used this language:

> "In short, the Constitutional rights of children not to be discriminated against in school admissions on grounds of race or color declared by this Court in the *Brown* case can neither be nullified openly and directly by State Legislators or State Executive or Judicial Officers, nor nullified indirectly by them through evasive schemes for segregation whether attempted 'ingeniously or ingenuously.' "

It has been recognized over a long period of time that there are limits to the effectiveness of judicial power. If the Court defines the constitutional duty under *Brown I and II* to require the racial balancing reflected in *Mecklenburg,* good judgment would indicate that consideration should be given to the various possible reactions that the Mecklenburg-Charlotte community might have to this ruling. To illustrate, assume that under state law in North Carolina a bond issue would be necessary in order to provide the three million dollars plus that were required to purchase the number of buses necessary to implement the District Judge's opinion. Assume that a referendum was also required. Next, assume that the referendum is defeated and thus the School Board does not have available to it the funds necessary to purchase the required buses. Under these circumstances, what does the Charlotte-Mecklenburg Board do? What action does it take? It cannot carry out the judicial mandate without the required buses. It cannot purchase the buses without money, and the source of the money, the electorate or the people, will not agree to tax themselves to provide such funds and

the court mandate cannot be carried out without the availability of the buses. What happens next? Can the District Court order the people of Charlotte-Mecklenburg to pass a bond issue in order to carry out a mandate of the Federal District Court? How would the court carry out such an order?

We submit that the power of the Court, as the power of government, has its original source in the people. The consent of the governed remains an essential in our present day environment. This consent of the governed is not given at one time and for all time, but is given each passing day. In this particular instance the people of Charlotte-Mecklenburg would be withdrawing their consent in a limited way and as to a particular and peculiar aspect of government. When this happens, it would appear that the limits of judicial power have been reached. When and if the judiciary exceeds its judicial power and in a dramatic fashion, then the entire judicial framework has been weakened and undercut.

It is submitted that if the above is a real possibility, certainly this Court will move in such a direction and expose the judiciary to this factual criticism only in a most unusual circumstance.

If substantial bussing is required, what will be the means available to a court to enforce the District Court order when the parents of the children concerned refuse to place these children in a position where they can ride the bus? Will a Federal marshal be designated to physically take small children into custody and physically and through force deliver them to a school out of their neighborhood?

What will happen if the children decide they will not remain in school? Will there be a policeman or a Federal marshal in each classroom? It is submitted that the decision in *Mecklenburg* could well result in a pushing of the limits of judicial power to the breaking point. And

if this breaking point is actually reached, the entire society will suffer from the consequences.

But it will be said that this is not possible and thus it does not have to be considered. But what if it is possible? What if it happens? What kinds of remedies do we have to erase the dire consequences that may follow on this lack of judicial restraint? As was said by Justice Frankfurter in *Cooper* v. *Aaron,* page 21, "The use of force to further obedience to law is in any event the last resort and one not congenial to the spirit of our Nation."

In *Aaron,* Justice Frankfurter also had this to say. "Violent resistance to law cannot be made a legal reason for its suspension without loosening the fabric of our society." But what if this resistance is not violent? And what if this resistance is reflected in an absolutely legal manner? To illustrate, there have been three bond issue referendums since the desegregation suit was initiated in Chattanooga in 1960. These were county-wide referenda. On November 3, 1964, with a $17,000,000 bond issue, the vote was overwhelmingly against with 40,261 voting against the bond issue and only 6,599 voting in favor of same. School construction was the sole basis for the bond issue. School construction and an addition and renovation was an issue in May 18, 1967, and the amount was $10,000,000. This was rejected by a vote of 10,217 to 8,913. In 1969 a $9,000,000 bond issue was rejected, 18,054 against and 12,591 for. The purpose of this was renovation and expansion of the existing school buildings and some new construction. In the typical, democratic fashion, the people of Hamilton County have spoken and said no.

With this background as to the will of the people expressed on school bond construction, coupled with many other facts available to the seven members of the Chattanooga Board of Education, what reaction could be expected

from the community if a two million dollar bond issue were necessary immediately in order to provide the buses necessary to comply with the District Court decree in Chattanooga similar to that in *Mecklenburg*. True, this is guesswork, but it is typical of the kinds of judgments that local Board members must make and do make and on many issues. Their proximity, their being a part of the local environment, their responsiveness to the constituencies that they serve — all of these factors go to supporting judgments made by school boards when made in good faith and in an honest effort to discharge the responsibility which the School Board has accepted.

DESEGREGATION - INTEGRATION

There has been a continuing failure to recognize the distinction between desegregation and integration in referring to public school education. (See article by Dr. Kenneth B. Clark, Teachers College Record, October 1960.) The desire to have physically demonstrable evidence of the fact that a change has been made in a school has led to an emphasis upon the number of black students physically present within any educational setting. This is a part of the concept of the "numbers game" which is referred to frequently in writings relating to school desegregation. The number of black children physically present has come to be equated with the attainment of the ultimate objective. Judges and others have been searching for rules of conduct, a formula, or other yardsticks that could be applied in any given situation to determine whether or not a school district had met the minimum standards of the Fourteenth Amendment as interpretated by *Brown I and II*. The Courts have been placed under intense pressure with regard to desegregation, and in certain cir-

cuits as a result have had an intense motivation to evolve and fabricate orders and procedures that can be easily understood, that are administratively feasible, and that can be evaluated by non-academic personnel. This has caused the remedy to be reflected in the "numbers game," in statistical information, with no regard for the educational environment or the classroom atmosphere essential to educational opportunity.

OBSESSION WITH NUMBERS

This obsession with numbers has brought about the racial balance concept which in turn has produced the necessity for affirmative action upon the parts of states such as is represented in bussing as a means of achieving some predetermined acceptable level of desegregation, or the numbers game again. This has introduced the concept of force upon the part of the state in order to create and maintain numerical balance in the classroom as continuing evidence of a school system operated in conformity with the Constitution of the United States.

A CONFUSED OBJECTIVE

In other words, desegregation has become the end-all in the sense that there must be so many individual students of the white race and so many students of the black race physically present in a classroom or in a school in order for that school or that school system to be in compliance with the Constitution. The end result of the obsession with numbers could well achieve desegregation, and in so doing, make forever impossible the integration that is essential if the Fourteenth Amendment is to be effective. If a classroom can attain, and maintain, a desegregated

condition only so long as the affirmative force of the State has entered into the picture and is constantly available, does not this continuing presence of force as an essential for desegregation prove that the classroom concerned is not integrated? What impact will there be upon black pupils if they are aware of the fact that the only reason why they are sitting along side white students is because of the presence of a governmental force in some form requiring them to remain where they are? If desegregation is only possible under these circumstances have we not allowed an obsession with the numbers game to steer us away from the basic constitutional right that got us here in the first place?

What the average Negro wants, as does every person, is to be accepted by his fellow human beings for what he is, and what he can be, without regard to the color of his skin, or any other condition outside of the responsibility of the person concerned.

If the State, acting through its school system is to treat black children fairly, it would appear to be the responsibility of the State (acting through its school board) to introduce a black student into a formerly all white classroom under such circumstances and conditions as to maximize the possibility that this child will be fully accepted by his peers in the classrooms. If this placing together in the classroom of whites and blacks is done through an excessive display of force, will there not be a tendency to create emotional and intellectual attitudes upon the part of the white students in the classroom of such a nature as to make it extraordinarily difficult for the black child to be accepted by his white peers? Acceptance as an individual is the goal of an integrated classroom. This acceptance flows from the other individuals in that classroom. It is beyond the power of the State. Consequently, it would seem good

judgment to identify in advance any factors that might reasonably contribute to the creation of a hostile attitude upon the part of the students in the classroom, and then to take whatever steps appear to be available to avoid the existence or intensification of such hostile attitudes. Unless we keep our eyes upon the real objectives of equal treatment under the Fourteenth Amendment, it may well be that ill-chosen means of achieving an apparent goal may result in a polarization of intensity in our national life which would be the antithesis of the integration and equal acceptance envisioned by the Constitution.

THE RIGHT AND THE REMEDY

The Court has declared the existence of the Constitutional right to admission to public schools without regard to race in order to meet the concept of equal treatment under the law implicit in the Fourteenth Amendment. The declaration of the right and the effectuation of the remedy are not the same. The Court is now concerned with the practicalities involved in making the right a reality. It is desirable to have education *and* compliance with the Constitution. But the Constitution may be interpreted so as to bring about the virtual destruction of public education. The Court could reach a conclusion reflecting a decision that desegregation is more important than education. The Chattanooga Board remains convinced that education is primary. Desegregation cannot be allowed to assume a value greater than public education. Such a radical change in our national value system should not take place through an errosive process stimulated and made possible by confused thinking.

If the Charlotte Board had done absolutely nothing, then the District Court would have been compelled to direct

affirmative steps to be taken. But such is not the case. The District Court has found in essence, that the Charlotte Board has not done enough. Its plan is inadequate, so the District Court says. Unless the Court can find that a local school board is acting in bad faith and is unreasonable, then the collective judgment of a local board should be presumed to be correct and the burden placed upon complainants to prove the Board's judgment to be incorrect.

COMMUNITIES DIFFER

Every school system is different. Each community is unique as is each individual. A rigid, inflexible, detailed plan for all school systems is impractical for it ignores the diversity existent within our land, a diversity that is a basic source of our national strength. Local school boards are responsible to this diversity and reflect this diversity in representing local voters as a school system is designed and administered, and re-designed from time to time. With reference to race and *Brown I and II,* if a school board has been recalcitrant, certain remedies such as racial balance may be demanded, but not as a constitutional principle.

The Court exercises judicial power under the Constitution having secured this power from the voters. School Board's exercise educational power conveyed to them from the same source. Certainly in areas filled with judgment factors, the local board's joint judgment should be given great weight so long as a Board has demonstrated good faith coupled with actions supporting such good faith.

CONCLUSION

The Court is urged to –

redirect the attention of the Nation to the real objectives of equal treatment in public education under *Brown I and II*, and in so doing to discourage the rigid use of numbers as proof of the implementation of the Constitutional rights recognized by *Brown I and II*.

recognize the diversity in communities and provide support to School Board's acting in good faith, such as Charlotte-Mecklenburg, where progress is clearly evident.

give joint judgment at the local level a chance to use reason and sound judgment within flexible principles in response to their constituency but always subject to judicial scrutiny and approval.

Respectfully submitted,

AMICUS CURIAE BRIEF OF GOVERNOR CLAUDE R. KIRK, JR.

INTRODUCTION

I.

CONSENT FOR FILING

In accordance with Rule 42 of the Supreme Court Rules, written consent to the filing of this Brief has been granted by the Petitioners and Respondents in this cause. (Appendix hereto Exhibit B 35—6)

II.

PRELIMINARY STATEMENT

Claude R. Kirk, Jr., as Governor of the State of Florida, files this Brief as Amicus Curiae for the purpose of presenting to this Court, legal considerations which may be of assistance in the ultimate disposition of the issues. Amicus respectfully submits that he is not conversant with all the factual considerations; and, consequently, will endeavor to rely upon the factual representations contained in the Briefs filed by the parties in the presentation of any legal considerations to this Court.

The Governor appeared as Amicus Curiae in the proceedings before the Fourth Circuit Court of Appeals. The Governor also has appeared both as a party and as Amicus in numerous judicial proceedings before the district courts of the State of Florida, Fifth Circuit Court of Appeals, and this Honorable Court. In an original suit instituted in this Court in January, the Governor sought to have this Court declare and define the meaning of a "unitary system," thereby fixing an ascertainable standard of conduct to be followed by the school boards in all states. The suit further sought to have this Court declare that no state of the United States, in establishing a unitary system, be compelled to transport pupils for the purpose of achieving a racial balance. Unfortunately, the Court dismissed the suit for lack of jurisdiction.

The legal issues involved in this cause are also strikingly similar to those previously considered by the Fifth Circuit Court of Appeals and the District Courts in Florida. Recent decisions by the Fifth Circuit and the District Court clearly demonstrate the necessity for this Court to resolve clearly and unmistakably, once and for all, questions of busing and balance.

III.

ISSUES INVOLVED

1. Does the Constitution require or permit the courts to order the busing of pupils for the purpose of achieving a racial balance?

2. Does the Constitution require or permit the courts to direct school boards to adopt plans designed to bring about mathematical racial balances within school systems?

IV.

DISCUSSION OF ISSUES

The Constitution neither requires nor permits the courts to direct the establishment of a mathematical racial balance whether by busing or otherwise.

It was the position of Amicus before the Fourth Circuit Court of Appeals, and it remains the position of Amicus before this Court, that the concept of forced busing, that is to say involuntary transportation of pupils from one school to another for the purpose of achieving racial balance, and the concept of establishing a racial balance, whether by busing or otherwise, is neither required nor permitted under the Constitution of the United States and is inconsistent with the Civil Rights Act of 1964, the statements made by the President of the United States on Elementary and Secondary School Desegregation and applicable judicial declarations.

Amicus respectfully submits that we are where we are today largely as a result of the failure of the Courts to provide the necessary guidance. This was so aptly pointed out by Judge

Coleman in his dissent in *Singleton v. Jackson Municipal Separate School District, et al.*, U.S.C.A., 5 Cir., Case No. 26,285 (January 21, 1970), when he observed:

"What I dissent from is the continuing failure of this Court to provide a lighthouse in the new storm which is upon us. The school authorities and the District Judges need something to steer by.

In United States v. Jefferson County Board of Education, 372 F.2d 836, 380 F.2d 385 (1966 and 1967), when freedom of choice was an acceptable method of seeking desegregation, this Court formulated a detailed decree for use by the District Courts and forbade any variation therefrom. Now that freedom of choice is held to have generally failed we lapse into silence and wash our hands in the water of taciturnity. I strongly protest this approach. In *Jefferson* I, 372, F.2d 836, 849 (1966), the majority announced, 'We grasp the nettle.' I think the District Courts need help. They are being forced to act without our answer to many unanswered questions. I shall discuss some of them and state my view of what answers ought to be.

On September 30, 1969, at an en banc session in New Orleans, this Court ordered the cases now before us to be considered en banc. We were acutely aware of the critical nature of the problem—critical for the eradication of unconstitutional discrimination and critical for the future of public education, the great hope of nearly all children, black and white. It was my understanding then that upon the en banc hearing in Houston on November 17, 1969, we would attempt to supply some judicial compasses for

use in a forest which had not been anticipated in 1966. Regrettably, we did not really do so.

Certainly as the Supreme Court said in *Brown* II, and as we have often repeated, local school authorities have the primary responsibility for elucidating, assessing, and solving these problems, 349 U.S. 299. *It does no good now to say that these school districts have had fifteen years in which to do something and have not done it. As a matter of fact, most of the school districts now before us, if not all of them, have been under the supervision of the federal courts for as much as five years. I think it is quite clear what this proves.*

Regardless of who is, or has been at fault, the Supreme Court has told us in no uncertain terms that it will brook no further delays. Do we, then, stand by and see innumerable schools go crashing on the rocks and educational processes seriously impaired or shall we bestir ourselves and advance judicial solutions which will dismantle the dual school system without dismantling the schools as well? Samson slew his enemies, all right, but he likewise destroyed the hall and liquidated himself—all because of bad judgment, previously exercised." (emphasis ours)

Judge Clark joined with Judge Coleman in a separate dissent in *Singleton*, supra, and also expressed a deep concern about the failure of the higher courts to provide the necessary specifics to assist the lower courts in determining constitutionally acceptable plans. Judge Clark keenly observed:

"Nobody knows what constitutes 'a unitary school system within which no person is to be effectively excluded from any school because of race or color.' This is not to

say that this court hasn't drawn some negative limits around the phrase 'unitary school.' We have frequently decreed that systems coming before us were not unitary for one reason or another. However, what is here urged is our duty to speak *affirmatively*, to tell the litigants, in advance of attacks made on them, precisely what such a 'unitary system' is. We have said such a system must be racially integrated and that its faculty must approximate the racial balance of the whole system. These are the only affirmatives known."

It was not until the decision by the Fifth Circuit Court of Appeals in *Ellis v. Orange County Board of Public Instruction*, U.S.C.A., 5 Cir., M.D. Fla. (February 17, 1970) No. 29,124, (see also *Singleton, et al. v. Jackson Municipal Separate School District, et al.*, U.S.C.A. 5 Cir., Case No. 29,226, May 5, 1970) that we had some indication of an acceptable educationally sound approach to the establishment of a unitary school system—namely the neighborhood school concept without the necessity of forced bussing. In *Ellis*, the Fifth Circuit Court observed in part:

"As stated, based on the supplemental findings of fact, it appears that a true neighborhood assignment system, assigning students to the school nearest the student's home up to the capacity of the given school, will result in the desegregation of eight of the remaining eleven all-Negro student body schools in the Orange County, system, leaving three elementary schools."

* * * * * *

"There are a number of all-white student body schools in the Orange County system. This is due to the preponderant white student population (82 percent) and to

residential patterns. The three all-Negro student body schools which will remain, if the neighborhood assignment system is properly invoked, are also the result of residential patterns. The majority to minority transfer provision under the leadership of the bi-racial committee is a tool to alleviate these conditions now. Site location, also under the guidance of the bi-racial committee, will guarantee elimination in the future. In addition, open housing, Title VIII, Civil Rights Act of 1968, 42 USCA, SS 3601, Et Seq., Jones v. Mayer, 1968, 392 U.S. 409, 88 S.Ct. 2186, 20 L.Ed.2d 1189, will serve to prevent neighborhood entrapment."

Ample precedent for the neighborhood school system is reflected in *Deal v. Cincinnati Board of Public Instruction*, U.S.C.A., 6 Cir., 1969, 419 F.2d. 1387, *1391–2* (*Deal* II):

"'The neighborhood system is in wide use throughout the nation and has been for many years the basis of school administration. This is so because it is acknowledged to have several valuable aspects which are an aid to education, such as minimization of safety hazards to children in reaching school, economy of cost in reducing transportation needs, ease of pupil placement and administration through use of neutral, easily determined standards, and better home-school communications.'"

* * * * * *

"In *Northcross v. Board of Education of the City of Memphis, Tennessee.*, 302 F.2d. 818 (6th Cir. 1962), cert. denied, 370 U.S. 944, we outlined the minimal requirements for non-racial schools:

'Minimal requirements for non-racial schools are geographic zoning, according to the capacity and

> facilities of the buildings and admission to a school according to residence as a matter of right.' Id. at 823."

The plan which was approved by the District Court in this case, as we understand it, involves extensive busing for the purpose of achieving racial balance and, apparently, rejects the reasonable efforts made by the Charlotte-Mecklenburg Board of Education to implement an assignment plan based on the neighborhood school concept and not on racial quotas. Although there is some indication that the order of the District Court was not promulgated to achieve a "racial balance," the fact that the court directed the balancing of certain schools demonstrates that the achieving of a racial balance was a controlling factor in the court's determination. Although this may not have been the lower court's intention, the fact remains from our understanding of the approved plan, that there is extensive involuntary busing for the purpose of achieving a racial balance. The clear wording and the intent of the Civil Rights Act of 1964 completely negates any intention to approved forced busing.

Section 401(b) of the Civil Rights Act of 1964 provides as follows:

> " 'Desegregation' means the assignment of students to public schools and within such schools without regard to their race, color, religion, or national origin, but 'desegregation' *shall not mean the assignment of students to public schools in order to overcome racial imbalance.*" (emphasis ours)

Section 407(a) of the Civil Rights Act of 1964 provides in part as follows:

". . . provided that nothing herein shall empower any official or court of the United States to issue any order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another or one school district to another in order to achieve such racial balance, or otherwise enlarge the existing power of the court to insure compliance with constitutional standards. . ." (42 U.S.C. Sec. 2000c-6 (a))

In *U. S. v. Jefferson County Board of Education*, U.S.C.A., 5. Cir. (1966), 372 F.2d. 836 (*Jefferson* I) affirmed and adopted en banc 380 F.2d. 385, (*Jefferson* II) cert. denied sub. nom. *Caddo Parish School Board v. United States* (1967) 389 US 840, 88 S.Ct. 67, 19 L.Ed. 103, this Court, in *Jefferson* I observed at page 856:

". . . When Congress declares national policy, the duty the two other coordinate branches owe to the Nation requires that, within the law, the judiciary and the executive respect and carry out that policy. . ."

In the enactment of Section 407 (a), supra, Congress declared a national policy with regard to the busing of pupils solely to achieve a racial balance. Unless Section 407 (a), supra, is declared to be unconstitutional and void, having no force and effect, it is respectfully suggested that the provisions of this Act are applicable and controlling.

In *Deal v. Cincinnati Board of Education*, U.S.C.A., 6 Cir. (1966) 369 F.2d. 55, (*Deal* I) cert. denied 389 US 847, 88 S.Ct. 39, 19 L.Ed.2d. 114, the United States Court of Appeals for the Sixth Circuit held:

"We hold that there is no constitutional duty on the part of the Board *to bus* Negro or white children out of their

neighborhoods or to transfer classes *for the sole purpose of alleviating racial imbalance* that it did not cause, nor is there a like duty to select new school sites solely in furtherance of such a purpose." (emphasis ours)

See also *Deal v. Cincinnati Board of Education*, supra, (Deal II); *Bivins v. Bibb County Board of Public Education*, U.S.D.C., M.D. Ga. (January 21, 1970) No. 1926; and *Thomie v. Houston County Board of Education*, U.S.D.C., M.D. Ga. (January 21, 1970) No. 2077.

In *Taylor v. Board of Education of City School District of New Rochelle*, U.S.C.A., 2 Cir. (1961) 294 F.2d. 36, Judge Moore, in his dissent observed at page 41:

"The best account of the problems presented to the Board during the last ten years (1950–1960) is found in the testimony of Kenneth B. Low who from 1950 to 1960 served on the Board and was its President from 1958 to 1960. He had had a distinguished career in the field of interracial relations and for seven years had served as Chairman of the Westchester County Council appointed by the State Commission Against Discrimination . . . '*Solutions*, he said, *which sent 'youngsters out of the district because of their race,' as discussed before the Board brought about discrimination in reverse because you are creating special conditions for people on account of their race and that it could and perhaps should apply equally to other schools which had either a racial imbalance or a religious imbalance of national backgrounds, and the result is that it would establish a precedent for sending children, because of any of these factors, to schools, which was believed to be a violation of basic principle.*' (One school was over 90% Jewish

and one over 90% Italian.) 'But (said Mr. Low) I am not going to violate what I consider to be basic constitutional principles, and the mere fact that this (Lincoln) happens to be a badly imbalanced racial school is not due to any act of the Board of Education. It is a residential condition.'" (emphasis ours)

If the courts are required to correct racial imbalances, then they would also be equally required to correct religious imbalances or imbalances of national backgrounds. It is respectfully suggested that the courts cannot constitutionally make a selective distinction between religious or racial imbalance and that it would be inviting the opening of a Pandora's box if correction of any type of mathematical imbalance becomes a constitutional imperative.

The comments made by Judge Coleman in *Carter v. West Feliciana Parish School Board, et al.*, U.S.D.C., S.D. Ala., Case No. 28,340, and *Singleton v. Jackson Municipal Separate School District*, supra, are indeed pertinent:

> "The High Court has never arbitrarily commanded that there must be racial balance in the student body of any school purely for the sake of racial balance. It has never commanded that little children be required to walk unreasonable distances, *or to be bussed to strange communities just to obtain racial balance*. It has ordered us to quit operating two systems within a system, one all black, and one all white, judges by five criteria, *not one*. Neither has it left the door open to tokenism." (emphasis ours)

Judge Cox, in his dissenting opinion, in *Henry v. Clarksdale Municipal Separate School District*, U.S.C.A., 5 Cir. (1969) 409 F.2d. 682 at page 692, refers to the holding in *Gilliam v.*

School Board of City of Hopewell, Va., U.S.C.A., 4 Cir., 345 F.2d. 325, as follows:

> "'. . . The constitution does not require the abandonment of neighborhood schools and the transportation of pupils from one area to another solely for the purpose of mixing the races in the schools. . .'"

In *Jefferson* I, supra, at page 847, footnote 5, the Fifth Circuit, while indicating that in its opinion, racial balance was to be given a high priority, it is not constitutionally required:

> ". . . The law does not require a maximum of racial mixing or striking a racial balance accurately reflecting the racial composition of the community or the school population. It does not require that each and every child shall attend a racially balanced school. . ."

In *Harvest, et al. v. Board of Public Instruction of Manatee County, et al.*, slip Opinion No. 29425, 5 Cir., June 26, 1970, Judge Clark in an opinion concurring with the majority commenting on the Fourth Circuit's decision in the instance cause observed in part:

> ". . . The court there emphasized what the district court here has consistently recognized—that racial balancing is not the sine qua non of a unitary system—that educational reasonableness and realities must prevail over any artificial racial ratios. . ."

In a dissenting opinion written by Judge Bell (Judge Bell wrote the majority opinion in *Ellis v. Board of Public Instruction of Orange County*, Supra) in *Jefferson* II, supra, it is observed in part at page 417:

". . . The Supreme Court has not said that every school must have children from each race in its student body, or that every school room must contain children from each race, or that there must be a racial balance or a near racial balance, or that there be assignments of children based on race to accomplish a result of substantial integration. The Constitution does not require such. We would do well to 'stick to our last' so as to carry out the Supreme Court's present direction. It is no time for new notions of what a free society embraces. Integration is not an end in itself; a fair chance to attain personal dignity *through equal educational opportunity is the goal.* . ." (emphasis ours)

In *Deal* I, supra, Chief Judge Weick similarly observed at page 59:

". . . If factors outside the schools operate to deprive some children of some of the existing choices, the school board is certainly not responsible therefor.

"Appellants, however, argue that the state must take affirmative steps to balance the schools to counteract the variety of private pressures that now operate to restrict the range of choices presented to each school child. Such a theory of constitutional duty would destroy the well-settled principle that the Fourteenth Amendment governs only state action. Under such a theory, all action would be state action, either because the state itself had moved directly, or because some private person had acted and thereby created the supposed duty of the state to counteract any consequences.

> The standard to be applied is '*equal educational opportunity*'. The Court in *Brown* cast its decision thus because it recognized that it was both unnecessary and impossible to require that each child come through the complex process of modern education with the same end result. This approach grants due respect for the unavoidable consequences of variations in individual ability, home environment, economic circumstances, and occupational aspirations. Equal opportunity requires that each child start the race without arbitrary official handicaps; it does not require that each shall finish in the same time." (emphasis ours)

It appears that whether busing to achieve racial balance is permissible has been held to depend on a so-called distinction between "de jure" or "de facto" segregation situations. In this regard, Judges Bell and Coleman in their dissent in *Jefferson* II, supra, observe at pages 413 and 418:

> "The unfairness which inheres in the majority opinion stems from the new doctrine which the original panel fashioned under the concept of classifying segregation into two types: de jure segregation, called apartheid, for the seventeen southern and border states formerly having legal segregation; and de facto segregation for the other states of the nation. This distinction, which must be without a difference and somewhat hollow to a deprived child wherever located, is used as a beginning. The original opinion then goes on to require affirmative action on the part of the school authorities in the de jure systems to integrate the schools. The neighborhood school systems of the nation with their de facto segregation are excused. The Constitution does not reach them.

"This reasoning is necessary to reach the end of compulsory integration in the so-called de jure states. It is the counterpart to overruling the settled construction of the Fourteenth Amendment, to be next discussed, that integration is not commanded. *The restrictions in the Civil Rights Act of 1964 against requiring school racial balances by assignment and transportation are written out of the law with respect to the de jure states by using the de jure-de facto theory.* Title IV, subsection 401(b), 407(a), 42 U.S.C.A. subsection 2000c(b), 2000c-6. The overruling of the constitutional limitation removes the other impediment to compulsory integration. The way is thus cleared for the new dimension. The only question left is when, and to what extent. The authority to HEW is carte blanche. We should disavow the de jure-de facto doctrine as being itself violative of the equal protection clause. It treats school systems differently. It treats children differently. It is reverse apartheid. It poses the question whether legally compelled integration is to be substituted for legally compelled segregation. It is unthinkable that our Constitution does not contemplate a middle ground-no compulsion one way or the other." (emphasis ours)

* * * * * *

"*I further believe that whatever the Fourteenth Amendment requires of any State it requires of all States.* If we are requiring something here in the enforcement of Fourteenth Amendment rights that should not be required of all fifty states then we have exceeded our authority and we have misapplied the Constitution. . ." (emphasis ours)

Judge Gewin in *Jefferson* II, supra, observes at page 398:

". . . One of the chief difficulties which I encounter with the opinion is that it concludes that the Constitution means one thing in 17 states of the nation and something else in the remaining states. This is done by a rather ingenious though illogical distinction between the terms de facto segregation and de jure segregation. While the opinion recognizes the evils common to both types, it relies heavily on background facts to justify the conclusion that the evil will be corrected in one area of the nation and not in the other. In my view the Constitution cannot be bent and twisted in such a manner as to justify or support such an incongruous result."

The application which some courts have given to the anti-bussing philosophy expressed in Section 407(a), supra, appears to have been occasioned by the apparent rejection of the decision in *Briggs v. Elliott*, E.D.S.C. (1955) 132 F.Supp. 776, where it was held at page 777:

". . . it is important that we point out exactly what the Supreme Court has decided and what it has not decided in this case. *It has not decided that the federal courts are to take over or regulate the public schools of the states.* It has not decided that the states must mix persons of different races in the schools or must require them to attend schools or *must deprive them of the right of choosing the schools they attend.* What it has decided, and all that it has decided, is that a state may not deny to any person on account of race the right to attend any school that it maintains. This, under the decision of the Supreme Court, the state may not do directly or indirectly; but if the schools which it maintains are open to children of all races, no violation of the Constitution is involved even though the children of different races

voluntarily attend different schools, as they attend different churches. Nothing in the Constitution or in the decision of the Supreme Court takes away from the people freedom to choose the schools they attend. The Constitution, in other words, does not require integration. It merely forbids discrimination. It does not forbid such segregation as occurs as the result of voluntary action. It merely forbids the use of governmental power to enforce segregation. The Fourteenth Amendment is a limitation upon the exercise of power by the state or state agencies, not a limitation upon the freedom of individuals." (emphasis ours)

Judge Gewin in *Jefferson* II, supra, in commenting on the apparent rejection of the *Briggs* doctrine, supra, observed at page 409:

"If the alleged Briggs dictum is so clearly erroneous and constitutionally unsound, it is difficult to believe that it would have been accepted for a period of almost twelve years and quoted so many times. Even the majority concedes that the court in Briggs was composed of distinguished jurists, Judges Parker, Dobie and Timmerman. If the majority is correct, it is entirely likely that never before have so many judges been misled, including judges of this Court, for so long by such a clear, understandable direct, and concise holding as the language in Briggs which the opinion now condemns. The language is straightforward and simple: 'The Constitution, in other words, does not require integration. It merely forbids discrimination.'

It is interesting also to observe that the Supreme Court has never disturbed the Briggs language although it has

had numerous opportunities to do so. As a matter of fact, it has come very close to approving it; if it has not actually done so . . .

The majority rule requiring compulsory integration is new and novel, and it has not been accepted by the Supreme Court or by the other circuits. . ." (emphasis ours)

In this regard, Judge Young, who was the trial judge in the *Ellis* case, supra, observed as follows:

". . . A student who because of his color is scooped up within a gerrymandered zone to be transported to a distant school in the same zone and deprived of the right of attending a school a few blocks from his home which is placed in another zone (where such zones are gerrymandered for racial balance alone) is 'effectively excluded' from a school because of race or color which is contra to Alexander v. Holmes County Board of Education, supra." (emphasis ours)

Judge Clark in his dissent in *Singleton,* supra, very similarly observed:

"The assignment of specific racial quotas and the establishment of minimum, acceptable, percentage, racial guidelines for students, most assuredly cannot be the terms of definition, for when a child of any race wishes to attend a school because of its location close to home, because of the deemed excellence of its faculty or facilities, because it is attended by brothers or sisters or close friends or because it is on Dad's way to work or in Mother's car pool, and his wishes accord with valid edu-

cational policy, *yet that child winds up being excluded from that school solely because the color of his or her skin doesn't conform to a predetermined arbitrary racial quota or percentage guideline, that child's right to be free of racial distinctions is gone. By the very wording of the phrase to be defined, a school system can't be 'unitary' if a child is effectively excluded from any school because of his or her race or color.* It's easy to see what it isn't, the challenge is to show what it is." (emphasis ours)

(See also *Holland v. Board of Public Instruction of Palm Beach County*, U.S.C.A., 5 Cir. (1958) 258 F.2d. 730; *Bell v. School City of Gary, Indiana*, U.S.C.A., 7 Cir. (1963) 324 F.2d. 209; cert. denied, 377 US 924, 84 S.Ct. 1223, 12 L.Ed.2d. 216; *Downs v. Board of Education of Kansas City*, U.S.C.A. 10 Cir., (1964) 336 F.2d. 988, cert. denied, 380 US 914, 85 S.Ct. 898, 13 L.Ed. 2d. 800).

Amicus respectfully suggests that busing as contemplated by the District Court's order would be contrary to the principles set forth in *Alexander v. Holmes County*, (1969) 396 US 19, 24 L.Ed.2d. 19. As we understand it, the order of the District Court requires that the school children administered by the plan which the court has approved are to be bused on the basis of race so as to achieve proportionate racial representation in the schools; and, because of their race, certain children would be excluded from the school within the neighborhood of their choice and bused to another solely on the basis of race. This inherently violates the due process and equal protection clause of the Fourteenth Amendment to the United States Constitution. In *Cassell v. Texas*, (1950) 339 U.S. 282, 287; 94 L.Ed. 840, 847, this Court said:

> ". . . Proportional racial limitation is therefore forbidden. An accused is entitled to have charges against him considered by a jury in the selection of which there has been neither inclusion nor exclusion because of race. . ."

At 339 U.S. 291, 94 L.Ed. 849, a concurring opinion speaking through Mr. Justice Frankfurter stated:

> ". . . But discrimination in this context means purposeful, systematic, non-inclusion because of color. . . It does not mean absence of proportional representation. . ."

The principle of Cassell has been re-announced in recent times in *Swain v. Alabama,* (1965) 380 U.S. 202, 208; 13 L.Ed.2d. 759, 766, wherein the following statement appears:

> "Similarly, since there can be no exclusion of Negroes as a race because of color, proportional limitation is not permissible. (Cassell v. Texas, 339 U.S. 292; 94 L.Ed. 839) . . ."

This court has given the *Cassell* principle some recognition in the cases of *U. S. v. Wiman,* U.S.C.A., 5 Cir. (1962) 304 F.2d. 53 and *Goins v. Allgood,* U.S.C.A., 5 Cir. (1968) 391 F.2d. 692, wherein it is said that proportionate representation is not required.

Each of the foregoing cases is concerned with jury selection. However, there is no difference between the constitutional prohibitions against discrimination in the assignment of jurors and the assignment of students. Proportionate representation is prohibited because it requires that the state exclude on the basis of race those who exceed the portion

allotted to their race. The law must be color-blind. If the law requires that the race of the administered be known in order to enforce the law, then clearly race is made a controlling characteristic or issue. The plan approved by the lower court can only be effectuated if the race of the child is disclosed. It is a plan clearly racial in characteristic and as such is unconstitutional per se. The plan requires that a child, on the basis of race, graduate in a high school other than that which he has attended for perhaps three and a half years. It requires that he be bused out of his neighborhood. If the child falsifies his race and leaves all other factors the same he achieves the desirable circumstance of stability. Change can be legitimately imposed on him but not on the basis of race. A law which clearly discriminates on the basis of race cannot gain a constitutional exception because it is thought to promote a desirable social amelioration.

The Court should also consider that the Fourteenth Amendment concludes with the provision:

> "Section 5. The Congress shall have power to enforce by appropriate legislation, the provisions of this article."

Congress has exercised the power specifically given by passing legislation which prohibits busing. It is respectfully suggested that such legislation prohibits the racial discrimination characteristic of the plan in question. The Court should not give any construction of the Congressional enactment which would pervert any intent which may be clearly shown by the Congressional record or by the language of the act. Certainly the court should not say to its fountain head of jurisdictional power that it has not prohibited forced busing on the basis of race if only a distortion of the clear intent would permit such conclusion. To do so would require of

Congress that it limit the Court's power to review certain Congressional enactments by a provision in the Act so stating, because such provision would be the only method whereby Congress could effectively exercise the power specifically given by Amendment XIV, Section 5, of the Federal Constitution.

Congressional power to enforce the Fourteenth Amendment is not exclusive. However, in light of the specific provisions of Section 5, it must be controlling.

If the Fourteenth Amendment of the Federal Constitution permitted, without requiring, proportionate representation on the basis of race, the decision of a United States District Court requiring proportionate representation would have to be reversed as imposing what was not required. A fortiori the order of a U. S. District Court must be reversed for imposing proportional racial representation when such is actually prohibited by the Fourteenth Amendment. As the Honorable Thurgood Marshall stated in his Brief in *Brown v. Board of Education*, (1955) 349 U.S. 294, 99 L.Ed. 1083, 1089:

> "The Fourteenth Amendment requires that a decree be entered directing that appellants be admitted forthwith to public schools without distinction as to race or color."

Amicus asks but the same.

Amicus would be remiss in his responsibility to this Court if some comment were not made regarding the arguments of the parties in this proceeding. The Brief filed by the Charlotte-Mecklenburg Board of Education (Cross-Petitioner) sets forth with great particularity and specificity their opposition to compulsory busing and racial balancing. At page 29 of their Brief, the Cross-Petitioner states, in part,

that, "We do not think that the Constitution requires this racial balancing nor the busing necessary to implement it . . ." The Brief filed by James Swann, et al, (Petitioners) urges acceptance of the concept of a racially balanced school system and busing to achieve such balance; such concept, it is argued, as being the constitutional imperative which the school boards have been mandated by the courts to follow. Petitioner submits that these "techniques" are required to "eliminate segregation" and "integrate the school system."

Amicus respectfully submits that there is indeed a distinction between school systems which are "segregated" and school systems which vary in the degree of mathematical "integration." Amicus suggests that there is a vast difference between the elimination of school segregation as commanded by the Court in the *Brown* cases, and directing a more racially balanced system as ordered by the District Court. Amicus respectfully submits that the inability of the Courts to make this distinction has contributed to the judicial confusion. It has been commonplace and perhaps an oversimplification to interchange these two concepts. In many instances, the courts were, in reality, dealing with school systems which were not "segregated," but rather which did not have a sufficient degree of "integration" to "satisfy" the courts' concept of a unitary system.

The principle that this Court clearly enunciated in *Alexander vs. Holmes County Board of Education*, supra, was the necessity and requirement of school boards to establish a unitary system "within which no person is to be effectively excluded from any schools because of *race or color*."

In *Allen vs. Board of Public Instruction of Broward County*, slip Opinion Number 30032, August 18, 1970, the Fifth Circuit observed, in part, as follows:

> "The Supreme Court has commanded courts and school boards to eliminate *school segregation* 'root and branch,' *Green, supra*, 391 U.S. at 438, and to do it *now*. See *Green, supra; Alexander v. Holmes County Board of Education*, 1969, 396 U.S. 19, 90 S.Ct. 29, 24 L.Ed. 2d 19; *Carter v. West Feliciana Parish School Board*, 1970, 396 U.S. 290, 90 S.Ct. 608, 24 L.Ed. 2d 477. We must be responsive to this constitutional mandate." (emphasis ours)

Indeed, the courts must be responsive to this mandate—but what is this mystical mandate? Is it to command the establishment of a racially balanced school system? Must the courts forever be saddled with a perennial abacus, reviewing plans every term and every time the population shifts adjusting them mathematically? This certainly could not be the intent of *Alexander;* providing *equal educational opportunities* should be the goal.

The Petitioner attempts to distort this, as well as the significance of the opinion of the Fourth Circuit, in suggesting a "new" legal principle has been established below, to-wit: "that in each case a court must decide whether the goal of complete desegregation of all schools is a reasonable goal . . . whether the Court thinks desegregation is worthwhile, giving the circumstances of the district . . ." (page 24, Petitioner's Brief). This interpretation is completely inconsistent with the meaning and significance of the opinion of the Fourth Circuit. The question is not whether desegregation is worthwhile—this issue was resolved in 1954 by this Court and is no longer a matter to be resurrected. Nor is it fair to this Court to infer that the Fourth Circuit's decision is one that is in opposition to desegregation. This suggestion is nothing more than a smoke screen designed to obscure the real issues and divert attention from the resolution of these

issues. Nowhere in the majority opinion of the Fourth Circuit is there any intent to question the reasonableness of the goal of desegregation and this Court should pierce this illusory inference. The Fourth Circuit, in adopting what it referred to as "the test of reasonableness, instead of one that calls for absolutes" observed, in part:

> ". . . if a school board makes every *reasonable effort* to integrate the pupils under its control, an interactable remnant of segregation, we believe, should not void an otherwise exemplary plan for the creation of a unitary school system. *Ellis vs. Board of Public Instruction of Orange County*, Number 29124, February 17, 1970—F.2d.—Fifth Circuit." (emphasis ours)

With regard to the question of busing, the Fourth Circuit went on to observe:

> "Bussing is a permissible tool for achieving integration, but is not a panacea. In determining who should be bussed and where they should be bussed, a school board should take into consideration the age of the pupils, the distance and time required for transportation, the effect on traffic, and the cost in relation to the board's resources. The board should view bussing for integration in the light that it views bussing for other legitimate improvements, such as school consolidation and the location of new schools. In short, the board should draw on its experience with bussing in general—the benefits and the defects—so that it may intelligently plan the part that bussing will play in a unitary school system
>
> • • • • • • •
>
> ". . . The board, we believe, should not be required to undertake such extensive additional busing to discharge its obligation to create a unitary school system."

•

The Petitioner expresses great concern about applying a "rule of reason," seemingly suggesting that this rule has some sinister connotation. The Petitioner submits that applying the test of reasonableness "must leave every board or court which seeks to apply the formula, essentially at sea." (page 39, Petitioner's Brief) Yet, while suggesting the vagueness of using a standard of reasonableness in approving the efforts of the school board in the adoption of a school plan, Petitioner unhesitatingly suggests that there is a "reasonable basis for the District Court's decision;" that the Fourth Circuit Court's order was not governed by traditional rules of appellate review because in order to set aside the equity decree, the appellant "must demonstrate that there was no *reasonable basis* for the District Court's decision." How does one determine or demonstrate the existence or non-existence of a "reasonable basis" for a District Court's decision, if the phrase or term "reasonable" is as vague as Petitioner suggests? Why is the test of reasonableness adopted by the Fourth Circuit, any the less vague than the test used by an appellate court or an appellant to sustain or set aside a lower court's decision.

The "rule of reason" which is the foundation for all jurisprudence is now alleged to be fraught with danger. Amicus would respectfully suggest that a determination of what is "reasonable" is perhaps far easier (and a much more equitable standard) than determining what is meant by a "unitary system," which latter phrase the courts have spoken of with such forcefulness and understanding—yet what does *that* phrase really mean?

In his Statement on Elementary and Secondary School Desegregation, made on March 24, 1970, President Nixon prophetically observed (even *before* the Fourth Circuit ruled):

". . . There is a Constitutional mandate that dual school systems and other forms of *de jure* segregation be eliminated totally. But within the framework of that requirement an area of flexibility—a "*rule of reason*"—exists, in which school boards, acting in good faith, can formulate plans of desegregation which best suit the needs of their own localities." (emphasis ours) (Appendix hereto Exhibit A 1—34, 12)

The issue is not whether the Fourth Circuit Court is correct in adopting a test based upon reasonableness; for no one can logically quarrel with any judicial determination founded upon a rule of reason. The issues are those which Mr. Chief Justice Burger correctly observed in *Northcross vs. Board of Education* this past March:

". . . whether, as a Constitutional matter, any particular racial balance must be achieved in the schools; to what extent the school districts or zones may or must be altered as a Constitutional matter; to what extent transportation may or must be provided to achieve the ends sought by prior holdings of the Court. . ." (—U.S.—, 25 L.Ed.2d 246, 250)

To these issues we must add: to what extent must school districts pair or cluster schools as a Constitutional matter, where such pairing is designed to achieve or maintain a racial balance. Pairing or clustering is a division of grade levels among several comparable schools located within a relatively short distance of each other. This is a device which many courts have utilized in improving the racial balance in school systems, in lieu of redrawing of zone lines. Although the question of whether to redraw zone lines (if done without

regard to race) or whether to utilize pairing and clustering, should be left to the sound discretion of the school boards, many courts have taken it upon themselves to direct pairing because the ratios of black to white within a given school system would be improved or more equally balanced.

Pairing and clustering have been criticized as being inconsistent with sound educational principles. Recently, the Superintendent of Schools of Broward County, Florida, prepared a report discussing implementation of the Fifth Circuit Court of Appeals order, entered on August 18, 1970. In this report, Dr. Benjamin C. Willis states in part:

> "The essential condition of school pairing by grade levels will work in direct opposition to the reorganization of our school program, which is already under way. All of these plans have been formulated, seeking only to provide the best possible, and most appropriate education for each child, considering him only as an individual and not as a racial statistic. . ."
>
> • • • • • •
>
> "The conclusion can be only that clustering/pairing, using only statistics, is educationally, logistically, economically unsound." (C 48, 52)

This Court's attention is also invited to this report, because it graphically demonstrates the frustrations in which educators and school systems have found themselves, as a result of educationally unrealistic judicial directives. (Appendix hereto Exhibit C 37—52)

Pairing and clustering have resulted in creating unnecessary safety hazards. Small children are now forced to walk

past a neighborhood school over heavily traveled and congested thoroughfares such as U. S. highways in order to reach their "paired" school. Many children are not eligible for normal school bus transportation because they live within two miles of their school (Florida Statutes 234.01). Fifth Circuit Court decisions reversals directing pairing and clustering have occurred a few days before school opening leaving school officials little time to adequately correct these hazardous conditions.

It is true, as the courts have announced, that this Court has stated that "there is no universal answer to complex problems of desegregation; there is obviously no one plan that will do the job in every case. The matter must be assessed in light of the circumstances present and the options available in each instance." *Green vs. County School Board of New Kent County*, 1968, 391 U.S. 430, 439, 88 S.Ct. 1689 20 F.2d 716. Yet it would seem that if a school system adopts a geographic zone plan and draws its zone lines in such a manner to insure that no person is effectively excluded from any school because of race or color, then a unitary system would be established and the mandate of this Court satisfied, notwithstanding that the particular method selected does not statistically provide as much of a racial balance as would pairing, clustering or other devices. No device or technique is a guaranteed panacea. There are numerous instances of hardship resulting from preoccupation with balance—classical examples are the parent whose seven children will now be attending six different grade schools, and the parent whose children have been transferred several times during the school year.

In attempting to summarize the prevailing trend of the judicial opinion, the President's statement observes:

". . . Where school boards have demonstrated a good-faith effort to comply with court rulings, the courts have generally allowed substantial latitude as to method—often making the explicit point that administrative choices should, wherever possible, be made by the local school authorities themselves." (A 11)

The President's statement also expresses his position on the neighborhood school concept and busing.

"The neighborhood school would be deemed the most appropriate base for such a system.

Transportation of pupils beyond normal geographic school zones for the purpose of achieving racial balance will not be required." (A 23)

* * * * * * *

"I am dedicated to continued progress toward a truly desegregated public school system. But, considering the always heavy demands for more school operating funds, I believe it is preferable, when we have to make the choice, to use limited financial resources for the improvement of education—for better teaching facilities, better methods, and advanced educational materials—and for the upgrading of the disadvantaged areas in the community rather than buying buses, tires and gasoline to transport young children miles away from their neighborhood schools." (A 10)

Of particular significance is the President's observation that:

"Demands that an arbitrary 'racial balance' be established as a matter of right misinterpret the law and misstate the priorities.

As a matter of educational policy, some schools have chosen to arrange their school systems in such a way as to provide a greater measure of racial integration. The important point to remember is that where the existing racial separation has not been caused by official action, this increased integration is and should remain a matter for local determination." (A 17)

CONCLUSION

The quandry in which many of the courts find themselves is a result of the absence of ascertainable standards. As Judge Clark in *Singleton, supra*, "The Court seeks to bring mighty things to pass, but just how is not explained . . ." ". . . The hard truth is that the courts have not fixed an adequate and a precise remedy. It is this court, not the school districts, that is to blame for any disparity between what the court now wants and what the districts actually are. . ."

Only a few days ago, Judge Miller, a Circuit Judge sitting as a District Judge, by designation, in the Middle District of Tennessee, refused to implement a school plan, observing in part as follows:

". . . In the absence of further and more specific guidelines from the Supreme Court, no lower federal court is in a position to make a definitive ruling on these important issues . . . therefore, the Court is of the opinion that the implementation of such a plan, by order of this Court, might result in harm to those whose interests must be deemed paramount, the students . . ." (*Kelley, et al. v. Metropolitan County Board of Education of Nashville and Davidson County, Tenn., et al.*, U.S.D.C. Nashville Div., M.D., Aug. 25, 1970)

Therefore, the necessity for this Court to set forth specific guidelines cannot sufficiently be over-emphasized. Consideration of race, whether it be for the purposes of segregation or integration, is unconstitutional and as objectionable as would the consideration of religion or national origin. The Constitution must be color blind, *not* color conscious. The goal is not the level of integration to be achieved; instead, the goal is as Judge Bell pointed out in his dissent in *Jefferson* II, supra, "a fair chance to attain personal dignity through equal educational opportunity. . ."

President Nixon, in his school statement, supra, makes several pertinent observations which merit quotation:

"One of the mistakes of past policy has been to demand too much of our schools: They have been expected not only to educate but also to accomplish a social transformation. Children in many instances have not been served, but used—in what all too often has proved a tragically futile effort to achieve in the schools the kind of a multiracial society which the adult community has failed to achieve for itself.

If we are to be realists, we must recognize that in a free society there are limits to the amount of government coercion that can reasonably be used; that in achieving desegregation we must proceed with the least possible disruption of the education of the nation's children; and that our children are highly sensitive to conflict, and highly vulnerable to lasting psychic injury.

Failing to recognize these factors, past policies have placed on the schools and the children too great a share

of the burden of eliminating racial disparities throughout our society. A major part of this task falls to the schools. But they cannot do it all or even most of it by themselves. Other institutions can share the burden of breaking down racial barriers, but only the schools can perform the task of education itself. If our schools fail to educate, then whatever they may achieve in integrating the races will turn out to be only a pyrhhic victory." (A 16—17)

In his concluding comments in his dissent in *Singleton*, supra, Judge Clark summed up the position in which he felt the Court was now finding itself. Judge Clark observed:

"With the glare of this publicity turned on us, this court is no less than on trial itself—on trial to see if it can make justice the handmaiden of liberty, or whether we make her serve tyranny. There is more at stake here than the tremendously valuable rights that lie on the surface of this controversy. Much of the vitality of the rule of law hangs in the balance, for we here deal not only with a vast number of people but also with perhaps the most sensitive area to any citizen—the welfare of his children. Respect for courts and for their decrees is a *sine qua non* to the acceptance of law as an ingrained way of life. We should do all we can as judges to promote that respect . . ."

This Court has the opportunity to resolve the issues which have caused wide-spread concern and confusion. The time has long passed for the formulation of realistic guidelines which are consistent with sound constitutional and educational imperatives. It is respectfully requested that this Court

reject the concept of balancing and busing and inst
recognize the goal of equal educational opportunity throu
reasonable means.

APPENDIX

Statement by the President on Elementary and Secondary School Desegregation 1A–34B

Consent to File 35B–36B

Statement by Superintendent of Education of Broward County 37C–52C

EMBARGOED FOR *ALL* WIRE TRANSMISSION
UNTIL 10:00 A.M., EST, MARCH 24, 1970
EMBARGOED FOR RELEASE UNTIL 11:00 A.M., EST

Office of the White House Press Secretary

THE WHITE HOUSE

STATEMENT BY THE PRESIDENT ON ELEMENTARY AND SECONDARY SCHOOL DESEGREGATION

My purpose in this statement is to set forth in detail this Administration's policies on the subject of desegregation of America's elementary and secondary schools.

Few public issues are so emotionally charged as that of school desegregation, few so wrapped in confusion and clouded with misunderstanding. None is more important to our national unity and progress.

This issue is not partisan. It is not sectional. It is an American issue, of direct and immediate concern to every citizen.

I hope that this statement will reduce the prevailing confusion and will help place public discusion of the issue on a more rational and realistic level in all parts of the nation. It is time to strip away the hypocrisy, the prejudice and the ignorance that too long have characterized discussion of this issue.

My specific objectives in this statement are:

—To reaffirm my personal belief that the 1954 decision of the Supreme Court in *Brown* v. *Board of Education* was right in both Constitutional and human terms.

—To assess our progress in the 16 years since *Brown* and to point the way to continuing progress.

—To clarify the present state of the law, as developed by the courts and the Congress, and the Administration policies guided by it.

—To discuss some of the difficulties encountered by courts and communities as desegregation has accelerated in recent years, and to suggest approaches that can mitigate such problems as we complete the process of compliance with *Brown*.

—To place the question of school desegregation in its larger context, as part of America's historic commitment to the achievement of a free and open society.

Anxiety over this issue has been fed by many sources.

On the one hand, some have interpreted various Administration statements and actions as a backing away from the principle of *Brown*—and have therefore feared that the painstaking work of a decade and a half might be undermined. We are not backing away. The Constitutional mandate will be enforced.

On the other hand, several recent decisions by lower courts have raised widespread fears that the nation might face a massive disruption of public education: that wholesale compulsory busing may be ordered and the neighborhood school virtually doomed. A comprehensive review of school desegregation cases

indicates that these latter are untypical decisions, and that prevailing trend of judicial opinion is by no means so extreme.

Certain changes are needed in the nation's approach to school desegregation. It would be remarkable if sixteen years of hard, often tempestuous experience had not taught us something about how better to manage the task with a decent regard for the legitimate interests of all concerned—and especially the children. Drawing on this experience, I am confident the remaining problems can be overcome.

WHAT THE LAW REQUIRES

In order to determine what ought to be done, it is important first to be as clear as possible about what *must* be done.

We are dealing fundamentally with inalienable human rights, some of them constitutionally protected. The final arbiter of Constitutional questions is the United States Supreme Court.

The President's Responsibility

There are a number of questions involved in the school controversy on which the Supreme Court has not yet spoken definitively. Where it has spoken, its decrees are the law. Where it has not spoken, where Congress has not acted, and where differing lower courts have left the issue in doubt, my responsibilities as Chief Executive make it necessary that I determine, on the basis of my best judgment, what must be done.

In reaching that determination, I have sought to ascertain the prevailing judicial view as developed in decisions by the Supreme Court and the various Circuit Courts of Appeals. In this

statement I list a number of principles derived from the prevailing judicial view. I accept those principles and shall be guided by them. The Departments and agencies of the Government will adhere to them.

A few recent cases in the lower courts have gone beyond those generally accepted principles. Unless affirmed by the Supreme Court, I will not consider them as precedents to guide Administration policy elsewhere.

What the Supreme Court Has Said

To determine the present state of the law, we must first remind ourselves of the recent history of Supreme Court rulings in this area.

This begins with the *Brown* case in 1954, when the Court laid down the principle that deliberate segregation of students by race in the public schools was unconstitutional. In that historic ruling, the court gave legal sanction to two fundamental truths—that separation by law establishes schools that are inherently unequal, and that a promise of equality before the law cannot be squared with use of the law to establish two classes of people, one black and one white.

The Court requested further argument, however, and propounded the following questions, among others:

"Assuming it is decided that segregation in public schools violates the Fourteenth Amendment

"a. would a decree necessarily follow providing that, within the limits set by normal geographic school districting, Negro children should forthwith be admitted to schools of their choice, or

"b. may this Court, in the exercise of its equity powers, permit an effective gradual adjustment to be brought about from existing segregated systems to a system not based on color distinctions?"

In its second *Brown* decision the following year, the Court addressed itself to these questions of manner and timing of compliance. Its ruling included these principles:

—Local school problems vary: school authorities have the primary responsibility for solving these problems; courts must consider whether these authorities are acting in good faith.

—The courts should be guided by principles of equity, which traditionally are "characterized by a practical flexibility in shaping its remedies and by a facility for adjusting and reconciling public and private needs."

—Compliance must be achieved "with all deliberate speed," including "a prompt and reasonable start" toward achieveing full compliance "at the earliest practicable date."

In 1964, the Supreme Court spoke again: "The time for mere 'deliberate speed' has run out, and that phrase can no longer justify denying these . . . children their constitutional rights."

At the same time, Congress also added to the impetus of desegregation by passing the Civil Rights Act of 1964, an Act that as a private citizen I endorsed and supported.

Although the Supreme Court in the *Brown* cases concerned itself primarily, if not exclusively, with pupil assignments, its decree applied also to teacher assignments and school facilities as a whole.

In 1968, the Supreme Court reiterated the principle enunciated in prior decisions, that teacher assignments are an important aspect of the basic task of achieving a public school system wholly freed from racial discrimination. During that same year, in another group of Supreme Court decisions, a significant and new set of principles also emerged.

—That a school board must establish "that its proposed plan promises meaningful and immediate progress toward disestablishing State-imposed segregation," and that the plan must "have real prospects for dismantling the State-imposed dual system 'at the earliest practicable date.'"

—That one test of whether a school board has met its "affirmative duty to take whatever steps might be necessary to convert to a unitary system in which racial discrimination would be eliminated root and branch" is the extent to which racial separation persists under its plan.

—That the argument that effective desegregation might cause white families to flee the neighborhood cannot be used to sustain devices designed to perpetuate segregation.

—That when geographic zoning is combined with "free transfers," and the effect of the transfer privilege is to perpetuate segregation despite the zoning, the plan is unacceptable.

The most recent decisions by the Supreme Court have now rejected any further delay, adding to the Court's mandate:

—"The obligation of every school district is to terminate dual systems at once and to operate now and hereafter only unitary schools."

—That the obligation of such districts is an affirmative one and not a passive one.

—That freedom of choice plans could no longer be considered as an appropriate substitute for the affirmative obligation imposed by the Court unless they, in fact, discharge that obligation immediately.

The Court has dealt only in very general terms with the question of what constitutes a "unitary" system, referring to it it as one "within which no person is to be effectively excluded from any school because of race or color." It has not spoken definitely on whether or not, or the extent to which, "desegregation" may mean "integration."

In an opinion earlier this month, Chief Justice Burger pointed out a number of "basic practical problems" which the Court had not yet resolved, "including whether, as a Constitutional matter, any particular racial balance must be achieved in the schools; to what extent school districts and zones may or must be altered as a Constitutional matter; to what extent transportation may or must be provided to achieve the ends sought by prior holdings of this Court."

One of these areas of legal uncertainty cited by Chief Justice Burger—school transportation—involves Congressional pronouncements.

In the 1964 Civil Rights Act, the Congress stated, ". . . nothing herein shall empower any official or court of the United States to issue any order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another or one school district to another in order to achieve such racial balance, or otherwise enlarge the

existing power of the court to insure compliance with constitutional standards."

In the 1966 amendments to the Elementary and Secondary Education Act, the Congress further stated, ". . . nothing contained in this Act shall . . . require the assignment or transportation of students or teachers in order to overcome racial imbalance."

I am advised that these provisions cannot constitutionally be applied to *de jure* segregation. However, not all segregation as it exists today is *de jure*.

I have consistently expressed my opposition to any compulsory busing of pupils beyond normal geographic school zones for the purpose of achieving racial balance.

What the Lower Courts Have Said

In the absence of definitive Supreme Court rulings, these and other "basic practical problems" have been left for case-by-case determination in the lower courts—and both real and apparent contradictions among some of these lower court rulings have generated considerable public confusion about what the law really requires.

In an often-cited case in 1955 (*Briggs* v. *Elliott*), a District Court held that " the Constitution . . . does not require integration. . . . It merely forbids the use of governmental power to enforce segregation."

But in 1966 another court took issue with this doctrine, pointing out that it had been used as justifying "techniques for perpetuating school segregation," and declaring that:

". . . the only adequate redress for a previously overt system-wide policy of segregation directed against Negroes as a collective entity is a system-wide policy of integration."

In 1969, the 4th Circuit Court of Appeals declared:

"The famous *Briggs* v. *Elliott* dictum—adhered to by this court for many years—that the Constitution forbids segregation but does not require integration . . . is now dead."

Cases in two circuit courts have held that the continued existence of some all-black schools in a formerly segregated district did *not* demonstrate unconstitutionality, with one noting that there is "no duty to balance the races in the school system in conformity with some mathematical formula."

Another circuit court decision declared that even though a district's geographic zones were based on objective, non-racial criteria, the fact that they failed to produce any signficant degree of integration meant that they *were* unconstitutional.

Two very recent Federal court decisions continue to illustrate the range of opinion: a plan of a southern school district has been upheld even though three schools would remain all-black, but a northern school system has been ordered by another Federal court to integrate all of its schools completely "by the revising of boundary lines for attendance purposes as well as busing so as to achieve maximum racial integration."

This range of differences demonstrates that lawyers and judges have honest disagreements about what the law requires. There have been some rulings that would divert such huge sums of money to non-educational purposes, and would create such severe dislocations of public school systems, as to impair

the primary function of providing a good education. In one, for example—probably the most extreme judicial decree so far—a California State court recently ordered the Los Angeles School Board to establish a virtually uniform racial balance throughout its 711 square mile district, with its 775,000 children in 561 schools. Local leaders anticipate that this decree would impose an expenditure of $40,000,000 over the next school year to lease 1,600 buses, to acquire site locations to house them, to hire drivers, and to defray operating costs. Subsequent costs would approximate $20,000,000 annually. Some recent rulings by federal district courts applicable to other school districts appear to be no less severe.

I am dedicated to continued progress toward a truly desegregated public school system. But, considering the always heavy demands for more school operating funds, I believe it is preferable, when we have to make the choice, to use limited financial resources for the improvement of education—for better teaching facilities, better methods, and advanced educational materials—and for the upgrading of the disadvantaged areas in the community rather than buying buses, tires and gasoline to transport young children miles away from their neighborhood schools.

What Most of the Courts Agree On

Despite the obvious confusion, a careful survey of rulings both by the Supreme Court and by the Circuit Courts of Appeals suggests that the basic judicial approach may be more reasonable than some have feared. Whatever a few lower courts might have held to the contrary, the prevailing trend of judicial opinion appears to be summed up in these principles:

—There is a fundamental distinction between so-called "*de jure*" and "*de facto*" segregation: *de jure* segregation

arises by law or by the deliberate act of school officials and is unconstitutional; *de facto* segregation results from residential housing patterns and does not violate the Constitution. (The clearest example of *de jure* segregation is the dual school system as it existed in the South prior to the decision in *Brown*—two schools, one Negro and one White, comprised of the same grades and serving the same geographical area. This is the system with which most of the decisions, and the Supreme Court cases up until now, have been concerned.)

—Where school boards have demonstrated a good-faith effort to comply with court rulings, the courts have generally allowed substantial latitude as to method—often making the explicit point that administrative choices should, wherever possible, be made by the local school authorities themselves.

—In devising particular plans, questions of cost, capacity, and convenience for pupils and parents are relevant considerations.

—Whatever the racial composition of student bodies, faculties and staff must be assigned in a way that does not contribute to identifying a given school as "Negro" or "White."

—In school districts that previously operated dual systems, affirmative steps toward integration are a key element in disestablishing the dual system. This positive integration, however, does not necessarily have to result in "racial balance" throughout the system. When there is racial separation in housing, the Constitutional requirement has been held satisfied even though some schools remained all-black.

—While the dual school system is the most obvious example, *de jure* segregation is also found in more subtle forms. Where authorities have deliberately drawn attendance zones or chosen school locations for the express purpose of creating and maintaining racially separate schools, *de jure* segregation is held to exist. In such a case the school board has a positive duty to remedy it. This is so even though the board ostensibly operates a unitary system.

—In determining whether school authorities are responsible for existing racial separation—and thus whether they are Constitutionally required to remedy it—the *intent* of their action in locating schools, drawing zones, etc., is a crucial factor.

—In the case of genuine *de facto* segregation (i.e., where housing patterns produce substantially all-Negro or all-White schools, and where this racial separation has not been caused by deliberate official action) school authorities are not Constitutionally required to take any positive steps to correct the imbalance.

To summarize: There is a Constitutional mandate that dual school systems and other forms of *de jure* segregation be eliminated totally. But within the framework of that requirement an area of flexibility—a "*rule of reason*"—exists, in which school boards, acting in good faith, can formulate plans of desegregation which best suit the needs of their own localities. (emphasis ours)

De Facto segregation, which exists in many areas both North and South, is undesirable but is not generally held to violate the Constitution. Thus, residential housing patterns may result in the continued existence of some all-Negro schools even in a system which fully meets Constitutional standards. But in any event, local school officials *may*, if they so choose, take steps

beyond the Constitutional minimums to diminish racial separation.

SCHOOL DESEGREGATION TODAY

The Progress

Though it began slowly, the momentum of school desegregation has become dramatic.

Thousands of school districts throughout the South have met the requirements of law.

In the past year alone, the number of black children attending southern schools held to be in compliance has doubled, from less than 600,000 to nearly 1,200,000—representing 40 per cent of the Negro student population.

In most cases, this has been peacefully achieved.

However, serious problems are being encountered both by communities and by courts—in part as a consequence of this accelerating pace.

The Problems

In some communities, racially mixed schools have brought the community greater interracial harmony; in others they have heightened racial tension and exacerbated racial frictions. Integration is no longer seen automatically and necessarily as an unmixed blessing for the Negro, Puerto Rican or Mexican-American child. "Racial balance" has been discovered to be neither a static nor a finite condition; in many cases it has turned out to be only a way station on the road to resegregation. Whites have deserted the public schools, often for grossly inadequate private schools. They have left the now re-segregated public schools foundering for lack of support. And when whites flee the central city in pursuit of all- or predominantly-white

schools in the suburbs, it is not only the central city schools that become racially isolated, but the central city itself.

These are not theoretical problems, but actual problems. They exist not just in the realm of law, but in the realm of human attitudes and human behavior. They are part of the real world, and we have to take account of them.

The Complexities

Courts are confronted with problems of equity, and administrators with problems of policy. For example: To what extent does desegregation of dual systems require positive steps to achieve integration? How are the rights of individual children and their parents to be guarded in the process of enforcement? What are the educational impacts of the various means of desegregation—and where they appear to conflict, how should the claims of education be balanced against those of integration? To what extent should desegregation plans attempt to anticipate the problem of *re*segregation?

These questions suggest the complexity of the problems. These problems confront us in the North as well as the South, and in rural communities, suburbs and central cities.

The troubles in our schools have many sources. They stem in part from deeply rooted racial attitudes; in part from differences in social, economic and behavioral patterns; in part from weaknesses and inequities in the educational system itself; in part from the fact that by making schools the primary focus of efforts to remedy longstanding social ills, in some cases greater pressure has been brought to bear on the schools than they could withstand.

The Context

Progress toward school desegregation is part of two larger processes, each equally essential:

—The improvement of educational opportunities for all of America's children.

—The lowering of artificial racial barriers in all aspects of American life.

Only if we keep each of these considerations clearly in mind—and only if we recognize their separate natures—can we approach the question of school desegregation realistically.

It may be helpful to step back for a moment, and to consider the problem of school desegregation in its larger context.

The school stands in a unique relationship to the community, to the family, and to the individual student. It is a focal point of community life. It has a powerful impact on the future of all who attend. It is a place not only of learning, but also of living—where a child's friendships center, where he learns to measure himself against others, to share, to compete, to cooperate—and it is the one institution above all others with which the parent shares his child.

Thus it is natural that whatever affects the schools stirs deep feelings among parents, and in the community at large.

Whatever threatens the schools, parents perceive—rightly—as a threat to their children.

Whatever makes the schools more distant from the family undermines one of the important supports of learning.

Quite understandably, the prospect of any abrupt change in the schools is seen as a threat.

As we look back over these sixteen years, we find that many changes that stirred fears when they first were ordered have turned out well. In many Southern communities, black and

white children now learn together—and both the schools and the communities are better where the essential changes have been accomplished in a peaceful way.

But we also have seen situations in which the changes have not worked well. These have tended to command the headlines, thus increasing the anxieties of those still facing change.

Overburdening the Schools

One of the mistakes of past policy has been to demand too much of our schools: They have been expected not only to educate, but also to accomplish a social transformation. Children in many instances have not been served, but used—in what all too often has proved a tragically futile effort to achieve in the schools the kind of a multiracial society which the adult community has failed to achieve for itself.

If we are to be realists, we must recognize that in a free society there are limits to the amount of government coercion that can reasonably be used; that in achieving desegregation we must proceed with the least possible disruption of the education of the nation's children; and that our children are highly sensitive to conflict, and highly vulnerable to lasting psychic injury.

Failing to recognize these factors, past policies have placed on the schools and the children too great a share of the burden of eliminating racial disparities throughout our society. A major part of this task falls to the schools. But they cannot do it all or even most of it by themselves. Other institutions can share the burden of breaking down racial barriers, but only the schools can perform the task of education itself. If our schools

fail to educate, then whatever they may achieve in integrating the races will turn out to be only a pyrrhic victory.

With housing patterns what they are in many places in the nation, the sheer numbers of pupils and the distances between schools make full and prompt school integration in every such community impractical—even if there were a sufficient desire on the part of the community to achieve it. In Los Angeles, 78 per cent of all Negro pupils attend schools that are 95 per cent or more black. In Chicago the figure is 85 per cent—the same as in Mobile, Alabama. Many smaller cities have the same patterns. Nationwide, 61 per cent of all Negro students attend schools which are 95 per cent or more black.

Demands that an arbitrary "racial balance" be established as a matter of right misinterpret the law and misstate the priorities.

As a matter of educational policy, some school boards have chosen to arrange their school systems in such a way as to provide a greater measure of racial integration. The important point to bear in mind is that where the existing racial separation has not been caused by official action, this increased integration is and should remain a matter for local determination.

Pupil assignments involve problems which do not arise in the case of the assignment of teachers. If school administrators were truly color blind and teacher assignments did not reflect the color of the teacher's skin, the law of averages would eventually dictate an approximate racial balance of teachers in each school within a system.

Not Just a Matter of Race

Available data on the educational effects of integration are neither definitive nor comprehensive. But such data as we have

suggest strongly that, under the appropriate conditions, racial integration in the classroom can be a significant factor in improving the quality of education for the disadvantaged. At the same time, the data lead us into several more of the complexities that surround the desegregation issue.

For one thing, they serve as a reminder that, from an educational standpoint, to approach school questions solely in terms of race is to go astray. The data tell us that in educational terms, the significant factor is not race but rather the educational environment in the home—and indeed, that the single most important educational factor in a school is the kind of home environment its pupils come from. As a general rule, children from families whose home environment encourages learning—whatever their race—are higher achievers; those from homes offering little encouragement are lower achievers.

Which effect the home environment has depends on such things as whether books and magazines are available, whether the family subscribes to a newspaper, the educational level of the parents, and their attitude toward the child's education.

The data strongly suggest, also, that in order for the positive benefits of integration to be achieved, the school must have a majority of children from environments that encourage learning—recognizing, again, that the key factor is not race but the kind of home the child comes from. The greater concentration of pupils whose homes encourage learning—of whatever race—the higher the achievement levels not only of those pupils, but also of others in the same school. Students learn from students. The reverse is also true: the greater concentration of pupils from homes that discourage learning, the lower the achievement levels of all.

We should bear very carefully in mind, therefore, the distinction between educational difficulty as a result of race, and edu-

cational difficulty as a result of social or economic levels, of family background, of cultural patterns, or simply of bad schools. Providing better education for the disadvantaged requires a more sophisticated approach than mere racial mathematics.

In this same connection, we should recognize that a smug paternalism has characterized the attitudes of many white Americans toward school questions. There has been an implicit assumption that blacks or others of minority races would be improved by association with whites. The notion that an all-black or predominantly-black school is automatically inferior to one which is all or predominantly-white—even though not a product of a dual system—inescapably carries racist overtones. And, of course, we know of hypocrisy; not a few of those in the North most stridently demanding racial integration of public schools in the South at the same time send their children to private schools to avoid the assumed inferiority of mixed public schools.

It is unquestionably true that most black schools—though by no means all—are in fact inferior to most white schools. This is due in part to past neglect or shortchanging of the black schools; and in part to long-term patterns of racial discrimination which caused a greater proportion of Negroes to be left behind educationally, left out culturally, and trapped in low paying jobs. It is not really because they serve black children that most of these schools are inferior, but rather because they serve poor children who often lack the home environment that encourages learning.

Innovative Approaches

Most public discussion of overcoming racial isolation centers on such concepts as compulsory "busing"—taking children out

of the schools they would normally attend, and forcing them instead to attend others more distant, often in strange or even hostile neighborhoods. Massive "busing" is seen by some as the only alternative to massive racial isolation.

However, a number of new educational ideas are being developed, designed to provide the educational benefits of integration without depriving the student of his own neighborhood school.

For example, rather than attempting dislocation of whole schools, a portion of a child's educational activities may be shared with children from other schools. Some of his education is in a "home-base" school, but some outside it. This "outside learning" is in settings that are defined neither as black nor white, and sometimes in settings that are not even in traditional school buildings. It may range all the way from intensive work in reading to training in technical skills, and to joint efforts such as drama and athletics.

By bringing the children together on "neutral" territory friction may be dispelled; by limiting it to part-time activities no one would be deprived of his own neighborhood school; and the activities themselves provide the children with better education.

This sort of innovative approach demonstrates that the alternatives are not limited to perpetuating racial isolation on the one hand, and massively disrupting existing school patterns on the other. Without uprooting students, devices of this kind can provide an additional educational experience within an integrated setting. The child gains both ways.

Good Faith and The Courts

Where desegregation proceeds under the mandate of law, the best results require that the plans be carefully adapted to local circumstances.

A sense of compassionate balance is indispensable. The concept of balance is no stranger to our Constitution. Even First Amendment freedoms are not absolute and unlimited; rather the scales of that "balance" have been adjusted with minute care, case by case, and the process continues.

In my discussion of the status of school desegregation law, I indicated that the Supreme Court has left a substantial degree of latitude within which specific desegregation plans can be designed. Many lower courts have left a comparable degree of latitude. This does not mean that the courts will tolerate or the Administration condone evasions or subterfuges; it does mean that if the essential element of good faith is present, it should ordinarily be possible to achieve legal compliance with a minimum of educational disruption, and through a plan designed to be responsive to the community's own local circumstances.

This matter of good faith is critical.

Thus the far-sighted local leaders who have demonstrated good faith by smoothing the path of compliance in their communities have helped lay the basis for judicial attitudes taking more fully into account the practical problems of compliance.

How the Supreme Court finally rules on the major issues it has not yet determined can have a crucial impact on the future of public education in the United States.

Traditionally, the Court has refrained from deciding Constitutional questions until it became necessary. This period of legal uncertainty has occasioned vigorous controversy over what the thrust of the law should be.

As a nation, we should create a climate in which these questions, when they finally are decided by the Court, can be decided in a framework most conducive to reasonable and realistic interpretation.

We should not provoke any court to push a Constitutional principle beyond its ultimate limit in order to compel compliance with the court's essential, but more modest, mandate. The best way to avoid this is for the nation to demonstrate that it does intend to carry out the full spirit of the Constitutional mandate.

POLICIES OF THIS ADMINISTRATION

It will be the purpose of this Administration to carry out the law fully and fairly. And where problems exist that are beyond the mandate of legal requirements, it will be our purpose to seek solutions that are both realistic and appropriate.

I have instructed the Attorney General, the Secretary of Health, Education and Welfare, and other appropriate officials of the Government to be guided by these basic principles and policies:

Principles of Enforcement

—Deliberate racial segregation of pupils by official action is unlawful, wherever it exists. In the words of the Supreme

Court, it must be eliminated "root and branch"—and it must be eliminated at once.

—Segregation of teachers must be eliminated. To this end, each school system in this nation, North and South, East and West, must move immediately, as the Supreme Court has ruled, toward a goal under which "in each school the ratio of White to Negro faculty members is substantially the same as it is throughout the system."

—With respect to school facilities, school administrators throughout the nation, North and South, East and West, must move immediately, also in conformance with the Court's ruling, to assure that schools within individual school districts do not discriminate with respect to the quality of facilities or the quality of education delivered to the children within the district.

—In devising local compliance plans, primary weight should be given to the considered judgment of local school boards—provided they act in good faith, and within Constitutional limits.

—The neighborhood school will be deemed the most appropriate base for such a system.

—Transportation of pupils beyond normal geographic school zones for the purpose of achieving racial balance will not be required.

—Federal advice and assistance will be made available on request, but Federal officials should not go beyond the requirements of law in attempting to impose their own judgment on the local school district.

—School boards will be encouraged to be flexible and creative in formulating plans that are educationally sound and that result in effective desegregation.

—Racial imbalance in a school system may be partly *de jure* in origin, and partly *de facto*. In such a case, it is appropriate to insist on remedy for the *de jure* portion, which is unlawful, without insisting on a remedy for the lawful *de facto* portion.

—*De facto* racial separation, resulting genuinely from housing patterns, exist in the South as well as the North; in neither area should this condition by itself be cause for Federal enforcement actions. *De jure* segregation brought about by deliberate schoolboard gerrymandering exists in the North as the South; in both areas this must be remedied. In all respects, the law should be applied equally, North and South, East and West.

This is one nation. We are one people. I feel strongly that as Americans we must be done, now and for all future time, with the divisive notion that these problems are sectional.

Policies for Progress

—In those communities facing desegregation orders, the leaders of the communities will be encouraged to lead—not in defiance, but in smoothing the way of compliance. One clear lesson of experience is that local leadership is a fundamental factor in determining success or failure. Where leadership has been present, where it has been mobilized, where it has been effective, many districts have found that they could, after all, desegregate their schools successfully. Where local leadership has failed, the com-

munity has failed—and the schools and the children have borne the brunt of that failure.

—We shall launch a concerted, sustained and honest effort to assemble and evaluate the lessons of experience: to determine what methods of school desegregation have worked, in what situations, and why—and also what has not worked. The Cabinet-level working group I recently appointed will have as one of its principal functions amassing just this sort of information and helping make it available to the communities in need of assistance.

—We shall attempt to develop a far greater body of reliable data than now exists on the effects of various integration patterns on the learning process. Our effort must always be to preserve the educational benefit for the children.

—We shall explore ways of sharing more broadly the burdens of social transition that have been laid disproportionately on the schools—ways, that is, of shifting to other public institutions a greater share of the task of undoing the effects of racial isolation.

—We shall seek to develop and test a varied set of approaches to the problems associated with "*de facto*" segregation, North as well as South.

—We shall intensify our efforts to ensure that the gifted child—the potential leader—is not stifled intellectually merely because he is black or brown or lives in a slum.

—While raising the quality of education in all schools, we shall concentrate especially on racially-impacted schools,

and particularly on equalizing those schools that are furthest behind.

Words often ring empty without deeds. In government, words can ring even emptier without dollars.

In order to give substance to these commitments, I shall ask Congress to divert $500 million from my previous budget requests for other domestic programs for Fiscal 1971, to be put instead into programs for improving education in racially-impacted areas, North and South, and for assisting school districts in meeting special problems incident to court-ordered desegregation. For Fiscal 1972, I have ordered that $1 billion be budgeted for the same purposes.

I am not content simply to see this money spent, and then to count the spending as the measure of accomplishment. For much too long, national "commitments" have been measured by the number of Federal dollars spent rather than by more valid measures such as the quality of imagination displayed, the amount of private energy enlisted or, even more to the point, the results achieved.

If this $1.5 billion accomplishes nothing, then the commitment will mean nothing.

If it enables us to break significant new ground, then the commitment will mean everything.

This I deeply believe:

Communities desegregating their schools face special needs—for classrooms, facilities, teachers, teacher training—and the nation should help meet those needs.

The nation also has a vital and special stake in upgrading education where de facto segregation persists—and where extra efforts are needed if the schools are to do their job. These schools, too, need extra money for teachers and facilities.

Beyond this, we need to press forward with innovative new ways of overcoming the effects of racial isolation and of making up for environmental deficiencies among the poor.

I have asked the Vice President's Cabinet Committee on School Desegregation, together with the Secretary of Health, Education and Welfare, to consult with experts in and out of government and prepare a set of recommended criteria for the allocation of these funds.

I have specified that these criteria should give special weight to four categories of need:

—The special needs of desegregating (or recently desegregated) districts for additional facilities, personnel and training required to get the new, unitary system successfully started.

—The special needs of racially-impacted schools where *de facto* segregation persists—and where immediate infusions of money can make a real difference in terms of educational effectiveness.

—The special needs of those districts that have the furthest to go to catch up educationally with the rest of the nation.

—The financing of innovative techniques for providing educationally sound inter-racial experiences for children in racially isolated schools.

This money—the $500 million next year, and $1 billion in Fiscal 1972—must come from other programs. Inevitably, it represents a further reordering of priorities on the domestic scene. It represents a heightened priority for making school desegregation work, and for helping the victims of racial isolation learn.

Nothing is more vital to the future of our nation than the education of its children; and at the heart of equal opportunity is equal educational opportunity. These funds will be an investment in both the quality and the equality of that opportunity.

This money is meant to provide help *now*, where help is needed now.

As we look to the longer-term future, it is vital that we concentrate more effort on understanding the process of learning—and improving the process of teaching. The educational needs we face cannot be met simply with more books, more classrooms and more teachers—however urgently these are needed now in schools that face shortages. We need more effective methods of teaching, and especially of teaching those children who are hardest to reach and most lacking in a home environment that encourages learning.

In my message on education reform earlier this month, I proposed creation of a National Institute of Education to conduct and to sponsor basic and applied educational research—with special emphasis on compensatory education for the disadvantaged, on the Right to Read, on experimental schools and on the use of television for educational purposes.

I repeat that proposal—and I ask that the Congress consider it a matter of high priority.

A FREE AND OPEN SOCIETY

The goal of this Administration is a free and open society. In saying this, I use the words "free" and "open" quite precisely.

Freedom has two essential elements: the *right* to choose, and the *ability* to choose. The right to move out of a mid-city slum, for example, means little without the means of doing so. The right to apply for a good job means little without access to the skills that make it attainable. By the same token, those skills are of little use if arbitrary policies exclude the person who has them because of race or other distinction.

Similarly, an "open" society is one of open choices—and one in which the individual has the mobility to take advantage of those choices.

In speaking of "desegregation" or "integration," we often lose sight if what these mean within the context of a free, open, pluralistic society. We cannot be free, and at the same time be required to fit our lives into prescribed places on a racial grid—whether segregated or integrated, and whether by some mathematical formula or by automatic assignment. Neither can we be free, and at the same time be denied—because of race—the right to associate with our fellow-citizens on a basis of human equality.

An open society does not have to be homogeneous, or even fully integrated. There is room within it for many communities. Especially in a nation like America, it is natural that people with a common heritage retain special ties; it is natural and right that we have Italian or Irish or Negro or Norwegian neighborhoods; it is natural and right that members of those

communities feel a sense of group identity and group pride. In terms of an open society, what matters is mobility: the right and the ability of each person to decide for himself where and how he wants to live, whether as part of the ethnic enclave or as part of the larger society—or, as many do, share the life of both.

We are richer for our cultural diversity; mobility is what allows us to enjoy it.

Economic, educational, social mobility—all these, too, are essential elements of the open society. When we speak of equal opportunity we mean just that: that each person should have an equal chance at the starting line, and an equal chance to go just as high and as far as his talents and energies will take him.

This Administration's programs for helping the poor, for equal opportunity, for expanded opportunity, all have taken a significantly changed direction from those of previous years—and those principles of a free and open society are the keys to the new direction.

Instead of making a man's decisions for him, we aim to give him both the *right* and *ability* to choose for himself—and the mobility to move upward. Instead of creating a permanent welfare class catered to by a permanent welfare bureaucracy, for example, my welfare reform proposal provides job training and a job requirement for all those able to work—and also a regular Family Assistance payment instead of the demeaning welfare handout.

By pressing hard for the "Philadelphia Plan," we have sought to crack the color bar in the construction unions—and thus to give black and other minority Americans both the right and

the ability to choose jobs in the construction trades, among the highest paid in the nation.

We have inaugurated new Minority Business Enterprise programs—not only to help minority members get started in business themselves, but also, by developing more black and brown entrepreneurs, to demonstrate to young blacks, Mexican-Americans and others that they, too, can aspire to this same sort of upward economic mobility.

In our education programs, we have stressed the need for far greater diversity in offerings to match the diversity of individual needs—including more and better vocational and technical training, and a greater development of 2-year community colleges.

Such approaches have been based essentially on faith in the individual—knowing that he sometimes needs help, but believing that in the long run he usually knows what is best for himself. Through them also runs a belief that education is the key that opens the door to personal progress.

As we strive to make our schools places of equal educational opportunity, we should keep our eye fixed on this goal: To achieve a set of conditions in which neither the laws nor the institutions supported by law any longer draw an invidious distinction based on race; and going one step further, we must seek to repair the human damage wrought by past segregation. We must give the minority child, that equal place at the starting line that his parents were denied—and the pride, the dignity, the self-respect, that are the birthright of a free American.

We can do no less and still be true to our conscience and our Constitution. I believe that most Americans today, whether North or South, accept this as their duty.

The issues involved in desegregating schools, reducing racial isolation and providing equal educational opportunity are not simple. Many of the questions are profound, the factors complex, the legitimate considerations in conflict, and the answers elusive. Our continuing search, therefore, must be not for the perfect set of answers, but for the most nearly perfect and the most constructive.

I am aware that there are many sincere Americans who believe deeply in instant solutions and who will say that my approach does not go far enough fast enough. They feel that the only way to bring about social justice is to integrate all schools now, everywhere, no matter what the cost in the disruption of education.

I am aware, too, that there are many equally sincere citizens—North and South, black and white—who believe that racial separation is right, and wish the clock of progress would stop or be turned back to 1953. They will be disappointed, too.

But the call for equal educational opportunity today is in the American tradition. From the outset of the nation, one of the great struggles in America has been to transform the system of education into one that truly provided equal opportunity for all. At first, the focus was on economic discrimination. The system of "fee schools" and "pauper schools" persisted well into the 19th century.

Heated debates preceded the establishment of universal free public education—and even in such States as New York, New Jersey and Connecticut, the system is barely a century old.

Even today, inequities persist. Children in poor areas often are served by poor schools—and unlike the children of the

wealthy, they cannot escape to private schools. But we have been narrowing the gap—providing more and better education in more of the public schools, and making higher education more widely available through free tuition, scholarships and loans.

In other areas, too, there were long struggles to eliminate discrimination that had nothing to do with race. Property and even religious qualifications for voting persisted well into the 19th century—and not until 1920 were women finally guaranteed the right to vote.

Now the focus is on race—and on the dismantling of all racial bars to equality of opportunity in the schools. As with the lowering of economic barriers, the pull of conscience and the pull of national self-interest both are in the same direction. A system that leaves any segment of its people poorly educated serves the nation badly; a system that educates all of its people well serves the nation well.

We have overcome many problems in our 190 years as a nation. We can overcome this problem. We have managed to extend opportunity in other areas. We can extend it in this area. Just as other rights have been secured, so too can these rights be secured—and once again the nation will be better for having done so.

I am confident that we can preserve and improve our schools, carry out the mandate of our Constitution, and be true to our national conscience.

Discriminatory Aspects and Conclusions

Imposed Mediocrity

Summary

The imposition of a social decree can be as delicate as the dew, as omnipotent as the sun, and as accepted as both—it is the timing that that makes it bitter or sweet.

INTRODUCTION

On April 30, 1970, the School Board of Broward County, Florida accepted from Judge Cabot the final order of District Court for achieving a "unitary school system" in Broward County. The Board appreciates the fact that Judge Cabot carefully considered its own plan for school integration which he measured against constitutional standards.

In his comprehensive review of the matter, Judge Cabot supported the Board's contention that the pairing of schools is educationally unsound by specifically rejecting the recommendations for pairing of schools submitted by the Desegregation Consulting Center with whom staff members of the Broward School System had worked on orders of the District Court itself.

In this current review of the issue, the School Board of Broward County and its staff wishes to pay tribute to the careful procedures and judicious understanding of Judge Cabot in formulating a decision which, while it was a difficult one to execute in a period of three and one-half months, has been accomplished without a serious disruption of the improving race relations in our community and without threatening a sound instructional program for the 120,000 elementary and secondary school students in Broward County.

The School Board of Broward County is dismayed at the untimely and seemingly arbitrary ruling of the Fifth Circuit Court of Appeals in New Orleans which so abruptly dismisses the "decidedly impressive" efforts of its staff members to effect, by the opening of school on August 31, 1970, the order of Judge Cabot, which was accepted, developed, and implemented in good faith. It is to Judge Cabot's credit and it is a measure

of his astute grasp of the issues involved that he provided an adequate, if not ample, time period within which multitudinous problems could be defined and solutions found.

HISTORICAL BACKGROUND AND ACCOMPLISHMENTS

Even prior to the decision handed down by Judge Cabot, the Broward School Board, its Superintendent and Staff had worked in good faith to meet the requirements for a unitary school system as it was then understood. The plans called for an educationally sound desegregation schedule that began in the early 1960's, and was given impetus by the passage of a 108.6 million dollar bond issue in 1968. This bond issue provided facilities for an orderly change from a partially segregated system to a unitary system. All grades 6–12 were to be desegregated by a plan commensurate with sound educational research. Elementary schools were to remain as neighborhood schools.

As judicial interpretations of the 1954 decision changed, the school system worked with various agencies as necessary, always in good faith, to make the changes necessary to implement the ever new and changing guidelines that developed, seemingly on the whim of the hour. At various times they worked with representatives of the Department of Health, Education, and Welfare both at Washington and Atlanta as well as the Desegregation Consulting Center at the University of Miami.

The plans called for a desegregation schedule beginning in 1968 for completion by 1973. All secondary schools were to have been desegregated, with elementary schools remaining as neighborhood schools.

The school system has always believed in the educational soundness of the neighborhood school concept especially at the elementary level, although agencies and courts seem continually to attack the plans predicated on this concept. This order effectively destroys the neighborhood school for certain groups of students.

On March, 16, 1970, Judge Cabot ordered the School Board of Broward County to establish a unitary school system by April 9, 1970. Since that date, school boundaries have been altered to comply with the order, parents have been notified and 24,000 students have been reassigned.

A new organizational pattern was implemented to change elementary schools from grades one through six to Kindergarten through five; junior high schools from grades seven through nine to middle schools with grades six through eight; and senior high schools from grades ten through twelve to nine through twelve. Additionally, two new high schools were organized for grades nine through twelve.

A plan for teacher reassignment was devised by a group selected by the Superintendent and under this plan 1127 teachers have been reassigned to new school centers. Principals cooperated with the Personnel Division in the selection of those persons to be reassigned so they would best fit the educational needs of the schools. For example, combinations were established so that teachers would not leave a flexible school but were reassigned to another flexible school. Teachers in self-contained type school centers were reassigned, insofar as possible, to other self-contained type centers.

Teachers with experience in individualized instructional programs were assigned to schools with similar programs

wherever possible. As a part of this plan, an inservice training program was prepared and has been carried out. The program was begun with a county-wide television program conducted by the Superintendent and his staff. It was telecast into all schools. All members of the profession were given the opportunity to phone in their questions so that each person would understand the impact of the integration order on his particular situation.

Additionally, inservice programs in the form of workshops were held for teachers who were transferred from familiar programs into others with which they had no familiarity, e.g., a teacher with self-contained classroom experience transferred to an individualized program was given the opportunity to learn some of the techniques to be expected of him in 1970–71.

Human relations specialists have addressed education groups to prepare personnel for some of the problems of integration which they might encounter. There have been a total of 515 participants in a series of inservice programs.

Other human relations workshops were conducted for principals, assistant administrators, and guidance personnel to prepare them for the special problems they will have to deal with in the desegregation process. For these workshops consultants were obtained from other school systems in Florida which have experienced this change.

Special workshops were held during the week of August 10 to August 17 for teachers newly assigned to flexible school programs as a result of plans for desegregation. The number of participants was 136.

Also there has been a program of school intervisitation based on system of faculty exchange which has allowed teachers with little experience in integrated school settings to see first hand the operation of fully integrated schools.

In the current plan the percentage of teachers to be relocated reflects directly the number of students of each race at the elementary, junior, and senior high school level. This is in compliance with Judge Cabot's order for a unitary school system.

Special efforts to obtain the textbooks appropriate for the changed student body in newly integrated schools were made by the Textbook Department and the supervisory staff working with school building principals.

The Supervisor of Instructional Materials has conducted an analysis of school libraries to make sure that adequate and appropriate materials were available for students in newly integrated schools.

Budgets for the current year, which are prepared for schools on a per pupil cost basis, have already been computed on the basis of enrollments expected as a result of implementing Judge Cabot's order.

Principals have received these budgets, assigned the funds to supplies and materials categories appropriate to their instructional program for the new year, and have returned those budgets to the county for processing. A tremendous amount of supplies and materials have already been bought to support the instructional program anticipated in each school for the 1970–71 school year.

Bus routes in Broward County which cover a total of 16,000 miles per day have had to be substantially changed to accommodate new school boundaries resulting from Judge Cabot's order. Additional miles of travel required amount to an increase of 5500 miles per day, one million miles per year, at a cost of approximately $370,000. An additional 4,000 students will have to be transported; special authorization for transporting 159 students has been given because of hazardous conditions on new access routes.

The driver's day has been increased from 7½ hours to 8½ hours per day which places most of the drivers into the overtime pay category. Ten drivers have resigned because of this increase in length of working day and because of problems inherent in the integration process—real and imagined. At this point, the System needs 40 additional drivers. These drivers have to go through a minimum training program of 40 hours which requires a minimum of two weeks until that driver is hired and assigned to a permanent route.

Buildings and programs originally designed to accommodate one age group of students have been to a great extent redesigned to accommodate new groupings of students. Furniture, equipment, library books and textbooks, materials and supplies have been shifted from school to school in order to accommodate these new grade groupings and ages of students.

Broward County has a totally accredited school system in grades 1–12. This accreditation is based on adequate program and building design, adequate equipment and materials, and the training of teachers. Implementation of Judge Cabot's order required that standards be kept in mind at all times in order not to jeopardize the accreditation of the Broward County School System. Large student enrollments in the senior high

schools and the result of double sessioning of these schools has required the addition of 30 school administrators to absorb the administrative load with this size program. This cost $360,000.

The tremendous number of students shifted and the tracking problem involved in order to insure their records followed them, and followed them in a up-to-date condition, required that administrators, guidance personnel, and secretaries be employed for an additional 19 days; 53 people worked during the summer at an estimated cost of $37,000.

A primary concern of school and community leaders alike, as they planned to implement District Court orders, was the health and safety of the thousands of children who would be required to travel greater distances or over new routes to get to school. Many special provisions have been made to guarantee their welfare:

new streets and sidewalks have been built

many walk ways have been extended

new signal lights have been installed

adults have been hired as crossing guards

needed school zones and markings have been made

traffic control devices have been obtained

security officers have been assigned to some schools

Civic leaders and school personnel have worked diligently for the past four months to build healthy attitudes within the

nmunities to be most severely affected by the new endance regulations. These efforts have been aimed specific goals:

the fears of parents whose children will have to rom a familiar school to a new one

g access routes to all schools to assure safety for

; positive relationships between parents and new faculty members

izing students with the new schools they would be ng

Judge Cabot had wisely permitted a period of ad- for implementing his decision, school and community ave been able successfully to overcome the initial, notional reaction which followed the order in some ties. The importance of the factor of time cannot be phasized, for although buildings can be altered and moved on schedule, the attitudes and feelings of specially on a matter so vital as the education of their need time to adjust.

ONCERNS OF IMPLEMENTATION

cational Problems

specially alarming to the School Board of Broward Florida, to contemplate that a judicial decision made Orleans might have the effect of subverting recent efforts of the whole school system to reorganize its

instructional program in a way to provide a continuous and effective learning experience for all students. Tremendous amounts of money, time, and effort have been invested in teacher training, materials development and experimentation with innovative uses of space and time within the school day.

These massive efforts have resulted in a break-through in education organization which promises to effect great strides in educational achievement countywide. Careful planning has guaranteed that no disruption of this progress will occur in the implementation of Judge Cabot's decision; however, if school pairing is to be forced on our school communities to meet the demands of one definition of a unitary school system time and effort have been wasted and the promises to our children will remain unfulfilled.

The essential cindition of school pairing by grade levels will work in direct opposition to the reorganization of our school program which is already under way. All of these plans have been formulated seeking only to provide the best possible and most appropriate education for each child considering him only as an individual and not as a racial statistic. An essential part of a continuous individualized program is the gradual reduction of grade level barriers which can hinder student progress.

A court decision which requires segregation of students into fixed grade levels without concern for their individual needs is the result of an impaired vision which cannot discriminate the needs of an individual as an individual.

Clustering or pairing under all the court-ordered plans presented, causes a conflict in the educational continuum for the student, e.g., adjusting to a traditional program in one school, the student is then required to adjust to a flexible type program the next year.

The possible loss of the kindergartens in the affected schools because of grade assignments would be another educational loss.

Facility Problems

Relocating portable building to effect the changes.

Relocate the furniture to accomodate the size of the students.

Renovation of facility to accomodate the new age group housed in the facility, i.e., chalk boards, washrooms, and drinking fountains.

Relocate the instructional materials to correspond to the program.

People Problems

Reorientation program for the community, parents, teachers to gain reacceptance and renewed cooperation in implementing the plan.

Family adjustment to children in as many as three elementary schools with a variation in opening and closing times for each. The family readjusts to the loss of the services of the older children in supervising the younger ones in going to and from school, only to find that they must now belong to threee P.T.A.'s.

Program variation between paired schools minimizes the effectiveness of family involvement in assisting each other with school work.

Many teachers will require additional inservice training in order to utilize effectively the new instructional environment into what they have been reassigned. This disruptive effect on

the teachers will carry over to their interaction with students.

Already successfully integrated situations are destroyed, and may never be rebuilt, and the new ones required take at least as long to build as the old ones did.

Safety Problems

The clustering has not considered the time, effort, and money expended by the various communities and agencies in providing sidewalks, traffic control, crossing guards, and the marking of safety lanes required for the safe movement of students to their presently assigned schools. In addition, nine student crossings will have to be constructed over Interstate I-95, and two crossings over the Sunshine State Parkway. Construction work on I-95 presents additional problems.

Transportation Problems

Lack of trained drivers and substitute drivers.

Bus routing is circuitous, causing riding times to be unnecessarily long for the younger students.

New transportation equipment cannot be obtained, thus adjustments must be made in timing routes and school opening and closing.

DISCRIMINATORY ASPECTS AND CONCLUSIONS

Discrimination

A careful study of the Court's plans reveals it to be discriminatory in several ways. In the first place, the schools being di-

ected to pair are located within the central and more densely opulated areas of the county. Residential areas near the ocean nd in the growing western section of the county where a pre- lominance of upper-middle class white families live remain elatively unaffected. It would be difficult not to interpret this most recent court order as discriminatory in favor of these more affluent areas of the county.

In addition, any court order directing a specific reorganization of schools is discriminatory against a local community which has a unique history and characteristics of which a remote panel of judges can be only statistically aware. It is presumptuous to think that the judiciary can protect the rights of all communities before the law if it presumes to prescribe particular procedures for desegregation in the wide diversity of communities that constitute America. When judges assume the prerogatives of locally appointed school administrators, they misconstrue their proper role as impartial interpreters of the law.

In the present instance, the decision of the judges of the Fifth District Court of Appeals not only confuses the role of the judiciary and is, in effect, discriminatory against a segment of the community of Broward County—but even more alarmingly it destroys the concept of the elementary school which is not a local institution, but a national one. Should the pairing problems which have been ordered in Broward County be equally required throughout the United States, it would have the effect of subjecting the public school system to the judiciary and thus destroying it as a free American institution.

Review

The administrative and educational problems have been enumerated in detail, but demand repetition here to provide

concise reviewing of the problems. Referring to any one of the clusters, they contain people, young people, one-sixth of whom are going to school for the first time this fall. They contain the teaching staffs which have been assigned for almost four months.

It is unthinkable; it is amazing, that anyone could interpret this as a situation that could be completely redirected as suddenly as the court demands. The more information one gets from those who are familiar with the schools, streets, highways, and the people the more the impracticability of a headlong rush into implementation becomes apparent. The implementation of decision on student and teacher reassignment is overwhelming. The preparation of the facility for different students and the accumulating of instructional materials for the grades assigned presents an ardous logistics problem. All of these compounded with problems of transportation, safety, and community relation makes unreasonable the implementation of the order in the manner prescribed.

The additional financial burden of accomplishing these changes would put a strain on the already strained financial condition of the system. Implementation as required would demand the expenditures of resources which could otherwise be directed towards the implementation of a desegregation which the community, parents, students, and educators had planned in good faith, worked for in good faith, and were going to implement in good faith.

The conclusion can be only that cluster/pairing using only statistics is educationally, logistically, and economically unsound.

CERTIFICATE OF SERVICE

This is to certify that copies of Brief of Amicus Curiae were served upon each of the attorneys named below by depositing the same in the United States mail, postage prepaid on this 4 day of September, 1970.

QUESTIONS ADDRESSED

al Balancing and Bussing Required or Permitted Constitution?

ace Be the Prime Consideration in School Assign-

HE INTEREST OF THE AMICI CURIAE

brief is filed on behalf of David E. Allgood, his father, Lloyd C. Allgood, and others, here-ferred to as Concerned Citizens of Norfolk, efendant-intervenors in the Norfolk, Virginia, egregation case *Beckett, et al.* v. *The School*

Board of the City of Norfolk, Virginia, et al., now on appeal to the Court of Appeals for the Fourth Circuit. These defendant-intervenors are a class consisting of Norfolk school children and their parents. Most of the children were born after the 1954 *Brown* decision; many of the children are entering for the first time a school system in a state that formerly had legally segregated schools. The Concerned Citizens of Norfolk are both black and white.

The order of the district court in the Norfolk school case, according to the findings of fact contained therein, arbitrarily busses Norfolk children, many living within walking distance of a school which can accommodate them, to a distant school against their will merely to place them with children of another race.

In the present case, the children of Charlotte and Mecklenburg County, North Carolina, are under court order which affects them in the same way as the children of Norfolk are affected. The decision in this case will determine the outcome of the Norfolk case. This brief is filed with the consent of the parties to assist the court in reaching a decision that will not deny equal protection of the law to the Charlotte and Mecklenburg County children or the Norfolk children and one that will not require these children to attend a school under a plan not required by the Constitution.

ARGUMENT

I—THE FACTUAL SITUATION AND THE COURTS' RESPONSE

To describe the racial composition of Charlotte and Mecklenburg County is to describe the racial composition of Norfolk, Virginia; Atlanta, Georgia; Washington, D. C.; and every other large city or metropolitan area in the country with significant numbers of

oth blacks and whites. Each has black sections, white ections, and transitional sections. Because the white ections initially are relatively large in area they are ipt to be a considerable distance from the black areas. Historically, but particularly in the past ten to fifteen years, the black sections have grown, the transitional sections have turned black and the white sections have become transitional then black.

Even though these facts have been present in all of the city school cases, each District Court and each Court of Appeals has come up with a different set of rules for desegregating the schools. This has been justified by holdings that each case rests on its own facts. A look at what has happened within the past six months shows this is not accurate. In the present case the District Court set racial balancing as the goal and ordered into effect the plan that came closest to achieving this. The District Court in the Norfolk School case has ordered racial balancing to the extent permitted by available transportation. The District Court in Richmond, Virginia, has ordered racial balancing for the 1971/72 school year. The District Court in Roanoke, Virginia, has rejected all plans that use bussing solely to achieve racial mixing.

These widely different decisions have not been the result of different factual situations in these cities. They have been the result of different interpretations of the rulings of this court.

We have not had the lower courts experimenting with different desegregation tools and different factual situations in an effort to eliminate dual school systems. We have had the lower courts experimenting with the meaning of desegregation and the meaning of "unitary school system." The need for definitions, for objective

standards, is critical. Disruption and litigation will continue and grow until such standards are established.

Most lower courts have taken the view that *regardless of any other factors* a school system is not desegregated if some of its schools contain all or almost all black pupils or some of its schools contain all or almost all white pupils. These courts have ordered bussing to eliminate schools of all black pupils and schools of all white pupils.

If this court should decree that each school district must take all feasible steps to racially balance its pupils then we would have a fairly objective standard by which school systems could be judged. We believe, however, that such a solution or standard necessarily involves insurmountable constitutional and practical objections.

II—THE CONSTITUTIONAL AND PRACTICAL OBJECTIONS TO RACIAL BALANCING AND BUSSING

[A] A DENIAL OF EQUAL PROTECTION OF THE LAWS.

The Court has ruled that in order for children to have equal protection of the laws, no government must effectively exclude any child from any school because of his race or color. Racial balancing, however, the goal set by the lower courts, does just this. Under any city racial balancing plan, many black and white children who live within walking distance of a school which can accommodate them will be required to ride buses to distant schools solely because of their race. They will not be allowed to attend the school closest to their home solely because of their race. This effectively excludes many from their neighborhood schools solely because of their race. It is discrimination and, as such, a denial of equal protection of the laws. It is the very thing outlawed in *Brown* v. *Board of Education,* 347 U.S. 483, 99 L.Ed. 1089, (1954).

The avowed purpose in the racial-balancing-bussing schemes is equal educational opportunity. It cannot be concluded that this will be the result unless as a matter of law (since there is no evidence on the subject) it is concluded that schools with all black pupils will be inferior to other schools regardless of any other factors which may be present.

Scores on learning, progress, or intelligence tests of black pupils attending all black schools are significantly lower than the national average. It is claimed that this proves the inferiority of schools with all black pupils and their lack of equal educational opportunity. This would not be true, however, unless each child taking these tests entered a school system with the same motivations and the same level of learning as all other children. This is not the case. Much can and should be done to raise the general educational level of the culturally-deprived but this is not a Constitutional mandate. Schools can and should have faculties chosen without regard to their color. If appropriate, such faculties may be trained to meet the special needs of pupils such as culturally-deprived children. Interscholastic activities, athletic, academic, and social, should be conducted in a nondiscriminatory manner. School zone lines should be drawn in a nondiscriminatory manner. These steps effectively desegregate schools regardless of the color of pupils, without depriving any of their constitutional rights. They will provide the equal educational opportunity required.

Exactly what an equal educational opportunity entails should be given serious consideration by this court for this is involved in all questions now presented in the school cases. It does mean that each child must be given the same *opportunity* to learn. Attempts to do more than this (such as giving culturally-deprived children

the opportunity to acquire such motivation, learning, and other factors as will place them on the same footing as others except for basic intelligence) through racial balancing and bussing, do not equalize educational opportunity, but impinge upon rights of others. The ends sought do not justify or require these means.

[B] THERE IS NO CONSTITUTIONAL MANDATE TO RACIALLY BALANCING OR BUS.

This court has held that the Constitution requires a unitary school system, one in which no child is effectively excluded from any school because of his color. This court has held that all vestiges of the dual school systems must be eliminated so that there are no longer black schools or white schools, but just schools. This court has approved desegregation plans ordered into effect by District Courts when such courts have found discrimination to exist. These previous holdings of this court do not constitute a mandate to racially balance schools or even to make reasonable attempts to do so. These holdings do not require bussing solely to mix pupils. They have been so interpreted, however, which makes it imperative that these questions now be answered.

The Constitution is and must be color-blind. It is the only way that every person can receive the equal protection of the laws. Justice Marshall, then representing the NAACP, in his brief and in oral argument before this court in *Brown* v. *Board of Education, supra,* so stated. This is the premise upon which the *Brown* decision rests.

[C] RACIAL BALANCING AND BUSSING ARE NOT REASONABLE.

Even though the term *reasonable* is one familiar to the law, its meaning varies so from person to person, lawyer to lawyer and court to court, it has no real sig-

nificance. In spite of this a few lower courts (notably those in the fourth circuit—at the direction of the fourth circuit) and certain sections of the U. S. Government have adopted a desegregation policy of reasonableness. In practice this means that a school district must do everything reasonable to racially balance its schools including rezoning, bussing, pairing, grouping and relocating schools. It is submitted that all bussing for racial reasons is unreasonable, that all rezoning for racial reasons is unreasonable and that all other "tools" when employed solely for racial reasons are unreasonable.

It has been pointed out quite correctly that all these "tools" have been used in the past for valid educational reasons and also for maintaining segregated schools. This is said to justify their use to mix colors. Certainly use of such tools for valid educational purposes is reasonable and it may result in mixing of pupils. Unless such use, however, is tied to valid educational purposes (other than mixing, if this be one) those affected will consider the use unreasonable and respond accordingly, as they have in the past. Reasonableness cannot be determined in a vacuum. It must be determined with regard to those affected and their response. It has been clearly shown by the Coleman Report and all other studies that the use of these tools solely to mix the races is not generally accepted and, where employed, the middle class (white) child does not long attend the school assigned. Unless this sad fact (of white or middle class flight) is ignored, reasonableness must rule out the use of such tools solely for mixing different colored pupils.

III—NEIGHBORHOOD SCHOOLS

In a concurring opinion in the Norfolk school case, *Brewer, et al.* v. *The School Board of the City of Norfolk, Virginia* C.A. 4th Cir. (June 22, 1970), Judge Bryan stated:

". . . I express the belief that the expertise of the Board and the seasoned judgment of the District Court can formulate a design — not impinging Brown—consisting of ungerrymandered neighborhood schools supplemented by freedom of choice and other pertinent factors . . . .

"Accordingly, on account of the peculiar layout of residential Norfolk, I think the neighborhood school plan there would be altogether valid if supplemented by the freedom of choice privilege and provision for transportation at the expense of school authorities, wherever transportation is needed to make the schools accessible to the neighborhood pupils or to those exercising their freedom of choice of other schools . . ."

This is the prayer of the Concerned Citizens of Norfolk and of concerned citizens everywhere. As we previously pointed out, the residential pattern in Norfolk (with regard to race) is basically the same as in every other city or metropolitan area with significant numbers of both races. A neighborhood plan such as this effectively excludes no one from any school because of his race. It eliminates black schools and white schools. As late as 1963 in the Norfolk school case, the NAACP was asking the court for just such a school plan. It appears that throughout the fifties and the early sixties this was the prayer of the NAACP in all school cases. If such a plan was constitutional during those years, it is constitutional now.

Opposition to neighborhood school plans is based upon the fact that such plans do not eliminate schools with only black pupils and schools with only white pupils. It is contended that the placement of schools, discriminatory housing and zoning laws, and other gov-

rnmental acts caused racially segregated housing patterns which perpetuate school segregation under neighborhood plans. It is further contended that when white children are not in an obvious majority status in a school (which will occur in any neighborhood plan) they will gradually desert the school.

We do not believe such objections are constitutionally sound. Certainly there will be schools with only black pupils and schools with only white pupils. Any constitutional objection to these can be easily eliminated, however, by the nonracial assignment of teachers and administrative personnel and by nondiscriminatory interscholastic activities.

If governmental action has caused racially segregated housing patterns, ungerrymandered school zones do perpetuate dual school systems. In the present case the district court has found as a fact that segregated housing patterns were the result of governmental action. The similarity between the housing patterns in Charlotte, Mecklenburg County and those in northern cities was declared to be more apparent than real. Such a finding must be challenged for it ignores one of the cardinal precepts of the law, that of proximate cause. Experience throughout the entire country establishes without any doubt that most neighborhoods will be racially homogeneous regardless of governmental action. This fact effectively eliminates governmental action as the cause. In the Norfolk school case, *Brewer* v. *The School Board of the City of Norfolk* 308 Fed. Supp. 1274, 1303, (1969) this was recognized by the district court which found as a fact in similar circumstances that governmental action did not play a significant part in the segregation of neighborhoods.

During the past few years all discrimination in laws relating to housing has been struck down. Laws and regulations have been put into effect which actually severely discourage private discrimination in the sale and rental of housing. The location of all new schools has been under the control of the courts for the past few years. As a result, any family wishing to move knows that it will not be limited by race in choosing a new location. Further, no one can point to any particular school and say that it would not be in its present location if the school district were all one color. *Nevertheless, objections such as this to the neighborhood plan are met by a fairly administered majority to minority freedom of choice provision.* Freedom of choice has been struck down by this Court only when there has been a finding that it was administered unfairly (*Green* v. *County School Board of New Kent County,* 391 U.S. 430, [1968]). This suggests, and it is certainly true, that the success of any freedom of choice plan depends on it being administered fairly without discrimination, *not upon it mixing any particular number of different colored bodies.* There well may be only a few transfers in any freedom of choice plan. Not surprisingly, most people wish their children to go to school with those who are from backgrounds similar to theirs. If they have a constitutional right to go to school with those of another color, must they be *forced* to exercise it?

IV—WHITE FLIGHT

Most important to any decision regarding the method of desegregation (or its meaning) is the fact that "*de jure* integration" brought about by racial balancing and bussing, does not work. The refusal of white and middle-class families to send their children to schools where their race and class does not predominate is well documented. The most dramatic example is found in

the District of Columbia. In 1954 white pupil enrollment was 39 per cent of the total (about 40,000 white pupils). Since then an ambitious program of integration (as opposed to desegregation) has been undertaken. Pupil achievement in the District, which was close to the United States norm in 1954, dropped to a point far below the United States norm in 1969. Although total student enrollment rose, the number of white pupils fell to 5.6 per cent of the total in 1969 or less than 8,500 pupils out of a total of about 149,000. A study of individual schools in the District shows that when black pupil enrollment approached 30 per cent in a school, the percentage rose to 75 per cent in about four years and quickly thereafter the school had all black pupils. Over 99 per cent of the District's black pupils attend schools where they are in the great majority.

Atlanta, Georgia, did not start its school desegregation until 1960. Its experience has been the same as Washington's. In 1960, about 60 per cent of total pupils enrolled were white. In 1970 this fell to 35 per cent. At the present rate of change, Atlanta schools will have about 90 per cent black pupils in seven to ten years. New York City has had a similar experience following its school board's requirement of racial balance.

Other cities faced with the same school situation are experiencing the same change. If the present *"de jure* integration" policies continue, our large cities soon will become all black.

The net result of all this will be inevitably the destruction of confidence in public education and the erosion of the tax base upon which all school systems depend. We have already seen the beginning of this in thousands of private schools that have sprung up and are flourishing. It is now the rule rather than the

exception for school bond issues to be defeated in referenda throughout the country. This will be the end of meaningful education for most of this country's blacks.

V—THE CIVIL RIGHTS ACT OF 1964

It was within the power of Congress, specifically granted by the 14th Amendment, to enforce the Constitutional mandate to desegregate the schools. It would be most unreasonable if this power did not include the right to define terms and to set out procedures to be followed and to be avoided. This was done in the Civil Rights Act of 1964. Desegregation does not mean racial balancing and the Act so states. Bussing is neither reasonable, required nor constitutional and the Act so states. This Act can and should be given effect as an exercise of Congress's power to enforce the 14th Amendment.

CONCLUSION

The Constitutional mandate to desegregate schools, to abolish dual school systems and all vestiges of it is met when school districts are contiguous to the schools; when zone lines are drawn in a nondiscriminatory manner without regard to race; when faculties are assigned to schools without regard to race; when interscholastic activities, academic, athletic, and social, are conducted without regard to race; when, in those school districts that have Government-imposed segregated housing patterns, there is a majority to minority transfer provision; and where deviations from the above are for valid educational reasons only. This plan will not mix enough different colored pupils to suit many but it is the only plan that meets the Constitutional test of equal educational opportunity and will not completely destroy the public educational system in this country. It is the only plan that will assure to all the equal protection of the law.

I.

INTRODUCTION

The Commonwealth of Virginia, because of the immediate effect that the decision in this case will have on many thousands of its citizens, requests the Court to consider its views outlined in this brief. It seeks modification of the opinions of both of the courts below and an expression of principles that will guide all courts throughout the nation in this most difficult area of basic human relationships.

II.

THE INTEREST OF VIRGINIA

In Virginia, segregation by race in the public schools was required by constitution and statute prior to 1954. In fact, one of the cases decided here under the style of *Brown* v. *Board of Education*[1] came to this Court from a Virginia locality.[2]

It would be erroneous to assert that Virginia localities welcomed *Brown I* and began at once to put into effect the remedial steps required by *Brown II*[3]; in most places they did not. There was, instead, intense public opposition and much delay. As a result, litigation arose in many communities.[4] The march toward what more recently has been termed

[4] *See, e.g., Thompson* v. *County School Bd.*, 144 F. Supp. 239 (1956), *aff'd sub. nom School Bd.* v. *Allen*, 240 F.2d 59 (1956), *cert. denied*, 353 U.S. 910, 911 (1957), *opinion supplemented*, 159 F. Supp. 567 (1957), *aff'd* 252 F.2d 929 (1958), *cert. denied*, 356 U.S. 958 (1958), *injunction dissolved*, 204 F. Supp. 620 (1962); *Daniels* v. *School Bd.*, 145 F. Supp. 261 (1956); *Atkins* v. *School Bd.* 148 F. Supp. 430 (1957), *aff'd* 246 F.2d 325 (1957), *cert. denied*, 355 U.S. 855 (1957); *James* v. *Almond*, 170 F.Supp. 331 (1959), *appeal dismissed*, 359 U.S. 1006 (1959).

a "unitary" system of public schools proceeded inexorably in Virginia but, for a decade, it was an unwilling march prodded by the courts of the United States.

It is now fair to say that Virginia localities[5] are attempting in good faith to comply with the mandate of the Equal Protection Clause. But the courts have failed to make it clear exactly what compliance entails. The dual system must be replaced by a unitary school system,[6] but how this is to be accomplished is still far from apparent.

The result has been a chaotic condition in several of Virginia's school systems. Two of its largest school divisions, as the local systems are called, are located in Richmond and Norfolk, Virginia's two largest cities. Litigation affecting both of these cities has produced orders in August of this year substantially rearranging school attendance areas and inevitably requiring extensive pupil busing.[7] This has resulted in major disruption of public education and confusion among white and black parents, students, faculty and staff; it often has led to resentment and even fear.

The educational process is difficult enough without such disruption. The time has come to think first of education and the whole body of children to be educated. That, in our view, can be accomplished only by the establishment by this Court of the parameters within which school officials are to act and by which their action is to be judged by the courts.

The factual situation existing in Charlotte, North Carolina, presents certain striking similarities to the situations presented by Norfolk and Richmond. All three cities are

---

[5] In Virginia local school boards, pursuant to the State constitution, have the primary responsibility to operate the public schools.

[6] *Green* v. *County School Bd.*, 391 U.S. 430, 438 (1968); *Alexander* v. *Holmes County Bd. of Educ.*, 396 U.S. 19, 21 (1968).

[7] *Bradley* v. *School Bd.*, Civil Action No. 3353 (E.D. Va., Aug. 17, 1970) (Richmond); *Beckett* v. *School Bd.*, Civil Action No. 2214 (E.D. Va., Aug. 27, 1970) (Norfolk).

localities where, prior to 1954, segregation by race was required by law. In all three, the percentage of black students in the school population is significant, the 70% white and 30% black ratio of Charlotte becoming 60% white and 40% black in Norfolk and reversing to less than 40% white and more than 60% black in Richmond.

Plans proposed by HEW and others presented by the Norfolk and Richmond School Boards were rejected because, the courts said, racial imbalance was not eliminated in sufficient degree.[8] That result obtains equally in this case from Charlotte. In each of these cases the court's solution was to require greater racial balance and, inevitably, massive compulsory busing of students.

The question in those cases, as here, was whether racial balance is an end in itself; if substantial racial balance must be achieved, regardless of other educational factors that are of significance in the situation presented, then the District Courts were right in Charlotte and Richmond and the Court of Appeals was right in Norfolk. If, as we urge, other factors are also relevant, those courts were in error.

What will be decided here is, therefore, entirely relevant in the two most critical Virginia situations. For that reason, the decision here may be determinative in Virginia. Therein lies Virginia's interest.

There are, of course, substantial points of difference between Charlotte and the Virginia cities. The difference in the racial mix has already been mentioned. This results primarily from the fact that, by and large, the Norfolk and Richmond school divisions are entirely urban rather than both rural and urban as is the case in Charlotte. Norfolk is

[8] *Bradley* v. *School*, Civil Action No. 3353 (E.D. Va., Aug. 17, 1970) (memorandum opinion); *Brewer* v. *School Bd.*, No. 14,544 (4th Cir., June 22, 1970), *cert. denied*, 38 U.S.L.W. 3522 (U.S. June 29, 1970) (No. 1753).

adjoined by two cities, Chesapeake and Virginia Beach; in them the percentage of black students is relatively small. Richmond is bounded by two counties, Chesterfield and Henrico; again their black student percentages are drastically lower than is that of Richmond. As urban systems, the two Virginia cities do not normally provide transportation for pupils. The transportation problem presented by the racial balance requirement is therefore more acute because of the lack of facilities.

A brief word may be relevant as to the Norfolk and Richmond plans that were rejected by the United States courts. In both cities, the rejected plans provide for the effective integration of all senior high schools and all junior high schools or middle schools. In both plans, the respective school boards go far beyond neutral or objective zoning plans, gerrymandering natural attendance zones in a manner designed to increase the degree of integration in the systems and to overcome the segregative effects of racial residential patterns. Both plans include a majority-to-minority transfer provision. The Richmond plan calls for "learning centers" where weekly or bi-weekly interracial educational experiences are to be provided for each child in the system who attends a school with a population 90% or more of the same race. Principles of the Norfolk plan were explicitly based on the best available social science data, including the highly regarded research projects sponsored by the U.S. Office of Education[9] and the U.S. Commission on Civil Rights.[10]

In sum, both plans adopt a neighborhood or community concept in the sense that attendance areas for elementary

---

[9] *Equality of Educational Opportunity,* Office of Education, U.S. Dept. of Health, Education and Welfare (1966).

[10] *Racial Isolation in the Public Schools,* U.S. Comm'n on Civil Rights (1967).

schools are served by one or several schools and the advantages of convenience and close school-family relationships are retained where practical. Overlaying this concept, however, is the use in each plan of all feasible alternatives to maximize integration. A number of subsidiary concepts, such as pairing, consolidation and closing of schools, are incorporated in the plans. No alternative plan was offered at any hearing which would have the effect of increasing the amount of desegregation that would result from the school board plans, short of a plan which would require compulsory massive busing to attain racial balance throughout each system.

The question before the Virginia federal courts was, accordingly, much the same as that presented in Charlotte: is racial balance a constitutional requirement? The difficulties of busing in an urban system were presented to the courts in both Virginia cases. The expense of initiation of school transportation systems, a factor not present in Charlotte, and the inadequacy of existing public transportation systems were explored. The plaintiffs nevertheless sought approval of plans requiring cross-busing, even of the youngest children. Those plans, in essence, received ultimate judicial confirmation.

Virginia opposes racial balance as a constitutional requirement. It believes that such balance must be considered; but it should not be the controlling consideration. It seems to us that racial balance alone was the determining factor in Charlotte, Norfolk and Richmond. We suggest to the Court that racial balance is not a desideratum in itself and that this Court should declare the constitutional mandate to be the best available quality of education for *all* regardless of race or color.

III.

THE ISSUE BEFORE THE COURT

The central issue before the Court is whether racial balance is an end in itself, required by the Constitution without regard to other educational considerations or other values.

IV.

SUMMARY OF ARGUMENT

A.

The Origin Of Racial Segregation Is Irrelevant

The proposition that one set of rules applies where the origin of racial segregation was *de jure* and another where the origin was *de facto* is without substance. History is irrelevant to the enforcement of a constitutional right. Racial segregation has almost everywhere received State support. Thus no racial segregation is purely *de facto*. Because the State maintains public schools, a segregated system constitutes State action. Its existence, without regard to its origin, thus raises a substantial constitutional question. The same rules must apply to non-unitary systems wherever found.

B.

Racial Balance Is Not Required

Racial balance in the schools is not a constitutional imperative. No decision of this Court has established such a mandate. It is effective neither to accomplish integration nor to improve education. Racial balance once prescribed may be outdated by population shifts before it becomes effective. The effort to attain racial balance promotes resegre-

gation and movement to suburbia. These results defeat the goal of racial balancing, adversely affect education and contribute to urban deterioration.

C.

The Highest Quality Of Education Must Be The Goal

The goal of the desegregation movement must be to achieve the highest quality of education. That has been the thrust of previous decisions of this Court. Equal opportunity is not to be measured purely by equality of resource application and racial balance; that system best conforms to the constitutional mandate that provides, through equal opportunity for every student, the highest level of achievement for all students of every race, compensating appropriately for any deficiencies that may have resulted from previous racial segregation. The court below failed to recognize that the best educational achievement for all is what the Constitution demands.

D.

The Court Below Misapplied Its Rule Of Reason

The court below unduly emphasized racial balance. It also failed to recognize the relevance of the neighborhood school and the disadvantages for all races of extensive compulsory busing. The neighborhood school has obvious social and educational advantages, particularly at the elementary level. It can be used with a number of related techniques reasonably applied, without destroying neighborhood advantages. Modern social scientists have developed many considerations that ought to be taken into account in devising the plan that, giving weight to all relevant disparities, best promotes the educational achievement of students of all races.

V.

ARGUMENT

A.

The Origin Of Racial Segregation Is Irrelevant

In its consideration of the question presented here, the Court of Appeals, in the plurality opinion, went to some lengths to determine that the segregated pattern of housing in Charlotte results from governmental action. We consider this investigation irrelevant. We consider it more than irrelevant; it may be pernicious. It could lead to one set of rules applying in one area of our nation and another set applying in another. The constitutional right at issue here should be available to all citizens without regard to the fortuitous circumstance of the racial history of the places in which they live.

An Unsound Distinction

Such an investigation presupposes that one set of rules applies where the origin of racial segregation was *de jure* and another set where the origin was *de facto*. As an example of this distinction, reference is made to *Deal* v. *Cincinnati Board of Education*, 369 F.2d 55 (6th Cir. 1966), *cert. denied*, 389 U.S. 847 (1967). There, the Sixth Circuit held that the school board has no duty to bus students ". . . for the sole purpose of alleviating racial imbalance that it did not cause . . . ." (369 F.2d at 61).[11]

First, the question is not whether the State action is limited to schools; it is a matter of State action in all phases of race relationships such as public housing and zoning. In this context, it is probable that all racial segregation in the

[11] See also *Bell* v. *School City*, 324 F.2d 209 (7th Cir. 1963), *cert. denied*, 377 U.S. 924 (1964).

United States, wherever occurring, has at some time been maintained or supported by governmental action.[12] Thus there is no such thing as *de facto* segregation that is not of *de jure* origin in some degree. The distinction purportedly made in *Deal* cannot, then, be factually supported.[13]

State Action is Inevitable

But the vice lies deeper. Public schools are creatures of the State, and a State may not continue to operate through its local school boards or otherwise a system which denies a constitutional right. Thus, a school system which denies equal educational opportunity infringes protected rights. Whether such a system was State created or State assisted or merely State perpetuated is beside the point. If it deprives children of equal educational opportunity, the Equal Protection Clause is infringed.

Uniformity of Constitutional Rights

This conclusion is not only sound doctrine but desirable public policy. If non-unitary school systems must be eliminated because they perpetuate racial segregation, they must be extirpated everywhere and not just in the former Confederate states. A constitutional right ought not to be en-

---

[12] In Appendix C to his opinion, Judge Hoffman complied a summary of governmental action in the various states. *Beckett* v. *School Bd.*, 308 F. Supp. 1274, 1304, 1311-15. See also *Racial Isolation in The Public Schools*, U.S. Comm'n on Civil Rights 245, 254-59 (1967); M. Weinberg, *Race and Place*, Office of Education, U.S. Dept. of Health, Education and Welfare (1967).

[13] See Freund, *Civil Rights and the Limits of Law*, 14 Buffalo L. Rev. 199, 205 (1964). On July 7, 1970, Ramsey Clark, former Attorney General of the United States, testifying before the Senate Select Committee on Equal Educational Opportunity, said:

"In fact, there is no *de facto* segregation. All segregation reflects some past actions of our governments."

forced in Virginia and denied enforcement in Ohio or Indiana because of the vagaries of history.

Professor Bickel has commented on this double standard. As he points out: "Outside the South . . . school segregation is massive, and has, indeed, increased substantially in recent years . . . caused mainly by residential patterns. Nevertheless, very few federal courts have tried to intervene [and] none has done so without qualification."[14]

In commenting on the incongruity of different rules issuing "out of the same federal judiciary" Professor Bickel spoke of "one binding rule of constitutional law for Manhasset, New York" and "a different rule of constitutional law for New York City."[15]

Such a situation, without precedent in constitutional doctrine, cannot be tolerated. Citizens are entitled to enforcement of constitutional rights evenly and consistently throughout the United States. The Constitution requires no less.[16]

B.

Racial Balance Is Not Required

Opponents of the school board plans insist upon substantial racial balancing in *each* school in a system. If, as in

---

[14] A. Bickel, *The Supreme Court and the Idea of Progress* 131 (1970). See also *Racial Isolation in the Public Schools, supra,* at 2-10.

[15] *Id.* at p. 133. The Manhasset decision is found in *Blocker* v. *Board of Educ.,* 229 F. Supp. 709 (E.D.N.Y. 1964).

[16] This is, among other things, the purpose of S. 4167, 91st Cong., 2d Sess. (1970), introduced by Senator William B. Spong of Virginia (and a similar bill introduced in the House of Representatives). Hearings on these bills have been held before appropriate committees in both houses. See also Sobeloff and Winter, JJ., concurring specially in *Brewer* v. *School Bd.,* No. 14,544 (4th Cir., June 22, 1970) (Norfolk).

Richmond, the overall student population ratio is 60% black and 40% white, these opponents contend that each school in the system must have substantially this ratio both of pupils and teachers.[17]

It is submitted that the racial balance concept is neither required by the Constitution nor is in the public interest. Indeed, if established as the "law of the land," its consequences could be disastrous to public education.

The Decisions of This Court

What *Brown I* required, to assure equal educational opportunity, was the elimination of racial segregation in the schools. Subsequent cases have added the affirmative mandate that dual school systems must be eliminated and unitary systems established.[18] These are the terms with which local school boards and lower courts have struggled. Some have construed them to require racial balancing; others, more perceptive we think, have recognized that this Court has never projected a mechanistic solution for a problem of such delicacy and diversity. *Brown I* states:

> "... because of the wide applicability of this decision, and because of the great variety of local conditions, the formulating of decrees in these cases presents problems of considerable complexity." 347 U.S. at 495.

When the Court came to the problem of formulating decrees, it provided substantial latitude:

---

[17] *Beckett* v. *School Bd.*, 308 F. Supp. 1274, 1276 (E.D.Va. 1969), stating the position of the plaintiffs. See Winter and Sobeloff, JJ., concurring in part and dissenting in part, in the court below in this case.

[18] *Green* v. *County School Bd.*, 391 U.S. 430 (1968); *Alexander* v. *Holmes County Bd. of Educ.*, 396 U.S. 19 (1969); *Carter* v. *West Feliciana School Bd.*, 396 U.S. 290 (1970).

> "In fashioning and effectuating the decrees, the courts will be guided by equitable principles. Traditionally equity has been characterized by a practical flexibility in shaping its remedies and by a facility for adjusting and reconciling public and private needs. These cases call for the exercise of these traditional attributes of equity power." 349 U.S. at 300.

Further along in that opinion, Mr. Chief Justice Warren recognized that there were a number of areas of consideration. He said:

> "To that end, the courts may consider problems related to administration, arising from the physical condition of the school plant, the school transportation system, personnel, revision of school districts and attendance areas into compact units to achieve a system of determining admission to the public schools on a nonracial basis, and revision of local laws and regulations which may be necessary in solving the foregoing problems." 349 U.S. at 300-01.

The approach remains unchanged. In *Green* v. *County School Board,* 391 U.S. 430 (1968), Mr. Justice Brennan said, speaking for the Court:

> "There is no universal answer to complex problems of desegregation; there is obviously no one plan that will do the job in every case. The matter must be assessed in the light of the circumstances present and the options available in each instance." 391 U.S. at 439.

See also *United States* v. *Montgomery Board of Education,* 395 U.S. 225, 235 (1969). And Mr. Chief Justice Burger has made clear his view that there are a number of areas other than (but including) transportation that must be given consideration. He said, concurring in the result in *Northcross* v. *Board of Education,* 397 U.S. 232 (1970):

"... we ought to resolve some of the basic practical problems when they are appropriately presented including whether, as a constitutional matter, any particular racial balance must be achieved in the schools; to what extent school districts and zones may or must be altered as a constitutional matter; to what extent transportation may or must be provided to achieve the ends sought by prior holdings of the Court." 397 U.S. at 237.

This Court could hardly have more clearly stated its refusal to enunciate a mechanistic rule of racial balance in every case.

Racial Balance is Illusory

The issue before this Court is whether such a rule should now be established. Those who support it argue that it has the virtue of exactitude; that it would be easy for courts to adopt and administer; and that it would put an end to the inevitable litigation resulting from the application of a less definitive rule.

We suggest that these views misconceive both the constitutional requirements and the realities of public education.

The racial mix varies widely among the cities and counties of this country. The range is from school districts which are perhaps 90% black (Washington, D. C. and Clarendon County, South Carolina[19]) to many districts which are nearly all white. The demography also constantly varies, especially within cities. The population ratio changes as citizens move to suburban areas, and white and black families

[19] See *Brunson* v. *Board of Trustees*, No. 14,571 (4th Cir., June 5, 1970).

are constantly moving within cities. Racial balance established one year would rarely be valid two or three years later.

The City of Richmond is not atypical. In 1960 the school population ratio was 55% black and 45% white. Prior to the annexation of a portion of Chesterfield County on January 1, 1970, population shifts—some perhaps related to integration, but most to the normal desire to live in suburbia—had increased the ratio of black to 70%. Annexation temporarily reversed this trend, so that the black majority was reduced to about 60%. At the opening of the present school session, it has grown to 64%. No one believes it will remain there for as much as a year.

As shown in the Richmond case, population shifts *within* the city have been equally dramatic. Many previously white areas are now all black. But despite this shifting there are in Richmond—as in scores of cities in the North and South—large areas populated entirely by blacks, with the fringes populated by the poorer whites.[20]

To impose, as urged by plaintiffs, an arbitrary percentage mixing in every school in Richmond would be as unrealistic as to impose such a scheme upon New York, Chicago, Philadelphia or Pittsburgh. Yet, if racial balance is a constitutional imperative, it is applicable to all communities at all times.

Racial Balance is Regressive

One wonders why compulsory racial balancing is advocated. It would be difficult to conceive of a more certain way to assure a return, in countless communities, to essentially separate schools—if not for whites and blacks, certainly for those in the lower income levels of both races.

---

[20] *Racial Isolation in the Public Schools, supra,* at 19-20, 31.

The shorthand term, often used critically, is "white flight." Concurring opinions below criticize this exercise of freedom.[21]

But the connotation of "white flight" misconceives the fundamentals. It is obviously true that since *Brown* the white exodus to suburbia has accelerated. It must be remembered, however, that the population movement from congested urban areas into suburban environments has long been characteristic of the American scene.[22] It antedated *Brown;* it exists throughout our country, and indeed abroad; in its genesis, it bore no relation whatever to school integration. Indeed, the desire to move upward economically and socially—so basic to the American ideal—reflects itself nowhere as strongly as in the urge for a better residential environment. Often access to a particular neighborhood school is a dominant factor in selecting a new home site.

These ambitions cannot be suppressed by court decrees. The movement from congested urban areas will continue regardless of how this case is decided. But few would doubt that it will accelerate geometrically if the concept of racial balance is enforced by law.[23] Examples of the inevitable

---

[21] See Sobeloff and Winter, JJ., concurring in part and dissenting in part in this case and in *Brunson* v. *Board of Trustees, supra,* at n. 19. White flight is, of course, an erroneous term because middle income citizens of both races are seeking suburbia.

[22] *United States Census of Population: 1960, Standard Metropolitan Statistical Areas,* Bureau of the Census, U.S. Dept. of Commerce 1-257 (1963).

[23] The trend toward private schools, especially in the South, will also be accelerated. There are some who say that the "remedy" for this is the outlawing of private schools or withdrawing of their tax advantages. But this drastic solution would scarcely be acceptable to the public generally. In addition, it would require the overruling of *Pierce* v. *Society of Sisters,* 268 U.S. 511 (1925).

resegregation[24] process are numerous, but Washington, D. C. suffices.

It is thus evident that enforced racial balance is both regressive and unproductive. It frustrates the aspirations of *Brown,* namely, the promotion of equal education opportunity; it assures in time the resegregation of most of the blacks in many urban communities. This will result in deteriorating educational opportunities both for the poorer blacks and whites who cannot afford to move.

In short, the end result is precisely the opposite of that desired; it widens the disparities between the lower and the middle-income families of both races.

The adverse economic and social consequences of resegregation, however caused, also are disquieting. Property values deteriorate; sources of local taxation shrink; all municipal services—as well as education—suffer; and—worst of all—the quality of civic leadership erodes.[25]

The foregoing results, now known from experience to be predictable, are scarcely in the public interest. They suggest the need for careful rethinking of proposals such as enforced racial balance which accelerate the process of urban deterioration.[26]

---

[24] "[A]t the critical point—whatever it is—a formerly stable state of integration tends to deteriorate, being reflected by the exodus of white pupils. At the same time that this process is going on in the schools, the exodus of white residents is also apparent in the turnover of housing to the Negroes at only a slightly slower pace." *Civil Rights U.S.A.: Public Schools North and West,* U.S. Comm'n on Civil Rights 185-86 (1962).

[25] Kerner et al., *Report of the National Advisory Commission on Civil Disorders* 220 (1968).

[26] Indeed, the integration of schools is only one aspect of the complex of problems associated with urban life. The courts are ill-equipped to deal with these problems, which lie primarily within the province of the legislative and executive branches. The time may have come, with respect to the schools, for greater reliance upon the Congress as contemplated by Section 5 of the Fourteenth Amendment.

Restructuring of Governmental Relationships

The results of enforced racial balance could be sufficiently serious to prompt demands for restructuring of federal and state relationships. The facile answer to population withdrawal from urban areas is to enlarge the boundaries of school districts.[27] But this cannot be done, either by judicial decree or federal legislation, without uprooting state constitutional and statutory provisions with respect to the autonomy and authority of local school boards and governmental subdivisions. And new and enlarged boundaries, wherever drawn, would not long contain a mobile and unwilling population.

C.

The Highest Quality Of Education Must Be The Goal

If not racial balance, what is the alternative that is compatible with the Constitution and the goal of quality education for all? We think there can be no single, inflexible rule. We start from principles settled by this Court: Racial discrimination is a denial of equal educational opportunity; dual or segregated school systems are proscribed; and school authorities have an affirmative duty to establish unitary systems. These principles must be observed and applied, not as ends in themselves but as means of achieving the educational goal. The alternative then, to simplistic racial mixing pursuant to formula, is to recognize that reasonable discretion must be allowed in the assignment of pupils and the administration of a school system so long as the foregoing principles are not contravened and the measures taken comport with the educational goal.

---

[27] See *Hobson* v. *Hanson*, 269 F. Supp. 401, 515-16 (D.D.C. 1967), *aff'd sub nom., Smuck* v. *Hobson*, 408 F.2d 175 (D.C. Cir. 1969).

That education of the best quality is the goal was clearly recognized in *Brown I*:

> "Today, education is perhaps the most important function of state and local governments. Compulsory school attendance laws and the great expenditures for education both demonstrate our recognition of the importance of education to our democratic society. It is required in the performance of our most basic public responsibilities, even service in the armed forces. It is the very foundation of good citizenship. Today it is a principal instrument in awakening the child to cultural values, in preparing him for later professional training, and in helping him to adjust normally to his environment. In these days, it is doubtful that any child may reasonably be expected to succeed in life if he is denied the opportunity of an education. . . . " 347 U.S. at 493.

It seems clear that desegregation by race is only one step along the road toward equal educational opportunity—an equal chance to obtain the best education that the particular system can provide. The goal is the best education for all; racial segregation is an impediment to be removed in striving to achieve that goal.

The best education, however, is not achieved *solely* through racial integration. In a recent article, Dr. David K. Cohen states that "three major criteria of equality seem to compete as policy alternatives: equal resource allocation, desegregation, and equality of educational outcome. . . ." Cohen, *Defining Racial Equality in Education,* 16 U.C.L.A. L. Rev. 255 (1969). But, as Dr. James Coleman, author of the famous Coleman Report,[28] has concluded, equal resource allocation plus desegregation does not necessarily result in improved educational output. He said that "[t]he result of

---

[28] *Equality of Educational Opportunity*, Office of Education, U.S. Dept. of Health, Education and Welfare (1966).

the first two approaches (tangible input to the school, and [de]segregation) can certainly be translated into policy, but there is no good evidence that these policies will improve education's effects. . . ." Coleman, *The Concept of Equality of Educational Opportunity,* 38 Harv. Educ. Rev. 7, 17 (1968). And the goal is, after all, the improvement of the effect of education.

This conclusion has received the concurrence of Dr. Cohen. He states:

> "The problem, however, is that although desegregation and equal resources are educationally salient, both seem a good deal less strategic than achievement. Judgments about the quality of students' education in America are certainly not made on a purely meritocratic basis, but students' achievement still weighs more heavily in the balance than either the degree of racial integration, or the quality of resources in their schools. The same thing is true of the standards presently employed in assessing schools' effectiveness. Equal achievement seems the most relevant standard of racial equality." Cohen, *Defining Racial Equality in Education,* 16 U.C.L.A. L. Rev. 255, 278 (1969).

Dr. Cohen concludes that the implicit assumption of *Brown I* that desegregation and proper resource allocation would result in equal achievement was an erroneous one:

> "Experience and knowledge gained since then have shown that the two standards cannot be met by the same measures." *Id.* at 280.

What, therefore, is the criterion? In Dr. Cohen's words, it is equal achievement; in Dr. Coleman's, it is educational output. What, in simpler terms, the school boards must seek and the courts must approve is the means to promote equal educational opportunity, regardless of race, in a system structured for the highest achievement.

It seems strange that this goal is not mentioned by the court below. It places no emphasis whatsoever on the quality of education. It seems mesmerized by race; it hardly seems to recognize that we are presented with an educational problem of which race is merely a facet.[29]

D.

The Court Below Misapplied Its Rule Of Reason

The Court of Appeals in the Charlotte case adopted a "test of reasonableness," saying:

> 1. "not every school in a unitary school system need be integrated."
>
> 2. "school boards must use all reasonable means to integrate the schools in their jurisdiction."
>
> 3. Where all schools cannot reasonably be integrated, "school boards must take further steps to assure that pupils are not excluded from integrated schools on the basis of race."

These views, we think, are compatible with the opinions of this Court. They do not accept the mechanistic rule of racial balance.

But we believe the Court of Appeals misconceived the application of its own test. The focus, as is evident from the rejection of the school board plans in Charlotte, Norfolk and Richmond, was upon desegregation with little or no visible concern for the object of desegregation, namely, improved educational opportunity for all students. We think that the Court below departed from an appropriate test of reasonableness particularly with respect to (i) its emphasis on

---

[29] The District Judge in the Norfolk case commented correctly that the word "education" does not even appear in the opinion of the Court of Appeals reversing his general approval of the Norfolk School Board's plan. *Beckett* v. *School Bd.*, Civil Action No. 2214 (E.D.Va., Aug. 14, 1970).

extensive compulsory busing and (ii) its misappreciation of the educational relevance of neighborhood or community schools.

Compulsory Busing

There is nothing inherently wrong with transporting school children where this is necessary. In every rural school district busing is a necessity. In such districts in the South it was used for decades to implement segregation. In the Charlotte case, involving a large urban-rural school district, there was substantial necessary busing before the District Court undertook in effect to impose racial balance by extensive cross busing.

Even in an urban district some busing may be appropriate, contributing both to integration and sound education. The problem, one so familiar in law, is one of degree and reasonableness. A notable example of unreasonable busing in pursuit of racial balance is that ordered in *Crawford* v. *Board of Education*.[30] In that case the Los Angeles school board was ordered to establish a rigorously uniform racial balance throughout its 711-square-mile district, with its 775,000 children in 561 schools. This order, if upheld on appeal, would require the busing of 240,000 students at a cost of $40 million for the first year and $20 million for each year thereafter with the result that the deficit of $34-54 million already confronting the school board would be increased by these amounts.[31]

---

[30] No. 822, 854 (Cal. Super. Ct., Feb. 11, 1970).

[31] N.Y. Times, Feb. 12, 1970, at 1, col. 5 (city ed.). President Nixon, in his statement of March 24, 1970, aptly states that rulings of this character ". . . would divert such huge sums of money to non-educational purposes, and would create such severe disruption of public school systems, as to impair the primary function of providing a good education." *Desegregation of America's Elementary and Secondary Schools*, Weekly Compilation of Presidential Documents (March 30, 1970).

The preoccupation with "racial mixing of bodies"[32] has often caused the overlooking of the social and educational disadvantages of busing, especially at the elementary level.[33] It removes a child from a familiar environment and places him in a strange one; it separates the child from parental supervision for longer periods of time; it undermines the neighborhood or community school, so desirable at the elementary level; and it adds to already strained budgetary demands.

These are the considerations which have prompted the Congress, reflecting overwhelming public sentiment, three times to record its opposition to enforced busing merely to achieve racial balance.[34]

The Neighborhood School

We think that the Court below also largely ignored the educational advantages of the neighborhood school at the elementary level. The geographic neighborhood is the most common unit of organization of urban elementary public schools.[35] The neighborhood unit provides for ease of access to schools for students, minimizing costs and time of

---

[32] In his memorandum decision of August 14, 1970, attempting to implement the mandate of the Circuit Court, Judge Hoffman commented "that the benefits of sound education have now been clearly subordinated to the requirement that racial bodies be mixed." See also *Beckett* v. *School Bd.*, 308 F. Supp. at 1302.

[33] A disturbing aspect of seeking racial balance at any cost is that children too often are treated as pawns to produce sociological changes that are related more to other factors, such as housing, than to education.

[34] Civil Rights Act of 1964, 42 U.S.C. § 2000c(b) (1964); Elementary and Secondary Education Act of 1965, 20 U.S.C. § 884 (1966), amending 20 U.S.C. § 884 (1965); Education Appropriations Act of 1971, P.L. 91-380, 91st Cong., 2d Sess., §§ 209, 210 (1970).

[35] New York City's current experiment in decentralization is further evidence of the vitality of the neighborhood or community concept. N.Y. Times, Sept. 13, 1970, at 1, col. 2.

travel to and from school, and thus maximizing the potential extracurricular role schools can play in the lives both of parents and children. These factors, along with the associational benefits of attending school with friends which, particularly for elementary school children, ease the psychological stress of initial adjustment to school, have led such a noted educator as James B. Conant, former President of Harvard University, to the conclusion that "[a]t the elementary school level the issue seems clear. To send young children day after day to distant schools seems out of the question."[36]

The quality of a community's education depends ultimately upon the level of public suport.[37] A willingness to pay increased taxes and to vote for bond issues can evaporate quickly in the face of enforced busing and dismantling of neighborhood schools where such actions do not contribute to improved education for all.

Educational effectiveness also is dependent on the attitude of parents toward their children's education, and rationally configured systems of neighborhood schools play a vital role. Parental support of their children's schooling normally reinforces the efforts of their children's teachers in substantial measure;[38] to the degree that schools can involve parents with their children's education as such,[39] or broaden the parents' own educational horizons,[40] this end is served. Community schools, when designed in such a way as to avoid the feelings of disaffection which attend systematic

---

[36] J. Conant, *Slums and Suburbs* 29 (1961).

[37] A current dramatic example of the financial crisis in public education across the country is found in St. Louis, Missouri, where taxpayers in four suburban school districts north of the city have shut 46,000 pupils out of classes by consistently defeating school tax levies. N.Y. Times, Sept. 14, 1970, at 1, col. 3.

[38] M. Weinberg, *Desegregation Research: An Analysis* 140-41 (1968).

[39] Christian Science Monitor, Aug. 14, 1970, at 11, col. 1.

[40] C. Hansen, *Danger in Washington* 81 (1968).

ghettoization, whatever its origin, foster such an active parental role because of their very accessibility.

Further, the accessibility of community schools minimizes the cost of school transportation for students. Provision of substantial transportation at public cost solely for the purpose of attaining racial balance diverts resources which might otherwise be used, in a neighborhood scheme consistent with students' constitutional rights, for more directly constructive educational purposes. Where the cost of such transportation is borne privately by the families of students—assuming that public transportation facilities are adequate to cover the necessary specialized routes—it strikes regressively, imposing a heavier burden on the poor than on the affluent.

This Court in *Brown II*, in suggesting "revision of school districts and attendance areas into compact units to achieve a system of determining admission to the public schools on a non-racial basis"[41] as a means of complying with the equal-educational-opportunity requirement of *Brown I*, implicitly recognized the advantages of the community school system.[42]

The unique educational advantages of the neighborhood school system, where it is administered in a manner consistent with the Equal Protection Clause, result in the accomplishment of the ultimate goal of that clause: the best possible education for all children. Pursuit of absolute racial balance in major metropolitan areas through the use of extensive busing of students deprives the school system of the singular advantages of the neighborhood concept, and in at least this respect thwarts the attainment of equal educational opportunity.

---

[41] 349 U.S. at 300-01.

[42] These advantages were well expressed in *Deal* v. *Cincinnati Bd. of Educ.*, 369 F.2d 55 (6th Cir. 1966), *cert. denied* 359 U.S. 847 (1967).

It has frequently been pointed out that neighborhood school systems have, on occasion, come into existence for the purpose of fostering racial segregation.[43] But this fact should no more prejudice consideration of the intrinsic educational merits of a racially satisfactory neighborhood school system than should these merits justify it when it is administered in a fashion which entrenches unconstitutional racial imbalance.

Other Considerations

The community school concept is capable of flexible administration: zoning, pairing, clustering, and siting of school buildings all are techniques which may be used, consistent with its advantages, and should be, when reasonable, to fulfill constitutional requirements. In addition, a majority-to-minority transfer option and specialized learning centers may be provided to ameliorate the effect of residential segregation. Techniques which destroy the advantages of the community school in pursuit only of mechanistic racial balance in the name of the Fourteenth Amendment tend to negate the very educational values in whose service they are invoked.

But these are measures that are customarily used in the racial desegregation context; they are by no means all of the factors to be taken into account in devising a plan designed to promote educational achievement for all students to the utmost.

Modern social scientists have developed studies that take into account a number of other factors. These include a determination of the racial mix that will maximize educational achievement, development of plans that maximize use of physical facilities, teachers and staff, avoidance of

[43] See, *e.g.*, *Racial Isolation in the Public Schools*, U.S. Comm'n on Civil Rights 252 (1967).

resegregation and "white flight," consideration of the desirable socio-economic mix, preservation of the cultural uniqueness and autonomy of the individual student, giving effect to positive and realistic educational and vocational aspirations and other relevant factors of equal importance."[44]

Such evidence is sound and available.[45] Plans based on such studies will result in greater educational achievement. Education is not based on race alone. That plan is the best plan that provides the best opportunity for educational achievement for all students. In the preparation of such a plan, racial imbalance is a consideration, but it is not the controlling factor.

It is in this light, we conceive, that the rule of reason postulated by the court below should be applied. The rule of reason makes little sense when it is couched in purely racial terms. The creation of racial balance by massive busing may eliminate racial segregation, but it may harm the general level of educational achievement. What schools need desperately is to improve that level. This Court should provide a more realistic approach to achieve that end.

VI.

CONCLUSION

The Court has the opportunity in this case to resolve the principal issues which have confused and divided the lower

---

[44] See, *e.g.*, M. Weinberg, *Desegregation Research: An Analysis, supra; Equality of Educational Opportunity, supra.*

[45] Evidence of this nature was presented in the Norfolk case by Dr. Thomas F. Pettigrew and disregarded without mention by the Circuit Court. But Dr. Pettigrew's evidence in the Norfolk case is substantially the entire basis for the opinion of three of the judges in the *Clarendon* case. See Craven, J., concurring and dissenting in *Brunson* v. *Board of Trustees,* No. 14,571 (4th Cir., June 5, 1970). If testimony of this character may be used as a basis for decision in one case, it clearly deserves consideration in another.

courts and school authorities. We respectfully suggest, for the reasons that we have stated, the following:

(i) The purported distinction between *de jure* and *de facto* racial segregation should be rejected. It can be supported neither factually nor consistently with constitutional principles. The right to equal educational opportunity must be uniform throughout the United States.

(ii) The concept of racial balance is not a constitutional imperative. If pursued as an end in itself, rather than as a factor to be considered, this concept accelerates the process of resegregation and frustrates the attainment of sound educational goals.

(iii) The Constitution does not delineate the extent to which the transportation of pupils may or must be provided to achieve and maintain a unitary school system. Nor does the Constitution prescribe the extent to which school attendance zones may or must be altered for this purpose.

(iv) The principles settled by this Court must be observed: racial discrimination is a denial of equal educational opportunity; dual or segregated school systems are proscribed; and school authorities have an affirmative duty to maintain unitary systems. But these principles must be applied as the means of maximizing the educational opportunity for all students. A reasonable discretion must be allowed school authorities in assigning pupils and administering a school system so long as these principles are not contravened and the measures taken comport with the educational goal.

(v) School authorities should give appropriate weight to the educational advantages of the neighborhood or community schools and the disadvantages of extensive cross busing in urban areas, especially for young children.

(vi) In devising plans to assure a unitary school system, all relevant techniques may be considered, including the realignment of attendance zones, the flexible utilization of school facilities, and the assurance of opportunities for interracial learning experience.

(vii) Perhaps the overriding need is to shift the emphasis from a mechanistic approach of integration as an end in itself to the goal desired by every citizen: Equal educational opportunity in a school system structured for the highest achievement by all students.

It is not too much to say that public education is in a state of serious disarray, with increasing evidence of eroding public support. The problems and confusion relating to integration are a contributing though not the only cause. The time has come for a clarification of the principles to be applied by the courts. We respectfully submit that those outlined above are consistent both with constitutional requirements and the urgent need for improved education.

IN THE

Supreme Court of the United States

OCTOBER TERM, 1970

No. 281

JAMES E. SWANN, et al,

Petitioners,

v.

CHARLOTTE-MECKLENBURG
BOARD OF EDUCATION, et al,

Respondents.

BRIEF OF RESPONDENTS

INTRODUCTORY STATEMENT REGARDING BRIEF

The briefs submitted in the companion cases Nos. 281 and 349 are identical. This statement is made so that this Court may be spared the inconvenience of a separate detailed analysis of both briefs.

Case No. 281 relates to the Petition filed by the plaintiffs for a review of the decision of the Circuit Court of Appeals

for the Fourth Circuit. Case No. 349 relates to the Cross-Petition of the defendants from the same decision. The plaintiff's Petition in case 281 was granted on June 29, 1970. Although action on the defendants' Cross-Petition has been deferred until the convening of this Court at its October 12, Term, 1970, this Court has advised that both cases will be heard on October 12, 1970, and has instructed the defendants to file briefs in both cases. The two cases have not been consolidated for briefing.

Each of the two cases involves the same school system, the same orders of the district court and Circuit Court and the same issues. In order to be of as much assistance as possible to this Court, it is prudent that one comprehensive presentation shall be made. It is for this reason that, although separate briefs are filed, their text and content are the same.

OPINIONS BELOW

The opinions of the courts below are set forth in Brief for Petitioners filed in No. 281 on pages 1 through 3 thereof.

JURISDICTION

The judgment of the Court of Appeals for the Fourth Circuit was entered on May 26, 1970. The jurisdiction of this court is invoked under 28 U.S.C. 1254(1). The Petition for Writ of Certiorari was filed in this court on July 2, 1970. On August 31, 1970, the Chief Justice deferred action on Cross Respondents' pending Petition for Writ of Certiorari and directed filing of briefs and set this case for oral argument on Monday, October 12, 1970.

QUESTIONS PRESENTED

1. Did the Court of Appeals join in the error of the trial court in rejecting the desegregation plan offered by the Board of Education where 68% of the black students would attend schools in which their race was in the minority and where the remaining 32% of the black students would attend schools having white ratios of 17% to 1% and these black students would be taught by a predominantly white faculty and further where such black students were offered more generous freedom of transfer than that offered by the customary majority to minority transfers?

2. Did the Court of Appeals join in the error of the trial court in rejecting the plan for desegregation of the 72 elementary schools prepared and offered by the Board of Education, where the plan left no all-black schools, though nine of 72 schools had white ratios of 1% to 17% and black students attending those schools would have an untrammeled right to transfer to any one of the 63 remaining elementary schools, and upon departure from elementary schools would be assured of a desegregated education during the remainder of their schooling?

3. Did the Court of Appeals join in the error of the trial court in rejecting (by the trial court's offering the Board a "Hobson's choice") the Board plan for desegregation of junior high schools where only one of 21 junior high schools would have more than a 39% black student ratio and the remaining predominately black school would house 758 black and 84 white students and have a predominately white faculty by imposing a requirement on the Board to create nine black satellite districts containing approximately 2,700 black students and assigning them to predominately white suburban junior high schools?

4. Did the Court of Appeals join in the error of the trial court in rejecting the Board plan for desegregation of senior high schools where the plan provided that no school would have more than a 36% black ratio and that each school would

have a predominately white faculty and in imposing a further requirement upon the Board that 300 black students residing in four designated grids would be bussed a substantial distance from the northwestern part of the city to a high school serving the extreme southeastern portion of the county?

5. Did the Court of Appeals join in the error of the trial court in imposing racial balances in junior and senior high schools in contravention of Title 42 U.S.C. 2000(c)(b) and 6(a)(2) (Sections 401(b) and 407(a)(2)) of the Civil Rights Act of 1964.

CONSTITUTIONAL AND STATUTORY PROVISIONS INVOLVED

This case involves the equal protection clause of the Fourteenth Amendment of the Constitution of the United States, Section 401(b) and 407(a)(2) of the Civil Rights Act of 1964 [42 U.S.C. 2000(c)(b) and 6(a)(2)].

PRELIMINARY STATEMENT

The principal question presented by the several appeals herein relates to whether or not the Charlotte-Mecklenburg public school system may retain one or more predominately black schools. If the absolutists are to prevail, then the presentation which follows is wholly irrelevant. The Court of Appeals held that no such absolute requirement exists as desegregation of the predominately black schools will be adjudged by the "test of reasonableness."

In order to answer the question, one must have an understanding of this school system. The system involves 103 schools, 4 kindergarten programs and one learning academy, which last year served approximately 84,500 students of which 29% were black and 71% were white. The system is expected to grow by an approximate 3,000 students this

school year. In comparison to other school systems in this nation, the system ranks 43rd largest.

As an urban school district, it shares the same problem of other urban school systems. Since 1954, the black student population has increased from 10,000 to 24,000 students and during this period eleven formerly all-white schools are now almost entirely black (691a). The transition has been rapid. In 1965 these eleven schools housed a 35% black student population. During the 1969-70 school year, these schools housed an 81% black population and the areas in which this transition has taken place are located generally in the older white neighborhoods. Charlotte has experienced phenomenal growth and, therefore, the older neighborhoods are primarily located near the center of the city, which serves as the base for the expanding black areas as whites on the economic move improve their position; blacks improving their position take over the white homes. This had led to the transition of schools from white to black. Today, 95% of the black students reside in the northwestern inner-city quadrant or the fringes thereof.

The Board was in the process of combating this problem by construction of schools in areas which would offer more stable desegregation, the most notable of which were Olympic High School, originally scheduled for construction in a predominately black neighborhood, and Randolph Junior High which was also scheduled for construction in a similar neighborhood (72a-73a).

Further efforts of the Board involved closing and consolidating of twenty schools; creation of a single athletic league; nondiscriminatory employment practices; substantial desegregation of school faculties with total desegregation to follow for the 1970-71 school year; cross racial assignment of principals; appointment of black professionals to ranking administrative positions; board appointment of a black member to the Board of Education; elimination of the dual bus system; nondiscrimination with respect to teacher salaries, school fees, school lunches, library books, instructional materials,

quality of school buildings, use of federal funds, course offerings and evaluation of students; merger of the black and white PTA Councils; operation of specialized and supplementary programs implemented to increase desegregation; redesigning of freedom of choice so that its only effect would increase desegregation and give racial stability to the schools; gerrymandering of attendance lines to promote maximum racial desegregation and other techniques designed to create and promote racial stability (681a-683a, 1265a-1266a).

The rural areas of the school system do not offer such difficult problems in desegregation as the races are scattered and, therefore, as with most rural systems, these schools present substantial stable desegregation (313a).

Freedom of choice has neither perpetuated nor made substantial inroads on the desegregation problem. The superintendent estimated that approximately 1,200 (565a) white students had left predominately black schools where they would have been mixed in varying degrees with approximately 16,000 blacks.

In 1957 Charlotte led the South in opening its schools to students of both races. However, it is admitted that there were few students who took advantage of this option. Consolidation of the city and county systems, the two largest in the state, occurred in 1961, creating a school system having an east-west span of 22 miles and a north-south span of 36 miles and comprised approximately 550 square miles. The City of Charlotte contains 64 square miles, making it larger than the District of Columbia. The county is nearly twice the size of the City of New York.

In 1965 a plan was devised by the Board embracing freedom of choice, rezoning and non-racial assignment of faculty which entirely abolished the former dual system under the law as then understood. That plan was approved by the district court in 1965 and by the Court of Appeals in 1966. The plan led to the abolition of all dual auxiliary programs and services, such as transportation, athletic leagues, PTA's, etc.

Consistent with racial anonymity, racial identification of students and faculty was completely removed from all school records. Because of this, during the course of this litigation, requests for racial information created a substantial burden on the school system in producing this data.

The plan proposed by the Board eliminates 8 of the 17 predominately black elementary schools, four of the five predominately black junior high schools and establishes ten senior high schools so that no high school will have more than a 36% black ratio. It reduces the number of blacks attending predominately black schools to 7,497. (Compare district court's finding of 16,000 previously). Faculties will be racially balanced.

These exemplary steps have been taken by a school board which petitioners variously label as "recalcitrant," "contemptuous," "lawless" and similar characterizations.

STATEMENT OF THE CASE

The plan for desegregation offered to the district court by the Charlotte-Mecklenburg Board of Education would place 68% of the 24,000 black students in predominately white schools and the remaining 32% would attend schools having a black ratio of 83% to 99%. No other school system of similar size and complexity in this nation has the degree and volume of desegregation offered by this plan.

The exemplary proposal of the Board was summarily rejected by the district court for the reason that this system would not be permitted to have a predominately black school. The district court therefore ordered racial balancing of the schools served by the system.

The present action was instituted in 1965 which resulted in the district court's approval of the plan then offered by the Board. The salient features of the plan related to school closings, school consolidation, freedom of choice (as suggested by *Goss v. Knoxville*, 373 U.S. 683 (1963)), rezoning, nonracial assignment of teachers, and nonracial records of students. Circuit Judge Craven, then district judge, noted:

> As a general proposition, it is undoubtedly true that one could deliberately sit down with the purpose in mind to change lines in order to increase mixing of the races and accomplish the same with some degree of success. I know of no such duty upon either the school board or the district court. The question is not whether zones can be gerrymandered for the assumed good purpose of racial mixing, but whether gerrymandering occurred for the unconstitutional purpose of preventing the mixing of races. I am unable to find from the evidence a sufficient showing of the unconstitutional purpose with respect to any school zone . . . *Swann v. Charlotte-Mecklenburg Board of Education*, 242 F. Supp. 667 (1965).

The holding of the district court was affirmed by the Court of Appeals for the Fourth Circuit in *Swann v. Charlotte-Mecklenburg Board of Education*, 369 F.2d 29 (1966).

Following the Supreme Court decision in *Green v. New Kent County*, 391 U.S. 430 (1968), and companion cases, the petitioners filed a motion for further relief alleging discrimination in teacher salaries, school plants, facilities and numerous other areas, and in addition sought further desegregation. During the course of the hearings conducted in March 1969, the district court noted that it was familiar with the fact that in this system black teachers as a group were paid higher salaries than white teachers for the reason that they had longer tenure and had more graduate education (93a).

In its order of April 23, 1969, the district court found there was no racial discrimination or inequality with reference to the use of federal funds for special aid to the disadvantaged, use of mobile classrooms, the quality of school buildings and equipment, coaching of athletics, parent-teacher association contributions and activities, school fees, school lunches, library books, elective courses, individual evaluation of students and gerrymandering (293a-302a).

The district court further noted that school location in Charlotte had followed residential development including its *de facto* patterns of segregation (305a).

With respect to the motives and judgment of the School Board, the district court found that the schools had been operating pursuant to ". . . the general understanding of 1965 about the law regarding desegregation." The Board had "achieved a degree and volume of desegregation of schools apparently unsurpassed in these parts, and have exceeded the performance of any school board whose actions have been reviewed in the appellate court decisions." The schools served by this system were "in many respects models for others", and "the rules of the game have changed and the methods and philosophies which in good faith the Board have followed are no longer adequate to complete the job which the courts now say must be done 'now'." (311a-312a).

The court then concluded:

> The school board has an affirmative duty to promote faculty desegregation and desegregation of pupils and to *deal* with the program of the all-black schools (313a). (Emphasis added)

Thereupon, the district court directed the Board to submit a plan for complete desegregation of teachers to be effective for the 1969-70 school year and to submit a plan and time table for the desegregation of pupils to be predominantly effective in the fall of 1969 and completed by the fall of 1970 (314a-315a). The plan submitted pursuant to the order of April 23 was found inadequate by the district court and submission of a new plan by August 4 was directed.

During the interim, this Court decided the case of *United States v. Montgomery*, 395 U.S. 225 (1969), which for the first time indicated limited racial ratios in faculty could be required by the courts.[1] In accordance with *Montgomery*,

[1] *In Montgomery, supra*, page 236, the court noted: ". . . Petitioners on the other hand, do not argue for precisely equal ratios in every school under all circumstances . . . . As the United States, Petitioner in

supra, the Board of Education proposed a plan for desegregation which would produce substantial faculty[2] and student desegregation for the school year 1969-70 and proposed a comprehensive computer-assisted study for the purpose of restructuring attendance lines for the year 1970-71. It was estimated that the study would require approximately six months to complete (487a). On August 15, 1969, the district court entered an order (579a) in which it noted the repudiation by the Fourth Circuit of the *Briggs v. Elliott* dictum on July 11 in *Hawthorne v. Lunenburg*, 413 F.2d 53 (4th Cir. 1969) (581a). The trial judge found that the Board had acknowledged its affirmative duty to desegregate pupils, teachers, principals, and staff members at the earliest possible date (583a) and had dramatically exceeded its goal in desegregating former all black faculties (584a). It approved the reassignment of consenting inner-city black students to outlying white schools for the school year 1969-70.[3] Further,

---

No. 798, recognizes in its brief, the district court's order is designed as a *remedy* for past racial assignment . . . . We do not, in other words, argue here that racially balanced faculties are constitutionally or legally required."

[2]The Board reported: "With reference to faculty desegregation, substantial changes have been made as indicated on Exhibit "A" (498a-502a). With few exceptions, schools having black or nearly all black students have white faculties ranging from 40 to 50 percent of the faculty of such schools. By the school term 1970-71, further faculty desegregation will be experienced." (495a).

[3]The Board proposed offering transportation to the reassigned black students and made extensive efforts to secure their acceptance of reassignment. The court stated:

> However, this part of the plan is not compulsory. Students who want to remain in the comfort of their area may elect to attend the Zebulon Vance School (Irwin Avenue) instead; alternatives also are provided for the junior high students. (587a).

In response to objections to reassignment of blacks, the district court stated:

> No legal authority is cited that the Constitution prohibits transportation of *consenting* black children from an inferior educational environment into a better environment for the

the court approved in principle the proposed restructuring of attendance lines and other factors for the 1970-71 school year, but rejected them for lack of specific detail and time table.[4] Results of the desegregation of faculties commended by the district court appears in the record (642a-649a).

In view of the fact that it was impossible to complete the computer restructuring of attendance lines within the time limited, motion was made for additional time in which to present the plan. The district court responded by presenting interrogatories to the Board and issuing its last benign statement on behalf of the Board as follows:

> Nearly six months after the original order, faculty desegregation is well along and there have been a number of substantial improvements in the stated policies of the Board, including the stated assumption of the duty by the Board to desegregate the schools "at the earliest possible date." Limited steps

---

purpose of complying with the constitutional requirement of equal protection of laws. (589a). (Emphasis added.)

The Board pointed out that it could not specify the number of students who might object to such assignments (493a).

Nevertheless, later the district court unjustly condemned the Board for not carrying out the plan as "advertised." (658a). "The performance gap is wide." (659a).

At the request of black community leaders, the Board proposed and secured a modification to permit substitution of Irwin Avenue Junior High School for the Zeb Vance school for black students exercising freedom of choice to attend a black elementary school in the inner city. The district court denied the Board the opportunity of upgrading the education for these black students by imposing restrictions on innovative programs for such students unless provided for all blacks who transfer to white schools (593a). The Board was forced to abandon innovative programs for these blacks as such programs require full student participation or segregation of black students in the white schools.

[4]The Board proposed completing the computer restructuring of attendance lines within six months or February 1, 1970 (487a). Furthermore, implementation was directed for the school year beginning 1970-71. (457a and 315a).

> have been taken toward compliance with pupil desegregation provisions of the original order . . . (601a).

Pending application for an extension of time, this Court announced its decision in *Alexander v. Holmes County*, 369 U.S. 19 (1969), and the district court held that as a result of *Alexander*, discretion to grant an extension was prohibited (667a). The district court in its November 7, 1969, order then proceeded to severely criticize the Board for not implementing its 1969-70 desegregation plan. The district court stated "the plan has not been carried out as advertised" (658a) and "the 'performance gap' is wide" (659a). It is difficult to reconcile this criticism in the face of the district court's previous defense of the right of the Board to transport consenting black students to outlying schools and in view of faculty desegregation that resulted in precisely the figures estimated by the Board (589a and 584a). The district court reversed its earlier finding ". . . Location of schools in Charlotte has followed the local pattern of residential development, including its *de facto* patterns of segregation" (305a) and substituted ". . . There is so much state action imbeded in the shaping of these events that the resulting segregation is not innocent or *'de facto'*, and the resulting schools are not 'unitary' or desegregated." The district court further found that freedom of choice had tended to perpetuate segregation by allowing children to leave schools where their race would be a minority (662a).[5] The district court noted that the school system ranked high with reference to desegregation in comparison with the 100 largest school systems, but held this to be immaterial (664a).

---

[5]The evidence clearly shows that only 1,200 white students had left predominately black schools (665a) (housing a total of 16,000 blacks). This would therefore appear to fall under the *de minimus* rule. Compare the limited number of students who sought freedom of choice and the infinitesimal effect it had on desegregation for the school year 1969-70 (635a-638a).

For reasons not understood, the attitude of the district court changed with increasing frequency to condemnation or misconstruction of whatever the Board proposed. It assumed that the Board's computer program, designed to promote stability by a 40% limitation on black student assignments, precluded white students from attending predominately black schools. Obviously, if the computer designed a school on a 50/50 ratio, the whites would soon leave the attendance district. The Board has no intention of devising attendance districts which would offer such instability. However, after the best efforts of the computer had been exhausted, those white students residing in the ultimate attendance zones populated predominately by blacks, would nevertheless be assigned to those schools. The district court simply misconstrued one step of the Board plan as constituting the final plan.

In fairness to the district court and the petitioners, the Board on October 19, 1969, gave advance notice that its plan would be unable to eliminate each all-black school (665a).[6] The district court, continuing its castigation of the Board, said the Board had "demonstrated a yawning gap between predictions and performance." (666a). The court thereupon directed the filing of a plan for desegregation ten days later on November 17, notwithstanding the fact that the Board had reaffirmed February 1, 1970, as the earliest date for presentation of a comprehensive plan.

Therefore, faced with this unrealistic time table, the Board was compelled to present an admittedly incomplete plan for desegregation (670a) and report (680a) in which the Board took a strong position for the purpose of attempting to determine the meaning of a "unitary system" and related terms. Attention is directed to the fact that the Board predictions with reference to desegregation of elementary schools was substantially accurate as disclosed by the following:

---

[6]At this point, the Board had been admonished to "deal with the problem of the all black schools" (313a).

Percentage Black Students	Projected No. of Schools Nov. 17, 1969	Board Final Plan, No. of Schools Feb. 2, 1970
0-10%	21	20
11-40%	44	43
41-100%	7	9

It would therefore appear that the Board performed as "advertised". There was no wide "performance gap" and there was no "yawning gap between predictions and performances." The court was further advised in August that the Board plan would be complete approximately the first of February 1970, and the Board performed (726a).

On December 1, 1969, the district court again misconstrued the computer instructions as being the results of a finalized plan. Although the Board proposed that each faculty would be predominately white at each school, the court seemed to take offense at the fact that there was no promise of total balance (700a). Compare *Montgomery, supra,* which countenances schools having 83% black faculties.

In response to the inquiries of the Board, the district court outlined some of the parameters of its notions of a desegregated system, which included pro rata distribution of teachers by race and that "all the black and predominately black schools in the system are illegally segregated" (711a and 714a). The district court further held that any plan should seek to reach a 71-29 ratio so that one school would not be racially different from the others though variations may be unavoidable (710a). It is believed that the absolutes of the district court's legal position began to crystalize with the order of November 7, 1969.[7] This has resulted in the

[7] In the order of November 7, 1969, and all subsequent orders, namely, December 1, 1969, February 5, 1970, March 21, 1970 and August 3, 1970, resulted in reversal of facts previously found in favor of the Board and many inferences resolved against the Board together with misconstruction of many of the facts presented to the court. The Board attempted to correct many of the findings by Objections and Exceptions thereto (1239a) and Objections and Exceptions to Findings of Fact dated August 14, 1970.

failure of the court to make any subsequent findings favorable to the Board.

The district court then disapproved the Board's plan for further desegregation and directed desegregation of faculties on a three-to-one ratio effective not later than September 1, 1970, and indicated that a court consultant would be appointed. This was accomplished by order of the court dated December 2, 1969, wherein the court appointed Dr. John Finger as the court's consultant, a witness who had previously testified on two occasions for the plaintiffs and had offered earlier desegregation plans. The order of December 1 did not suggest implementation of pupil desegregation would be advanced to a date earlier than September 1, 1970. The Board was invited to continue working on its plan (714a-716a).

The Board submitted its completed plan on February 2, 1970 (726a). The plan utilized computers to achieve a maximum racial mix of 71% white and 29% black in each school where possible by restructuring attendance lines. One hundred (100) of the 103 schools would have a racial mix, leaving only three all-white schools. Sixty-eight per cent (68%) of the black students would attend schools having less than 40% black population. Thirty-two per cent (32%) of the black students would attend nine elementary and one junior high schools which would have black ratios of 83% to 99% under the Board plan (R. Br. A-4-6, A-10). This plan reduced the number of blacks in predominately black schools from 16,197 to 7,497 and the number of predominately black schools from 22 to 10.

The plan for desegregation submitted by the Board included imposition of faculty ratios of approximately three-to-one, white predominating, in each school and proposed implementation of its plan for the school year 1970-71 in accordance with the various court orders. The Board plan would require the in-district transportation of approximately 5,000 additional students, who would qualify for such transportation under state law.

The court consultant's plan was submitted contemporaneously with that of the Board on February 2, 1970, which effectively adopted in many respects the Board's geographic zoning plan and engrafted upon it the features of pairing of distant elementary schools and creation of satellite districts in predominately black inner-city areas whose students were assigned to distant predominately white outlying secondary schools.

On February 2, 1970, the court conducted a hearing limited solely to the question of time required for implementation. It refused to hear any evidence with reference to the merits of the two plans before the court. On February 4, 1970, the Board made a motion for hearing on its plan and for the opportunity to examine the court consultant, who resides in Rhode Island and beyond the process available to the Board. In response thereto, the court permitted a short hearing severely limited as to time on the following day and declined to direct the consultant to be present for examination. The Board was compelled to submit substantial evidence nunc pro tunc (848a-900a).

On the same day, February 5, 1970, the court entered its order, in which the court found in part as follows:

> The Board plan, prepared by the school staff, relies almost entirely on geographic attendance zones, and is tailored to the Board's limiting specifications. It leaves many schools segregated. The Finger plan incorporates most of those parts of the Board plan which achieve desegregation in particular districts by rezoning; however, the Finger plan goes further and produces desegregation in all the schools in the system.
>
> Taken together, the plans provide adequate supplements to a final desegregation order (819a).

Although the court stated "the order which follows is not based on any requirement of 'racial balance' . . ." (821a), the court then adopted the entire plan of the court consultant and thereby directed racial balancing with reference to the various schools:

A. The Board's pupil assignment plan for senior high schools was approved[8] upon condition that 300 black students residing in four grids suggested by the court consultant would attend Independence High School. Therefore, the court consultant's sole recommendation with reference to high schools was approved, although no school under the Board plan would house more than a 36% black ratio.

B. With respect to junior high schools, the Board plan was approved[9] upon condition that the only junior high school out of 21 which would remain predominately black would be desegregated by giving the Board a "Hobson's choice" of furnishing transportation and increasing blacks in attendance at several outlying schools and in default of rezoning (which had been fully explored), two-way transportation of students (which is cross bussing to which the Board is opposed) or closing the junior high school (whose classrooms are desperately needed to minimize the already serious overcrowding which exists at the junior high level). None of the alternatives were accepted. Therefore, the Board was directed to implement the court consultant's plan, which provided for establishing nine satellite attendance districts (containing 2,760 students) in inner-city black areas for attendance at nine distant predominately white suburban schools.

C. With respect to elementary schools, the court adopted the court consultant's plan which utilized the Board's rezoning[10] and engrafted upon it the features of pairing and grouping nine inner-city black schools with 24 suburban white

---

[8]The Board plan for senior high schools eliminated the one all black senior high school, West Charlotte, and established black ratios of 17% to 36% for nine of the ten schools. The remaining school, Independence, would house a 2% black ratio. (748a).

[9]The Board plan for junior high schools eliminated four of the five predominately black schools and the remaining school, Piedmont, would have a 90% black ratio or 758 black students (747a).

[10]The Board plan reduced the number of predominately black elementary schools from 17 to 9 (744a-746a).

schools, thereby necessitating extensive cross-bussing.[11] Approximately 10,300 students would be involved in the elementary cross assignments.

The Board plan contemplated transporting only those students eligible for transportation under state law which would result in furnishing additional transportation to approximately 5,000 students (871a-875a). The order of desegregation imposed substantial additional transportation requirements upon the school system (880a-884a) which were compiled by the transportation office of the school system as follows:

Finger Plan

Additional Students	No. of Buses	First Year Cost
23,000	526	$4,199,439.00

Board Plan

Additional Students	No. of Buses	First Year Cost
4,935	104	$ 864,767.00

Supplementary findings of the court dated March 21, 1970, (1217a-1219a) reflect a finding that transportation as ordered by the court would show the following totals:

Court Estimates

Additional Students	No. of Buses	First Year Cost
13,300	138	$1,011,200.00[12]

[11]The Board transportation office estimated these students would travel fifteen miles each way per day (860a). The district court estimated the school to school distance at seven miles (1261a).

[12]The district court found that the cost of 138 buses would be $743,200.00. The annual operating cost of $532,000.00 was reduced by one-half in its order of April 3, 1970 (1259a), resulting in a total of $1,011,200. The district court amended its February 5 order by order dated March 3, 1970 (921a) to provide that transportation should be offered only to those city students who lived in an area which had been rezoned as a result of the court order. The Board accordingly submitted revised estimates which reduced the requirements for addi-

Extensive objections and exceptions (1239a) were filed by the Board with reference to the findings of the district court dated March 21, 1970, and the Court of Appeals noted that it was difficult to furnish reliable predictions with respect to transportation estimates (1271a).

On appeal, the Court of Appeals approved the provisions of the order of the district court with reference to assignment of faculty and assignment of students to secondary schools and reversed and remanded for further consideration the assignment of pupils attending elementary schools (1262a). In doing so the Court of Appeals noted that the voluntary faculty desegregation of the Board was in compliance with other orders of that court (1263a). The finding of the district court with reference to residential patterns leading to segregation resulting from federal, state and local government action was affirmed on "familiar principles of appellate review."[13]

---

tional transportation to 19,285 students and 422 buses at a first year cost of $3,406,687.00. Thereafter, State Board of Education, pursuant to *Sparrow v. Gill*, 304 F. Supp. 86 (MDNC 1969) authorized transportation of all city students residing a mile and a half from their school. Accordingly, this reinstated the original estimates of the local transportation staff.

[13]In view of the importance of other issues in this case, the Board does not deem it appropriate to fully controvert the very shallow and incompetent evidence upon which the district court's findings were made on November 7 reversing its prior findings without benefit of further evidence or hearing. We would point out several areas. With respect to racial restrictive covenants, the only evidence was a 1946 North Carolina Supreme Court case enforcing such restrictions. Other evidence of racial restrictions or the extent thereof is absent from the record. Blacks have for many years purchased homes in predominately white neighborhoods. Plaintiffs' evidence (31a-34a) discloses that relatively small black areas have taken over large white communities. As a result, blacks predominated in 11 former all white schools (591a). Although older black and white neighborhoods were zoned industrial in 1947, no substantial inroads were made in these neighborhoods by industry (254a), industrial zoning in residential areas was substantially curtailed (254a) and existing zoning generally follows existing land use (261a). Urban redevelopment assisted the displaced persons in finding

The reforms the Board undertook to create a unitary school system were applauded by the Court of Appeals (1265a). Noting the district court's holding "that the Board must integrate the student body of every school" (1266a) the Court of Appeals gave a partial answer to the unitary school question in holding:

> . . . first, that not every school in a unitary system need be integrated; second, nevertheless, school boards must use all reasonable means to integrate the schools in their jurisdiction; and third, if black residential areas are so large that not all schools can be integrated by using reasonable means, the school boards must take further steps to assure that pupils are not excluded from integrated schools on the basis of race . . . (1267a).

The Court of Appeals thereupon adopted ". . . the test of reasonableness–instead of one that calls for absolutes–because it has proved to be a reliable guide in other areas of the law . . ." (1267a).

Although Piedmont Junior High School was a formerly all white facility, and nearly all white in 1965 (25 blacks) (691a), the Court of Appeals noted that this school was now in the heart of the black residential area (1268a), a school which could not be desegregated by rezoning. This school precipitated the creation of nine satellite junior high school districts for the purpose of eliminating this one predominately black junior high school.

---

new homes but had no power to direct the location to which they moved (265a). Furthermore, there is no evidence that any citizen was so directed. Many other examples could be cited.

It is noted the findings of the district court, although largely unsupported, closely parallel those of the U.S. Commission on Civil Rights with respect to separation of races in 75 representative cities scattered throughout this nation. *Racial Isolation in the Public Schools–Summary Report by the Commission on Civil Rights (1967).*

separate ma

Pursuant to the suggestion of the Court of Appeals, the
Board met with representatives of HEW and sought to par-
ticipate in the development of a new desegregation plan.
Although t he Department of Health, Education and Wel-
fare obtaine d from the Board all the information it desired,
it refused t o accept the Board offers to assist it in develop-
ing a plan (Tr. 197, July 15, 1970). Nevertheless, the Board
reconsidered all the techniques of desegregation in an effort
to develop a new plan (Tr. 10-20, July 15, 1970). After
presentation of the HEW plan on June 26, it was reviewed
by the Board and rejected by a unanimous vote. Neverthe-
less, the Board presented the HEW plan to the district court
for its consideration.

A hearing was convened on July 15, 1970, at which time
the district court again reviewed the February 2, 1970 Board
plan and th e February 5, 1970 court approved Finger plan.
The district judge also considered the HEW plan, a plan pre-
pared by m inority of Board members, and an earlier draft
of a plan c nsidered by the court consultant.

The Board and court approved plans have been described earlier herein.

The HEW plan's salient features involved utilization of the Board restructured lines and then clustering a group of school districts contiguous to each other for specialized grade assignment to a particular school, for instance, one school might house grades 1 and 2, a second school grade 3, etc. Many of the districts involved in these clusters were desegregated by the Board's rezoning.[14]

A four-member minority of the Board presented an elementary plan which utilized the 1969-70 school zones, grouped 72 elementary schools within eighteen separate clusters, many of which were far removed from each other. The court's attention is invited to the map (R. Map Appendix), which gives a clear picture of what this plan does to the elementary schools of the Charlotte-Mecklenburg system. It was an obvious successful attempt at racial balancing, as all 72 elementary schools would house black ratios ranging from 27% to 34%. Students chosen for attendance outside their district would be selected on a lottery basis. (R. Ex. 45, July 15, 1970). Dislocations and transportation requirements were essentially equivalent to those of the court ordered Finger plan (Order, August 3, 1970).

Petitioners, calling Dr. Finger as their witness, had him unveil a draft of a preliminary plan previously prepared by him. Basically, the plan was Dr. Finger's attempt to restructure attendance zones. Finding his rezoning attempts left

---

[14]Cluster or zone number IV of the HEW plan grouped all white Pinewood, nearly all black Marie Davis with Sedgefield (38% black) and Collinswood (33% black). This plan was roundly condemned for the reason that an elementary student in such a zone would attend four elementary schools in six years and it interfered with the educational programs and organizations of the school system. It also involved substantial transportation and utilized many schools that already had the approximate racial ratio of the entire system. Most of the groupings were near-black or predominately black (R. Ex. 1 and 2, July 15, 1970).

approximately 6,800 black elementary school children in inner-city black schools (Tr. 264, July 15, 1970), he then developed walk-in attendance zones for black students at those schools who would comprise approximately 30% of the capacity of the school. The blacks would attend these schools for six years. Whites residing generally in the inner perimeter of the city limits would be transported to such schools. Blacks who were not assigned to the inner city schools would be transported for six years to suburban white schools. The grade structure of the suburban schools was rearranged on a 3-3 basis with grades 1 - 3 in one school and a school in a contiguous area would have grades 4 - 6. Students in the contiguous zones would attend these two schools along with blacks from the inner city schools. Dr. Finger admitted the plan was incomplete (Tr. 263, July 15, 1970) and contains a complex grade structure (Tr. 258, July 15, 1970). The enormous amount of dislocation and transportation is apparent. As the district court found:

> 26. All plans which desegregate all the schools will require transporting approximately the same number of children. In overall cost, if a zone pupil assignment method is adopted, the minority Board plan may be a little cheaper than the Finger plan. (Order, August 3, 1970).

The district court characterized three of the plans as "reasonable": the court ordered (Finger) plan, the minority board plan and the earlier draft of a Finger plan. The Board was given the "option" of adopting any one of these plans for the elementary schools. The Board met and found the three alternate plans to be unreasonable and the court ordered (Finger) plan was thereupon imposed by order of August 7, 1970.

The Board filed notice of appeal to the Court of Appeals for the Fourth Circuit on August 14, 1970, and has made application to this Court for permission to supplement the record or, in the alternative, that the motion be considered as a writ of certiorari to the Court of Appeals for the Fourth Circuit pursuant to Rule 20 of the Rules of the Supreme Court. No action has been taken thereon at this writing.

SUMMARY OF ARGUMENT

Both the district court and the Fourth Circuit have misapplied the Constitutional imperatives of *Brown I*, *Brown II* and *Green* as they apply to the Charlotte-Mecklenburg schools. In doing so, both of these Courts erred in disapproving the Board plan and imposing upon this System requirements that are unlawful and unwarranted by the facts in this case.

The basic error stems from the misconception of the rights guaranteed black and white children by the Fourteenth Amendment and the goal to be achieved by a dismantling of a dual system and the establishment of a unitary one. Although disclaiming any intent to require racial balancing, the orders imposed upon the Charlotte-Mecklenburg System are based upon the proposition that student assignments at each school must be fashioned in a manner which will achieve or approximate the 70% white - 30% black racial ratio of the system at large. This false premise in turn is founded on the erroneous notion that each black or white child has an individual guaranteed right to attend a school having the prescribed racial mix. Any fair interpretation of the orders of the trial judge point unerringly to the conclusion that he deemed that presumed right to be an absolute one that cannot be diluted or denied by reason of circumstances, costs, disruptions or educational or administrative considerations. Tacitly, the Circuit Court also espoused racial balancing as its goal—but sought unsuccessfully to temper the absolutism of the district court with a test of reasonableness, to which on remand the trial judge gave only thinly veiled lip service. The Board is in general agreement with the employment of a Rule of Reason in appraising desegregation plans. But in this case, the Fourth Circuit misapplied its own Rule of Reason and in effect the district court ignored it. Racial balancing is not required by the Constitution and when imposed by a court violates the prohibitions of the Civil Rights Act of 1964.

Contrary to these erroneous views, the pronouncements of this Court make it clear that the guaranteed right of a child is to attend a school *system* within which discrimination originating from the old state-imposed dualty has been eliminated. If such discrimination has been eradicated and if schools are fairly operated and administered on a nonracial basis, a dual system has been dismantled and a unitary one has been established within which no child is excluded because of his race or color. Nondiscriminatory geographic attendance zones, including those promoting the neighborhood school concept, establish a unitary system—notwithstanding a residue of predominately black schools that remain for reasons totally unrelated to race.

A corollary to the requirement of racial balancing is the burden of massive bussing and dislocation of children to achieve the goal of 70% white–30% black ratio in the schools of the Charlotte-Mecklenburg System. This balancing and the bussing to implement it impinges upon the Constitutional rights of children, both black and white, who may not wish to be assigned and moved out of their neighborhood attendance zones for the sole purpose of promoting the presumed rights of other children.

The February 2, 1970, Board plan is based on geographic attendance zones that were drastically gerrymandered to promote desegregation. This plan severely strains, but maintains the basic benefits of the neighborhood school concept. By this technique, the Board satisfactorily desegregated all but 10 of its 103 schools. *All* but a small handfull of the black children who remain in these 10 schools will have a desegregated school experience for at least one-half of their 12 years of schooling. The Board itself sought to achieve in as many schools as possible a maximum racial mix. By doing so, the Board proposal exceeds Constitutional imperatives. The compulsion of court orders cannot be employed to coerce a school system to do what the Constitution does not require.

The Board plan is reinforced by majority to minority transfers to promote stable desegregation, prevent resegregation and afford blacks that remain in the 10 predominately black schools an opportunity to attend a predominately white school with free transportation to accomplish the move. The teachers at each school are assigned on a ratio of 3 to 1 which is the ratio of white to black teachers in the system. The staff, extra-curricular activities, transportation, facilities, programs and other facets of the system are nondiscriminatory and thoroughly desegregated, and are employed to promote integration throughout the system.

The Board plan effectively establishes a unitary system. Both the district court and the Fourth Circuit erred in disapproving that plan and supplanting it with one or more alternatives designed to racially balance each school, with the consequent bussing and movement of children that the Board considered unnecessary, impractical, costly, disruptive, educationally unsound and not required by the Constitution.

ARGUMENT

I. GENERAL DISCUSSION OF CONSTITUTIONAL PROBLEMS AND CONCEPTS.

A. A CHILD'S CONSTITUTIONAL RIGHT GUARANTEED BY THE FOURTEENTH AMENDMENT IS TO GO TO SCHOOL IN A UNITARY SYSTEM. IF THE SCHOOL IS PART OF SUCH A SYSTEM, HE HAS BEEN ACCORDED THAT RIGHT.

It is unarguable that the negro and white children in the Charlotte-Mecklenburg system must be and will be accorded their Constitutional rights in full measure. However, the district court's misconception of the nature of those rights is succinctly stated in its August 3, 1970, Order (Pets' Br. Al):

> The issue is not the validity of a "system", but the rights of individual people.

Of course, the Constitutional rights of a black or white child under the Fourteenth Amendment are individual and per-

sonal, but the question remains: What is the essence of that right–the right to do what? The trial judge concludes that the right is an absolute one of each child to be in a desegregated school and presumably in a desegregated classroom within the school–regardless of the rights of white children, circumstances, problems peculiar to urban areas, costs, disruptions, educational considerations and other factors which prevent a color blind school system from achieving the ideal racial mix in every one of its schools.

This view does not comport with the previous declarations of this Court. Briefly stated, it is our understanding that this Court has defined the right guaranteed a negro or white child by the Fourteenth Amendment as being the right to attend a school in a *system* where no state-imposed discrimination exists and has prescribed the attendant affirmative duty of a school board to establish such a *system*. This right and duty are summarized in *Green v. New Kent County*, 391 U.S. 430 (1968):

> [I]t was such dual *systems* that 14 years ago *Brown I* held unconstitutional and a year later *Brown II* held must be abolished; school boards operating such school systems were required by *Brown II* "to effectuate a transition to a racially nondiscriminatory school *system*" . . . *Id.* at 435. (Emphasis added)
>
> . . . *Brown II* commanded the abolition of such dual *systems* . . . *Id.* at 437. (Emphasis added)
>
> School boards such as the respondent then operating State-compelled dual systems were nevertheless clearly charged with the affirmative duty . . . to convert to a *unitary system* in which racial discrimination would be eliminated root and branch . . . The constitutional rights of Negro school children articulated in *Brown I* permit no less than this . . . *Id.* at 437-38 (Emphasis added)

The thrust of *Brown v. Board of Education*, 347 U.S. 483 (1954) and *Brown v. Board of Education*, 349 U.S. 294 (1955) and all that this Court has said since those landmark decisions point unerringly to the validity of this proposition:

State-imposed dual *systems* must be abolished and must be replaced with unitary *systems*. The Constitution does not guarantee to a child the right to attend a school having any particular racial complexion. The Fourteenth Amendment secures for him only the privilege to attend a school that is part of a unitary *system* which is comprised of "just schools" (*Green, supra,* at 442)–schools that are operated and administered without any vestige of discrimination. Once a conversion or transformation to a unitary nondiscriminatory *system* has been accomplished, every child in that *system* has been accorded his rights. Those who contend for a particular racial mix or balance in each school propose a perversion of the commands of *Brown I* and *II* and *Green*.

It is by these standards that the plan of the School Board in this case must be judged. An analysis of that plan clearly demonstrates that it realistically will achieve the nondiscriminatory unitary system the Constitution requires. The oppressive plan of the district court does not conform with these standards. In spite of disclaimers, its objective is the racial balancing of each one of the schools of the Charlotte-Mecklenburg system.

B. A UNITARY SYSTEM IS ONE WITHIN WHICH NO CHILD IS EXCLUDED FROM ANY SCHOOL BECAUSE OF RACE. IF A DESEGREGATION PLAN PROMISES REALISTICALLY TO ACCOMPLISH THIS, IT IS CONSTITUTIONALLY ACCEPTABLE NOTWITHSTANDING A RESIDUE OF PREDOMINATELY BLACK OR WHITE SCHOOLS THAT REMAIN FOR REASONS UNRELATED TO RACE.

The now familiar definition of a unitary system is one "within which no person is to be effectively excluded from any school because of race or color." *Alexander v. Holmes,* 396 U.S. 19 (1969); *Northcross v. Board of Education* (Burger, Chief Justice, concurring opinion) 397 U.S. 232 (1970). Unhappily for school boards charged with the responsibility of fashioning a unitary system, this definition only begins,

not ends, inquiry regarding the necessary ingredients and characteristics of a unitary system.

This Court is well aware of the diversity and change of opinion both among and within courts that have been wrestling with the scope and meaning of this definition. This ought not to be. We hope this Court will find an opportunity in this case to put some meat on the bare bones of this definition which will give instruction and guidance to school boards and will help dispel the disparity that presently characterizes the findings of fact, conclusions and opinions of the lower courts.

Brown I and *II*, the *Green* triad and *Alexander v. Holmes* are of some help—but not much for practical application "in the field." From these cases, we understand a unitary system to have at least these attributes: It is "nonracial." It is "racially nondiscriminatory." It is what is left after a "well-entrenched dual system" has been "dismantled." It is one in which "racial discrimination" is "eliminated root and branch." It is one within which no child is "effectively excluded because of race or color." Running through all of these criteria is one common theme: If a system is established that does not discriminate against the race of a child and thereafter operates on a color blind basis, a former dual system has been transformed, converted and, we presume, purged.

It is worth noting that the 2-school rural residentially mixed New Kent County involved in *Green* typifies the systems stricken down by *Brown I* and *II*, a fact which is specially commented upon at page 435:

> The pattern of separate "white" and "Negro" schools in the New Kent County school system established under the compulsion of state laws is precisely the pattern of segregation to which *Brown I* and *Brown II* were particularly addressed, and which *Brown I* declared unconstitutionally denied Negro school children equal protection of the laws. Racial identification of the system's schools was complete, extending not just to the composition of student bodies at the two

schools but to every facet of school operations–faculty, staff, transportation, extracurricular activities and facilities. In short, the State, acting through the local school board and school officials, organized and operated a dual system, part "white" and part "negro."

It was such dual systems that 14 years ago *Brown I* held unconstitutional and a year later *Brown II* held must be abolished; school boards operating such school systems were required by *Brown II* "to effectuate a transition to a racially nondiscriminatory school system." 349 U.S. at 301, 75 S.Ct. at 756.

The *Green* triology formed the primary vehicle for the last detailed pronouncements of this Court concerning some of the characteristics of a dual and non-dual system. The factual context within which the teachings of *Green* were made presents considerable difficulties when these guides are applied to a complex urban system like Charlotte-Mecklenburg–particularly when that system has long since abandoned the discriminatory practices that were so flagrantly involved in New Kent County.

In identifying a unitary system, the *Alexander v. Holmes* definition embodies two basic aspects: (1) effective exclusion and (2) the reason for exclusion–i.e. because of race.

The word "exclude" means to shut out. It implies keeping out hwat is already outside. That a person remains outside does not necessarily mean that he is excluded. The idea of shutting out suggests affirmative action on the part of someone to accomplish the exclusion. If a person outside is afforded an opportunity to come inside, he is not barred or excluded. This opportunity must be a reasonable one. If the opportunity accorded a person is unreasonable, he may be said to be effectively excluded.

The *Holmes* definition does not prohibit all exclusion–only invidious ones based on race or color. There are any number of reasons why a child can fairly be required to attend one school instead of another: capacity, distance,

cost, disruptions, location of residence, age, travel, safety, administrative problems, educational considerations and a host of other factors that have absolutely nothing to do with his race or color.

If, in the operation of a school system, these factors are honestly, realistically and reasonably applied without the slightest degree of racial discrimination, the system is nonetheless unitary even though by reason of these factors some black children remain in predominately black schools.

The Fourth Circuit correctly comes to this conclusion in the Charlotte-Mecklenburg case (1267a):

> . . . [W]e hold: First, not every school in a unitary system need be integrated . . .
>
> . . . [I]f a school board makes every reasonable effort to integrate the pupils under its control, an intractable remnant of segregation, we believe, should not void an otherwise exemplary plan for the creation of a unitary system. *Ellis v. Board of Public Instruction of Orange County*, 423 F.2d 203 (5th Cir. 1970).

This view agrees with the trend of lower court decisions which may be summarized as follows: The maintenance of some all-black or all-white schools in a given school system will not automatically invalidate a desegregation plan nor will it automatically indicate a shirking of responsibility by school board officials so long as the segregation is the result of housing patterns and means are made available whereby black children in the all-black areas may transfer to predominately white schools. The operation and maintenance of a particular school building, attended only by negro or white children, is not *per se* unconstitutional. *United States v. Greenwood Municipal Separate School District*, 406 F.2d 1085, 1093 (5th Cir. 1969), *Ellis v. Board of Public Instruction of Orange County*, 423 F.2d 203 (5th Cir. 1970), *Goss v. Board of Education, City of Knoxville, Tennessee*, 406 F.2d 1183 (6th Cir. 1969), *Deal v. Cincinnati Board of Education*, 419 F.2d, 1387 (6th Cir. 1969).

The trial judge who heard the Charlotte-Mecklenburg case is out of step with this trend and obviously disagreed with the opinion of the Court of Appeals for the Fourth Circuit. On February 5, 1970, the trial judge ordered (822a); "That no school be operated with an all-black or predominantly black student body." The district court did not retreat from this position in its August 3, 1970, Order (Pets.' Br. A1) issued after the conclusion of hearings held pursuant to the Circuit Court directives. This misconception of what the Constitution requires lies at the heart of the unlawful orders of the district court and the unwarranted findings of fact which the trial judge used to support his erroneous conclusions.

C. A "RULE OF REASON" RATHER THAN A "RULE OF ABSOLUTES" SHOULD BE THE STANDARD BY WHICH TO JUDGE THE SUFFICIENCY OF A DESEGREGATION PLAN.

We approve the test of reasonableness adopted by the Court of Appeals–instead of one that calls for absolutes (1267a-1268a):

> We adopted the test of reasonableness–instead of one that calls for absolutes–because it has proved to be a reliable guide in other areas of the law. Furthermore, the standard of reason provides a test for unitary school systems that can be used in both rural and metropolitan districts. All schools in towns, small cities, and rural areas generally can be integrated by pairing, zoning, clustering or consolidating schools and transporting pupils. Some cities, in contrast, have black ghettos so large that integration of every school is an improbable, if not an unattainable, goal. Nevertheless, if a school board makes every reasonable effort to integrate the pupils under its control, an intractable remnant of segregation, we believe, should not void an otherwise exemplary plan for the creation of a unitary school system. *Ellis v. Board of Public Instruc. of Orange County,* No. 29124, Feb. 17, 1970___ F.2d. ___ (5th Cir.)

Such a test is consistent with the equitable principles elucidated in *Brown II* which made it clear that desegregation plans and the means of implementing them should take into account a variety of local problems and conditions—including by implication those specifically itemized by the Court of Appeals (age of pupils, board resources, costs, effect of bussing on traffic and the distance and time for transportation).

In the name of common sense, what standards other than "reasonable" ones should be applied to test the efficacy of desegregation plans? In fashioning and effectuating decrees, *Brown II* directed that trial courts be guided by equitable principles. The very concept of equity presupposes the application of fairness, practicability and reason. Equity is employed where absolutes are inappropriate.

As stated in *Green, supra:*

> There is no universal answer to complex problems of desegregation; there is obviously no one plan that will do the job in every case. The matter must be assessed in the light of the circumstances present and the options available in each instance.[15] *Id.* at 439.

The August 3, 1970, Order of the district court (including its findings of fact) clearly shows that the trial judge gave only lip service to the test of reasonableness directed by the Court of Appeals. The recital of a few evidences of this lip service will suffice at this point: "The circuit court's reasonableness order is vague" (Pets.' Br. A7); "reservations" about the pertinence of a rule of reason are expressly acknowledged (Pets.' Br. A31); the size of a system is immaterial (Pets.' Br. A10); " 'Busing' is still an irrelevant issue" (Pets.' Br. A10); current long distance bussing of kindergarten children is cited as justification for bussing thousands

---

[15]With tongue-in-cheek solemnity, the district judge in *Ross v. Eckels, Houston Independent School District*, F. Supp. (S.D. Texas 1970), in commenting on the practical problem occasioned by Buffalo Bayou, proclaimed: "A child is not required to swim or fly to school."

of elementary youngsters (Pets.' Br. A16, A18); "There is no way to decide what remnant shall be determined intractable" (Pets.' Br. A18); "cost and inconvenience" are not pertinent considerations (Pets.' Br. A31).

In view of the reservations entertained by the district court about the pertinence of a Rule of Reason, it is not surprising that upon remand the trial judge concluded that his own prior orders were "reasonable"—notwithstanding the determination of the Fourth Circuit that the trial judge's earlier mandate regarding the elementary plan was unreasonable. This reaffirmation by the district court of its own prior conclusions evidences a subjectivity that does not square with either the directions of the Court of Appeals or with the equitable principles decreed by this Court.

It is incomprehensible that two dissenting members of the Court of Appeals (Judges Sobeloff and Winter) should find a "test of reason" so frightening. They find it undefined, subjective, ambiguous and pernicious (1288a, 1289a, 1290a, 1302a, 1303a). They say it threatens dire consequences of delay and exploitation. (1290a).

In his dissent Judge Sobeloff rejects what he calls (1291a) the "slippery test" of reasonableness because it implies that desegregation is not "worth the price" (1288a). This misconception is echoed by the plaintiffs' assertion (Br. 58) that the Circuit Court's reasonableness rule demonstrates a departure from the educational goal of desegregation laid down in *Brown I* and *II* and reinforced by *Green*.

This unwarranted conclusion misconstrues the goal sought to be achieved. *Green, supra,* succinctly defined that goal:

> [S]chool boards operating such school systems (i.e. dual systems) were *required* by *Brown II* "to effectuate a transition to a racially nondiscriminatory school system" . . . The transition to a unitary, nonracial system of public education was and is the ultimate end to be brought about . . . *Id.* at 435-36 (Emphasis by Court).

And at

37-38, school boards were charged with:

> T]he affirmative duty to take whatever steps might e necessary to convert to a unitary system in which acial discrimination would be eliminated root and ranch.

lless of the prior dualty of a school system prev- perated under the authority of *Plessy v. Ferguson*, 537 (1896) or otherwise, from these teachings it that if a current desegregation plan of a school aligns its schools and its assignment policies in a hat effects a conversion to a nonracial, nondiscrimi- ystem, the commands of this Court have been "Discrimination" is defined as "the act, practice, tance of discriminating categ ically rather than in- ." *Webster's Seventh New Collegiate Dictionary* Within the context of desegregation, if the opera- administration of a school system does not counte- ch acts and practices on account of race, discrimina- been eliminated.

or the courts to appraise the plans proffered by a bard to determine whether the results achieved are founded on considerations that are completely dis- from any degree of racial discrimination. When the peculiarities of local problems, conditions and nces, the plan of the Charlotte-Mecklenburg School ght not to be supplanted by a court plan that com-

h the subjective views of a trial judge that absolutes ed.

dissent in *United States v. Jefferson County Board tion*, 380 F.2d 385 (5th Cir. 1967), Judge Gewin curring) responded to the champions of absolutism:

> . . No consideration is given to any distinction in ny of the numerous school systems involved. Urban hools, rural ones, small schools, large ones, areas here racial imbalance is large or small, the relative umber of Negro and white children in any particu- r area, or any of the other myriad problems which e known to every school administrator, are taken

into account. All things must yield to speed, uniformity percentages and proportional representation. There are no limitations and there are no excuses. This philosophy does not comport with the philosophy which has guided and been inherent in the segregation problem since Brown II. As the Court there stated:

> Because these cases arose under *different local conditions* and their disposition will involve a variety of *local problems*, we required further argument on the question of relief. (349 U.S. p. 298, 75 S.Ct. p. 755). *Id.* at 403.

In appraising the efficacy of desegregation plans, even courts espousing the Rule of Reason have been prone to place undue emphasis upon tangible factors such as numbers of buses and numbers of dollars–with very little direct consideration of the effect of such plans upon the educational processes of a particular system. After all, education is what *Brown I* and *II* professed to be all about.

We believe that judicial restraint should be employed in assessing the impact of a particular desegregation plan upon the educational program of a local system lest the excesses of plans devised by absolutists tear to shreds the fabric of the educational process that the decisions of this Court were designed to improve and promote for all children–black and white.

This is not meant to imply that courts should refrain from looking behind the judgments of school boards and administrators to ascertain whether or not they are in fact being employed as a guise to circumvent the commands of *Brown I* and *II* and *Green*. We suggest, however, that the judiciary should beware lest court-devised plans throw the education baby out with the bath water.

The Fourth Circuit (1267a) explained its reasons for adopting a Rule of Reason:

> We adopt the test of reasonableness–instead of one that calls for absolutes–*because it has proved to be a reliable guide in other areas of the law.* (Emphasis added)

The soundness of the explanation assigned by the Court of Appeals for its adoption of this test should require no documentation, except for those encumbered by a predisposition for absolutes.

The "other areas of the law" referred to by the Court of Appeals include the construction and application by this Court of a variety of fundamental individual rights guaranteed by the Constitution. By way of example we call attention to only a few.

Some of the limitations on Freedom of Religion are summarized in *Mohammad v. Sommers*, 238 F. Supp. 806 (E.D. Mich. 1964):

> [I]n the interest of the public weal, there are many limitations which bound religious freedom. Generally, it can be said that these limitations begin to operate whenever activities in the name of religion affect or collide with the liberties of others or of the public, or violate public policy. Witness this but partial lists of instances of such conflicts which have all been resolved against the claims of religion: Sunday closing, spiritualistic readings, selective service, parading in the streets, practice and advocacy of polygamy, vending periodicals in the streets, fluoridation of water, compulsory school attendance, child labor regulations, compulsory vaccination, blood transfusion, surgery and medical attention. *Id.* at 808.

Numerous limitations have been imposed upon the Right of Free Speech. For example, see *Cox v. Louisiana*, 379 U.S. 536 (1965); *Gitlow v. People of the State of New York*, 268 U.S. 652 (1925); *Times Film Corporation v. City of Chicago*, 365 U.S. 43 (1961)–"It has never been held that liberty of speech is absolute"; *Schenck v. United States*, 249 U.S. 47 (1919); *Gilbert v. Minnesota*, 254 U.S. 325 (1920)–"it is not absolute–it is subject to restriction and limitation;" *Dennis v. United States*, 341 U.S. 494 (1951).

The same is true of the Right to Trial by Jury. Of interest is what this Court said in *Duncan v. Louisiana*, 391 U.S. 145

(1968), holding that a jury trial for petty offenses was not required by the Sixth and Fourteenth Amendments:

> . . . [T]he *possible consequences to defendants* from convictions for petty offenses had been thought *insufficient to outweigh* the *benefits* to efficient law enforcement and simplify judicial administration resulting from the availability of speedy and *inexpensive nonjury adjudications.* These same considerations compel the same result under the Fourteenth Amendment. *Id.* at 1453. (Emphasis added)

And in *Baldwin v. State of New York,* ___ U.S. ___, 90 S.Ct. 1886 (1970)

> One who is threatened with the possibility of imprisonment for six months may find little difference between the potential consequences which face him, and the consequences which face appellant here. Indeed, the prospect of imprisonment for however short of time will seldom be viewed by the accused as trivial or "petty" matter and may well result in quite serious repercussions affecting his career and his reputation. *Where the accused cannot possibly face more than six months imprisonment, we have held that these disadvantages, onerous though they be, may be outweighed by the benefits which result from speedy and inexpensive nonjury adjudications.* *Id.* at , 90 S. Ct. at 1890. (Emphasis added)

With reference to the Right to Counsel as expounded by this Court in *Gideon v. Wainwright,* 372 U.S. 335 (1963), the Court in *Brinson v. State of Florida, County of Dade,* 273 F. Supp. 840 (S.D. Fla. 1967), at 845-47 had this to say:

> . . . The right to counsel should not be treated as an abstract theorem, but rather as a means of achieving the most perfect justice possible in a given situation. The essence of the right is to protect those charged with crimes from wrongful conviction. However, *that right is qualified by practical exigencies . . .*
>
> *The right to counsel guaranteed by the Sixth and Fourteenth Amendments is not an absolute right,*

> *nor are any of the rights guaranteed by the Constitution "absolute."* See *Creighton v. State of North Carolina*, 257 F. Supp. 806 (E.D.N.C. 1966). *As stated in that case, the Constitution was not written to provide an exercise in abstract idealism but as a practical guide for the management of the affairs of the country and the protection of the rights of its citizens. In today's complex society there can be no truly "absolute" rights.* Thus, the right to free exercise of the religion of one's choice is on its face absolute, but in application is limited since a religion requiring illegal activities would not be constitutionally protected. One cannot refuse to pay taxes because of religious scruples, nor can one engage in polygamy or any other practice directly harmful to the safety, morals, health or general welfare . . . The "absolute" right to free speech has been qualified and curtailed by libel and slander laws. Such right, on occasion, must be subordinated to other values and considerations. *Dennis v. United States*, 341 U.S. 494, 71 S.Ct. 857, 95 L.Ed. 1137 (1950). It does not confer the right to persuade others to violate the law. *Bullock v. United States*, 265 F.2d 683 (6th Cir. 1958) . . . Neither does such right preclude Congress from excluding obscene matter from the mails or from punishing person advocating overthrow of the government by force. *United States v. Bryan*, 167 F.2d 241. *Likewise, the "absolute" right to counsel in all criminal prosecutions must be qualified by practical exigencies and, unless this is done, the necessities of sound judicial administration would be disregarded* and the administration of justice thrown into senseless chaos. (Emphasis added)

Without belaboring the point further, these examples are cited to demonstrate the futility of a Rule of Absolutes and the necessity for a Rule of Reason. As the dissenting opinion of Judges Sobeloff and Winter and the orders of the district court suggest, if a test of reasonableness is slippery and inapplicable to an evaluation of a school board's efforts to convert to a unitary system, a consideration of costs, disrup-

tions, buses, administrative problems, and impact on educational programs become totally unnecessary and irrelevant. If such be true, there would be no need for complex desegregation plans and much of the elapsed time since *Brown I* and *II* has been wasted.

To the contrary, we subscribe to what this Court said in *Dennis v. United States, supra:*

> Nothing is more certain in modern society than the principle that there are no absolutes, that a name, a phrase, a standard has meaning only when associated with the considerations which gave birth to the nomenclature. *Id.* at 866.

Green gave birth to a major portion of the nomenclature applied to measure school systems and desegregation plans. We find little evidence of any disposition on the part of the absolutists to heed the admonition suggested by *Dennis* that there are differences, which should reasonably be taken into account, between the 2 rural schools (1300 pupils) of New Kent County and the 105 primarily urban schools (84,500 pupils) of Charlotte-Mecklenburg.[16] The absolutists springboard from the nomenclature of *Green* to rationalize their own views, without taking into account the limitations of the ruling of this Court in that case:

> *[A]ll we decide today* is that in desegregating a dual system a plan utilizing "freedom of choice" is not an end in itself. *Id.* at 440. (Emphasis added)

If the review of the Charlotte-Mecklenburg case does nothing else, we hope standards and guidelines for desegregation

---

[16]The trial judge glibly dismisses the differences in his August 3 Order (Pets.' Br. A10): "The principal difference between New Kent County, Virginia, and Mecklenburg County, North Carolina, is that in New Kent County the number of children being denied access to equal education was only 740, whereas in Mecklenburg that number exceeds 16,000." Even this reference to 16,000 leaves an erroneous impression. Under the Board plan only 7,497 black youngsters will attend predominately black schools. See statistical data relating to the Charlotte-Mecklenburg schools and the Board plan attached hereto at A-3.

plans will be evolved that are sufficiently clear and definite to curtail the temptation of some lower courts to rely on their personal educational and social philosophies in judging plans and the system for which they are formulated.

D. THE DISTINCTION BETWEEN DE FACTO AND DE JURE IS NOT A VALID STANDARD BY WHICH TO DETERMINE WHETHER A SCHOOL SYSTEM IS UNITARY.

A major thrust of the district court's sweeping orders is based upon its findings that such segregation as remained in the Charlotte-Mecklenburg schools was the result of *de jure*, not innocent *de facto*, action of federal, state and local authorities. These findings are summarized in the opinion of the Court of Appeals (1264a):

> The district judge also found that residential patterns leading to segregation in the schools resulted in part from federal, state and local governmental action. These findings are supported by the evidence and we accept them under familiar principles of appellate review. The district judge pointed out that black residences are concentrated in the northwest quadrant of Charlotte as a result of both public and private action. North Carolina courts, in common with many courts elsewhere, enforced racial restrictive covenants on real property until *Shelley v. Kraemer*, 334 U.S. 1 (1948) prohibited this discriminatory practice. Presently the city zoning ordinances differentiate between black and white residential areas. Zones for black areas permit dense occupancy, while most white areas are zoned for restricted land usage. The district judge also found that urban renewal projects, supported by heavy federal financing and the active participation of local government, contributed to the city's racially segregated housing patterns. The school board, for its part, located schools in black residential areas and fixed the size of the schools to accommodate the

> needs of immediate neighborhoods. Predominately black schools were the inevitable result. The interplay of these policies on both residential and educational segregation previously has been recognized by this and other courts.

These findings were employed as a justification by both the trial judge and the Court of Appeals for the disapproval of the Board's plan that would desegregate all but 10 of the system's 103 schools and place 100% of the black and white children in schools with thoroughly integrated teaching staffs and 68% of the blacks in 93 predominately white schools–with almost all of the remaining black children being scheduled to attend such schools for at least one-half of their 12 years of schooling. These *de jure* findings are in marked contrast to earlier findings of the district court in its April 23, 1969, Order (311a-312a):

> A word about the School Board.–The observations in this opinion are not intended to reflect upon the motives or the judgment of the School Board members. They have operated for four years under a court order which reflected the general understanding of 1965 about the law regarding desegregation. *They have achieved a degree and volume of desegregation of schools apparently unsurpassed in these parts, and have exceeded the performance of any school board whose actions have been reviewed in appellate court decisions.* The Charlotte-Mecklenburg schools in many respects are *models for others.* They are attractive to outside teachers and offer good education. The problem before this court is only one part (albeit a major part) of the educational problem. The purpose of this court is not to criticize the School Board, but to lay down some legal standards by which the Board can deal further with a most complex and difficult problem. The difference between 1965 and 1969 is simply the difference between *Brown* of 1965 and *Green v. New Kent County* of 1968. *The rules of the game have changed, and the methods and philosophies which in good faith the Board has followed* are no longer adequate to complete the job

> which the courts now say must be done "now". (Emphasis added)

Of particular interest is the district court's April 23, 1970, finding:

> . . . Location of schools in Charlotte has followed the local pattern of residential development, including its *de facto patterns of segregation.* (305a) (Emphasis added)

Six months later, in its November 7, 1969, Memorandum Opinion (661a-662a) the district court gratuitously and without the benefit of further evidentiary hearings reversed its previous findings that segregation in Charlotte was *de facto.* The trial judge attributed to the School Board every real or fancied ill that beset the Charlotte-Mecklenburg community and stemmed from federal, state, local and private action, including, among others, public accommodations and housing, racial restrictions in deeds, zoning ordinances, urban renewal, low rent housing and placement of neighborhood schools.

The unfairness and artificiality of these attributions is underscored by a comparison of the district court's findings in this case with those of the Sixth Circuit in *Deal v. Cincinnati Board of Education, supra,* wherein the Court considered the same factors, and arrived at a diametrically opposite result and concluded:

> In our opinion, the burden of righting wrongs alleged to have been committed by public or private agencies ought not to be foisted upon Boards of Education, which have enough problems of their own to solve in providing proper education for the young. *Id.* at 1392.

In *Deal, supra,* the Court observed that in Cincinnati due to residential patterns there was a large concentration of negroes in one portion of the city and schools had been located to serve the neighborhoods where the children live. The Court in *Deal* referred to an Ohio statute that *required* the selection of school sites in areas of the heaviest concentration of children and declared that:

> Even in the absence of such a statute, it would seem prudent to locate the schools where they will be easily accessible and convenient to most of the children and without the necessity of bussing the children or their crossing dangerous thoroughfares. The Board should consider locations in areas that are being developed where large population increases are anticipated, and locations in areas where the Board already owns property.

We, of course, are mindful of the holding of this Court in *Cooper v. Aaron*, 358 U.S. 1 (1958) which is frequently cited for the proposition that as agents of the state a local school board is responsible for conditions created by state officials. This holding was made within the context of the violent, disruptive and overt action generated by Governor Faubus and other state officials to thwart the rezoning efforts of the local school board. In the case of Charlotte-Mecklenburg it is manifestly unsound, unfair and unrealistic that the actions of others should be arbitrarily attributed to its School Board as justification for the excessive order approving the disruptive and costly plan of the district court and disapproving the plan proposed by the Board.

It is common knowledge that prior to 1954 Charlotte-Mecklenburg maintained a dual system, sanctioned by the laws of the State of North Carolina promulgated under the authority of the "separate but equal" doctrine of *Plessy v. Ferguson, supra*, stricken down by *Brown I* and *II*,

Following the mandates of *Brown I* and *II*, in order to achieve further racial mixing Charlotte-Mecklenburg adopted a plan of redistricting that in 1966 was found by the Court of Appeals for the Fourth Circuit to comply with the Constitution as then understood. *Swann v. Charlotte-Mecklenburg Board of Education*, 369 F.2d 29 (1966). Thereafter, in furtherance of additional desegregation, the Board initiated a number of actions which were applauded by the district court in its April 23, 1969, Order (298a-301a, 311a-312a). Following *Green* and in response to the orders of the district court the School Board submitted its plan that on

February 5, 1970, was disapproved by the district court in favor of its own--reciting in support of its action that the local system was tainted by the *de jure* factors referred to above.[17]

The history of this case, the 1966 Circuit Court approval of geographic zones, the Board's initiative to promote desegregation and the results which will be achieved by the February 2, 1970, plan of the Board compels an answer to this question: When, if ever, can a school system born under the ill-fated star of *Plessy v. Ferguson* purge itself of the *de jure* stigma reserved for systems that once-upon-a-time had the dualty that *Plessy* condoned?

We suggest that the distinction between *de jure* and *de facto* is invalid and artificially contrived. In doing so, it is not our purpose to whitewash the Charlotte-Mecklenburg system by pointing a finger at other systems in other parts of the nation that have escaped the lash of oppressive court orders because they operate behind the mask of *de facto* segregation. We do suggest, however, that the *de jure - de facto* standard is not an appropriate test by which to judge a school board's compliance with the commands of *Brown I, Brown II* and *Green*. Schools everywhere should be measured by the same yardstick.

---

[17]In Charlotte-Mecklenburg, 68% of the blacks during the school year 1969-70 attended predominately black schools. Under the Board plan this percentage is dramatically reduced to 32% (see A-3 Appendix attached to this brief). Comparable information derived from HEW figures reflects the following percentages of black students at predominately black schools: New York City, 86%; Los Angeles, 96%; Detroit, 91%; Philadelphia, 90%; Milwaukee, 88%; San Francisco, 54%; Boston, 77%; and Cincinnati, 78%.

The percentages of black students attending schools housing 95% to 100% black students in other cities is as follows: Baltimore, 76%; Cleveland, 80%; Washington, 89%; St. Louis, 86%; Newark, 75%; Buffalo, 61%; Gary, Indiana, 80%. In Chicago, 76% of the blacks attended schools less than 2% white. Source: United Press International *Release*, May 17, 1970.

The flaw in the *de jure - de facto* dichotomy is that from the moment *Brown I* was announced all federal, state and local laws requiring or permitting segregation were void and of no effect. On and after May 31, 1955, there plainly could be no *de jure* racial discrimination in any school system in the United States. What was left, North and South, was segregation in the schools in fact.

The *de jure* concept was never of any importance except as a handle upon which to hang state action and an affirmative duty to dismantle. If one accepts an affirmative conception of the Constitution, the *de jure* idea becomes worthless and the North and South distinctions intolerable.[18]

If separation by race in the public schools renders educational opportunities inherently unequal and if accomplishment of a social purpose is really the true goal, it ought to be purely of historical interest and wholly irrelevant how the practice originated, whether by law, custom or ghetto economics.

It is abundantly clear that social reform is the goal that the trial judge sought to achieve in Charlotte-Mecklenburg: Segregation *per se* is unlawful; educational opportunities and performances are not controlling–"Segregation would not become lawful, however, if all children scored equally on the [achievement] tests" (Pets.' Br. A15); "no school [shall] be operated with an all-black or predominately black student body" (822a); the "pupils of all grades [shall] be assigned in such a way that as nearly as practicable the various schools at various grade levels have about the same proportion of black and white students" (822a); the School Board shall "maintain a continuing control over the race of children in each school . . . to prevent any school from becoming racially identifiable" (823a); the School Board shall "implement a continuing program, computerized or otherwise, of assigning pupils and teachers during the school

---

[18]Senator Abraham Ribicoff, of Connecticut, has described this double standard as "monumental hypocricy."

year as well as at the start of each year for the conscious purpose of maintaining each school and each faculty in a condition of desegregation" (824a).[19] One embarked upon a crusade for social reform finds both opportunity and justification in the *de jure* precept. By way of illustration, it seems rather strained that private racial deed restrictions negated by *Shelley v. Kraemer*, 334 U.S. 1 in 1948 should be relied upon in support of nefarious state action now. The same is true of the purported effects of federal financing and other governmental action over which the school board has no control.

It is inescapable that an all-black school in Washington or Baltimore is just as unequal as an all-black school in Charlotte or Atlanta. People are pretty much the same everywhere and race prejudice now and in the past has not been confined to the southern part of the United States.[20]

If social reform were to be candidly admitted as the objective, we could more profitably concern ourselves with what is reasonably practicable for a school board to do to correct

---

[19]Even if *arguendo* the *de jure - de facto* distinction were to be accepted, such a requirement of continued maintenance and control over the race of children in each school would seem to exceed the authority of a district judge, once he concludes that a desegregation plan has dismantled a dual system and has established a unitary one. After this has been accomplished, any future segregation would be *de facto*–not *de jure*.

[20]*Racial Isolation in the Public Schools, Summary Report by the Commission on Civil Rights* (1967), at 3:

> Although school segregation was sanctioned by law and official policy in Southern cities until 1954, there is a legacy of governmentally sanctioned school segregation in the North as well. State statutes authorizing racially separate public schools were on the books in New York until 1938, in Indiana until 1949, and in New Mexico and Wyoming until 1954. Although not sanctioned by law in other States, separate schools were maintained for Negroes in some communities in New Jersey, Illinois, and Ohio, as late as the 1940s and 1950s. In some cities such as New Rochelle, N.Y. and Hillsboro, Ohio, the courts found that school district lines have been gerrymandered for the purpose of racial segregation.

social inequities–North and South–rather than having our attention diverted to how a particular school system may have gotten that way. Further, it would obviate the necessity for artifically contrived rationales to support a trial court desegregation order, which in this case the Court of Appeals accepted "under familiar principles of appellate review."

E. THE CONSTITUTION DOES NOT REQUIRE RACIAL BALANCING IN SCHOOLS OR BUSSING OF CHILDREN OUTSIDE GEOGRAPHIC ATTENDANCE ZONES TO EFFECT SUCH BALANCING. BALANCING AND COMPULSORY BUSSING INFRINGE ON THE PERSONAL RIGHTS AND LIBERTIES OF THE CHILDREN INVOLVED.

The test of reasonableness adopted by the Court of Appeals–instead of one that calls for absolutes–can be the only sensible standard. Transportation may be employed on a "reasonable" basis as a legitimate tool to effectively desegregate an otherwise dual system. However, this still leaves open to question the circumstances under which and the purposes for which bussing may be or should be imposed upon a school system.

The mandate of the Constitution does not require racial balancing or compulsory bussing outside of normal attendance zones to achieve such balancing if the attendance areas are fairly drawn.

1. Racial Balancing and the Bussing to Achieve It Were the Bases for the Decisions of the Trial Court and Court of Appeals.

The net effect of the trial court orders of February 5, 1970, and August 3, 1970, was to require racial balancing at all three instructional levels and the bussing necessary to implement it–regardless of cost or disruptions. The net effect of the Court of Appeals decision was to impose racial balancing at the junior and senior high levels and to authorize

it at elementary level—tempered only by its test of reasonableness with reference to the amount of bussing involved.

In its August 3, 1970, Order the district court asserts that " 'Racial balance' is not required by this court, merely racial diversity." (Pets.' Br. A10). This was merely a reaffirmation of its previous denials that its prior denials that its prior orders were not based upon a requirement of "racial balance" (710a, 821a). A careful consideration of the various orders of the district court clearly shows that contrary to the trial judge's disclaimers his rulings were in fact premised upon the proposition that a racial balancing of the Charlotte-Mecklenburg schools is required by the Law of the Land.

In its April 23, 1969, Order (310a) the trial court entertained doubts about its power to order a racial ratio in the various schools of the Charlotte-Mecklenburg system:

> Counsel for the Plaintiffs says that since the ratio of white to black students is about 70/30 the School Board should assign children on a basis of 70% white and 30% black and bus them to all schools. This Court does not feel that it has the power to make such a specific order.

In its December 1, 1969, Order (710a) the trial judge acknowledged that his previously expressed doubts had been dispelled:

> . . .[T]he court will start with the thought, originally advanced in the order of April 23, that efforts should be made to reach a 71/29 ratio in the various schools so that there would be no basis for contending that one school is racially different from the others, but to understand that variations from that norm may be unavoidable.

In his February 5, 1970, Order (822a) the trial judge abandoned temporarily any pretense concerning racial balancing as a requirement when he directed:

> That pupils of all grades be assigned in such a way that as nearly as practicable the various schools at

various grade levels have about the same proportion of black and white students.

The Court of Appeals likewise disavowed any purpose to require racial balancing of the Charlotte-Mecklenburg schools. In his dissent, Circuit Judge Bryan cut through the sematics employed by both the district court and his colleagues on the Court of Appeals (1293a-1294a):

> The Court commands the Charlotte-Mecklenburg Board of Education to provide busing of pupils to its public schools for "achieving *integration*". (Accent added) "[A]chieving integration" is the phraseology used, but actually, achieving racial *balance* is the objective. Busing to prevent racial imbalance is not as yet a Constitutional obligation. Therefore, no matter the prior or present utilization of busing for this or other reasons, and regardless of the cost consideration or duplication of the bus routes, I think the injunction cannot stand.
>
> Without Constitutional origin, no power exists in the Federal courts to order the Board to do or not to do anything. I read no authority in the Constitution, or in the implications of *Brown v. Board of Education*, 347 U.S. 483 (1954), and its derivatives, requiring the authorities to endeavor to apportion the school bodies in the racial ratio of the whole school system.
>
> The majority opinion presupposes this racial balance, and also busing to achieve it, as Constitutional imperatives, but the Chief Justice of the United States has recently suggested inquiry on whether "any particular racial balance must be achieved in the school; . . . (and) to what extent transportation may or must be provided to achieve the ends sought by prior holdings of the Court." . . .
>
> I would not, as the majority does, lay upon Charlotte-Mecklenburg this so doubtfully Constitutional ukase. (Emphasis by Judge Bryan.)

In expressing his approval of the district court's plan at all three instructional levels, Circuit Judge Winter in his dissenting opinion candidly acknowledges that racial balancing *per se* should be required and cites as his justification the teacher ratios discussed in *United States v. Montgomery Board of Education*, 395 U.S. 225 (1969). Judge Winter concludes: "if in a proper case strict application of a ratio is an approved device to achieve faculty integration, I know of no reason why the same should not be true to achieve pupil integration . . ." (1301a-1302a).

Having had substantial integration of its faculties in the past, with the opening of its schools this fall Charlotte-Mecklenburg has in each of its 103 schools a white-black teacher ratio of about 3 to 1, which is the racial ratio of faculty members throughout the system. The School Board believes these assignments to be beneficial for both black and white children. However, we do not agree with the district court or Circuit Judge Winter that racial balancing of teachers can be cited as support for the proposition that children can or should be racially balanced as a Constitutional requirement. Teachers are under no compulsion to teach in a particular system. Teacher assignments occasion little, if any, inconvenience for the teacher and no costs or disruptions are imposed upon the school system. By contract they are employed by a system to apply their teaching talents wherever needed. If dissatisfied, they are free to quit and move to a system where employment contracts and conditions are more to their personal likings. Children must attend the school to which they are assigned and have no option to escape the unpalatable effects of their forced participation in a program of racial balancing designed to accommodate others.

In *United States v. Montgomery County Board of Education, supra*, at 236, this Court observed that the petitioners in that case did not argue "for precisely equal ratios in every single school under all circumstances" and that the United States did not argue that "racially balanced faculties are constitutionally required." As noted above, in apparent

agreement with the principle of racial balancing of school children, Circuit Judge Winter sought to temper the import of the district court order with the mollifying comment that "deviations from the overall ratio" had been permitted to "accommodate circumstances" with respect to particular schools. To one wedded to the proposition that racial balancing and ratios is the desired objective, circumstances and practical problems will seldom be asserted to prevent the achievement of this goal.

2. Racial Balancing and Compulsory Bussing Required by the District and Circuit Courts Violate the Constitutional Rights of the Children Involved.

In its February 2, 1970, Plan the School Board concluded with a statement of its conviction that its duty is to protect the rights of all children (741a):

> . . . The Board understandably is prone to *exercise caution lest, in protecting the rights of some of its citizens, it tramples on the rights of others* in the absence of a clear mandate of the Supreme Court. (Emphasis added.)

This concern of the Board was well-founded. The compulsory cross and satellite bussing requirements of the district court and the Court of Appeals will violate the individual rights guaranteed by the Fourteenth Amendment of those blacks and whites caught up in the forced mass movement of children away from their neighborhoods and out of their normal attendance zones for the sole purpose of achieving the racial balancing prescribed by those orders. It is ironic that the counterpart of the compulsion outlawed by *Brown I* and *II* is now employed in the name of the Constitution. Is it trite to suggest that two wrongs do not make a right?

It is obvious that a school board must necessarily have wide latitude in the establishment of attendance zones for orderly administration of the various schools in its system

and that, if these zones are fairly conceived on a nondiscriminatory basis, the children may be compelled to attend the school to which they are assigned under the applicable compulsory attendance laws. (See N.C.G.S. Sec. 115-116 et seq.) Absent an unlimited freedom of choice arrangement (which the Charlotte-Mecklenburg Board has not proposed), the right of a child to go to a particular school is, of course, not absolute, but circumscribed by the inherent power of a school board to make reasonable attendance assignments to conform to the needs of the school system and the community it serves.

Whether or not the Board as an elective body could lawfully have required cross and satellite bussing to effect the compulsory mass movement of children may be open to question. Suffice it to say, the Board did not choose to go to this extreme. The point now at issue is whether the judiciary under the mandates of the district court and the Court of Appeals infringed upon the individual constitutional rights of the children and their parents–black and white–who do not want to be bussed or balanced. In requiring this compulsory bussing those orders exceeded any Constitutional requirement, by *excluding* children from attending nearby schools *solely* on account of their race.

Deal v. Cincinnati Board of Education, supra, at 1391-92 (6th Cir. 1969) addressed itself to this matter:

> It is the contention of appellants that the Board owed them a duty to bus white and Negro children away from the districts of their residences in order that the racial complexion would be balanced in each of the many public schools in Cincinnati. It is submitted that the Constitution imposes no such duty. *Appellants are not the only children who have constitutional rights.* There are Negro, as well as white, children who may not want to be bussed away from the school districts of their residences, and they have just as much right to attend school in the area where they live. They ought not to be forced against their will to travel out of their neigh-

> borhoods in order to mix the races. (Emphasis added.)

The district judge in *Ross v. Eckels, Houston Independent School District, supra*, asked an interesting question:

> Our hypothetical student well might say to the Superintendent of Instruction, "You are excluding me from School A, two blocks from my home, because I am black, and for no other reason. How can you do this when the Supreme Court of the United States in its latest pronouncement on the subject imposes on you the duty 'to operate as [a] unitary school system *within which no person is to be effectively excluded from any school because of race or color*?" I would be interested to know how this question would be answered. (Emphasis added.)

From time immemorial, the public school has been a focal point of community and family life. The location of a particular school is a major consideration for parental decisions regarding the location of their homes and the neighborhood in which they choose to live. Obviously, affluent whites and blacks are normally better able to make this choice than poor whites and blacks. Nevertheless, some poor people prefer that their children attend the school serving the areas of their residence. To afford disadvantaged parents the flexibility of greater options for the education of their children than their existing economic or social status may permit and to bring these available options made in line with those enjoyed by the more affluent citizens are worthwhile objects of any desegregation plan. But it is quite a different matter for a judicial decree to compel bussing to a distant school outside the normal attendance zones–whether the parents like it or not. A court mandate that requires this coercion to achieve what it conceives to be a worthy social purpose (i.e. racial balance) is judicial paternalism.

The dissenting opinion of Judge Bell (concurred in by Judge Gewin) in *United States v. Jefferson County Board of Education, supra*, involving the desegregation of numerous deep south schools, speaks to the matter at hand (at 411):

> Then there is the matter of personal liberty. *Under our system of government, it is not to be restricted except where necessary, in balance, to give others their liberty, and to attain order so that all may enjoy liberty.* History records that sumptuary laws have been largely unobserved because they failed to recognize or were needlessly restrictive of personal liberty . . . They (the majority opinion) *cast a long shadow over personal liberty as it embraces freedom of association and a free society.* They do little for the cause of education. (Emphasis added.)

In *Jefferson County, supra*, Judge Gewin in his own dissent (concurred in by Judge Bell) expressed similar views

> . . . There must be a mixing of the races according to majority philosophy *even if such mixing can only be achieved under the lash of compulsion* . . . Accordingly, *while professing to vouchsafe freedom and liberty to Negro children, they have destroyed the freedom and liberty of all students, Negro and white alike.* There must be a mixing of the races, or integration at all costs, or the plan does not work according to the opinion. Such has not been and is not now the spirit or the letter of the law . . . *When our concepts as to proportions and percentages are imposed on school systems,* notwithstanding free choices actually made, *we have destroyed freedom and liberty by judicial fiat; and even worse, we have done so in the very name of that liberty and freedom we so avidly . . . embrace.* (Emphasis added.)

The majority in *Jefferson, supra*, and other courts have sought to justify infringement upon the rights of students in the majority where segregation is said to rest upon *de jure* action.

The distinction between *de facto* and *de jure* is not a valid test by which to measure the liberties of either black children or white children. It is fair to assume that both black and white school children are blissfully unaware of any such distinction or of the circumstances that are relied

upon by some to justify unequal treatment. The personal rights and liberties of one child should not be sacrificed to promote those of another.

3. A Neighborhood Plan Fairly Administered Without Racial Bias Satisfies the Constitutional Requirements of a Unitary System.

The neighborhood school concept[21] is one that the Board considers to be beneficial to the children and enhances the support that comes when children and parents identify themselves with a particular school and its programs. Fragmentation of this type of association is not in the best interest of our schools.

In its April 23, 1969, Order the district court volunteered its own educational philosophy in opposition to the neighborhood school (306a):

> Today people drive as much as forty or fifty miles to work; five or ten miles to church; several hours to football games; all over the country for civic affairs of various types. The automobile has exploded the old-fashioned neighborhood . . . If this court were writing the philosophy of education, he would suggest that educators should concentrate on planning schools as educational institutions rather than as neighborhood proprietorships . . .

To the contrary, all too many of our present day relationships have become institutionalized and depersonalized. We believe this trend to be unwholesome. Close relationships among teachers, parents and children should to the maximum extent be encouraged and undergirded. The neighborhood school plays an important part in fostering such relationships–particularly at the elementary level where the

---

[21]Geographical zoning is the common method of determining school attendance and the neighborhood school is the predominant attendance unit. *Racial Isolation in the Public Schools–Summary of a Report by the Commission on Civil Rights*, page 3, (March 1967).

ties between home, school and after-class acitvities are an important part of the educational process of children in their early formative years. In a metropolitan system such as ours the ideal may not always be achieved. This should not be a reason for dismantling and abandoning the neighborhood school.[22]

From the beginning there has been this marked contrast between the views of the trial court and those of the Board regarding the pertinence of the neighborhood school. The School Board responded to the pressure of the trial court when it submitted its February 2, 1970, plan—a plan which retained, but severely strained, the principle of the neighborhood school. *Deal v. Cincinnati Board of Education*, 324 F.2d 209 (6th Cir. 1966) succinctly stated the case for the neighborhood school:

> Appellants, however, pose the question of whether the neighborhood system of pupil placement, fairly administered without racial bias, comports with the requirements of equal opportunity if it nevertheless results in the creation of schools with predominately or even exclusively Negro pupils. The neighborhood system is in wide use throughout the nation and has been for many years the basis of school administration. This is so because it is acknowledged to have several valuable aspects which are an aid to education, such as minimization of safety hazards to children in reaching school, economy of cost in reducing transportation needs, ease of pupil placement and

---

[22]It is interesting to note that in the brief filed by petitioners with this Court in *Green, supra*, October Term, 1967, No. 695, substantially the same view of the importance of the neighborhood school was expressed at page 14 of that brief: "Prior to the relatively recent controversy concerning segregation in large urban systems, assignment by geographic attendance zones was viewed as the soundest method of pupil assignment. This was not without good reason; for placing children in the school nearest their home would often eliminate the need for transportation, encourage the use of schools as community centers and generally facilitate planning for expanding school populations."

> administration through the use of neutral, easily determined standards, and better home-school communication.

This appraisal was reaffirmed in *Deal v. Cincinnati Board of Education* (1969) *supra*, wherein the Court observed that the neighborhood school concept was not only sanctioned, but required, by statute in the State of Ohio.

In his policy statement of March 24, 1970, entitled *SCHOOL DESEGREGATION: A Free and Open Society* (116 Cong. Rec. S4351, Daily Ed., March 24, 1970), the President of the United States addressed himself at length and in depth to the important role that the neighborhood school plays in the education of our public school children. He said in part:

> The neighborhood school will be deemed the most appropriate base for such a [unitary] system.
>
> Transportation of pupils beyond normal geographical school zones for the purpose of achieving racial balance will not be required.

An earlier statement[23] by Robert Finch, then Secretary of Health, Education and Welfare, with particular reference to the Charlotte case, underscored some of the ill-effects of a dismantling of the neighborhood schools:

> We have a very confused set of decisions—that go to both ends of the spectrum with regard to the question of bussing, for example. We have a decision out of the Fifth Circuit involving Orange County, Florida, which says in effect the neighborhood school is the important concept, and that must be preserved at all costs, and that's where the dollars ought to be allocated.
>
> Then you have decisions like Charlotte, in the Carolinas, in Los Angeles, which I think are totally unrealistic, because they say that you shall take the

---

[23] *PROFILE*, a production of Metromedia Radio News, Feb. 27, 1970, Transcript at 7-8.

> percentages in the district as a whole and apply those and force those on each district—or, each school within that district.
>
> And in the case of Charlotte, they have to buy 400 new buses; in the case of Los Angeles, they have to buy, I guess, better than 500 new buses, with all that goes with that, and when you have that kind of a situation, that's not the best use of your resources, because you're trying desperately to keep the doors open, to pay faculty, to pay janitors. But beyond that, it's not the best educational experience, because to haul young children, for an hour or more, across long distances, as you have particularly in the Los Angeles situation, means they can't get any tutoring after school, the parents can't—have great difficulty in getting to the teacher to talk about their child; they can't take part in athletic events, or dramatic events or extracurricular events, and it's not good educational policy.
>
> So that I feel very strongly that those decisions are moving in the wrong direction.

In the Charlotte-Mecklenburg case, the trial court quite obviously considered the neighborhood school to be unimportant and irrelevant. The Court of Appeals, though not addressing itself *per se* to the neighborhood school concept, nevertheless disapproved the geographic zones at all three instructional levels which the Board in its considered judgment had proposed to achieve a unitary system while retaining the basic benefits of the neighborhood school.[24]

---

[24] In commenting upon the complexities of ineffective freedom of choice plans, the petitioners in *Green, supra*, at page 15 of their brief, recommended the simplicity of disestablishing dual zones by conversion to compact attendance areas close to home: "The easiest method, administratively, was to convert the dual attendance zones into single attendance zones, without regard to race, so that assignment of all students would depend only on proximity and convenience. With rare exception, however, southern school boards, when finally forced to begin desegregation, rejected this relatively simple method . . . ."

The School Board plan clearly demonstrates a good faith, conscious and effective effort to keep its neighborhood school attendance areas–drastically gerrymandered to promote maximum desegregation. This plan satisfies the Constitutional requirement that a unitary system be established within which no child is excluded because of race or color.

4. The Compulsory Bussing Approved by the Court of Appeals Is Violative of the Provisions of Section 401(b) and 407(a)(2) of the Civil Rights Act of 1964 [42 U.S.C. 2000c(b) and 2000c-6(a)(2)] Which Expressly Prohibits a United States Court To Order Transportation To Achieve Racial Balance in Schools.

The Court of Appeals has read into the Civil Rights Act of 1964 interpretations which are not fairly warranted by the plain and intelligible language of the Act or supported by its legislative history. In so doing, it has joined the error committed by the Court of Appeals for the Fifth Circuit in *Jefferson, supra*, which reached its conclusion by a strained illogical analysis of this Act and the legislative history.

The clear language of the Act makes no distinction between *de facto* and *de jure* segregation and the legislative history expressly disclaims any sectional or tenuous distinctions adopted by the Court of Appeals and the cases on which it relies. If it were otherwise, Congress would have expressly so stated and the proponents of the bill would have made it so known.

The Courts have been unwilling to give any definitive statement with respect to the term "desegregation" and, therefore, it became incumbent upon Congress to supply an answer in this void. 42 U.S.C. 2000c(b) provides as follows:

> "Desegregation" means the assignment of students to public schools and within such schools without

> regard to their race, color, religion or national origin, but "desegregation" shall not mean the assignment of students to public schools in order to overcome racial imbalance.

It is therefore apparent that Congress in expressing a definition of "desegregation" in a positive manner stated that no student would be *excluded* from his school on account of race, color, religion or national origin. This is the language of *Alexander v. Holmes, supra*. Congress also negatively stated "desegregation" does not mean assignment to overcome racial imbalance.

In order to give further meaning to its definition, Congress by 42 U.S.C. 2000c(a) provides in part as follows:

> . . .[P]rovided that nothing herein shall empower any official or court of the United States to issue any order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another or one school district to another in order to achieve such racial balance, or otherwise enlarge the existing power of the court to insure compliance with Constitutional standards. . . .

The term "desegregation" has taken on such national concern and importance that a Congressional definition may properly be regarded as a statement of public policy. Although the courts may take action with reference to establishing public policy, it primarily rests with the lawmakers to determine public policy. In *Building Service Employees International Union v. Gazzam*, 339 U.S. 991 (1950), the Supreme Court held:

> The public policy of any state is to be found in its Constitution, acts of the legislature, and the decisions of its courts. *Primarily, it is for the lawmakers to determine the public policy of the state.* (p. 787) *Twin City Pipeline Company v. Harding Glass Co.*, 283 U.S. 353, 357, 51 S. Ct. 476, 478, 75 L. Ed. 1112, 83 A.L.R. 1168.

Having primary responsibility, and acting to fill a void left by the courts, the public policy as expressed by the Congress of the United States is binding upon the judiciary.

Shortly after the Civil Rights Act of 1964 became the law of the land, the Circuit Court for the Fifth Circuit by a three-judge panel in *United States v. Jefferson County Board of Education*, 372 F.2d 836 (1966) commonly referred to as *Jefferson I*, and *en banc* in *United States v. Jefferson County School Board*, 380 F.2d 385 (1967), commonly referred to as *Jefferson II*, undertook to dissect that Congressional enactment. In *Jefferson I* the Court acknowledged the supremacy of the legislature in the establishment of national policy in the constitutional scheme of things and the restraints that should be employed by the judiciary in running counter to such a declaration policy:

> More clearly and effectively than either of the other two coordinated branches of government Congress speaks as the voice of the nation. (at page 850) . . . When Congress declares national policy, the duty the other two coordinated branches owe to the nation requires that, within the law, the judicial and executive respect and carry out that policy. (at 856) . . . We shall not permit the Courts to be used to destroy or dilute the effectiveness of the Congressional policy. (at 856) . . .

Having made these pronouncements, the panel in *Jefferson I* abandoned these professed restraints and adopted a rationale by which it came to unwarranted conclusions that clearly thwarted the legislative policy as expressed in the Civil Rights Act of 1964[25] expressly forbidding racial balancing

---

[25]The remarks of Hubert Humphrey, then Majority Whip, made during the course of Senate deliberations are a clear down-to-earth expression of the legislative intent:

> . . .[T]he Constitution prohibits segregation, it does not require integration. The busing of children to achieve racial balance would be an act to effect the integration of schools. In fact, if the bill were to compel it, it would be a violation, because it would be handling the matter on the basis of race and we would be transporting children because of race. The

and the use of transportation to achieve it. This error was perpetuated by the majority in *Jefferson II* and other courts relying upon the ill-considered reasoning of these cases.

Judge Bryan in his dissent in the Charlotte-Mecklenburg case clearly recognizes congressional hostility to the principle of "racial balance":

> Even construed as only incidental to the 1964 Civil Rights Act, this legislation in 42 United States Code §2000c-6 is necessarily revealing of Congress' hostile attitude toward the concept of achieving racial balance by bussing. It unequivocally decried in this enactment "any order [of a Federal Court] seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another . . . to achieve racial balance . . .

The opinions and orders of the Court of Appeals and of the district court are based on the premise that balancing of the races in each of the Charlotte-Mecklenburg schools is the optimal objective. Those opinions and orders contravene the prohibition of the Civil Rights Act of 1964.

F. RACIAL BALANCE–THE HARBINGER OF MASSIVE COURT INVOLVEMENT IN SOCIAL THEORIES.

The Supreme Court is now being asked by petitioners to direct this School Board to engage in another experiment in efforts to seek some educational or social goal which has eluded them and will continue to do so for years to come. It is well known that social balance, social equivalence,

---

bill does not attempt to integrate the schools, but it does attempt to eliminate segregation in the school systems. The natural factors such as density of population, and the distance that students would have to travel are considered legitimate means to determine the validity of a school district, if the school districts are not gerrymandered, and in effect deliberately segregated. The fact that there is a racial imbalance per se is not something which is unconstitutional. 110 Cong. Rec. p. 12717, June 4, 1964.

educational equivalence and related concepts will not be accomplished by the blacks over night. All the sociologists and educators agree on this point.

The theory advanced by the petitioners in the original *Brown* case, *supra*, was not that every child would be entitled to go to a non-segregated school, but rather that the children would be distributed to the schools by drawing attendance lines on a natural basis. 21 U.S.L.W. 3164 (Dec. 16, 1952). This position was pursued in *Cooper v. Aaron*, 358 U.S. 1 (1958) where petitioners sought enforcement of a plan which proposed to "develop school attendance areas consistent with the location of white and colored pupils with respect to the present and future physical facilities of the Little Rock school district." *Norwood v. Tucker*, 287 F.2d 798 (8th Cir. 1961).

The theory of freedom of choice was successfully urged upon this Court in *Goss v. Knoxville*, 373 U.S. 683 (1963) and was openly embraced by the Department of Health, Education and Welfare under the Civil Rights Act of 1964 and by the Fifth Circuit in *United States v. Jefferson*, 380 F.2d 385 (1967).

Petitioners' attorneys in *Green, supra*, (Oct. term, 1967, #695), on page 15 of their brief, argued:

> After Brown, southern school boards were faced with the problem of "effectuating a transition to a racially non-discriminatory system" (Brown II at 301). *The easiest method*, administratively, was *to convert* the dual attendance zones *into single attendance zones*, without regard to race, so that assignment of all students would depend only on *proximity* and *convenience*.[16]
>
> [16]Indeed, it was this method that this Court alluded in Brown II when it stated "[t]o that end, the courts may consider problems related to administration, arising from . . . revision of school districts and attendance areas into compact units to achieve a system of determining admission to the public schools on a non-racial basis" (349 U.S. at 300-301). (Emphasis added.)

Similar expressions appear throughout petitioners' brief in *Green*.

Notwithstanding petitioners' arguments in *Green*, and notwithstanding appellate approval of the existing attendance lines of the Charlotte-Mecklenburg system, the Board gerrymandered so as to produce a maximum racial mix in schools and proposed to totally desegregate faculties. It has gone far beyond the requirements of *Brown, Green* and the position of the NAACP throughout all Supreme Court proceedings. Now the NAACP seeks total racial balance. Why?

For years, the courts and school systems have been advised that dramatic improvement in the performance of black students could be expected upon the attainment of desegregation. The Coleman Report teaches there is a tendency for blacks to improve in desegregated schools. The achievement tests of this system (R. Ex. 64, July 15, 1970) disclose that the improvement brought about by desegregation is indeed slight. Perhaps the reason is that this system has been offering educational equivalence in its facilities and programs for some years (298a-302a).

The disappointing results of school desegregation brings to the forefront the environmentalists who have consistently maintained that the environment and attitudes of a child are the largest determinants in achieving equivalence. How will the courts meet this problem? Will it require massive economic assistance to families in the lower economic strata? Perhaps the court will be persuaded that the attitudes and environment of the blacks may be enhanced by enlarging the school board's responsibility with respect to food, clothing and shelter, all of which may best be resolved by placing these children in state maintained boarding educational centers. If the court has at that time accepted the racial balance theory, then in view of the substantial transportation times which children encounter in traveling to and from these centers, it is a simple step of mental gymnastics to require full attendance of whites in these educational centers so as to further satisfy the peer

group advocates. If this Court embraces the principle of racial balancing, it will have adopted the proposition that the constitutional rights of one child may be submerged to promote the presumed rights of another.

Even this will not produce total social mixing sought by petitioners and additional areas of court intervention will be requested which the court must be prepared to face. For instance, the district court conjectured that public housing has been concentrated by action of federal officials. Obviously, the concentration of blacks in large public housing projects would perpetuate segregation not only in the schools but in neighborhoods. Will the court limit the size of public housing projects and the distance between such projects so as to assure dispersal of blacks?

Related questions arise in the area of private residential housing which the district court said perpetuated segregation. Will this Court ultimately require a private owner of a subdivision to include a prescribed quota of homes for blacks only in each block of a residential development? Will transportation be required in remote suburban areas for those blacks who customarily use public transportation?

Numerous other questions relate to what extent this Court will require local public authorities to inaugurate plans for the racial residential balancing of entire communities. If community balancing is required, will judicial control over power possessed by local building licensing officials be used to establish and maintain such balancing? Will local governments be required to submit for court approval plans for desegregation of entire cities? Will such plans be subject to continued judicial review and supervision?

Another area which petitioners may pursue through the courts relates to school grading, IQ and achievement tests administered by the school system. Obviously, those students who perform poorly in school on such tests are less likely to get the desired employment positions. The remedy which may be urged upon the courts is that such grading is unfair to minority groups with different cultural back-

grounds. Therefore, all students should be automatically promoted as having received the same education and given the same certificate on graduation. In the eyes of the prospective employer, all students would possess the same educational qualifications. Is this Court prepared to foist this theory upon the nation?

Recently, this Court had occasion to pass upon the unconstitutionality of disproportionate district representation which resulted in the "one man one vote rule." *Reynolds v. Sims*, 377 U.S. 533 (1964). School boards are now being faced with demands by black students that student organizations, cheerleaders, school officers, class officers and other positions ordinarily determined by popular vote be accorded blacks pro rata and without regard to the vote of the majority. If this Court should direct pro rata representation in the schools, then this Court must be prepared to answer similar demands of these black students when they move into the adult world which does not permit racial ratios in elective offices. Will this Court direct that minority groups be permitted to select a pro rata number of seats in Congress, state legislatures and other positions of government?

It is quite obvious that this Court would be unwilling to order the adults of this society to such extremes in an attempt to attain social racial balances. Are children any less citizens by reason of their youth? Certainly not, as they are accorded the full spectrum of constitutional rights and obligations conferred on adults, other than the right to vote. This being true, this Court cannot justify taking from the children involved their personal preferences, their time, their right to free association and the host of other rights they possess as citizens which would be sacrificed in being involuntarily transported to a school beyond the area in which they reside—solely for the purpose of satisfying a racial balance numbers game. The rights of one child and the child's parents to be free of standardization by the state is clearly enunciated in *Pierce v. Society of Sisters*, 268 U.S. 510, 534 (1925):

> . . . The fundamental theory of liberty upon which all governments in this union repose excludes any general power of the state to *standardize its children* by forcing them to accept public instruction from public teachers only. *The child is not the mere creature of the state*. Those who nurture him and direct his destiny have the right, coupled with the high duty, to recognize and prepare him for additional obligations. (Emphasis added.)

In describing the word "liberty", this court held in *Meyer v. Nebraska*, 262 U.S. 390, 399 (1923), as follows:

> While this court has not attempted to define with exactness the liberty thus guaranteed, the term has received much consideration and some of the included things have been definitely stated. Without doubt, it denotes not merely freedom from bodily restraint, but also the right of the individual to contract, to engage in any of the common occupations of life, to acquire useful knowledge, to marry, establish a home and bring up children, to worship God according to the dictates of his own conscience and generally to enjoy those privileges long recognized at common law as essential to the orderly pursuit of the happiness of men . . . The established doctrine is that this liberty may not be interfered with under the guise of protecting the public interest by legislative action which is arbitrary or without reasonable relation to some purpose within the competency of the state to effect . . .

If this Court directs racial balance in the child's world, then there is no constitutional prohibition which would prevent the court ordering racial balance in the adult world. The Constitution as written and as developed contains no premise upon which to undergird such reckless appropriation of the constitutional rights of its citizens, be they children or adults. Mr. Justice Reynolds in *Meyer v. Nebraska, supra*, describing the totalitarian ancient state of Sparta, stated:

> . . . In order to submerge the individual and develop ideal citizens, Sparta assembled the males at seven into barracks and entrusted their subsequent education and training to official guardians. Although such measures have been deliberately approved by men of great genius, their ideas touching the relation between individual and state were wholly different from those upon which our institutions rest; and it hardly will be affirmed that any legislature could impose such restrictions upon the people of the state without doing violence to both the letter and spirit of the Constitution.

Will the courts tread where it has forbidden the legislature to walk?

II. DISCUSSION OF CONSTITUTIONAL PRINCIPLES TO DESEGREGATION PLANS.

A. GENERAL STATEMENT REGARDING DESEGREGATION PLANS INVOLVED IN THIS CASE.

When the Fourth Circuit heard this case, there were two plans before it, both of which related to all three instructional levels: The February 2, 1970, plan of the Board and the February 5, 1970, plan of the district court, which the trial judge later reapproved and reinstated in his orders of August 3 and August 7, 1970. After remand by the Court of Appeals, during the course of the hearings held pursuant to the Circuit Court directives, three other desegregation plans were presented for the elementary level: the HEW plan, a plan prepared by a minority of the Board and an earlier draft of a plan prepared by the court consultant Dr. John A. Finger. In his August 3, 1970, Order, the trial judge disapproved the HEW plan and found the other two to be reasonable alternatives. Having appealed to the Fourth Circuit from the August 3 and August 7 Orders, the School Board on September 3, 1970, filed with this Court a motion for leave to supplement the record, or in the alternative for a Writ of Certiorari to the Court of Appeals, so that this

Court would have before it the complete record of the proceedings that culminated in the August 3 and August 7 Orders–including the three additional plans referred to above. As this brief is being prepared no action has been taken by this Court upon the Board's motion of September 3. On the assumption that the motion will be granted, this brief addresses itself to all five plans.

In an effort to be of the greatest possible assistance to this Court, as a separate appendix to this brief the School Board has filed a total of 9 maps (color coded where appropriate) to show graphically the attendance areas, pairings, clusters and other information concerning all of the plans–with the exception of the earlier Finger draft that was too indefinite for adaption to a graphic portrayal. Careful consideration of these maps is earnestly invited with the hope that this Court will find them to be a convenient means of getting a quick accurate picture and comparison of the various desegregation proposals.

B. THE BOARD PLAN CONVERTS THE CHARLOTTE-MECKLENBURG SCHOOLS TO A UNITARY SYSTEM. THE FOURTH CIRCUIT JOINED IN THE ERROR OF THE TRIAL COURT BY DISAPPROVING THAT PLAN.

1. The Board Plan Squares with the Conversion Checklist Prescribed by Green.

In *Green, supra*, this Court (commenting upon the typical pattern of state-imposed dualty found in New Kent County and outlawed by *Brown I* and *II*) observed at 435:

> . . . Racial identification of the system's schools was complete, extending not just to the *composition of student bodies* at the two schools but to every facet of school operations–*faculty, staff, transportation, extracurricular activities and facilities* . . . (Emphasis added.)

This itemization has been used by courts as a checklist by which to measure the effectiveness of desegregation efforts.

The administrative staff and school faculties of the Charlotte-Mecklenburg system are now thoroughly integrated. In its April 23, 1970, Order the district judge made specific findings that there was no discrimination with respect to the "other facets" referred to in *Green*, as well as a number of others (298a-301a). The Fourth Circuit also took note of these (1265a-1266a). In addition the Board has inaugurated many other innovative programs.

Most of these policies and practices were undertaken by the Board on its own initiative, a circumstance that prompted the district court to state that nothing in its April 23, 1969 Order shall be construed as any reflection on the good faith motives or judgment of the School Board which had "achieved a degree and volume of desegregation of schools apparently unsurpassed in these parts and have exceeded the performance of any school board whose actions have been reviewed in appellate court decisions. The Charlotte-Mecklenburg schools in many respects are models for others." (311a-312a).

Since the petitioners do not controvert the findings of the trial judge in giving Charlotte-Mecklenburg a clean bill of health with respect to these "other facets," the only one at issue in this case involves the question of whether the Board plan effectively eliminates discrimination in the schools and student bodies of this system.

2. The Board Plan Based on Geographic Attendance Zones Gerrymandered to Achieve Maximum Racial Mix Fully Complies with Constitutional Requirements for Desegregation of the Charlotte-Mecklenburg Schools and Their Student Bodies.

The pivotal issue in this case is whether the School Board's desegregation plan based on comprehensively restructured geographic attendance zones satisfies the Constitutional requirement of a unitary system in a situation where these zones are established to promote the maximum amount of desegregation possible by the employment of this tech-

nique.[26] This issue involves a consideration of the extent to which a school board may employ this technique as a means of preserving some semblance of the neighborhood school concept which it, together with most school systems and educators, believe to be beneficial.[27]

Of the maps previously referred to, the Court's attention is invited to Map Nos. 1, 6 and 8 showing the elementary, junior high and senior high restructured zones of the Board

---

[26]The Board plan is supplemented by a majority to minority transfer program designed to promote desegregation and to prevent resegregation. It allows any black child in a school having more than 30% of his race to attend one that is less than 30% black, but permits a white child to transfer only if his present school is more than 70% white and the one to which he seeks assignment is less than 70% white. To encourage blacks to take advantage of this option, transportation is provided for those chosing to move from their neighborhoods.

[27]Compare article appearing in NATION'S SCHOOLS, June, 1970, page 100, entitled "*Forced Busing Vetoed by 90% of Schoolmen*":

> Although nearly 40 per cent of the nation's school superintendents think the Nixon Administration is vacillating on its enforcement of school desegregation, 90 per cent agree with the President's recently stated reservations about compulsory busing . . .
>
> Despite the various shadings of opinion on enforcement policy, most schoolmen reported unequivocal opposition to busing as a means for achieving desegregated schools. Judging form their comments, for a sizeable majority of superintendents the neighborhood school represents, as one New Yorker expressed it, "a fundamental principle in American public education." Objections to busing fell mainly into the following categories:
>
> Busing is an infringement on the rights of parents and students.
>
> Busing is a poor solution to the problem of desegregating the schools since the long-term answer depends on the alteration of residential housing patterns.
>
> Busing is too expensive a solution, when money could be better spent to upgrade educational programs in poverty area schools . . .
>
> How administrators voted: . . .

plan and Map No. 2 showing the new elementary zones superimposed upon the previous attendance areas.[28]

Under the Board plan, 100 of the 103 schools in the Charlotte-Mecklenburg System would have some degree of racial mix, leaving only three all-white schools. 68% (16,709) of the black students would attend 93 schools with less than 40% black student bodies[29]—leaving the remaining 32% of the black pupils in the 10 schools having white ratios of 17% to 1%.[30] These 10 predominately black schools remained in spite of the Board's best efforts to achieve a more satisfactory racial mix in them by means of the drastically gerrymandered attendance lines. Of these 10 schools, 9 are elementary[31] and 1 is a junior high school.[32]

---

2. Do you think busing of students should be implemented to achieve desegregation, even if it means a weakening of the neighborhood school concept?

10% Yes 90% No . . .

The opinion poll survey, conducted monthly by the editorial staff of NATION's SCHOOLS, is based on a five per cent proportional sampling of 14,000 school administrators in 50 states. This month's poll brought a 40 per cent response.

[28]Some of these maps reflect slight adjustments occasioned by "rounding off" the square corners of the computer lines to conform them to identificable landmarks.

[29]This represents a 100% increase over 1969-70, when 8,858 blacks attended 73 predominately white schools. In March of 1965 only 343 blacks attended 22 white schools. Several predominately white schools slightly exceed 40% black.

[30]See Appendix attached to this brief for statistical data pertaining to the Board plan.

[31]Under the Board plan, these 9 elementary schools have the following black-white ratios: Bruns Ave. (90-10); Marie Davis (88-12); Double Oaks (99-1); Druid Hills (96-4); First Ward (99-1); Lincoln Heights (99-1); Oaklawn (99-1); University Park (85-15); and Villa Heights (83-17). (*A Plan for Student Desegregation*–Systems Associates, Inc., page 31.)

[32]Under the Board plan, Piedmont Junior High has a black-white ratio of 90% (B)-10% (W). (*A Plan for Student Desegregation*–Systems Associates, Inc., page 31.)

The remaining predominately black schools are located in the inner-city core which is populated for the most part by blacks, many of whom due to shifting housing patterns had moved into previously white areas. In its March 21, 1970, Supplemental Findings of Fact (1208a), the trial court acknowledged:

> Both Dr. Finger and the school board staff appear to have agreed, and the *court finds as a fact*, that for the present at least, there is *no way to desegregate* the all-black schools in Northwest Charlotte *without providing* (or continuing to provide) *bus or other transportation* for thousands of children. All plans and all variations of plans considered for this purpose lead in one fashion or another to that conclusion. (Emphasis added.)

In formulating its plan, the Board to a very significant degree has elected to exceed Constitutional requirements. It materially altered the compactness of neighborhood school areas.[33] It introduced into each school a precise black-white teacher ratio. It sought to achieve a 70/30

---

[33] *Brown II* recognized that an acceptable desegregation plan may employ geographical rezoning if done fairly and in good faith to effect "a revision of school districts and attendance areas into compact units to achieve a system of determining admission to the public schools on a non-racial basis." A pertinent historical note is made by Alexander M. Bickell in his recent book, *The Supreme Court and the Idea of Progress:*

> At the first argument of *Brown v. Board of Education* in 1952, Justice Frankfurter asked the future Justice Thurgood Marshall, then counsel for the Negro children, whether a decision in his favor would "entitle every mother to have her child go to a non-segregated school?" Mr. Marshall replied in the negative. "What will it do?" Justice Frankfurter pursued. Mr. Marshall replied: "The School Board, I assume would find some other method of distributing the children by drawing district lines." The only requirement would be, Mr. Marshall added, that the lines be drawn "on a natural basis," and not be gerrymandered so as to enclose or exclude Negro neighborhoods. Bickell, *The Supreme Court and the Idea of Progress*, p. 117 (1970). See also 21 U.S.L.W. 3164 (1952).

racial mix in as many of the 103 schools as possible–a goal which the Board maintains cannot be required by judicial fiat. Because of neighborhood patterns, only an intractable remnant of black children will be assigned to the 10 inner-city black schools. Any of these who wish to leave their neighborhoods are encouraged to do so by the majority to minority transfer policy and are provided the transportation with which to accomplish the move. Of those who remain, almost all are assured of a desegregated school experience for one-half of their 12 years.[34]

By any reasonable standard the Board plan dismantles whatever remained of the old dual system that years ago was maintained under the permissiveness of *Plessy v. Ferguson* and the compulson of State law. Any vestige of racial discrimination or identification has been obliterated. All facets of the Charlotte-Mecklenburg schools–including student bodies, faculty, staff, transportation, extracurricular activities and facilities–are desegregated. No child is excluded from any of the 103 schools because of race or color. As stated by the Court of Appeals (1268a), an intractable remnant of segregation "should not void an otherwise exemplary plan for the creation of a unitary system."

A consideration of the pro-desegregation gerrymandered zones of the Board excludes any inference that they were formulated for any purpose other than a color conscious one to promote maximum desegregation of the Charlotte-Mecklenburg Schools. The Board has acquitted its affirmative duty to convert to a unitary system.

Both the trial judge and the Court of Appeals erred when

---

[34]Of the 32% black children who will remain in predominately black schools 6,739 are assigned to 9 (out of a total of 72) elementary schools and 758 will attend 1 (out of a total of 21) junior high school. All 10 of the high schools are desegregated. Under the Board plan all of the 758 junior high students will advance to the predominately white high schools and all but a small handful of the elementary youngsters will advance to the 20 desegregated junior high schools.

they disapproved the Board plan—errors premised upon the faulty notion that more racial balancing should be superimposed upon that which the Board itself elected to undertake. By so doing, the Circuit Court exceeded the bounds of its own test of reasonableness.

C. THE COURT APPROVED FINGER PLAN EXCEEDS CONSTITUTIONAL REQUIREMENTS BY REQUIRING RACIAL BALANCING AND THE BUSSING TO IMPLEMENT IT. THE FOURTH CIRCUIT JOINED IN THE TRIAL COURT'S ERRORS BY DISAPPROVING THE BOARD PLAN AND MISAPPLYING ITS OWN RULE OF REASON.

This controversy revolves around the trial court's February 5, 1970, Order requiring long distance bussing to racially balance the elementary, junior high and senior high schools of the Charlotte-Mecklenburg system. The plan adopted by the trial court and ordered into effect was prepared by Dr. John A. Finger, Jr., a Professor of Education at Rhode Island College, who had previously appeared as a witness for the plaintiffs.[35] The objectionable features of the Finger plan were basically occasioned by his adding to the Board plan the paired and clustered schools and satellite areas that he considered necessary to comply with trial court instructions to eliminate the 10 schools that remained predominately black under the Board plan and to create a racial balance in one senior high school (981a). Upon appeal, the Fourth Circuit approved the secondary plans of the district court, but disapproved its elementary plan as being unreasonably onerous. Upon remand (August 3, 1970, Order) contrary to the Circuit Court ruling the trial judge concluded

---

[35]The Fourth Circuit in commenting on the use of Dr. Finger as court consultant cautioned against the use of a partisan witness, but concluded that his dual role did not cause him to be faithless to the trust imposed on him and therefore, "the error, if any, in his selection, was harmless." (1279a).

that his own elementary plan was reasonable and reaffirmed his February 5 Order at all three instructional levels.

1. An Analysis of the Court Approved Finger Plan Shows the Racial Balancing Imposed Upon the Charlotte-Mecklenburg Schools.

The following is a brief summary of the consequences of balancing requirements at all three instructional levels which were prescribed by the February 5 and August 3 Orders of the district judge—those at the secondary level having been approved by the Circuit Court and those at the elementary level having been held by the Circuit Court to be unreasonable because too extensive and onerous.

(a) *Elementary Schools*

The most burdensome part of the trial court's order is the long distance cross-bussing of about 10,300 elementary children to eliminate 9 predominately black inner-city schools by pairing them with 24 predominately white suburban schools—requiring the bussing of 5,150 black first, second, third and fourth graders to the white schools and 5,150 white fifth and sixth graders to the black schools.

It is ironic that, under court compulsion it is proposed to reinstate the dual bus system Charlotte-Mecklenburg abandoned years ago. Once again, buses for whites only and buses for blacks only will be passing each other on the streets of Charlotte.

This Court's attention is invited to Map 3 which shows more clearly than can any written description the practical effect of the racial balancing edicted by the court plan at the elementary level. The long streamers on that map are designed to assist this Court in identifying the 9 inner-city predominately black schools that are paired with the 24 white suburban schools for the sole purpose of achieving the optimal 70/30 racial mix the trial judge adopted as his goal.

These are the 9 elementary schools in which the School Board was unable to attain a more satisfactory mix[36] because the concentration in black neighborhoods is so great that pulling in whites from adjoining areas would cancel out the desegregation achieved under the Board plan in the nearby schools.

In disapproving the trial judge's elementary plan, the Fourth Circuit did not quarrel with the racial balancing goal sought to be realized. Under its test of reasonableness, the Court of Appeals merely concluded that, based on the trial court's estimates, the resulting increase of 39% in the number of elementary students bussed and 32% in the present bus fleet was too extensive and too onerous (1276a). The dissenters, Judges Sobeloff and Winter, were delighted with the results and the means of attaining them.

(b) *Junior High Schools*

The Board plan proposed to restructure the attendance lines of the 21 junior high schools so that all but one of them would not have more than 38% black students. In spite of the Board's best efforts, the one remaining school (Piedmont Junior High) housing about 840 pupils was left 90% black and 10% white. As was the case with the 9 elementary schools, the Board was unable to achieve further mixing of Piedmont Junior High because of the adverse domino effect upon the nearby junior highs where satisfactory racial ratios had been accomplished.

In order to reduce the percentage of blacks in this one school from 90% (758 pupils) to 32% (243 pupils), the court consultant reshuffled the Board's proposed attendance zones for the junior high schools and provided for satellite bussing

---

[36]The results of the School Board plan regarding these 9 schools are summarized in footnote No. 31 at page 72 of this brief. Even under the Board plan in 4 of these 9 schools the student bodies would be comprised of 10%-17% whites, a mix considered completely acceptable by many courts.

of inner-city black youngsters to nine predominately white suburban junior high schools. This proposal of Dr. Finger was approved by the trial court and the Court of Appeals.

Map No. 7 shows the junior high zones restructured by district court and the streamers on that map identify the various inner-city schools from which black youngsters will be bussed to outlying schools. As indicated, all of these changes were occasioned by the insistence of both the district court and the Court of Appeals that the 90% black-10% white ratio at Piedmont is not good enough. The extensive court imposed surgery was undertaken notwithstanding the fact that the Board had already produced satisfactory ratios in all of the schools involved in the reshuffle, with the single exception of Piedmont, a school nearly all white 5 years ago (691a).

According to Board estimates these changes prescribed by Dr. Finger require the bussing of 4,741 additional children–6,129 under the Finger plan v. 1,388 under the Board plan (881a, 872a). All of this is directed to effect a reduction of black students at 1 of the 21 schools (Piedmont) by only 515 students. These dislocations and the cost of the bussing required to accomplish this racial balancing cannot stand up under the test of reason or the requirements of the Constitution.

(c) *Senior High Schools*

In some respects, the court action at the senior high school level evidences the most glaring, if not the most extensive, example of racial balancing. Under the Board plan all 10 high schools were desegregated–9 of them 17%-36% black and 1 (Independence High) with 2% black. This plan was adopted by the trial court and approved by the Circuit Court with one exception: 300 black students residing in the inner core of the City must be bussed from the area of their residence through center city traffic a distance of about 12 or 13 miles to Independence High School located in white suburbia.

Reference is made to Map No. 9 for a graphic illustration of the practical result of Dr. Finger's modification requiring the bussing of the 300 blacks from the inner city satellite area to Independence High.

The Court of Appeals referred to the bus mileage for the black youngsters as being about the same as the average of other bus routes serving Independence High (1273a)–but neglected to observe that the existing bus routes were primarily in rural and suburban areas, rather than in the congested inner city areas which would be traversed by the 300 black students.

Under the Board plan these 300 children would have attended a thoroughly desegregated high school having a racial composition of 36% black and 64% white. The only purpose served by the court-directed shifting of these 300 was to make a white school less white. Is the time and safety of these black children irrelevant? They were assured of a desegregated education.

2. The Court-Approved Finger Plan Is Unreasonable and Proper Consideration Was Not Given to the Burdens Which that Plan Imposes on the Charlotte-Mecklenburg System.

The reservations of the district court regarding the pertinence of the Fourth Circuit's Rule of Reason and its preference for a Rule of Absolutes impaired a proper and full consideration of the Board's evidence and the practical and educational problems confronting the Charlotte-Mecklenburg System within the context of a complex urban setting.

In his August 3 Order (Pets.' Br. Al *et seq*) after eight days of testimony at the hearing that the Circuit Court required, the district judge did not make a single finding of fact favorable to the School Board. The same is true with reference to the March 21, 1970 Supplemental Findings of Fact (1198a) made after hearings that were also held

pursuant to Circuit Court directions.[37] These findings indicate appalling disdain of the Board's evidence.

The School Board filed objections and exceptions to the findings of fact set forth in both of those Orders. The district court took no material action with respect to the Board's motions that these findings of fact be modified to conform to the evidence. The objections and exceptions to the March 21 findings appear at Appendix 1241a-1254a. Those submitted in response to the August 3 findings will be printed and filed with this Court as part of an additional appendix. A careful consideration of those objections and exceptions will assist this Court in appraising the conclusions of the district court.[38]

Due to limitation of space it is practical to discuss only a few of the areas wherein the findings of the trial judge failed to conform to the evidence.

There was a marked disparity between the estimates of the trial court and those of the experienced transportation staff of the schools regarding the additional number of children to be transported under the Finger plan and the number of busses required–13,300 (138 busses) according to the judge and 23,384 (526 busses) according to the staff. As the Court of Appeals observed (1271a), anyone's estimates rest on many variables. This is, of course true, but the judge's drastic discount factors (1215a) were unwarranted. The trial court's computations ignore the fact that

---

[37]At the February 5, 1970 hearing the trial judge repeatedly stated that the evidence regarding transportation costs and other such data was irrelevant and indicated his impatience with the whole subject. (For example, see Tr. 111-14, 128-30, 133-134, 150-151, 153.) On March 5, 1970, the Fourth Circuit granted a stay of the February 5, 1970 Order with directions that the district court make supplemental findings of fact regarding transportation, the stay being left undisturbed by this Court.

[38]Among other portions of the record that this Court may find particularly helpful are the affidavit of J. D. Morgan and its attachments (853a-890a), the affidavit of William C. Self (850a-852a) and affidavits of Herman J. Hoose (894a-897a, 1038a-1040a).

the long routes through the city traffic will hamper the use of multiple bus trips and will occasion the need for hard-to-get adult drivers unless class schedules of student drivers are severely staggered to accommodate transportation. The court presumes that a bus can make 1.8 trips per day which was the 1969-70 experience of the system with its rural routes. This conclusion disregards the evidence showing that the 1.8 average includes empty bus trips by the driver, that (excluding empty bus trips) last year's average on primarily rural trips were 1.49 overall and 1.06 at the elementary level, that the length of trips includes not only school to school but the meanderings of routes to pick up children, that some busses must operate with under-capacity loads when necessary to pick up pockets of children in out-of-the-way areas and that busses in inner-city traffic should not be overloaded. In computing the additional children to be transplanted, the trial judge ignores the evidence that a space must be provided for each child assigned to a bus whether or not he is absent on a particular day, that due to familiarity with specific schools and community areas the school staff reduced where appropriate the eligible children who would not utilize the busses and that almost all of the children in the low economic areas would be dependent upon school bus transportation.

The district court's justification of the great expansion of the existing fleet resulting from its order by reference to the pre-existing transportation (280 busses; 23,000 children) is unwarranted and ignores the problems occasioned by the mass movement of children and busses over the streets and arteries of the inner-city and its perimeter already saturated and glutted to the breaking point–particularly during rush hour traffic. School busses having a 35 mile speed limit will be thrown into the stream of arteries moving 40-50 miles per hour. The city traffic engineer acknowledged that at present some school busses are being operated in congested areas–but equated the practice to a tolerable amount of "smallpox" that should not be consciously turned into an "epidemic." Overloaded busses on

rural routes cannot sensibly be cited to support the wisdom of overloading busses operating cross-town in the congestion of inner-city rush hour traffic—particularly with immature drivers.

The trial judge's findings imply the availability of unlimited funds from State and local sources with which to defray the extensive cost of the additional bussing imposed upon the Charlotte-Mecklenburg System—citing in support the size of the budgets for the State of North Carolina, the County of Mecklenburg and the local school system and implying that, if the local community gets financial assistance from the State, it is therefore "free." The evidence shows that the School Board has no control over the State budget, that the funds it gets from Federal and State sources are nondiscretionary and earmarked primarily for teacher salaries, instructional services and special programs, that the current local school budget permits the educational programs (severely beset by inflation and growing pains) to just about stay even and that diversion of funds to finance a greatly expanded transportation system will curtail the availability of funds for educational pursuits. To the extent the judge implies money from the State is "free" he overlooks the fact that the State gets its money from the taxpaying public and the source thereof is immaterial in applying a Rule of Reason. In seeking to minimize the cost of busses to implement the Finger plan for the 1970-71 school year, the district court takes refuge in the willingness of the State to lend the Charlotte-Mecklenburg System obsolete busses (14 to 16 years old) on a one-year basis as a supplement to the existing fleet.[39] This overlooks the obvious fact that

[39]Paragraph 14 of the order dated August 3, 1970, carries with it an implication of the Board's prior concealment of ownership of additional busses totaling 107. Common sense dictates that a bus fleet of 280 would require approximately 20 spare busses which could not be used for regular runs as they are required for use as substitutes while other busses are out of service. The 29 activity busses, although titled in the Board, are owned by the individual schools and for limited use, 500 to 600 miles annually (Tr. 1043, July 15, 1970). Delivery of

the capital outlay burden of acquiring busses is merely postponed to another day. The judge minimizes the cost and problems of reconditioning these obsolete busses and ignores the lack of wisdom of using them in congested traffic.

The district judge completely discounts other increased costs occasioned by an extensive expansion of the System's bus fleet (1218a). For example, the costs of additional supervisory, mechanical and clerical personnel; of additional drivers (the expense being greatly increased to the extent adults are used); of additional service and gasoline trucks and other equipment; of improving and constructing bus parking areas for loading and unloading children where insufficient or non-existent; of new and improved rights of way for safe and efficient circulation to, from and within school grounds (R. Ex. 47, 49-53, 65-68; 853a; P. Ex. 15).

In finding No. 3 of the August 3, 1970 order, the district court implies that desegregation will close the gap in the academic performance of the blacks. The test results of this System disclose that the improvement is slight.

Popular attitudes, which are apparently shared by the district court, are that desegregation eliminates or nearly eliminates the disparity of educational achievement between black and white children. Results of desegregation are material on the question of reasonableness but the district court's comparisons are meaningless in this regard. The Coleman Report makes a general finding that desegregation *tends* to hold that blacks advance without retarding the whites. Achievement statistics compiled by the Board relating to the performance of black students attending schools which have been desegregated since 1965 reflect that the improvement of the black students is indeed slight. For example, elementary schools which have been so des

---

busses subsequent to the last hearings created the 30 used bus category busses which are 14 to 15 years old. The 28 new busses were clearly scheduled for future delivery. This example is cited as an indication of the district court's predisposition to downgrade Board actions and representations.

gregated (Cornelius, Huntersville and Davidson) found that their black third-grade students performed on an average school level of second grade, first month, whereas predominantely black schools (First Ward, Irwin Avenue and Amay James) found that their third-grade black students performed at an average school level of first grade, ninth month, or a grade differential of one school month. Black students attending those schools at the sixth grade level performed at an average school level of fourth grade, third month at the desegregated schools; and third grade, ninth month at the predominantely black schools, or a difference of three school months improvement experienced by the blacks attending desegregated schools for a period of six years. In making these comparisons, the Board acknowledges that the sampling is small and that the performance of individual black students in some cases substantially exceeds the performance of the group, and conversely, other black students do not perform as well as the group. The primary purpose of the Board in reporting this information was to disclose to the district court that educators and courts must rely on other means to bring about educational equivalence. In determining priorities to bring about this equivalence, the courts are ill-fitted to adjudge the various techniques, including the very expensive and disruptive technique of long distance bussing. Determination of such priorities should be left with the educators, who after having made extensive efforts at desegregation, should be permitted judgments based on sound educational consideration. (R. Ex. 64, July 15, 1970).

In an attempt to justify findings that bussing is a desirable and safe practice, the court (Findings Nos. 2, 4, 6, 13 and 32 of August 3 Order) refers to the present transportation of elementary youngsters and of kindergarten children. This observation is irrelevant to the question of how much of such bussing should reasonably be required or permitted under the circumstances existing in the Charlotte-Mecklenburg School System. The implication of the trial judge's findings are at odds with the conclusions of the educators:

Bussing of elementary children away from their neighborhoods is educationally unsound and should be minimized, not increased; the school day of young children should be shortened and not lengthened to accommodate bus schedules; unattended immature children at bus pickup points is neither desirable nor safe; staggered schedules and multiple pickups should be minimized; bus transportation interferes with after-school activities which are an important part of the educational process; bussing of young children away from their neighboring schools dilutes the interchange between home and school which is most important at the elementary level. Transportation should be built around education, rather than make education serve transportation. Dr. Self stated the matter succinctly (Tr. 138, July 15, 1970):

> [O]ur computations have assumed that we would begin with the concept that the transportation system serves the educational program. And instead of operating our schools in such a way as to accommodate a bus fleet, we'd like to try to have the bus fleet serve the schools.

In submitting its estimates, the School Board readily acknowledged that if savings could be realized through educationally sound staggering of school schedules, the use of busses for multiple trips, a reasonable and safe degree of overloading and other economies it would do so.

The foregoing are recited as typical examples of the treatment that was accorded by the trial judge to the evidence of the School Board regarding the practicability and desirability of the massive bussing occasioned by the court approved Finger plan. The district court's findings clearly show its unreasonable view of the Rule of Reason.

D. THE HEW ELEMENTARY PLAN IS EDUCATIONALLY UNSOUND, REQUIRES RACIAL BALANCING, FOSTERS RESEGREGATION AND IS UNREASONABLE.

The HEW elementary plan was built upon the restructured lines of the Board plan which were used to form seven different clusters within each of which 3 or 4 elementary schools were grouped together. Each school within a cluster serves one, two or three grades. The clusters proposed by HEW are shown on Map No. 4. The HEW plan had the dubious distinction of being shot down in flames by the district court, Dr. Finger, the school staff, the Board majority and the Board minority—by everyone except the HEW representatives.

The trial court's August 3 Order (Pets.' Br. A28) outlines its objections to the plan. In rejecting the plan we agree that the trial judge was right—but for the wrong reasons. The district court's complaints are primarily based on the failure of the HEW plan to do a complete job of racial balancing.

The Board's rejection of the HEW plan was prompted by a variety of practical and educational reasons. The plan requires the bussing of about as many children as do the Finger and Minority plans (R. Ex. 47, Tr. 136). In terms of what is accomplished by the plan, the transportation costs are prohibitive (R. Ex. 47, 50, 52 and 61a).

The proposed grade structure which in 4 of the 7 proposed clusters would require children to attend 4 different schools during the course of their elementary education, was severely criticized as being educationally unsound (Tr. 24, 112, 265), imposing a rigidity that would effectively preclude experimentation with programs of ungraded classes (Tr. 24-27, 99) and would necessitate a complete change in teacher assignments (Tr. 110). The head of the HEW team admitted that aside from desegregation he would not recommend this organization of the elementary schools (P. Ex. 4, p. 68). The proposed grade structure unnecessarily increases transportation requirements (Finger, Tr. 228, 233).

Four of the 7 HEW clusters result in a 50-57% black enrollment, a condition that promises resegregation (Tr. 30, 100, 112, 229). The cluster arrangement brings together a predominately black school and several other schools which were already desegregated (Tr. 31-34, 111, 230, 267). It overpopulates some schools and underpopulates others, compounding the system's housing problem (Tr. 30).

As stated by Dr. Finger (Tr. 267), the HEW plan has little to recommend it. We agree.

E. THE ELEMENTARY PLAN OF THE BOARD MINORITY IS INCOMPLETE AND UNLAWFULLY EXCEEDS CONSTITUTIONAL REQUIREMENTS BY REQUIRING COMPLETE RACIAL BALANCING OF EVERY ELEMENTARY SCHOOL AND THE BUSSING TO IMPLEMENT IT. THE DISTRICT COURT ERRED IN APPROVING THAT PLAN AS A REASONABLE ALTERNATIVE.

The elementary plan was developed by a 4-member minority of the School Board. In his August 3 Order, the trial judge approved the Minority plan as a reasonable alternative available for implementation by the Board. This plan was rejected by the Board.

The plan groups all of the 72 elementary schools within 18 separate clusters, many of which are far removed from each other and all of which occasion massive dislocation of elementary children. This Court's attention is invited to Map No. 5 which gives a clear picture of what this plan does to the elementary schools of the Charlotte-Mecklenburg System.

The authors of the plan acknowledge that its purpose is to racially balance the 72 elementary schools of the system. The plan is educationally unsound (Tr. 68, 174). In its various clusters the Minority plan includes schools that are already desegregated (Tr. 180-181, 297).

A random selection for the assignment of children is required within the clusters by the use of a complicated lottery system (Tr. 69, 118). The plan would occasion great administrative difficulties and would involve the problem of selecting children from year to year and could require elementary children of the same family to attend different schools (Tr. 120).

The plan will require the bussing of about the same number of children as would be transported under the Finger and HEW plans (August 3 Order). The burden of this amount of transportation had been declared by the Fourth Circuit, which accepted the district court's discounted estimates, to be too onerous and hence unreasonable with reference to the Finger plan. The transportation system required to implement the plan would be complex and cumbersome and would involve the mass movement of children within the congested areas of the city (Tr. 225, 239). Both Dr. Finger and the Superintendent observed that the Minority plan involved very long-distance bussing for a large number of children (Tr. 265) and could not be implemented without a heavy network of transportation (Tr. 119). Both Dr. Finger and the Superintendent agreed that education should be controlled by the educators rather than by a transportation system (Tr. 138, 303).[40]

The plan would require the closing of Double Oaks School in spite of the fact that the schools of the system are presently overcrowded with a 12% overcapacity.

The Board's objections to the Minority plan include all of the exceptions which it has to the court-approved Finger plan discussed elsewhere in this brief—as well as those peculiar to the Minority proposal. The racial balancing that this plan envisions is 100%. Every one of the 72 elementary schools are involved in this complete reshuffling to achieve the 70/30 racial mix of each student body. In spite of the

[40]This is a rather remarkable concession on the part of Dr. Finger, whose own plan occasions massive cross and satellite bussing of children through the most congested parts of the City.

weaknesses, defects, costs and disruptions of this plan that were pointed out by both the School staff and the court's consultant, Dr. Finger, the trial judge found it to be reasonable. This conclusion is unwarranted and underscores once again that racial balancing is the basic, but erroneous, precept which undergirds this and every other order of the district court.

F. THE EARLIER DRAFT OF THE FINGER ELEMENTARY PLAN IS INCOMPLETE AND UNLAWFULLY EXCEEDS CONSTITUTIONAL REQUIREMENTS BY REQUIRING RACIAL BALANCING. THE DISTRICT COURT ERRED IN APPROVING THAT PLAN AS A REASONABLE ALTERNATIVE.

This draft of Dr. Finger is illustrated by Plaintiff's Exhibit 10. At the hearings preceding the August 3 Order, only a minimal amount of attention was accorded this proposal which was prepared by Dr. Finger in the early days of his appointment as court consultant. It had been abandoned in favor of the one which the consultant evolved by the use of the restructured lines of the Board plan and which was adopted by the judge's February 5 Order.

Dr. Finger himself did not recommend this early draft (Tr. 263). He described it as an incomplete plan that he prepared only "to illustrate what some of the elements are that enter into the problem of determining how a desegregation plan should be prepared" (Tr. 263). Dr. Finger pointed out that the plan has a "complex grade structure" (Tr. 258). It will require transporting about the same number of elementary children as the court-approved February 5 and Board Minority plans (August 3, Order).

The purpose of this draft of Dr. Finger was to achieve racial balancing of elementary schools, which the court consultant admitted (981a). It is not a reasonable alternative.

G. IN ASSESSING THE EFFECTIVENESS OF A DESEGREGATION PLAN, A RULE OF REASON REQUIRES THAT DUE CONSIDERATION SHOULD BE ACCORDED SCHOOL BOARDS AND ADMINISTRATORS IN CONTROLLING THE DESTINY OF PUBLIC EDUCATION.

President Nixon defined the role of a school board:

> In devising local compliance plans, primary weight should be given to the considered judgment of local school boards—provided they act in good faith, and within Constitutional limits. President Nixon's March 24, 1970, policy statement entitled *SCHOOL DESEGREGATION: A Free and Open Society, supra.*

If it were otherwise, the admonition of Judge Coleman in *Bivins v. Bibb County Board of Education,* 419 F.2d. 1211 (5th Cir. 1970), is pertinent:

> Some of these days, the Courts are going to have . . . to free themselves of their tragic failures in the role of school administrators and get back to their primary functions.

The Charlotte-Mecklenburg School Board is an elective body and, as such, is charged with the responsibility of exercising its own judgment regarding the needs of the system and the best interest of its children.

It is the School Board's duty to determine whether the dollars allocated to it by other elective officials (the Board of County Commissioners for Mecklenburg County) for the education of our children shall be spent for *books or buses.* It is for the Board to determine whether the existing transportation system shall be expanded or contracted, whether it is educationally good or bad to stagger the opening and closing of schools at any particular grade level, whether after school activities will suffer, whether inconveniences and disruption to children and parents are justifiable, whether overloaded buses are acceptable or safe, whether the time of children in transit is justifiable and how the host of other value judgments and policies shall be made to administer

effectively a large complex metropolitan school system charged with awesome responsibility of providing 84,500 school children in 103 schools with a quality education.

Books, bricks and buses (and all that they imply) are part of the tools to be used in the educational process. How and when these tools are used must be left to the good faith decision of local school boards or the boards should be disestablished and the administration of school systems should be turned over the courts.

In his findings of fact, the trial court justified his rulings requiring extensive and disruptive transportation by calling attention to the extent that the system already was involved in burdensome bussing. This rationale is unsound. The reasonableness of a desegregation plan should not be measured by the worst aspects of a school program.

The fact that last year the Charlotte-Mecklenburg school system transported 23,000 children with 280 buses, the opening and closing of some of its schools were staggered, in some schools after-school activities were impaired, some school buses travelled over congested traffic arteries, some elementary children waited for the school bus by the side of the road at 6:30 in the morning and others got home at 5:00 in the afternoon, some buses were overloaded and some children had to stand up, some buses were unsound and should have been replaced—is no answer to the administrative and educational problem of how much of this is desirable, tolerable or necessary in a system as large and complex as Charlotte-Mecklenburg. A court mandate that edicts racial balancing and forced bussing supplants the value judgments of the elected school board and the educators on its administrative staff. An overdose of judicial paternalism and control will ultimately sign the death warrant for public education.

CONCLUSION

For the foregoing reasons, it is respectfully submitted that:

1. The judgment of the Fourth Circuit be affirmed only in so far as it vacated the judgment of the district court.

2. The judgment of the district court, including its Orders of August 3 and August 7, 1970, be reversed; and

3. This matter be remanded to the district court with instructions to approve the implementation of the February 2, 1970, plan of the School Board as one complying with the Constitutional requirements for a unitary school system.

Respectfully submitted,

AMICUS CURIAE BRIEF
OF THE
STATE OF FLORIDA

AUTHORITY FOR FILING

This amicus curiae brief for the State of Florida ex rel. Earl Faircloth, Attorney General of Florida, and Floyd Christian, Commissioner of Education, is filed pursuant to Rule 42 (4) of the Rules of this Court.

QUESTION PRESENTED

WHETHER THE EQUAL PROTECTION CLAUSE OF THE CONSTITUTION REQUIRES OR PERMITS SCHOOL SYSTEMS TO ASSIGN PUPILS TO PARTICULAR SCHOOLS BECAUSE OF THEIR RACE.

STATUTE INVOLVED

42 U.S.C. § 2000c (b) (1964), provides:

> "'Desegregation' means the assignment of students to public schools and within such schools without regard to their race, color, religion or national origin, but 'desegregation' shall not mean the assignment of students to public schools in order to overcome racial imbalance."

STATEMENT

Florida respectfully relies upon the factual representations contained in the briefs filed by the parties to this cause.

SUMMARY OF ARGUMENT

In deciding this case the Court should keep two principles foremost in its consideration. The first principle is that this case turns upon what the Constitution mandates and not what seems "better" or "more desirable". The second principle is that we are concerned with a national constitution which should be uniformly applied without reference to "labels of convenience".

In our nation, any classification based upon a person's race is obviously irrelevant and invidious. Simply stated, our Constitution is "color blind".

From this premise it follows that a "non-gerrymandered" neighborhood school system meets constitutional mandates, even though, in many cities, it would result in schools lacking in racial balance. Likewise, a uniformly applied and "color blind" freedom of choice assignment plan meets constitutional mandates. The fact that students, under such a plan, might elect to remain in schools where their own race predominates, is constitutionally irrelevant.

Forced racial balancing by federal court order is obviously unconstitutional, since it is a deprivation of liberty in violation of the Fifth Amendment for an arm of the federal government to assign a student to a particular school because of his race. Furthermore, such orders

are in violation of the Civil Rights Act of 1964 which was enacted pursuant to the authority of Congress to enforce the Fourteenth Amendment. This Congressional authority extends to defining what activity does or does not violate the Equal Protection Clause.

ARGUMENT

I. Introduction.

In Brown v. Board of Education, 347 U. S. 483 (1954) (Brown I), this Court unanimously decreed that the equal protection clause prohibited school systems from maintaining schools where pupil assignment was dictated by the color of the particular pupil's skin. Brown is now, and rightfully should continue to be, the supreme law of the land.

However, Brown and its progeny, particularly in the lower federal courts, have spawned a variety of conflicting views as to what is required of a school system in order for it to comply with the mandate of the Constitution. Some persons plead for "freedom of choice", others cry for "neighborhood schools", and yet others argue for "racial balance".

Florida would urge this Court to initially keep foremost the fact that it is the Constitution which is here being interpreted. In this regard, just as the Constitution does not "enact Mr. Herbert

Spencer's Social Statics", Lochner v. New York, 198 U.S. 45, 75 (1905) (Holmes, J., dissenting), neither does it also enact Ross Barnett's or Eldridge Cleaver's views on race relations. In short, the question as to whether it is "better" or "more desirable" to have a racial balance in each school or to have complete separation of the races, is constitutionally irrelevant. These political questions of policy have, under our system of government, "been committed by the Constitution to another branch of government". Baker v. Carr, 369 U.S. 186, 211 (1962). We are here only concerned with constitutional requirements.

Florida would also urge this Court to remember that "[i]t is, after all, a national constitution" Jacobellis v. Ohio, 378 U.S. 184, 195 (1964) (Brennan and Goldberg, JJ), which this Court is being called upon to interpret. Particularly when dealing with the issue of racial balance, many lower courts have come to completely opposite conclusions because the past "segregation" in the school system was "de facto" as opposed to "de jure". This distinction is of little consolation to the pupil currently in school and thus this Court should emphatically reject it. "To hold otherwise would be to disregard substance because of the feeble enticement of the [de facto] label-of-convenience which has been attached", In Re Gault, 387 U.S. 1, 50 (1967), to the absence of racial balance in Northern schools. Thus, the constitutional requirement vel non of racial

balancing in school systems must be applied "in an even handed manner" throughout our nation.

II. A person's race is constitutionally irrelevant.

This Court has long adhered to the position that classifying a person on the basis of his race is, under our Constitution, an "obviously irrelevant and invidious" - Steele v. Louisville & N.R. Co., 323 U.S. 192, 203 (1944), practice. To simply state it, "[o]ur Constitution is color blind". Plessy v. Ferguson, 163 U.S. 537, 599 (1896) (Harlan, J., dissenting).

The singling out of a person because of his race "in any form and in any degree has no justifiable part whatever in our democratic way of life". Korematsu v. United States, 323 U.S. 214, 242 (1944) (Murphy, J., dissenting). Admittedly, there were times in the history of our nation when, for example, a pupil was singled out for assignment to a particular school because of his race. Brown I allegedly sounded the constitutional death knell for this practice. This Court must now decide whether the practice will be constitutionally resurrected.

III. A neighborhood school pupil assignment plan is constitutional.

Florida submits that a neighborhood school pupil assignment plan, where all students must attend the school closest

to their home, clearly meets constitutional mandates, since it provides a "color blind" method of assignment.

Florida notes that this Court clearly indicated its approval of the neighborhood school concept in the original Brown decision. In Brown, once this Court issued its original opinion, it called for supplemental briefs and argument re the practical implementation of the opinion. In its supplemental opinion this Court stated school boards were entitled to a certain time to achieve compliance because of the administrative problems arising (in part) from the necessary "revision of school districts and attendance areas into compact units to achieve a system of determining admission to the public schools on a nonracial basis". Brown v. Board of Education, 349 U.S. 294, 300-1 (1955) (Brown II). This Court has thus already directed the nation's school systems to alter their school systems to conform to the neighborhood concept, i.e., "attendance areas [in] compact units".

To be sure, these attendance areas constitutionally cannot be "gerry-mandered" so as to systematically exclude students of one race who should otherwise have attended a particular school. See Sailors v. Board of Education, 387 U.S. 105, 108 (1967); Gomillion v. Lightfoot, 364 U.S. 339 (1960). However, if the areas are drawn on a "color blind" geographical basis, it constitutionally matters not that the respective schools might have

disproportionate numbers of one race or another. As has been noted with reference to voting districts and their constitutionality:

> "Neighborhoods in our larger cities often contain members of only one race; and those who draw the lines of Congressional Districts cannot be expected to disregard neighborhoods in an effort to make each district a multiracial one." Wright v. Rockefeller, 376 U.S. 52, 59 (1964) (Douglas and Goldberg, JJ).

Thus, a neighborhood school system, so long as its attendance zones are drawn on a "true" geographical basis, meets constitutional mandates. Brown II, supra.

IV. A freedom of choice pupil assignment plan is constitutional.

Florida next notes that a "color blind" pupil assignment plan, based upon "freedom of choice" meets constitutional mandates and has clearly been approved by this Court.

In Goss v. Board of Education, 373 U. S. 683 (1963), this Court passed upon the validity of a student transfer plan which hinged the ability of the student to transfer upon the student's race and the racial composition of the school he was to attend. The Court rightfully condemned

the plan because race was the criterion employed for the transfer. This Court went on to emphasize, however, that:

> "In so doing, we note that if the transfer provisions were made available to all students regardless of their race and regardless as well of the racial composition of the school to which he requested transfer we would have an entirely different case. Pupils could then at their option (or that of their parents) choose, entirely free of any imposed racial considerations, to remain in the school of their zone or to transfer to another."
> Id. at 687.

Thus it clearly appears that a "color blind" freedom of choice pupil assignment system (either singly or in conjunction with a neighborhood system) meets constitutional mandates. It should be noted that the freedom of choice system has, perhaps, one desirable feature which surpasses even the neighborhood system, i.e., in the freedom of choice system, the student's ability to attend a racially balanced school (if he so desires) in no way depends upon the racial composition of his neighborhood. Neighborhood racial patterns have no effect upon a freedom of choice system.

It should be noted here that some lower federal courts have rejected freedom of choice plans on the ground that they do not "work", i.e., most blacks tend to remain in predominantly black schools and likewise with the whites. This "indictment of workability", however, has no constitutional substance. If a freedom of choice plan is administered in "an even handed manner", what is the constitutional objection if black students elect to remain in predominantly black schools (for reasons of "black pride", "black control" or whatever) and likewise for the white students? This "workability objection" has constitutional substance only if the Constitution is construed as affirmatively requiring Americans of different races, ethnic backgrounds, etc., to associate with each other. Florida is not aware of any recognized legal interpretation of the Constitution which would support such a premise.

It is thus clear that a "freedom of choice" school system (where the "choice" is uniformly applied) meets the constitutional mandate of a "color blind" system which admits students "regardless of their race". Goss v. Board of Education, supra.

V. Forced racial balancing is unconstitutional.

Florida submits that it is almost too axiomatic to require citation of authority that under a "color blind" Constitution, which views its citizens on a "nonracial" basis, the assignment of pupils to a

particular school because of their race (as opposed to because it is "the closest school" or "the school of their choice") is unlawful. It thus follows that federal court orders which order "forced bussing", "forced walking", or even "forced subwaying" of pupils to a particular school, because of their race, are patently unconstitutional on their face. Parenthetically, Florida would here emphasize that "bussing", "walking" or "subwaying" are not fundamentally the issues in this case. Each, or all, of the above have a legitimate basis in our educational system. Florida simply maintains that none of the above have any place in our democracy where any of them are occasioned simply to affirmatively achieve a set ratio of students based upon their race (or ethnic origin, nationality, etc.).

It is clear that when a federal court orders a student to attend a school, other than the one he would normally attend (under any "color blind" assignment plan), because of the color of his skin, then that court has deprived that student of his valuable and fundamental right to due process of law. This Court has already emphatically and unanimously held that the assignment of pupils to a particular school, by an arm of the federal government, because of the color of their skin "constitutes an arbitrary deprivation of their liberty in violation of the Due Process Clause [of the Fifth Amendment]". Bolling v. Sharpe, 347 U.S. 497, 500 (1954). This Court, some years later, reemphasized that "[t]he recognition of race

as an absolute criterion for transfers . . . is no less unconstitutional than its use for original admission or subsequent assignment to public schools". Goss v. Board of Education, 373 U.S. 683 688 (1963). It is thus patently obvious that federal court orders which force st dents to attend particular schools becau of their race are totally impermissible under our "color blind" Constitution.

Florida would also emphasize that suc court orders also violate the provisions of the Civil Rights Act of 1964 which states that desegregation "shall not mea the assignment of students to public schools in order to overcome racial imbalance." 42 U.S.C. § 2000c (b) (1964). To dismiss this mandate as merely relati to a "government aid program", as some lower courts have done, is to totally ig nore the Constitutional authority of Congress "to enforce, by appropriate leg islation, the provisions of [the Fourtee th Amendment]" Amend. XIV, § 5, U.S. Const. This Congressional authority ex tends to "responsibility for exercising judgment as to when the Fourteenth Amend ment is violated". United States v. County Board of Elections, 248 F.Supp. 316, 322 (W.D. N.Y. 1966), appeal dismi ed, 383 U.S. 575 (1966).

It cannot be denied that Congress wa exercising (in part) its section 5 authority when it enacted this statute. Heart of Atlanta Motel v. United States 379 U.S. 241, 279-292 (1964) (Douglas a Goldberg JJ concurring). Thus, it is

clear that this Congressional prohibition on pupil assignment to achieve racial balance is given "constitutional life" by section 5 of the Fourteenth Amendment and it cannot be ignored by the judiciary.

CONCLUSION

Florida submits that this Court should now give full meaning to the late Justice Harlan's admonition that "our Constitution is color blind". For too many years in this nation the color of a boy's or girl's skin determined the school he or she had to attend in order to receive an education. To be sure, our Constitution should remain "color conscious" to the extent of voiding classifications based solely upon the color of a citizen's skin.

Let us not, however, in a zeal to eliminate the sins of the past, resort to the same racial criterion even though the end result might be thought "best". Let us not also "visit the sins of the father upon the son".

Florida simply urges this Court, when it decides to adopt its criteria, no matter what they may be, to establish criteria for public school assignment which do not contain the terms "white", "black", "Indian", or any other racial prefix to qualify the noun "American".

Certiorari to the United States Court of Appeals for the Fourth Circuit

AMICUS CURIAE BRIEF OF THE SCHOOL BOARD OF HILLSBOROUGH COUNTY, FLORIDA

NATURE OF INTEREST OF AMICUS CURIAE

This brief is filed on behalf of the School Board of the County of Hillsborough, a political subdivision of the State of Florida, and is sponsored by the attorney for the School Board of Hillsborough County, Florida, the authorized law officer thereof, under Rule 42(4) of the Rules of the Supreme Court of the United States.

The School Board of Hillsborough County's interest arises because, in *Mannings v. Board of Public Instruction of Hillsborough County, Florida,* 5 Cir. 1970, _____ F.2d _____ [No. 28,643, May 11, 1970], the Fifth Circuit, and in subsequent orders thereto entered by the District Judge of the United States District Court for

the Middle District of Florida, certain elementary schools were directed to be paired. Such orders entirely ignored the provisions of Title 42, Sections 2000c.(b) and 2000c.—6(a)(2), which provide that "desegregation" shall not mean the assignment of students to public schools in order to overcome racial imbalance, and prohibit any official or court of the United States from issuing any order seeking to achieve a racial balance in any school by requiring the transportation of pupils from one school to another in order to achieve such racial balance. Such orders also necessarily required the busing of students from parts of the school areas as paired, to the school building where the classes were to be held, a condition which did not previously exist prior to the entry of such orders. Florida law provides that no state funds shall be paid for the transportation of pupils whose homes are within two miles from the nearest appropriate school. Section 234.01, Florida Statutes. In a number of instances, the pairing of elementary schools directed as aforesaid results in requiring busing students from portions of the school areas directed to be paired, in excess of two miles to the school building where appropriate classes are held, thus requiring the busing of students not contemplated by the School Board.

QUESTIONS PRESENTED

1. Does the Constitution require or permit the courts to order the busing of pupils solely to achieve racial balance?

2. Did the courts below improperly disregard the explicit direction of Congress in Section 407(a)(2) of the Civil Rights Act of 1964, that "nothing herein shall impower any * * * court of the United States to issue

ny order seeking to achieve racial balance in any school y requiring the transportation of pupils or students rom one school to another in order to achieve such acial balance."?

ARGUMENT

No decision of this Court has required racial balanc-ng. Every decision from *Brown v. Board of Education,* , 347 U.S. 483, through *Alexander v. Board of Education,* 96 U.S. 19, has reiterated the Constitution's mandate or wholly non-racial public school systems.

A concise statement of the law appears in *Deal v. Cincinnati Board of Education,* U.S.C.A., 6 Cir. (1966) 69 F.2d 55 (Deal I), cert. denied 389 U.S. 847, 88 S.Ct. 39, 19 L.Ed. 114, where it was said:

> "We hold that there is no constitutional duty on the part of the Board to *bus* Negro or white children out of their neighborhoods or to transfer classes *for the sole purpose of alleviating racial imbalance* that it did not cause, nor is there a like duty to select new school sites solely in futherance of such a purpose." (emphasis supplied)

A three-judge court in *Briggs v. Elliott,* 132 F.Supp. 776, firmly declared:

> "The Constitution, in other words, does not require integration. It merely forbids discrimination."

At least seven Circuit Courts of Appeal support this doctrine. Only the Fifth Circuit has discarded its earlier approval of the case and now adheres to the racially oriented policy of racial balancing, *U.S. v. Jefferson County Board of Education,* 372 F.2d 836, adhered to on rehearing, 380 F.2d 385.

The concept of racial balancing as a form of desegregation was explicitly and emphatically disapproved by Congress when it enacted the Civil Rights Act of 1964. When the bill was considered on the floor of the House on February 6, 1964, Mr. Cramer of Florida offered an amendment which provided that " 'desegregation' shall not mean the assignment of students to public schools in order to overcome racial imbalance." Chairman Celler of the Judiciary Committee accepted that amendment, and, as thus amended, Section 401(b) was not further changed in the course of the passage through Congress; it was carried on to the statute book as amended by Mr. Cramer.

Notwithstanding the provisos in Section 401(b) and 407(a) of the Civil Rights Act of 1964, they have been either consistently misread, or simply disregarded by the courts that have had these statutory directions called to their attention. *U.S. v. Jefferson County Board of Education, supra, Caddo Parish School Board v. U.S.*, 389 U.S. 840. This disregard of congressional action constitutes another reason for review by this Court. Nothing in the Constitution of the United States permits, much less requires, the busing of school children to achieve racial balancing. The direction (*Alexander v. Board of Education,* 396 U.S.19) "to operate as unitary school systems within which no person is to be effectively excluded from any school because of race or color" forbids the result obtained below, which in fact excludes several hundred white children from the walk-in schools nearest their homes simply because admitting them there fails to achieve racial balancing within the entire system. Past discrimination in one direction does not justify present discrimination in another.

CONCLUSION

These issues which have caused wide-spread confusion must be resolved. The time is now. Amicus urgently requests the Court to announce that the busing of pupils solely to achieve racial balance should not be required; that the concept of the neighborhood school should be preserved, and that involuntary pairing of schools is educationally and economically unsound, threatening to encroach upon and destroy the historical concept of the American school system.

Interest of the Amicus	1
Opinions Below	2
Jurisdiction	3
Questions Presented for Review	3
Constitutional and Statutory Provisions Involved	4
Statement of the Case	4
Summary of Argument	14
Argument	17
I. The Charlotte-Mecklenburg Board of Education has complied with the Equal Protection Clause of the Fourteenth Amendment and the Supreme Court decisions interpreting it by establishing and operating a unitary public school system, which receives and teaches students without discrimination on the basis of their race or color. Any racial imbalance remaining in any of the schools under the jurisdiction of the Board represents de facto segregation, which innocently results from the purely adventitious circumstance that the inhabitants of particular areas in and adjacent to the City of Charlotte are predominantly of one race	17
II. The Equal Protection Clause of the Fourteenth Amendment does not require or empower a Federal Court to order a public school board to assign children to the schools it operates merely to balance the student bodies in such schools racially, or to bus children outside reasonable geographic attendance districts or zones to effect such purpose. The District Court ordered the Charlotte-Mecklenburg School Board to do both of these things, and the Circuit Court erred insofar as it affirmed the District Court order	22
III. The Fifth Section of the Fourteenth Amendment empowers Congress to enforce the Equal Protection Clause by appropriate legislation, the First Section	

Page

of Article III of the Constitution empowers Congress to regulate the jurisdiction of United States District Courts and United States Circuit Courts of Appeals, and the Second Section of Article III of the Constitution empowers Congress to regulate the appellate jurisdiction of the Supreme Court. Congress exercised all of these powers in an appropriate fashion when it enacted Title IV of the Civil Rights Act of 1964, which prohibits the assignment of students to public schools to balance the student bodies in such schools racially, and to bus them from some schools to other schools, or from some school districts to other school districts to effect such purpose. The Act's prohibition on busing is absolute and deprives federal courts of jurisdiction to compel school boards to bus students to overcome racial imbalances in schools, even if such imbalances result from discriminatory school board action. The District Court order violated this Act by commanding the Charlotte-Mecklenburg School Board to do the things prohibited by it, and the Circuit Court joined in such violation insofar as it affirmed the District Court Order 27

IV. A school board has the power to devise and implement any non-discriminatory plan for the assignment of children to the public schools it operates. The District Court not only rejected a non-discriminatory assignment plan submitted by the Charlotte-Mecklenburg School Board, but it usurped and exercised the authority of the School Board in this respect by devising a plan of its own which commands the School Board to deny thousands of children admission to their neighborhood schools, and to bus them to other schools to mix the races in the various schools in numbers or proportions satisfactory to the District Court. By so doing, the District Court ordered the School Board to deny to the thousands of children affected by its order admission to their neighborhood schools in violation of the Equal Protection Clause, and to bus them to other schools or

Page

other school districts in violation of Section 407(a) (2) of the Civil Rights Act of 1964. The Circuit Court concurred in these violations, and erred insofar as it affirmed the order of the District Court 36

No. 281

JAMES E. SWANN, et al., *Petitioners*,

v.

CHARLOTTE-MECKLENBURG BOARD OF EDUCATION, et al.,

No. 349

CHARLOTTE-MECKLENBURG BOARD OF EDUCATION, et al., *Petitioners*,

v.

JAMES E. SWANN, et al.

ON WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE FOURTH CIRCUIT

AMICUS CURIAE BRIEF FOR THE CLASSROOM TEACHERS ASSOCIATION OF THE CHARLOTTE-MECKLENBURG SCHOOL SYSTEM, INCORPORATED

INTEREST OF THE AMICUS CURIAE

The Classroom Teachers Association of the Charlotte-ecklenburg School System, Incorporated, is a non-profit embership organization in corporate form, which includes its membership a substantial part of the 3,553 classroom achers in the Charlotte-Mecklenburg School System and ich devotes itself to the advancement of public educa-n. The specific objectives of the organization and its mbers are to promote the interests of classroom teachers the Charlotte-Mecklenburg School System, and to secure

to the students attending the schools of the System opportunities to achieve by quality education their highest potentialities.

The Classroom Teachers Association of the Charlotte-Mecklenburg School System and its members believe that the execution of the order of the United States District Court for the Western District of North Carolina and the judgment of the United States Circuit Court for the Fourth Circuit affirming such order in part seriously impair the educational opportunities offered by the Charlotte-Mecklenburg School System to the students in its schools, and for this reason the organization files this amicus curiae brief in support of the position of the Charlotte-Mecklenburg Board of Education, which harmonizes with this view.

The parties to the proceedings in Nos. 281 and 349 have consented in writing to the filing of this brief, and the writings evidencing such consent have been filed with the Clerk.

The members of the Supreme Court bar who submit this brief in behalf of the organization do so without compensation in the hope that they may aid the Supreme Court to reach a decision which will restore tranquility to much troubled areas of our land and enable the public schools operating in them to function economically and efficiently as educational institutions.

OPINIONS BELOW

The opinion of the Court below consists of the opinion and judgment of the United States Court of Appeals filed May 26, 1970, which are not yet reported and which appear in the Appendix (Volume 3, pages 1262a to 1304a).

In its opinion and judgment, the Court of Appeals reviewed and approved in part and remanded in part for further consideration the rulings and findings made by the

United States District Court in the following orders and documents:

1. Order dated February 5, 1970 (819a-839a), as amended, corrected, and clarified on March 3, 1970 (921a).

2. Supplementary Findings of Fact dated March 21, 1970 (1198a-1220a).

3. Supplemental Memorandum dated March 21, 1970 (1221a-1238a).

JURISDICTION

The Supreme Court has jurisdiction to review this case by writ of certiorari under 28 U.S.C. 1254(1), and has accepted it for such purpose by granting writs to the petitioners in No. 281 and the petitioners in No. 349.

QUESTIONS PRESENTED FOR REVIEW

This case presents the following questions for review:

1. Does a public school board comply with the Equal Protection Clause of the Fourteenth Amendment when it creates non-discriminatory attendance districts or zones and assigns all children, black and white, to neighborhood schools in the district or zone in which they reside without regard to their race?

2. Does the Equal Protection Clause of the Fourteenth Amendment empower a federal court to order a public school board to assign children to the schools it operates to balance the student bodies in such schools racially or to bus children outside of non-discriminatory attendance districts or zones to effect such purpose?

3. Does Title IV of the Civil Rights Act of 1964, which prohibits the assignment of students to public schools to balance the student bodies in such schools racially and to bus them from some schools to other schools or from some school districts to other school districts to effect such purpose, constitute appropriate legislation to enforce the Equal Protection Clause within the purview of the Fifth Section of the Fourteenth Amendment?

4. Does the order entered by the District Court and affirmed in part by the Circuit Court usurp and exercise the authority of the Charlotte-Mecklenburg Board of Education to devise and implement a non-discriminatory assignment plan conforming to the Equal Protection Clause, and require the Charlotte-Mecklenburg Board of Education to violate the Equal Protection Clause by treating in a different manner students similarly situated and by denying students admission to their neighborhood schools because of their race?

The amicus curiae insists that the first, third, and fourth questions must be answered in the affirmative and that the second question must be answered in the negative.

CONSTITUTIONAL AND STATUTORY PROVISIONS INVOLVED

The case involves the first and second sections of the Fourteenth Amendment; the first and second sections of Article III of the Constitution; and Title IV of the Civil Rights Act of 1964. These constitutional and statutory provisions are printed in the Appendix.

STATEMENT OF THE CASE

A. The Charlotte-Mecklenburg Public School System

The writ in No. 281 and the writ in No. 349 present to the Supreme Court for review the judgment entered by the United States Court of Appeals for the Fourth Circuit on May 26, 1970, in the civil action entitled James E. Swann and others, Plaintiffs, v. Charlotte-Mecklenburg Board of Education and others, Defendants. For ease of narration and understanding, James E. Swann and his associates in this litigation are hereafter called the plaintiffs, and the Charlotte-Mecklenburg Board of Education is hereafter designated as the School Board.

The School Board operates the Charlotte-Mecklenburg Public School System in Charlotte and Mecklenburg County, North Carolina, political subdivisions of North Carolina.

Charlotte, which is the county seat of Mecklenburg County, is inhabited by 239,056 persons who are concentrated within the 64 square miles embraced by its city limits, an area larger than the District of Columbia. Mecklenburg County embraces 550 square miles, has an east-west span of 26 miles, a north-south span of 36 miles, and has a population of 352,006, exclusive of those residing within the area embraced by Charlotte.

In the discharge of its state-assigned duties, the School Board operates 10 high schools, 21 junior high schools, and 72 elementary schools to house and instruct the 84,500 school children residing in Charlotte and Mecklenburg County. Of these school children, 24,000, or 29 percent, are black, and 60,500, or 71 percent, are white. Approximately 95 percent of all the black children who reside within the limits of the City of Charlotte live in predominately black residential sections in northwest Charlotte, and a substantial portion of the other black children in Mecklenburg County reside in predominately black residential areas adjacent to it. (293a-298a).

Prior to *Brown v. Board of Education of Topeka*, 347 U.S. 483 (1954), the School Board operated the public schools of Charlotte and Mecklenburg County as racially segregated schools in conformity with the interpretation then placed upon the Equal Protection Clause of the Fourteenth Amendment. Subsequent to the *Brown Case* and prior to 1965, the School Board established an effective system of determining admission to its public schools on a non-racial basis. It did this, and thus converted its formerly dual system into a unitary system by establishing non-discriminatory attendance districts or zones, and assigning the school children subject to its jurisdiction to their neighborhood schools irrespective of race.

Inasmuch as some of the attendance districts or zones in rural Mecklenburg County and some of its suburban residential districts or zones in or adjacent to Charlotte are extremely large, the School Board voluntarily established a transportation system for the sole purpose of carrying

children residing in these geographically large districts or zones to the nearest available schools. As a consequence, it now uses 280 buses to bus some 23,000 school children to rural and suburban schools. (864a)

In 1965 the plaintiffs brought the instant action against the School Board in the United States District Court for the Western District of North Carolina seeking to obtain a compulsory desegregation decree. After hearing the evidence in the case, the District Court found that the School Board had complied with the requirement of the Equal Protection Clause and denied the decree sought by them. *Swann v. Charlotte-Mecklenburg Board of Education*, 243 F.Supp. 667 (1965). This ruling was affirmed by the Circuit Court. *Swann v. Charlotte-Mecklenburg Board of Education*, 369 F.2d 29 (1966).

B. The Plan Submitted by the Charlotte-Mecklenburg Board of Education

Subsequent to the decision in *Green v. County School Board of New Kent County*, 391 U.S. 430 (1968), the plaintiffs filed a motion in the cause seeking further desegregation. (2a)

Although it found as a fact that the "location of schools in Charlotte has followed the local pattern of residential development, including its de facto patterns of segregation" (305a), and that the School Board members "have achieved a degree and volume of desegregation of schools apparently unsurpassed in these parts and have exceeded the performance of any school boards whose actions have been reviewed in the appellate court decisions" (311a-312a), the District Court resumed hearings in the case on the ground that the *Green Case* had changed "the rules of the game." (312a)

It is to be noted that subsequently the District Court on its own motion reversed its previous findings that any racial imbalance in the Charlotte-Mecklenburg public schools was the result of de facto segregation by asserting that "there is

so much State action imbedded in and shaping these events that the resulting segregation is not innocent or 'de facto' and the resulting schools are not 'unitary' or 'desegregated'." (662a) The amicus curiae submits with all due deference that there is no testimony in the record to sustain this particular finding.

Pursuant to the orders entered by the District Court on April 23, 1969 (285a), June 20, 1969 (448a), August 15, 1969 (579a), and December 1, 1969 (698a), the School Board filed desegregation plans (330a, 480a, 670a) which were rejected by the District Court.

Meanwhile on December 2, 1969, the Court appointed Dr. John Finger, a resident of Rhode Island, as a special consultant to devise a desegregation plan for the guidance of the Court. (819a) Dr. Finger had originally entered the case as a partisan witness for the plaintiffs, and for this reason a good case can be made for the proposition that he lacked the impartiality which is desirable in one selected for the task of assisting a judge in keeping the scales of justice evenly balanced between adverse litigants. (1279a)

While the District Court orders and the School Board plans mentioned above shed light on the School Board's devotion to the neighborhood school concept, and its reluctance as an elected public body to engage in excessive and expensive busing of school children, the subsequent School Board plan of February 5, 1970, and the subsequent District Court order of February 5, 1970, relating to it really illuminate the issues which now confront the Supreme Court. (726a-748a, 819a-839a)

By this plan, the School Board proposed that attendance districts or zones should be drastically gerrymandered in such a manner as to include as many blacks as possible in each district or zone, and that all school children subject to its jurisdiction should be required to attend the school appropriate to their educational standings in the district or zone of their residence. The plan would have accomplished a racial mixture of school children in all of the 103 schools

in the system, except three elementary white schools located in neighborhoods inhabited exclusively by members of the white race. (726a-748a)

The School Board plan contemplated that from 17 percent to 36 percent of the student body in nine of the ten senior high schools in the system would be black; that not more than 38 percent of the student body in 20 of the 21 junior high schools in the system would be black; and that not more than 40 percent of the student body in 60 of the 72 elementary schools in the system would be black.

Under the School Board plan, the remaining high school, Independence High, would be 2 percent black and 98 percent white; the remaining junior high school, Piedmont Junior High, would be 90 percent black and 10 percent white; and all of the 12 remaining elementary schools, except the three white elementary schools, would be 83 percent to 1 percent black. (726a-748a)

The School Board judged it to be impossible to desegregate the three white elementary schools, and to further desegregate the nine predominately black elementary schools by geographic districting or zoning because of the de facto segregation prevailing in the residential areas in which the children assigned to these 12 elementary schools lived. (730a-732a) The District Court made a specific finding in its Supplemental Findings of Fact of March 21, 1970, which establishes the validity of the School Board's conclusion concerning Independence High, Piedmont Junior High, and the 9 predominately black elementary schools, all of which are located in northwest Charlotte or its environs.

The District Court expressly found that "both Dr. Finger and the School Board staff appear to have agreed, and the Court finds as a fact that for the present at least there is no way to desegregate the all-black schools in northwest Charlotte without providing (or continuing to provide) bus or other transportation for thousands of children. All plans and all variation of plans considered for this purpose lead in one fashion or another to that conclusion." (1208a)

The amicus curiae submits that it beggars imagination to conjecture how any plan could have obtained a greater degree of racial integration by gerrymandering attendance districts or zones in a political subdivision where white children outnumber black children 71 to 29, and where most of the black children are concentrated residentially in an area inhabited exclusively by members of their race.

The School Board plan did not stop with proposing such a high degree of racial integration among the student bodies in the schools subject to its jurisdiction. It made these three additional proposals:

1. That the faculty of each school should be assigned in such a manner that the ratio of black teachers to white teachers in each school would be approximately 1 to 3 in accordance with the ratios in the entire faculty of the system (737a);

2. That the School Board should furnish 4,935 additional students in-district or in-zone transportation to the schools in the proposed gerrymandered attendance districts or zones in accordance with the North Carolina law which forbids such transportation within one and one-half mile distances (736a); and

3. That any black child in any school having more than 30 percent of his race in its student body should be allowed to transfer to any school having less than 30 percent of his race; whereas a white child should be permitted to transfer to another school only if the school he is attending has more than 70 percent of his race and the school to which he seeks transfer is less than 70 percent white. (734a-735a)

At the same time, Dr. Finger submitted to the District Court his plan of desegregation which contemplated that the School Board should be required by the Court to deny approximately 23,000 additional children admission to the neighborhood schools in the districts or zones of their residence, and to transport them by bus or otherwise substantial distances in order to produce a greater racial mixture

in student bodies. (819a, 825a-827a, 829a-839a, 1198a, 1208a-1214a, 1231a-1234a, 1268a-1269a)

C. The Order of the District Court

On February 5, 1970, the District Court entered an order approving the School Board plan, subject to certain drastic conditions and revisions recommended by Dr. Finger. (819a-839a) By adopting these conditions and revisions, the District Court commanded the School Board to do these things:

1. To deny hundreds of black high school students admission to a nearby high school which would have had a racial composition of 36 percent black and 64 percent white under the School Board plan, and to bus them from their residences in northwest Charlotte through center-city traffic a distance of some 12 or 13 miles to Independence High School, which is located in a white suburban residential area;

2. To deny several thousands of black junior high school students admission to their neighborhood junior high schools in the inner city, and to bus them substantial distances to nine predominately white suburban schools located in other attendance districts or zones; and

3. To deny thousands of black and thousands of white elementary school children admission to 31 elementary schools located within their respective attendance districts or zones, and to bus them distances approximating 15 miles to elementary schools situated in other attendance districts or zones.

The sole purpose of the District Court in ordering the School Board to dislocate and bus the hundreds of black high school students to Independence High School was to make Independence High less white, and the sole purpose of the District Court in ordering the School Board to dislocate and bus several thousands of junior high school students was to reduce the percentage of blacks in Piedmont Junior High from 90 percent to 32 percent. (825a-826a)

The sole purpose of the order of the Court commanding the School Board to dislocate and bus thousands of elementary school children was to alter the racial composition of the student body in 9 predominately black inner-city schools and in 24 predominately white suburban schools. To accomplish this purpose, the District Court commanded the School Board to dislocate and bus thousands of black first, second, third, and fourth grade students from 9 predominately black inner-city schools to 24 predominately white suburban schools, and to dislocate and bus thousands of white fifth and sixth grade students from the 24 predominately white suburban schools to the 9 predominately black inner-city schools. (826a)

The order of the District Court did not stop with these things. It further ordered the School Board to establish and implement a continuing program of assigning students throughout the school year "for the conscious purpose of maintaining each school * * * in a condition of desegregation." (824a)

The record clearly discloses the reasoning which prompted the District Court to seek to achieve the purposes of its order.

Prior to its order of February 5, 1970, namely, on April 24, 1969, the District Court manifested its disapproval of the School Board's adherence to the neighborhood school concept by this statement: "Today people drive as much as 40 or 50 miles to work; 5 to 10 miles to church; several hours to football games; all over the country for civic affairs of various types. The automobile has exploded the old-fashioned neighborhood * * * If this Court were writing the philosophy of education, he would suggest that educators should concentrate on planning schools as educational institutions rather than as neighborhood proprietorships." (306a)

When it entered its order of February 5, 1970, the District Court justified adding the conditions and revisions recommended by Dr. Finger on the ground that the School

Board plan "relies almost entirely on geographical attendance zones," while "the Finger plan goes further and produces desegregation of all the schools in the system." (819a)

What has been said makes it manifest that the District Court entertained the opinion that the Equal Protection Clause of the Fourteenth Amendment makes it obligatory for a school board to mix student bodies racially in every school subject to its jurisdiction if children are available for mixing, and that a school board must deny a sufficient number of school children admission to their neighborhood schools and bus them to schools elsewhere either to overcome racial imbalances in their neighborhood schools or in the schools elsewhere, regardless of whether such racial imbalances are produced by arbitrary or invidious discrimination on the part of the school board or simply result from adventitious de facto residential segregation or other cause.

The amicus curiae has not undertaken to state with exactitude the number of additional school children which the District Court ordered the School Board to deny admission to their neighborhood schools and to bus from one school to another or from one school district to another, or the additional cost which the carrying out of the District Court's order in this respect will impose upon the School Board.

This action of the amicus curiae has been deliberate because these matters are in serious dispute between the School Board and the District Court.

When the District Court entered its order of February 5, 1970, and thereby adopted the Finger plan in virtually its entirety, the School Board estimated that the order required it to bus 23,384 additional students an average round trip of 30 miles each school day, and that to do this the School Board would have to acquire 526 additional buses and additional parking spaces at an original capital outlay of $3,284,448.94; and thereafter expend each year an addi

tional $1,065,391.98 in employing additional personnel and defraying other operating costs. (853a, 866a)

On March 3, 1970, the District Court modified its order of February 5, 1970. (921a) The School Board then calculated that the order as modified will require it to transport 19,285 additional students and to purchase for such purpose 422 additional buses and additional parking spaces at an original capital outlay of $2,369,100.00; and thereafter to expend each year for additional personnel and operating expenses of such buses $284,800.00. (1269a-1270a)

The Court estimated that the execution of its order as modified would require the School Board to bus 13,300 additional students and to purchase for such use 138 additional buses at an original capital outlay of $745,200.00; and to expend thereafter annually $266,000.00 for operating costs of such additional buses, exclusive of what it will have to expend to compensate any additional personnel necessary for their operation. (1259a-1261a, 1269a)

The Court arrived at its figures by suggesting that the School Board could reduce its estimate of the expenses incident to busing the thousands of children affected by its order by drastically staggering school openings and closings. The School Board replied to this suggestion by asserting that the suggested staggering of school openings and closings would require some children to leave home as early as 6:30 a.m. and prevent some of them from returning home before 5:00 p.m. (864a-865a)

D. The Judgment of the United States Court of Appeals for the Fourth Circuit

At the instance of the School Board, the United States Court of Appeals for the Fourth Circuit reviewed the orders of the District Court. On May 26, 1970, the Circuit Court rendered its judgment affirming the orders of the District Court insofar as they related to the assignment and busing of senior high school and junior high school students, and

remanding to the District Court for further consideration the provisions of the order of the District Court relating to the assignment and busing of elementary school students. (1262a-1304a)

In making this remand, the Circuit Court adjudged that "not every school in a unitary system need be integrated," and adopted a "test of reasonableness—instead of one that calls for absolutes." (1267a)

The writ of certiorari granted to the School Board presents for review the validity of the Circuit Court ruling approving the orders of the District Court relating to the assignment and busing of senior high school and junior high school students and the writ of certiorari granted to the original plaintiffs presents for review the question of the validity of the ruling of the Circuit Court vacating the order of the District Court relating to the assignment and busing of elementary school students.

Subsequent to these events, namely, on August 3, 1970, the District Court reinstated and reaffirmed its order of February 5, 1970, in respect to the assignment and busing of the elementary school students. (1320a) While the validity of this particular order may not be before the Supreme Court, the question which it raises is involved in the matter to be reviewed under the writ granted to James E. Swann and those associated with him in this litigation.

The amicus curiae understands that the School Board has filed an yet unprinted motion with the Supreme Court for a stay of the order entered by the District Court on August 3, 1970, after the hearing of the case in the Circuit Court.

SUMMARY OF ARGUMENT

In the final analysis, the questions presented for review in this case do not arise out of any real controversy in respect to the testimony. They arise out of a fundamental disagreement between the School Board, on the one hand, and the District Court and some of the Circuit Court

Judges, on the other, with respect to how the Equal Protection Clause applies to the assignment of students to public schools.

The view of the School Board may be epitomized in this fashion:

The Equal Protection Clause applies only to State action which is arbitrary or invidious, and, hence, it leaves a public school board, acting as a State agency, entirely free to assign students to its schools by any method satisfactory to itself if such method is not arbitrary or invidious. A public school board acts arbitrarily or invidiously if it assigns students to its schools for racial reasons, but a public school board does not act arbitrarily or invidiously if it assigns students to its schools for non-racial reasons, such as the promotion of the efficiency of school administration, the economy of school administration, or the convenience of the students or their parents. This being true, the Equal Protection Clause does not impair in any way the power of a public school board to create fairly drawn geographic attendance districts or zones, and to assign all students without regard to their race to neighborhood schools in the respective districts or zones in which they reside even though such action may result in some racial imbalances in the schools serving areas predominately inhabited by members of one race.

The view of the District Court and some of the Circuit Court Judges may be summarized in this way:

It is highly desirable from an educational viewpoint to mix students in public schools racially in the highest possible degree. Hence, the Equal Protection Clause imposes upon a public school board the positive duty to balance racially all the schools it operates if black and white children are available for this purpose; and to deny school children admission to their neighborhood schools and bus them to other schools in other areas, no matter how distant, in sufficient numbers to effect such racial balancing.

The School Board refutes this proposition by saying that the Equal Protection Clause does not require action which may be desirable; it merely prohibits action which is arbitrary or invidious.

When it is stripped of irrelevancies and surmises, the record discloses a surprisingly simple state of facts which are relatively free of conflict insofar as they relate to the crucial issues.

After the first *Brown Case*, 347 U.S. 483 (1954), the School Board converted its previously dual system of schools into a unitary system of schools within which no child was excluded because of the child's race. The School Board did this by a geographic assignment plan applicable in like manner to all children without regard to their race. Its action in this regard was adjudged to be in compliance with the Equal Protection Clause by both the District Court and the Court of Appeals.

Subsequent to the *Green Case*, 391 U.S. 430 (1968), the District Court ordered the School Board to submit another plan for the desegregation of its schools. Pursuant to this order, the School Board proposed a plan which was reasonably designed to secure the maximum amount of racial mixture obtainable in the student bodies in its schools without abandonment of the neighborhood school concept by restructuring its geographic attendance districts or zones, and assigning all of the children subject to its jurisdiction without regard to their race to their respective neighborhood schools in the districts or zones in which they reside.

The Court rejected the School Board plan simply because it did not racially balance one senior high school out of the system's ten senior high schools, one junior high school out of the system's 21 junior high schools, and nine predominately black and three predominately white elementary schools out of the system's 72 elementary schools.

Instead of approving the reasonable plan submitted by the School Board, the District Court, in essence, adopted the Finger Plan which requires the School Board to deny

thousands of children admission to their neighborhood schools, and to bus them to other schools in other areas merely to eliminate the racial imbalances in these particular schools. The School Board insists that the action of the District Court was not only inconsistent with the Equal Protection Clause, but violates Title IV of the Civil Rights Act of 1964, and that the Circuit Court erred insofar as it approved the action of the District Court.

ARGUMENT

I.

The Charlotte-Mecklenburg Board of Education has complied with the Equal Protection Clause of the Fourteenth Amendment and the Supreme Court decisions interpreting it by establishing and operating a unitary public school system, which receives and teaches students without discrimination on the basis of their race or color. Any racial imbalance remaining in any of the schools under the jurisdiction of the Board represents de facto segregation, which results from the purely adventitious circumstance that the inhabitants of particular areas in and adjacent to the city of Charlotte are predominantly of one race.

The Equal Protection Clause of the Fourteenth Amendment, which was certified to be a part of the Constitution on July 28, 1868, forbids a state to "deny to any person within its jurisdiction the equal protection of the laws."

By these words, the Equal Protection Clause requires a state to treat in like manner all persons similarly situated. *State Board of Tax Commissioners of Indiana v. Jackson,* 283 U.S. 527 (1931); *Maxwell v. Bugbee,* 250 U.S. 525 (1919). The clause does not require identity of treatment. *Walters v. St. Louis,* 347 U.S. 231 (1934). It permits a state to make distinctions between persons subject to its jurisdiction if the distinctions are based on some reasonable classi-

fication, and all persons embraced within the classification are treated alike. It merely outlaws arbitrary or invidious discrimination. *Avery v. Midland County*, 390 U.S. 474 (1968); *Missouri Pacific Railway Co. v. Mackey*, 127 U.S. 205 (1888).

From July 28, 1868, until May 17, 1954, the Equal Protection Clause of the Fourteenth Amendment was interpreted to sanction the "separate but equal doctrine," which permitted a state to segregate school children in its public schools on the basis of race when it furnished equal facilities for the education of the children of each race. *Gong Lum v. Rice*, 275 U.S. 78 (1927); *Cumming v. Richmond County Board of Education*, 175 U.S. 528 (1899); *Plessy v. Ferguson*, 163 U.S. 537 (1896).

On May 17, 1954, the Supreme Court handed down its historic decision in *Brown v. Board of Education of Topeka*, 347 U.S. 483 (1954), adjudging "that in the field of public education the doctrine of 'separate but equal' has no place" and holding that a state violates the Equal Protection Clause if it denies any child admission to any of its public schools on account of the child's race.

On the same day the Supreme Court handed down *Bolling v. Sharpe*, 347 U.S. 497 (1954), ruling that the Due Process Clause of the Fifth Amendment imposes the same inhibition on the public schools of the District of Columbia that the Equal Protection Clause does on the public schools of a state, and one year later the Supreme Court announced its implementing decision in second *Brown*, which is reported as *Brown v. Board of Education of Topeka*, 349 U.S. 294 (1955).

Since these decisions the Supreme Court has applied the Equal Protection Clause to varying factual situations arising in various Southern public school districts in the following cases: *Cooper v. Aaron*, 358 U.S. 1, 20 (1958); *Shuttlesworth v. Birmingham Board of Education*, 358 U.S. 101 (1958); *Bush v. Orleans Parish School Board*, 364 U.S. 500 (1960); *Watson v. City of Memphis*, 373 U.S. 526 (1963);

Goss v. Board of Education of Knoxville, 373 U.S. 683 (1963); *Griffin v. County School Board of Prince Edward County*, 377 U.S. 218 (1964); *Bradley v. School Board of City of Richmond*, 382 U.S. 103 (1965); *Rogers v. Paul*, 382 U.S. 198 (1965); *Green v. County School Board of New Kent County*, 391 U.S. 430 (1968); *Raney v. Board of Education of the Gould School District*, 391 U.S. 443 (1968); *Monroe v. Board of Commissioners of the City of Jackson*, 391 U.S. 450 (1968); *United States v. Montgomery County Board of Education*, 395 U.S. 225 (1969); *Alexander v. Holmes County Board of Education*, 396 U.S. 19 (1969); *Dowell v. Board of Education of the Oklahoma City Public Schools*, 396 U.S. 269 (1969); *Carter v. West Felicana Parish School Board*, 396 U.S. 226 (1969); *Carter v. West Felicana Parish School Board*, 396 U.S. 290 (1970); and *Northcross v. Board of Education of the Memphis City Schools*, 397 U.S. 232 (1970).

Besides, individual Supreme Court Justices, acting as Circuit Justices, have expressed opinions on the subject in these cases: *Board of School Commissioners of Mobile County v. Davis*, 11 L. ed. 2d 26 (1963); *Keyes v. School District No. 1, Denver*, 396 U.S. 1215 (1970); and *Alexander v. Holmes County Board of Education*, 396 U.S. 1218 (1969).

The record in the instant case embraces hundreds of pages of evidence, orders, and judgments, and for that reason, the case lends itself to much writing. But the issues arising in the case are simple, and it would complicate that simplicity to analyze the cited decisions in detail. In their ultimate analysis, they interpret the Equal Protection Clause as follows:

1. The Equal Protection Clause makes it unconstitutional for a state to deny any child admission to any public school it operates on account of the child's race.

2. In consequence, the Equal Protection Clause imposes upon a state, acting through its appropriate agencies, the responsibility to establish a system of determining admission to its public schools on a non-racial basis.

3. A state, which operated a racially segregated system of public schools on May 17, 1954, fulfills this responsibility by converting its dual public school system into a unitary public school system.

4. A unitary public school system is one "within which no person is to be effectively excluded from any school because of race or color."

When the Equal Protection Clause as thus interpreted is applied to the facts in this case, it is obvious that the School Board has fully converted its *Pre-Brown* dual school system into a unitary school system within which no child is actually excluded from any school because of race or color. The School Board has done this by creating non-discriminatory attendance districts or zones and assigning all children, black and white, to neighborhood schools in the district or zone in which they reside without regard to their race.

These conclusions are explicit in the rulings made by the District Court and the Circuit Court in 1965 and 1966. *Swann v. Charlotte-Mecklenburg Board of Education,* 243 F.Supp. 667 (1965); *Swann v. Charlotte-Mecklenburg Board of Education,* 369 F.2d 29 (1966). They are implicit in the findings made by the District Court in its order of April 23, 1969, that the School Board had "achieved a degree of desegregation of schools apparently unsurpassed in these parts" and had "exceeded the performance of any school board whose actions have been reviewed in the appellate court decisions," (311a-312a) and that the Schools of Charlotte, in essence, conform to de facto patterns of residential segregation. (305a)

To be sure, the District Court, acting *sua sponte,* undertook to recall these findings in its Memorandum Opinion of November 7, 1969, and to assert that racial imbalances in the Schools of Charlotte are "not innocent or *de facto.*" (662a)

The amicus curiae submits in all earnestness that there is no evidence in the record to sustain the District Court's assertion in this respect. Be this as it may, the Supreme Court is empowered in cases of an equitable nature and cases involving constitutional questions to review the evidence and make its own findings. If it follows this course in this case, the Supreme Court will be impelled to the conclusion that there is not a vestige of state-imposed segregation in the Charlotte-Mecklenburg School System.

Besides, the District Court's assertion that racial imbalances in the schools of Charlotte are "not innocent or *de facto*" is totally repudiated by its subsequent finding that there is no way to desegregate the black schools in northwest Charlotte without transporting thousands of children by bus or other means. (1208a)

When all is said, the School Board went far beyond the call of any duty imposed upon it by the Equal Protection Clause when it proposed in its plan of February 2, 1970, to gerrymander attendance districts or zones in order to achieve the highest degree of desegregation obtainable without virtual abandonment of the neighborhood school concept. The amicus curiae expresses no opinion as to whether this proposal is repugnant to the constitutional or legal rights of any child.

II.

The Equal Protection Clause of the Fourteenth Amendment does not require or empower a Federal Court to order a public school board to assign children to the schools it operates merely to balance the student bodies in such schools racially, or to bus children outside reasonable geographic attendance districts or zones to effect such purpose. The District Court ordered the Charlotte-Mecklenburg School Board to do both of these things, and the Circuit Court erred insofar as it affirmed the District Court order.

The facts make it clear that the order entered by the District Court on February 5, 1970, requires racial balancing in the Charlotte-Mecklenburg School System and the busing of thousands of children outside their geographic attendance districts or zones to effect such balancing.

Indeed, the District Court virtually admits this to be true by setting forth in its Supplemental Findings of Fact of March 21, 1970, a specific finding that there is no other way to desegregate the black schools in northwest Charlotte. (1208a)

Upon the entire record, the conclusion is inescapable that the District Court fell into error because it honestly believed that the Equal Protection Clause and certain decisions interpreting it impose upon a public school board an absolute duty to do these things:

1. To balance racially to the highest degree possible all the schools subject to its control if black and white children are available for that purpose anywhere within the territory subject to its jurisdiction, no matter how vast such territory may be; and

2. To effect such racial balancing by denying both black and white children admission to their neighborhood schools and busing them to other schools in other areas in sufficient numbers to overcome racial imbalances either in their neighborhood schools or in the other schools, regardless of

whether the racial imbalances result from de facto residential segregation or other cause, and regardless of these other factors: the distances the children are to be bused, the time required for their busing, the impact of their exclusion from their neighborhood schools and their busing upon their minds and hearts, the effect of these things upon the management of the homes which must nurture them, the traffic hazards involved, and the additional expense foisted upon heavily burdened taxpayers.

There is no other rational explanation for the court order which disrupts the lives of thousands of school children and the management of the thousands of homes from which they come, and diverts tremendous sums of tax-raised moneys from the enlightenment of their minds to the busing of their bodies.

The Equal Protection Clause does not require any court to enter any such order. It does not empower any court to enter any such order. Indeed, it forbids any court to do so.

As interpreted in the first *Brown Case*, 347 U.S. 483 (1954), and all subsequent Supreme Court decisions relevant to the subject, the Equal Protection Clause forbids a public school board, which acts as a state agency, to deny any child admission to any school it operates on account of the child's race. A public school board obeys the Clause by maintaining a unitary school system, i.e., a school system "within which no person is to be effectively excluded from any school because of race or color." *Northcross v. Board of Education of the Memphis City Schools*, 397 U.S. 232 (1970); *Alexander v. Holmes County Board of Education*, 396 U.S. 19 (1969). See also the opinion of Mr. Justice Black, acting as Circuit Justice, in *Alexander v. Holmes County Board of Education*, 396 U.S. 1218 (1969).

The power to assign children to state supported schools belongs to the public school board which operates them. The Equal Protection Clause does not undertake to transfer this power to the Federal Courts. It merely subjects the

exercise of the power by the public school board to this limitation: The board must not exclude any child from any school it operates because of the child's race.

If it faithfully observes this limitation upon its power, a public school board has the right to assign children to the schools it operates in any non-discriminatory fashion satisfactory to itself.

The School Board exercised this right when it created non-discriminatory attendance districts or zones and assigned all children, whether black or white, to neighborhood schools in the districts or zones of their residence without regard to race.

Since the children are similarly situated and the School Board treats them exactly alike, its action is in complete harmony with the Equal Protection Clause. It accords, moreover, with the implementing decision in the second *Brown Case*, 349 U.S. 294 (1955), which expressly recognizes that a school board may employ non-discriminatory geographic zoning of school districts "to achieve a system of determining admission to the public schools on a non-racial basis."

As is true in respect to virtually every city of any size in our land, the different races are concentrated to a substantial degree in separate residential areas in Charlotte, and for this reason the School Board's non-discriminatory geographic zoning and assignment program necessarily results in some racial imbalances in some schools.

Notwithstanding this, the order of the District Court commanding the School Board to exclude thousands of children from their neighborhood schools and to bus them long distances to other schools to overcome these racial imbalances is without support in the Equal Protection Clause.

This is true for an exceedingly plain reason. The Equal Protection Clause does not prohibit any discrimination except that which is arbitrary or invidious.

It inevitably follows that where school attendance areas are not arbitrarily or invidiously fixed so as to include or exclude children of a particular race, the Equal Protection Clause does not prohibit a state or local school board from requiring that the children living in each attendance area attend the school in that area, even though the effect of such a requirement, in a locality where the different races are concentrated in separate residential areas, is racial imbalance or de facto segregation in the schools.

The conclusion that the Equal Protection Clause does not impose upon a public school board any mandate to remove any racial imbalance in its schools occasioned by de facto residential segregation or non-discriminatory geographic assignments is expressly supported in *Bell v. School City of Gary, Ind.* (7 CA-1963), 324 F.2d 209, and *Downs v. Board of Education of Kansas City, Kansas* (10 CA-1964), 336 F.2d 998. Moreover, it is compelled by first *Brown*, 347 U.S. 483 (1954), and all the subsequent Supreme Court cases applying its holding, as well as by the language of the Equal Protection Clause itself.[1]

Despite the fact that the Charlotte-Mecklenburg School System is in the South, racial imbalances produced in its schools by de facto residential segregation are just as innocent as racial imbalances produced in the public schools of the North by the same cause, and are equally exempt from federal interference, whether legislative, executive, or judicial, under the Equal Protection Clause, which, as already pointed out, condemns no discrimination except that which is arbitrary or invidious.

---

[1]While such action may not be customary in briefs, the amicus curiae wishes to note that this conclusion is supported by the text writer in 15 Am. Jur. 2d, Civil Rights, Section 39, Page 433, and by one of the most recent commentaries on the Constitution of the United States, i.e., Bernard Schwartz's "Rights of the Person," Volume II, Section 501, Page 593-596.

The amicus curiae is confident that the Supreme Court will so adjudge. Indeed, it must do so if the United States is truly one nation under one flag and one Constitution.

It no longer comports with intellectual integrity to call all racial imbalances in the public schools of the South de jure, and all racial imbalances in the public schools of the North de facto.

There is now no de jure school segregation anywhere in our land. Racial imbalances in public schools are either arbitrary or invidious and, hence, constitutionally impermissible, both North and South, or innocent and, hence, constitutionally permissible, both North and South. Racial imbalances resulting from de facto residential segregation or non-discriminatory districting or zoning, whether in the North or in the South, are clearly innocent and constitutionally permissible.

Moreover, it no longer comports with reality, common sense, or justice to apply one rule to the North and another to the South because the South did not precede the Supreme Court in discovering that the "separate, but equal doctrine" had ceased to be the law of the land.

III.

The Fifth Section of the Fourteenth Amendment Empowers Congress to Enforce the Equal Protection Clause by Appropriate Legislation, the First Section of Article III of the Constitution Empowers Congress to Regulate the Jurisdiction of United States District Courts and United States Circuit Courts of Appeals, and the Second Section of Article III of the Constitution Empowers Congress to Regulate the Appellate Jurisdiction of the Supreme Court. Congress Exercised all of These Powers in an Appropriate Fashion When it Enacted Title IV of the Civil Rights Act of 1964, Which Prohibits the Assignment of Students to Public Schools to Balance the Student Bodies in Such Schools Racially, and to bus Them From Some Schools to Other Schools, or From Some School Districts to Other School Districts to Effect Such Purpose. The Act's Prohibition on Busing is Absolute and Deprives Federal Courts of Jurisdiction to Compel School Boards to Bus Students to Overcome Racial Imbalances in Schools, Even if Such Imbalances Result From Discriminatory School Board Action. The District Court Order Violated This Act by Commanding the Charlotte-Mecklenburg School Board to do the Things Prohibited by it, and the Circuit Court Joined in Such Violation Insofar as it Affirmed the District Court Order.

The Equal Protection Clause is limited in objective and operation. It imposes this duty and this duty only on a state, i.e., to treat in like manner all persons similarly situated.

In consequence, it forbids a public school board, acting as a state agency, to exclude any child from any school because of the child's race.

Further than that it does not go. It does not rob any public school board of its inherent authority to assign child-

ren of any race to their neighborhood school if the school board acts for reasons other than racial reasons, such as a purpose to promote ease of school administration, convenience of the children and the homes from which they come, or economy of operation.

Hence, it does not empower federal courts to deny children of any race admission to their neighborhood schools and to bus them to other schools in other areas to remedy racial imbalances in their neighborhood schools or the other schools arising out of the residential patterns of their neighborhoods or of the other areas.

And, above all things, the Equal Protection Clause does not intend that little children, black or white, shall be treated as pawns on a bureaucratic or judicial chess board.

When it enacted Title IV of the Civil Rights Act of 1964 to enforce the Equal Protection Clause, Congress recognized the validity of these observations concerning the meaning of the Equal Protection Clause. Moreover, it was not oblivious to the inescapable reality that the different races are concentrated to substantial degrees in separate residential areas throughout the nation, and that it would be virtually impossible to keep the public schools of the country racially balanced, even if the Equal Protection Clause did not prohibit such action.

For these reasons, Congress vested in the Commissioner of Education, the Attorney General, and the Federal Courts certain responsibilities regarding what it called the desegregation of public education, but limited the powers of the Commissioner of Education and the Attorney General, and the jurisdiction of the Federal Courts to keep them within constitutional bounds.

Congress was authorized to do these things by the Fifth Section of the Fourteenth Amendment, which expressly empowers Congress to "enforce, by appropriate legislation" the Equal Protection Clause; the First Section of Article III of the Constitution, which authorizes Congress to prescribe the

jurisdiction of the inferior courts created by it, *Chisholm v. Georgia*, 2 Dall. (U.S.) 419, 432 (1793); *Turner v. Bank of North America*, 4 Dall. (U.S.) 8 (1799); *Ex Parte Bollman*, 4 Cranch (U.S.) 75, 93 (1807); *Cary v. Curtis*, 3 How. (U.S.) 236, 245 (1845); *Sheldon v. Still*, 8 How. (U.S.) 441 (1850); *Kline v. Burke Construction Co.*, 260 U.S. 226, 234 (1922); *Lauf v. E. G. Skinner & Co.*, 303 U.S. 323, 330 (1938); *Lockerty v. Phillips*, 319 U.S. 182 (1943); and *Yakus v. United States*, 321 U.S. 414 (1944); and the Second Section of Article III of the Constitution, which vests Congress with legal power to regulate the appellate jurisdiction of the Supreme Court, *Wiscart v. D'Auchy*, 3 Dall. (U.S.) 321, (1796); *Durousseau v. United States*, 6 Cranch 309 (1810); *Barry v. Mercein*, 5 How. (U.S.) 103, 119 (1847); *Daniels v. Railroad Co.*, 3 Wall. (U.S.) 250, 254 (1866); *Ex Parte McCardle*, 6 Wall. (U.S.) 318 (1868); *The Francis Wright*, 105 U.S. 381, 386 (1882); *Kuntz v. Moffitt*, 115 U.S. 487, 497 (1885); *Cross v. Burke*, 146 U.S. 82, 86 (1892); *Missouri v. Pacific Railway Co.*, 292 U.S. 13, 15 (1934); and *Stephan v. United States*, 319 U.S. 423, 426 (1943).

The conclusion that Title IV of the Civil Rights Act of 1964 is designed to enforce the Supreme Court rulings that the Equal Protection Clause forbids a school board, acting as a state agency, to deny any child admission to any school it operates because of the child's race is vindicated by the legislative history of the Act, as well as by its language.

During the course of the debate on the bill which became the Civil Rights Act of 1964, Senator Byrd of West Virginia addressed this question to Senator Humphrey, the floor manager of the bill, and received this reply from Senator Humphrey:

> "MR. BYRD, of West Virginia. Can the Senator from Minnesota assure the Senator from West Virginia that under Title VI school children may not be bused from one end of the community to another end of

the community at the taxpayers' expense to relieve so-called racial imbalance in the schools?"[1]

"MR. HUMPHREY. I do."[2]

Senator Humphrey made these further statements relating to the purposes of the bill:

"MR. HUMPHREY. Mr. President, the Constitution declares segregation by law to be unconstitutional, but it does not require integration in all situations. I believe this point has been made very well in the courts, and I understand that other Senators will cite the particular cases.

"I shall quote from the case of Bell against School City of Gary, Ind., in which the Federal court of appeals cited the following language from a special three judge district court in Kansas: 'Desegregation does not mean that there must be intermingling of the races in all school districts. It means only that they may not be prevented from intermingling or going to school together because of race or color.' *Brown v. Board of Education*, D. C. 139 F. Supp. 468, 470.

"In *Briggs v. Elliott* (EDSC), 132 Supp. 776, 777, the Court said: 'The Constitution, in other words, does not require integration. It merely forbids discrimination.' In other words, an overt act by law which demands segregation is unconstitutional. That was the ruling of the historic *Brown* case of 1954."[3]

The language of the Act discloses this two-fold Congressional intent:

1. To enforce the Supreme Court rulings that the Equal Protection Clause prohibits the State from denying to any

---

[1]Senator Byrd was evidently referring to Title IV, instead of Title VI.

[2]Congressional Record, Volume 110, Part 10, Page 12,714, June 4, 1964.

[3]Congressional Record, Volume 110, Part 10, Page 13,821, June 15, 1964.

child admission to any school it operates because of the child's race; and

2. To keep overzealous bureaucrats and federal judges from straying beyond constitutional limits in cases involving the desegregation of public schools.

Since no action of his is involved in this case, the amicus curiae pretermits discussion of the provisions of the Civil Rights Act of 1964 relating to the Commissioner of Education.

In phrasing the Act, Congress uses the terms "desegregation" and "discrimination" interchangeably to express the concept made familiar by the prevalent use of the word "discrimination" to mean state action denying persons admission to public colleges or public schools because of their race.

This observation is made indisputable by Section 401(b) which expressly declares that "desegregation" merely means "the assignment of students to public schools and within such schools without regard to their race, color, religion, or national origin"; Section 407(a)(1) and (2) which refer to children who "are being deprived by a school board of the equal protection of the laws" and individuals who have "been denied admission" to a public college or permission "to continue at a public college by reasons of race, color, religion, or national origin"; Section 409 which directs its attention to "discrimination in public education"; and Section 410 which stipulates that "nothing in this title shall prohibit classification and assignment for reasons other than race, color, religion, or national origin.

There is not a single syllable in Title IV of the Civil Rights Act of 1964 giving any support to a different interpretation.

Section 401(b) merits further consideration because it specifies not only what Congress means by the term "desegregation", but also what Congress does not mean by that term.

Section 401(b) consists of two clauses. The first clause provides that "desegregation" as used in Title IV "means the assignment of students to public schools and within such schools without regard to their race, color, religion, or national origin," and the second clause provides that "desegregation" as used in Title IV "shall not mean the assignment of students to public schools in order to overcome racial imbalance."

As a law made by Congress, Title IV is binding on federal judges, and defines their jurisdiction in respect to public schools operated by public school boards acting as state agencies.

The first clause of Section 401(b) commands school boards to ignore race, color, religion, and national origin as factors in assigning students to public schools. Since federal judges have no power to add anything to the laws they enforce, this clause merely confers upon federal judges the limited jurisdiction to enforce its command by decrees which prevent recalcitrant school boards from denying otherwise eligible children admission to schools on account of their race, color, religion, or national origin.

Since federal judges do not have power to subtract anything from laws they enforce, the second clause of Section 401(b) denies to federal judges jurisdiction to compel school boards to assign "students to public schools in order to overcome racial imbalance." By this clause, Congress forbids federal judges to make decrees compelling school boards to take affirmative steps to commingle black and white children in public schools in proportions satisfactory to themselves to remedy racial imbalances occasioned by de facto residential segregation or non-discriminatory action on the part of school boards.

This interpretation of Section 401(b) is completely confirmed by Section 407, 409, and 410 of Title IV.

Before the enactment of Title IV of the Civil Rights Act of 1964, only the individuals aggrieved thereby had legal

standing to make complaint in federal courts concerning state-imposed segregation in public education. They were restricted to seeking relief for themselves and their children and other persons similarly situated. They did not have the right to demand that federal courts should substitute federally coerced integration for state-imposed segregation.

When it drafted Title IV, Congress decided to extend to the Attorney General standing to sue for "such relief as may be appropriate" in behalf of two groups of people if he believes their complaints to be "meritorious" and concludes that they are "unable *** to initiate and maintain appropriate legal proceedings for" their own "relief." These groups of people are described, in essence, as children who "are being deprived by a school board of the equal protection of the laws" and individuals who have been "denied admission" to a public college or "permission to continue in attendance at a public college by reason of race, color, religion or national origin." To this end, Congress inserted Section Section 407(a) in Title IV.

At the same time, however, Congress decided to preserve intact the existing rights of individuals to sue in their own behalf for relief against state-imposed segregation. To accomplish this purpose, Congress stipulated in Section 409 that nothing in Title IV "shall affect adversely the right of any person to sue for or obtain relief in any court against discrimination in public education."

Congress was determined, however, not to increase the powers of federal judges when it gave the Attorney General standing to seek relief against discrimination in public education in behalf of the aggrieved persons designated in Section 409(a). Moreover, Congress was equally as determined that federal judges should not have jurisdiction to compel school boards to deny children admission to their neighborhood schools and transport them hither and yon to achieve racial balances in public schools, regardless of whether the racial imbalances sought to be removed to accomplish such purpose arise out of innocent causes or discriminatory action on the part of school boards.

Congress made these purposes manifest by inserting in Section 409(a) language expressly providing "that nothing herein shall empower any official or court of the United States to issue any order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another or one school district to another in order to achieve such racial balance, or otherwise enlarge the existing power of the court to insure compliance with constitutional standards."

By so doing, Congress deprived all federal courts of the jurisdiction to order public school boards to bus children from one school to another or from one school district to another to remedy racial imbalances in public schools regardless of whether such imbalances arise out of innocent causes or discriminatory school board action. As appears from the cases which the amicus curiae has previously cited, Congress had undoubted power to do this under the First Section of Article III of the Constitution, which empowers it to define the jurisdiction of inferior federal courts, and under the Second Section of Article III of the Constitution, which expressly provides that "the Supreme Court shall have appellate jurisdiction, both as to law and fact, with such exceptions, and under such regulations as the Congress shall make."

It necessarily follows that the District Court violated the provisions of the Civil Rights Act of 1964 when it ordered the Charlotte-Mecklenburg School Board to bus thousands of children from some schools to other schools and from some school districts to other school districts to overcome racial imbalances in any of its schools regardless of the origin of such racial imbalances; and that the Circuit Court erred in affirming the provisions of the District Court order relating to the transportation of senior high school and junior high school students.

While such statutes apply to the Executive Department of the Federal Government only, and for that reason are not controlling in this case, it seems not amiss to direct the atten-

tion of the Supreme Court to congressional hostility to the busing of children to achieve racial balancing in public schools. Congress manifested its hostility to such action by the Elementary and Secondary Education Act of 1965, as amended in 1966, which forbids "any department, agency, officer, or employee of the United States * * * to require the assignment or transportation of students or teachers in order to overcome racial imbalance," (P.L. 89-10, Title VIII, Section 804; 20 U.S.C. Section 884); the Department of Labor, and Health, Education, and Welfare Appropriation Act of 1969, which provides that "no part of the funds contained in this Act shall be used to force busing of students * * * in order to overcome racial imbalance as a condition precedent to obtaining Federal funds otherwise available to any State, school district, or school", (P.L. 90-557, Title IV, Section 410); and the Office of Education Appropriation Act of 1971, which provides that "no part of the funds contained in this Act shall be used to force any school or school district which is desegregated as that term is defined in Title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students" (P.L. 91-380, Title II, Section 210).

IV.

A School Board has the Power to Devise and Implement any Non-discriminatory Plan for the Assignment of Children to the Public Schools it Operates. The District Court not Only Rejected a Non-discriminatory Assignment Plan Submitted by the Charlotte-Mecklenburg School Board, but it Usurped and Exercised the Authority of the School Board in this Respect by Devising a Plan of its Own Which Commands the School Board to Deny Thousands of Children Admission to Their Neighborhood Schools, and to bus Them to Other Schools to Mix the Races in the Various Schools in Numbers or Proportions Satisfactory to the District Court. By so Doing, the District Court Ordered the School Board to Deny to the Thousands of Children Affected by its Order Admission to Their Neighborhood Schools in Violation of the Equal Protection Clause, and to Bus Them to Other Schools or Other School Districts in Violation of Section 407(a)(2) of the Civil Rights Act of 1964. The Circuit Court Concurred in These Violations, and Erred Insofar as it Affirmed the Order of the District Court.

A school board, acting as a state agency, has the power to assign children to the public schools it operates free from interference by the Federal Judiciary as long as it obeys the Equal Protection Clause and does not exclude any child from any school because of the child's race.

When a school board violates the Equal Protection Clause, a Federal Court has jurisdiction to order the school board to devise and implement a plan sufficient to remedy its discriminatory assignment of children to its schools, and to punish the members of the school board for contempt of court if they fail to obey the order. Nevertheless, the power to devise and implement a plan to remedy the discriminatory assignment continues to reside in the school board, and the Federal Court is without power to reject a non-discriminatory

plan submitted by the school board because such non-discriminatory plan will not mix the races in the schools in numbers or proportions satisfactory to the Federal Court.

Besides the Federal Court cannot usurp and exercise the power of the School Board to devise a non-discriminatory assignment plan because the Federal Court wishes to mix the races in the schools in greater numbers or proportions than the non-discriminatory plan of the School Board envisages.

The District Court violated all of these principles when it made its order of February 5, 1970 (819a-839a), its supplemental findings of fact of March 21, 1970 (1198a-1220a), and its supplemental memorandum of March 21, 1970 (1221a-1238a).

Pursuant to the order which the District Court had entered on December 1, 1969, the Charlotte-Mecklenburg School Board submitted to the District Court on February 2, 1970 its plan for desegregation of schools (726a-742a). By this plan the School Board undertook to restructure its geographical attendance districts or zones in such a manner as to promote the highest degree of racial integration obtainable by geographical districting or zoning, and to assign all school children, black or white, to the neighborhood schools in the district or zone of their residence, regardless of race. The plan undertook to further augment desegregation by a transfer system heavily weighted in favor of permitting black children to transfer from predominantly black schools to predominately white schools.

Inasmuch as it treated all children similarly situated exactly alike and did not exclude any child from any school on account of the child's race, the plan submitted by the School Board on February 2, 1970, was in complete harmony with the Equal Protection Clause and it was obligatory for this reason for the District Court to approve it and permit the School Board to implement it.

Instead of doing so, the District Court rejected the non-discriminatory plan submitted by the School Board, and usurped and exercised the power vested in the School Board by adopting a plan of its own. The District Court accomplished this purpose by engrafting upon the plans of the School Board drastic alterations and revisions recommended by Dr. Finger, which commanded the School Board to deny thousands of children admission to their neighborhood schools, and to bus them long distances from some schools to other schools, and from some school districts or zones to other school districts or zones.

When all is said, the District Court commanded the School Board to take this action to remedy racial imbalances in black schools in northwest Charlotte arising out of de facto residential segregation in that area, and to produce racial commingling in these schools of northwest Charlotte and other schools in other areas in numbers or proportions greater than those envisaged by the plan of the School Board.

The District Court virtually confesses that its order was designed to effect these purposes by this recital which appears in its supplemental findings of fact of March 21, 1970:

> "Both Dr. Finger and the school board staff appear to have agreed, and the court finds as a fact, that for the present at least, there is no way to desegregate the all-black schools in Northwest Charlotte without providing (or continuing to provide) bus or other transportation for thousands of children. All plans and all variations of plans considered for this purpose lead in one fashion or another to that conclusion." (1208a)

In addition to usurping and exercising power vested by law in the School Board, the District Court order commands the School Board to violate rights vested in thousands of school children by the Equal Protection Clause and the Civil Rights Act of 1964.

Since the power to assign children to public schools belongs to the school board administering such schools, no child has the constitutional or legal right in the first instance to attend any particular school, but when a school board adopts a non-discriminatory system for assigning children to neighborhood schools in the attendance district or zone of their residence, children acquire, as against every governmental agency except the school board, the legal right to attend the schools to which they have been so assigned. This right is additional to their right not to be excluded from such schools because of their race.

By its previous practices and its plan of February 2, 1970, the School Board had assigned thousands of senior high school, junior high school, and elementary school children to their neighborhood schools in a wholly non-discriminatory fashion.

By its order of February 5, 1970, the District Court commanded the School Board to do two things which clearly offend the Equal Protection Clause. In the first place, the District Court commanded the School Board to treat differently children similarly situated by allowing thousands of children to attend their neighborhood schools, and by excluding thousands of other children from admission to their neighborhood schools; and in the second place, the District Court commanded the School Board to bus the thousands of children excluded from their neighborhood schools to some other schools in other districts or zones to desegregate both their neighborhood schools and the other schools in numbers or proportions satisfactory to the District Court.

No amount of sophistry can erase the plain truth that the second group of children were denied admission to their neighborhood schools on account of their race.

Manifestly, the Equal Protection Clause does not confer upon any Federal Court jurisdiction to enter a wondrous order to compel a school board to obey the Equal Protection Clause by violating it. Congress apparently realized this bizarre result of busing children from one school to

another, or from one school district or zone to another di
trict or zone, when it prohibited any officer or Court of th
United States to require such action to achieve the raci
balancing of schools.

The Circuit Court erred in affirming the order of the Di
trict Court rejecting the plan submitted by the School Boar
and in affirming, in part, the order of the District Cou
excluding children from their neighborhood schools and r
quiring them to be bused to other schools and other scho
districts in other areas.

CONCLUSION

For the reasons stated, the Court should reverse the pr
visions of the judgment of the Circuit Court insofar as th
relate to the assignment and busing of senior high scho
and junior high school students; approve the provisions
the judgment of the Circuit Court insofar as they vaca
the order of the District Court relating to the assignme
and busing of elementary school children; and grant the m
tion of the School Board to stay the order of the Distri
Court reinstating its previous orders relating to the assig
ment and busing of elementary school students.

APPENDIX

Constitutional Provisions Involved

1. The First Section of the Fourteenth Amendment, which reads, in pertinent part, as follows: "nor (shall any State) deny to any person within its jurisdiction the equal protection of the laws."

2. The Fifth Section of the Fourteenth Amendment, which specifies that "The Congress shall have power to enforce, by appropriate legislation, the provisions of this Article."

3. The First Section of Article III, which states, in pertinent part, that "The judicial Power of the United States, shall be vested in one supreme Court, and in such inferior Courts as the Congress may from time to time ordain and establish."

4. The Second Section of Article III of the Constitution, which reads, in pertinent part, as follows:

> "The judicial Power shall extend to all Cases, in Law and Equity, arising under this Constitution, the Laws of the United States, and Treaties made, or which shall be made, under their Authority; - to all Cases affecting Ambassadors, other public Ministers and Consuls; - to all Cases of Admiralty and maritime Jurisdiction; - to Controversies to which the United States shall be a Party; - to Controversies between two or more States; - between a State and Citizens of another State; - between Citizens of different States; - between Citizens of the same State claiming Lands under Grants of different States, and between a State, or the Citizens thereof, and foreign States, Citizens or Subjects.
>
> "In all Cases affecting Ambassadors, other public Ministers and Consuls, and those in which a State shall be Party, the supreme Court shall have original Jurisdiction. In all the other Cases before mentioned, the supreme Court shall have appellate Jurisdiction,

both as to Law and Fact, with such Exceptions, and under such Regulations as the Congress shall make."

Statutory Provisions Involved

1. Title IV of the Civil Rights Act of 1964 which originally appeared in Title IV of Public Law 88-352 of the 88th Congress and is now codified as 42 USC 2000c - 2000c-9. This statute reads as follows:

"Title VI - Desegregation of Public Education Definitions

"Sec. 401. As used in this title -

"(a) 'Commissioner' means the Commissioner of Education.

"(b) 'Desegregation' means the assignment of students to public schools and within such schools without regard to their race, color, religion, or national origin, but 'desegregation' shall not mean the assignment of students to public schools in order to overcome racial imbalance.

"(c) 'Public school' means any elementary or secondary educational institution, and 'public college' means any institution of higher education or any technical or vocational school above the secondary school level, provided that such public school or public college is operated by a State, subdivision of a State, or governmental agency within a State, or operated wholly or predominantly from or through the use of governmental funds or property, or funds or property derived from a governmental source.

"(d) 'School board' means any agency or agencies which administer a system of one or more public schools and any other agency which is responsible for the assignment of students to or within such system.

Survey and Report of Educational Opportunities

"Sec. 402. The Commissioner shall conduct a survey and make a report to the President and the Congress, within two years of the enactment of this title, concerning the lack of availability of equal educational opportunities for individuals by reason of race, color, religion, or national origin in public educational institutions at all levels in the United States, its territories and possessions, and the District of Columbia.

Technical Assistance

"Sec. 403. The Commissioner is authorized, upon the application of any school board, State, municipality, school district, or other governmental unit legally responsible for operating a public school or schools, to render technical assistance to such applicant in the preparation, adoption, and implementation of plans for the desegregation of public schools. Such technical assistance may, among other activities, include making available to such agencies information regarding effective methods of coping with special educational problems occasioned by desegregation, and making available to such agencies personnel of the Office of Education or other persons specially equipped to advise and assist them in coping with such problems.

Training Institutes

"Sec. 404. The Commissioner is authorized to arrange, through grants or contracts, with institutions of higher education for the operation of short-term or regular session institutes for special training designed to improve the ability of teachers, supervisors, counselors, and other elementary or secondary school personnel to deal effectively with special educational problems occasioned by desegregation. Individuals who attend such an institute on a full-time basis may be paid stipends for the period of their

attendance at such institute in amounts specified by the Commissioner in regulations, including allowances for travel to attend such institute.

Grants

"Sec. 405. (a) The Commissioner is authorized, upon application of a school board, to make grants to such board to pay, in whole or in part, the cost of -

"(1) giving to teachers and other school personnel in-service training in dealing with problems incident to desegregation, and

"(2) employing specialists to advise in problems incident to desegregation.

"(b) In determining whether to make a grant, and in fixing the amount thereof and the terms and conditions on which it will be made, the Commissioner shall take into consideration the amount available for grants under this section and the other applications which are pending before him, the financial condition of the applicant and the other resources available to it; the nature, extent, and gravity of its problems incident to desegregation; and such other factors as he finds relevant.

Payments

"Sec. 406. Payments pursuant to a grant or contract under this title may be made (after necessary adjustments on account of previously made overpayments or underpayments) in advance or by way of reimbursement, and in such installments, as the Commissioner may determine.

Suits by the Attorney General

"Sec. 407. (a) Whenever the Attorney General receives a complaint in writing -

"(1) signed by a parent or group of parents to the effect that his or their minor children, as members of a class of persons similarly situated, are being deprived by a school board of the equal protection of the laws, or

"(2) signed by an individual, or his parent, to the effect that he has been denied admission to or not permitted to continue in attendance at a public college by reason of race, color, religion, or national origin, and the Attorney General believes the complaint is meritorious and certifies that the signer or signers of such complaint are unable, in his judgment, to initiate and maintain appropriate legal proceedings for relief and that the institution of an action will materially further the orderly achievement of desegregation in public education, the Attorney General is authorized, after giving notice of such complaint to the appropriate school board or college authority and after certifying that he is satisfied that such board or authority has had a reasonable time to adjust the conditions alleged in such complaint, to institute for or in the name of the United States a civil action in any appropriate district court of the United States against such parties and for such relief as may be appropriate, and such court shall have and shall exercise jurisdiction of proceedings instituted pursuant to this section, provided that nothing herein shall empower any official or court of the United States to issue any order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another or one school district to another in order to achieve such racial balance, or otherwise enlarge the existing power of the court to insure compliance with constitutional standards. The Attorney General may implead as defendants such additional parties as are or become necessary to the grant of effective relief hereunder.

"(b) The Attorney General may deem a person or persons unable to initiate and maintain appropriate legal proceedings within the meaning of subsection (a) of this section when such person or persons are unable, either directly or through other interested persons or organizations, to bear the expense of the litigation or to obtain effective legal representation; or whenever he is satisfied that the institution of such litigation would jeopardize the personal safety, employment, or economic standing of such person or persons, their families, or their property.

"(c) The term 'parent', as used in this section includes any person standing in loco parentis. A 'complaint' as used in this section is a writing or document within the meaning of section 1001, title 18, United States Code.

"Sec. 408. In any action or proceeding under this title the United States shall be liable for costs the same as a private person.

"Sec. 409. Nothing in this title shall affect adversely the right of any person to sue for or obtain relief in any court against discrimination in public education.

"Sec. 410. Nothing in this title shall prohibit classification and assignment for reasons other than race, color, religion, or national origin.

IN THE SUPREME COURT OF THE UNITED STATES

SWANN,
Petitioner
vs.
CHARLOTTE-MECKLENBURG BOARD OF EDUCATION,
Respondent

SUPREME COURT
CASE # [redacted] 281

MOTION FOR LEAVE TO FILE A BRIEF OF AMICUS CURIAE

Made in the absence of consent being seasonably received from the Parties to this case.

Comes now before this Court, Newton Collier Estes, to request an opportunity to file a brief in opposition to the Fourth Circuit Court's ordering busing of public school children to achieve arbitrary numerical racial balances in student bodies.

A. He states that his interest in the Court's decision is based on:

1) The assumption that the decision rendered will serve as a legal guideline for school assignment rulings to be rendered at Federal Court hearings in the City of Memphis, where he is a resident, and in whose school system he has children registered.

2) That a decision requiring coercive busing would reduce his power to affect the policies and actions of his locally-constituted

governments.

3) That he and his family would be denied the right to make many of the day-to-day household decisions, such as when to get up in the morning and where they would go when they leave the house -- decisions which form a considerable part of one's pursuit of happiness.

B. He wants to call to the Court's attention:

1) The argument of what constitutes a "unitary" school system has so far been the prime consideration in every Federal Court hearing on where children must attend school.

2) That arguments have not been fully presented on whether methods thus far ordered to achieve this type of school system might run counter to the Constitutional requirements that the main function of governments is to enact and operate laws, after obtaining consent of those governed (through the election process), which tend to insure domestic tranquility, and to guarantee individual liberty now and in the future.

C. He wishes to suggest to the Court that any decision it renders in this hearing should be within the framework of the stated purposes for which our Constitutional government was instituted.

He believes the Court must make its disposition of this case relate to those stated Constitutional principles, because a failure to do so would dramatically alter the relationship

the American citizen has always had with his government.

He would cease to be a formulator in the operations of his government, and would feel the need to participate as an active defender of his Constitutional rights against a Court-ordered federal tyranny.

He does now submit that a decision which would, in effect, abrogate the Preamble to the Constitution should be construed by those Americans, who regard liberty as the single most important of all human rights, as a declaration of war by the Federal government on its citizens.

THESE PREMISES CONSIDERED, I, Newton Collier Estes pray that I be given leave to file a brief with the Court, and be granted permission to present oral arguments in its support before the Court.

IN THE SUPREME COURT OF THE UNITED STATES

SWANN, Petitioner	)	SUPREME COURT
	)	CASE # 281
vs.	)	(formerly # 1713)
	)	
CHARLOTTE-MECKLENBURG BOARD OF EDUCATION,	)	

BRIEF OF AMICUS CURIAE
IN SUPPORT OF RESPONDENT

Comes now before this Court, Newton Collier Estes to file a brief in opposition to the Fourth Circuit Court's ordering busing of public school children to achieve arbitrary numerical racial balances in student bodies.

A. He states that his interest in this case is based on the belief that coercive busing would jeopardize his family's right to freely choose the activities they might wish to undertake in their pursuit of happiness.

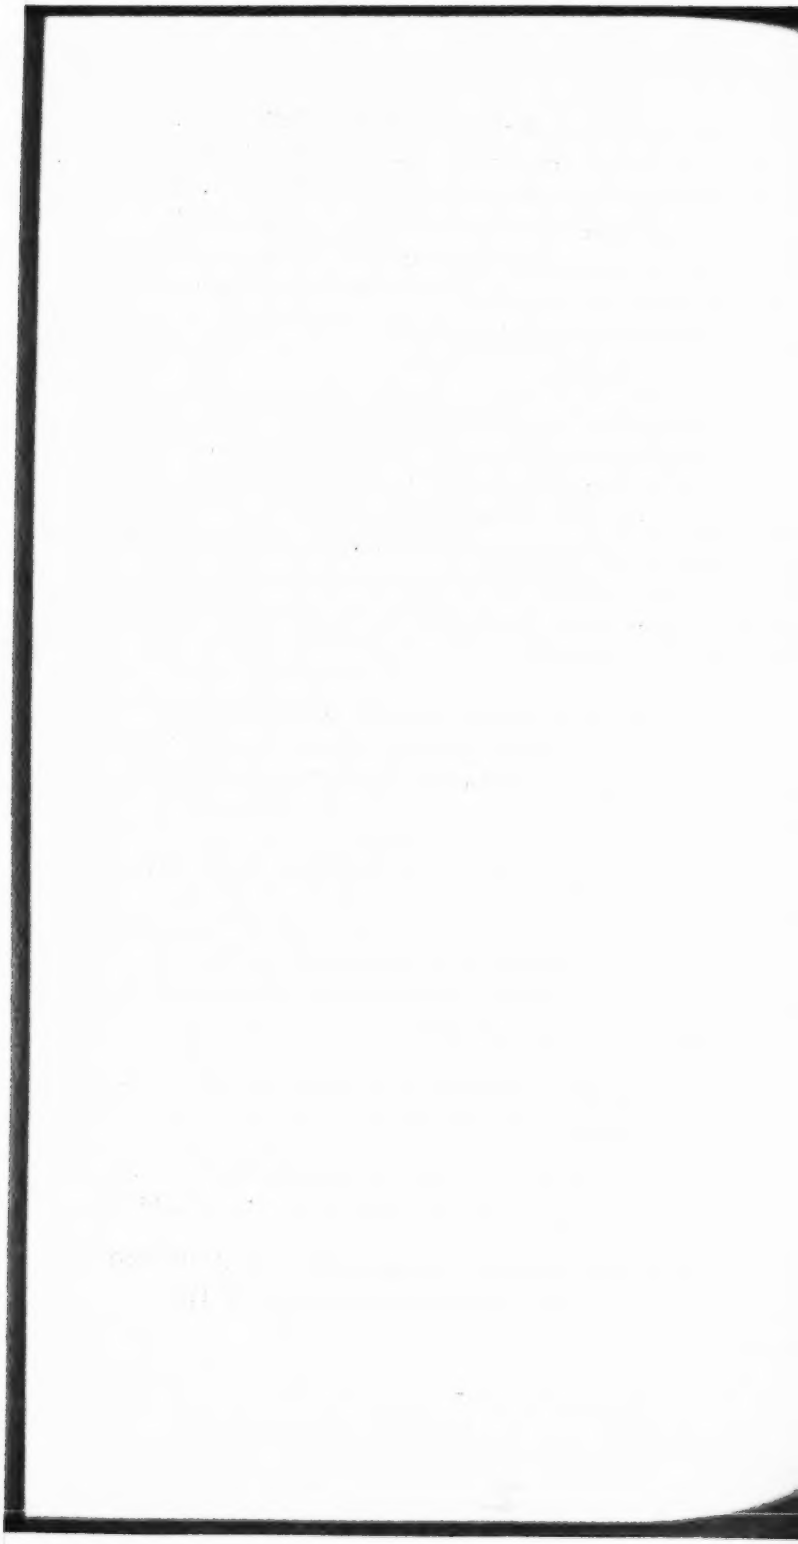
1) He believes his right to choose what is best for his family may only be limited under our Constitution by the restriction that, in so doing, he does not deny anyone else what is rightfully his.

2) He wants to show the Court that he would become subject to taxation without representation if the elected officials in his locality should lose the authority to spend school tax monies according to the desires of the electorate.

3) He believes that he has the God-ordered duty to make decisions calculated to enhance his children's health, safety and happiness. He believes coercive busing would be tantamount to forcing him to delegate this duty to others, who could not be held responsible for the deterioration or loss of these fundamental goals of human endeavor.

4) He wants to show the Court that coercive busing would alienate the general public from its interest and support of public education. This circumstance would certainly lower the quality of education in this area, and quite probably would reduce school budgets to such an extent, that for many children there would be no nearby school open for classes.

B. He wishes to present logical argument showing Supreme Court ordered busing would nullify these basic tenets of our Constitution and Declaration of Independence.



. That the people are to be ruled only with their consent.

. That all powers not delegated by the Constitution to the federal government are reserved to the states and to the people.

. That a basic function of government is to act to insure domestic tranquility.

. That a basic function of government is to act to secure the blessings of liberty to its citizens.

. That the federal government's actions are to be motivated by the expressed desires of its citizens.

. That laws should be enacted without regard to race, color or creed.

. That the fundamental purpose of our Constitutional system is for the government to be controlled by the people - never that it should exercise tyranny over the people.

1) He states that no body of local citizens would benefit or be served by coercive busing, because there is no evidence that large numbers of parents of school children have joined into efforts to request this of local governments.

2) He suggests that the impetus for coercive busing arises from two sources.

a) The disappointment among those groups who were instrumental in the outlawing of de jure segregation and in the enactment of public accommodation legislation that the new opportunities to integrate have not been seized upon by those who were restrained by law from doing so in the past.

b) That Supreme Court rulings calling for "unitary" school systems, without further definition, has given some legal standing for actions designed to force citizens to do that which it was assumed they themselves would freely choose to do, but which, for reasons of their own, it has now become apparent they do not wish to do.

3) He states that a ruling requiring coercive busing would say, in effect, that local laws permitting students to attend their nearest school, or to transfer to a better one, are un-constitutional because they permit people to do what they wish, rather than forcing them to do what their federal government says they <u>should</u> wish to do.

4) He states that a ruling requiring coercive busing would in effect be judicial legislation in direct conflict with recently enacted laws at both the state and federal levels. Such action undertaken against the expressed will of the people would represent an act of tyranny by government over the people.

5) He suggests that the Court should reject those reasons given by the advocates of coercive busing because they are based on a proposition which, if accepted by the Court, would suggest to the American Negro citizen that his own government sees him as inferior to other races.

This comes when you accept that it is a deprivation for Negroes to associate primarily with Negroes. The same cannot also be said in a straightforward manner about whites in an effort to lessen the stigma; because the achievement of Western Civilization refutes it.

The acceptance of such arguments will place a heavy burden upon the Negro in his climb toward self-esteem.

6) He suggests a ruling requiring coercive busing would reinstate the condition prior to the 1954 Brown decision, because it would require school boards to exclude a student from attending his nearby school because of his race.

How much worse for this to be done by the federal government against the will of the majority - than by the states acting in accord with the Tenth Amendment and with the consent of the governed!

He suggests that the Court is now in a
on to re-enunciate the principles upon
this country was founded. In so doing, it
elieve the great fear that ours may be the
eneration recorded in the history of the
d States which received freedom as its
ge, but failed to preserve it and pass it on
next.

It can do so by premising its ruling on
fundamentals of freedom.

1) Our Constitution was instituted for the
sed purpose of guaranteeing that citizens
be ruled only with their consent.

2) That to legislate against the desires of
itizens constitutes tyranny which Americans
be rightful to oppose.

3) That the pursuit of happiness is deeply
in the right of an individual to freely choose
d of neighborhood in which the fruits of his
ould allow him to live and send his children
ol.

4) To deny American citizens these free-
to lose the right to require their allegiance.

A ruling which would accomplish these ends
state that the Constitution does not require
busing of students to achieve racial
. It not only does not require it, but unless
cted people request it, the Constitutional
governing people only with their consent
prohibits any branch of the federal
ent from requiring coercive school busing.

These Premises considered, I, Newton Collier Estes pray that this brief be accepted by the Court, and that I be permitted to argue this brief before the Court.

Certiorari to the United States Court of Appeals
for the Fourth Circuit

AMICUS BRIEF OF THE SCHOOL BOARD OF MANATEE COUNTY, FLORIDA

NATURE OF INTEREST OF AMICUS CURIAE

This brief is filed in behalf of the School Board of the County of Manatee, a political subdivision of the State of Florida, and is sponsored by the attorney for the School Board of Manatee County, Florida, the authorized law officer thereof, under Rule 42 (4) of the Rules of the Supreme Court of the United States.

The interest of the School Board of Manatee County arises because the Fifth Circuit Court of Appeals in *Caroline Harvest, et al. The Board of Public Instruction, Manatee County, Florida, et al., vs. Jerome Pratt, et al.*, 5 Cir. 1970 ---F. 2d.--- [No. 29,425, June 26, 1970], affirmed an order of the District Court, Middle District of Florida, entered on January 29, 1970, which order directed the pairing and clustering of certain elementary schools in a manner which achieved an artificial racial balance in all elementary schools. The same order, in effect, necessarily required the bussing of students from their neighborhood school areas to another neighborhood school area where classes were to be held, a condition which did not previously exist prior to the entry of the aforementioned orders.

QUESTIONS PRESENTED

1. Does the Constitution require substantial racial balance in the system?
2. Does the United States Constitution authorize a court to order a plan which, of necessity, requires bussing for its implementation?

ARGUMENT

The Constitution requires wholly non-racial public school systems. This Court has never ruled that a unitary school system is one in which substantial racial balance as to student body composition is required. There appears to be a subliminal theme in desegregation cases decided by this Court indicating that race must not be considered. This starts in *Brown v. Board of Education* I, 347 U.S. 483, and runs through *Alexander v. Holmes County Board of Education*, 396 U.S. 19. This Court in

Alexander held that a unitary system is one within which "no person is to be effectively *excluded* from any school because of race or color." (emphasis added). There is no requirement that a person be included because of race or color, and, in fact, to so require would result in an exclusion from another school solely on the basis of race or color.

The necessity or non-necessity of racial balance is an important question of federal law which should be settled by this Court. It is a question in which there is a conflict among the decisions of the Courts of Appeal in the several circuits. The Sixth Circuit in *Deal v. Cincinnati Board of Education*, 369 F. 2d. 55, cert. denied 389 U.S. 847, 88 S. Ct. 39, 19 L.Ed. 2d. 114 held that there is no constitutional duty on the part of a Board to bus Negro or white children out of their neighborhoods or to transfer classes for the sole purpose of alleviating racial imbalance. The Fourth Circuit in *Swann v. Charlotte-Mecklenburg Board of Education*, 369 F. 2d. 29, holds that substantial racial balance is not necessary. Other cases in other circuits have made similar rulings. The Fifth Circuit is unsettled but in recent cases has become extremely color conscious and has demanded racial balance. See *United States v. Jefferson County Board of Education*, 372 F. 2d. 836, cert. denied *sub nom. Caddo Parish School Board v. United States*, 389 U.S. 840.

Another question which arises, assuming this Court determines that substantial racial balance is required within a unitary system is whether or not each school within a system must have both black students and white students within its student body composition. It is obvious that the lower Court in this case ruled that there must be blacks and whites in every school whenever possible. The various Circuits are in conflict over this question. This problem appears in the Fifth Circuit case of *Graves v. Walton County Board of Education*, 403 F. 2d. 184, wherein the Court holds that if there are still all-Negro schools, the plan fails, as a matter of law, to meet constitutional standards established in the *Green* case. This theorem is carried forward in the Eighth Circuit in *Jackson v. Marvell School District*, 416 F. 2d. 380. The Fourth Circuit in *Swann v. Charlotte-Mecklenburg Board of Education, supra*, holds that the presence of an all black school will not invalidate an

otherwise unitary system. The same conclusion is reached in the Sixth Circuit in the *Deal* cases and has also been reached in the Fifth Circuit in *Ellis v. Board of Public Instruction of Orange County*, 423 F. 2d. 203. The contradictory positions reached in the Fifth Circuit may be attributed to the fact that different panels sat in these cases.

Nothing in the Constitution of the United States permits, much less requires, the bussing of school children to achieve racial balancing. The direction (*Alexander v. Board of Education*, 396 U.S. 19) "to operate as unitary school systems within which no person is to be effectively excluded from any school because of race or color" forbids the result obtained below, which in fact excludes several hundred white children from the walk-in schools nearest their homes simply because admitting them there fails to achieve racial balancing within the entire system. Past discrimination in one direction does not justify present discrimination in another.

CONCLUSION

The issues are of concern throughout the country and the lack of answers and guidelines have caused confusion, endless litigation and inflamed emotions. The answers must be supplied and supplied now. Amicus urges the Court to set forth comprehensive guidelines and to hold that racial balance is not required for a unitary system; that neighborhood schools should be preserved and that education must be the primary concern in a unitary school system.

On Writ of Certiorari to the United States Court of Appeals for the Fourth Circuit

BRIEF AMICUS CURIAE

All parties having consented, William B. Spong, Jr., pro se, hereby respectfully files a Brief Amicus Curiae in this case.

The interest of William B. Spong, Jr., arises from the fact that he is a United States Senator from the State of Virginia, and decisions in this case may be determinative of cases pending in the lower federal courts involving the urban school systems of Virginia.

The School Board of the City of Norfolk, Virginia, filed a Petition for a Writ of Certiorari on June 26, 1970, in *School Bd. of City of Norfolk, Va., et al.* v. *Brewer, et al.*, No. 1753,

Oct. Term, 1969, seeking review of the judgment of the United States Court of Appeals for the Fourth Circuit entered on June 22, 1970. That Petition was denied on June 29, 1970, the last day of the October, 1969, Term, with Mr. Justice Black being of the opinion that Certiorari should be granted.

The aforesaid Petition is attached hereto and is adopted as the Brief Amicus Curiae.

Many of the issues in the Norfolk case are now before the Court in this case, and those issues are more clearly delineated in the Norfolk case than in any other case. The arguments presented in the Norfolk case are highly pertinent and of great importance to a decision in this and the related cases, and such arguments may not otherwise be presented to the Court in such manner that they may receive the consideration which is warranted.

Respectfully submitted,

WILLIAM B. SPONG, JR., *pro se*

PETITION FOR A WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE FOURTH CIRCUIT

The School Board of the City of Norfolk, Virginia, petitioner, respectfully prays that a writ of certiorari issue to review the judgment and opinion of the United States Court of Appeals for the Fourth Circuit entered in this proceeding on June 22, 1970.

OPINIONS BELOW

Although this proceeding has been pending for more than thirteen years, resulting in a substantial number of opinions

of the United States District Court for the Eastern District of Virginia and the United States Court of Appeals for the Fourth Circuit, the opinions of the courts below directly preceding this petition are as follows:

1. The opinions of the Court of Appeals filed June 22, 1970, not yet reported, are as follows:

(a) Opinion for the Court by Judge Butzner (Appendix hereto p. 1).[1]

(b) Opinion of Judge Bryan specially concurring (App. 13).

2. Memorandum Opinion of the United States District Court for the Eastern District of Virginia, quoted at 308 F. Supp. 1274 (App. 16).

3. Memorandum Opinion of the United States District Court for the Eastern District of Virginia, reported at 302 F. Supp. 18 (App. 58).

JURISDICTION

The judgments of the Court of Appeals were entered on June 22, 1970 (App. 15A and 15B). The jurisdiction of this Court is invoked under 28 U.S.C. § 1254(1).

QUESTIONS PRESENTED

1. In a school system in which there is no current racial residential discrimination, but in which the application of neutral and objective standards to the assignment of pupils would result in a number of all Negro and all white schools because of racial residential patterns,

---

[1] The appendix (App.) of opinions below is presented in a separate volume because it is voluminous.

(a) is it constitutionally permissible for the School Board [in determining the extent of the affirmative action to be taken to achieve integration] to take into account the fact that once the ratio of Negro pupils to whites passes beyond a critical point the benefits from integration are completely lost;

(b) is the constitutionality of a plan for desegregation principally determined by the degree of success in obtaining the racial mix of pupils or by the degree of success in providing equality of educational opportunity for all pupils where both purposes cannot be simultaneously achieved;

(c) does good faith implementation of governing constitutional principles require racial balancing in each individual school throughout the system, comprised of many different schools, where it is freely conceded that massive compulsory busing will be required?

CONSTITUTIONAL PROVISIONS INVOLVED

This case involves the equal protection clause of the Fourteenth Amendment to the Constitution of the United States.

STATEMENT

1. Introduction

The Petitioners are seeking a review of an *en banc* decision of the United States Court of Appeals for the Fourth Circuit, reversing and remanding an Order of Walter E. Hoffman, Chief Judge of the Eastern District of Virginia, which had approved, in most aspects, the long range plan for the integration of the Norfolk school system.

2. Proceedings Below

Judge Hoffman's opinions followed hearings extending over many days during which he received evidence and made meticulous findings with respect to the housing patterns and demography of Norfolk and adjacent communities, the educational principles of the School Board plan, the financial and transportation resources of the school system, and the feasibility of alternative proposals advanced by the respondents. He found no racial discrimination by the School Board and that the School Board had affirmatively sought to obtain the maximum degree of equal educational opportunity within the capacity of the system.

The Court of Appeals, without holding that the District Court's findings were clearly erroneous, set aside the judgment of the trial court and directed that a new plan be filed by July 27, 1970, and implemented by September, 1970. Although the Court of Appeals did not expressly order the racial balance of the schools, that appears to be the effect of its holding, and such a result is beyond the capacity of the Norfolk school system.

This petition is filed four days after the entry of judgment. Precedent of other similar cases does not indicate that any stay is to be expected. Irreparable disruption caused by a "best efforts" implementation of the order of the Court of Appeals will be so erosive of the school system as to place in jeopardy the implementation of the School Board Plan in the event the District Court Order is reinstated.

3. Demography of Norfolk

The Norfolk system is generally typical of southern school systems of its size. It consists of 56,000 students in 72 schools, with a 6-3-3 pattern including 56 elementary, 11 junior high and 5 senior high schools. At the elementary level, 44%

of the students are Negro. Over all, the system contains 42.4% Negro students.

The City of Norfolk has a population of approximately 300,000 and is 61 square miles in area. 80% of the Negro population of Norfolk is concentrated in a large densely populated area in the south central sector of the City.

The School Board has no bus system for the transportation of pupils to and from the schools. Approximately 8,000 students, only a few of whom are at the elementary level, now use public transportation at their own expense.

The District Court found that evidence introduced fell short of establishing discriminatory racial residential patterns about the City and that "unless a spot of the disease poisoned the entire city, there remained other areas in Norfolk which could not be considered *de jure* constituted." 308 F. Supp. at 1303; 302 F. Supp. at 27. Whether or not any area of the City has a racial residential pattern which originated in discriminatory action, there is no significant governmental or private discriminatory action restraining free residential patterns at this time. 308 F. Supp. at 1307.

4. Background of Long Range Plan

To assist its own Director of Educational Research and Planning, Dr. John C. McLaulin, the School Board obtained the services of Dr. James Bash, Director of the University of Virginia Desegregation Institute, operated under funding by the Department of HEW, and Mr. Howard O. Sullins and Mr. Albert Tippett, representatives of the Department of HEW. There came to the attention of the Board a substantial body of learning, recently developed and based upon the analysis and definition of the relationship between integration and educational opportunity. Among the literature primarily influencing the development of the plan by the Board were the following:

1. *James S. Coleman, "Equality of Educational Opportunity,"* (1966), based upon a broad and exhaustive survey carried out pursuant to the Civil Rights Act of 1964 by the United States Office of Education and generally known as the COLEMAN REPORT. (SBX, April No. 1);

2. *Racial Isolation in the Public Schools Vol. 1,* prepared by the United States Commission on Civil Rights pursuant to request of the President and generally known as RACIAL ISOLATION. (SBX, April No. 2);

3. *Equal Educational Opportunity,* 38 Harvard Education Review, (Winter 1968), (SBX, April No. 4);

4. *Weinberg, Desegregation Research: An Appraisal* (SBX, April No. 3);

5. *Armor, School and Family Effects on Black and White Achievement: A Re-examination of the USOE Data,* (SBX, Oct. No. 24);

6. *Pettigrew, Advantages for the Disadvantaged in Equality of Educational Opportunity in the Large Cities of America: The Relationship between Decentralization and Racial Integration.* (Govt. Ex., Oct. No. 8);

7. *Wilson, Educational Consequences of Segregation in a California Community,* RACIAL ISOLATION Vol II, p. 165. (SBX, April No. 2).

The Board became convinced that, aside from the requirements of law, integration provides the conditions for an improved educational program for the City as a whole. Norfolk's was the first system to formulate principles for a plan based on the best available social science data.

The basic principles adopted by the Board can be summarized as follows:

(a) Children of all backgrounds and races do better in schools with a predominant middle class millieu. The entire argument for the efficacy of desegregation in providing equal educational opportunity ultimately depends upon this simple truth and upon it also rests the ultimate success of any long range plan for integration.

Aside from the family background of the individual student, a factor which is beyond the control of the School Board, the social class[2] climate of the school is the single most important school factor affecting student performance and attitudes. (RACIAL ISOLATION, Vol. 1, p. 89). The social class climate factor is so powerful that it may be more important than all other factors combined.

(b) There is a high correlation between socio-economic class and race. While more than 60% of white America is middle class, only one Negro in four is middle class (whether defined by income, white collar occupation, or high school education). A comparable correlation exists in Norfolk. The significance of the correlation is that desegregation is required to provide a predominantly middle class milieu for Negro pupils.

(c) The beneficial effects of desegregated schools for Negro children are not linear; that is, Negro test scores do not rise evenly with increasing percentages of white children in the classroom. Achievement in classes with less-than-half whites is associated with scores not significantly different from those in all-Negro classrooms. The research shows that significant improvement does not begin until the school is at least half-white, and that a simple majority is not suffi-

[2] The term "socio-economic class" more accurately expresses the meaning, but "social class" has been commonly employed with the same connotation in most instances.

cient to obtain the desired benefits of desegregation. Instead there must be a clear, but not overwhelming, white majority. Dr. Armor's analysis of the COLEMAN REPORT data showed that the optimal point, taking into account both the social class and race effects is about 30% Negro.

(d) White students do less well in majority Negro schools than they do in majority white schools. The conclusion is a necessary corollary to the principle that children of all backgrounds do better in schools with a predominant middle class milieu.

(e) A plan for the City of Norfolk will work best to the extent that it arrives at 30% Negro in as many schools as possible and, for this reason, that percent Negro is considered optimal. The purposeful establishment of schools in which there are more than 40% Negro will not provide any improvement of educational opportunities in such schools for either white or Negro. In determining the effects of optimal desegregation, the inquiry is not limited to educational achievement. Rather, the concept of optimal desegregation is equally concerned with racial attitudes, racial behavior, racial preferences, and college and occupational aspirations.

5. Development of Long Range Plan

The principles of the plan were applied to the circumstances of the Norfolk school system with the clear purpose of providing the maximum degree of integration which is feasible.

The development of the plan for elementary schools began with a geographical attendance area plan based on neutral and objective lines, with each student attending the school within the natural capacity zone in which his residence fell. The socio-economic data of each such zone was then carefully analyzed. With the use of this base data, the designers of the zones set about to achieve zones which were hetero-

geneous in terms of socio-economic class and race, rather than homogeneous. Neither natural boundary lines nor community of interest of a given area was allowed to interfere with this purpose. Natural boundaries were departed from and neighborhoods were intentionally divided among different schools. Every plan or device suggested in any writing or by any consultant or by the NAACP or the Civil Rights Division was given mature consideration, and a number of such suggestions were incorporated. None of them was rejected if it was found to be currently feasible for the purpose of providing more integration than the plan which was adopted. A number of subsidiary concepts, such as the consolidation of schools, the closing of schools, and the changing of the location of schools, was adopted.

All of the experts testifying complimented the School Board on the job that was done. The degree of success was favorably compared with that which could be obtained by a computer. No one was able to point out a single instance in which lines were drawn to avoid desegregation. Because of racial residential patterns, it would not be possible, without massive cross busing, to create a much greater percentage of desegregation in the system. On the basis of that the educational opportunity offered to Negroes in majority Negro schools would be no better and perhaps not as good as that offered in an all Negro school and that the opportunity offered to white students would be substantially less than that which would be offered to them in a majority white school, majority Negro elementary schools were not created. The intentional creation of a majority Negro school would provide a net loss to the community rather than a net gain in terms of the feasible achievement of the benefits of integration.

No one is able to suggest any device which will effectively increase the results obtained by 20%, 10% or even 5%. The only alternative to the School Board plan recommended is

the complete racial balance of every school in the system through massive cross busing. The School Board cannot overcome the physical obstacles to massive cross busing by the 1970-71 school year.

REASONS FOR GRANTING THE WRIT

1. Introduction

Brown v. *Board of Education,* 347 U.S. 483 (1954), takes its place among the more important decisions of this Court because it determined that there was a relation between segregation of public Schools and equal educational opportunity. The record in this case for the first time presents a clear and exhaustive analysis and definition of the nature of that relationship.

Brown I established the constitutional *right* of minorities to desegregated schooling and expressly based its determination upon the right to equal educational opportunity.

Brown v. *Board of Education,* 349 U.S. 294 (1955), and all of the subsequent cases decided by this Court essentially deal with the *remedy* which the Court felt to be realistically available at the time of the decision. The relief granted by the Court in *Brown II* constituted a negative mandate, requiring the school boards to admit students to public schools "as soon as practicable" on a non-discriminatory basis, "with all deliberate speed." 349 U.S. at 300, 301. In more recent cases, culminating in *Alexander* v. *Board of Education,* 396 U.S. 19 (1969), this Court has removed the conditions of "as soon as practicable" and "with all deliberate speed" from the negative mandate. Further, this Court has asserted the affirmative duty of school boards to adopt the most "feasible" and "reasonably available" alternatives to affirmatively effectuate integration. *Green* v. *County School Board,* 391 U.S. 430 (1968); *Raney* v. *Board of Education,*

391 U.S. 443 (1968); and *Monroe* v. *Board of Commissioners,* 391 U.S. 450 (1968). In view of the fact that circumstances in such cases all pointed in the same direction, this Court has not yet defined the nature and extent of the remedy provided by such affirmative mandate. It is submitted that, in arriving at that definition, it should be kept in mind that the constitutional right to be provided is equal educational opportunity and that mixing races is but a means to that end.

The conclusions of educational and social science with respect to the nature and extent of the relation between integration and education have in recent years been widely disseminated and, by and large, accepted. The Commission on Civil Rights quoted that "On the basis of its findings, the Commission has made recommendations which provide a basis for action by government at all levels; * * *." *Racial Isolation in the Public Schools Vol. I,* p. ix.

On March 24, 1970, Richard Nixon, President of the United States, issued a policy statement entitled SCHOOL DESEGREGATION: "A Free and Open Society." (116 Cong. Rec. S4351, Daily Ed., March 24, 1970). In that statement he said:

> "Available data on the educational effects of integration are neither definitive nor comprehensive. But such data as we have suggest strongly that, under the appropriate conditions, racial integration in the classroom can be a significant factor in improving the quality of education for the disadvantaged. At the same time, the data lead us into several more of the complexities that surround the desegregation issue.
>
> "For one thing, they serve as a reminder that, from an educational standpoint, to approach school questions solely in terms of race is to go astray. The data tell us that in educational terms, the significant factor is not race but rather the educational environment in the

home—and indeed, that the single most important educational factor in a school is the kind of home environment its pupils come from. As a general rule, children from families whose home environment encourages learning—whatever their race—are higher achievers; those from homes offering little encouragement are lower achievers.

"Which effect the home environment has depends on such things as whether books and magazines are available, whether the family subscribes to a newspaper, the educational level of the parents, and their attitude toward the child's education.

"The data strongly suggest, also, that in order for the positive benefits of integration to be achieved, the school must have a majority of children from environments that encourage learning—recognizing, again, that the key factor is not race but the kind of home the child comes from. The greater concentration of pupils whose homes encourage learning—of whatever race—the higher the achievement levels not only of those pupils, but also of others in the same school. Students learn from students. The reverse is also true: the greater concentration of pupils from homes that discourage learning, the lower the achievement levels of all.

"We should bear very carefully in mind, therefore, the distinction between educational difficulty as a result of race, and educational difficulty as a result of social or economic levels, of family background, of cultural patterns, or simply of bad schools. Providing better education for the disadvantaged requires a more sophisticated approach than mere racial mathematics."

The quoted statement of policy of the United States is quite remarkably consonant with the policies promulgated by the School Board in its long range plan in June, 1969, and approved by the District Court on December 30, 1969, and here presented to this Court for consideration.

It is clearly established that the quality of educational opportunity offered to pupils of both races in schools which have a majority Negro is no better, if as good, than that offered to pupils of all Negro schools. It is difficult to find any situation in which integration has been successful in terms of educational opportunity or stability where white pupils have not been in a substantial majority. A determination of whether or not the Norfolk School Board and other school boards similarly situated are entitled to take this phenomenon of social science into account in determining the extent of affirmative action to be taken to achieve integration appears to be essential to the development of public education of this country at this time. Is a rule such as the one man —one vote rule of the apportionment cases appropriate to the education cases? If it is not educationally desirable or even relevant that the racial composition of a school be a mirror image of the racial composition of the community, should such a goal be sought by any plan? These are among the basic practical problems to be resolved which are appropriately presented by this case.

2. The Opinion of the Court of Appeals

The opinions of the Chief Judge of the District Court deal in depth with the educational principles and the phenomena of social science with respect to integration and with the demography and financial, transportation and other resources of the school system. It was found that the School Board had affirmatively sought to obtain the maximum degree of educational opportunity within the capacity of the system.

The opinion of the Court of Appeals appears to be based primarily if not entirely upon the degree of success in obtaining a racial mix in schools. The word "education" is not mentioned on a single occasion in the majority opinion.

The Court of Appeals failed to deal with the important questions set forth in this petition. Conclusions are arrived at in its opinion which are contrary to the findings of fact of the District Court without any acknowledgment thereof. The capacity and resources of the Norfolk school system are not delineated or discussed by the Court of Appeals, but the judgment would appear to call for action by the School Board beyond the capacity and resources found to exist by the District Court.

CONCLUSION

The reasons for the degree of success or failure of existing integration plans in attaining educational goals can be properly understood only by examination in light of the social phenomena explicated in this proceeding. Such success or failure of proposed plans can be accurately predicted by application of these principles of social science. The extent to which such principles may or must be taken into account under constitutional mandates has not been considered or determined by this Court. It is vital that such determination be made at this time.

The importance of the issues raised in this proceeding to the Norfolk school system are obvious. Although the circumstances and predicaments of each school system with respect to desegregation are to some extent peculiar to it, Norfolk fits a not uncommon pattern. The issues are also important to many other such similar school systems. The cases pending on petitions for writs of certiorari from the cities of Charlotte, North Carolina, and Little Rock, Arkansas, together with the issues presented here appear to cover the spectrum of the most pressing problems requiring decisions by the lower courts, local governments, educators and minorities.

For the foregoing reasons, it is respectfully submitted that the petition for a writ of certiorari should be granted to review the judgment of the United States Court of Appeals for the Fourth Circuit.

ON APPEAL FROM THE UNITED STATES COURT OF APPEALS FOR THE FOURTH CIRCUIT

CONSENT TO FILE BRIEF AMICUS CURIAE

With consent of all counsel "CONCERNED CITIZENS ASSOCIATION, INC.", a non-profit Georgia corporation; its officers, Board of Directors and members respectfully file a brief *amicus curiae* in support of the respondents.

The written consent of counsel for the respondents and for petitioners to file a brief *amicus curiae* in behalf of the respondents is filed herewith.

STATUS OF AMICUS CURIAE

"CONCERNED CITIZENS ASSOCIATION, INC.", is a non-profit corporation organized and existing under the laws of the State of Georgia. It is a voluntary organization comprised primarily of laymen who are concerned with education in the public school system of the city of Savannah and the county of Chatham. To this end the organization is committed to preserving the effectiveness of the public schools by reducing discord and turmoil through the admission of pupils into neighborhood schools. As a coroliary to this principle, it opposes the transportation of pupils past neighborhood schools to remote areas for the purpose of achieving racial balance.

ARGUMENT

"As soon as possible, however, we ought to resolve some of the basic practical problems . . . including whether as a constitutional matter, *any particular racial balance must be achieved in the schools; to what extent school districts and zones may or must be altered as a constitutional matter; to what extent transportation may or must be provided to achieve the ends sought by prior holdings of this Court.*" (Emphasis added)

So admonished Mr. Chief Justice Burger in *Northcross* v. *Board of Education of Memphis*, 25 L. Ed. 2d 246 (1970). In doing so he voiced the unknown about the unitary rule established in *Alexander* v. *Holmes County Board of Education*, 396 U. S. 19 (1969).

The orders in this case by the lower courts challenge this Court to remove the gnawing doubt which pervades the minds of the public school administrators.

Is a person effectively excluded from a school because a school by location is remote from that person's

neighborhood? Does geography create a normal limitation upon access to a school because of the pragmatic problems of transportation? Reason dictated by practicality negates the former question but affirms the latter question.

A concomitant is the neighborhood school concept. Its proximity to home, its community of friends, and its identity with the neighborhood have created a milieu conducive to the best educational environment. Oblivious to this are those who urge this Court to callously cast aside this acknowledged cornerstone of the elementary school system. With characteristic disregard, they assert, "integration is education". It is not and never shall be.

Education begins at school but finds its stimulus at home where homework is done under the application of the pupil and the supervision of the parent. The home environment is what assures the highest academic achievement of the pupil.

"Freedom of choice" has been assailed as constitutionally objectionable. In support of this attack are listed: intimidation, harassment, fear, distance, and inconvenience. These very objections can be listed against pairing and bussing—particularly harassment, distance and inconvenience. As a result many pupils arrive at school demoralized and agitated. This emotional condition is their school day companion.

This Court is now confronted with the monumental question: What is the paramount duty that this Nation through its school systems owes to the "citizen-parent" and the "student-child"? Is it racial balance at whatever the immediate and future costs, or is it the best education that can be provided in an environment conducive to the highest educational achievement? It is the conviction of the *amicus curiae* that the latter question must predominate

over the former if public education is to survive and the security of our Nation preserved.

The *amicus curiae* does not advocate turning back the clock. However, it does ask this Court to apply the rule of reason enunciated by the Circuit Court of Appeals but subsequently ignored in its affirmation of the ruling of the District Court. The *amicus curiae* suggests that the following propositions, which were held by the Circuit Court of Appeals, be utilized in support of the respondents. They are: first, that not every school in a unitary school system need be integrated; second, nevertheless, school boards must use all reasonable means to integrate the schools in their jurisdiction; and third, if black residential areas are so large that not all schools can be integrated by using reasonable means, school boards must take further steps to assure that pupils are not excluded from integrated programs on the basis of race.

The *amicus curiae* concurs in the in part dissent of Judge Bryan of the Circuit Court of Appeals. He properly concluded that the command of that Court to provide the bussing of pupils to achieve integration was a misnomer as it achieved racial balance. The Congress has expressed its disapproval of the principle of achieving racial balance by bussing. It categorically denounced this procedure with the enactment of the 1964 Civil Rights Act, 42 U. S. Code Section 2000 c-6(a) (2). The majority's dismissal of the impact of that statute as not applicable to schools with a *de jure* history of segregation collides with the clear intent of the Congress. Support for the passage of the act was not sectional but national. It was legislation which reflected the attitudes of the majority of the people of this Country. The Courts should not restrict what the people have willed through their elected representatives.

To apply the anti-bussing statute only in those states where *de facto* segregation exists is judicial hypocrisy. The thesis of dualism which this Court condemns in the southern school systems, and which this Court has declared must be dismantled, would receive this Court's imprimatur if it should find that the anti-bussing statute has exclusive application to those states which practice *de facto* segregation. This Court should emphatically reject the double standard embraced by the Circuit Court of Appeals in its refusal to apply the anti-bussing provision of the Civil Rights Act of 1964.

The *amicus curiae* anticipate that the petitioners in support of bussing will argue that the bussing of pupils in the public school system is common as apple pie and will emphasize that the present objection should be dismissed because it was the vehicle for the maintenance of the dual system. If the proscription of the Fourteenth Amendment condemns bussing to evade integration, the proscription should condemn with equal finality the bussing of students to achieve integration. One is just as discriminatory as the other; particularly, where as in this case, bussing is used to achieve a predetermined racial balance. Racial balance is not required by the Fourteenth Amendment or by any directive of this Court.

CONCLUSION

In *Green* v. *School Board of New Kent County*, 391 U. S. 430, 20 L. Ed. 2d 716, 724, Mr. Justice Brennan established this test:

> "Where the Court finds the board to be acting in good faith and the proposed plan to have real prospects for dismantling the state-imposed dual system 'at the earliest practicable date,' then the plan may be said to provide effective relief."

Does the plan of the respondent, school board, meet this test? It does. For example, school districts were gerrymandered to comply with the unitary rule. Staff, transportation, programs and other aspects of the school system have been integrated to dismantle the dual system. The respondents have met the test of good faith and have provided effective relief.

For these reasons, the Circuit Court of Appeals erred in rejecting the respondents' plan.

Respectfully submitted,

AMICUS CURIAE BRIEF OF WINSTON-SALEM/FORSYTH COUNTY BOARD OF EDUCATION, IN SUPPORT OF THE RESPONDENTS

I.

PRELIMINARY STATEMENT — AUTHORITY TO FILE

The Winston-Salem/Forsyth County Board of Education submits this brief, amicus curiae, in the hope that it may be of constructive assistance to the Court in its deliberations on this extremely important case.

All parties have consented to the filing of this brief. A copy of each consent, given by counsel for Petitioners and counsel for Respondents, respectively, is being filed with the Clerk simultaneously with the filing of this brief.

II.

POSTURE OF THE AMICUS CURIAE

The Amicus Curiae filing this brief, Winston-Salem/Forsyth County Board of Education, is defendant in a desegregation suit currently on appeal, by both parties, to the Court of Appeals for the Fourth Circuit.

Forsyth County is roughly rectangular in shape, its longest East-West dimension being about 26 miles and its longest North-South dimension about 20 miles. It comprises 424 square miles. The estimated current population of the County, according to the preliminary 1970 census figures, is 215,594, of whom approximately 22.5% are non-white. Winston-Salem, the principal city in Forsyth County, comprises 57.5 square miles and has an estimated current population, according to the preliminary 1970 census figures, of 133,820. Most of the black population of the County resides in the northern, eastern, and to some extent, southern portions of the City of Winston-Salem. Less than 10% of the County's population, outside of the City of Winston-Salem, is non-white.

The Winston-Salem/Forsyth County School System is a consolidated system, containing, in 1969, sixty-seven (67) schools and fifty thousand four hundred fifty-five (50,455) students. Of these students, thirty-six thousand five hundred twenty-one (36,521) are white, thirteen thousand eight hundred seventy-nine (13,879) are black. Like Charlotte-Mecklenburg and other consolidated city-county school systems throughout the North and South, Negro residences in Winston-Salem and Forsyth County are concentrated in certain urban areas. Unlike Charlotte-Mecklenburg, however, the Court in the Winston-Salem case (Scott v. Winston-Salem/Forsyth County Board of Education, No. 174-WS-68, M.D.N.C., June 25, 1970) found that:

> "The reasonable conclusion to be drawn from the evidence is that even though in times there has been some discrimination in the sale and rental of property, the concentration of the Negro population in the northeastern quadrant of the City has been caused by economic factors and the desire of blacks to live in the areas where they do live rather than in white or predominantly white areas. This conclusion is confirmed by the fact that in resettling displaced blacks as a result of public housing projects that without exception the blacks asked to be resettled in the same area where they lived, that is, in black or predominantly black areas even though other areas were open. The concentration of blacks cannot be fairly attributed

to public and private discrimination, and it is concluded that the housing patterns are not the result of such discrimination. In any event, where de jure segregation has been eliminated and de facto segregation remains, there surely must come a time when the stigma of de jure segregation is removed, certainly so in this situation, particularly in those areas once populated by whites and now all-black or predominantly black."

The District Court upheld the assignment plan of the Winston-Salem/Forsyth Board except in the case of three all-black schools which were ultimately ordered to be clustered with five predominantly white schools. The plaintiffs appealed from the failure of the District Court to order the integration of all the schools in the system and the defendant School Board appealed from the order requiring the clustering of the eight schools.

It is quite apparent that the District Court found no discrimination in the operation of the Winston-Salem/Forsyth County School System and would not have ordered the clustering of the eight schools above referred to (which required the busing of approximately 2,000 pupils and was for the purpose of achieving a racial balance in those schools) had it not been for the compulsion imposed upon the Court by appellate decisions, particularly the decision in Charlotte-Mecklenburg. In Judge Gordon's order of August 17, 1970, he stated:

> "If this Court were writing on the proverbial 'clean slate', the clustering of the eight schools would not have been ordered initially, as it is believed that freedom to go to any school you wish is the ultimate in freedom. However, trial courts have a solemn obligation to follow appellate court decisions, and a fair reading of these decisions demands what has been ordered by this Court. If this Court is in error, it can and will soon be corrected on appeal."

III.

BRIEF STATEMENT OF ARGUMENTS SUPPORTED BY THIS AMICUS CURIAE, WHICH ARE, IN GENERAL, COVERED IN GREATER DETAIL IN OTHER BRIEFS FILED WITH THE COURT.

1. Decisions decreeing that there can no longer be any "white" schools or any "black" schools — but that there shall be "just schools", which are not racially identifiable as "black" or "white", *must* be construed to mean that schools shall be operated for all pupils within normal geographic areas which may be served by them — and that no person shall be deliberately or effectively excluded on account of race. If they purport to mean anything else, they are meaningless; first, because the great majority of Americans are white, and, second, because it would be impossible to require all schools or even a sizable percentage of all schools throughout the United States to include among their pupils 20%, or 15%, or 10%, or 5%, or even 1% black persons — unless this nation is prepared to control everyone's place of residence. So long as the black population in the District of Columbia remains at its present level, anyone visiting those schools will find most, if not all, of them to be "black" schools insofar as the racially identifiable appearance of the pupils is concerned, but this does not make them "black" schools in a legal sense. This does not mean that the District of Columbia is failing to operate a unitary system. Conversely, so long as the white population of Ashe County, North Carolina (or any one of thousands of other counties throughout the United States) remains at its present level, anyone visiting the schools of that county will find them to be "white" schools insofar as the racially identifiable appearance of the pupils is concerned. Again, this does not make them "white" schools in a legal sense; nor does it mean that they are failing to operate a unitary school system. The same is true, in varying degrees, according to the racial makeup of each community, throughout the nation.

2. The same law should apply North, South, East and West. Any distinction between "de jure" and "de facto" is not justifi-

ble for two reasons: First, because racial residential patterns in reas (and particularly in urban areas) populated by both lacks and whites are substantially the same everywhere, regardless of whether their origin was "de facto" or "de jure"; nd, second, because there is no longer any such thing as "de ure" segregation in a true legal sense. The laws which permitted it have been held unconstitutional, and anyone who considers himself to be a victim of racial discrimination in housing has a remedy at law.

3. The argument that if it was all right to bus blacks extreme distances, past white schools, to attend black schools, it is now all right to do the same in reverse to force a racial balance — is neither legally nor morally sound. It was wrong to do the former, and it is proper to right the wrong by saying that no child shall be discriminated against or required to attend any particular school because of race. But two wrongs do not make a right. To require pupils to travel extreme distances past nearby schools simply because of race for the sole purpose of forcing a prescribed racial balance is committing the same wrong decried in *Brown*. The only difference is that in the first instance it was to force a separation of the races, whereas in the latter instance it is to force a mixing of the races. The basic wrong in both instances is that persons are being *forced* to do an extreme, artificial act to accomplish a racially motivated objective.

4. The argument that since some pupils must be bused to school, others should not object to the same treatment is spurious. It is one thing to provide transportation for a pupil who lives one and one-half or more miles from the nearest school; it is quite another to force a pupil who lives within easy walking distance of the nearest school to attend a school located one and one-half or more miles from his home.

5. Where a child lives close enough to school to walk the distance in five or ten minutes, is it right to force him to spend an additional thirty minutes to an hour every morning and every afternoon, five days a week, nine months a year, traveling by bus to a distant school for the sole purpose of achieving a particular racial balance in that school? Childhood hours and

days are precious and few as it is — and certainly the Constitution should not be so construed as to force, unnecessarily, the loss of time for sleep, work or recreation. Sociological advantages to be gained from racial mixing in the public schools beyond that which results naturally from residential patterns should be a matter of choice — not legal compulsion.

6. How can it be right for the Constitution to be so construed as to result in the forcing of a black pupil whose family lives in a predominantly white residential neighborhood, near a public school, to be transported past that school to a much more distant school in a predominantly black neighborhood? This is one of the results that can and does occur with pairing or clustering and other artificial devices to achieve racial balance.

7. Both the Executive and Legislative branches of our Government (through the President's March 27, 1970, statement, and the Civil Rights Act of 1964 [78 Stat. 246, 248, 42 U.S.C. 2000c(b), 2000c-6(a)(2)] have supported the doctrine of *Brown*, without concluding that that doctrine requires an abandonment of the neighborhood concept. The President expressly disapproved "transportation of pupils beyond normal geographical school zones for the purpose of achieving racial balance". The Congress expressly provided that "desegregation shall not mean the assignment of students to public schools in order to overcome racial imbalance" and, further, that "nothing herein shall empower any official or court of the United States to issue any order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another or one school district to another in order to achieve such racial balance."

IV.

FUNDAMENTAL POSITION OF AMICUS CURIAE

The fundamental position of the Winston-Salem/Forsyth County Board of Education in this brief is that the equal protection clause of the Fourteenth Amendment requires that no state shall "deny to any person within its jurisdiction the equal protection of the laws", that this clause, when applied to pupil

assignment in public education, requires — and requires only — that pupils be assigned to public schools on a nondiscriminatory, non-racial basis, to the end that no person shall be effectively excluded from any school because of race or color.

Anything more than this; anything less than this; anything different from this — is contrary to the fundamental law of our land.

V.

FUNDAMENTAL PRINCIPLE OF BROWN — TRANSITION — FUTURE

The pertinent portion of the Fourteenth Amendment reads:

> "No state shall . . . deny to any person within its jurisdiction the equal protection of the laws."

The fundamental question decided by the Court in *Brown I* was stated and answered by the Court as follows:

> "We come to the question presented: Does segregation of children in public schools *solely on the basis of race*, even though the physical facilities and other 'tangible' factors may be equal, deprive the children of the minority group of equal educational opportunities? We believe that it does." (Emphasis added). *Brown* v. *Board of Educ.*, 347 U. S. 483, 493, 75 S. Ct. 753, 98 L. Ed. 873 (1954).

Having made that decision the Court called for further briefs and arguments to assist the Court in determining whether the Court should enter a decree

> "(a) . . . providing that, *within limits set by normal geographical school districting*, Negro children should forthwith be admitted to *schools of their choice*, or
>
> "(b) may this Court, in the exercise of its equity powers, permit an effective gradual adjustment to be brought about from existing segregated systems to a system *not based on color distinctions?*" (Emphasis added). 347 U. S. at 495 n. 13.

Clearly, from both of the above quotations, the Court interpreted the equal protection clause as it related to pupil assignment in public education, to require the elimination of segrega-

tion by law solely on the basis of race and to require conversion "to a system not based on color distinctions." The Court quite clearly felt that the admission of Negro children "to schools of their choice" . . . "within the limits set by normal geographic school districting" would constitute compliance with the new doctrine enunciated by the Court.

In *Brown II* the Court recognized the tremendous practical problems which would be encountered in effectuating the transition required under *Brown I*, and, applying equitable principles, directed that the transition be accomplished "with all deliberate speed." In *Brown II* the Court again made it clear that the doctrine of *Brown I* was *nondiscrimination:*

> "These cases were decided on May 17, 1954. The opinions of that date *declaring the fundamental principle that racial discrimination in public education is unconstitutional*, are incorporated herein by reference." (Emphasis added). *Brown v. Board of Educ.*, 349 U. S. 294, at 298, 74 S. Ct. 686, 99 L. Ed. 1083 (1955).
>
> "At stake is the personal interest of the plaintiffs in admission to public schools as soon as practicable *on a nondiscriminatory basis.*" 349 U. S. at 300.
>
> ". . . the courts may consider problems related to administration, arising from the physical condition of the school plant, the school transportation system, personnel, *revision of school districts and attendance areas into compact units to achieve a system of determining admission to public schools on a nonracial basis*, . . . They will also consider the adequacy of any plans the defendants may propose to meet these problems *and to effectuate a transition to a racially nondiscriminatory school system* . . . .
>
> ". . . and the cases are remanded to the District Courts to take such proceedings and enter such orders and decrees *consistent with this opinion* as are necessary and proper *to admit to public schools on a racially nondiscriminatory basis* with all deliberate speed the parties to these cases. (Emphasis added) 349 U. S. at 300-01.

Nowhere in either of these landmark decisions did the Court once suggest or even intimate that under the newly enunciated

doctrine of *Brown I* the Constitution required the achievement of any particular racial ratio in the schools or that boards of education might be required to force a balance if it did not result naturally. The terms the Court did use were terms such as "nondiscriminatory", "nonracial", "revision of . . . attendance areas into compact units", "racially nondiscriminatory", "a system not based on color distinctions", and admission of Negro children "to schools of their choice" . . . "within limits set by normal geographic school districting".

At that point — in 1955 — the clear mandate and teaching of the Supreme Court was that the goal which must be achieved in all public school systems was the assignment of pupils on a nondiscriminatory basis, without regard to race.

At that point — in 1955 — the Court also clearly recognized that because of the long-established tradition of dual school systems throughout the South the achievement of this goal would take time.

Now — looking back from 1970 — we look back upon fifteen years of transition.

Some have found the transition too slow, others have found it too fast. The fact remains that there *has* been a great change — there *has* been a transition from the former dual school systems to unitary school systems. And most systems, Charlotte-Mecklenburg and Winston-Salem/Forsyth included, are now operating unitary systems.

The difficulty now is that there are those who have lost sight of the fundamental, abiding principle of nondiscrimination laid down in *Brown* and are contending that cases which dealt only with what had to be done in particular school systems in order to "effectuate the transition" are the cases which must be followed on a continuing basis by all school systems in order to operate a unitary system, even after the transition has been effectuated.

Arguing largely from the "transition" cases and virtually disregarding *Brown* and the updating of Brown in *Alexander* v. *Holmes County Bd. of Educ.*, 396 U. S. 19, 90 S. Ct. 29, 24 L. Ed. 2nd 19 (decided October 29, 1969), where the Court de-

fined a unitary system as one in which "no person is effectively excluded from any school because of race or color", such persons forsake principle and find ultimate solutions in terms of numbers and percentages, which they would have the Courts first sanction and then police and enforce.

If their contentions should find favor with the Court, the net result will be:

To keep the federal courts in the public school business ad infinitum; to have every district court retain jurisdiction over every school case; to have the court require every school to be "racially balanced", to require the submission of periodic reports on the racial composition of every school and to order a reshuffling of students every time changes in residential patterns upset the prescribed racial ratio in any school; to have the court pass judgment on the expansion of every exisiting school and the location of every new school; to have the court determine whether the employment and assignment of all staff members, principals and teachers upsets the prescribed racial balance or is racially motivated — in short, to have an interminable, intolerable court-operated "big brother" approach to public education.

We believe the idea of such a result is as abhorrent to the court as it is to school boards and to the vast majority of the public, but this is exactly the situation confronting Charlotte-Mecklenburg, and many, many other school boards, today and it bids fair to become a way of life — or death — for public education in the South if nothing is done by the Supreme Court to stop it.

The Court has already decreed that the time for effectuating the transition has run out. This being true, it would seem that it would now be appropriate for the Court to encourage the District Courts to review the school cases pending before them for the purpose of assuring that the school systems involved are now operating on a nondiscriminatory basis — i.e., that no person is being effectively excluded from any school because of race or color and that affirmative steps be taken toward the entry of final judgments as rapidly as each case will permit.

Finally, the Court should not misconstrue the absence of widespread boycotts or other disruptive or destructive acts in the Charlotte-Mecklenburg, or Winston-Salem/Forsyth County School Systems as an acceptance by the public of court-ordered, artificial measures to achieve racial balance. All this proves is that the public strongly supports education and that the paramount issue, for most whites, is not whether blacks and whites shall attend the same school. The public, generally, objects strenuously and deeply to court-imposed, artificial measures to force a racial balance, and to the application of standards for the South which are different from those applied in other parts of the Nation, for this is neither freedom nor equality. If the practice is continued the public will respond in the only ultimately effective way left open to them: They will fail to vote for school bonds needed for public education and will otherwise abandon their support of public education, in favor of private education. Historically, the South has supported public education, with rich and poor alike generally attending public schools. This has been healthy — and good sociologically as well as educationally. *Brown*, properly construed and applied, with blacks and whites accorded equal treatment without discrimination, can save and strengthen public education; *Brown*, improperly construed and applied, can destroy public education.

No. 436

BIRDIE MAE DAVIS, ET AL., PETITIONERS

v.

BOARD OF SCHOOL COMMISSIONERS OF MOBILE COUNTY, ET AL.

ON PETITIONS FOR WRITS OF CERTIORARI TO THE UNITED STATES COURTS OF APPEALS FOR THE FOURTH AND FIFTH CIRCUITS

BRIEF FOR THE UNITED STATES AS AMICUS CURIAE

STATEMENT

1. *Charlotte-Mecklenburg.* This case was commenced in January 1965, and the district court thereafter approved a free-transfer desegregation plan. 243 F. Supp. 667 (W.D.N.C.), affirmed, 369 F. 2d 29 (C.A. 4). The present proceedings were initiated

in September 1968 by the plaintiffs' motion for supplemental relief based on *Green* v. *County School Board,* 391 U.S. 430, and its companion cases. Following an evidentiary hearing, the district court held on April 23, 1969, that the school system was not being operated in conformity with constitutional requirements and directed submission of a plan for faculty desegregation to be effective in the fall of 1969 and for student desegregation to be implemented in two steps at the commencement of the 1969 and 1970 school years (App. 285a). The school board, in substance, declined to submit a plan for either faculty or student desegregation (App. 330a–340a).

Further evidentiary hearings were held, and on June 20, 1969, the district court again directed submission of a plan (App. 448a). The school board thereafter proposed a plan by which some all-black schools would be closed and students from those schools, as well as from over-crowded black schools, would be permitted to attend predominantly white schools, and otherwise the free-transfer plan would remain in effect; no faculty desegregation plan was offered (App. 480a). The district court approved the board's submission on an interim basis and directed the preparation by November 17, 1969, of a plan for student and faculty desegregation to be effective for the 1970–1971 school year. The school board, indicating that a plan was being prepared, moved for an extension of time until February 1970. The district court denied the motion (App. 655a), and the board again indicated that a plan for student

desegregation was being prepared based on the premises that only rezoning would be used to achieve desegregation and that no school to which white students were assigned would be less than 60 percent white (App. 670a–671a).

On December 1, 1969, the District court held that the board's submission was unacceptable and appointed an education expert to prepare a desegregation plan (App. 698a). Plans were filed by the school board (App. 726a) and the court-appointed expert. On February 5, 1970, the court adopted, with some modifications, the board's plan for secondary schools and the expert's plan for elementary schools (App. 819a) and adopted a timetable for implementation suggested by the board.

Implementation of the plan was partially stayed by the Court of Appeals for the Fourth Circuit on March 5; and thereafter stayed in its entirety by the district court (App. 1255a). This Court declined to disturb the Fourth Circuit's order. 397 U.S. 978. On appeal, the court of appeals indicated approval of the district court's order of February 5 insofar as it rejected the school board's plan but vacated the order and remanded the case for reconsideration and to permit the board to submit a new elementary school plan (App. 1262a). This Court granted certiorari on June 29, 1970, directing reinstatement of the district court's order pending further proceedings in that court (App. 1320a; 399 U.S. 926).

On remand, two new plans for elementary schools were submitted: a plan prepared by the United States

Department of Health, Education, and Welfare based on contiguous grouping and zoning of schools, and a plan prepared by four members of the nine-member school board achieving substantially the same results as the court-expert plan but requiring somewhat less transportation. A majority of the school board declined to amend its proposal. After a lengthy evidentiary hearing, the district court directed the board to adopt the minority board plan or to submit a new, equally effective plan; the court ordered that the court-expert plan would remain in effect in the event that the school board declined to adopt a new plan. On August 7 the board so declined.

2. *Mobile County.* This case was initiated by private plaintiffs in 1963, and the United States intervened as a party-plaintiff in 1967. The history of the litigation is recorded in a lengthy series of decisions cited on page two of the Memorandum for the United States on the petition for a writ of certiorari.

In June 1969 the Court of Appeals for the Fifth Circuit reversed the district court's approval of a desegregation plan combining elements of freedom of choice, geographic zoning, and minority-to-majority transfers. 414 F. 2d 609. The district court was directed to order the school board to engage the assistance of the United States Department of Health, Education, and Welfare in preparing a new desegregation plan for the entire system. HEW developed a two-step desegregation plan, reaching all rural schools and the schools in the western portion of metropolitan Mobile in 1969 and reaching the eastern urban schools

n 1970. The district court adopted a plan substantially the same as the first step of the HEW plan and directed submission of revised plans for the eastern schools. That decision was affirmed *sub nom. Singleton* v. *Jackson Municipal Separate School District,* 419 F. 2d 1211 (C.A. 5) (en banc) (per curiam), reversed in part *sub nom. Carter* v. *West Feliciana Parish School Board,* 396 U.S. 290 (per curiam).

On December 1, 1969, plans were filed by the school board and HEW. At the district court's request, the Department of Justice filed on January 27, 1970, a separate proposal for implementation pendente lite. On January 31 the district court adopted, with some modification, the school board's submission based on geographic zoning. The plaintiffs and the United States appealed.

On June 8, 1970, the court of appeals reversed, adopting with some modifications the plan submitted by the Department of Justice, and the plaintiffs petitioned for a writ of certiorari. The court of appeals has since twice amended its mandate (see decision reprinted in appendix to the government's memorandum on the petition and *Davis* v. *Board of School Commissioners of Mobile County,* No. 29,332 (C.A. 5, Aug. 28, 1970)).

ARGUMENT

INTRODUCTION AND SUMMARY

Several threshold considerations may serve to illuminate the issues in these two school desegregation cases.

First, these are school districts which contain large metropolitan areas. While this Court has dealt with such districts in the past, it has not had occasion since the *Green* trilogy [1] and *Alexander* v. *Holmes County Board of Education,* 396 U.S. 19, to define with particularity the obligations of large metropolitan school systems with respect to pupil assignment. *Green* and *Alexander* answered many of the questions as to the obligations of rural and small town systems, and the question now is the extent to which the remedial principles developed in those cases of classic dualism apply to large metropolitan systems. In this sense, these are cases of first impression.

Second, both of these school systems are characterized by residential patterns of racial separation as well as a history of racial separation in the public schools. The two types of separation are interrelated, but the extent of the relationship is at best speculative. These cases might thus involve the questions whether school boards can retain a "neighborhood school" assignment policy where the result is to operate some schools that are racially identifiable at least to the extent reflected by the racial composition of the student bodies, whether the Fourteenth Amendment requires school boards to achieve some mathematical degree of integration regardless of housing patterns, and the extent to which the burdens of alleviating racial isolation are to be borne by school boards and

[1] *Green* v. *County School Board*, 391 U.S. 430; *Raney* v. *Board of Education*, 391 U.S. 443; *Monroe* v. *Board of Commissioners*, 391 U.S. 450.

school children rather than being shared by other governmental institutions and agencies having the power to affect such isolation.

Third, there is evidence that these school boards previously maintained aspects of dualism—such as some dual, overlapping zones, faculty segregation, and dual transportation systems. If these school districts are, therefore, properly regarded as traditionally dual school systems, whose obligation is to convert to unitary systems, the question remains: what constitutes a unitary system? Stating this question another way: what remedial adjustments would bring these school districts into compliance with constitutional requirements? And, when school boards have failed to select a method of compliance, a further question arises as to the scope of judicial discretion in ordering appropriate remedial adjustments.

These questions relate both to rights and to remedies and raise yet another question: In desegregating school systems is there a conflict between individual rights and public need, and, if so, is there some proper balance between them? We think there could be such a conflict if the Fourteenth Amendment granted students an absolute right to attend school with children of other races, *i.e.*, required some form of racial balance, or if there were an unyielding public need which would justify the wholesale maintenance of racial segregation; but we think the first of these conflicting goals is not prescribed, and the second not countenanced, by the Constitution. Rather, we think the right of school children articulated in *Brown* is to

attend school in a system where the school board exercises its decision-making powers so as to operate a nonracial unitary school system free from discrimination, and that where this has not been done there is a violation of the rights of such children requiring remedial adjustments which give proper weight to that which is feasible and that which is just. If choices exist which may have a racial impact, they cannot be exercised in a racially neutral manner where to do so is to perpetuate segregation. Thus, the right and the remedy are interrelated.

This interrelationship is most easily perceived in rural systems, such as New Kent County, Virginia, where the violation was the maintenance of two twelve-grade schools, one nearly all white and one black, each serving the entire system. Pairing or zoning the two schools were remedies that flowed naturally from this violation. But where scores of schools serve the same grades, some attended largely by students of one race, the remedy is not self-evident.

The controversy in these cases is over the standards to be applied in fashioning remedies for state-imposed segregation in large metropolitan areas. We believe that an appropriate standard should give proper attention to a number of circumstances, such as the size of the school district, the number of schools, the relative distances between schools, the ease or hardships for the school children involved, the educational soundness of the assignment plan, and the resources of the school district.

All these circumstances have been taken into account by HEW's Office of Education in the development of desegregation plans for urban school systems. That Office has followed the general principle that school districts which are under a duty to reorganize have an obligation to make all reorganizational decisions so as to eliminate the vestiges of dualism, but are free at the same time to take into account the benefits to be derived from preserving the traditional neighborhood method of school assignment. In applying this principle, the Office has employed the techniques of expanding contiguous geographic zones and pairing or clustering schools having contiguous zones. This principle has found general acceptance in the lower courts and should be adopted by this Court.

This Court observed in *Green* v. *County School Board*, 391 U.S. 430, that "*Brown II* was a call for the dismantling of well-entrenched dual [school] systems tempered by an awareness that complex and multifaceted problems would arise which would require time and flexibility for a successful resolution," *id.* at 437, and held that "[s]chool boards * * * then operating state-compelled dual systems were nevertheless clearly charged with the affirmative duty to take whatever steps might be necessary to convert to a unitary system in which racial discrimination would be eliminated root and branch." *Id.* at 437–438; see *Raney* v. *Board of Education*, 391 U.S. 443, 447–448; *Monroe* v. *Board of Commissioners*, 391 U.S. 450, 458–460. Last Term this Court held that "the obligation of every school district is to terminate dual school systems at once and to operate now and hereafter only

unitary schools." *Alexander* v. *Holmes County Board of Education,* 396 U.S. 19, 20; see *Carter* v. *West Feliciana Parish School Board,* 396 U.S. 290; *Northcross* v. *Board of Education,* 397 U.S. 232.

These decisions clearly contemplated the reorganization of racially segregated, dual school systems. But, like earlier school desegregation decisions of this Court, they arose in the context of rural, classically dual systems or the perpetuation of the most egregious forms of racially dual operation. New Kent County operated two schools, one attended solely by Negroes and the other almost exclusively by whites, offering exactly the same grades and serving exactly the same attendance area (coextensive with the entire county), while both whites and blacks resided throughout the district. Similarly, in *Raney* "[t]here [were] no attendance zones, each school complex providing any necessary bus transportation for its respective pupils." 391 U.S. at 445. In *Monroe* v. *Board of Commissioners, supra,* involving a small city school district in which many residential areas were racially segregated, a zoning plan had "assigned students to * * * schools in a way that was capable of producing meaningful desegregation," 391 U.S. at 458, but a free-transfer option superimposed on geographic zoning had "permitted the 'considerable number' of white or Negro students * * * to return, at the implicit invitation of the Board, to the comfortable security of the old, established discriminatory pattern." *Id.* at 458–459.

Hence, while this Court has dealt with large urban school districts in the past, including Topeka, Kansas, *Brown* v. *Board of Education,* 347 U.S. 483; Little

Rock, Arkansas, *Cooper* v. *Aaron*, 358 U.S. 1; Knoxville, Tennessee, *Goss* v. *Board of Education*, 373 U.S. 683; Richmond, Virginia, *Bradley* v. *School Board*, 382 U.S. 102; Montgomery, Alabama, *United States* v. *Montgomery County Board of Education*, 395 U.S. 225; and Memphis, Tennessee, *Northcross* v. *Board of Education*, 397 U.S. 232, the Court has not had an occasion to define with any degree of finality the constitutional obligations—particularly the pupil assignment obligations—of such school systems. The *Green-Raney-Monroe* trilogy presented issues associated with traditional dualism. In the circumstances of those cases, freedom of choice and free transfer were held to be unacceptable methods of student assignment because they maintained racial segregation by tacitly perpetuating dual, overlapping attendance areas, "[t]he central vice in a formerly de jure segregated public school system," *United States* v. *Jefferson County Board of Education*, 372 F. 2d 836, 867 (C.A. 5), affirmed on rehearing, 380 F. 2d 385 (C.A. 5) (en banc), certiorari denied *sub nom. Caddo Parish School Board* v. *United States*, 389 U.S. 840.

In accordance with the mandate of *Green* and this Court's definitive announcement in *Alexander* v. *Holmes County Board of Education, supra,* and *Carter* v. *West Feliciana Parish School Board, supra,* that dual systems must be converted "at once," nearly all of the traditionally dual school districts are desegregating by implementing desegregation plans based on compact geographic zones and grade restructuring, through either litigation or voluntary

agreements with the United States Department of Health, Education, and Welfare.[2]

Most of these are rural systems which, by the use of contiguous zoning and contiguous pairing, have converted to systems "without a 'white' school and a 'Negro' school, but just schools." *Green,* 391 U.S. at 442. In urban school systems like Mobile and Charlotte, however, the constructive use of contiguous zoning and pairing places biracial student populations in most, but not all, schools. This distinction was well stated by Judge Butzner in the *Charlotte* case below:

> All schools in towns, small cities, and rural areas generally can be integrated by pairing, zoning, clustering, or consolidating schools and transporting pupils. Some cities, in contrast, have black ghettos so large that integration of every school is an improbable, if not an unattainable, goal. [App. 1267a–1268a.]

In this respect, then, these cases present issues of first impression for this Court and may require the Court to distinguish between rural and metropolitan school districts.

I. THE CHARLOTTE AND MOBILE SCHOOL SYSTEMS HAVE FOLLOWED POLICIES AND PRACTICES WHICH PERPETUATE THE DUAL SYSTEM

Racial dualism in large urban systems may be found not only in overlapping attendance areas but also in

---

[2] See Appendix, *infra*, for a summary of the status of school districts in eleven Southern states, which brings up to date the table in the Appendix to the government's Supplemental Memorandum filed in this Court in *Alexander* v. *Holmes County Board of Education*, No. 632, October Term, 1969.

the organizational decisions of the system in furtherance of racial separation. It may be manifested in distorted grade structures, outsized schools, gerrymandered zones, curriculum manipulation, and various other devices for accommodating the organization of the system to fluctuating racial residential patterns.

Neither North Carolina nor Alabama presently requires racial segregation in public education by law; and insofar as an official policy of segregation plays a part in defining the Charlotte and Mobile school boards' present constitutional obligation, it is meaningful only to the extent that it is manifested in the decision-making (involving both long-range planning and day-to-day operations) of the boards. Accordingly, all of those decisions must be considered in determining the extent to which a school district has engaged in discrimination contrary to *Brown of Education,* 347 U.S. 483. See *Brown* v. *Board of Education,* 349 U.S. 294, 300–301; *United States* v. *Jefferson County Board of Education,* 372 F. 2d 836 (C.A. 5). See, also, *Smith* v. *Texas,* 311 U.S. 128, 132.

Site selection and school construction are important aspects of a school board's decision-making responsibilities in school districts characterized by racial residential segregation, because they have been used as substitutes for dual zoning. The records in both *Charlotte-Mecklenburg* and *Mobile* suggest that the school boards have consciously selected building sites and

constructed schools in a manner designed to perpetuate separate schools for whites and blacks. Thus in 1963, when the Mobile board sought a stay of a Fifth Circuit order directing it to commence admitting Negro students to white schools under the Alabama pupil-placement laws, the board argued that

> desegregation would "seriously delay and possibly completely stop" the Board's building program, "particularly the improvement and completion of sufficient colored schools which are so urgently needed." In recent years, more than 50% of its building funds, the Board pointed out to the parents and guardians of its colored pupils, had been spent to "build and improve colored schools," and of eleven million dollars that would be spent in 1963, over seven million would be devoted to "colored schools."

Board of School Commissioners v. *Davis,* 11 L. Ed. 2d 26, 28 (Black, J., on application for a stay). As Mr. Justice Black then observed, "It is quite apparent from these statements that Mobile County's program for the future of its public school system 'lends itself to perpetuation of segregation,' a consequence which the Court recently had occasion to condemn as unlawful." *Id.* at 28–29. This policy continued until at least June of 1969. See *Davis* v. *Board of School Commissioners of Mobile County,* 414 F. 2d 609 (C.A. 5).

Similarly, in *Charlotte-Mecklenburg* the district court found that the "[l]ocation of schools in Charlotte has followed the local pattern of residential development, including its *de facto* patterns of segre-

gation. With a few significant exceptions * * * the schools which have been built recently have been black or almost completely black, or white or almost completely white, and this probability was apparent and predictable when the schools were built." *Charlotte* App. 305a; see *id.* at 456a–457a.

Other necessary educational and administrative decisions must be coordinated with a school-construction program; and the record in *Mobile* is especially clear on the potential effects of those decisions on racial separation. The capacities of schools can be based on the size of the racially identifiable areas they are to serve. Two junior high schools were constructed, for example, to serve relatively small white neighborhoods virtually surrounded by predominantly Negro residential areas; accordingly, the capacities of those schools were far smaller than the capacities of other schools in the system serving the same grades. Brief for Petitioners in *Mobile,* Appendix at 15, n. 24. The same is true of grade structures. No reason can satisfactorily explain, for instance, why one all-Negro school was the only school in the city to offer all twelve grades except that the Negro area to be served by the school was relatively small, compact, and surrounded by white residential areas.[3] *Id.* at 4, 15 n. 24; see, also, *id.* at 10. The *Mobile* record contains evidence of numerous instances in which port-

[3] That school has now been fully desegregated by reducing the number of grades and expanding the neighborhood zone to be served.

able classrooms were used at schools serving one race while nearby schools offering the same grades but serving another race operated under capacity. *Id.* at 10–11; see, also, *id.* at 64–67. The location of attendance-zone boundaries (including the use of noncontiguous zones) has also been utilized in *Mobile* to produce segregation. *Id.* at 7–9.

We submit, therefore, that the constitutional violations which have occurred in these two cases are the products of a process of decision-making in which the state chose, in spite of the availability of feasible alternatives, courses which perpetuated the racially segregated dual systems. In light of the fact that in many metropolitan school systems "black residential areas [may be] so large that not all schools can be integrated by using reasonable means," *Swann* v. *Charlotte-Mecklenburg Board of Education,* No. 14,517 (C.A. 4) (App. 1267a), it is appropriate, therefore, to look to that decision-making process as the focal point of a proper remedy. Accordingly, an appropriate remedy is to require that the governmental decisions affecting racial segregation be so made and implemented, when feasible alternatives are available, as to disestablish the dual system and eliminate its vestiges. In this sense, the remedy is a dynamic one, cf. *Clark* v. *Board of Education of Little Rock School District,* 426 F. 2d 1035 (C.A. 8), and not a static one. And, as we shall now show, it does not require, as an *a priori* constitutional standard, racial balance or integration of every all-white, all-Negro, or predominantly Negro school.

II. THE FOURTEENTH AMENDMENT DOES NOT REQUIRE, AS A MATTER OF LAW, RACIAL BALANCE IN ALL PUBLIC SCHOOLS OR INTEGRATION OF EVERY ALL-WHITE OR ALL-NEGRO SCHOOL

The plaintiffs-petitioners in both *Charlotte-Mecklenburg* and *Mobile* argue that school boards have a constitutional obligation to eradicate the "racial identifiability" of all schools within their jurisdiction. In this view a predominantly Negro school would be "racially identifiable" in a school district having a majority of white students such as Charlotte and Mobile. It would appear that all school boards, according to the petitioners' theory, must be required to ensure that the ratio of white to black students in each school is as near as possible to the ratio of white to black students in the system as a whole. We do not agree that either general constitutional principles[4] or the holdings of this Court or the courts of appeals with respect to disestablishment of dual school systems compel acceptance of this formulation of school boards' remedial duty. In our view, "[h]ow far that duty extends is not answerable perhaps in terms of an unqualified obligation to integrate public education without regard to circumstance * * *." *Branche* v. *Board of Education of Hempstead,* 204 F. Supp. 150, 153 (E.D.N.Y.).

---

[4] It is, of course, clear that the Fourteenth Amendment's requirement of due process and equal protection does not, by itself, prescribe any particular racial (or other) admixture in the membership of individual institutional groups, such as a particular jury. *Cassell* v. *Texas,* 339 U.S. 282.

As the court of appeals stated in the *Charlotte* case, "if a school board makes every reasonable effort to integrate the pupils under its control, an intractable remnant of segregation * * * should not void an otherwise exemplary plan for the creation of a 'unitary school system'" (App. 1268a). Neither, on the other hand, do the decisions support the use of racial quotas, as in the Charlotte-Mecklenburg school board's plan, as a limitation on the extent of a school board's remedial obligation.

Federal courts have made basically three uses of such expressions as "racially identifiable schools," "all-Negro schools," and "racial balance," none of which supports the near-absolute standard suggested by the plaintiffs-petitioners. The courts have used these expressions as a characterization of the state's holding out a classically dual school system in tacit perpetuation of legally required segregation, as an analytical starting point, and as a convenient reference to a remedial standard requiring the comparison of available alternatives.

This Court said in *Green* that an acceptable desegregation plan must "promise realistically to convert promptly to a system without a 'white' school and a 'Negro' school, but just schools." 391 U.S. at 442. But that remark was made in the context of the state's holding out one school for whites and another for blacks serving the same attendance area, just as it had done when racial segregation was enforced by law. In holding that the state could not maintain such a system, even though it had the appearance of racial

neutrality in the sense that student assignments were based on free choice, this Court might well have said that the schools of New Kent County must be merged or "racially balanced," for the simplest techniques of effecting desegregation (such as zoning and pairing, see 391 U.S. at 442 n. 6) would necessarily promise exactly that result in the circumstances of that case. It was in the same context, namely, the failure of freedom of choice to alter significantly the racially dual attendance patterns of the past, that the Court of Appeals for the Fifth Circuit adopted the rule, now moribund, that an existing student-assignment plan was unacceptable if it retained an all-Negro school. See, *e.g.*, *Adams* v. *Mathews*, 403 F. 2d 181 (C.A. 5); *Hall* v. *St. Helena Parish School Board*, 417 F. 2d 801 (C.A. 5), certiorari denied, 396 U.S. 904; *United States* v. *Hinds County School Board*, 417 F. 2d 852 (C.A. 5), related order reversed *sub nom. Alexander* v. *Holmes County Board of Education*, 396 U.S. 19 (reversing as to timing). But see *Harris* v. *St. John the Baptist Parish School Board, sub nom. Singleton* v. *Jackson Municipal Separate School District*, 419 F. 2d 1211, 1221 (C.A. 5) (en banc).

The Fifth Circuit, although no longer relying on a standard of no all-Negro schools, has required a showing and findings of the specific "reasons, if any, for the continuation of any all Negro or all white schools" under proposed desegregation plans. *Singleton* v. *Jackson Municipal Separate School District*, No. 29,226, at 14 (C.A. 5, May 5, 1970); *Andrews* v. *City of Monroe*, 425 F. 2d 1017, 1021 (C.A. 5). This

requirement, obviously, is an analytical starting point designed to inform the court of appeals of both the extent to which racial concentration remains in a school district and the feasibility of reducing concentration by alternative means. For numerous recent decisions of that court, including the decision in *Mobile,* have approved plans even though all-Negro schools remained. See, *e.g., Bradley* v. *Board of Public Instruction of Pinellas County,* No. 28,639 (C.A. 5), modified on rehearing (C.A. 5, July 28, 1970); *Valley* v. *Rapides Parish School Board,* No. 30,099 (C.A. 5, Aug. 25, 1970); *Mannings* v. *Board of Public Instruction of Hillsborough County,* No. 28,643 (C.A. 5, May 11, 1970). Similarly, the Court of Appeals for the Eighth Circuit observed with respect to racial balance:

> We do not rule that precise racial percentages across the District at the respective elementary, junior high, and high school levels are as yet constitutionally required. * * * We certainly can conceive of a fully desegregated system where percentages do vary from school to school and in which even one school might have a black majority and another a white majority but still, when all factors are fairly and unemotionally considered, the system is "unitized" within the Supreme Court's *Alexander* requirement. That happy day may not yet be upon us and until it arrives percentages may be more significant than they eventually deserve to be.

Kemp v. *Beasley,* No. 19,782, at 14–15 (C.A. 8, March 17, 1970) (El Dorado, Arkansas); see *Swann* v.

Charlotte-Mecklenburg Board of Education, 306 F. Supp. 1299, 1312 (W.D.N.C.) (App. 710a); *United States* v. *Georgia,* C.A. No. 12,972 (N.D. Ga., Dec. 17, 1969) (and subsequent orders amending the formula in light of the circumstances of individual school districts).

Finally, the standard of no predominantly Negro schools has been used as a means of translating into remedial terms a finding, in view of available alternatives, of the extent to which racial concentration could feasibly be eliminated. See, *e.g., Spangler and United States* v. *Pasadena City Board of Education,* unreported order entered on findings and conclusions reported at 311 F. Supp. 501 (C.D. Calif.). Such an articulation of remedial obligations cannot be read in the unyielding terms suggested by the plaintiffs-petitioners. Indeed, the district court in *Charlotte-Mecklenburg,* while approving the plan supported by the plaintiffs, was careful to point out, "This court has not ruled, and does not rule that 'racial balance' is required under the Constitution; nor that all black schools in all cities are unlawful; * * * nor that the particular order entered in this case would be correct in other circumstances not before this court." *Swann* v. *Charlotte-Mecklenburg Board of Education,* C.A. No. 1974, at 12 (W.D.N.C., Aug. 3, 1970); see *id.* (Feb. 5, 1970) (App. 822a). Insofar as such remedial expressions are made on the basis of a record and findings on "the availability to the board of other more promising courses of action," 391 U.S. 439, they

represent no departure in constitutional principle from *Green,* which directed district courts to assess proposed plans "in light of any alternatives which may be shown as feasible and more promising in their effectiveness." *Ibid.*

The desegregation plan supported by the Charlotte-Mecklenburg school board is based on the premise that "[n]o school district to which white students are assigned should have less than 60 per cent white student population * * *." App. 671a. In the factual circumstances of the Charlotte school system, this rule, when coupled with the board's declining to consider any technique of desegregation except geographic zoning, inevitably constitutes a limitation on the extent of desegregation to be achieved: Whenever an all-Negro school could not be so zoned as to make it at least sixty percent white, this limitation would require that it remain all-Negro. As the district court observed, such a use of a " '60–40' ratio is a one-way street," App. 701a, and the court of appeals properly rejected it. App. 1276a. See *Lee* v. *Macon County Board of Education,* C.A. No. 604–E (M.D. Ala., April 3, 1970) (Conecuh County); *Brewer* v. *School Board of City of Norfolk,* No. 14,544 (C.A. 4, June 22, 1970), reversing 302 F. Supp. 18, 308 F. Supp. 1274 (E.D. Va.). No use of racial quotas "of which racial segregation is the inevitable consequence may stand under the Fourteenth Amendment." *Goss* v. *Board of Education,* 373 U.S. 683, 689.

III. THE CHARLOTTE AND MOBILE SCHOOL BOARDS ARE REQUIRED, IN CONVERTING FROM DUAL TO UNITARY SYSTEMS, TO MAKE ORGANIZATIONAL AND ASSIGNMENT ADJUSTMENTS TO ELIMINATE THE VESTIGES OF THE DUAL SYSTEM BUT NOT TO ACHIEVE ANY PARTICULAR RACIAL BALANCE OR RATIOS

1. Clarification of the proper remedial standards in this field thus begins, in our view, with recognition of the basic principle that the constitutional requirement of "a completely unified, unitary, nondiscriminatory school system" (*Montgomery*, 395 U.S. at 235) is not a requirement that racial balance need be achieved in all schools within the system or that all instances of non-discriminatory racial isolation need be eliminated. It is, instead, a requirement of a school "system in which racial discrimination * * * [has been] eliminated root and branch" (*Green*, 391 U.S. at 438). It follows that the constitutional objective can, in most situations, be achieved by means of any of a variety of methods of pupil assignment, and that the choice of the particular method, or combination of methods, to be employed is a matter of educational policy within the discretion of the school board—so long as that choice accomplishes the constitutional objective. As this Court said in *Green* (391 U.S. at 439):

> There is no universal answer to complex problems of desegregation; there is obviously no one plan that will do the job in every case. The matter must be assessed in light of the circum-

> stances present and the options available in each instance. It is incumbent upon the school board to establish that its proposed plan promises meaningful and immediate progress toward disestablishing state-imposed segregation. * * *

Indeed, the Court in *Green* specifically declined to "hold that 'freedom of choice' can have no place in such a plan," or "that a 'freedom-of-choice' plan might of itself be unconstitutional" (391 U.S. at 439), even though it noted that "the general experience under 'freedom of choice' to date has been such as to indicate its ineffectiveness as a tool of desegregation" (391 U.S. at 440) and held that in the three cases before it the freedom-of-choice plans were constitutionally inadequate. And the Court specifically indicated in *Green* that either geographic zoning or pairing (consolidation) of the two schools in the rural district involved in that case would be an acceptable method of pupil assignment (391 U.S. at 442 n. 6).

We submit that a system of pupil assignment on the basis of contiguous geographic (residential) zones—the "neighborhood" school system, which is the most familiar and traditional method of pupil assignment employed throughout the Nation—is constitutionally acceptable in desegregating urban school systems also. We recognize, however, that where dual systems have previously been maintained, school buildings and facilities will frequently be located on sites which would not have been chosen had the system been operated on a unitary basis, and that there will generally be available to school boards more than one choice of pupil

assignment plans which would be consistent with the neighborhood school concept.

In many such districts the constitutional adequacy of the "neighborhood school" method of converting a dual system into a unitary one will, accordingly, depend on the choice of those complementary techniques designed to eliminate the effects of state-imposed discrimination that would otherwise remain (see *supra,* pp. 13–16). The techniques available to school officials include:

> (*a*) Change the grade structure. A school with fewer grades can accommodate more children in each grade, so that it would serve a larger area.
>
> (*b*) Permit students to transfer from a school in which their race is in the majority to one in which it is in the minority. The courts below, in adopting this technique, also required that such students be provided transportation.
>
> (*c*) Close unneeded or substandard schools.
>
> (*d*) Draw zone lines so that they cut across racially impacted residential areas instead of encircling them.
>
> (*e*) Plan new construction of school facilities so as to serve students of both races.

All of these techniques are utilized in the plan approved by the court of appeals in *Mobile,* and they have been used successfully elsewhere. See, *e.g., Singleton* v. *Jackson Municipal Separate School District,* No. 29,226 (C.A. 5, Aug. 12, 1970); *Bradley* v. *Board of Public Instruction of Pinellas County,* No. 28,639 (C.A. 5, July 28, 1970); *Mannings* v. *Board of Public*

Instruction of Hillsborough County, No. 28,643 (C.A. 5, May 11, 1970); *Henry* v. *Clarksdale Municipal Separate School District*, No. 29,165 (C.A. 5, Aug. 12, 1970). The good faith utilization of such techniques to promote desegregation would, in our view, ordinarily enable any district which prefers a "neighborhood" school policy to achieve compliance with constitutional requirements by means of that method of pupil assignment.[5] Such racial isolation as might then persist, not attributable to school officials, can best be undone through the action of the numerous public and private agencies and individuals whose daily decisions can influence the racial composition of a neighborhood.

2. In the present cases, the courts of appeals correctly held that neither school board came forward with a pupil assignment plan adequate to meet its constitutional obligations. Nothing in the record in either case would suggest that either school board's objective in the plans it offered was anything other than to attempt to maintain racial segregation while eliminating overlapping attendance zones. This plainly did not fulfill the boards' "affirmative duty" (*Green*, 391 U.S. at 437) to eliminate the effects of racial discrimination, "root and branch" (391 U.S. at 438).

[5] Of course, the Constitution does not require the adoption of a "neighborhood" pupil assignment policy, and school districts are free, if they prefer, to choose an assignment method designed to achieve racial balance or any other non-discriminatory assignment method. See Memorandum for the United States as Amicus Curiae in *McDaniel* v. *Barresi*, No. 420, this Term.

We come, then, to the precise issue in these cases: the question of the propriety of the remedies adopted by the courts below in the face of each school board's default. This Court has consistently held, in accordance with general principles of equitable remedies, that in this situation the lower federal courts have wide discretion in formulating appropriate relief. See, *e.g.* *Brown* v. *Board of Education*, 349 U.S. 294, 299–300; *United States* v. *Montgomery County Board of Education*, 395 U.S. 225; *Green* v. *County School Board*, 391 U.S. 430, 438 n. 4, 439, 442 n. 6; *Griffin* v. *School Board*, 377 U.S. 218, 232–234; cf. *Carter* v. *Jury Commission*, 396 U.S. 320, 336–337; *Turner* v. *Fouche*, 396 U.S. 346, 355. Indeed, this Court has authorized requiring implementation of desegregation plans although recognizing that the particular plans were not the exclusive means of satisfying constitutional mandates. *Alexander* v. *Holmes County Board of Education*, 396 U.S. 19; *Carter* v. *West Feliciana Parish School Board*, 396 U.S. 290. It is, in general, incumbent on the federal courts to assess the school boards' proposals "in light of the facts at hand and in light of any alternatives which may be shown as feasible and more promising in their effectiveness" (*Green*, 391 U.S. at 439). And, "in this field the way must always be left open for experimentation" (*Montgomery*, 395 U.S. at 235).

In *Mobile*, we believe that the plan approved by the court of appeals meets these standards. It is basically a "neighborhood" school plan, supplemented by judi-

cious use of complementary techniques (see *supra*, p. 25) designed to minimize residual racial isolation. Especially in light of the court's inclusion of a majority-to-minority transfer option and its scrupulous attention to desegregation of faculty and of school facilities and activities (See Pet. App. 12a–13a, 16a), the plan, in our view, "promises realistically to work, and promises realistically to work *now*" (*Green*, 391 U.S. at 439). It should, of course, be re-evaluated in practice by the courts below, after it has been in operation for a sufficient time (see 391 U.S. at 439; *Raney* v. *Board of Education*, 391 U.S. 443, 449).

In *Charlotte*, we believe the court of appeals correctly sustained the district court's judgment as to the junior and senior high schools, in light of the unacceptability of the school board's proposal and the feasibility and practicality of the court's modifications thereof. We also believe the court of appeals was correct in remanding the case to the district court for further consideration of that aspect of the court's order requiring far-reaching cross-busing of elementary school pupils, since the district court had initially indicated some doubt as to whether racial balance was the constitutionally required objective (see App. 710a) and may, therefore, have exercised its remedial discretion in pursuit of an erroneous constitutional standard. On remand, the district court reconsidered the matter. Although it had another opportunity to do so, the school board again failed to come forward with a constitutionally adequate plan. The Department of Health,

Education, and Welfare did submit a plan of contiguous zoning which we believe was constitutionally acceptable, but the school board objected to it strongly and indicated that it might prefer the court's original plan.*

In these circumstances the district court rejected the HEW plan. If the decision of the district court was based on an understanding that racial balance is a constitutional requirement, it cannot be supported for the reasons stated in earlier portions of this brief. In light of the fact that the plan ultimately adopted by the court went beyond the HEW plan in departing from the neighborhood school concept, and the fact that the school board rejected any alternative to its own plan which failed, in our opinion and the opinions of the courts below, to meet constitutional requirements, we believe that in further consideration of the problem the board should be required to choose

---

* See Transcript of Hearing, July 15–24, 1970, at 1071, 1077–1078 (Mr. Waggoner, attorney for the school board):

> The HEW plan, under anybody's estimation, is a plan that doesn't produce any satisfactory solutions in any way.
>
> * * * * *
>
> So we take the position, if the Court please, that there is no reasonable alternative between the Finger plan and the Board plan, the alternatives suggested here or portions thereof are unreasonable, and this places * * * the Board and the plaintiffs in the difficult position of seeing a situation where an appellate court has ruled one plan doesn't go far enough and the other plan goes too far. We feel this is where the chips in this case fall, there is no middle ground.

See, also, *id.* at 1113.

from among those plans in the record, including the "Finger" plan, the minority board plan, and the HEW plan, or in the alternative submit to the district court a plan meeting the standards and requirements of the Constitution as enunciated by this Court.

The decisions below should not be regarded as prescribing the only method of pupil assignment which may, in the future, be used in these districts. It is still the school boards, and not the federal courts, that have the authority, within constitutional limitations, to make educational policy—including pupil assignment policy. The role of the courts in these matters arises only because of the school boards' failure to fulfill their constitutional obligations. So long as that failure persists, the courts must, to a limited extent, assume the functions of the school boards and, within the traditional confines of equitable discretion, engage in "experimentation" (*Montgomery,* 395 U.S. at 235) comparable to that appropriate for the boards in achieving the constitutionally required objective. The boards are free, however, to reassert their authority whenever they wish, by coming forward with constitutionally acceptable proposed modifications of the court's plan or with an entire new plan that meets constitutional standards. We see no reason why the school boards in these cases should not be permitted to propose, for the approval of the courts below, new pupil assignment plans (if they so desire) for implementation in the 1971–1972 school year.

CONCLUSION

In view of the district courts' express retention of jurisdiction to entertain amendments to the plans,[7] it would be appropriate for this Court to enunciate the standards which are applicable to cases of this sort and to remand the cases to those courts for further proceedings in the light of those standards.

Respectfully submitted.

ERWIN N. GRISWOLD,
Solicitor General.

JERRIS LEONARD,
Assistant Attorney General.

OCTOBER 1970.

---

[7] The August 3, 1970, decision of the district court in *Charlotte* properly retained jurisdiction pursuant to the directive of the court of appeals that "after a plan has been approved, the district court may hear additional objections or proposed amendments, but the parties shall comply with the approved plan in all respects while the district court considers the suggested modifications." In *Mobile* the court of appeals also directed the district court to retain jurisdiction.

APPENDIX

The following status report on eleven southern states as of September 1970, indicates how many school districts were unitary prior to 1970–71, how many are committed to terminal 1970–71 plans, and how many are currently not committed to a terminal 1970–71 plan. This information was compiled from a central status report now maintained jointly by the Department of Justice and the Department of Health, Education and Welfare. While absolute accuracy in placing school systems in appropriate categories is not possible, every effort has been made to reconcile the sometimes conflicting information by using the most recent data.

Under the heading "Unitary Prior to 70–71" are included the following:

1. Those desegregated districts as enumerated by HEW.
2. Those few districts operating under court-ordered freedom of choice plans which, according to the statistics, are effectively desegregating the systems.
3. Those districts ordered by district courts to desegregate totally before 1970–71.

Under the heading "Committed—1970–71 Terminal" are included:

1. Those districts for which the district court has ordered a terminal 1970–71 plan.
2. Those districts for which such a plan has been achieved through voluntary agreement with HEW.

Under the heading "Uncommitted—1970–71 Terminal" are included:

1. Those systems currently in court proceedings where a final plan has not yet been filed or ordered.

2. Those districts which are under court order but which (a) have been ordered to implement a terminal 1971–72 plan, or (b) are operating under a freedom of choice or other court-ordered plan (terminal later than 1971–72) which does not appear to be effectively desegregating the system for 1970–71; districts in this category are not currently involved in court proceedings.

3. Those districts which are committed to neither a court order nor a voluntary plan; this category includes districts from which HEW is trying to obtain voluntary compliance, those which are involved in out-of-court negotiations with the Justice Department, and those which have reneged on voluntary plans.

Under the heading "Private Suit-Status Unknown" are included districts involved in private suits where our information regarding the progress or status of that suit is not current.

The use of the word "terminal" to describe a plan and "unitary" to describe a system means that the system has been ordered or has agreed to follow a plan which would achieve conversion to a unitary system by the fall of 1970. But some cases are on appeal, some plans may not be fully implemented, and all may still be subject to challenge or modifications in the district courts. In Texas, we have classified as unitary prior to 1970–71 some all-black districts; a govern-

ment suit to merge some of these districts with integrated districts is pending. Because Texas law did not require segregation of Spanish-surnamed students, the report does not take into account litigation involving discrimination against Spanish-surnamed students.

STATUS OF SCHOOL SYSTEMS IN 11 SOUTHERN STATES

ON WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE FOURTH CIRCUIT

REPLY BRIEF FOR PETITIONERS AND CROSS-RESPONDENTS

Preliminary Statement

The respondents and cross-petitioners (hereinafter school board) seek to pose the issue in this case of whether a school board may continue to operate one or more pre-

dominantly black schools. We feel that the issue is more properly posed in the decision of the district court below, namely, whether in the context of the facts developed in this case, the pervasive role of the state and its agencies in creating and perpetuating a racially segregated system, a school board may continue to deny equal educational opportunities to black children on the pretext of preserving "neighborhood schools" or avoiding transportation of students when a feasible alternative is available for complete desegregation. This reply is addressed to the activities and practices of the state, particularly those of the school board, which produced the segregated system which the district court sought to eliminate; the feasibility and practicability of the plan directed by the court; and the fact that the school board and the various amici who have submitted briefs in this matter suggest no viable alternative rule of law to that adopted by the district court and advocated by the petitioners herein. We also discuss the possible applicability of the decision of the Court in this case to other jurisdictions and the applicability of §§401(b) and 407(a) of the Civil Rights Act of 1964, 42 U.S.C. §2000c(b) and 42 U.S.C. §2000c-6(a).

For the Court's information we are attaching as an appendix to this reply a copy of the interim report filed by the school board showing the results of desegregation for the present school term under the plan directed by the district court. As the report demonstrates the plan eliminates all racially identifiable schools in the system with the exception of 3 elementary schools and as to these 3 schools some steps are now being taken in order to alleviate the overcrowded conditions and to prevent resegregation.

ARGUMENT

I.

The Charlotte-Mecklenburg County Schools Were Segregated by Unconstitutional Governmental Action.

The School Board and several amici[1] challenge for the first time the district court's findings of state created and perpetuated racially segregated housing and public schools.[2] They contend that the admitted segregation is merely adventitious. The record, however, clearly demonstrates the contrary. As the district court stated in its Memorandum Opinion of November 7, 1969, segregation of the races in the Charlotte-Mecklenburg system is not "constitutionally benign."

> In previous opinions the facts respecting [the location of schools] . . . their controlled size and their popu-

---

[1] See, e.g., Amicus Curiae Brief for the Classroom Teachers Association of the Charlotte-Mecklenburg School System, Incorporated, pp. 20-21.

[2] The Commonwealth of Virginia suggests that such inquiry is irrelevant. See, e.g., Brief for the Commonwealth of Virginia, Amicus Curiae, pp. 8-10. The district court found, however, that the varied actions of the state, including the School Board, had resulted in racially segregated schools as condemned in *Brown* v. *Board of Education*, 347 U.S. 483 (1954), 349 U.S. 294 (1955); that inquiry into the forces of the state creating or perpetuating racial discrimination were indeed appropriate and required by decisions of this Court; see, e.g., *Burton* v. *Wilmington Parking Authority*, 365 U.S. 715 (1961), for the Fourteenth Amendment prohibits "State support of segregated schools through any arrangement, management, funds, or property." *Cooper* v. *Aaron*, 358 U.S. 1, 19 (1958). This Court further stated in *Cooper*, supra at 17: "In short, the constitutional rights of children not to be discriminated against in school admission on grounds of race or color declared by this Court in the Brown case can neither be nullified openly and directly . . . nor nullified indirectly . . . through evasive schemes for segregation whether attempted 'ingeniously' or 'ingenuously.'" Finding state imposed segregation and a feasible means to correct it, the district court was obligated by the Constitution to enforce the constitutional rights of the black children of this school system.

lation have already been found. Briefly summarized, these facts are that the present location of white schools in white areas and of black schools in black areas is the result of a varied group of elements of public and private action, all deriving their basic strength originally from public law or state or local governmental action. These elements include among others the legal separation of the races in schools, school buses, public accommodations and housing; racial restrictions in deeds to land; zoning ordinances; city planning; urban renewal; location of public low rent housing; and the actions of the present School Board and others, before and since 1954, in locating and controlling the capacity of schools so that there would usually be black schools handy to black neighborhoods and white schools for white neighborhoods. There is so much state action embedded in and shaping these events that the resulting segregation is not innocent or "de facto," and the resulting schools are not "unitary" or desegregated.[3] (657a, 661a-662a).

---

[3] Contrary to the board's assertion (see Briefs of Respondents and Cross-Petitioners, p. 46), this finding did not constitute a reversal of the previous findings of the court; rather it was at this point that the court was pointedly advised by the board, that the board had no intention of complying with the directives of the court. The district court has described its painstaking, patient, but unsuccessful efforts to encourage the board to discharge its affirmative duty to desegregate. (See Supplemental Memorandum 1221a-1238a). It was the board's recalcitrance which led Judge Sobeloff to note in dissent that "this Board, through a majority of its members, far from making 'every reasonable effort' to fulfill its constitutional obligation, has resisted and delayed desegregation at every turn." (No. 9, 1291a-1293a) Moreover, the record clearly demonstrates that the constitutional violations which the district court sought to remedy resulted not just from practices of other governmental agencies but to a large extent from the board's conduct and action in locating and controlling schools, school sites, capacities, attendance districts, etc., all taken in conjunction with and in furtherance of the developing racial housing patterns, both before and after this Court's decision in *Brown*.

We discuss below some of the record evidence supporting these findings.

In the district court's findings of April 23, 1969 (285a, 296a), the court described Charlotte and Mecklenburg County as follows:

> The central city may be likened to an automobile hubcap, the perimeter area to a wheel, and the county area to the rubber tire. Tryon Street and Southern Railroad run generally through the county and the city from the northeast to the southwest. Trade Street runs generally northwest to southeast and crosses Tryon Street at the center of town at Independence Square. Charlotte originally grew along the Southern Railroad tracks. Textile mills with mill villages, once almost entirely white, were built. Business and other industry followed the highways and the railroad. The railroad and parallel highways and business and industrial development formed something of a barrier between east and west.
>
> By the end of World War II many Negro families lived in the center of Charlotte just east of Independence Square in what is known as the First Ward-Second Ward-Cherry-Brooklyn area. However, the bulk of Charlotte's black population lived west of the railroad and Tryon Street and north of Trade Street in the northwest part of town. The high-priced, almost exclusively white, country was east of Tryon Street and south of Trade in the Myers Park-Providence-Sharon-Eastover area. Charlotte thus had a very high degree of segregation of housing before the first Brown decision.

Today, the degree of segregation in housing is even more pronounced. Some of the factors which have contributed to the school segregation follow:

1. *Location and control of schools.* Prior to 1954 all public schools in the City of Charlotte and Mecklenburg County were segregated pursuant to the state law and Constitution.[4] The district court attached as an Exhibit to its Memorandum of Decision and Order of August 3, 1970 a collection of segregation codes of the state which, as indicated by the Memorandum Decision (Br. A4), remained in the state statutes as late as 1969. Schools were located and students and staff personnel were assigned to the various schools on the basis of race. Subsequent to the *Brown* decision and prior to the institution of this proceeding no affirmative steps were taken by the board to disestablish the racially segregated system. Some token integration did take place under the North Carolina Pupil Assignment Act, N. C. Gen. Stat. §115-176, pursuant to which a few black students requested transfer to previously all-white schools. The school board, however, continued to locate and control the various capacities of schools in order to maintain racial segregation.[4a] These practices have continued even through the present day.

In conjunction with the racially developing residential patterns, the school board built or made additions to the following schools subsequent to 1954 solely to accommodate black students.

---

[4] Separate boards governed the city and county schools until 1961, at which time the two school units were merged.

[4a] The board controlled grade structures to maintain segregation. In 1965 the system had a basically 6-3-3 grade structure, except that some black schools had different patterns to facilitate racial segregation such as grades: 1-4, 1-7, and 5-9, for example. (See Appellants' Appendix in 1966 appeal to the 4th Circuit, No. 10207, pp. 25-29).

Schools	Year of Construction	Years of Additions
Burns	1968	
Marie Davis	1951	1953 1957 1959
Double Oaks	1952	1955 1965
Druid Hills	1960	1964
First Ward	1912	1950) 1961) 1968) practically complete new facilities.
Lincoln Heights	1956	1958
Oaklawn	1964	
University Park	1957	1958 1964

(Plaintiff's Exhibit 1 in original record; 124a-132a)[5]

Several white schools were built in white areas and predictably enrolled only white students:

Schools	Year of Construction
Devonshire	1964
Albemarle Road	1968
Beverly Woods	1969

These examples are not meant to be exclusive but only exemplary of the practices followed by the board prior

---

[5] "Q. Dr. Self, when you built schools since 1954, what efforts did you make, other than what you testified to yesterday, to locate the schools in an area that would effect the greatest maximum integration of students in the system? A. The schools were located in such a way as to house the youngsters, Mr. Chambers, not to effect a maximum amount of integration.

"Q. You did not attempt to do it? A. We made an attempt to house the youngsters in the neighborhood." (132a)

• • •

"Q. And I think that on your drawing board right now are plans to build more schools that are going to be all white and some that will be all black. A. I'm sure that the enrollment in the schools will be affected by the neighborhood served." (129a)

to and since *Brown*. (Plaintiffs' Ex. 1 in original record; 127a-129a). Even at the time of the March 1969 hearing the board was proceeding with construction of a new junior high school (Carmel Road) which under the board's most recent attendance zone plan would have been 100 per cent white (512a (designated "Project 600"), 747a).

Additionally, the board has added mobile units in order to accommodate any influx of black or white students in the segregated schools rather than redraw attendance districts and assign either black or white students to schools of the opposite race (Pls'. Ex. 1 in original record). Defendants have controlled school districts in order to limit the race of students assigned to the various schools (Compare Pls'. Exs. 1, 4, 24). As the court noted in its Opinion and Order of June 20, 1969:

> "[I]t may be timely to observe and the court finds as a fact that no zones have apparently been created or maintained for the purpose of promoting desegregation; that the whole plan of 'building schools where the pupils are' without further control promotes segregation; and that certain schools, for example Billingsville, Second Ward, Bruns Avenue and Amay James obviously serve school zones which were either created or which have been controlled so as to surround pockets of black students and that the result of these actions is discriminatory. These are not named as an exclusive list of such situations, but as illustrations of a long standing policy of control over the makeup of school population which scarcely fits any true 'neighborhood school' philosophy." (455a-456a) (see also note 5, supra; 132a).

Transportation has been arranged for students in order to perpetuate segregation. Even through the 1964-65 school year, the board continued racially overlapping bus routes.

For students in the city and its immediate environs, black schools have been located within convenient walking distance of black residential areas. White schools have generally been located in outlying white residential areas necessitating bus transportation. Thus of the 23,384 students provided transportation during the 1969-70 school year only 541 of such students were transported to black schools (1014a-1032a, 1203a-1204a). Coupled with these practices the school board continued freedom of choice to permit those students enclosed within school districts of the opposite race to transfer to other schools where their race would be in the majority.

2. *Urban Renewal.* Urban renewal has contributed to the residential segregation by relocating black families from urban renewal areas to black residential areas or areas rapidly changing to black. Principally, all of the black families relocated by the city urban renewal programs, principally all of which have taken place since 1960, have been relocated in black residential areas and the few white families who have been relocated have been relocated in white residential areas. A similar practice has prevailed in the relocation of families uprooted by new streets and highways (209a-214a, 282a-283a; Plaintiffs' Exhibit 42). The court characterized this practice as follows:

> Under the urban renewal program thousands of Negroes were moved out of their shotgun houses in the center of town and have relocated in low rent areas to the west. This relocation of course involved many ad hoc decisions by individuals and by city, county, state and federal governments. Federal agencies (which hold the strings to large federal purses) reportedly disclaim any responsibility for the direction of the migration; they reportedly say that the selection of urban renewal sites and the relocation of dis-

> placed persons are matters of decision ("freedom of choice"!) by local individuals and governments. This may be correct; the clear fact however is that the displacement occurred with heavy federal financing and with active participation by local governments, and it has further concentrated Negroes until 95% or so of the city's Negroes live west of the Tryon-railroad area, or on its immediate eastern fringe (297a-298a).

The record demonstrates, however, that even this relocation did not afford the affected families a "free" choice for, as indicated below, homes in other areas were simply not available to black families (Plf. Exhs. 14, 19, 42 in the original record; 28a-64a, 208a-215a, 282a-283a). Moreover, with the overcrowding of schools which resulted from the relocations, the school board simply added additional rooms to existing black schools to accommodate the black students.

3. *Public Housing.* Consistent with the city's zoning practices of locating multi-family and low income housing in black residential areas, all public housing, built principally since 1960 and now generally occupied by blacks, has been located in black residential areas. Even projected public housing has been designated for black residential areas (Plf. Exhs. 14, 19, 29 and 42 in original record; 215a-217a). The effects of such practices in perpetuating segregated housing is seen even in the most recent plan directed by the district court where three of the elementary schools and one of the junior high schools, projected to be predominantly white, have since the beginning of this school year become predominantly black because of the relocation of additional black families in federally financed, low-income housing in black residential areas of the four school districts (Reply Brief App. 10a-15a).

4. *City Zoning.* City zoning has influenced separation of the races by marking out and designating by land usage those areas of the city occupied by blacks and those occupied by whites. Beginning in 1947, the city enacted its first zoning ordinance and in effect delineated the black and white residential areas. All white residential areas were zoned residential with restricted land usage. All black residential areas, with the exception of two small pockets adjacent to white residential areas, were zoned industrial for multi-land usage, including heavy industry, multi-family homes and high density areas. Even the two excepted black areas were zoned for higher density use than the white residential areas (174a, 202a-207a, 251a, 268a, 272a-283a). This difference in zoning practices for black and white residential areas has been carried forward to the present day in the major revisions of the zoning ordinance in 1962.

Industrial zones have continued to be restricted to black residential areas. Additionally, the residential zoning authorized for the black areas in the 1962 zoning ordinance has been limited to high density zones, R-6 and R-9 requiring 6,000 square feet and 9,000 square feet, respectively, for a single family home. No black residential area in the City today has a higher density zoning than R-9 while principally all white residential areas have restricted zoning of R-12, R-15 or above (206a-208a; Plf. Exh. 10 in original record (maps showing present zoning for city of Charlotte)). As testified by plaintiffs' witness during the March 1969 hearing, the effect of such zoning makes the land in the black residential areas accessible to other uses; permits the rapid deterioration of the quality of the land—"and this is clearly evident from the amount of industrial development which has taken place in areas of Negro residences;" reduces the housing value; and introduces blighted and noxious usages into the area (204a).

It delineates for governmental and private developers, school officials and home buyers and renters those areas of the city for blacks and those for whites.

5. *City Planning.* City planning has further enforced segregation in housing. In a comprehensive proposal in 1960 entitled "The Next Twenty Years" (Plf. Exh. 12 in the original record), the City Planning Commission proposed the continuation of basically the same racially discriminatory zoning practices with high density and multi-land usage in black residential areas and restricted zoning in the white residential areas. While the proposal itself, absent approval by the City Council, should have no controlling effect, it nevertheless provided the blueprint for developers of what land usage would be permitted in the future. As plaintiffs' witness testified:

> The only elements of the plan which develop any compelling force are those elements which relate to facilities or land uses which are normally provided by government, things such as roads, or public buildings. Quite naturally, the development of residential or industrial land is subject to the decision-making of private developers within, of course, whatever the legal constraints are which the city imposes. But the plan very definitely sets a direction in the recoommendations which it develops and it's those recommendations which are particularly significant in this case (188a).
>
> • • •
>
> This planning document ["The Next Twenty Years"] was developed in 1960 so that this is the major impact. The secondary effect of this document is the proposed interstate highway system and the major arterial streets in the Charlotte area. And again one can see that the major north-south route—I-77—tends to reinforce this north-south division by running adjacent

to and parallel to the industrial band which runs through the city [separating the black residential area on the west from the white residential area on the east] (195a, 196a).

The Planning Commission's proposal was largely enacted by the City Council in the revised zoning code of 1962 (202a, 220a).

6. *Streets and Public Highways.* Streets and public highways have perpetuated barriers between the races. Streets have been designed to provide ease of communication only within the separate white or black residential areas with little means of communication between them. Additionally, one of the major federally financed interstate routes now being constructed through the city, the North-South Expressway (I-77), further marks, along with the Tryon Street-Southern Railroad, the division between the racially separate areas (195a, 216a-217a; Plf. Exh. 13 in original record).

7. *Private Discrimination.* Private discrimination has been pervasive in establishing and perpetuating the racially segregated housing that exists in the city. Blacks simply have been denied access or the right to purchase or rent in white residential areas. Construction firms and real estate agents and banking institutions, including the federal government, have planned and developed racially segregated areas. As the court below noted (1264a), such developments were perpetuated by racially restrictive covenants which were enforced by the North Carolina Supreme Court until this Court's decision in *Shelley* v. *Kraemer*, 334 U.S. 1 (1948). See, e.g., *Phillip* v. *Wearn*, 226 N.C. 290, 37 S.E. 2d 895 (1946); *Eason* v *Buffaloe*, 198 N.C. 520, 152 S.E. 496 (1930); *Vernon* v. *R. J. Reynolds Realty Co.*, 226 N.C. 58, 36 S.E. 2d 710 (1946). Such developments have been followed by the school board with con-

struction of new schools "to house the youngsters in the neighborhood." (132a) Black areas or developments have been purposely located west of the Tryon Street-Southern Railroad dividing line and white developments on the east side of the dividing line. Prior to the 1968 Civil Rights Act, 42 U.S.C. §§3601 et seq., real estate agents were bound by their code of ethics to perpetuate this policy of discrimination (Plf. Exhs. 33, 34, 35, 36 in original record; 28a-57a, 282a-283a). Limitations on the ability and freedom of blacks to purchase and rent homes in other areas of the city continue today.[6]

The school board now proposes to engraft on this segregated system, district and housing pattern zones which would leave the majority of the black and white students in racially segregated schools (See projected enrollment under board's plan of February 2, 1970, 744a-748a). The pervasiveness of the state practices in creating and perpetuating the housing patterns and segregated schools is no different than the former constitutional provisions compelling racial separation in public schools. It is clearly illusory to contend otherwise for the black students in the all black and predominantly black schools would be locked into those schools just as effectively and with as much state control as they were under the former compulsory system rejected in *Brown.* Cf. *Brewer* v. *School Board of City of Norfolk,* 397 F.2d 37, 41-42 (4th Cir. 1968). The district court addressed this problem in its Memorandum Decision and Order of August 3, 1970.

> "The principle difference between New Kent County, Virginia, and Mecklenburg County, North Carolina, is

[6] A black family which moved into a home in a white residential area of the city on September 4, 1970 was intimidated and threatened repeatedly and nightriders fired shotgun blasts into their home while the family was asleep. *Charlotte Observer,* Sept. 5, 1970, at 1A.

that in New Kent County the number of children being denied access to equal education was only 740, whereas in Mecklenburg that number exceeds 16,000. If *Brown* and *New Kent County* and *Griffin* v. *Prince Edward County* and *Alexander* v. *Holmes County* are confined to small counties and to "easy" situations, the constitutional right is indeed an illusory one. A black child in urban Charlotte whose education is being crippled by unlawful segregation is just as much entitled to relief as his contemporary on a Virginia farm." (Br. A10)

Additionally, the court noted that the issue involved here is not the validity of a "system" but the *rights* of individual people:

> If the rights of citizens are infringed by the system, the infringement is not excused because in the abstract the system may appear valid. "Separate but equal" for a long time was thought to be a valid system but when it was finally admitted that individual rights were denied by the valid system, the system gave way to the rights of individuals." (Br. A13)

The court again noted that "the essence of the *Brown* decision is that segregation implies inferiority, reduces incentive, reduces morale, reduces opportunity for association and breadth of experience, and that segregated education itself is inherently unequal." (Br. A15)

Testing results which the court had noted in previous orders (see Order of August 15, 1969, 579a, 586a-590a; Opinion and Order of December 1, 1969, 698a, 702a-706a; Supplemental Findings of Fact of March 21, 1970, 1198a, 1206a) further substantiated the adverse effect that racially segregated schools have on black children in the Charlotte-Mecklenburg school system.

It was this record of state imposed segregation which led the court to reject any finding of de facto or constitutionally benign racially segregated schools and housing in the Charlotte-Mecklenberg system. The Fourth Circuit held these findings to be "supported by the evidence" and accepted "them under familiar principles of appellate review." (264a).

It is these facts and findings which required that appropriate steps be taken by the school board to disestablish the state imposed segregated system.

Several lower court decision have held that school officials under these circumstances may not perpetuate segregated schools under the guise of a neighborhood system. *Henry* v. *Clarksdale Municipal Separate School District*, 409 F.2d 682 (5th Cir. 1969) *cert. den.* 396 U.S. 940 (1969); *United States* v. *Greenwood Municipal Separate School District*, 406 F.2d 1086 (5th Cir. 1969) *cert. den.* 395 U.S. 907 (1969); *United States* v. *Indianola Municipal Separate School District*, 410 F.2d 626 (5th Cir. 1969), *cert. den.* 396 U.S. 1011 (1970); *Valley* v. *Rapides Parish School Board*, 423 F.2d 1132 (5th Cir. 1970); *United States* v. *Board of Education of Baldwin County*, 423 F.2d 1013 (5th Cir. 1970); *Mannings* v. *Board of Public Instruction of Hillsborough County*, 427 F.2d 874 (5th Cir., No. 28643, May 11, 1970); *Ross* v. *Eckels*, —— F.2d —— (5th Cir. No. 30080, Aug. 25, 1970); *Kemp* v. *Beasley*, 423 F.2d 851 (8th Cir. 1970); *United States* v. *School District, 151 of Cook County, Illinois*, 286 F Supp. 786 (N.D. Ill. 1968), *affirmed* 404 F.2d 1125 (7th Cir. 1968); *Dowell* v. *School Board of Oklahoma City*, 244 F. Supp. 971 (W.D. Okla. 1965) *affirmed* 375 F.2d 158 (10th Cir. 1967), *cert. den.*, 387 U.S. 931 (1967); *Keyes* v. *School District No. 1, Denver*, 303 F. Supp. 79 (D. Colo. 1969).

Such holdings are based on the long established principle that a state may not evade the prohibition of the Fourteenth Amendment by engrafting neutral, or otherwise unobjectionable practices upon constitutionally objectionable ones, where the effects would perpetuate constitutional deprivations. See, e.g., *Lane* v. *Wilson*, 307 U.S. 268 (1939); *Commonwealth of Pennsylvania* v. *City of Philadelphia*, 353 U.S. 230 (1957); *Louisiana* v. *United States*, 380 U.S. 145 (1965); *Gomillion* v. *Lightfoot*, 364 U.S. 339 (1960); cf. *Gaston County* v. *United States*, 395 U.S. 285 (1969), affirming 288 F. Supp. 678 (D.D.C. 1968). See also *Coppedge* v. *Franklin County Board of Educ.*, 394 F.2d 410 (4th Cir. 1968), affirming 273 F. Supp. 289 (E.D.N.C. 1967); *Local 189, Papermakers & Paperworkers* v. *United States*, 416 F.2d 980 (5th Cir. 1969); pp. 32-34 Brief Amicus Curiae for the National Education Association.

II.

The Assignment Plan Now in Effect Is Workable and Desegregates the Schools.

The school board urges here that the pupil assignment plan it offered to the district court on February 2, 1970, which has been rejected in every respect by both courts below, should have been approved. We have discussed at some length in our brief on the merits the court directed plan which is now in effect and the majority board plan.[7]

---

[7] The board plan is actually the plan of five of the nine members of the board. Four members of the board offered an alternative plan for the complete desegregation of the system at the July, 1970 hearing. Judge McMillan found that plan acceptable, but the board chose to implement the plan which had been directed on February 5, 1970 (BR. A1 et seq.).

We respond here only to respondents' discussion in support of their plans for junior and senior high schools, matters not directly addressed by our brief on the merits.

The Junior High School Plan. The board's principal attack on the present assignment plan as ordered by the court is that it employs the technique of satellite zones while under the board plan all students would be assigned to a school within a zone which surrounds their school. The board therefore says that its plan maintains the "neighborhood school" concept. The court-ordered plan, it says, does not. We have previously demonstrated that the neighborhood school theory cannot be supported in history and tradition as a justification for continued segregation because it was widely and invariably disregarded in order to promote segregation.[8] Moreover, a comparison of the two plans shows that the board's arguments are entirely spurious.

At the junior high school level the court ordered plan draws zones around the twenty-one schools. In addition some smaller zones (satellites) are made in the black inner-city area which do not surround any schools. The black children in these zones are assigned to nine of the 21 junior high schools;[9] 12 of the schools have no satellites.[10] (See Respondents-Cross Petitioners' Brief Appendix, Map 7.) The board's plan includes no satellites. (See Respon-

---

[8] See Brief for Petitioners, pp. 80-83. See also, Opinion and Order, April 23, 1969, 305a-306a.

[9] There are satellites for Eastway, Cochrane, Wilson, McClintlock, Albemarle Road, Carmel (sometimes referred to as P-600), Smith, Quail Hollow and Alexander Graham (sometimes referred to as "A.G.").

[10] The schools without satellites are: Alexander, Coulwood, Ranson, Northeast (sometimes referred to as J. H. Gunn, Wilgrove or P-601), Williams, Northwest, Spaugh, Kennedy, Sedgefield, Piedmont, Hawthorne and Randolph.

ents'-Cross-Petitioners' Brief Appendix, Map 6.) However, the board would leave 842 black children in Piedmont Junior High, a racially identifiable school (830a). This would nearly double the number of black students at Piedmont from the 1969-70 school year (Ibid). The board's justification for leaving a segregated black junior high school is its adherence to what it calls the neighborhood school concept. We suppose a neighborhood school means that the children who attend the same school are "neighbors." A close examination of the board's maps shows that the white and black children attending the junior high schools are as much "neighbors" under one plan as under the other.

The board zones are drawn so that there are corridors which lead into and include portions of the black community in order to integrate the formerly white schools.[11] Four of the five predominantly black schools were dealt with by extending the zones to include white areas. (Id. Map. No. 6)[11a] Five of the predominantly white schools under the board's plan would remain nearly all-white (830a).[12]

The court ordered plan, on the other hand, eliminates the board's corridors leading from black neighborhoods to white schools and simply assigns the black students to the outlying white schools. In fact, some of the same students residing within satellites of five of the schools would be assigned to the same school under the board plan.[13] Other black children were assigned from satellite

[12] Albemarle Road, McClintock, Quail Hollow and the two schools opened for the 1970-71 year, Carmel (P-600) and Northeast (referred to variously as J. H. Gunn, Wilgrove and P-601).

[13] Smith, Eastway, Cochrane, Wilson, and Alexander Graham (A.G.).

zones in the central city to predominantly white schools not desegregated by the board's plan. Under both plans black children are assigned to outlying schools and white children are assigned to formerly black inner-city schools. The principal difference in technique therefore between the plans is that the court ordered plan does not have connecting corridors between the white schools and the black areas. The principal difference in result is that court's plan is effective, complete and stable while the board's plan is limited, incomplete and is subject to the problems of resegregation.[14] We offer the following additional commitments about the board's connecting corridors and the administrative workability of the plans.

The board's connecting corridors bear no relationship to any conceivable neighborhood concept nor any relationship to any natural landmarks such as major thoroughfares. Therefore, the transportation system would be considerably more complex under the board's plan than under the plan adopted by the court. Judge McMillan emphasized this point in the Supplemental Findings of Fact of March 21, 1970:

> "Two schools may be used to illustrate this point. Smith Junior High under the board plan would have a contiguous district six miles in length extending 4½ miles north from the school itself. The district throughout the greater portion of its length is one-

[14] This is emphasized by the board's Interim Report on Desegregation, of September 23, 1970 (printed as an appendix herein, 10a-15a), which describes a developing problem of resegregation at Spaugh caused by new public housing projects. The board's limiting requirement that all students must reside within a zone surrounding a school would make it impossible to deal effectively with this situation caused by the policies and actions of governmental officials. By using the techniques of the court-ordered plan, the board can control the population at Spaugh so that it does not become a racially identifiable black school.

half mile wide and all roads in its one-half mile width are diagonal to its borders. Eastway Junior High presents a shape somewhat like a large wooden pistol with a fat handle surrounding the school off Central Avenue in East Charlotte and with a corridor extending three miles north and then extending at right angles four miles west to draw students from the Double Oaks area in northwest Charlotte. Obviously picking up students in narrow corridors along which no major road runs presents a considerable transportation problem.

The Finger plan makes no unnecessary effort to maintain contiguous districts, but simply provides for the sending of busses from compact inner city attendance zones, non-stop, to the outlying white junior high schools, thereby minimizing transportation tie-ups and making the pick-up and delivery of children efficient and time-saving. (1210a-1211a).

The district judge's finding was supported by the testimony of the court consultant[15] and the superintendent of schools:[16]

> Dr. Self, the school superintendent, and Dr. Finger, the court appointed expert, both testified that the transportation required to implement the plan for junior highs would be less expensive and easier to arrange than the transportation proposed under the board plan. The court finds this to be a fact. (1210a).

He concluded his analysis of the plan in the following way:

> In summary, as to junior high schools, the court finds that the plan chosen by the board and approved by the

---

[15] 957a-958a.

[16] 803a-804a.

court places no greater logistic or personal burden upon students or administrators than the plan proposed by the school board; that the transportation called for by the approved plan is not substantially greater than the transportation called for by the board plan, that the approved plan will be more economical, efficient and cohesive and easier to administer and will fit in more nearly with the transportation problems involved in desegregating elementary and senior high schools, and that the board made a correct administrative and educational choice in choosing this plan instead of one of the other three methods (1211a-1210a).

The Senior High School Plan. The board also complains about the approval by the courts below of the satellite zone for Independence High School from which 300 black children are assigned to a school which would have had only 23 blacks enrolled under the board plan. Judge Butzner in approving this portion of the plan observed that:

> The transportation of 300 high school students from the black residential area to suburban Independence School will tend to stabilize the system by eliminating an almost totally white school in a zone to which other whites might move with consequent "tipping" or resegregation of other schools (1273a).

He also noted that the non-stop bus trips for these students compares favorably in terms of distance with the transportation of other students assigned to Independence "and is substantially shorter than the systems average one-way trip of 17 miles" (1273a, n. 6).

The distance involved is also substantially equivalent to the distance to be traveled under the board's high school

plan by inner-city black students assigned to South Mecklenburg, East Mecklenburg, and West Mecklenburg and by which students are assigned to the formerly all-black West Charlotte School. (See Respondents-Cross-Petitioners' Brief Appendix, Map No. 8.)

Moreover, the children living within the Independence satellite zone would, under the board's plan, be assigned to Harding and West Mecklenburg high schools serving the area which the board reports is experiencing greater black enrollment than expected at the elementary and junior high school levels because of recently completed public housing.[17] If the 300 black children now going to Independence were, instead, going to Harding and West Mecklenburg, we would expect that the board would be reporting the anticipated resegregation at the high school level which they now expect at Spaugh Junior High School. Spaugh now has a 38.4% black enrollment. Under the board plan the combined enrollment at Harding and West Mecklenburg High Schools would be 39% black.[18] The combined enrollment is now only 31% black. Presumably the forces which the board expects to create resegregation at Spaugh Junior High School, if not corrected, including the anticipated early occupancy of 240 additional public housing units at Little Rock Homes would also have had the same effect upon Harding and West Mecklenburg High School if the district court had not required the assignments to Independence.

---

[17] See appendix to this brief, 10a-15a.

[18] This figure is computed by adding 300 black students to the September 23, 1970 enrollments reported at Harding and West Mecklenburg.

III.

The School Board Proposes No Viable Rule of Law to Define the Goal of a Unitary System.

The board asks this Court to "give instruction and guidance to school boards" as to the requirements of a unitary school system. (Brief of Respondents p. 32; hereinafter referred to as "Brief") They offer, however, no standard or rule which would clarify the law.

The school board's position, as we understand it, is that the legal conclusions drawn by the Fourth Circuit are correct (*Id.* p. 36). The board supports the court's rule of reasonableness (*Ibid.*) which was stated as follows:

> "[S]chool boards must use all reasonable means to integrate the schools in their jurisdictions." (1267a)

The board does not seem to deny that it has some affirmative duty to desegregate.[19] Indeed, it quotes with approval

---

[19] Respondents are not clear as to what they view as their minimal obligations to desegregate. They claim that "In formulating its plan, the Board to a very significant degree has elected to exceed Constitutional requirements" (Brief, p. 80). However, we do not understand them to adopt the position of several of the *amici* that a unitary system is created by engrafting upon a dual school system an ostensibly neutral geographic assignment plan, which leaves racial segregation intact. *Amicus Curiae* Brief for the Classroom Teachers Association of the Charlotte-Mecklenburg School System, Incorporated; *Amicus Curiae* Brief of the State of Florida; cf. *Amicus Curiae* Brief of William C. Cramer, *et al.* Such a position clearly conflicts, we think, with the decisions of this Court in *Brown* v. *Board of Education, supra; Green* v. *Country School Board of New Kent County*, 391 U.S. 430 (1968); *Monroe* v. *Board of Commissioners*, 391 U.S. 450 (1968); *Raney* v. *Board of Education*, 391 U.S. 443 (1968); *United States* v. *Montgomery County Board of Education*, 395 U.S. 225 (1969); *Dowell* v. *Board of Education of the Oklahoma City Public Schools*, 396 U.S. 269 (1969) and *Northcross* v. *Board of Education*, 397 U.S. 232 (1970). The other circuits are in agreement with the court below that a dual school

the conclusion of the court that smaller school districts are required to desegregate completely: "All schools in towns, small cities, and rural areas generally can be integrated by pairing, zoning, clustering or consolidating schools and transporting pupils." (1267a quoted at p. 36, Brief for Respondents).

In our brief on the merits we have criticized the "reasonable means" test (pp. 58-65) on the ground that it is a subjective standard which portends a new era of litigation and which sanctions a great deal of continuing segregation. The board's position underscores what we have said. They would have this Court adopt the rule of the Court of Appeals, but reject its application to the facts of this case. The board thus argues that its affirmative duty to eliminate the vestiges of segregation would be satisfied by its desegregation plan of February 2 (726a-748a) even though more than one-half of the black children would still be attending racially identifiable black schools because it says its plan employs all reasonable means. In concluding their brief, the board asserts that the means they have chosen are reasonable because their choices represent the "value judgments of the elected school board and the educators or its administrative staff" (*Id.*, at 100).

At bottom, the board is arguing that locally elected school boards must be vested with the discretion to determine not only the means but also the extent of desegrega-

---

system is not dismantled by simply drawing zone lines which leave racial segregation in the schools undisturbed. See, e.g., *Henry* v. *Clarksdale Municipal Separate School District supra; Mannings* v. *Board of Public Instruction of Hillsborough County, supra; Ross* v. *Eckels, supra;* see analysis of Fifth Circuit's "Neighborhood School" concept in Brief for Petitioners *Davis* v. *Board of School Commissioners of Mobile County*, O.T. 1970, No. 436; *United States* v. *School District, 151 of Cook County, Illinois, supra; United States* v. *Board of Education, School District No. I, Tulsa, Okla.*, —— F.2d —— (10th Cir. 1970). We therefore do not address further the arguments of the above *amici*.

tion which is to occur within their jurisdictions. This plea for school board discretion is echoed in several *amicus curiae* briefs filed in this case. Brief for the Commonwealth of Virginia, *Amicus Curiae*, p. 27; Brief of the City of Chattanooga, Tenn., *Amicus Curiae*, p. 28; *Amicus Curiae* Brief of David E. Allgood, An Infant etc., *et al.*, p. 13.[20]

If the constitutional rights of black children to a desegregated school are to be left to the best judgments of local school boards, then, of course, many of the legal problems will be solved. A unitary school system would be whatever a local school board determines it to be. It would also, almost inevitably, be a segregated school system. Judge Sobeloff spoke to the matter of school board discretion in his dissent below:

> In making policy decisions that are not constitutionally dictated, state authorities are free to decide in their discretion that a proposed measure is worth the cost involved or that the cost is unreasonable, and accordingly they may adopt or reject the proposal. This is not such a case. Vindication of the plaintiffs' constitutional rights does not rest in the school board's discretion as the Supreme Court authoritatively decided sixteen years ago and has repeated with increasing emphasis (1288a).

The board offers no rule which would resolve the questions which it claims need answers,[21] other than its request that

---

[20] Some of these amici seem also to argue for a "colorblind" test of the variety described in the preceding footnoote.

[21] The State of Florida, Governor Claude R. Kirk, Jr., The Commonwealth of Virginia, The Chattanooga Board of Education, the Concerned Citizens of Norfolk, Virginia and the Classroom Teachers Association of the Charlotte Mecklenburg School System, Inc., as *amici curiae*, join in respondents insistence that there are important questions to be answered. We perceive no viable answers in their

the discretionary decision of school boards be honored by the courts. We cannot believe that these crucial constitutional rights are to be left to a majority vote.

The school board offers no viable definition of a unitary school system. The Fourth Circuit's reasonable means test is "inherently ambiguous" (1289a) and is "a new litigable issue" which, as the board's brief makes clear would be "exploit[ed] . . . to the hilt." (1290a). Petitioners urge this Court to reject the reasonableness test either as announced in the court below or as would be further limited by the school board. The only thing certain about "reasonableness" as a standard in this context is that it sanctions a significant amount of continued segregation in the public schools.

Petitioners find no warrant in *Brown* or its progeny for any standard or test which at the outset assumes that segregation will remain. We submit that a dual school system must be required to reorganize so that *every* black child is to be free from assignment to a racially identifiable "black" school, at every grade of his education. The only exception to this general rule would be where eliminating all black schools is absolutely unworkable.[22] The plan or-

---

submissions. They would either have the Court adopt a "color blind" standard which would leave segregation intact (see note, 20, supra, and accompanying text) or a rule placing great emphasis on school board discretion (see note 19, supra, and accompanying text.)

[22] See the concurring opinion of Mr. Justice Harlan in *Carter* v. *West Feliciana Parish School Board*, 396 U.S. 290, 292 (1970).

See also the dissenting opinion of Judge Sobeloff below:

> Of course it goes without saying that school boards are not obligated to do the impossible. Federal courts do not joust at windmills. Thus it is proper to ask whether a plan is feasible, whether it can be accomplished (1284a).

dered by the district court in this case accomplishes the goal[23] which we urge. And it works.[24]

IV.

The District Court Was Correct in Not Attempting to Declare a General Rule of Law to Govern the Multitude of Varied Circumstances of School Segregation in Other Cities and Other Parts of the United States.

The school board's brief suggests that Judge McMillan relied upon grounds to support his desegregation order which would apply to Chicago (or other large northern cities) as well as to Charlotte-Mecklenburg. The board thereby attempts to precipitate this Court into consideration of the enormously complicated problem that is sometimes termed "de facto" school segregation.[25] The Court is neither required nor able to consider that problem in this case.

Judge McMillan did not base his order on general principles applicable out of the context of classical school segregation under state segregation laws and practices—de jure segregation—nor, indeed, upon broad principles of

---

[23] See Brief for Petitioner, *Davis* v. *Board of School Commissioners of Mobile County*, O. T. 1970, No. 436, pp. 63-49, for a full discussion of the general principle we ask this Court to announce.

[24] See Report, etc., which is printed as an Appendix to this Brief, 4a-9a (showing enrollment in the schools as of September 21, 1970).

[25] We think the labels "de facto" and "de jure" are somewhat unhelpful and confusing because the terminology tends to beg the question at issue, i.e., whether the government is responsible for the segregation to a sufficient extent that the Fourteenth Amendment prohibits its continuance. The terminology tends to assume that there is a distinction between the causes of segregated schools in the North as opposed to the South. That is a question which must in the final analysis be decided in the concrete circumstances of cases which present the issues.

ny sort applied out of the context of the particular school ystem of Charlotte. What Judge McMillan did, as he was legally and realistically obliged to do was to consider ll of the factors in the Charlotte situation that were relevant to determining whether the school board had fulfilled its obligations under *Brown* v. *Board of Education*, 347 U.S. 483 (1954), and, if not, what steps were necessary to require it to fulfill those obligations.

That is also the only question before this Court. Nothing in this case obliges the Court to consider questions of so-called *de facto* segregation, for in this case we deal with an archetype of *de jure* segregation and a question of the proper remedies for it.

Prior to 1954, public schools in Charlotte-Mecklenburg were segregated pursuant to the state constitution and laws of North Carolina. Judge McMillan's opinion of August 3, 1970, attaches as an appendix the elaborate code of segregation laws adopted in North Carolina, including about sixty-five sections of the General Statutes and two sections of the Constitution. (This exhibit of the segregation laws has not been printed in the appendices, but is contained in the original record attached to the opinion of August 3, 1970.) Under this segregation code racial segregation of pupils and faculties and all aspects of the system was complete. A dual system of schools for whites and Negroes was maintained throughout the state under the compulsion of these laws. As Judge McMillan has noted many of these laws were still on the books in North Carolina when his April 23, 1969, opinion was written, although many were repealed thereafter by the 1969 General Assembly.

Although segregation in schools was unconstitutional from 1954 to 1970, as a practical and a legal matter, racial segregation has continued in the Charlotte-Mecklenburg

schools through the 1969-1970 school year. The board maintained until June 1969 a pupil assignment system based on geographic zones and freedom of transfer which was substantially the same as that held unconstitutional by this Court in *Monroe* v. *Board of Commissioners of Jackson, Tenn.*, 391 U.S. 450 (1968). Thus Judge McMillan found last year that the 9,216 pupils "in 100% black situations are considerably more than the number of black students in Charlotte in 1954 at the time of the first *Brown* decision" (661a). Judge McMillan has been addressing a problem of how to desegregate all-black schools in Charlotte which remained in the pre-1954 pattern.

In determining whether the promise of *Brown I* that such segregation would be eliminated "root and branch" is applicable, Judge McMillan and this Court should properly give weight to the impact of all factors which operate within the school system of Charlotte-Mecklenburg to bring about its present condition or enable its change. It was for this reason that Judge McMillan considered—and we invite this Court to consider—such matters as housing demographic patterns effected by public housing, urban renewal, city zoning, racial restrictive covenants enforced by state laws, and by school planning decisions (school location, school size, grade structure, school attendance areas, etc.). All of these factors are related in determining the school system that Charlotte has today, and in appraising whether it meets the requirements of a desegregated system. Judge McMillan recognized, as this Court must, that the present system is the result of many factors. For example, decisions about whether to build schools, where to build schools, and the capacity of the schools to be built, shape neighborhood and demographic patterns over many years. Now that the schools have shaped the neighborhood, Judge McMillan reasonably took the view that a school system was not meeting its obligation to desegregate if it

now permitted the neighborhoods to shape the schools. The neighborhoods to which respondents advert as the basis of the "neighborhood school principle" are themselves the product of state planning and state action of many sorts, by the board of education and other state organs over many years. One can no more say that a neighborhood school principle in this setting achieves desegregation because it is "color blind" than one could sustain the operation of "color blind" Grandfather Clauses used by many states to perpetuate voting discrimination after this Court voided more obvious forms of denying black citizens the franchise. *Lane* v. *Wilson*, 307 U.S. 268 (1939).

But this does not mean that any of the factors considered by Judge McMillan here urged on this Court would have the same significance in another context, particularly with relation to a different question: for example, the question whether the City of Chicago has an unconstitutionally segregated school system in the first instance. This Court should be exceedingly cautious in indulging the assumption suggested by respondents that Chicago does pose the same —or indeed a different—problem than does Charlotte. We simply do not know, respondents do not know, and the Court does not know what problems Chicago may pose. One thing that the Court does know is that school desegregation problems are very complex, and arise against the full, complicated factual situations in different localities. What appears to be "de facto" in one context may be "de jure" in another. It is wholly inappropriate for the Court to decide this case in light of fears or concerns as to how problems in Chicago might be resolved, when there is not now a record before the Court suggesting either what the issues in Chicago might be or what the full set of complicated factual circumstances in Chicago, relevant to those issues, are.

V.

The Civil Rights Act of 1964 Does Not in Any Way Limit the Power of the Courts to Fashion Remedies for Unconstitutional Racial Segregation in Public Schools or Prohibit the Courts from Requiring Busing of Pupils to Disestablish Dual Segregated School Systems.

The school board and some of the *amicus curiae* have argued that two provisions of the Civil Rights Act of 1964—sections 401(b) and 407(a), codified as 42 U.S.C. §§2000c(b)[26] and 2000c-6(a)[27]—justify reversal of the dis-

---

[26] §2000c. *Definitions*

As used in this subchapter—

* * *

(b) "Desegregation" means the assignment of students to public schools and within such schools without regard to their race, color, religion, or national origin, but "desegregation" shall not mean the assignment of students to public schools in order to overcome racial imbalance.

Pub.L. 88-352, Title IV, §401, July 2, 1964, 78 Stat. 246.

[27] §2000c-6. *Civil actions by the Attorney General—Complaint; certification; notice to school board or college authority; institution of civil action; relief requested; jurisdiction; transportation of pupils to achieve racial balance; judicial power to insure compliance with constitutional standards; impleading additional parties as defendants*

(a) Whenever the Attorney General receives a complaint in writing—

(1) signed by a parent or group of parents to the effect that his or their minor children, as members of a class of persons similarly situated, are being deprived by a school board of the equal protection of the laws, or

(2) signed by an individual, or his parent, to the effect that he has been denied admission to or not permitted to continue in attendance at a public college by reason of race, color, religion, or national origin,

and the Attorney General believes the complaint is meritorious and certifies that the signer or signers of such complaint are

trict court's desegregation plan. The board's brief argues that the Civil Rights Act of 1964 "expressly prohibits a United States Court to order transportation to achieve racial balance in schools" (School Board brief herein, Argument I.-E-4). This audacious effort to convert the Civil Rights Act into a sword against school desegregation has been rejected by every court of appeals which has been confronted with the argument, including the decision below by Judge Butzner (A. 1274a). See petitioners' brief herein at pp. 65-66 and cases cited. Judge Butzner concluded for the court below:

> Those provisions are not limitations on the power of school boards or courts to remedy unconstitutional segregation. They were designed to remove any implication that the Civil Rights Act conferred new jurisdiction on courts to deal with the question of whether

---

unable, in his judgment, to initiate and maintain appropriate legal proceedings for relief and that the institution of an action will materially further the orderly achievement of desegregation in public education, the Attorney General is authorized, after giving notice of such complaint to the appropriate school board or college authority and after certifying that he is satisfied that such board or authority has had a reasonable time to adjust the conditions alleged in such complaint, to institute for or in the name of the United States a civil action in any appropriate district court of the United States against such parties and for such relief as may be appropriate, and such court shall have and shall exercise jurisdiction of proceedings instituted pursuant to this section, provided that nothing herein shall empower any official or court of the United States to issue any order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another or one school district to another in order to achieve such racial balance, or otherwise enlarge the existing power of the court to insure compliance with constitutional standards. The Attorney General may implead as defendants such additional parties as are or become necessary to the grant of effective relief hereunder.

* * *

Pub.L. 88-352, Title IV, §407, July 2, 1964, 78 Stat. 248.

school boards were obligated to overcome *de facto* segregation (1274a).

The board's argument is entirely untenable because it is in conflict with the plain language of the Civil Rights Act and with the legislative purpose of the Congress.

The language of section 407(a) makes it clear that the relevant proviso was added merely to insure that the law was not interpreted to enlarge the powers of the federal courts. There is no language in the section which *prohibits* the courts from doing anything. Section 407 authorizes the attorney general to institute school segregation cases in the name of the United States in the federal courts upon receiving complaints of aggrieved citizens that they were "deprived by a school board of the equal protection of the laws." The section provides that the United States may sue "for such relief as may be appropriate" and that the appropriate district courts "shall have and shall exercise jurisdiction of proceedings instituted pursuant to this section." Immediately after this grant of jurisdiction over suits brought by the attorney general, section 402 states the proviso that the board relies on, which says that nothing therein empowers any official or court of the United States "to issue any order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another or one such school district to another in order to achieve such racial balance, *or otherwise enlarge* the existing power of the court to insure compliance with constitutional standards" (emphasis added).

There is simply nothing in this language that prohibits the federal courts from doing anything. It certainly does not forbid anything the courts find necessary to "insure compliance with constitutional standards" (section 407).

The whole purpose of §407 is to enable the federal government to institute suits to "further the orderly achievement of desegregation in public education" by enforcing the Equal Protection Clause through suits in the federal courts.

The proviso applies only to suits instituted pursuant to the section—that is, where the federal courts exercise the jurisdiction conferred to entertain school desegregation cases instituted by the attorney general. The provision has no application whatsoever to this Charlotte school case which was not instituted by the attorney general but was filed by petitioners who invoked the district court's jurisdiction under 28 U.S.C. §1343 to enforce their rights under 42 U.S.C. §1983 and the Fourteenth Amendment. The United States is not even a party to this case. Section 409 of the Act (42 U.S.C. §2000c-8) provides that "Nothing in this title shall affect adversely the right of any person to sue for or obtain relief in any court against discrimination in public education or in any facility covered by this title." Thus, the Congress made plain that any limitation placed on suits brought by the attorney general would not "adversely affect" suits brought by private litigants.

But even assuming arguendo that the section does apply to suits initiated by private citizens seeking desegregation, there is nothing in the language or in the legislative history which suggests that it was the purpose of the Congress to restrict the power of the federal courts in deciding constitutional issues in school desegregation controversies. On the contrary, Senator Humphrey, the manager of the bill in the Senate (where the provision originated), explained its purpose quite clearly. His statement dispels any possibility of ambiguity about the purposes of the proponents of the provision:

> Mr. Humphrey. Mr. President, this matter requires a statement. Therefore, I take this time to state, for

the proponents of the bill, that the language of title IV which provides that nothing in the title shall empower any Federal court or official to issue an order requiring the transportation of school children to correct racial imbalance in the schools has been the subject of considerable discussion. This provision of title IV recognizes that the problems of racial imbalance and school transportation are presently the subjects of considerable court consideration and local administrative action, as well as a great deal of discussion, often heated, among parents and educators. In some instances, courts have decided that racial imbalances may constitute a denial of equal protection of the laws. *Balaban* v. *Rubin,* 32 U.S. L.W. 2465; *Blocker* v. *Board of Education,* 32 U.S. L.W. 2465; *Jackson* v. *Pasadena School Board,* 382 F.2d 878. On the other hand, relief has been denied on the grounds that school racial imbalance resulting from de facto segregation is not per se unconstitutional. *Bell* v. *City of Gary,* 324 F.2d 309, certiorari denied, 32 U.S. L.W. 3384. Some communities are attempting to correct racial imbalances by the transporting of children; others refuse to do so. The purpose of the pending Dirksen-Mansfield-Humphrey-Kuchel substitute is to make clear that the resolution of these problems is to be left where it is now, namely, in the hands of local school officials and the courts. This bill is made neutral on the resolution of these problems by the language of title IV. It is to be used as the vehicle to require transportation to correct racial imbalances; it is not to be used as an excuse for local officials to refuse to carry out their obligations. Obviously this provision could not affect a court's determination concerning racial imbalance and possible corrective measures; this is dependent upon the court's interpretation of the 14th amendment.

As floor manager of this legislation, I wish to note
e intention of those who sought to deal with the vex-
g problem of de facto segregation through the lan-
uage contained in Dirksen substitute amendment.

s it is entirely clear that the Congress intended to
utral on the question whether racial imbalances vi-
l the Fourteenth Amendment and to leave that and
d questions about transportation for the courts to
e in interpreting the Constitution. We have studied
ntire legislative history of the provision, including all
natters cited by the board and the amici curiae, and
nd that quite simply there is nothing which indicates
the Congress sought to limit the power of the federal
ts to interpret the Constitution and apply the doctrine
rown v. *Board of Education*, 347 U.S. 483 (1954). The
artment of Justice reached the same conclusion in a
iled memorandum filed in November 1969 in fourteen
ol cases submitted before the Fifth Circuit sitting *en*
c. We quote at length from the Justice Department
ly of the legislative history in the margin below.[22]

---

[22] See Memorandum of the United States filed in *Singleton* v. *kson Municipal Separate School District*, 5th Cir., No. 26285 d other en banc school cases), 419 F.2d 1211 (5th Cir. 1969), ersed as to desegregation delay *sub nom. Carter* v. *West Felici- Parish School Board*, 396 U.S. 290 (1970). The following mmary appears at pp. 5-8 of that Memorandum:

"Summary

"The meaning of the proviso in section 407(a) regarding transportation and of the qualifying language in section 401(b) depends upon the phrase 'racial imbalance.' The latter phrase was used, in a different context, in the original version of H.R. 7152, the bill which became the Civil Rights Act of 1964. The bill as introduced provided that the Commissioner of Education could award grants and render technical assistance to (1) school districts undergoing desegregation and (2) districts faced with problems of racial imbalance. The authority of the

Lengthy discussions in some of the amicus briefs about what Congress meant by the statutory term "racial balance" are essentially beside the point because—whatever that phrase may mean—Congress has not *prohibited* the courts from doing anything with respect to "racial balance."

There is even less reason to think that section 401(b) has anything to do with this case. The definition of "de-

---

Attorney General to initiate lawsuits was limited to actions to achieve desegregation.

"During hearings on the bill before a House subcommittee, the term 'racial imbalance' was equated with de facto segregation, the situation existing in a city where, solely because of residential patterns, certain schools were attended largely by members of one race. Some members of the subcommittee expressed opposition to Federal action with regard to de facto segregation. The bill as reported by the House Judiciary Committee deleted the references to 'racial imbalance.' Thus, both the authority of Commissioner of Education to render assistance and the authority of the Attorney General to bring suit were limited to desegregation.

"Despite the removal of references to 'racial imbalance,' Congressman Cramer offered and the House adopted an amendment adding to the definition of 'desegregation' in section 401(b) the statement that '"desegregation" shall not mean the assignment of students . . . in order to overcome racial imbalance.' Congressman Cramer wished to make clear that Title IV was not to apply to de facto segregation. The purpose of Title IV was to implement the Fourteenth Amendment.

"In the Senate, as in the House, the proponents of the bill stated that Title IV was intended to reach unconstitutional state action and that it would not affect racial imbalance in schools which resulted exclusively from housing patterns. The compromise bill offered in the Senate, which was ultimately enacted, added to section 407(a) the proviso concerning 'racial balance.' The purpose of the change was to reemphasize that the Congress was not authorizing Federal intervention, e.g., requiring busing, with respect to school systems which were in compliance with the Fourteenth Amendment.

"Senator Humphrey, the floor manager for the bill, and other members of Congress expressly recognized that the provisions of Title IV would not affect judicial construction of the Fourteenth Amendment.

segregation" in section 401(b) provides a meaning for the term "as used in this title"—or in the code: "as used in this subchapter." The reference is to Title IV of the Act which, in addition to authorizing suits by the attorney general (as indicated above in the discussion of section 407), does nothing else except authorizing activities of the Commissioner of Education: to conduct a survey and make a report on the lack of educational opportunities (section 402), to grant technical assistance to school boards and other units implementing "desegregation" of public schools (section 403), to conduct training institutes (section 404), and to make financial grants to school boards for dealing with desegregation problems (section 405). Thus the definition of desegregation in Title IV has only to do with suits by the attorney general (and he is authorized to enforce the equal protection guarantee) and the activities of the Commissioner of Education. None of this has anything to do with this lawsuit by private citizens—pupils and parents—filed in a district court pursuant to the civil rights jurisdiction of the district courts to enforce their rights under the Fourteenth Amendment. There was no effort by the Congress to define the meaning of the Equal Protection Clause in section 401(b), and nothing in the Act indicates that any such thing was intended.[29]

---

[29] Congressman Cramer, who sponsored an amendment adding the last clause in section 401(b), proposed the idea on the House floor on February 1, 1964 (110 Cong. Rec. 1598), stating he favored putting "something specific in it [the bill] saying that it is not the intention of Congress to include racial imbalance or de facto segregation. I think we should consider an amendment to that effect." The amendment was offered and agreed to February 6, 1964 (110 Cong. Rec. 2280), following Mr. Cramer's assertion that its purpose was merely "to strike 'racial imbalance' from the bill and from this title which I otherwise, in its present form, believe is still in the bill as I have said before many times." He said:

> "The purpose is to prevent any semblance of congressional acceptance or approval *of the concept of 'de facto' segregation* or to include in the definition of 'desegregation' any balancing of school attendance by moving students across school district

In addition, of course, there is no prohibitory language of any kind in section 401. It defines desegregation but does not attempt to limit—or even refer—the federal courts to that definition. There is nothing in Title IV (or elsewhere in the Act) indicating that the definition is to have any force at all in the courts. Nor is there any legislative history suggesting that the definition related to the courts' powers.

lines to level off percentages where one race outweighs another" (110 Cong. Rec. 2280) (emphasis added).

Mr. Cramer's brief in this Court distorts this simple history by editing the above quoted remarks to delete—with ellipses—the matter which we have italicized in the last quoted speech. Amicus Curiae Brief of William C. Cramer, in this case, p. 13. Mr. Cramer's brief now asserts that his amendment was not concerned with the problem of racial balance in de facto areas but with his own constituency. Brief of Mr. Cramer, p. 22. It would seem that Mr. Cramer's style of argument is rather disingenuous, both on the House floor and in his brief in this Court.

APPENDIX

In the

United States District Court

For the Western District of North Carolina

Charlotte Division

Civil Action No. 1974

James E. Swann, *et al.*,

Plaintiffs,

vs.

Charlotte-Mecklenburg Board of Education, *et al.*,

Defendants.

Interim Report on Desegregation, September 23, 1970

In accordance with the prior filing by the defendants herein, the Charlotte-Mecklenburg Board of Education furnishes the following information to the Court:

1. Transportation has posed the greatest impediment to opening of schools on a full day schedule. The system has received from the State of North Carolina 185 buses, of which 35 have been renovated and now permit the system to operate a total of 398 school buses. In addition, 39 city transit and nine Trailways buses are operating so that 71 schools may operate on a full-day basis by staggering opening and closings and 32 schools are operating on a part-day schedule, two hours in the afternoon. School openings range from 7:30 a.m. to 1:00 p.m. The condition of the buses loaned through the offices of the State Board of Education are not in as good condition as represented, thereby impeding the ability of the system to put them into service.

Arrangements have been made for 17 buses to be repaired by other school districts.

By the end of this week, it is expected that 82 of the 103 schools will be on full-day schedules, though their opening and closing hours will be staggered. An additional 21 schools will await satisfactory transportation arrangements. Efforts are being made to involve parents in car pools so that these schools may open on a full-time basis.

2. The attachment designated Exhibit 1 reflects the anticipated membership, actual membership or enrollment and actual attendance by race on September 21, 1970, for junior and senior high schools.

3. The attachment designated Exhibit 2 reflects the anticipated membership, actual membership or enrollment and actual attendance by race on September 21, 1970, for elementary schools.

4. Attached marked Exhibit 3 is a report on the distribution of professional staff by school and race as of September 21, 1970.

5. With respect to elementary schools, it is noted that as a result of movement of residents, three elementary schools, Barringer, Berryhill and Amay James, now house a predominantly black student body. The Board of Education instructed the staff to review the racial condition of these schools and make recommendations. Attached marked Exhibit 4 is a copy of the report of the staff to the Board of Education. No action has been taken with reference to this report.

6. Attached marked Exhibit 5 the court will find an elementary attendance map on which the new housing developments have been located within the various attendance districts.

nterim Report on Desegregation, September 23, 1970

. The change of the residential neighborhood gives rise possible problems in the Spaugh Junior High School endance district because of rapid changes occuring with- the district. At the direction of the Board, the staff udied this condition and presented its report, a copy of hich is attached, marked Exhibit 6. No action has been ken with reference to this report.

Respectfully submitted this 23rd day of September, 1970.

Charlotte-Mecklenburg Elementary Schools

AN ANALYSIS OF ENROLLMENT AND HOUSING PROBLEMS

September 21, 1970

The Problem:

The enrollments of three elementary schools in the western section of the county are turning out to be majority black. There is a strong possibility that the schools will become totally black unless some preventive measures are taken. The anticipated enrollment for the three schools in question are as follows:

	Black	White	Total	Capacity	% Black
Barringer	296	262	558	513	53
Berryhill	640	441	1081	810	59
Amay James	458	133	591	405	77

The Cause:

Majority black enrollment in these three schools is the result of changing neighborhoods and the location of three public housing projects in the area. The projects are:

Dalton Village	1 Bedroom	40 Units
	2 Bedrooms	75 "
	3 "	93 "
	4 "	72 "
	5 "	20 "
		300 Units
Boulevard Homes	1 Bedroom	40 Units
	2 Bedrooms	74 "
	3 "	98 "
	4 "	68 "
	5 "	20 "
		300 Units
Little Rock Homes	1 Bedroom	15 Units
	2 Bedrooms	90 "
	3 "	95 "
	4 "	20 "
	5 "	20 "
		240 Units

Both Dalton Village and Boulevard Homes are completed. Both are 75% occupied now. One hundred percent occupancy is anticipated by November 1, 1970.

Ninety units of Little Rock Homes are scheduled to be completed by December 31, 1970. Completion date for the remaining 150 units is scheduled for February 1, 1971.

Dalton Village is located in the Amay James attendance area. As of September 16, 1970, 329 children had been enrolled at Amay James from the project. Enrollment by grade was: Grade 1 - 57, Grade 2 - 61, Grade 3 - 63, Grade 4 - 50, Grade 5 - 53, and Grade 6 - 45.

Boulevard Homes and Little Rock Homes are both located in the Berryhill district. As of September 16, 1970, 358 children had enrolled at Berryhill School from Boulevard Homes. None have been registered from Little Rock Homes. Enrollment by grades from Boulevard Homes was: Grade 1 - 74, Grade 2 - 72, Grade 3 - 53, Grade 4 - 59, Grade 5 - 56, and Grade 6 - 44.

In addition to the three public housing projects, a large private housing project is located in the area in the Steele Creek district. This development, named Roseland 1 and 2, contains 504 units, all of which are completed. The sizes of the 504 units are as follows: one bedroom - 176 units, two bedrooms - 224 units, three bedrooms - 104 units. A representative of the owner indicated that 50% of the units were occupied at this time. As of September 16, 1970, 81 had enrolled at Steele Creek from Roseland 1 and 2.

Several small private housing projects are located in the Barringer district. One such project, Keyway, located on Malden Street, has just been completed. The project contains 56 units. One hundred and three pupils from this project have enrolled at Barringer.

The Parker Heights housing project off Remount Road is located in the Ashley Park attendance area. Parker Heights contains 100 units. Thirty pupils from this project attend Ashley Park.

Information on Housing Projects
September 17, 1970

Project	School Attendance Area	No. Units	No. Completed 9-15-70	Completion Date	Per Cent Occupancy	No. Pupils
Dalton Village	Amay James	300	300		75	* 329
Boulevard Homes	Berryhill	300	300		75	* 358
Little Rock Homes	Berryhill	240	-0-	90-12/31/70 150-2/1/71	-0-	-0-
Roseland (1 & 2)	Steele Creek	504	504		50	81
Keyway	Barringer	56	56		100	*103
Parker Heights	Ashley Park	100	100		100	30

* Reports from school principals indicate by September 21 the almost totally occupied count of number of pupils:

Dalton Village	340
Boulevard Homes	419
Keyway	123

The Alternatives

If it is determined that preventive measures need to be taken in order to relieve the situation, several alternatives should be considered.

1a To relieve overcrowding at Berryhill, reassign elementary students as follows:

(a) 140 pupils from Thomasboro's downtown satellite district to Clear Creek.

(b) 240 pupils from Berryhill's Boulevard Homes district to Thomasboro.

(c) Another 179 pupils: 47 each to Allenbrook 1-5 and Tuckaseegee 1-5; 60 to Paw Creek (1-4) and 25 to Druid Hills (Gr 6).

As a result of these moves the following enrollment pattern would be established:

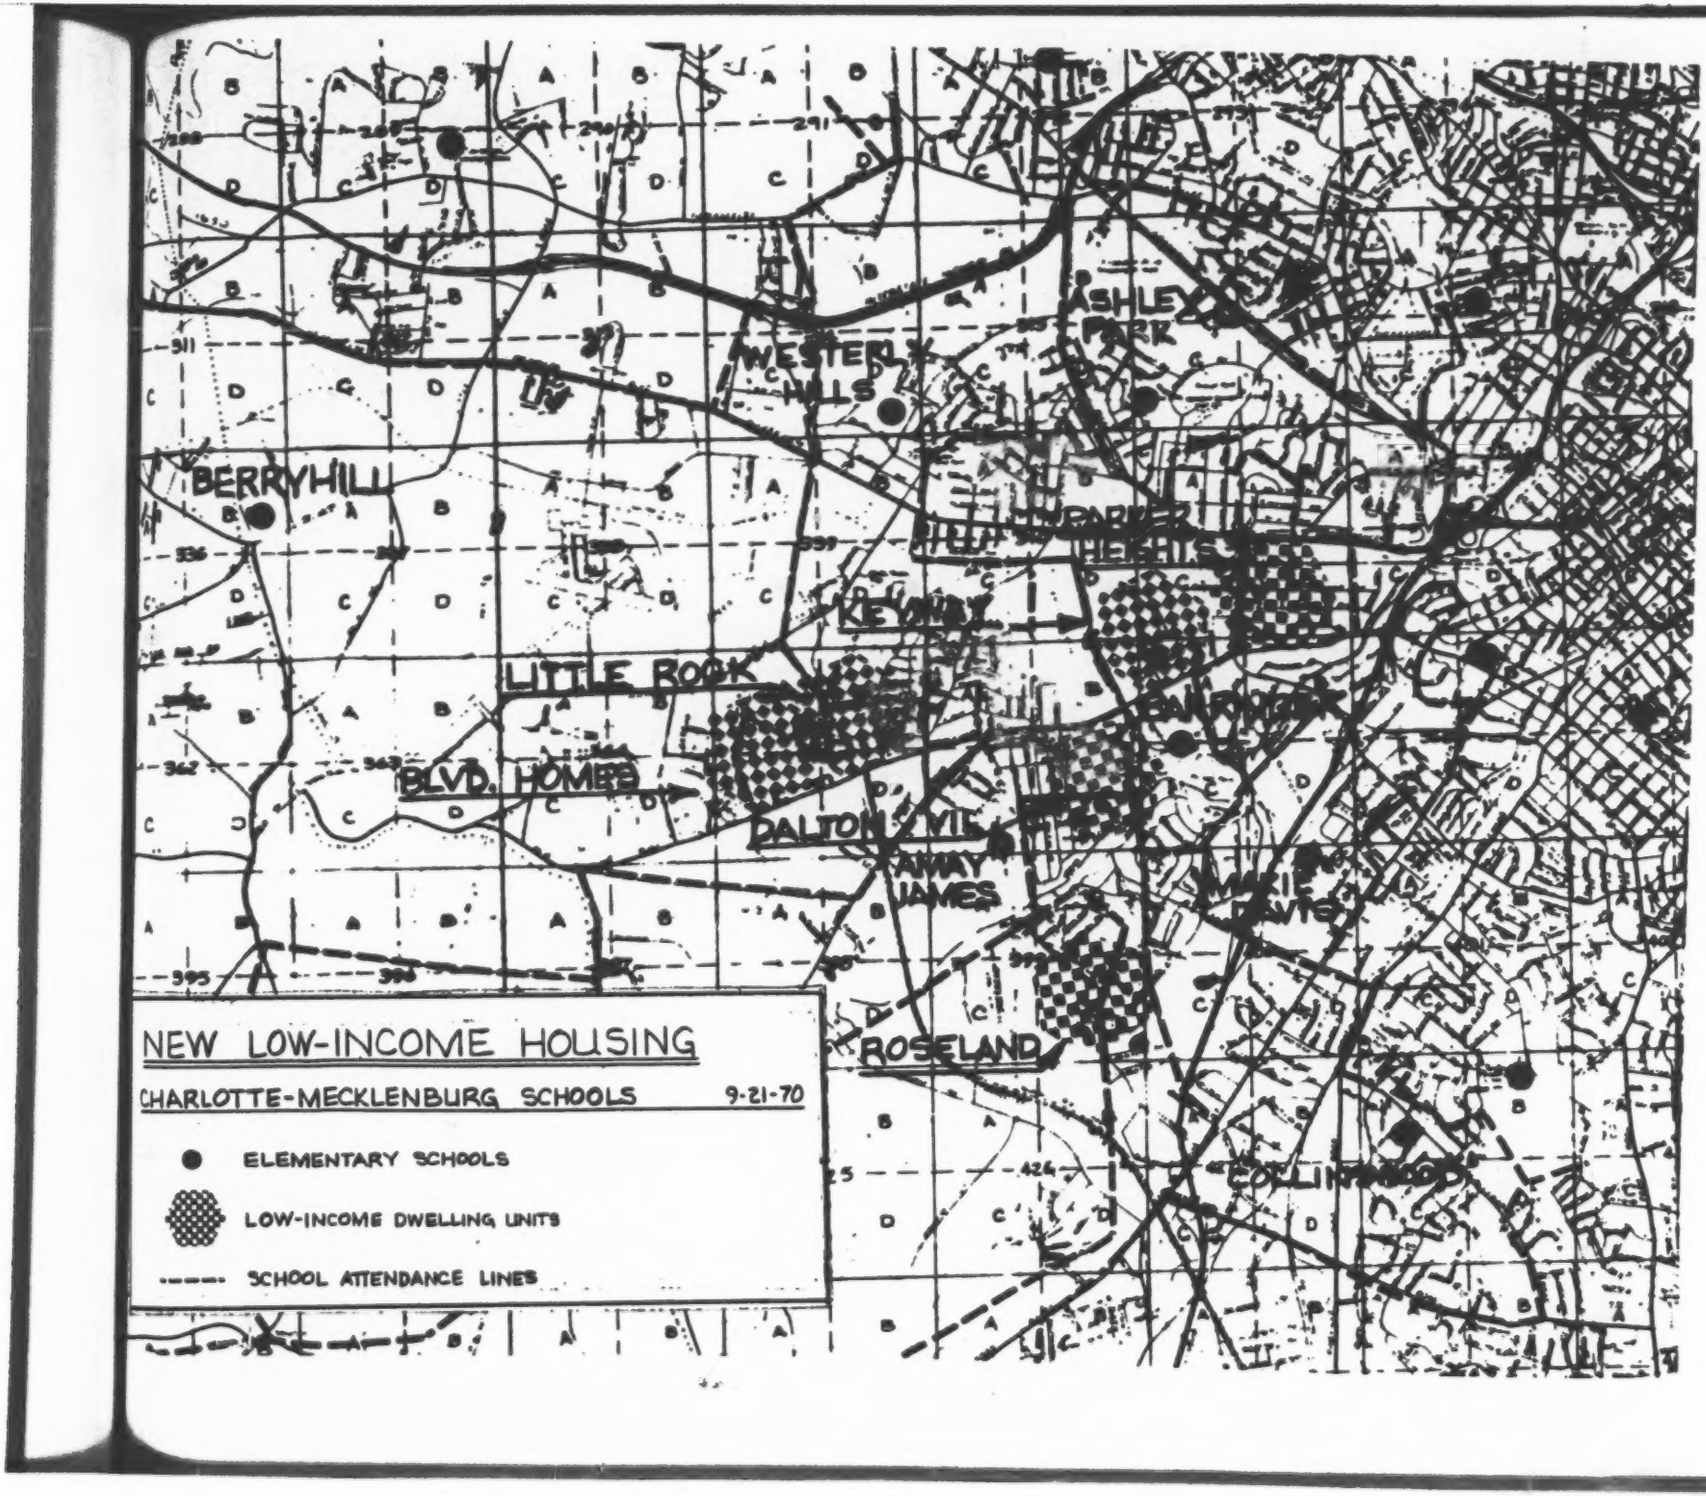
	W	B	T	%B
Clear Creek	246	203	449	45
Thomasboro	525	259	784	33
Allenbrook	379	206	584	35
Druid Hills	301	177	478	37
Paw Creek	434	194	628	31
Tuckaseegee	428	238	666	36
Berryhill	441	244	685	36

1b To relieve overcrowding at Amay James redraw the Nations Ford attendance line so as to include 280 of Dalton Village; and, satellite 60 pupils to Shamrock Gardens from the remainder of Dalton Village.

As a result of this move the following enrollment pattern would be established:

	W	B	T	%B
Shamrock Gardens	381	164	525	31
Nations Ford	674	495	1169	42
Amay James	133	118	251	47

This move would transfer an additional 280 pupils to Nations Ford. These pupils would be accommodated by using mobile units at Nations Ford or by using portions of Sterling Child Development Center. (8 rooms).



1c To relieve conditions at Barringer, send the 123 pupils from Keyway Apts:

(a) 140 pupils from Oakhurst's downtown satellite district to Bain.

(b) 123 pupils from Keyway to Oakhurst.

As a result of these moves the enrollment would be:

	W	B	T	%B
Bain	752	163	915	18
Barringer	262	173	435	40
Oakhurst	565	195	760	26

ENROLLMENT PROBLEMS

September 22, 1970

1. The Problem:

The major enrollment problem in the secondary schools is in the Spaugh area. This problem is a result of the large number of public and private low rent housing in the western area. These projects are now distributed among the junior high school attendance areas as follows:

Quail Hollow----------Roseland

Smith----------Keyway

Wilson----------Dalton Village

Carmel----------Parker Heights

Spaugh----------Boulevard Homes and Little Rock Homes

The school in the greatest potential difficulty is Spaugh. The present racial ratio at Spaugh is 38.4% black. Little Rock Homes is not yet occupied. When this is occupied, together with other changes in the Spaugh area, Spaugh Junior High could become, before the end of this school year, a predominately black school.

2. Suggested Remedy:

a. The Independence High School satellite area is now served, primarily, by Wilson and Spaugh Junior High Schools. It would be desirable to relate this area to the junior high schools which serve Independence.

b. Northeast Junior High School, with a black ratio of 8.4% is an obvious imbalance. Elementary and senior high students are now being transported the same distance that would be necessary if a satellite area were created for Northeast.

c. It is suggested that the Wilson satellite (which serves the Independence area) in the Johnson C. Smith University area be transferred to McClintock and Albemarle Road Junior High School.

d. It is suggested that the part of the Spaugh attendance area which serves the Independence satellite be transferred to Northeast and Albemarle Road Junior High Schools.

e. It is suggested that the Little Rock Homes development be assigned to the Wilson Junior HIgh School attendance area.

The following chart shows the present data for these junior high schools and the anticipated data should these changes be adopted:

PRESENT MEMBERSHIP

School	Cap.	Anticipated Enrollment	Actual Membership 9/18/70 B	W	T	%B
McClintock	1100	1326	315	956	1271	24.7
Albemarle Rd.	1158	1134	306	749	1055	29.0
Northeast	670	612	51	552	603	8.4
Wilson	1255	854	326	586	912	35.7
Spaugh	1091	1110	440	704	1144	38.4

PROPOSED ADJUSTMENTS - Sept. 1970

School	Cap.	Anticipated Enrollment	Proposed Membership B	W	T	%B
McClintock	1100	1326	393	956	1349	29.1
Albemarle Rd.	1158	1158	350	749	1099	31.8
Northeast	670	612	129	552	681	18.9
Wilson	1255	854	248	586	834	29.7
Spaugh	1091	1110	318	704	1022	31.1

PROPOSED ADJUSTMENT - February 1971
(with full occupancy of Little Rock Homes)

School	Cap.	Anticipated Enrollment	Proposed Membership B	W	T	%B
Wilson	1255	854	333	586	919	36.2

Suggested Remedy #2

Assign the Little Rock Homes project (not now occupied) to Northeast Junior High School as a satellite. This would create a black population of approximately 19.5%. It would leave Spaugh Junior High at the 38.4 ratio. It has the advantage of not requiring any pupils to be moved at this time. It has the disadvantage of causing bussing of a greater distance than remedy #1. It does not relate junior high and senior high areas to the degree that plan #1 does. It does not offer a very permanent solution to the problem at Spaugh.

The following chart shows the effect of this plan on the schools involved:

PRESENT MEMBERSHIP

School	Cap	Anticipated Enrollment	Actual Membership 9/18/70 B	W	T	%B
Northeast	670	612	51	552	603	8.4

PROPOSED ADJUSTMENT

Northeast	670	612	136	552	688	19.8

MOTION FOR LEAVE TO FILE REPLY BRIEF

Petitioners respectfully request leave to file the attached reply to the brief of the United States. This reply is being filed less than three days before the time the case will be called for hearing. See Rule 41, Rules of the Supreme Court.

The brief of the United States was filed on October 6 and received by petitioners' counsel on October 7 and 8.

Accordingly, it was not possible to complete this reply and have it printed for filing until October 10. Special arrangements are being made to serve counsel who will be arguing the case, prior to the arguments.

Respectfully submitted,

ON PETITIONS FOR WRITS OF CERTIORARI TO THE UNITED STATES COURTS OF APPEALS FOR THE FOURTH AND FIFTH CIRCUITS

PETITIONERS' REPLY TO BRIEF OF THE UNITED STATES

Several arguments advanced by the United States in its brief amicus curiae occasioned this reply.

(1) At p. 17, the Government attributes to petitioners the position that the Constitution requires "the ratio of white to black students in each school [to be] . . . as near as possible to the ratio of white to black students in the system as a whole." This is not petitioners' position. Nothing in petitioners' briefs suggests this position, which

the Government elsewhere characterizes as "racial balance" (pp. 16, 18-21, 23).

Petitioners' plan for the desegregation of the Mobile public school system in No. 436 does not depend upon a theory of "racial balance." [1] Nor does Judge McMillan's plan for the desegregation of the Charlotte-Mecklenburg public school system in Nos. 281 and 349 depend upon a theory of "racial balance." [2] "Racial balance" is a whipping-boy that respondents and the Government find it convenient to belabor. But it has nothing to do with petitioners' contentions respecting the requirements of the Constitution.

(2) Petitioners' contentions do not depend upon "ratios." They would permit 50-50 schools to exist, for example, in a 70-30 school district where residential stability and other characteristics of the school population did not threaten resegregation, and the history of the school board per-

---

[1] See Brief for Petitioners in No. 436, pp. 63-79.

[2] See the Government's quotation from Judge McMillan's opinion at p. 21. After the Charlotte-Mecklenburg school board had consistently failed to produce an acceptable desegregation plan, Judge McMillan was compelled to appoint an expert to devise a plan. He was thereby obviously required to instruct the expert concerning the *ideal* objectives of the plan—something that would not have been necessary if the board had developed anything approximating a satisfactory plan of its own. In this context only, Judge McMillan resorted to ideals defined by ratios—but with the clear recognition that substantial deviations from the ratios would be permitted where other practical and educational considerations called for them. And the ultimate plan approved by Judge McMillan does not in fact involve racial ratios in each school that reflect those of the district as a whole.

Judge McMillan expressly noted that his decision does not rest on a conclusion that "racial balances" are constitutionally required. He said:

> "This court has not ruled, and does not rule, that 'racial balance' is required under the Constitution; nor that all black schools in all cities are unlawful; nor that all school boards must bus children or violate the Constitution; *nor that the particular order entered in this case would be correct in other circumstances not before the court*" (emphasis in original) (Brief Appendix, p. 12).

formance did not require more exacting demands to guard against evasions. What petitioners *do* urge is simply that this Court should announce principles for the ultimate form of school desegregation plans which meet two requirements:

First, they fulfill the promise and the constitutional holding of *Brown* v. *Board of Education*, 347 U.S. 483 (1954), that no black child is to be assigned to a racially identifiable "black" school such as the all-black and virtually all-black schools which the Fifth Circuit has permitted to exist in Mobile and which the HEW plan would permit to exist in Charlotte-Mecklenburg.

Second, they announce this first requirement in terms that are sufficiently clear, unmistakable, and decisive so that the Court's opinion in these cases will not spawn 16 more years of litigation like the 16 years of litigation that followed *Brown*.

(3) The Government's position fails to meet either requirement. The Government urges that:

> An appropriate standard should give proper attention to a number of circumstances, such as the size of the school district, the number of schools, the relative distances between schools, the ease or hardships for the school children involved, the educational soundness of the assignment plan, and the resources of the school district. (P. 8)

If 16 years of litigation under *Brown* have demonstrated anything, it is that the enunciation of this "standard" by this Court in this year 1970 would be an unmitigated disaster. Under this standard, southern desegregation will remain an unresolved issue, and litigation of how many black children can be penned in all-black schools will still be going on, in 1986.

(4) The only justification that the Government offers for this unserviceable standard is the notion of deference to "the traditional neighborhood method of school assignment" (p. 9; see p. 24). But we are talking about desegregating schools that have never had a "traditional neighborhood method of school assignment." Time out of mind prior to *Brown*, both Mobile and Charlotte-Mecklenburg had school assignment systems that took black children out of their "neighborhoods" to black schools and white children out of their "neighborhoods" to white schools. After *Brown*, both used plans that were not "neighborhood" plans.[3] Recently, both developed "neighborhood school" schemes whose design and effect were to perpetuate segregation. If the neighborhood school system had any other "benefits" (p. 9), they had escaped local notice altogether during many years, and now continued to be subordinated to the interests of segregation for schools were located, their capacities designed, their grades structured, their zone lines drawn, and their "neighborhoods" thus shaped to achieve continued segregation of the races.

The Government admits that all of this is so as to Mobile and Charlotte-Mecklenburg (pp. 12-16), but seem to suggest that Mobile and Charlotte-Mecklenburg are aberrations. They are not aberrations. If one is to go outside these records, one will find that no school district which practiced the sort of racial discrimination condemned in *Brown* had a "traditional neighborhood" school system. They all sent blacks to black schools and whites to white schools without regard to "neighborhoods" or geographic proximity. These are the school systems that are at issue here.

But we do not think that the Court should go outside the record. If there are school districts which have truly

[3] Indeed, in No. 436, the Mobile School Board adamantly resisted the principle of neighborhood schools. See petitioners' brief in No. 436, p. 29, n. 26.

had "traditional neighborhood" school systems, they lie beyond the scope of this Court's post-*Brown* experience and doubtless differ in so many ways from Mobile and Charlotte-Mecklenburg that nothing the Court decides herein could affect them. To reason from the supposed nature and "benefits" of those systems without a record adequately describing them would be perilous enough even if such systems were in question. But the only systems in question here are those that have traditionally subordinated or shaped neighborhoods to race; and, as to them, the Government's "traditional neighborhood" school principle is manifestly hollow.

(5) The Government's reasoning from the "neighborhood" school premise is as faulty as the premise. We understand it to say that because various devices have been used by southern school boards to make the "neighborhood" school principle a serviceable tool of segregation—i.e., school location, school size manipulations, grade structure manipulation, zone line manipulation (pp. 12-16)—these same devices, but only these, may be used as "the focal point of a proper remedy . . . to disestablish the dual system and eliminate its vestiges (p. 16; see p. 25). Two things are wrong with this argument as a basis for concluding that "a system of pupil assignment on the basis of contiguous geographic (residence) zones . . . is constitutionally acceptable in desegregating urban school systems" (p. 24).

First, southern school boards—and these school boards—have used not merely manipulative practices within contiguous zones but also non-contiguous zones and busing to achieve segregation. If the measure of desegregation devices is to be determined by those devices previously used to segregate, then non-contiguous zones and busing are included.

Second, there is no doctrinal, logical or practical reason why the roster of desegregation devices should be measured by that of segregation devices. So far as we are aware, it has never been supposed that the remedial means of a court of equity were those used by a malefactor in creating the situation that requires remedying. . .

(6) It is not only, however, the Government's reasoning that troubles us, but the consequences to which it inevitably leads:

First, as we have said in paragraph (3), *supra,* the Government's vague and elastic "standards to be applied in fashioning remedies for state-imposed segregation" (p. 8) will unquestionably produce another desolating, wasteful and protracted era of school desegregation litigation. We had hoped that this Court's decision in *Alexander* v. *Holmes County Board of Education,* 396 U.S. 19 (1969); and *Carter* v. *West Feliciana Parish School Board,* 396 U.S. 290 (1970), were meant to end that sort of thing.

Second, standards of this sort cannot be fairly and uniformly administered. In practice, they boil down to the disposition of the school board, or local district judge, or the sitting panel of the court of appeals. Experience in the Fifth Circuit in the past year demonstrates the effect of standards such as the Government proposes. The Government's description of the Fifth Circuit jurisprudence at pp. 19-20, 25-26, suggests a sort of consistency that the cases entirely lack. In the Fifth Circuit, as we have shown in petitioners' brief in No. 436, the degree of desegregation ordered varies from panel to panel.

Third, in the last analysis, as the Government admits on p. 26, its "standards" amount to nothing more than a promise of judicial review of the "good faith" of school officials. Sixteen years of school desegregation litigation

since *Brown* teach the delusiveness, the utter futility of any such approach to desegregation.

(7) This Court should order that the schools be desegregated by declaring that each black child in Mobile and Charlotte-Mecklenburg must be assigned to a school which is not a racially identified "black" school. See para. (2), *supra*. Judge McMillan's order on Nos. 281 and 349 should be approved as a practicable plan found effective to achieve this result in Charlotte-Mecklenburg; and the judgment of the Court of Appeals for the Fifth Circuit in No. 436 should be reversed.

CHARLOTTE-MECKLENBURG BOARD OF EDUCATION, ET AL., *Respondents*

MOTION FOR LEAVE TO FILE BRIEF AMICUS CURIAE ON BEHALF OF JACKSON CHAMBER OF COMMERCE, INC. AND JACKSON URBAN LEAGUE

NOW COMES Jackson Chamber of Commerce, Inc., a non-profit corporation organized and existing under and by virtue of the laws of the State of Mississippi, and Jackson Urban League, a non-profit corporation organized and existing under and by virtue of the laws of the State of Mississippi, both having their domicile in Jackson, Hinds County, Mississippi, by their attorney, and hereby respectfully move for leave to file the attached brief *amicus curiae*. The consent of the attorneys for the petitioners and the respondents has not been obtained.

These two entities, being both concerned with the welfare of the community within which they principally operate, and being particularly concerned with its economic growth and development, find themselves in common accord on one matter of particular and vital interest to their community, that is — the continued survival and health of the public

school system in the Jackson, Mississippi, area, and, therefore, are deeply concerned with the issues here presented.

The issues here have implications extending far beyond the particular situation now before the Court. Accordingly, these two entities desire the opportunity to present their views on this matter to the Court.

We feel that our contribution should assist the Court in setting the problems here presented in a broader context, thus ensuring a readier grasp of the grave import its decision may have for public school systems throughout the country.

For the foregoing reasons, the movants respectfully request that this motion be granted.

Respectfully submitted,

CHARLOTTE-MECKLENBURG BOARD OF EDUCATION, ET AL., *Respondents*

ON WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE FOURTH CIRCUIT

BRIEF AMICUS CURIAE ON BEHALF OF JACKSON CHAMBER OF COMMERCE, INC. AND JACKSON URBAN LEAGUE

QUESTIONS PRESENTED

This case presents questions which go to the very heart of the survival of the public school systems of this country. The questions presented necessarily include the following:

1. Must a school district adopt a plan of integration which demonstratively will result in resegregation?

THE INTEREST OF JACKSON CHAMBER OF COMMERCE, INC. AND JACKSON URBAN LEAGUE.

The interest of Jackson Chamber of Commerce, Inc. and Jackson Urban League, as *amicus curiae* is set forth on their motion for leave to file this brief *amicus*, to which motion this brief is annexed.

ARGUMENT

A. PRELIMINARY STATEMENT

These two entities, being both concerned with the welfare of the community within which they principally operate, and being particularly concerned with its economic growth and development, find themselves in common accord on one matter of particular and vital interest to their community, that is — the continued survival and health of the public school system in the Jackson, Mississippi area, and have agreed to submit to this Honorable Court certain principles which they believe if adhered to, would reverse the present destructive trends which are taking place not only in the Public School System of Jackson, Mississippi, but in all such systems in the Nation, and for that reason and in that spirit these two entities have come together for the sole purpose of presenting to this Honorable Court for its consideration the following facts and conclusions.

B. HISTORICAL REVIEW OF COURT DECISIONS

In September of 1969, one year ago, schools of this district opened under what was basically a "freedom of choice" plan. Enrollment showed 18,227 blacks and 20,966 whites. Today, one year and three court ordered plans later, enrollment is 18,396 black and 12,095 white, — a 42.4 per cent decrease in the number of whites. The first court order last fall ordered a desegregation of staff at the beginning of the second semester. On appeal by the NAACP Legal Defense Fund, counsel for the plaintiff, complete desegregation of pupils and staff was ordered at the beginning of the second semester. The District Judge ordered into effect an HEW plan for elementary schools and a plan of his own devising for secondary schools. Plaintiffs appealed this order

as to the secondary plan only. In May the Fifth Circuit Court of Appeals acted on this appeal, ordering into effect an HEW plan for secondary schools. Although there had been no appeal, the Fifth Circuit ordered the District Court to prepare a new elementary plan and ordered the appointment of a Bi-Racial Committee to help devise this plan. The Bi-Racial Committee did devise a plan and, after hearings, this plan was ordered into effect for September. Plaintiffs appealed this order and in their brief made this statement: — "the district court's controlling responsibility is to evaluate that plan, not in terms of its educational soundness, but in terms of its ability to achieve integration."

In August, acting on this appeal, the Fifth Circuit ordered into effect a plan which basically consisted of the pairing and grouping of approximately half the elementary schools. The court stated that this was to be temporary and the District Court was ordered to hold hearings and to prepare a new elementary plan for the second semester, making the fourth disruption in four semesters. The traditional six grade structure for elementary schools has been destroyed and we now have seven different grade-structured types of elementary schools. The traditional 3-3 secondary structure has been destroyed in favor of a 2-1-1-2 structure.

Under court plans presently in effect, 95% of the children in this district will attend six different schools from the first to the twelfth grade. In one extreme case, a small group of children will go to seven schools in twelve years. Or to look at it another way, it is possible for a family with seven children to have them in seven different schools.

Our superintendent, who came to us one year ago from a position as Assistant Superintendent in Atlanta, Georgia,

resigned a month ago, stating that his training, experience, and conscience would not permit him to be responsible for a system over which the court would allow him no control and one which he felt had been made educationally and administratively unsound. This man's imagination and dedication are demonstrated by the fact that this school system was the first in the country to submit a comprehensive plan of educational innovation and to receive a grant under the 75 million dollar emergency fund appropriated this summer. Under state law (dated prior to the *Brown* decision) and reinforced by an opinion from the Attorney General of Mississippi, the local school board has no authority (even if it had the money) to provide intra-city transportation.

C. RECENT STATISTICS

The following statistics demonstrate forcefully and without further argument precisely what is taking place in the Public School System of Jackson, Mississippi at the present time:

As of September 15, 1969, there were 18,227 black students and 20,966 white students in the Public School System of Jackson, Mississippi, or a total of 39,193 students The percentage ratio at that time was 47% black and 53% white.

On September 18, 1970, there were in the said school system 18,396 black students and 12,095 white students, or a total of 30,491 students. The percentage ratio at that time was 60% black students and 40% white students.

Thus, it can be seen that with the various court orders as set out in the historical review above, withdrawals of white students have occurred so that from September 15, 1969, to September 18, 1970, the number of white students attending said school system has dropped from 20,966 to 12,095, while over the same period the black students in said system have increased from 18,227 to 18,396. The percentage change over said period of approximately one year has been from 47% black students to 60% black students, and from 53% white students to 40% white students.

Thus, it is self-evident that from September 15, 1969, to September 18, 1970, a serious drift toward resegregation has taken place in the Jackson public school system.

D. ECONOMIC IMPACT

A major concern which bears directly on Jackson's education problems is the slowdown which has occurred in the city's economic development. During the past decade the increase in manufacturing employment has only been one half of what was needed.

A critical problem confronting Jackson's development efforts is the school situation. The present instability is preventing a major manufacturer from locating a badly needed large plant in the Jackson area. Neither this company nor many of the other firms which might otherwise come to Jackson can be expected to move into the area.

Paradoxically, Jackson's schools need to be strengthened before it will be possible to attract many of the companies

needed to accelerate the area's economic growth. The need for strengthening the schools was recognized by the School Board when they employed Dr. John Martin as superintendent; his capabilities in the curriculum development field were a major factor in his selection. And that strengthening cannot occur unless economic growth takes place which produces the revenues required. Nor can many of the social problems which confront the families in the lower economic brackets be solved unless more economic development takes place.

We come full circle then. The city's schools cannot be strengthened substantially without a doubling of the area's economic growth rate. The desired economic growth cannot take place without significant improvement in the quality of Jackson's schools. Neither improvement of the schools nor the desired economic development can take place unless the present instability is eliminated and the basic problems involved in the integration of the schools can be worked out.

The importance of this impact is not confined to economics alone. It is obvious that an adverse economic impact on any community brings with it increased social problems and burdens. This community at this time is making heroic efforts to solve social problems by providing better jobs, better housing, and better living conditions for its citizens who are in the lower economic echelons. This requires expenditures of capital. Anything, including the situation we are now concerned with, which adversely affects the economics of this community will adversely affect the efforts now being made to upgrade the living standards of those citizens in this community who are in the lower economic brackets.

E. CERTAIN PRINCIPLES

We are persuaded that from the experiences of this community, as well as the experiences of communities all over the Nation, certain basic principles have emerged which are worthy of serious consideration.

1.

Prior to the court orders which changed the same, the School System of Jackson, Mississippi, operated on what is known as 6-3-3 plan. That is, in the district the elementary schools consisted of the first six grades, the junior high schools consisted of grades seven, eight and nine, and the high schools consisted of grades ten, eleven and twelve. This system worked well and served the needs of the people in the community better than any other system which has ever been devised. There were demonstrable educational advantages, as the breaks which occurred between the three divisions of the system were natural breaks based on age and development of the children. There proved to be less disruption in the life of the individual child. The possibilities of major transportation problems were reduced. It is our firm belief that a return to the 6-3-3 concept is essential.

2.

It is our further conviction that if the integration which the courts, by their various decisions and orders have decreed, is to be achieved, it must be done in an orderly manner which will accomplish the courts' purposes without totally wrecking the public school system. In order to accomplish this, it is necessary that the outflow of whites from the public schools be reversed or resegregation is certain to result. It is probable that this trend can be reversed and

many whites who have fled the public schools will return if certain self-evident facts are recognized and are dealt with on a realistic basis.

Experience has shown that depending upon location of the area involved when the ratio of black pupils to white reaches a certain percentage, resegregation has resulted. For each community the resegregation point varies, depending upon the very nature of the community itself. Such consequences have been experienced in numerous American communities, including Washington, D. C., Philadelphia, Pennsylvania, Cleveland, Ohio, and many others. The Jackson statistics quoted above confirm the fact that this trend is presently being experienced in the Jackson Public Schools.

There are many and obvious deleterious by-products of this trend. Support of the public schools is being reduced. As an example, in November of 1969, a bond issue for capital expenditures for public schools in the City of Jackson was defeated by both black and white votes. It is doubtful if any public school bond issue could pass in this area at this time.

Frustration exists in the families of both the black and the white communities in the City, and this frustration is resulting in further polarization of the races.

Once the trend begins of the flight of whites from the public schools, it can normally be expected to accelerate. This statement is based on the experience of this community and others as set out above. In this community the private

schools which now exist, many of which have recently come into being, are overloaded and are expanding their facilities.

3.

Should the principles set out above be adhered to, it will then become incumbent upon this community to commit itself unreservedly to an innovative system of superior public education. The time gap which will exist between the frustrations and disruptions mentioned above and some eventual solution to this problem is all important. Steps must be taken immediately which will have the effect of compensating educationally for these frustrations and disruptions during this period.

This community has shown its commitment to these principles in the past. This commitment must continue. In fact, if the trend which is now taking place is to be reversed and the public school system of this area is to be saved, this commitment must be strengthened and the educational processes in the public school system must be enhanced at all levels. There are many things which can be done immediately and in the future to bring this about. We believe that with a reasonable, sensible and workable approach to the overall problem, this community will respond affirmatively in bringing about superior public education for its children. It is our firm conviction that this should be the primary consideration of all of the courts involved, and of all the entities and individuals who are in any wise affected by this overall problem.

CONCLUSION

We conclude that stability in the schools which will permit them to continue to survive can only be achieved if the principles set out herein are adhered to.

ARGUMENT DATE 1

DECISION DATE AND EFFECT OF DECISION 2

GROUNDS OF REHEARING 3

A. The opinion of the Supreme Court, by its own terms, clearly discloses that the orders of the District Court were unwarranted and clearly in excess of the powers of the District Court. 3

B. The Court substantially rejected education as the foundation upon which its decision rested. Instead, it erroneously based its holding primarily upon racial quotas in contravention of the Equal Protection Clause of the Fourteenth Amendment. 6

C. The implications of the opinion with respect to the power of the federal courts to order a prescribed racial ratio of students at each school requires clarification. 7

D. The Court, having raised the difficult problem of school location, must furnish to school boards and district courts guidance in the location and construction of schools. 9

Page

E. It is incumbent upon the Court to clearly define a unitary system so that school boards may know the necessary ingredients comprising such a system. 10

F. The Court's concern for the time or distance of travel, particularly for young children, is overshadowed and rendered a nullity by approval of the District Court's orders. 11

G. The opinion of this Court unfairly discriminates. A nationwide standard is required. 12

CHARLOTTE-MECKLENBURG BOARD OF EDUCATION, et al., *Cross Petitioners*

v.

JAMES E. SWANN, et al., *Cross Respondents*

TO THE HONORABLE, THE CHIEF JUSTICE AND THE ASSOCIATE JUSTICES OF THE SUPREME COURT OF THE UNITED STATES:

The Respondents and Cross Petitioners, the Charlotte-Mecklenburg Board of Education, et al, present this petition for a rehearing of the above entitled cause, and in support thereof, respectfully show:

I.

The appeal in this cause was argued before this Court on the 12th day of October, 1970.

II.

On April 20, 1971, this Court rendered its decision in favor of the Petitioners and Cross Respondents and against the Respondents and Cross Petitioners. It held "the judgment of the Court of Appeals is affirmed as to those parts in which it affirmed the judgment of the District Court. The order of the District Court dated August 7, 1970, is also affirmed."

III.

The Respondents and Cross Petitioners seek a rehearing upon the following grounds:

A. The Opinion Of The Supreme Court, By Its Own Terms, Clearly Discloses That The Orders Of The District Court Were Unwarranted And Clearly In Excess Of The Powers Of The District Court.

In its opinion of April 20, 1971, this Court clearly held that a school system may operate free of judicial surveillance once it eliminates racial discrimination occasioned by official action, unless there is a showing that school authorities or some other state agency have "deliberately attempted to fix or alter demographic patterns to affect the racial composition of the schools . . ." (*Swann v. Charlotte-Mecklenburg Board of Education,* April 20, 1971, p. 28). School authorities are not constitutionally required, and federal courts are not permitted, to change the racial composition of a school system in which racial discrimination has been eliminated.

The cornerstone upon which the opinion of this Court rests is its unwarranted conclusion that the

Charlotte-Mecklenburg School Board conceded that it fell short of achieving a unitary school system in 1969:

". . . All parties now agree that in 1969, the system fell short of achieving a unitary school system that those cases require." *Swann*, supra., p. 3.[1]

and

"As the voluminous record in this case shows, the predicate for the District Court's use of the 71%-29% ratio was twofold; first, its express finding approved by the Court of Appeals and not challenged here, that a dual school system has been maintained by the school authorities at least until 1969; . . ." *Swann*, supra., p. 20.[2]

On the contrary, the Board has steadfastly maintained throughout the course of this litigation that its school system has been unitary and non-dual since 1965 when its plan for desegregation was approved by the District Court, *Swann v. Charlotte-Mecklenburg Board of Education*, 243 F. Supp. 667 (1965), and by the Court of Appeals for the Fourth Circuit, 369 F. 2d. 29 (1966). The 1965 plan was held to be ". . . sufficient

---

[1]Transcript of Oral Argument, October 12, 1970, p. 89. "Mr. Waggoner: I will say this. Before 1965, there were still some vestiges of the old state dual system." If the Court is attempting to impute such concessions to counsel, it should be observed that "distinct and formal admissions of facts made by counsel during the progress of a civil or criminal trial are binding on the client only *when made for the express purpose* of dispensing with formal proof." (Emphasis added) 7 Am. Jr. 2d. Attorneys at Law, §122. See also 7 CJS, Attorney and Clients, §100.

[2]See footnote No. 13 at p. 19 and argument, p. 43, Brief of Respondents and Cross Petitioners herein, in which the findings were challenged.

compliance with the duty imposed upon the Board by the Constitution."

Since 1965, the Charlotte-Mecklenburg system has been operating not under state direction, but under the express authorization and approval of the federal judiciary.

In its April 23, 1969, order, the District Court reviewed the performance of the Board under the 1965 plan, acknowledged that the Board had operated in good faith pursuant to "the general understanding of 1965 about the law regarding desegregation" and concluded:

> ". . . They have achieved a degree and volume of desegregation of schools apparently unsurpassed in these parts, and *have exceeded the performance of any school board whose actions have been reviewed in appellate court decisions.* The Charlotte-Mecklenburg schools in many respects are models for others." (Emphasis added) (311A).

In the same April 23, 1969, order, the District Court found there was no racial discrimination or inequality with reference to the use of federal funds for special aid to the disadvantaged, use of mobile classrooms, the quality of school buildings and equipment, coaching of athletics, parent-teacher association contributions and activities, school fees, school lunches, library books, elective courses, individual evaluation of students and gerrymandering (293A-302A).

These and similar findings of the District Court regarding the Board's operation of its schools under the 1965 court-approved plan negated any implication of a deliberate attempt "to fix or alter demographic patterns to affect the racial composition of the schools."

Absent such a showing, the Board's faithful adherence to the 1965 plan removed this school system from any justifiable surveillance and control of the federal court. When that plan was adopted and approved by the Court, racial discrimination through official state action was eliminated from the Charlotte-Mecklenburg system, which at that point ceased to be dual.

It is acknowledged that prior to 1965, Charlotte-Mecklenburg maintained a dual system. However, this acknowledgment does not support a conclusion that its schools were unlawfully segregated in 1969.[3]

The pertinent findings upon which all expressions of the District Court are based with respect to state action creating such segregation are not limited as to time. Instead, the findings are said to be based upon actions of school boards before and since 1954. To fall within the bounds of the opinion of the Supreme Court in this case, such findings must expressly relate to the post-1965 period of the operation of schools in this system. Neither the parties nor the appellate court can discern those facts upon which the District Court relied in finding "the resulting schools are not 'unitary' or 'desegregated.'" (662A). The actions which the District Court found unlawful extend over the entire history of the public school system, thereby presenting the appellate courts with findings that are not related to the critical post-1965 period.

The Charlotte-Mecklenburg school system complied with the Constitution in 1965. Its good faith implementation of the 1965 plan for desegregation

---

[3]The fact that the Board offered a far-reaching and sweeping plan to the District Court is not an acknowledgment that its system of schools in 1969 was one in which children were excluded from any school on account of race.

places this case beyond the power of the federal judiciary to intervene further. As declared by this Court:

> "... Neither school authorities nor district courts are constitutionally required to make year-by-year adjustments of the racial composition of student bodies once the affirmative duty to desegregate has been accomplished and racial discrimination through official action is eliminated from the system ..." (*Swann*, supra., p. 27).

The Supreme Court's reliance upon its own erroneous conclusions regarding admissions of the parties as to the condition of the system in 1969 and reliance upon the unsupported and undefined findings of the District Court warrant reversal of the District Court and the Court of Appeals.

B. The Court Substantially Rejected Education As The Foundation Upon Which Its Decision Rested. Instead, It Erroneously Based Its Holding Primarily Upon Racial Quotas In Contravention Of The Equal Protection Clause Of The Fourteenth Amendment.

Concern for equal educational opportunity for all children was the foundation of this Court's opinions in *Brown I* and *II*, 347 U.S. 483; 349 U.S. 294. But in the *Swann* opinion, there is only one limited reference (at p. 26) to an awareness of the effect which desegregation plans of the District Court may have upon the educational process.

Now, social reform, rather than education, appears as the major thrust of the goal to be achieved. The emphasis is put on racial quotas, balancing, transportation, existence of predominantly black or white

schools and other "baggage" loaded upon the school wagon to prepare children to "live in a pluralistic society."

Due regard has not been given to the opinions and recommendations of education experts, the Superintendent and others (including some of the plaintiffs' own witnesses) with respect to the detrimental effects which the Court-ordered plan will have upon the school children of Charlotte-Mecklenburg. This includes the deprivations resulting from consequent financial burdens that seriously encumber other programs of the schools.

To condone desegregation arrangements that are administratively awkward, inconvenient and even bizarre relegates education to a subordinate role and ultimately will be self-defeating.

Racial assignments which result in impairment of the very educational process intended to be benefited clearly violate the rights of all children, black or white, under the Equal Protection Clause of the Fourteenth Amendment. Such constitutional violation and resulting impingement upon the educational process warrant reversal of the District Court orders. *Swann*, supra., p. 26.

C. The Implications Of The Opinion With Respect To The Power Of The Federal Courts To Order A Prescribed Racial Ratio Of Students At Each School Requires Clarification.

This Court addressed itself to the authority of a federal court to order each school to have a prescribed ratio of Negro to white students reflecting the proportion of the district as a whole.

At page 12 of its opinion, this Court stated:

". . . Absent a finding of constitutional violation, however, that (i.e. prescribing fixed ratios) would not be within the authority of the federal court. . ."

This assertion does not square with the implications of a later statement of the Court appearing on page 19 of the opinion, where the Court declared:

". . . If we were to read the holding of the District Court to require, as a matter of substantive constitutional right, any particular degree of racial balance or mixing, that approach would be disapproved and we would be obliged to reverse. . ."

Although disavowed, the District Court's goal was to achieve a 71%-29% racial balance in each of Charlotte-Mecklenburg's schools to reflect as nearly as possible the racial ratios of the system at large. This objective was approved by this Court as being within the discretionary powers of the District Court to fashion an equitable remedy "for the particular circumstances." No guidelines and no limits are prescribed.

It would appear, therefore, that once a school system is found or presumed to be dual, the door is open for a trial judge subjectively to require racial balancing in whatever amount he may consider expedient.

Upon rehearing, this Court should define the circumstances justifying racial balancing and the extent to which it may be employed. Until this is done, neither the Charlotte-Mecklenburg, nor any other system, can prepare or present meaningful desegregation plans without recourse to fixed and disruptive mathematical ratios in all schools.

D. The Court, Having Raised The Difficult Problem Of School Location, Must Furnish To School Boards And District Courts Guidance In The Location And Construction Of Schools.

The Court carefully describes some of the problems of school construction and school location which lead to racial isolation. However, school boards are told that it is wrong to construct a school in a black area for the school will remain black. Similarly, they are advised they cannot build in white areas for the schools will remain white. They are further admonished that they should not build in border racial areas as such schools are likely to become black. Furthermore, school boards quickly receive the condemnation of the courts where the racial composition of a school changes to reflect the shift in the racial composition of the attendance district. The Charlotte-Mecklenburg Board, implementing the Court-approved plan for 1970-1971, has been condemned by the District Court for the shifts in population that have converted three schools from predominantly white to predominantly black. A number of other schools are similarly threatened.

In this highly mobile society, the mortals who serve on the school boards do not have the omniscience to foretell the changes in the racial complexion resulting from the movement of people.

Unless practical, rational and clearly understood guides are furnished to school boards and the district courts, compliance with the directive of this Court will be largely impossible. On rehearing, such guides should be established.

E. It Is Incumbent Upon The Court To Clearly Define A Unitary System So That School Boards May Know The Necessary Ingredients Comprising Such A System.

The Supreme Court has approved the sweeping desegregation order of the District Court. It accomplishes more racial balancing than has been achieved by any comparable school system. Yet, we find in the opinion that the plan is an "interim plan" and that at some point in the future the system should comply with *Brown I* and *Green v. New Kent County*, 391 U.S. 430 (1968).

Brown II directed that assignments should be non-racial. *Cooper v. Aaron*, 358 U.S. 1 (1958) suggested geographic attendance zones. *Goss v. Board of Education*, 373 U.S. 683 (1963) suggested freedom of choice. *Green v. New Kent County*, 391 U.S. 430 (1968) introduced the term "unitary system" which has not been clearly defined to this date by the Supreme Court. *Alexander v. Holmes*, 396 U.S. 19 (1969) attempted to define a unitary system as one "within which no person is to be effectively excluded from any school because of race or color." We are now told that the objective is "to see that school authorities exclude no pupil of a *racial minority* from any school, directly or indirectly, *on account of race*." (Emphasis added).

The racial assignments of the District Court's order obviously violate the principles of the non-racial assignments of *Brown II* and the prohibited exclusion of students on account of race as enunciated in *Alexander*, supra. The effect of the District Court's order so fully balances students and faculty and so fully satisfies the other criteria of *Green* that we are unable

to comprehend why a unitary system has not been achieved by the sweeping desegregation order.

It is incumbent upon the Court to furnish the solid guidance it professed to give. It will thereby permit this School Board to extricate itself and the citizens of Charlotte-Mecklenburg from the legal quagmire created by the conflicting and inconsistent statements regarding the law of the land with respect to the establishment and operation of a unitary school system. Rehearing of this case will afford this Court an opportunity to do so.

F. The Court's Concern For The Time Or Distance Of Travel, Particularly For Young Children, Is Overshadowed And Rendered A Nullity By Approval Of The District Court's Orders.

In school cases, courts should not utilize the worst features of a school system (such as transportation) as the tools for bringing about further desegregation. In this case, the action of this Court in approving the orders of the District Court reflects upon the viability of this Court's holding that "the limit of time of travel will vary with many factors, but probably with none more than the age of the students." *Swann*, supra., p. 27.

This application of the Court's pronouncement is further cast in doubt by its acknowledgment that four and five year olds travel the longest routes in the system. *Swann*, supra., p. 25. Obviously, the age of the child was of little concern to the District Court. We can only conclude that in Charlotte-Mecklenburg, students of any age may be subject to assignment to any school within the system.

The Supreme Court must give rational, practical and reasonable guidelines with respect to transportation of students. In its present posture, this pronouncement of the Court is meaningless to this school system.

G. The Opinion Of This Court Unfairly Discriminates. A Nationwide Standard Is Required.

The dual standard adopted by the Court for this school system is a clear violation of the rights and privileges guaranteed to its citizens. The stringent and apparently insurmountable burden it faces regarding predominantly black schools is not shared by school systems located in other areas of the country.

The Board on many occasions offered comparisons of desegregation in the Charlotte-Mecklenburg schools with that in other non-southern systems. The District Court, while observing that our system compared favorably, rejected such proffers. (663A). Actually, this system was more racially balanced on February 5, 1970, under its 1969-70 plan than any other large urban area in this nation. The exclusion of this evidence effectively prevented the Board from showing that it had eliminated the effects of the former state imposed dual system.

We further offered evidence which showed that seven of its schools had changed from predominantly white to predominantly black during the period 1965 through 1968—for reasons totally unrelated to School Board action. These changes took place while the 1965

Court-approved plan was in effect. Nevertheless, the District Court, while noting the plan was administered in good faith, made a broadside finding that all predominantly black schools in the system, including those seven schools, to be "illegally segregated." The Supreme Court, by approval of the District Court's orders, sustained this finding. This case offers clear evidence that southern school systems face an impossible burden of proof. As a result, the citizens of this area are subjected to invidious discrimination.

The decision goes further than the ancient practice of visiting the sins of the father upon the son and later generations. It visits punishment upon children for the recently discovered offenses of their forebears or the forebears of their neighbors. Racial assignments are imposed upon young citizens residing in this district. It is immaterial that a child is a newly arrived foreign national or a former citizen of a non-southern state or that he was born subsequent to 1954. By residing in Charlotte-Mecklenburg, under this opinion, upon identification of the color of the child's skin, the child will be assigned to school according to color. This is expressly prohibited by *Brown I* and *II*.

Unless a uniform reasonable standard, with national application, is established for a unitary school system, a southern school district such as our own will be saddled with the irrefutable presumption that schools substantially disproportionate in their racial composition are unconstitutional.

CONCLUSION

For the foregoing reasons, it is urged that this petition be granted.

This the 14th day of May, 1971.

Respectfully submitted,

BRIEF AMICI CURIAE 1

Interest of Amici 1

Statement 2

A. No. 281 2

B. No. 436 6

C. A Comparison of the Two Cases 8

Summary of Argument 9

Argument 12

I. Disestablishment of a dual school system requires that, unless demonstrably unfeasible, pupils be assigned so that no school has a student body which is all-black or so disproportionately black as to make the school identifiable as a "black school" 12

A. The rationale of Brown I 13

B. The principles declared in Green 14

C. Schools with black student bodies which could feasibly be desegregated are remnants of the system of discrimination condemned in Brown I 15

II. Elimination of "black schools", where feasible, is required as a remedy for the wrong of official segregation which produced those schools 22

Page

III. The courts of appeals in these two cases impermissibly approved the continued existence of black school on grounds falling short of the unfeasibility of desegregating them 26

A. The Mobile case and the "neighborhood school concept" 27

B. The Charlotte case and the "rule of reasonableness" 31

C. The question of busing 34

Conclusion 37

MOTION FOR LEAVE TO FILE BRIEF AMICI CURIAE, OUT OF TIME

The following organizations—the United Negro College Fund, Inc.; the National Urban Coalition; the League of Women Voters of the United States; the League of Women Voters of the State of North Carolina; the League of Women Voters of Charlotte-Mecklenburg, North Carolina; the Mississippi Educational Recources Center; the Center

for Law and Education, Harvard University; and the Washington Research Project of the Southern Center for Studies in Public Policy—hereby move pursuant to Rule 42(3) of the Rules of this Court, for leave to file the attached brief amici curiae in the above-entitled cases.[1] Petitioners in both cases, the United States as a party to No. 436, and the Charlotte-Mecklenburg Board of Education as a respondent in No. 281, have consented to the filing.[2] The other respondents have not yet replied to our request for consent to file.

Under the briefing schedule established by this Court briefs amici curiae supporting the position of petitioners were due by September 16, 1970. Rule 42(2), Rules of Supreme Court. Movant organizations respectfully request that leave be granted to file the attached brief out of time. As set out below, movant organizations represent a broad and diverse spectrum of citizens, united by a common concern for quality integrated education. They desire to present to the Court a unified treatment of these two critical cases. The accelerated briefing schedule established by this Court, under which amici briefs supporting petitioners were due seventeen days after the Court's order, made it impossible for counsel to consult with all of them and agree on a common treatment of both cases, and to prepare a brief giving full and comparative attention to the *Mobile* as well as the *Charlotte* case, by September 16.

The United Negro College Fund, Inc., is an organization consisting of 36 member colleges, all but one of them in the South, which was established in 1943 to raise funds and provide other assistance to member colleges. The Fund and its members have an important and direct interest in assuring that elementary and secondary school students

---

[1] Movant organizations earlier filed a brief amici curiae urging the grant of certiorari in No. 281, by leave of this Court granted pursuant to motion.

[2] The written consent of these parties has been filed with the Clerk.

are well prepared for college and thus have a continuing concern about the persistence of segregated public schools.

The National Urban Coalition is an organization whose purpose is to improve opportunities and conditions of life for citizens living in urban areas of the nation. Founded in 1967, it has 47 affiliated local coalitions and representation from corporations, unions, religious, and civil rights organizations. The improvement of educational opportunity is among its prime purposes and to that end it has sponsored educational research and participated as amicus curiae in a case involving the equal distribution of educational resources.

The League of Women Voters of the United States, the League of Women Voters of North Carolina, and the League of Women Voters of Charlotte-Mecklenburg, North Carolina, are three organizations with common aims and principles but with independent decision-making powers. Founded in 1920, the national League now has 156,000 members in all 50 states, the District of Columbia, Puerto Rico, and the Virgin Islands. As part of its overall program of encouraging informed and active participation of citizens in government, the national League has placed major emphasis upon the quality of public education and in 1970 reaffirmed its pledge to support efforts to end racial discrimination in education. The North Carolina and Charlotte-Mecklenburg Leagues have conducted studies of the quality of educational opportunity in their respective areas. Like the national League, they are committed to work for equality of opportunity in education.

The Mississippi Educational Resources Center is a private organization established in 1969 to represent professional, parent, and community groups throughout the State of Mississippi. Its membership is predominantly black. Its purpose is to assist communities and school districts in overcoming problems incident to the school desegregation process and to assure that desegregation takes place and in an orderly and positive manner.

The Center for Law and Education, Harvard University, is an educational institution established in 1969 by Harvard University and the United States Office of Economic Opportunity to "promote reform in American education by working in the area of social policy and law." To carry out its aims, the Center has sponsored and conducted research on various aspects of the educational process. It has also served as amicus curiae in several cases involving issues within the area of its expertise.

The Washington Research Project, established in 1968, is a research organization located in Washington, D. C., and affiliated with the Southern Center for Studies in Public Policy of Clark College in Atlanta, Georgia. The principal aim of the project is to assist in the establishment of equality of opportunity for all citizens through negotiation and monitoring of administrative agency programs and litigation. It is deeply concerned with educational issues, particularly with alleviating the continuing effects of racial discrimination in public schools. It has conducted a study of the impact of Federal aid to education programs on minority children and maintains a continuing effort to monitor such programs to ensure that they are conducted without discrimination.

Each of the movant organizations consists of black and white citizens. While their activities vary, all are bound together by a common commitment to strengthen public education in this country and to work for an end to racial segregation in the schools. All of the movant organizations, moreover, share a common commitment to the maintenance of the rule of law in this nation. They believe that the rule of law is threatened by continuing violations of the rights of Negro school children declared by this Court in 1954.

Movant organizations seek leave to enter these cases for the purpose of supporting fully the position of the petitioners. Movants believe, however, that—by virtue of

their breadth, their special interest in education and the scope of their activities in conducting and sponsoring research on issues of education and civil rights—they are well equipped to inform the Court with respect to the impact that the decisions of the courts below may have upon the process of school desegregation throughout the nation. Further, movants believe that a unified and comparative treatment of these two cases might helpfully supplement the separate treatment provided in the briefs for the petitioners.

Accordingly, movant organizations respectfully request that the Court grant leave to file the attached brief amici curiae.

BRIEF AMICI CURIAE

For the United Negro College Fund, Inc.; the National Urban Coalition; the League of Women Voters of the United States; the League of Women Voters of the State of North Carolina; the League of Women Voters of Charlotte-Mecklenburg, North Carolina; the Mississippi Educational Resources Center; the Center for Law and Education, Harvard University; and the Washington Research Project of the Southern Center for Studies in Public Policy.

INTEREST OF AMICI

Amici, as is more fully set forth in the Motion for Leave to File a Brief Amici Curiae, are all organizations with a deep interest in maintaining and improv-

ing the quality of education available to children of all races. As a part of this interest, they have all committed themselves to work for the elimination of racial segregation and other forms of discrimination in education.

Several amici have conducted or sponsored research on problems of establishing equal educational opportunity. Others have supported and appeared in litigation involving the public schools and discrimination. Still others have undertaken to work for the full and fair enforcement of civil rights laws by Executive departments and agencies of the Federal Government.

All have a commitment to the maintenance of the rule of law and a deep concern about the continuing denial of constitutional rights of black school children.

STATEMENT

A. No. 281, Swann v. Charlotte-Mecklenburg Board of Education

During the 1968-69 school year, the Charlotte-Mecklenburg school system served more than 84,000 pupils in 107 schools (293a-294a).[1] Approximately 71 per cent of the pupils were white and 29 per cent were black. During that year, nearly 17,000 of the more than 24,000 black pupils in the district attended predominantly black schools, under a geographic zoning plan allowing for free transfer (459a).

To remedy this situation, which all parties now agree fell short of achieving a unitary school system, the district court held numerous hearings and received voluminous evidence. As a result of this extensive liti-

[1] Record references in this form are to the printed Appendix filed in No. 281.

gation, the details of which are set out in the Brief for Petitioners in No. 281, the district court was presented in February of 1970 with two alternative pupil assignment plans.

The school board proposed a plan which was based exclusively upon the technique of "neighborhood" or contiguous attendance zoning (727a-728a). The board plan substantially integrated all the high schools, producing a white majority of at least 64 per cent in each school (829a). The plan desegregated most of the junior high schools, but left one of them 90 per cent black and several virtually all white (830a). With respect to the elementary schools, the board plan left more than half the black elementary school pupils in nine schools which were between 83 per cent and 100 per cent black and about half the white elementary pupils in schools 86 per cent to 100 per cent white (832a-834a).

An educational expert appointed by the court, Dr. John Finger, presented an alternative plan which desegregated every school in the Charlotte-Mecklenburg system. With one minor modification, not now in issue, his plan adopted the board's proposed zoning of high school attendance areas. With respect to the junior high schools and the elementary schools, the plan started with the contiguous attendance zones proposed by the board, but where those zones left schools racially identifiable by the makeup of their student bodies, it paired all-black or predominantly black schools with non-contiguous all-white or predominantly white schools so that all the students in the zones feeding both schools would attend the formerly white school for grades 1-4 and the formerly black school for grades 5-6 (1209a-1214a).

Before February 1970, the Charlotte-Mecklenburg school system had provided substantial bus service to its pupils. During the 1969-70 school year, the board operated 280 school buses transporting nearly 25,000 of its 84,000 students (619a), at a cost of about $475,000, or about $20 per child (1259a). The plan devised by the court-appointed expert required the additional transportation of 13,300 pupils—1,500 high school, 2,500 junior high school, and 9,300 elementary school. The additional operating cost of transporting these pupils was to be about $266,000 (1269a). It was originally thought that the new busing requirements would entail a capital outlay of about $745,000, but it now appears from the hearing held after this Court granted certiorari that the outlay will be much lower because of surplus buses the school board has on hand (Br. A18-A23).[2] The school budget for the Charlotte-Mecklenburg system for 1970-71 is about $66 million (Br. A21).

Under the court expert's plan, approximately 47 per cent of the pupils in the Charlotte-Mecklenburg system would be bused to school. In North Carolina as a whole, about 55 per cent of all pupils ride buses to school (1289a). The average one-way bus trip for pupils newly bused under the plan would be about 7 miles, taking about 35 minutes (1215a). In North Carolina as a whole, the average one-way bus trip is about 12 miles (1199a), and in Charlotte-Mecklenburg the average trip during the 1969-70 school year was about 15 miles, taking about an hour and a quarter (1204a).

---

[2] Record references in this form are to the Appendix to the Brief for Petitioners in No. 281, wherein the district court proceedings following this Court's grant of certiorari are set out.

The district court ruled that the school board's plan fell short of constitutional requirements, while the plan proposed by the court-appointed expert did achieve a unitary system and was feasible; accordingly, he ordered the expert's plan into effect (819a). On appeal, the court of appeals agreed that the school board's plan failed to achieve a sufficient degree of pupil integration to qualify as a unitary plan, and accepted the district court assignment plans for junior and senior high schools, plans which involved some noncontiguous zoning and additional busing. However the court held that the assignment plan for elementary schools required an excessive amount of additional transportation, and set aside that part of the order. The court adopted what it called "the test of reasonableness"; it held "first, that not every school in a unitary system need be integrated; second, nevertheless, school boards must use all reasonable means to integrate the schools in their jurisdiction. . . ." (1267a). Judges Sobeloff and Winter, dissenting, would have affirmed the district court order in its entirety (1279a; 1295a); Judge Bryan, concurring specially, indicated his belief that the plan proposed by the school board met constitutional standards (1295a).

On remand, after this Court granted certiorari, the district court reaffirmed its original order. The school board failed to come forward with a new plan, and the district court found that no educationally sound plan falling short of the degree of desegregation achieved in its original order had been proposed (Br. A2, A27).

B. No. 436, Davis v. Board of School Commissioners of Mobile County[8]

The Mobile County school system served about 73,500 pupils during 1969-70 in 91 schools; about 58 per cent of the pupils were white and 42 per cent black. As in Charlotte, an extended course of litigation, summarized in the Brief for Petitioners in No. 436, led to a situation in January of 1970 in which the district court was required to select from alternative plans the one which would best comport with constitutional requirements.

The school board proposed a plan under which nearly 19,000 black children, about 60 per cent of the black students in the system, would be assigned to 21 all-black or virtually all-black schools. Educational experts from the Department of Health, Education and Welfare proposed two plans. The first was based entirely upon the technique of contiguous zoning, and required no additional transportation of students, but left nine all-black schools serving nearly 8,000 pupils. The second HEW plan used the additional technique of satellite or noncontiguous zoning, and paired the remaining all-black schools with predominantly white schools in the same way as did the plan ordered by the district court in Charlotte. It left no schools all-black.

Like the Charlotte-Mecklenburg system, the Mobile County system has in the past provided substantial bus service for its pupils. During the 1967-68 school year, 207 buses transported 22,094 pupils daily. Busing was not confined to the rural areas of the county; during the 1966-67 school year, 7,116 pupils were bused within metropolitan Mobile. Nor was busing confined to trans-

---

[8] Because the printed Appendix in No. 436 was not available when this brief was prepared, our statement of the case necessarily lacks record references.

porting pupils to the nearest school; during the 1966-67 school year, 2,350 pupils were bused because of non-contiguous zone assignments. Much of the busing was provided in order to maintain segregation.

Because the district court did not hold evidentiary hearings on the proposed plan, the record in this case does not reflect the extent or cost of the additional transportation which would be required to implement the HEW alternative plan which eliminated the all-black schools in the Mobile system.

In the January 1970 district court proceedings, the petitioners urged the court to adopt the HEW plan which would eliminate the all-black schools; the United States, which is a party to the case, urged the adoption of the other HEW plan, which proposed no additional transportation but left several all-black schools; and the school board urged adoption of its own plan. The district court ordered the school board plan into effect. On appeal, the three parties maintained their respective positions. The court of appeals held that the school board plan did not provide a unitary system, but at the same time it rejected petitioner's HEW plan which would have eliminated the all-black schools. It accepted a modification of the HEW contiguous zoning proposal, which, after further modification, left six all-black elementary schools serving about 5,300 children—about 17 per cent of the black pupils in the whole Mobile County system, and about 50 per cent of the black elementary school pupils in metropolitan Mobile. There have been further subsequent minor modifications of the plan, but the record does not make clear how these modifications have affected the racial makeup of the schools.

The court of appeals proceeded under a legal stand
ard which it stated as follows:

> "We have examined each of the plans presente
> to the district court in an effort to determine whic
> would go further toward eliminating all Negro o
> virtually all Negro student body schools while a
> the same time maintaining the neighborhoo
> school concept of the school system."

C. A Comparison of the Two Cases

Both the Mobile and the Charlotte school systems op
erated full dual school systems based on race well int
the 1960's. In both, little pupil desegregation ha
been achieved by the end of the 1968-69 school yea
Both are large systems, serving a majority of urba
and a minority of rural school children. Both systen
have in the past transported substantial numbers o
children to school by bus and in both busing has bee
used to perpetuate the system of segregation.

In both systems, substantial residential segregatio
makes it impossible fully to desegregate each elemen
tary school if assignment is based solely on "neighbo
hood" or contiguous attendance zones. In both case
plans have been proposed which would use only co
tiguous zones, and in both cases these plans would leav
approximately half of the black elementary school chi
dren in all-black or virtually all-black schools. In bot
cases, alternative plans have been proposed whic
would desegregate every school's student body by pai
ing schools in black areas with schools in noncontiguou
white areas; in both of the cases, these plans would r
quire the school system to provide additional tran
portation to get children to school.

In the *Charlotte* case, district court findings sup
ported by substantial evidence indicate that the add

tional transportation required by the complete desegregation plan would cost the school less than one percent of its operating budget. The percentage of children bused under the plan, and the average length of the bus trip, would be well within the statewide average for North Carolina. Similar evidence and findings are not available in the *Mobile* case, in which the district court has not held evidentiary hearings on the proposed plans. However the record in the case indicates that both noncontiguous zoning and busing of students are familiar assignment techniques in the Mobile school system.

In both cases, the respective courts of appeals have rejected the proposed plan which would completely desegregate the school system. The rationales for the rejection differ somewhat: in the *Mobile* case the Fifth Circuit has refused to go beyond "neighborhood" or contiguous zoning to achieve desegregation; while in the *Charlotte* case, the Fourth Circuit has approved some noncontiguous zoning with accompanying additional transportation, but has disapproved more extensive use of the same technique as "unreasonable."

SUMMARY OF ARGUMENT

I. In *Brown* v. *Board of Education of Topeka,* 347 U.S. 483 (1954), this Court found that the system of official segregation of the schools, based as it was upon the assumption that black people were morally and intellectually inferior to whites, amounted to a massive government-sponsored racial insult to the black people subjected to it, and hence violated the equal protection clause. In *Green* v. *Board of School Commissioners of New Kent County,* 391 U.S. 430 (1968), the Court declared three basic principles to govern final implemen-

tation of *Brown*: 1) the system of segregation must be dismantled and its effects undone; 2) the goal of this process is the abolition of racially identifiable schools; and 3) officials must take all feasible steps to achieve this goal and bear a heavy burden of justification for any failure to do so.

In the context of the present cases, *Brown* and *Green* mean that in school districts which have officially segregated the races, schools with all-black or very disproportionately black student bodies cannot be tolerated where feasible alternative plans of pupil assignment exist. Such schools are racially identifiable "black schools." To both whites and blacks in the community they represent the perpetuation of the system of official segregation and the official assumption of black inferiority upon which that system rests. They inflict the same psychological harm on black children as was condemned in *Brown*, and they perpetuate tangibly second-rate education for the pupils assigned to them. These schools must be abolished wherever this is possible through known techniques of pupil assignment; no excuse short of complete technical unfeasibility can be allowed.

II. The issue in these cases is not whether as an abstract matter the Constitution commands a particular racial balance in public schools, or even whether the Constitution condemns all-black schools as such. It is rather what remedy is required to undo the particular historical system of school segregation existing in this country, founded as it has been on assumptions of racial inferiority. The instructive analogy is to faculty desegregation, where this Court has approved a requirement of full racial balance, not as a substantive constitutional requirement, but as a remedy to dis-

mantle a well-entrenched system and to undo, as far as possible, the effects of that system.

III. In the two present cases, the courts of appeals have tolerated the perpetuation of black schools on grounds short of the unfeasibility of abolishing them. In Charlotte, the district court ordered a plan of complete desegregation which the record makes clear is technically feasible. In Mobile, the district court's failure to hold hearings has prevented development of a similar record, but a plan of complete desegregation, never found unfeasible by any court, has been submitted by government educational experts.

The excuses put forward to justify continued segregated schools are constitutionally insufficient. The Fifth Circuit's "neighborhood school concept" represents only one among several competing systems of pupil assignment used in this country, one without constitutional status, and one which has not been used in the South generally or in Mobile in particular. The Fourth Circuit's vague "rule of reasonableness" appears to excuse continued segregation where integration would require "too much" incidental transportation with its accompanying cost. Cost as such, particularly the very limited costs of achieving full desegregation in these cases, is not a sufficient excuse for maintaining segregated schools. Busing is a familiar technique of getting children to school, often used for purposes other than desegregation. It, like all other standard educational techniques, must be used where needed to complete the process of disestablishing the dual school system.

ARGUMENT

I. DISESTABLISHMENT OF A DUAL SCHOOL SYSTEM REQUIRES THAT, UNLESS DEMONSTRABLY UNFEASIBLE, PUPILS BE ASSIGNED SO THAT NO SCHOOL HAS A STUDENT BODY WHICH IS ALL-BLACK OR SO DISPROPORTIONATELY BLACK AS TO MAKE THE SCHOOL IDENTIFIABLE AS A "BLACK SCHOOL".

These cases raise the question whether school officials who have been operating separate systems of schools based upon race can be said to have disestablished those systems when they continue to assign pupils so as to maintain schools with all-black or disproportionately black student bodies. We submit that the answer is "No"—at least where there exist feasible alternative methods of assignment which would desegregate those schools.

The issue is not whether as an abstract matter the Constitution requires any particular racial balance in public schools generally, or even whether the Constitution generally forbids all-black or predominantly black schools whatever their historical background. Rather the issue is the narrower one of what remedy is required to eliminate the last vestiges of a particular historical practice, long since judged to be unconstitutional, namely the official and mandatory assignment of black children to separate schools set aside for their race.

The underlying rationale of *Brown* v. *Board of Education of Topeka,* 347 U.S. 483 (1954) (*Brown I*) and the specific principles pronounced in *Green* v. *Board of School Commissioners of New Kent County,* 391 U.S. 430 (1968), require the abolition of schools identifiable as black by the makeup of their student bodies, wherever this can be accomplished by feasible techniques of student assignment. The grounds stated by

the Fourth and Fifth Circuit Courts of Appeals for approving plans which fall short of this requirement in the present cases are insufficient as a matter of established law.

A. The Rationale of Brown I.

In the first *Brown* decision, this Court held that racial segregation of the public schools violated the equal protection rights of black children. In the American historical context, the system of segregation was no less than a massive government-sponsored racial insult to the black people subjected to it, based on assumptions of their intellectual and moral inferiority to white people. The system of segregation, and the official insult it carried with it, was most damaging as applied in the schools, for there it was directed at children of unformed minds and developing personalities, in the public institutions most crucial to their growth. The system was unconstitutional because the history of the Fourteenth Amendment made clear that the framers meant to forbid all official action which injured or degraded black people because they were black.[4]

Thus *Brown I* rested firmly on the finding of the Kansas district court: "Segregation of white and colored children has a detrimental effect upon colored children. The impact is greater when it has the sanction of the law; for the policy of separating the races is usually interpreted as denoting the inferiority of the Negro groups." 347 U.S. at 494. That was sufficient to establish the constitutional violation; official segregation meant official imputation of racial inferiority, and hence official injury to black people because of their race.

---

[4] See generally Black, *The Lawfulness of the Desegregation Decisions*, 69 Yale L.J. 421 (1960).

B. The Principles Declared in Green.

In *Brown I* the Court declared the basic principle; in *Brown* v. *Board of Education of Topeka,* 349 U.S. 294 (1955) (*Brown II*), the job of implementing the principle was returned to the district courts. In *Green, supra,* the Court addressed itself in detail to the standards governing that implementation, and laid down three essential guidelines which govern these cases.

First, the Court stated that the constitutional goal was "the abolition of the system of segregation and its effects." 391 U.S. at 440.[5] The Court, in referring to the *system* of segregation and its *effects,* recognized that the dual school system constituted and supported a set of social practices, practices which by their existence and maintenance conveyed and continued the racial insult condemned in *Brown I.* The job of the courts in remedying the wrong of segregation was not merely to undo the formal legal arrangements of the dual system, but also more broadly to dismantle the institutions in which those arrangements found fruition.[6]

Second, the Court specified what a unitary system was: it was one "without a 'white' school and a 'Negro' school, but just schools." 391 U.S. at 442. Here the Court dispelled any notion that a system might somehow be desegregated while its schools retained their former racial identification.

Third, the Court placed upon officials who had operated dual school systems "the affirmative duty to

---

[5] The Court in *Green* traced the obligation to abolish and dismantle the entire system of segregation back to *Brown II* and its command, 349 U.S. at 301, "to effectuate a transition to a racially nondiscriminatory school system." 391 U.S. at 435.

[6] See *Green,* 391 U.S. at 437: "*Brown II* was a call for the dismantling of well-entrenched dual systems . . . ."

take *whatever steps might be necessary* to convert to a unitary system in which racial discrimination would be eliminated root and branch." 391 U.S. at 437-438 (emphasis added). When school officials claimed to be operating unitary systems, the district courts were to "weigh that claim in light of the facts at hand and in light of *any alternatives which may be shown as feasible* and more promising in their effectiveness. . . ." 391 U.S. 439 (emphasis added). Thus no excuse would be heard that the means required might be too onerous; the school officials were to take "whatever steps might be necessary," to adopt "any alternatives which may be shown to be feasible." Along with the "affirmative duty" to achieve complete desegregation went *"a heavy burden upon the board* to explain its preference" for anything less than the most effective feasible plan of desegregation. *Ibid.* (emphasis added).

Thus *Green* held : 1) that the system of segregation must be dismantled and its effects undone; 2) that the goal of this process was the abolition of racially identifiable schools; and 3) that boards must take all feasible steps to achieve this goal and bear a heavy burden of justification for any failure to do so.

C. Schools With Black Student Bodies Which Could by Feasible Assignment Techniques Be Desegregated Are Remnants of the System of Discrimination Condemned in Brown I.

Where a school in a dual system is attended exclusively or very largely by black children, and where school officials maintain this attendance pattern in the face of feasible alternatives which would produce an integrated student body, that school is as a practical matter the equivalent to the "colored school" of the pre-*Brown* system of segregation. The very difficulty

of persuading southern school officials, southern judges, and even federal bureaucrats to do the job of integrating these schools is the best evidence for this fact. White school officials and parents feel a peculiar horror at the idea of assigning white children to these schools, as the records in these cases attest.

In Charlotte, when the school board was finally forced to the point of achieving some substantial desegregation in the summer of 1969, it proposed to move substantial numbers of black children to white schools, and to use school buses to get them there (481a-482a). Several black schools were closed, and the children whom they had served were bussed into white neighborhoods. There were no accompanying transfers of white students into the black central city schools (590a). Judge McMillan pointed out that this one-way integration plan was "an affront to the dignity and pride of the black citizens" in his August 15, 1969, order, but felt compelled to accept the plan for the 1969-70 school year by the exigencies of time (586a, 589a-590a).

In Mobile, when educational experts from the Department of Health, Education and Welfare were asked to prepare a plan for desegregation in the summer of 1969, their response also was to close black schools and bus the children who had attended them into white areas of town. But, where closing of a black school could not be justified, the student body of that school was left all-black; no white-to-black transfers were proposed. When the experts were asked about this obvious discrepancy, their response—that "cross-busing" did not have "financial" or "community" support—amounted to a concession that the notion of actually desegregating "black schools" by assigning white stu-

dents to them was too radical to contemplate even in the year 1969. They purported to rely on alleged legal difficulties with ordering busing of students to achieve desegregation, but as the plan they submitted clearly shows their chief concern was with *cross-busing*—the busing of white as well as black children.

In general, school desegregation to date has been a one-way process. Black children have been allowed into the white schools, but there have been few corresponding transfers of white children to black schools. Instead, large numbers of those black schools have been closed or reassigned to subsidiary uses such as vocational or special education classes even where they were newer and better equipped than the white schools which remained open, and even at the cost of running the newly integrated white schools on double shifts. Where black schools could not be closed, they have largely remained all black.[7]

Thus the black schools of today, identified by their all-black or predominantly black student bodies and by their location in black neighborhoods, retain for the white community which seeks so hard to avoid them the stigma originally conferred by the underlying segregationist assumption that they are for inferior chil-

---

[7] On one-way integration and black school closings, see Judge McMillan's order in the *Charlotte* case, text, *supra;* see also *Felder* v. *Harnett County Board of Education,* 409 F.2d 1070, 1074 (C.A. 4, 1969); *Haney* v. *County Board of Education of Sevier County,* C.A. 8, No. 19,899, June 29, 1970 (slip opinion at 11-13); *Andrews* v. *City of Monroe,* C.A. 5, No. 29358, April 23, 1970 (slip opinion at 8); *Wright* v. *Board of Public Instruction of Alachua County,* C.A. 5, No. 29999, August 4, 1970 (slip opinion at 5); *Allen* v. *Board of Public Instruction of Broward County,* C.A. 5, No. 30032, August 18, 1970 (slip opinion at 7).

dren.[8] But if they still bear that stigma for the white community, so do they for the black community and for the black children who attend them. This being so, assignment to these schools must have for these black children the same ineradicable effects upon their hearts and minds which this Court condemned as the central vice of state-imposed segregation in *Brown I*.[9]

Black schools are inferior not only because of the racist assumptions upon which they are founded and the consequent psychological harm they do, but also in a more tangible sense. These schools receive less of the resources available for education than do schools attended by the children of the dominant white community, and provide correspondingly inferior facilities and services. For example, the Civil Rights Commission found that, in a sixteen-county area of Alabama,

---

[8] One of the findings of the Civil Rights Commission, based upon its analysis of the extensive Coleman data on race and education was that:

> "Predominantly Negro schools generally are regarded by the community as inferior institutions. Negro students in such schools are sensitive to such views and often come to share them. Teachers and administrative staff frequently recognize or share the community's view and communicate it to the students. This stigma affects the achievement and attitudes of Negro students." U.S. Commission on Civil Rights, *Racial Isolation in the Public Schools* 204 (1967).

[9] A district judge with long experience in the struggle to disestablish the official dual school system put the point well:

> "The entire community, white and black, whose own attitude toward Negro schools is what stigmatizes those schools as inferior, must be disabused of any assumption that the schools are still officially segregated, an assumption it might cling to if after supposed 'desegregation' the schools remained segregated in fact." *Hobson* v. *Hansen*, 269 F. Supp. 401, 495 (D.D.C. 1967).

white-attended school buildings and their contents were worth an average of $981 per pupil, compared with an average of $283 per pupil at black-attended schools.[10] Test scores reveal the stark results of this kind of disparity—black twelfth grade pupils in the urban South score 3.5 grade levels behind their white counterparts on standard reading comprehension tests.[11]

It is a fact of political life in the South that the power and influence needed to improve the quality of schools resides in the white community. That community would not long tolerate for its children the kind of education which has typically been supplied to black children in their separate schools. Only when there are no more black schools as such, when the children of the white community attend every school, will every school receive its fair share of available educational resources.

In *Green,* this Court, recognizing both the continuing psychological harm and the continuing inferior education inherent in the black schools surviving from the pre-*Brown* system of segregation, named the racial identifiability of schools as the essential evil to be abolished by the desegregation process. 391 U.S. at 442. When school officials maintain schools with student bodies all-black or black in gross disproportion to the racial makeup of their districts as a whole, even in the face of feasible alternatives, they are maintaining

---

[10] Transcript of Hearing held before the U.S. Commission on Civil Rights, Montgomery, Alabama (1968), Exhibit No. 26 at 863.

[11] United States Office of Education, *Equality of Educational Opportunity* (1966), at 274.

racially identifiable black schools.[12] *Green* thus requires these officials to take "whatever steps might be necessary" to abolish their black schools.[13]

In the context of these cases, this means that school officials must adopt any *feasible* plan of pupil assignment which promises to leave no school's student body identifiably black. As Judge Sobeloff has said, "school boards are not obligated to do the impossible. Federal courts do not joust at windmills. Thus it is proper to ask whether a plan is feasible, whether it can be accomplished." (1284a). For example, there are all-black or virtually all-black school districts, which obviously cannot within their own boundaries abolish black schools. Though we would not discount the pos-

---

[12] In one of the companion cases to Green, *Monroe* v. *Board of Commissioners of the City of Jackson*, 391 U.S. 450 (1968), the Court held that a geographic zoning plan with a provision for free transfers was proved ineffective, and hence insufficient to meet constitutional requirements, by the survival of a junior high school and three elementary school attended only by black students. This rendered them "Negro" schools within the meaning of *Green*. 391 U.S. at 457.

[13] Of course in *Green* the Court condemned the maintenance of "white" as well as "black" schools. We have focused in these cases on the requirement of eliminating the black schools, because it is through them that the insult of official discrimination condemned in *Brown I* is most concretely imposed upon black people. This is not to slight the importance of the goal of eliminating white schools as well. Where all-white schools are allowed to continue, they provide a safe haven for whites attempting to avoid desegregation, and thus constitute a threat to the stability of a desegregated school system. As Judge McMillan stated in the *Charlotte* case, elimination of all-white schools:

> "would tend to eliminate shopping around for schools; all the schools, in the *New Kent County* language, would be 'just schools'; it would make all schools equally 'desirable' or 'undesirable' depending on the point of view; it would equalize the benefits and burdens of desegregation over the whole county . . . ." (310a-311a).

sibility of restructuring school district lines to achieve some degree of practical desegregation in such cases, it may be that in some instances geographic factors make this a practical impossibility. In these few cases, the law obviously does not require abolition of the black schools.

The limitation of feasibility is meant only to deal with these few isolated situations where existing techniques do not make full desegregation a practical possibility. It is meant to exclude all other excuses for the continued maintenance of black schools in dual systems. These other excuses are often put forward under the rubric that complete desegregation would be "impractical," but they do not mean that it cannot be achieved by known techniques. Rather as in these cases, they mean that it is not a sufficiently important goal to justify the use of techniques already familiar to educators—such as placing children on buses for a half-hour or an hour in order to get them to school. In this sense, the "impracticality" of desegregation means added inconvenience for administrators, or resistance to the reallocation of resources from other programs, or other political opposition to desegregation from the white community.

If excuses of this sort could justify failure to abolish all remnants of the dual system, this Court's command in *Green* that school officials take "whatever steps might be necessary" would be rendered a nullity. Only last Term, this Court made it clear that no such nullifying interpretation was intended; against all objections of cost, inconvenience, impracticality, even "chaos"—objections made not only by school officials but by the national administration—it unanimously ordered that plans promising an end to the dual system be put into effect *now,* in mid-school-year if that was necessary.

Alexander v. *Holmes County Board of Education*, 396 U.S. 19 (1969).[14]

II. ELIMINATION OF "BLACK SCHOOLS," WHERE FEASIBLE, IS REQUIRED AS A REMEDY FOR THE WRONG OF OFFICIAL SEGREGATION WHICH PRODUCED THOSE SCHOOLS.

We have not argued that every school with an all-black or predominantly black student body represents a violation of the equal protection clause. Such an argument could be made; there is substantial evidence that isolation of black children in schools wherever and for whatever reason it occurs, correlates highly with inferior education. United States Commission on Civil Rights, *Racial Isolation in the Public Schools* 202-204 (1967). However, no such substantive constitutional doctrine need be advanced in order to decide these cases according to the rule we have argued for.[15]

We deal, in Charlotte and Mobile, not just with *any* concentrations of black children in separate schools, but with concentrations surviving from a system which segregated these children as part of an official policy based on their assumed inferiority. We ask the Court to declare, not that the Constitution condemns

---

[14] Compare *Carter* v. *West Feliciana Parish School Board*, 396 U.S. 290, 296 (1970) (Harlan, J., concurring): "If Department recommendations are already available the school districts are to bear the burden of demonstrating beyond question, after a hearing, the unworkability of the proposals . . . ."

[15] "*De facto*" racial segregation of the schools has been held unconstitutional in several federal cases, among them *Hobson* v. *Hansen*, *supra* Note 9, and *Blocker* v. *Board of Education*, 226 F. Supp. 208 (E.D.N.Y. 1964).

We do not disclaim the arguments put forward in these cases and elsewhere that the Constitution condemns adventitious racial segregation; we merely point out that no such argument need be accepted in order to require the abolition of black schools as part of the process of dismantling official segregation.

black schools as such, but that federal courts of equity in abolishing the discriminatory dual school system must abolish the black schools which continue as a remnant of that system.

Thus it is not necessary in these cases for the Court to confront the question of the legal status of black schools in states which did not maintain formal statutory systems of school segregation. It may be that some school districts which have not maintained full dual systems have nonetheless brought about the existence of black schools through official action. In those cases, both the principle of *Brown I* and the remedial standards of *Green* would logically apply. Cf. *United States* v. *School District 151 of Cook County,* 404 F2d 1125 (C.A.7, 1968) What we stress here is that the abolition of black schools is required as a remedy to undo the effects of past unconstitutional discrimination.

The concept of a *remedial* standard is well illustrated by the way in which this Court and the lower federal courts have handled the dismantling of another aspect of the dual school system, the institution of faculty segregation. In *United States* v. *Montgomery County,* 395 U.S. 225 (1969), this Court granted certiorari to review a district court decree ordering a school board to assign faculty so that the ratio of black to white teachers in each school was substantially equal to the ratio in the system as a whole. In arguing for reinstatement of the district court decree, which had been set aside by the court of appeals, the United States relied on the same notion of a remedial standard, imposed to measure the achievement of a constitutional goal, as we urge here.

The government pointed out that general directions by the courts to "desegregate" or "abolish the dual

system" had not proved effective; more precise instructions were needed to accomplish the constitutional end. "The standard approved . . . by the district court in this case is an appropriate and workable means of measuring faculty desegregation under judicial supervision." Brief for U.S., No. 798 October Term 1968, at 12. Similarly here, the requirement of no all-black student bodies where a workable alternative exists is a relatively precise standard by which to measure the elimination of the racial identifiability of the schools in a dual system, a standard which would be more effective and less productive of delay and confusion than the vague tests now employed by the Fourth and Fifth Circuits.

In the *Montgomery County* case, the government also argued that the numerical ratio required by the district court was "designed as a *remedy for* past racial assignment which, as a result of respondent's deliberate actions, has produced racially identifiable faculties." The government added: "There is no suggestion in the district court's opinion, nor is there intended to be any in our submission here, that proportional allocation of faculty on the basis of race is a constitutional requirement." Brief for United States, No. 798 October Term 1968, at 13. Similarly here, we urge conscious racial assignment of students to eliminate the all-black schools which were produced by and survive from the system of conscious assignment on the basis of race formerly employed by the respondents here; we do not rely on any constitutional prohibition against all-black schools as such.[16]

---

[16] Compare *Louisiana* v. *United States*, 380 U.S. 145, 154 (1965):

> "We bear in mind that the court has not only the power but the duty to render a decree which will so far as possible eliminate the discriminatory effects of the past as well as bar like discrimination in the future."

This Court unanimously sustained the government's argument in *Montgomery County*. The aftermath of that decision is instructive. Within months after this Court had approved the proportional racial allocation rule as ordered by the district court, both the Fourth and Fifth Circuit had adopted the same strict rule to govern faculty assignment in *all* desegregating school districts under their jurisdictions. *Nesbit* v. *Statesville City Board of Education,* 418 F.2d 1040 (C.A. 4, 1969); *Singleton* v. *Jackson Municipal Separate School District,* 419 F.2d 1211, (C.A. 5, 1969). The President in his March 24, 1970 statement, giving the Administration's view of existing school law, adopted the same rule for nationwide enforcement by the executive branch.[17] In short, as soon as this Court approved a simple and easily applied rule, even a very strict one, to measure the achievement of a unitary system in the area of faculty desegregation, the courts and the executive branch united to apply it generally. The result has been that the issue of faculty desegregation, once as divisive in the schools and time-consuming in the courts as the issue of student desegregation is today, has virtually disappeared as a source of delay and confusion in the process of converting to unitary school systems throughout the South.

In our view, adoption of the rule we propose here for student desegregation would have much the same result in the area of pupil assignment. Southern school officials would turn from struggling to maintain the greatest degree of pupil segregation which could be wrested from the courts to quick and final abolition of the dual system and then to their basic job of education.

---

[17] Statement of the President on School Desegregation, March 24, 1970, at 13.

With the establishment of a relatively simple and easily administrable rule, the protests of unhappy white constituents, now spurred by hopes of success for such slogans as "neighborhood schools" and "no busing" could be turned aside by the unanswerable response that the courts have finally spoken, the law is now clear, the job now finally must be done.

III. THE COURTS OF APPEALS IN THESE TWO CASES IMPERMISSIBLY APPROVED THE CONTINUED EXISTENCE OF BLACK SCHOOLS ON GROUNDS FALLING SHORT OF THE UNFEASIBILITY OF DESEGREGATING THEM.

In each of these cases, a plan, drawn up by educational experts, which would have achieved the desegregation of the student body of each and every school, was submitted to the district court. In each case a plan which fell short of achieving this goal was approved by the court of appeals. In neither case was the plan which would have achieved complete desegregation shown to be unfeasible. Indeed in the *Charlotte* case, the record made in the district court and the court's findings supported by that record incontravertibly establish that the complete desegregation plan was feasible within any definition of that term. In the *Mobile* case, the complete desegregation plan closely resembled the plan accepted by the district court in Charlotte, based as it was upon the same technique of limited noncontiguous pairing of white and black schools. Only the failure of the district court in Mobile to hold a hearing on the proposed plans prevented the development of a record which could have conclusively established the feasibility of this plan. There is nothing in the record, however, to suggest that the plan is less than fully feasible; and in any event, the school board has in no way met its burden of proving it impossible to

implement. Cf. *Carter* v. *West Feliciana Parish School Board, supra,* 396 U.S. at 296 (Harlan, J., concurring).

The courts of appeals did not purport to find either of the complete desegregation plans unfeasible. Rather the courts rejected them on other grounds: the Fifth Circuit in the *Mobile* case because the plan went beyond "neighborhood" zoning, the Fourth Circuit in the *Charlotte* case because the plan required an "unreasonable" amount of busing. Neither of these grounds provides a constitutionally sufficient excuse for maintaining all-black schools as remnants of the system of segregation.

A. The Mobile Case and the "Neighborhood School Concept".

In the *Mobile* case below, this Fifth Circuit panel[18] announced its intention to accept that plan "which would go further toward eliminating all Negro or virtually all Negro student body schools while at the same

---

[18] The "neighborhood school" rule followed in this case is by no means a uniform standard for defining achievement of a unitary school system within the Fifth Circuit. In *Adams* v. *Mathews,* 403 F.2d 181, 188 (1968), that court held:

> "If in a school district there are still all-Negro schools, or only a small fraction of Negroes enrolled in white schools, or no substantial integration of faculties and school activities then, as a matter of law, the existing plan fails to meet constitutional standards as established in *Green.*"

In *Henry* v. *Clarksdale Municipal Separate School District,* 409 F.2d 682 (1969), the Fifth Circuit rejected a geographic zoning or "neighborhood" attendance plan for Clarksdale, Miss., because it failed to achieve sufficient pupil integration. The court said:

> "A school board's zoning policy may appear to be neutral but in fact tend to retard desegregation because it binds pupils to custom-segregated neighborhoods. In this situation, the board's failure to take corrective action amounts to the State's giving official sanction to continue school

time maintaining the neighborhood school concept of the school system." In other words, it erected the maintenance of "neighborhood schools" into an absolute which overrides the constitutional obligation to disestablish the dual school system.

We submit that the "neighborhood school concept" has no such constitutional status. It is rather one among several concepts used in this country as a basis for assigning students to schools. Whether or not it should be adopted by a particular school district is a matter of educational policy, to be decided by school officials within the constraint of the constitutional requirement of complete disestablishment of the dual school system. That is the proper order of priorities—not, as the court below would have it, that courts are to meet constitutional requirements within the constraint of a particular educational theory of pupil assignment.

One need look no further than Mobile, Alabama, to see that the "neighborhood" system of pupil assignment is not uniformly in use throughout this country. Mobile has never had a neighborhood school system. Until very recently, it has had a racial system of assignment, under which black and white children both rode on buses past nearby schools designated for the other race on the way to their own "black" or "white" school. More recently, under pressure from the courts

---

segregation . . . ." 409 F.2d at 689. And see *United States* v. *Indianola Municipal Separate School District*, 410 F.2d 626 (1969).

Only recently, the Fifth Circuit's second decision in the *Clarksdale* case reiterated the holding that geographic zoning which left all-black schools did not meet constitutional standards. *Henry* v. *Clarksdale Municipal Separate School District*, No. 29165, August 12, 1970 (slip opinion at 3).

to desegregate, Mobile school officials have adopted a crazy-quilt of assignment policies, detailed in the Appendix to the Brief for Petitioner in No. 436, all designed to achieve maximum segregation rather than contiguity of child's home to child's school.

Alternatives to neighborhood school assignment have been adopted for many reasons other than to avoid desegregation. The largest part of the history of rural schools in America during this century has been the movement from the one-room "neighborhood" school to which each child could walk, to the larger consolidated school which requires a system of bus transportation—a movement promoted by the search for better education through the economies of scale possible in larger schools. Similarly in many of our larger cities, the "neighborhood concept" is violated every day as thousands of children with special abilities or special problems attend far-away schools with specialized programs designed to meet their needs.

This is not to say there are no values in having schools close to home. There are of course the values of convenience and of minimizing time and money spent in transportation. There are the values of linking the school to a community, and of giving parents ready geographical access to their children's school, though these are often exaggerated in present day conditions.[19] (In urban areas today, few "neighborhood"

---

[19] To the extent that there are values in having children attend school close to home, one of the issues in both the *Charlotte* and the *Mobile* cases is whether black children have a right to share in these values equally with white children. Acceptance of a half-way approach to pupil integration has usually meant that black children are "integrated" into white schools in white neighborhoods, while there is no corresponding transportation of white children to black schools in black neighborhoods. See Note 7, *supra*, and accompanying text.

schools really serve anything remotely like a real community; and once the school is removed beyond walking distance from the home, as it often is even in our cities, the distance a parent must drive or take public transportation to reach his child's school becomes only a matter of degree.)

The rule which the Fifth Circuit has built upon the concept of the neighborhood school does not even have the exactness and precision which appears at first glance to be its chief virtue. Once this Fifth Circuit panel departs from the strict mathematical model of the "neighborhood school" which it constructed in *Ellis* v. *Board of Public Instruction of Orange County*, 423 F.2d 203 (1970)—and as far as we know, that model has been applied *only* in that single case—it becomes most unclear exactly what the "neighborhood school concept" is. It does not bar the pairing of schools, for instance; the court of appeals ordered schools paired in this very case, observing only that the pairings were "well within any reasonable definition of a neighborhood school system."

Ultimately, the "neighborhood school" rule must be rejected because it excuses the continuation of black schools in districts with dual systems for reasons short of the complete unfeasibility of total desegregation, reasons which are too easily and too often used to mask opposition to desegregation itself. This Court has in the past dealt unequivocally with apparently neutral slogans which effectively produce continued segregation—with "political impossibility," *Cooper* v. *Aaron*, 358 U.S. 1 (1968), with "freedom of choice," *Green*, supra, with "administrative chaos," *Alexander*, supra. "Neighborhood schools" is, in the context of this case, merely another of these slogans behind which continued

segregation can take shelter, and should be dealt with the same way.[20]

B. The Charlotte Case and the "Rule of Reasonableness".

The rule laid down by the Fourth Circuit in the *Charlotte* case—that school boards operating dual systems must make "all reasonable efforts to integrate every school" (1277a)—has the single advantage over the Fifth Circuit's "neighborhood school" rule that it does not bar the use of the legitimate and accepted technique of noncontiguous or satellite zoning as a tool for eliminating the effects of official segregation. In every other respect, however, the Fourth Circuit's "reasonableness" doctrine as applied in this case is a wholly unacceptable standard by which to measure compliance with the constitutional mandate.

---

[20] In this case, the court of appeals held that the wrong inherent in the maintenance of black schools "can be further alleviated through a majority to minority transfer policy and through the functioning of a bi-racial committee." Similarly in the *Charlotte* case, the Fourth Circuit noted factors which would ameliorate the existence of black schools: majority to minority transfers, integrated special classes and out of school activities, and the requirement that each student must at some point in his career attend an integrated school.

These devices, taken by themselves, are all half-way measures, so long as black children continue to attend black schools in the face of feasible alternatives. In particular, the majority to minority transfer device puts upon black children the burden of desegregating the schools, whereas the *Green* case firmly declares accomplishment of that task to be the affirmative duty of the school board. And the notion that an integrated education for part of a child's career excuses assigning him to an all-black school for the remainder is reminiscent of the "grade a year" and other gradualist approaches to desegregation common during the era of "all deliberate speed."

First, the "reasonableness" test is scarcely a standard at all, in the sense of a meaningful guide for the school officials and district courts who must administer the process of desegregation. The test allows as an excuse for failing to achieve the goal of complete integration the "unreasonableness" of the steps needed to accomplish the task. "Unreasonableness", as the Fourth Circuit sees it, is a conclusory term through which judges can express a subjective judgment that the difficulties of achieving complete desegregation are simply too much for school officials to have to put up with. Promulgation of a "standard" like this is a guarantee of years of continued litigation and strife, with inconsistency even in the end as the promised result.[21]

Second, the "reasonableness" test impermissibly tolerates the perpetuation of remnants of the system of segregation which could feasibly be eradicated. This case makes clear that for the Fourth Circuit, "unreasonable" does not mean unfeasible or unworkable in practice. It has never been seriously argued that the plan ordered by Judge McMillan could not be put into effect consistently with the continued effective operation of the Charlotte-Mecklenburg school system—indeed, that system is today operating under that plan.

---

[21] As Judge Sobeloff has said, dissenting below:

> "Handed a new litigable issue—the so-called reasonableness of a proposed plan—school boards can be expected to exploit it to the hilt. The concept is highly susceptible to delaying tactics in the courts. Everyone can advance a different opinion of what is reasonable. Thus, rarely would it be possible to make expeditious disposition of a school board's claim that its segregated system is not 'reasonably' eradicable." (1290a).

There is no plausible argument that harm or injury to the children invalidates the district court plan, for the record contains no evidence of such harm. Under the district court's plan a lower proportion of children will be bused to school in Charlotte than are bused in the state as a whole. The average length of the bus trip for those newly bused under the district court plan is less than the average length both for the state as a whole, and for the children previously bused within the Charlotte-Mecklenburg system.

The court of appeals' objections to the district court plan seem to be based on its monetary cost alone. That objection is insufficient on its face. The operating cost of the elementary school busing ordered by the district court was found by the court to be about $186,000, this in a school system with a projected operating budget of about $66 million. The capital cost of the new buses is not precisely known, but all of the evidence indicates that it will surely be far below the original estimate of $745,000 for the district court's entire busing plan. As the district court found in its hearings after this Court granted certiorari, surplus buses owned by the Charlotte-Mecklenburg system, and extra buses available through loan from the state, have brought about a situation where "[n]o capital outlay will be needed to supply buses for the 1970-71 school year." Appendix to Brief for Petitioner, Br. A23.

As a general matter, the fact that it costs money to desegregate the schools is no excuse for failure to do the job. *Griffin* v. *County School Board of Prince Edward County,* 377 U.S. 218 (1964). Whatever may be the outer limits of that principle—whether, in some hypothetical case, the monetary cost of desegregating

each school in a system might be so great as to disable the operation of that system and hence render achievement of the goal "unfeasible"—those outer limits are not even approached in this case.

In this case, Judge McMillan has shown that the process of desegregation can be completed, and a wholly unitary system can be achieved in an urban southern school district with substantial residential segregation. He has in fact done the job which this Court entrusted to the federal district judges of the South in *Brown II*, and he has done it with patience, sensitivity and skill. That good work should not be undone by the court of appeals' vague and constitutionally insufficient "rule of reasonableness." [22]

C. The Question of Busing.

In the popular press and in the political arena, these cases are generally thought to be primarily concerned with the question whether the busing of children to school is required as part of the process of desegregation. As we see the cases, this is at most a peripheral issue. The process of disestablishing dual school systems requires a *result*—the abolition of the black

---

[22] Judge McMillan made extensive findings to the effect that residential segregation in Charlotte was in large part the result of state action (297a-298a, 455a-456a, 1229a). These findings were summarized and affirmed by the court of appeals (1264a). While these findings compound the constitutional wrong of using geographic zoning to impose segregated housing patterns on the schools, we do not rely upon them here. Our view is rather that school officials are required to take all feasible steps, including transportation of pupils, to eliminate racially identifiable schools, whatever the cause of residential segregation may be. Cf. *Brewer v. School Board of the City of Norfolk*, 397 F.2d 37, 41-42 (C.A. 4, 1968).

schools which were part of that system. The means to be used to accomplish this end are limited solely by technical feasibility. Busing of children to schools is merely one among many tools which can be used to bring about the required result.

As the Fourth Circuit itself noted in the *Charlotte* case, "[b]ussing is neither new nor unusual. It has been used for years to transport pupils to consolidated schools in both racially dual and unitary school systems. Figures compiled by the National Education Association show that nationally the number of pupils bussed increased from 12 million in the 1958-59 school year to 17 million a decade later." Today about 40 percent of the nation's school children ride a bus to school. As the Center for Urban Education has put it, "Riding the yellow school bus is as much a symbol of American education in 1970 as the little red schoolhouse was in 1900." Center for Urban Education, "On the Matter of Busing" at 1 (Staff Memorandum, February 1970).

Busing has in the past been used for numerous purposes, some worthy, though none perhaps so important as helping to overcome decades of unconstitutional discrimination. It has been used to get rural children to the larger and more efficient consolidated schools which replaced their one-room schoolhouse. In the suburbs, it has been used to transport children over large areas to the excellent schools which those communities often provide. In cities, it has been used to overcome the safety and health hazards of children walking to school through city streets or taking public transportation. In each of these instances busing has cost money and has coincided with children attending school far from their homes, but not until it was used to achieve desegregation did it become an issue of public controversy.

The school officials and parents who so vigorously object to busing for purposes of desegregation raised no similar outcry in past years against the extensive busing required to maintain the system of racially segregated schools. Today, white parents who remove their children from public schools to avoid integration typically put the same children on buses for long rides to segregated private schools, and pay heavily for the privilege. A recent survey conducted by the Southern Regional Council indicated that a random sample of recently established white private schools bused an average of 62 percent of their pupils (as opposed to 49 percent of public school pupils in eight southern states) an average distance of 17.7 miles (as opposed to 10.1 miles for public school pupils in these states) each day to school. Levine and Griffith, *The Busing Myth*, South Today, Vol. 1, No. 10, at 7 (May 1970).

There is no evidence that busing is in any way harmful to children. As the district court found in the *Charlotte* case, "[s]chool bus transportation is safer than any other form of transportation for school children." Appendix to Brief for Petitioners, No. 281, at Br. A16. The only study we have found of the psychological effects of busing for purposes of desegregation, made by a distinguished child psychiatrist, found that children being bused in the Boston public school system experienced "no significant medical or psychiatric 'harm' or 'injury' as a result of the travel or change." Coles, *Northern Children Under Desegregation*, 31 Psychiatry 1, 14 (1968).

In short, busing of children to school is simply a technique which can be used for good or for ill in the administration of a school system. The facts about

busing, its extent and its past acceptance, suggest that the recent outcry against it is merely the 1970 version of the sixteen year old campaign to undermine the *Brown* decision.

CONCLUSION

The importance of these cases to the vindication of the constitutional rights of black children—rights which have been long denied—cannot be overestimated. If the decisions of the courts of appeals below are allowed to stand, the answer to the question "What has Brown accomplished?" will be forever an equivocal one. Much of the formal structure and some of the concrete manifestations of the system of segregation will be gone. But thousands of black children will spend years of their educational careers—most often the earliest, formative, years—in schools indistinguishable as a practical matter from the black schools established by the system of segregation. After all the years of turmoil and tragedy around the lives of these black children, it simply cannot be that they will be forced to settle for formal or half-way equality. The system of segregation and its effects must be abolished—all of it.

Accordingly, we ask that the judgments of the courts of appeals be reversed, and the cases remanded for

further proceedings consistent with principles urged in this brief.

MOTION FOR LEAVE TO FILE BRIEF AS AMICUS CURIAE OF CHARLES E. BENNETT, M.C.

TO: The Chief Justice of the United States and the Associate Justices of the Supreme Court of the United States

COMES NOW Charles E. Bennett, Member of Congress, and respectively moves this Honorable Court for the entry of an Order granting him leave to file a brief as amicus curiae in this cause, which brief is incorporated herein and tendered herewith, and in support thereof would show unto this Court as follows:

1. This motion and accompanying brief is filed pursuant to the provisions of Rule 42 of the Revised Rules of the Supreme Court of the United States adopted June 15, 1970, effective July 1, 1970.

2. The undersigned Charles E. Bennett, is a Member of

Congress, representing the Third Congressional District of the State of Florida, which district encompasses almost all of the Consolidated City of Jacksonville, Florida. Said City has a geographical area of 840.1 square miles, which makes it one of the largest cities in the United States in area. The boundaries of said Consolidated City of Jacksonville, Florida, are coterminous with the physical boundaries of Duval County, Florida, whose school system is the thirteenth largest school system in the United States. Said school system for the 1970-1971 School Year is projected to serve 122,549 pupils in a total of 137 schools.

3. Of the total pupil population of 122,549, there is a projected black pupil population of 35,287 and a white pupil population of 87,262. This gives an approximate ratio of white to black of 70-30%.

4. The Consolidated City of Jacksonville in the "Inner Core City" includes a "ghetto" area, which encompasses 26 black or substantially all-black schools by pupil population.

The pupil attendance in said school system is based upon a neighborhood plan with zoned boundaries established on objective non-racial grounds utilizing the criteria of (a) capacity of the subject school, and (b) proximity to the school.

5. The school system of the Consolidated City of Jacksonville is currently involved in an integration suit under the style of *Daly N. Braxton, et al, Plaintiffs, vs. The Board of Public Instruction of Duval County, Florida, et al, Defendants,* United States District Court, Middle District of Florida, Jacksonville Division, No. 4598-Civ-J (Hon. William A. McRae, Jr., presiding Judge).

6. On August 6, 1970, in open court, the United States District Judge William A. McRae, Jr. announced as the "law

of the case" a constitutional duty upon the Duval County School Board to racially integrate all or substantially all of the remaining all-black or substantially all-black schools in the ghetto area of the City of Jacksonville, without however making any finding that the zone boundaries of the neighborhood schools established by the Duval County School Board were in any way gerrymandered or other than objectively drawn on a non-racial basis. (See Exhibit "A" to the Brief tendered herewith)

7. On August 6, 1970, the same District Judge entered an Order requiring (as the first step towards compliance with the aforesaid "law of the case",) that for the School Year 1970-1971 the Duval County School Board arbitrarily pair, cluster, and gerrymander certain of the former black or all-black schools in the ghetto which lay on the periphery of said ghetto with white or substantially all-white schools laying just outside of the periphery of the ghetto (see Exhibit "B" to the *amicus curiae* brief incorporated and tendered herewith).

8. The aforementioned August 6, 1970 Order is obviously merely the first step in effectuating what the U. S. District Court conceived to be the final constitutional mandate imposed upon the Duval County School Board in its statement of the "law of the case" at the hearing held on August 4, 1970.

9. As a direct and proximate result of the aforesaid August 6, 1970 U. S. District Court Order, the school system of the City of Jacksonville has been forced to acquire an additional 36 school buses at a cost of $190,000.00, because of the additional "busing" requirements mandated by the Order of the court with respect to the pairing, clustering and gerrymandering of certain zoned boundaries by the Court Order.

10. The action of the Court and the required pairing, clustering, gerrymandering and busing of schools and school children, respectively, has caused tremendous emotional impact upon the people of the Consolidated City of Jacksonville, both black and white. The undersigned Charles E. Bennett respectfully submits that the August 6, 1970 Order of the U. S. District Court is merely the forerunner of far more sweeping Orders from that Court or from the United States Court of Appeals for the Fifth Circuit where the *Braxton* case, *supra*, is currently pending on appeal under the style of *Daly N. Braxton and Sharon Braxton, etc., et al, Plaintiffs-Appellees, vs. The Board of Public Instruction of Duval County, Florida, etc., et al, Defendants-Appellants*, Case No. 30418, if the aforesaid "law of the case" is upheld and maintained.

11. The undersigned Charles E. Bennett, Member of Congress, would respectfully show unto this Court that the situation in the school system in his District is similar to the situation faced by the Charlotte-Mecklenburg Board of Education in the above-entitled cause.

12. The August 6, 1970 Order of the U. S. District Court directed to the school district in the City of Jacksonville, as well as pronouncement of the "law of the case" in open Court on August 4, 1970, is a pronouncement by the Court that the City of Jacksonville, Florida, is required to bus pupils or students from one school to another for the sole purpose of racially balancing student bodies, although Section 407(a) of Title IV of the Civil Rights Act of 1964, enacted by the Congress of the United States, specifically prohibits such orders.

13. The decision by this Court in the present case with reference to Question No. 1 presented herein as set forth on Page 3 of the Petition for Writ of Certiorari will have an immediate, direct and material bearing upon the pronounce-

ment of the "law of the case" of the United States District Court in the above-cited *Braxton* case, *supra*, as to any such constitutional duty imposed upon metropolitan school districts to arbitrarily integrate, for integration sake alone, any black or substantially all-black ghetto schools in the absence of any finding that the neighborhood boundaries of said schools, together with the remaining schools throughout the district, are drawn on an other than objective non-racial basis.

WHEREFORE, the premises considered as stated above, the undersigned Charles E. Bennett, as Member of Congress, respectfully moves this Court for the entry of an Order authorizing him to file the accompanying brief tendered herewith as *amicus curiae* in the above-entitled cause.

AND your movant will ever pray.

Civil Rights Act of 1964, P.L. 88-352, 88th Cong., 2nd Sess., 78 Stat. 241 ..... *passim*

In The
Supreme Court of the United States

No. 281

JAMES E. SWANN, ET AL.,

Petitioners,

v.

CHARLOTTE-MECKLENBURG BOARD OF EDUCATION, ET AL.,

Respondents.

AMICUS CURIAE BRIEF OF CHARLES E. BENNETT, M.C.

QUESTIONS ADDRESSED

1. Is there a constitutional duty imposed upon a metropolitan school district to racially integrate the student bodies of black or substantially all-black schools located within a metropolitan ghetto area by requiring such metropolitan school districts to assign particular children, black and white, to a particular school solely because of their race and to exclude said children from schools they would otherwise attend solely because of their race where the attendance of said children, black and white, at their former schools was not the result of any official policy or practice by the school district of restoring or reinstituting a former dual school system on a segregated basis and where zoned attendance boundaries of said former schools were and are based upon

bona fide non-racial and objective criteria of a neighborhood school plan utilizing the factors of (a) capacity and (b) distance from each school for the establishment of such boundaries.

2. Are Courts of the United States "empowered" to issue orders to bus pupils or students from one school to another or from one school district to another to racially balance student bdies although Section 407(a) of Title IV of the Civil Rights Act of 1964 specifically prohibits such orders?

3. Does the requirement of arbitrarily or artificially integrating for integration sake alone the student population of black ghetto schools in a metropolitan school district result in the establishment of *de jure* quotas by the Courts and does not such establishment constitute the assignment of students to public schools in order to overcome racial imbalance in violation of Section 401(b) of Title IV of the Civil Rights Act of 1964?

ARGUMENT

PRELIMINARY STATEMENT

This *amicus curiae* does not wish to overburden the record of the above-entitled cause or the cases consolidated for disposition therewith by reiterating the very thorough and succinct argument and authorities set forth in the *amicus curiae* brief of William C. Cramer, Member of Congress.

The undersigned *amicus curiae* completely concurs in the argument made and the authorities cited in the *amicus curiae* brief of the said William C. Cramer, Member of Congress, and incorporates same by reference herein.

The main purpose of this *amicus curiae* brief is *factual* in nature.

We seek to set out an example of what happens to a large metropolitan school district when the courts impose a doctrinaire and arbitrary duty to integrate for integration sake alone student populations of all or substantially all of the black or substantially all-black neighborhood schools located within a metropolitan "ghetto." The situation in the City of Jacksonville, Florida, is akin and analogous to that of the City of Charlotte, North Carolina. It is similar and analogous to every city having a greater or lesser degree of "ghettoization" by race, whether the ghetto occurs in Atlanta, Miami, Jacksonville, Chicago, Boston, Philadelphia, Cleveland, etc. It is a nationwide problem.

The purpose of this brief is to succinctly bring to the attention of this Court another illustration in addition to that of Charlotte, North Carolina, of exactly what happens when the arbitrary "integration for integration sake alone" rule is imposed upon a metropolitan school district.

BASIC FACTS CONCERNING THE DUVAL COUNTY PUBLIC SCHOOL SYSTEM

Pursuant to authorization of Section 9 of Article VIII of the Constitution of 1885 of the State of Florida, the Florida State Legislature, in 1967, enacted Chapter 67-1320, as amended by Chapter 67-1310, Laws of Florida of 1967, which authorized a referendum of the citizens of the City of Jacksonville and the former political entity known as Duval County, Florida, a political subdivision of the State of Florida, to determine whether or not they desired a consolidation of the former City of Jacksonville with the former county government.

The referendum was successful by a vote of 2 to 1.

On October 1, 1968, consolidation of the former City of Jacksonville and the former Duval County was accomplished as a matter of law. Since that date, the Duval County School Board is an independent agency of the Consolidated City of Jacksonville.

The Duval County School System encompasses the entire Consolidated City of Jacksonville, which city is now by operation of law, coterminous with the physical boundaries of Duval County, with an area of 840.1 square miles.

The School System is the thirteenth largest school system in the United States.

The total population in the City according to the latest preliminary Federal census figures is in excess of 513,000.

There is an approximate ratio of 70 white to 30 black in the population as a whole as well as in the student population of the school system.

For the 1970-1971 School Year, the projected student population in the 137 schools scattered throughout the 840.1 square miles of the school system is a total of 122,549 students, breaking down to 87,262 white and 35,287 black students.

Of the 137 schools in the entire system, 26 schools are located in or on the edge of the black "ghetto" area and have a student population of all-black or substantially all-black, i.e., less than 10%, white pupil admixture.

Reference is made to the analysis map which is attached hereto as Exhibit "C". This map reveals a realistic analysis of the City of Jacksonville's school attendance areas. They have been divided arbitrarily into seven (7) different areas purely for analysis purposes.

The boundaries of these analysis areas are the Intracoastal Canal, the St. Johns River, the interstate highways, and the Atlantic Ocean.

All students who live more than 1.5 miles away from their subject school are transported to the school by school transportation buses as a matter of School Board policy (Florida School Law requires transportation when a student lives in excess of 2 miles from the school he is attending, but authorizes school boards to shorten this distance, as has been done by the Duval County School Board). School Board budgeted figure for pupil transportation costs for 1970-1971 is $1,132,934.00.[1]

Of this transportation cost amount, approximately 50% is derived from state revenue designated for pupil transportation and 50% from other sources.

The school attendance plan established by the subject school district in Jacksonville, Florida, is a "neighborhood school plan" whereby the basic criteria used in establishing said boundaries are (a) the size and capacity of the subject school in handling the number of students and (b) the proximity of the student with relationship to his residence to the school.[2]

An examination of Exhibit "C" (the analysis map) reveals that for the School Year 1970-1971:

(a) *Area I* (the Jacksonville Beaches) is completely and practically integrated. The Plaintiffs in the *Braxton* case or

---

1. As a result of the U. S. District Court Order of August 6, 1970 (see Exhibit "B" attached hereto) this figure has had to be increased by an amount in excess of $190,000.00.

2. Of course, it is obviously necessary on occasion to take into account artificial and natural barriers, such as the St. Johns River itself, the existence of multi-lane limited access interstate highways, etc., in establishing said boundaries.

the Miami Desegregation Center in its latest report in the *Braxton* case do not allege otherwise.

(b) *Area II* (Arlington). In this entire area, there is a total projected black pupil population of only 127 as compared to 6,229 white pupils. The black population is scattered throughout the Arlington area. There is only one school (Lake Lucina) where there are no black pupils within the neighborhood attendance area. All pupils attend school in their attendance area. Neither the Plaintiffs nor the Desegregation Center in the *Braxton* case, *supra*, charged that any of the boundary lines in Area II were "gerrymandered" to maintain or perpetuate segregation. Black pupils within the Area will feed through the two junior high schools and into Terry Parker Senior High. Thus, black pupils within Area II will attend throughout their academic careers predominantly white schools.

(c) *Area III* (Southside). In this area, the School Board recently altered certain boundary lines to provide for better use of facilities in this area. There are 880 black elementary students and 9,807 white elementary students. The black pupil population is scattered throughout the elementary schools with the one exception being School 159 (Pine Forest) which would have had 92 white pupils attending for the first time a formerly all-black school. In each of the three junior high schools, black pupils at this stage of their academic careers are attending predominantly white schools and the same is true, of course, in the two senior high schools in this area.

Neither Plaintiffs nor the Desegregation Center contend that any of the neighborhood zone boundaries are gerrymandered.

(d) *Area IV* (Southwest). In this area, the black stu-

dents are to a certain degree scattered throughout the elementary school attendance areas. In each case where black students attend school, they attend predominantly white schools. There are no schools which have no white pupils attending and there are only five schools, e.g., Ortega Elementary, which are all-white.

Neither Plaintiffs nor the Desegregation Center have seen fit to charge the School Board with improperly drawn boundary lines of any of the schools in question. Here again, in each of the junior high schools, black students will be in attendance with the majority of white students. The same is true of the three senior high schools located in this area. It is also obvious that the attendance of the senior high schools of black students will increase due to the operation of the neighborhood feeder system of the junior high schools for the following School Year 1971-1972.

(e) *Area V* (West—between Interstate 10 and U.S. #1). This area is adjacent to the ghetto area with the majority of the elementary black students residing in the attendance area for Forest Park, A. L. Lewis and West Jacksonville, together with S. P. Livingston. The remainder of the black pupils live in elementary school attendance areas which are to some extent integrated, being on the border of the ghetto. Here again, neither the Plaintiffs nor the Desegregation Center has challenged the propriety of any attendance zone boundary.

(f) *Area VI* (I-95 East to the St. Johns River). Area VI, together with Area VII, hereinafter discussed, constitute approximately 75% of the black population of the Consolidated City of Jacksonville and together constitute or encompass the ghetto area. This is reflected in the attendance figures for the elementary school with pupils attending schools in their

respective school attendance areas. Schools 3, 6, 70, 106, 135 and 148 reveal only slight integration in the neighborhood attendance area and in the case of School 135 and School 148, there is apparently solid black attendance neighborhoods.

Neither the Plaintiffs nor the Desegregation Center has charged the School Board with improperly drawing any of these school attendance boundary lines.

(g) *Area VII* (Northwest–West of I-95 to U.S. #1). This area represents the other half of the ghetto area encompassed by this area and Area VI, together with adjacent neighborhoods that are to a certain degree integrated. Schools 14, 124, 128, 154, 157, 158, 162, 163, 164 and 166 in the elementary school level indicate a complete and solid black neighborhood residential segregation. The remaining schools indicate a varied pattern of integration from completely all-white, e.g., Schools 37 and 59, to incipient integration in School 14. Here, as in the other areas, pupils attend schools in their neighborhood attendance area. The number of black pupils and white pupils which are transported are almost equal.

Prior to the entry of the August 6, 1970 Order, the School System had 27 schools that were either all-black or were comprised of predominantly black student bodies with the white percentage of student participation being less than 10%.

A glance at the map will readily disclose the existence of a large ghetto area encompassed by Areas VI and VII primarily, but also including a portion of Area V along the periphery thereof.

Within this ghetto area there are 26 black or substantially all-black schools as far as the ratio composition of the stu-

dent body is concerned.[3]

On the attached Exhibit "C" (the analysis map), we have circled those schools which have been ordered to be paired or clustered on the edge or periphery of the ghetto and "x"ed out the high schools within the ghetto which have been closed as senior high schools and whose attendance boundaries have been gerrymandered by the August 6, 1970 Order of the District Court.

Placing the first and second grade in one school of the cluster; the third and fourth grades in another school; and the fifth and sixth grades in the third school of the cluster has produced in many, many cases the need for an elementary child to be transported by bus more than the 1.5 miles normally established by School Board policy.

The result which has often occurred is that in a family, for example, having three children of elementary school age, who formerly all attended a school within a few hundred yards of their front door, (both black and white) said children are now required to get on a bus to be transported back and forth to their respective grades assigned in the paired or clustered schools.

It is respectfully submitted that this result is not only incongruous but has a slight "Alice in Wonderland" effect about it all.

---

3. Parenthetically, it should be noted that the Duval County School Board, pursuant to a U. S. District Court Order entered on December 30, 1969, has transferred some 1300 black and white teachers throughout the system to establish the black-to-white teacher ratio of 70-30% in each school of the system as mandated by *Singleton v. Jackson Municipal Separate School District* (5th Cir. 1965), 348 F.2d 729 (*Singleton* I); *Singleton v. Jackson Municipal Separate School District* (5th Cir. 1966), 355 F.2d 865 (*Singleton II*); *Singleton v. Jackson Municipal Separate School District* (5th Cir. 1969), 419 F.2d 1211 (No. 26285, December 1, 1969), reversed in part, sub nom., *Carter v. West Feliciana Parish School Board* (1970), ___ U.S. ____, 90 S.Ct. ____, 24 L.Ed 2d 477 (*Singleton* III); and *Alexander v. Holmes County Board of Education*, 396 U.S. 19 (1969).

We pass over the fact that such clusterings and pairings of course completely destroy the benefits derived by younger children from attending school with older children and learning by imitation as to mores and manners.

Local support for neighborhood schools in the matter of Dads' Clubs, P.T.A.s, etc. is, in most cases, destroyed.

Two things are graphically shown on Exhibit "C".

First, it is obvious that the U. S. District Court Order of August 6, 1970 is the "first bite of the apple". It is an attempt to proceed around the periphery of the ghetto and to pair or cluster the all-black or substantially all-black schools with corresponding all-white or substantially all-white schools just outside of the ghetto.

Secondly, there is left remaining within the ghetto, however, as shown by the "circles" at each numbered school site, some 18 all-black or substantially all-black schools which lie within the heart of the ghetto even after the pairings or clusterings of the periphery schools are accomplished.

There are, therefore, some 18,586 black students deep within the heart of the ghetto who are still attending 18 all-black schools (12 elementary; 4 junior high; and 2 senior high), *even after the provisions of the Order have been complied with.*[4]

---

4. In order that the record may be made clear, let it be understood that even though this Order of the U. S. District Court was promptly appaled to the United States Court of Appeals for the Fifth Circuit where it is now pending, and even though the Defendant School Board sought but was not granted an appropriate Stay Order by the U. S. District Court, the United States Court of Appeals for the Fifth Circuit, and the Hon. Hugo L. Black, Associate Justice, respectively, the School Board proceeded in good faith to comply with the Order of the Court at the opening of school on September 8, 1970, despite the tremendous emotional upheaval on the part of the patrons and students alike, both black and white, and the tremendous logistic problems involved in compliance with such Order.

That the August 6, 1970 Order of the U. S. District Court is the "first bite of the apple" is shown by the pronouncement of the "law of the case" from the bench by the U. S. District Court at the hearing held on August 4, 1970 (Exhibit "A" attached hereto).

It is thus obvious that if the District Court's decision as to the constitutional duty imposed upon a metropolitan school district, such as that of the Consolidated City of Jacksonville, to integrate the black student bodies for integration sake alone, of all of the remaining 18 black schools in the ghetto is correct, the following alternatives exist:

(a) The School Board will very promptly be required, (either by subsequent Order of the U. S. District Court or by the United States Court of Appeals for the Fifth Circuit in the appeal now pending), *to bus all of the black students in the remaining 18 black ghetto schools out of the ghetto to other schools in the system, thus requiring these other schools to go on double sessions, or,*

(b) *to bus all of the black students remaining in the 18 black ghetto schools out of the ghetto and bus an equivalent number of white students from other parts of the school district into the ghetto to fill up the vacant ghetto schools which would be emptied by the busing of the black students out of the ghetto.*

Either of the foregoing alternatives would require a massive additional busing operation that would cost the local School Board an additional expenditure in excess of one million dollars annually.

A moment's comprehension of what is obviously involved in either of the foregoing alternatives reveals that they are somewhat incredible.

And yet these are the only practical alternatives to carrying out the doctrinaire "law of the case" as laid down by the U. S. District Court in the *Braxton* case and apparently is in harmony with the decision of the United States Court of Appeals for the Fifth Circuit in the case of *Bradley v. Board of Public Instruction of Pinellas County*, No. 28639, Fifth Circuit, filed July 29, 1970, ... F.2d ..... where a similar type of massive busing of children in and out of the ghetto was mandated by the U. S. Court of Appeals for the Fifth Circuit with reference to the ghetto schools located in the City of Tampa, Florida.

It should be recognized that nowhere in the Court Order of August 6, 1970 is there any finding that the Duval County School Board is, or was, responsible for the maintenance of the ghetto area in the City of Jacksonville or was there any finding that the neighborhood school zone boundaries as amended by prior Order of the Court and by voluntary action of the present School Board and its Superintendent, were established on anything other than an objective non-racial basis.

Consideration of the U. S. District Court Order when taken into conjunction with its ruling on the "law of the case" at the hearing on August 4, 1970, reveals a simple fiat to the effect that even though neighborhood school boundaries may be objectively established on a non-racial criteria, black or substantially all-black student-populated schools must "go" and we therefore have a clear mandate to arbitrarily commence the racial integration of the student populations of the subject ghetto schools with integrated schools in other areas of the community solely for the purpose of playing a "numbers game", i.e., solely for the purpose of reducing the number of said black or substantially all-black schools in the ghetto.

If the Constitution requires integration of all of the 26 ghetto schools, either all of the students in the ghetto schools must be bused out of the ghetto into double sessions in their newly assigned schools, or the School Board would have to bus the black students out of the ghetto schools and bus an equal number of white students into the ghetto schools.

Is not such a doctrinaire requirement of busing children out of the ghetto or into the ghetto nothing more than the exclusion of said children solely because of race from attendance at a particular school which they would otherwise attend based upon non-racial objective criteria?

Is not such action, therefore, in direct violation of the mandate of this Court in *Brown v. Board of Education* (1954), 347 U.S. 483, 74 S.Ct. 686, 98 L.Ed 873 (*Brown* I); *Brown v. Board of Education* (1955), 349 U.S. 294, 75 S.Ct. 753, 99 L.Ed 1083 (*Brown* II); and *Alexander v. Holmes County Board of Education, supra,* in which latter case this Court held that no child was to be excluded from a particular school because of race?

The constitutional "knife" of *Alexander v. Holmes County Board of Education, supra,* should cut both ways.

If, in pre-*Brown* I days, it was unconstitutional to arbitrarily bus black school children miles from their home to attend *de jure* all-black schools, then it would seem inevitable that it is just as unconstitutional today to artificially "bus" black and white children solely because of their race to a particular school other than the one to which they would normally attend as based upon objective non-racial and uniform criteria.

The only possible justification attributable to the U. S. District Court action and to the action of the other U. S. District Courts in the South this summer in imposing similar doctrinaire requirements of integration for integration sake alone

of ghetto schools lies ultimately in the case of *United States v. Jefferson County Board of Education*, 372 F.2d 836 (C.A. 5, 1966), commonly referred to as *Jefferson* I, affirmed and adopted en banc with minor clarifications, 380 F.2d 385 (*Jefferson* II).

In *Jefferson* I, supra, a three-judge panel of the United States Court of Appeals for the Fifth Circuit considered the provisions of the Civil Rights Act of 1964, with reference to school desegregation cases in the Southern Circuit.

After giving lip service to the fact that the Congress of the United States "speaks as the voice of the nation":

> "More clearly and effectively than either of the other two coordinate branches of the government, Congress speaks as the voice of the nation."[5]

And:

> "We shall not permit the courts to be used to destroy or dilute the effectiveness of the congressional policy . . . "[6]

This three-judge panel of the United States Court of Appeals for the Fifth Circuit then proceeded to do just the opposite. They promulgated the intellectual distinction of "de facto - de jure" forms of segregation. In essence, as noted very succinctly by William C. Cramer, M.C., in his *amicus curiae* brief on Page 20 thereof:

> "Adopting the 'ingenious though illogical distinction' between so-called *de facto* and *de jure* segregation, it concluded that Congress had intended that the 'equal

---

5. Id. at page 850.

6. Id. at page 859.

protection clause' was to be applied unequally and that, in effect, every manifestation of racial isolation in the South constituted *de jure* segregation. * * * For the Court to have imputed such an intention was to thwart congressional will and, in the process, raise the spectre of a Second Reconstruction in America – one effected by judicial ukase."

"The Court's rationale for this divisive rendering of the Union of States was this: Since the South was the area of the Nation which had maintained dual systems of education imposed by law prior to *Brown* I, the South required special rules for rehabilitation and reform – by implication, in perpetuity."

In *Jefferson* I, the Court concluded:

"Adequate redress . . . called for much more than allowing a few Negro children to attend formerly white schools; it calls for liquidation of the state system of *de jure* school segregation *and the organized undoing of the effects of past segregation.*"[7]

The Jefferson I Court cited with approval, Fiss, *Racial Imbalance in the Public Schools:* The Constitutional Concepts, 78 Harvard Law Review, 564 (1965); and Wright, *Public School Desegregation,* 40 N.Y.L.R. 285 (1965), for the following exercise in conceptual reasoning.

(a) The *Jefferson* I Court assumed as did Professor Fiss and Judge Wright, that residential segregation in ghettoes in the South were caused *solely* as a result of past *de jure* action e.g., "Jim Crow" laws and/or local ordinances.

---

7. *Jefferson* I at 866.

(b) That racial segregation in the North, East or West was caused solely by entirely different reason, i.e., economic factors.

(c) Therefore doing away with the "Jim Crow" laws in Southern states was not enough – that school boards being agencies of the "state" should proceed affirmatively in a ". . . organized undoing of the effects of past segregation."

Implicit in this "reasoning" is the belief that if there had been no "Jim Crow" laws, that there would have been no residential racial segregation in metropolitan Southern cities.

This is naive.

Racial segregation is caused in *all* metropolitan areas by three basic factors: (a) density of population, (b) poverty of the vast majority of the ethnic group in the ghetto, and (c) personal, racial and/or religious prejudice of both the ethnic minority group and the predominant majority group outside of the ghetto.

These three factors are the basic factors that cause ghettoes of Irish Catholics in Boston; Italian Catholics in New York; Protestant Blacks in Chicago, as well as the black ghettoes of Atlanta, Dallas and Jacksonville, merely to name a few.[8]

The truth of the matter is that if there had been no "Jim Crow" laws in the State of Florida, but if all other factors had been historically equal, i.e., population density, poverty

---

8. We, of course, are aware of the fact that where "Jim Crow" laws exist, they have an additional oppressive factor in *maintaining* th ghetto. To say that they caused the creation of the ghetto is an entirely different matter. We note for the record that the Supreme Court of Florida, the Florida State Legislature, the new Florida Constitution, and the Council of the City of Jacksonville, have all taken affirmative action since *Brown* I and *Brown* II to abolish, repeal or overrule all of the former vestiges of "Jim Crow" laws and ordinances existing.

of blacks, and racial prejudice, there would still be a ghetto in the City of Jacksonville as there is in every other large metropolitan area in the South, North, East and West.

It is interesting to note that many other circuits in the United States have rejected the concept of *Jefferson* I and *Jefferson* II, e.g., *Deal v. Cincinnati Board of Education* (6 Cir. 1966), 369 F.2d 55 (*Deal* I), cert. denied ..... U.S. 847, 88 S.Ct. 39, 19 L.Ed 2d 114, wherein it was held:

> "We hold that there is no constitutional duty on the part of the board to bus Negro or white children out of their neighborhoods or to transfer classes for the sole purpose of alleviating racial imbalance that it did not cause, nor is there a like duty to select new school sites solely in furtherance of such a purpose."

See also, *Annotation*, "De Facto Segregation of Races in Public Schools", 11 A.L.R. 3rd 780, for cases from other circuits holding to the same import.

It would seem that not even the United States Court of Appeals for the Fourth Circuit in the instant case has adopted such a doctrinaire position as expressed by the *Jefferson* I and *Jefferson* II Court, *supra*. See, for example, Page 10 of the Opinion of the United States Court of Appeals for the Fourth Circuit in *James E. Swann, et al, v. Charlotte-Mecklenburg Board of Education, et al*, Nos. 14,517, 14,518, which is the subject of this present certiorari proceeding:

> "We adopted the test of reasonableness – instead of one that calls for absolutes – because it has proved to be a reliable guide in other areas of the law. Furthermore, the standard of reason provides the test for unitary school systems that can be used in both rural and metropolitan districts. All schools in towns and small

> cities and rural areas generally can be integrated by pairing, zoning, clustering or consolidating schools and transporting pupils. *Some cities, in contrast, have black ghettoes so large that integration of every school is an improbable, if not an unobtainable goal.* Nevertheless, if a school board makes every reasonable effort to integrate the pupils under its control, an intractable remnant of segregation, we believe, should not void an otherwise exemplary preliminary plan for the creation of a unitary school system. *Ellis v. Board of Public Instruction of Orange County,* No. 29124, Feb. 17, 1970, ... F.2d ..... (5th Cir.)." (Emphasis supplied)

However, it is interesting to note that closer examination of the *Ellis* case, *supra,* cited by the Fourth Circuit Court of Appeals in the *Swann* opinion, reads as follows:

> "There are a number of all-white student body schools in the Orange County system. This is due to the preponderant white student population (88%) *and to residential patterns. The three all-Negro student body schools which will remain, if the neighborhood assignment system is properly invoked, are also the result of residential patterns.* The majority-minority transfer provision under the leadership of the bi-racial committee is a tool to alleviate these conditions now. Site location, also under the guidance of the bi-racial committee, will guarantee elimination in the future. In addition, open housing, Title VIII, Civil Rights Act of 1968, 42 U.S.C.A., Sec. 3601, et seq., *Jones v. Mayer,* 1968, 392 U.S. 409, 88 S.Ct. 2186, 20 L.Ed 2d 1189, will serve to prevent neighborhood entrapment."
>
> (Emphasis supplied)

The black or substantially all-black schools in the Jacksonville ghetto obviously are the result of residential patterns as they are, and were, in Orange County, Florida, and are, and were, in all of the other metropolitan ghettoes, not only in the South but also throughout the United States.

It is interesting to note that nothing is said in the *Ellis* case, *supra*, about any constitutional duty upon the Orange County School Board to racially integrate the remaining all-black schools in Orange County by the use of such devices as pairings, clusterings, gerrymandering of zone boundaries, etc. This panel of the Fifth Circuit, in *Ellis*, recognized that the attendance boundaries were drawn on objective non-racial criteria and that any racial segregation resulting in all-black or substantially all-black or all-white schools was due to the obvious fact of *de facto* residential segregation.

Parenthetically, one might ask that if this is the rule that was applied in Orange County, Florida, why is it not the rule to be applied in Duval County, Florida, and in every other metropolitan school district which is under orders from the Fifth Circuit to arbitrarily integrate their black ghetto schools, e.g., *Bradley v. Board of Public Instruction of Pinellas County, Florida, supra*? ....

As Judge Bell, the author of the opinion in the *Ellis* case, *supra*, stated in his succinct dissent in *Jefferson* II, supra, at Page 417:

> "... The Supreme Court has not said that every school must have children from each race in its student body, or that every school room must contain children from each race in its student body, or that every school room must contain children from each race, or that there must be a racial balance or a near racial balance, or

> that there must be assignments of children based on race to accomplish a result of substantial integration. The Constitution does not require such. We would do well to 'stick to our last' so as to carry out the Supreme Court's present direction. It is no time for new notions of what a free society embraces. *Integration is not an end in itself; a fair chance to attain personal dignity through equal educational opportunity is the goal . . .*"
>
> (Emphasis supplied)

If Judge Bell (and other Federal Judges who have pronounced the same opinions) is correct in his reasoning that "integration is not an end in itself", then we respectfully submit that this Court should take this occasion to overrule or modify the reasoning of *Jefferson* I and *Jefferson* II, and to bring the majority of the Judges of the United States Court of Appeals for the Fifth Circuit in line with the reasoning of the many other circuits in the United States that have dealt with this question.

If Judge Bell's reasoning is wrong, then we respectfully submit that this Court should also, *in such event*, promulgate a rule that "integration is an end in itself" but that it should apply to *all* school systems in the United States, e.g., that there is a constitutional duly upon the Cook County, Illinois School Board to integrate all of the black ghetto schools in Chicago; that a similar duty rests upon the New York City School System; the Philadelphia School System; the San Francisco School System; and not just merely the school systems of Tampa, Jacksonville, Miami, and Charlotte, North Carolina.

It is respectfully submitted that school integration cases are not the proper vehicle to launch an educational or sociological "experiment" in reshaping a "brave new world" to

effectuate ". . . new notions of what a free society embraces."

As noted by a three-Judge panel of the United States Court of Appeals for the Fifth Circuit in *Ellis, supra,* the remedy for correcting ghetto areas lies in the field of open housing legislation, such as Title VIII, Civil Rights Act of 1968, 42 U.S.C.A., Sec. 3601, et seq.

What was attacked in *Brown* I and II, *supra,* was the operation of an official dual school system.

This had to be the case because it is axiomatic that the Fourteenth Amendment to the United States Constitution reaches only official action and not to any separation or discrimination as between the races caused by individual prejudices or desires.

We submit the test is, and should be, whether a school district, either North or South, is operating a school system in that all of its official policies and actual practices are applied district-wide without regard to race.

Responsibility for the poverty, density of population, personal prejudice, apathy, etc., or whatever other non-official reasons which exist in maintaining the ghetto, not only in the City of Jacksonville, but in every other metropolitan area in the United States cannot logically be visited upon present-day school boards.

School integration cases should not be the vehicle to either enforce Fair Housing Laws; to judicially correct the acts of personal prejudice or the result of economic poverty; or to advance a sociological or educational theory of what is "good" or "bad" from an academic point of view in "integration for integration sake alone."

We should remember that our late colleague and friend, Justice Oliver Wendell Holmes, when speaking in an eco-

nomic context, once reminded us: "The Fourteenth Amendment does not enact Mr. Herbert Spencer's *Social Statics*."[9]

Neither should the Fourteenth Amendment enshrine any particular sociological or educational philosophy, either pro or contra, concerning integration as an end in itself.

Constitutional rights carry their own justification. They do not need excess baggage to support their validity.

A child, black or white, is entitled to attend a school system which is operated on objective non-racial lines in the assignment of teachers, assignment of pupils, distribution of maintenance and building supplies, etc. without regard to the race of the student concerned.

Where attendance boundaries of existing schools are adopted upon the obvious common sense plan of a neighborhood school program and where the boundaries are established objectively and on the non-racial basis of capacity and proximity of home to school, the fact that the student population of the schools reflects the residential segregation patterns of the city as a whole would seem to be no reason to require an affirmative, arbitrary and doctrinaire constitutional duty to "integrate as an end in itself."

And yet this is exactly what the United States District Court has done in the Consolidated City of Jacksonville; this is what many of the three-judge panels of the United States Court of Appeals for the Fifth Circuit have required, e.g., *Bradley v. Board of Public Instruction of Pinellas County, Florida, supra;* but this, however, is not what the other circuits in the United States have decided.

---

9. Dissent in *Lochner v. New York*, 198 U.S. 45, 75, 76 (1905).

CONCLUSION

It is respectfully submitted that the time has now come for this Court to grapple with the problem which is presented to it within the framework of Question No. 1 as stated in the Petition for Certiorari in the subject case arising in Charlotte, North Carolina. Either:

(a) That there is a constitutional duty to integrate for integration sake alone. If this is so, then that duty should apply throughout the entire United States and this Court should say so.

(b) That there is no duty imposed by the Constitution to integrate for integration sake alone. If that is true, then this Court should say so.

We earnestly and respectfully submit to this Court that the hour for decision has now arrived.

Respectfully submitted,

EXHIBIT "B"

UNITED STATES DISTRICT COURT
MIDDLE DISTRICT OF FLORIDA
JACKSONVILLE DIVISION

No. 4598-Civ-J

DALY N. BRAXTON and SHARON BRAXTON, etc., et al.,

Plaintiffs,

v.

THE BOARD OF PUBLIC INSTRUCTION OF DUVAL COUNTY, FLORIDA, etc., et al.,

Defendants.

(Filed August 6, 1970)

ORDER

Upon consideration of the briefs filed pursuant to this Court's order of July 7, 1970, and after hearings on July 28 and August 4, 1970, this Court finds that the projections of the school board regarding the 1970-1971 school year meet the requirements of a unitary system, as set forth in *Green v. County School Board of New Kent County*, 391 U.S. 430 (1968) in the areas of teacher assignment, transportation, facilities, and extracurricular activities.[1/]

For the 1970-1971 school year, the system is projected to serve 122,549 pupils in 137 schools. Of that number of pupils, 26,080, or 73.9% of the 35,287 Negro pupils, would attend twenty all-Negro and seven virtually all-Negro schools under

the board's estimate. Such an assignment pattern is inconsistent with recent decisions of the Fifth Circuit Court of Appeals dealing with urban situations. *E.g., Bradley v. Board of Public Instruction* of Pinellas County, No. 28639 (5th Cir., filed July 29, 1970, and July 1, 1970) (reducing percentage of Negroes attending virtually all-Negro schools from 64% to 14.2%); *Mannings v. Board of Public Instruction of Hillsborough County,* No. 28643 (5th Cir., filed May 11, 1970) (reducing percentage of Negroes attending virtually all-Negro schools from 60% to 21%). *See also Ellis v. Board of Public Instruction of Orange County,* 423 F.2d 203 (5th Cir. 1970) (reducing percentage of Negroes attending virtually all-Negro schools from 51% to 16%); *Davis v. Board of School Commissioners of Mobile County,* No. 29332 (5th Cir., filed June 8, 1970) (reducing percentage of Negroes attending virtually all-Negro schools from 60% to 28%).

The school board, and the school superintendent working with it, have not proposed an alternative plan that is legally sufficient, and so the Court must enter the following plan of its own formulation for the 1970-1971 school year.

As stated in *United States v. Board of Education of the City of Bessemer,* 396 F.2d 44 (5th Cir. 1968):

> The question is and must always remain: Is the constitutional imperative being met? That duty is not on plaintiffs, nor on the [federal] government, nor on school children. It is squarely on the back on the State and here, the State's Agents, the School Boards. *Id.* at 48.
>
> We do not seek the burden or responsibility of school operation. We ought not to have it. . . . Now it should be up to school boards either alone in taking the initiative so obviously called for, or in conjunction with

> cooperative (it is hoped) efforts of parent, race, or similar groups to achieve the goal of race-less public schools. To be sure, this puts burdens on all sides, but this too, is part of constitutional democracy. The Judiciary is not, cannot be, the universal salvor. *Id.* at 52.

The Court notes several significant aspects of the present order:

1. The order affirmatively desegregates twelve schools which would otherwise have been entirely or virtually all-Negro in the 1970-1971 school year.

2. The order adopts the school board's own elementary attendance zone boundaries.

3. Special programs at Beal (#11), and Axson (#8), are not disturbed by the order.

4. The order effectively desegregates every Negro elementary school adjacent to a predominately white school without busing children from their residential attendance zone, as modified.

5. Although increases in transportation will be required by the order, the distances involved are small and are confined to the student's residential attendanrce zone. Those residential attendance zones are made larger to include two or more schools under pairing or clustering, but that result does not, and has been held not to, violate the "neighborhood school concept." *Mannings v. Board of Public Instruction of Hillsborough County, supra.* No busing to a non-contiguous zone is required under the order. The board, in carrying out necessary increases in transportation, is authorized to make use of facilities that meet federal standards.

6. Of the seven geographical areas of the county delineated by the school board in its July 20, 1970 study, complete desegregation of all schools is achieved in four areas. The order desegregates the all-Negro elementary schools in the remaining three areas that are not entirly surrounded by other all-Negro schools./2 This plan for pupil attendance has been achieved in a manner that does not materially disturb 108 schools in the system. Six other schools will be only slightly affected by marginal zone boundary adjustments.

7. The order does not violate the integrity of the junior and senior high school grade divisions and thereby avoids vast adjustments in the various educational offerings, athletic programs, and equipment and facilities. All secondary schools under the plan are rezoned rather than paired, clustered, closed, or redesignated as certain grade centers.

8. Most important of all, the plan seeks to prevent the disruption and chaos that would surely occur if the appellate courts were to be froced to rule in the middle of the school year. It further provides some protection from mistakes that might be made by courts, ruling from a distance, which are unfamiliar with the problems existing in the Duval County school system. This Court feels impelled by its sincere concern for the children of our community to shoulder the burden of formulating a plan that seeks to comply with the appellate decisions and, at the same time, protects the welfare of the pupils.

The Court is keenly mindful of the stress this order will put upon the parents, the children, the school board, the teachers, and the community. It is an order required by appellate decisions and by the Constitution, and as such it deserves, and the Court is confident that it will receive, obedience and respect. But as an order affecting the welfare

of many of our children it deserves more than this: it deserves the full cooperation and best efforts of all concerned to ensure that it works with the least possible disruption to sound education in our community. By working together, this plan will succeed in accordance with the law, and will further the best interests of our children.

In accordance with the cited cases, the recommendations of the Florida School Desegregation Consulting Center, filed March 15, 1970, the suggestions of plaintiffs filed July 31, 1970, and the independent consideration given to the case by the Court, it is

ORDERED:

1. Elementary schools Forest Park (#104) shall be paired with Lackawanna (#10); East Jacksonville (#3), with Fairfield (#9); Harbor View (#220), with Hull (#169); North Shore (#70), with Long Branch (#106); and West Jacksonville (#143), with Annie Morgan (#21). Grade centers shall be designated between the paired schools in the discretion of the school board.

4. Elementary schools M. V. Rutherford (#6), Scott (#24), John Love (#73), and Brown (#148), shall be clustered, with grade centers to be designated in the discretion of the school board.

5. Matthew-Gilbert Senior High School (#146) is to be closed as a senior high school, and senior high school pupils presently assigned to it shall attend Andrew Jackson Senior High School (#35). Excess pupil capacity in Matthew-Gilbert Junior High School (#146), resulting from the above reassignments, shall be filled by rezoning pupils from Kirby-Smith Junior High School (#25), which may thereby permit closing of the Kirby-Smith Annex. All re-

zoning shall be directed toward fulfilling the duty of the school board affirmatively to desegregate the affected schools. Thus, wherever possible, without creating a non-contiguous zone, lines should be drawn to transfer to the recipient school the maximum number of students in the minority race there.3/

6. Eugene Butler Senior High School (#168) is to be closed as a senior high school, and senior high schools pupils presently assigned to it shall be rezoned to the adjacent high schools, namely New Stanton Senior High School (#153), Paxon Senior High School (#75), and Robert E. Lee Senior High School (#33). Certain students from Lee (#33) may be rezoned to attend N. B. Forrest Senior High School (#241). The school board is directed to rezone pupils accordingly. Excess pupil capacity in Eugene Butler Junior High School (#168), may be filled by rezoning pupils from adjacent junior high schools, which at present are overcrowded. All rezoning shall be directed toward fulfilling the board's duty affirmatively to desegregate the affected schools. Thus, wherever possible, without creating a non-contiguous zone, zone lines should be drawn to transfer to the recipient school the maximum number of students in the minority race at the recipient school.

7. Plaintiffs' requests for modifications at Raines High School (#165), and Ribault High School (#96), are denied because the changing demographic composition of that area and the projected composition of the respective feeder schools make such changes useless to fulfill the affirmative duty to desegregate imposed by the appellate courts and the Constitution.

8. Transfers from residence attendance zones shall be permitted only as defined in this Court's orders of January 24, 1967, and August 22, 1967, namely, transfer for special needs,

hardship transfers, transfers ordered by Duval County Juvenile Court, and majority to minority transfers. Strict adherence to this provision will tend to desegregate schools not affected by the above order.

9. This Court, on its own motion, hereby orders added as necessary parties under Rule 19, Federal Rules of Civil Procedure, the Honorable Hans G. Tanzler, as Mayor of the Consolidated City of Jacksonville, and the members of the City Council of the Consolidated City of Jacksonville.

10. Plaintiffs' attorney, Earl M. Johnson, Esquire, is requested to make a designation of substitute local counsel in light of the above joinder of additional parties. *See* rule 3(D)(2), Local Rules (M.D. Fla., 1968 Rev.).

11. Jurisdiction is retained in this cause for such further action as may be necessary.

DONE AND ENTERED this 6th day of August, 1970.

/s/ WM. A. McRAE, JR.
Judge

Copies to counsel

FOOTNOTES

1/ To the extent this order affects these areas, the school board shall attempt to make adjustments to comply with the Singleton requirements set forth in this Court's order of December 30, 1969, especially in the area of teacher assignment. Some permissible deviation from the precise compliance for teacher assignments (reflected in the July 20, 1970 study) may occur when the respective teachers are reassigned with the students transferred by this order.

2/ Two exceptions to this statement are Beal (#11), which has a special federal program, and Picket (#205), which is separated from two larger all-Negro schools by two separate railroads and an interstate highway.

3/ To the objection that such affirmative rezoning is unconstitutional "gerrymandering" that uses for purposes of desegregation a technique impermissibly used in the past to segregate, the Fifth Circuit Court of Appeals stated sevral years ago the following:

> The Constitution is both color blind and color conscious. To avoid conflict with the equal protection clause, a classification that denies a benefit, causes harm, or imposes a burden must not be based on race. In that sense the Constitution is color blind. But the Constitution is color conscious to prevent discrimination being perpetrated and to undo the effects of past discrimination. The criterion is the relevancy of color to a legitimate governmental purpose. *United States v. Jefferson County*, 372 F.2d 836, 876 (5th Cir. 1966).

Two weeks ago, in making reference to the above quotation, the Fifth Circuit stated: "At this point, and perhaps for a long time, true non-discrimination may be attained, paradoxically, only by taking color into consideration." *Youngblood v. Board of Public Instruction of Bay County*, Florida, No. 29369 (5th Cir., filed July 24, 1970).

IN THE

Supreme Court of the United States

October Term, 1969

No. ———

JAMES E. SWANN, et al.,

Petitioners and Cross Respondents

v.

CHARLOTTE-MECKLENBURG BOARD OF EDUCATION, et al.,

Respondents and Cross Petitioners

CROSS PETITION FOR A WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE FOURTH CIRCUIT

Cross petitioners pray that a writ of certiorari issue to review the judgment of the United States Court of Appeals for the Fourth Circuit, entered in the above entitled case on May 26, 1970.

OPINIONS BELOW

The opinions of the courts below directly preceding this petition culminating in the judgment of the Court of Appeals dated May 26, 1970, (226a) are set forth in petitioners' petition for writ of certiorari filed on June 19, 1970.

JURISDICTION

The judgment of the Court of Appeals for the Fourth Circuit was entered on May 26, 1970, (226a). The jurisdiction of this Court is invoked under 28 U.S.C. 1254(1).

QUESTIONS PRESENTED

1. Did the Court of Appeals join in the error of the trial court in rejecting the desegregation plan offered by the Board of Education where 68% of the black students would attend schools in which their race was in the minority and where the remaining 32% of the black students would attend schools having white ratios of 17% to 1% and these black students would be taught by a predominantly white faculty and further where such black students were offered more generous freedom of transfer than that offered by the customary majority to minority transfers?

2. Did the Court of Appeals join in the error of the trial court in rejecting the plan for desegregation of the 76 elementary schools prepared and offered by the Board of Education, where the plan left no all-black schools, though nine of 76 schools had white ratios of 1% to 17% and black students attending those schools would have an untrammeled right to transfer to any one of the 67 remaining elementary schools, and upon departure from elementary schools would be assured of a desegregated education during the remainder of their schooling?

3. Did the Court of Appeals join in the error of the trial court in rejecting (by the trial court's offering the Board a "Hobson's choice") the Board plan for desegregation of junior high schools where only one of 21 junior high schools would have more than a 39% black student ratio and the remaining predominantly black school would house 758 black and 84 white students and have a predominantly white faculty by imposing a requirement on the Board to create nine black satellite districts containing approximately 2700 black students and assigning them to predominantly white suburban junior high schools?

4. Did the Court of Appeals join in error of the trial court in rejecting the Board plan for desegregation of senior

high schools where the plan provided that no school would have more than a 36% black ratio and a predominantly white faculty by imposing a further requirement upon the Board that 300 black students residing in four designated grids would be bused a substantial distance from the northwestern part of the city to a high school serving the extreme southeastern portion of the county?

5. Did the Court of Appeals join in the error of the trial court in imposing racial balances in junior and senior high schools in contravention of Title 42 U.S.C. 2000c(b) and 6(a)(2) (Sections 401(b) and 407(a)(2)) of the Civil Rights Act of 1964 and North Carolina General Statute 115-176.1?

CONSTITUTIONAL AND STATUTORY PROVISIONS INVOLVED

This case involves the equal protection clause of the Fourteenth Amendment to the Constitution of the United States, Section 401(b) and 407(a)(2) of the Civil Rights Act of 1964 (42 U.S.C. 2000c(b) and 6(a)(2)); (230a) and Title 28 U.S.C. 2281 et seq. (1964) (233a).

STATEMENT

This school desegregation action was instituted in 1965 and, after hearing, the District Court held this school system to be in compliance with the Constitution. *Swann v. Charlotte-Mecklenburg Board of Education*, 243 F. Supp. 667 (1965), which holding was affirmed by the Court of Appeals for the Fourth Circuit in *Swann v. Charlotte-Mecklenburg Board of Education*, 369 F. 2d 29 (1966).

Following the Supreme Court decision in *Green v. New Kent County*, 391 U.S. 430, 88 S. Ct. 1689 (1968), and companion cases, the plaintiffs filed a motion for further relief alleging discrimination in teacher salaries, school

plants, facilities and numerous other areas, and in addition, sought further desegregation. Following hearing on April 23, 1969, the United States District Court for the Western District of North Carolina found:

"Some Board actions found not to be discriminatory.

No racial discrimination or inequality is found in the following disputed matters:

. . . The use of federal funds for special aid to the disadvantaged. . . . Use of mobile classrooms. . . . the quality of school buildings and equipment. . . . Coaching of athletics. . . . Parent-Teacher association contributions and activities. . . . School fees. . . . School lunches. . . . Library books. . . . Elective courses. . . . Individual evaluation of students. . . . Gerrymandering. . . ." (14a-18a)

". . . Location of schools in Charlotte has followed the local pattern of residential development, including its *de facto* patterns of segregation. . . ." (21a)

"The percentage racial mix. Counsel for plaintiffs say that since the ratio of white to black students is about 70/30, the School Board should assign the children on a basis of 70% white and 30% black and bus them to all the schools. *The Court does not feel that it has the power to make such a specific order.*" (Emphasis supplied) (26a)

The District Court found with respect to the motives and judgment of the School Board as follows:

"A word about the School Board—The observations in this opinion are not intended to reflect upon the motives or the judgment of the School Board members. They have operated for four years under a court order which reflected the general understanding of 1965 about the

law regarding desegregation. *They have achieved a degree and volume of desegregation of schools apparently unsurpassed in these parts, and have exceeded the performance of any school board whose actions have been reviewed in the appellate court decisions.* The Charlotte-Mecklenburg schools in many respects are *models for others* . . . The difference between 1965 and 1969 is simply the difference between *Brown* of 1965 and *Green v. New Kent County* of 1968. The rules of the game have changed and the *methods and philosophies which in good faith the Board has followed are no longer adequate* to complete the job which the courts now say must be done 'now.' " (Emphasis supplied) (27a)

Concluding additional affirmative action was required of the Board, the Court then ordered the Board of Education to submit a plan for the complete desegregation of teachers to be effective for the 1969-1970 school year and to submit a plan and time table for the desegration of pupils to be predominantly effective in the fall of 1969 and completed by the fall of 1970. (30a and 31a)

In order that the Court may be advertent to the arduous problem facing the Board of Education, the following information is offered. The Charlotte-Mecklenburg School System is the largest school system in the Carolinas, ranking 43rd largest in the United States and serving 84,500 students, 29% of which are black and 71% of which are white. The present transportation system carries approximately 23,000 students daily on buses. Each bus averages 1.8 trips each way, each day. The City of Charlotte comprises 64 square miles, making it larger than the District of Columbia, and the total county comprises 550 square miles, having an east-west span of 22 miles and a north-south span of 36 miles. (9a). Ninety-

five percent (95%) of the 24,000 black students, or 23,000, reside in the northwestern inner-city quadrant of the City or on the fringes thereof. (14a).

Following submission of the Board's first plan for further desegregation, the Court entered its order of June 20, 1969, (46a) which found the plan inadequate with reference to pupil and faculty desegregation. The Board was directed to submit a plan by August 4, 1969, in accordance with the April 23, 1969, order.

During the interim, *United States v. Montgomery*, 395 U. S. 225, 89 S. Ct. 1670 (1969) was decided which for the first time indicated that racial ratios in facutly be imposed. In accordance with *Montgomery, supra.*, the Board of Education proposed a plan for desegregation which would produce substantial faculty and student desegregation for the school year 1969-70 and proposed a comprehensive computer-assisted study for the purpose of restructuring attendance lines for the school years 1970-1971. It was estimated that the study would require approximately six months to complete and would be available for presentation on or about February 1, 1970.

On August 15, 1969, the Court entered an order (58a) approving the policy statement of the Board, the faculty desegregation program, the closing of seven all-black inner-city schools, the re-assignment of students from overcrowded black schools and local assignment of students between two schools. In addition, the Court approved in principle the proposed restructuring of attendance lines and other factors, but rejected them for lack of specific detail and time table. The Board was accordingly directed to present by November 17, 1969, a plan for complete faculty desegregation and student desegregation for the school year 1970-1971 (70a). In view of the fact that it was im-

possible to complete the computer-assisted restructuring of attendance lines within the time limited, which would attain maximum desegregation possible by rezoning, motion was made by the Board for additional time in which to present its plan for desegegation, which was denied. (81a). The District Court gratuitously and without benefit of further evidentiary hearings reversed his previous findings that segregation in Charlotte was *de facto* as follows:

> ". . . There is so much state action imbedded in and shaping these events that the resulting segregation is not innocent or *'de facto'* and the resulting schools are not 'unitary' or 'desegregated.' " (87a)

In view of the rejection of the motion for the extension of time, the Board was compelled to present an admittedly incomplete plan for desegregation on November 17, 1969, and sought direction from the Court with respect to the meaning of a "unitary system" and related terms. Thereafter, on December 1, 1969, the District Court disapproved the Board's plan for further desegregation and directed the desegregation of faculties on a three-to-one ratio effective not later than September 1, 1970, and indicated that a Court consultant would be appointed. (109a). On December 2, 1969, the Court appointed Dr. John Finger, who had formerly testified as an expert witness on behalf of plaintiffs as consultant. In the December 1 order, the Board was invited to continue working on its plan by the District Court.

On February 2, 1970, the Board of Education submitted a plan utilizing computers to achieve a maximum racial mix of 71% white and 29% black in each school where possible by restructuring attendance lines. One hundred (100) of the 103 schools would have a racial mix, leaving

only three all-white schools. Sixty-eight percent (68%) of the black students would attend schools having less than 40% black population. Thirty-two percent (32%) of the black students would attend nine elementary and one junior high schools which would have black ratios of 83% to 99% black under the Board plan. (123a, 124a, 126a-128a).

The plan for desegregation submitted by the School Board on February 2, 1970, included imposition of faculty ratios of approximately three to one, white predominating, in each school and proposed implementation of its plan for the school year 1970-1971 in accordance with the various court orders. The Board plan would require the in-district transportation to approximately 5,000 additional students, who would qualify for such transportation under state law.

The Court consultant's plan was submitted contemporaneously with that of the Board on February 2, 1970, which effectively adopted in many respects the Board's geographic zoning plan and engrafted upon it the features of pairing of distant elementary schools and creation of satellite districts in predominantly black inner-city areas who were assigned to distant predominantly white outlying secondary schools.

On February 2, 1970, the Court conducted a hearing limited to the question of the time required for implementation and refused to hear any evidence with reference to the merits of the two plans before the Court. On February 4, 1970, the Board made a motion for hearing on its plan and for the opportunity to examine the Court consultant who resides in Rhode Island and beyond the process available to the Board. In response thereto, the Court permitted a short hearing severely limited as to time on the following day and did not direct the consultant to be present for examination.

On the same day, February 5, 1970, the Court entered its order in which the Court found in part as follows:

> "The Board plan, prepared by the school staff, relies almost entirely on geographic attendance zones, and is tailored to the Board's limiting specifications. It leaves many schools segregated. The Finger plan incorporates most of those parts of the Board plan which achieve desegregation in particular districts by rezoning; however, the Finger plan goes further and produces desegregation of all the schools in the system.
>
> Taken together, the plans provide adequate supplements to a final desegregation order." (113a)

Although the Court stated, "The order which follows is not based upon any requirement of 'racial balance' . . ." (115a), the Court then adopted the entire plan of the Court consultant and thereby directed racial balancing with reference to the various schools:

A. The Board's pupil assignment plan for senior high schools was approved with the condition that the 300 black students residing in four grids suggested by the Court consultant would attend Independence High School. Therefore, the Court consultant's sole recommendation with reference to high schools was approved although no high school under the Board plan would house more than a 36% black ratio.

B. With respect to junior high schools, the Board plan was approved upon condition that the only junior high school out of 21 which would remain predominantly black would be desegregated by giving the Board a "Hobson's choice" of furnishing transportation and increasing blacks in attendance at several outlying schools and in default of rezoning (which had been fully explored), two-way transportation of students (which is cross-busing to which the

Board is opposed) or closing the junior high school (whose classrooms are desperately needed to minimize the already serious overcrowding which exists at the junior high level), the Board was directed to implement the Court consultant's plan, which provided for establishing nine satellite attendance districts (containing 2,760 students) in inner-city black areas for attendance at nine distant predominantly white suburban schools.

C. With respect to elementary schools, the Court adopted the Court consultant's plan which utilized the Board's rezoning and engrafted upon it the feature of cross-assignment with resulting cross-busing of inner-city blacks in attendance at nine schools with distant suburban whites attending 24 schools. Approximately 10,200 students would be involved in the elementary cross-assignment.

The Board plan contemplated furnishing transportation only to those students eligible for transportation under state law and would result in furnishing additional transportation to approximately 5,000 students. The order of desegregation imposed substantial additional transportation requirements upon the school system which were compiled by the transportation office of the school system as follows:

FINGER PLAN

Additional Students	*Number of Buses*	*First-Year Cost*
23,000	526	$4,199,439.00

BOARD PLAN

Additional Students	*Number of Buses*	*First-Year Cost*
4,935	104	$ 864,767.00

Upon the amendment of the February 5 order, dated March 3, the Board submitted estimates that additional

transportation required by the amended order was as follows:

Additional Students	*Number of Buses*	*First-Year Cost*
19,285	422	$3,406,687.00

Supplementary findings of the Court dated March 21, 1970, (155a and 157a) reflect a finding that transportation would be required as follows:

Additional Students	*Number of Buses*	*First-Year Cost*
13,300	138	$1,011,200.00

Extensive objections and exceptions were filed by the Board with reference to the findings of the Court dated March 21, 1970, and the Court of Appeals noted that it was difficult to furnish reliable predictions with respect to transportation estimates. (193a and 194a)

The Board filed notice of appeal to the Court of Appeals for the Fourth Circuit on February 25, 1970.

On March 5, 1970, the Court of Appeals stayed implementation of that portion of the order directing cross-busing of students and on application to the Supreme Court of the United States by the petitioners, this Court declined to disturb the stay order of the Court of Appeals.

The Court of Appeals directed the District Court to conduct evidentiary hearings with reference to the general issue of busing and related considerations which resulted in the supplemental findings of fact dated March 21, 1970 (136a) to which, as noted above, the respondents filed numerous exceptions.

The District Court stayed implementation of the remaining portions of its February 5 order until September 1, 1970.

Thereafter, on May 26, 1970, the Court of Appeals for the Fourth Circuit approved the provisions of the order of the District Court with reference to assignment of faculty and assignment of students to secondary schools and reversed and remanded for further consideration the assignment of pupils attending elementary schools. (184a).

From this holding, the petitioners and respondents have applied for writs of certiorari.

REASONS FOR GRANTING WRIT

Introduction

This Court should accept this case for review. It involves fundamental issues which confront not only Charlotte-Mecklenburg, but school systems throughout the nation in their efforts to establish and maintain the unitary system that the Constitution requires. A review of this case will bring clearly into focus the practical problems which in *Northcross v. Board of Education*, 397 U. S. 232 (1970), the Chief Justice said ought to be resolved by this Court.

Charlotte-Mecklenburg is typical of school systems, particularly those involving complex densely populated urban areas that have been seeking conscientiously to acquit their affirmative duty to eradicate the vestiges of previously established dual systems.

For sixteen years, school boards, plaintiffs and the courts have struggled with the elusive question, "What constitutes a unitary system?" School boards have been roundly, and often unjustifiably, condemned for not solving the demands of *Brown II*, 349 U. S. 294 (1955). It has been a difficult struggle. A companion case to *Brown II*, *Briggs v. Elliott*, 132 F. Supp. 776 (E.D.S.C. 1955), held that although there was a duty on school boards not to discriminate, there was no duty to integrate. Although numerous opportunities were presented, this dictum was never repudiated by

the appellate courts until the late 1960's by the Fifth Circuit and finally by the Fourth Circuit in *Nesbitt v. Statesville*, 418 F. 2d. 1040 (4th Cir. 1969).[1] *Brown II*, supra., was, therefore, for a long time believed to stand for the proposition that all schools should be opened to minority groups and that the overlapping dual zoning be eliminated.

In *Cooper v. Aaron*, 358 U. S. 1 (1958), interference by state authorities was put to rest.

After some lethargy, school districts began eliminating the dual attendance zones which generally resulted in moderate desegregation by reason of segregated residential patterns. Desegregation efforts were thwarted by minority to majority transfers which permitted the races to resegregate. This device was held unconstitutional in *Goss v. Knoxville*, 373 U. S. 683 (1963). There, the Supreme Court gave a new indication of the means to accomplishing a unitary system by expressing the view that although minority to majority transfers were condemned, a completely open freedom of choice might satisfy constitutional demands. The Department of Health, Education and Welfare under the *Civil Rights Act of 1964* and the Fifth Circuit in its famous Jefferson decree, *United States v. Jefferson County*, 380 F. 2d. 385 (1967), embraced freedom of choice as their answer to the elusive unitary system question.

In 1968, this Court in *Green, supra*, dealing with a small two-school rural system, held freedom of choice was not constitutionally prohibited but it was not the answer to the unitary school system question. The scope of *Green*, has been limited to Southern school systems without regard

---

[1]Although it may now be recognized that *Green v. New Kent County*, 391 U. S. 430 (1968) nullified this dictum, it was not expressly repudiated so as to be clearly understood.

to whether or not desegregation exceeds that of other areas of the country. Since *Green*, the desegregation progress of an enlightened community has been of no concern to the courts, where the school systems are located in states formerly imposing a dual system by law. The destruction of state-enforced dual systems by *Brown II* has not in sixteen years resulted in substantial mixing of the races in schools, North or South, East or West. It has not resulted in substantial mixing of the races in New York in a span of 32 years after repeal of its dual school laws or in many other states where such laws have been repealed for many more years. Segregation in public schools rests more strongly on factors other than state laws. It is time for the courts to give recognition to this incontrovertible fact and apply uniform national standards based upon a rule of reason containing clearly understood parameters embracing solid eduction values. After all, the foundation of all successful desegregation rests upon improvements of education for minority groups.

Recent pronouncements of the court, *Alexander v. Holmes*, 396 U. S. 19 (1969) and *Carter v. West Feliciana*, 396 U. S. 290 (1970) have been generally addressed to the question of time. The term "effectively excluded" has received various interpretations by the courts and requires immediate clarification.

In its February 2, 1970 plan, the School Board declared the major thrust of its policy as follows:

> "* * * (The) Board of Education firmly believes further desegregation of students and professional staff will contribute to the education and social development of all children."

This was *not a new policy*—but a reaffirmation of the School Board's long standing commitment to the proposi-

tion that every child in the system—black, white, rich or poor—is entitled in full measure to a quality education unimpaired by any restraints or restrictions upon his constitutional rights or upon his opportunity to develop to the full extent of his capabilities.

Charlotte-Mecklenburg has a pretty good "track record" in connection with its desegregation efforts. Under the plan in operation last year (1969-1970), the Charlotte-Mecklenburg system achieved a degree of desegregation which exceeds that attained by most other major systems.[2]

The plan for desegregation offered by the Board and rejected by the District Court and the Court of Appeals provided for attendance of 68% of the blacks at predominantly white schools, which far surpasses the desegregation offered by any major school system in this nation. We are confident that this statement can be made without fear of contradiction. It therefore appears punitive for a court to impose a racial balance upon a system which has produced such an exemplary plan that far exceeds the performance of the school systems noted above.

In *Swann v. Charlotte-Mecklenburg*, 369 F. 2d 29 (4th Cir. 1966), the Court of Appeals approved the new attendance zones adopted by the School Board. In its April 23,

---

[2]In Charlotte-Mecklenburg, 65% of the blacks during the school year 1969-70, attended predominantly black schools (165a). Comparable information derived from HEW figures reflects the following percentage of the black students at predominantly black schools: New York City, 86%; Los Angeles, 96%; Detroit, 91%; Philadelphia, 90%; Milwaukee, 88%; San Francisco, 54%; Boston, 77%; and Cincinnati, 78%.

The percentage of black students attending schools housing 95% to 100% black students in other cities is as follows: Baltimore, 76%; Cleveland, 80%; Washington, 89%; St. Louis, 86%; Newark, 75%; Buffalo, 61%; Gary, Indiana, 80%. In Chicago, 76% of the blacks attend schools less than 2% white. Source, United Press International Release, May 17, 1970.

1970 order, the District Court acknowledged that Charlotte-Mecklenburg had been a leader in facing up to the responsibility of providing quality education on a desegregated basis for all children—white and black—but advised the Board that since *Green*, "the rules of the game have changed, and the methods and philosophies which in good faith the Board has followed are no longer adequate." (27a and 28a).[3]

As this case progressed in the District Court during the intervening months between April, 1969, and February, 1970, it become increasingly evident that there were some fundamental conceptual differences between the plaintiffs and the trial court on the one hand and the School Board on the other with respect to the identity and definition of the necessary ingredients of the "unitary school system" that the mandate of the Constitution requires.

The School Board earnestly was seeking to know and understand what was required of it. In its plan submitted November 17, 1969, the Board sought clear-cut directions from the trial court by asking it to answer various basic practical questions that were perplexing the Board regarding the nature and composition of a "unitary school system" and the necessary or permissible ingredients of an acceptable plan.

The School Board was not alone in its quandry; other courts expressed their concern regarding the resolution of the practical problems involved in evaluating the efficacy of desegregation plans and the need for standards that define the steps required of local school districts in order to acquit their affirmative duty to establish unitary sys-

---

[3]A pertinent historical observation: In 1958, the Charlotte City School Board on its own initiative was the first in the South to pioneer integration — albeit on a token basis.

tems.[4] Our own trial court did not share the doubts or uncertainties expressed by these other courts. Boiled down to its simplest terms, it was the trial court's view that a school system is not a unitary one if it has a single black or predominantly black school. Local conditions, practical problems, cost, educational considerations, natural boundaries or the size and complexity of the system were regarded as irrelevant by the trial court.

On appeal, the Court of Appeals, contrary to the trial court, has held in this case that not every school in a unitary system must be integrated and adopted "a test of reasonableness—instead of one that calls for absolutes." (189a).

On review, this case will present a clear-cut opportunity for this Court to determine whether the Constitutional mandate regarding the abolition of dual school systems and the establishment of unitary ones permits the application of a "Rule of Reason" or whether the Constitution requires the shifting of children "by the numbers" irrespective of the size and complexity of the system, costs, disruptions, educational considerations, and the host of other practical matters with which the school boards and administrators must cope in fashioning an effective school system and the day-to-day operations of their schools.

On June 24, 1970, the cross petitioners filed with this Court a response to the petitioners "Motion to Advance", in which the cross petitioners joined in a request that this Court grant certiorari and render its decision prior to the

School Board of the City of Norfolk*, 308 F. Supp. 1274 (E. D. Va. Dec. 20, 1969); *Thornie v. Houston County*, — F. Supp. — (M. D. Ga. Jan. 21, 1970); *Hilson v. Washington County*, — F. Supp. — (M. D. Ga. Jan. 28, 1970); *Northcross v. Board of Education of Memphis*, — F. 2d — (6th Cir. Jan. 12, 1970).

opening of schools next fall.[5] We sincerely hope that this can be accomplished. Prompt resolution of the issues presented by this case will greatly assist not only Charlotte-Mecklenburg, but other courts and school systems everywhere to conform their desegregation plans to the standards established by this Court in this case and to minimize the costly disruptions that will be the result of continued uncertainties or misconceptions regarding the necessary ingredients of a unitary system and the means of establishing and maintaining one.

In the portions of this cross petition which follow, the cross petitioners set forth a discussion of the questions presented for review.

I.

The Board Plan Based on Geographic Attendance Zones Gerrymandered to Achieve Maximum Racial Mix Established a Unitary System and the Court of Appeals Joined in the Error of the Trial Court by Disapproving that Plan.

One of the basic issues involved in this case is whether a desegregation plan based on comprehensively restructured geographic attendance zones satisfies the Constitutional requirement of a unitary system, in a situation where these zones are established to promote the maximum amount of desegregation possible by the employment of this technique. This issue also involves a consideration of the extent to which a School Board may employ this technique as a means of preserving some semblance of the

---

[5]Cross petitioners are advised that the Norfolk, Virginia and Little Rock, Arkansas schools are seeking review of their cases in this Court which will offer a broad spectrum in which to resolve this national problem.

neighborhood school concept which it believes to be beneficial.

A. *The Geographic Attendance Zones.*

To achieve maximum desegregation of the 103 schools in the Charlotte-Mecklenburg System, the February 2, 1970, School Board plan is based exclusively on geographic attendance areas which ignore natural boundaries. Maps comprising a part of the Board plan (Exhibits A, C and G attached to February 5, 1970 Order) show attendance zones of the schools at each of the three instructional levels.[6] These attendance zones were grotesquely gerrymandered by extending finger-like corridors into and out of the densely populated, predominantly black inner-city areas to obtain sufficient black and white children to create a favorable racial composition at the schools involved.

Under the Board plan, 100 of the 103 schools in the Charlotte-Mecklenburg System would have some degree of racial mix, leaving only three all-white schools. Sixty-eight percent (68%) of the black students would attend 93 schools with less than 40% black student bodies—leaving the remaining 32% of the black pupils in the 10 remaining schools having white ratios of 17% to 1%.[7] These 10 predominantly black schools remained in spite of the Board's best efforts to achieve a more satisfactory racial mix in them by means of the drastically gerry-

---

[6]The Court is reminded that these maps, plans, appendix and a book containing supporting data were furnished to the Court in connection with petitioners' application for stay which was denied on March 16, 1970.

[7]See appendix attached to this petition for statistical data pertaining to the Board plan.

mandered attendance lines. Of these 10 schools 9 are elementary[8] and 1 is a junior high school.[9]

In addition, the Board plan specifically provides that the faculty of each school shall be assigned so that the ratio of black teachers to white teachers in each school will be approximately the same as the ratio in the entire system (i.e., a ratio of about 1 to 3). The racial composition of its faculty is educationally beneficial and will contribute substantially to thorough integration of the 103 schools of the system.

The remaining predominantly black schools are located in the inner-city core which is populated for the most part by blacks, many of whom due to shifting housing patterns had moved into previously white areas. In its Findings of Fact (146a), the trial court acknowledged:

> "Both Dr. Finger and the school board staff appear to have agreed, and the *court finds as a fact*, that for the present at least, there is *no way to desegregate* the all-black schools in Northwest Charlotte *without providing* (or continuing to provide) *bus or other transportation for thousands of children.* All plans and all variations of plans considered for this purpose lead in one fashion or another to that conclusion." (Emphasis supplied)

Brown II, 349 U. S. 294 (1955) recognized that an acceptable desegregation plan may employ geographic re-

---

[8]Under the Board plan, these 9 elementary schools have the following black-white ratios: Bruns Ave. (90-10); Marie Davis (88-12); Double Oaks (99-1); Druid Hills (96-4); First Ward (99-1); Lincoln Heights (99-1); Oaklawn (99-1); University Park (85-15); and Villa Heights (83-17). (A Plan for Student Desegregation — Systems Associates, Inc., page 31.)

[9]Under the Board plan, Piedmont Junior High has a black-white ratio of 90% (B)-10% (W). (A Plan for Student Desegregation —Systems Associates, Inc., Page 31.)

zoning if done fairly and in good faith to effect "a revision of school districts and attendance areas into compact units to achieve a system of determining admission to the public schools on a non-racial basis."[10] See also *Green, supra.*

A consideration of the pro-desegregation gerrymandered geographic zones of the Board plan excludes any inference that they were formulated for any purpose other than a conscious one to promote maximum desegregation of the Charlotte-Mecklenburg schools.

The desegregation achieved by the geographic zones of the Board plan is supplemented in another very material respect: A majority to minority transfer provision which allows any black child in a school having more than 30% of his race to attend one that is less than 30% black, but permits a white child to transfer only if the school he is attending has more than 70% of his race and the one to which he seeks assignment is less than 70% white. The Court of Appeals correctly inferred that these transfer provisions were purposely designed by the Board to promote stable desegregation in the schools by preventing "tipping" or resegregation (199a). The Court of Appeals'

---

[10]A pertinent historical note is made by Alexander M. Bickell in his recent book, *The Supreme Court and the Idea of Progress*:

> "At the first argument of *Brown v. Board of Education* in 1952, Justice Frankfurter asked the future Justice Thurgood Marshall, then counsel for the Negro children, whether a decision in his favor would 'entitle every mother to have her child go to a non-segregated school?' Mr. Marshall replied in the negative. 'What will it do?' Justice Frankfurther pursued. Mr. Marshall replied: 'The School Board, I assume would find some other method of distributing the children by drawing district lines.' The only requirement would be, Mr. Marshall added, that the lines be drawn 'on a natural basis,' and not be gerrymandered so as to enclose or exclude Negro neighborhoods." Bickell, *The Supreme Court and the Idea of Progress*, p. 117 (1970). See also 1 U.S.L.W. 3164 (1952).

determination that these transfer provisions are unduly restrictive is unwise and unwarranted. The restrictions imposed are an effective method of preserving the stable desegregation achieved by the Board's geographic zones at all three instructional levels and will allow more blacks the opportunity to transfer than the usual majority to minority transfer.

The Court of Appeals misconceived the beneficial purpose sought to be achieved by the 70-30 transfer provision as well as the 60-40 ratio of white to black utilized initially in designing attendance zones. These limitations were imposed for the sole purpose of assuring stability of the desegregation effort. In *Beckett v. Norfolk, supra*, the District Court quoted with approval the views of Dr. Thomas F. Pettigrew, a member of the Advisory Committee to the Coleman Report:

> "In sum, Pettigrew assigns five reasons why the ratio of 70% white to 30% Negro, with a maximum of 60% white and 40% Negro, points to long-range success. His testimony is quoted:
>
> '(1) That I believe it will minimize the middle class flight, if you want to call it that. I don't think it excludes it completely, that's why I use 'minimize.'
>
> (2) That I think it gives you a good chance for integration, not just desegregation, therefore maximizes black achievement.
>
> (3) Maximizes or should maximize white achievement.
>
> (4) It should maximize other positive benefits, non-achievement benefits, like college aspirations, occupations aspirations, interracial—better interracial attitudes and behavior on the part of blacks.

(5) The same non-achievement benefits on the part of whites.' "

In disapproving the geographic plan of the School Board, the Court of Appeals admonished the Board "to explore every method of desegregation, including rezoning with or without satellites, pairing, grouping, and school consolidation." (199a). The Board had previously considered the feasibility of such techniques and concluded that a plan based solely on non-discriminatory geographic attendance zones would best serve the Charlotte-Mecklenburg System, the cause of education and the promotion of stable desegregation.

We applaud the Rule of Reason espoused by the Court of Appeals in desegregation cases, but question whether the application of that Rule may properly veto a geographic plan such as the one presented by the School Board. A review of this case will afford this Court an opportunity to resolve this as yet unresolved problem for the guidance of not only Charlotte-Mecklenburg, but other school systems who await an authoritative declaration of the scope and limits of techniques to be employed in fulfilling the mandate of the Constitution that no child is to be "effectively excluded" from any school on account of his race or color.

B. *The Neighborhood School Under the Board Plan.*

The neighborhood school concept is one that the Board considers to be beneficial to the children and enhances the support that comes when children and parents identify themselves with a particular school and its programs. Fragmentation of this type of association is not in the best interest of our schools.

In its April 23, 1969, Order, the District Court volunteered its own educational philosophy in opposition to the neighborhood school concept (22a):

> "Today people drive as much as forty or fifty miles to work; five or ten miles to church; several hours to football games; all over the country for civic affairs of various types. The automobile has exploded the old-fashioned neighborhood. * * * If this court were writing the philosophy of education, he would suggest that educators should concentrate on planning schools as educational institutions rather than as neighborhood proprietorships. * * *"

To the contrary, all too many of our present day relationships have become institutionalized and depersonalized. We believe this trend to be unwholesome. Close relationships among teachers, parents and children should to the maximum extent be encouraged and undergirded. The neighborhood school plays an important part in fostering such relationships—particularly at the elementary level where the ties between home, school and after-class activities are an important part of the educational process of children in their early formative years. In a metropolitan system such as ours the ideal may not always be achieved. This should not be a reason for dismantling and abandoning the neighborhood school.

From the beginning there has been this marked contrast between the views of the trial court and those of the Board regarding the pertinence of the neighborhood school.[11] The School Board responded to the pressure of

---

[11]Geographical zoning is the common method of determining school attendance and the neighborhood school is the predominant attendance unit. Racial Isolation in the Public Schools — Summary of a Report by the Commission on Civil Rights, page 3, (March 1967).

the trial court when it submitted its February 2, 1970 plan—a plan which retained, but severely strained, the principle of the neighborhood school.

The Fifth Circuit has approved a neighborhood school plan as satisfying the constitutional mandate for the establishment of a "unitary system." *Ellis v. Orange County, Florida*, —— F. 2d —— (5th Cir. 1970); *Deal v. Cincinnati Board of Education*, 324 F. 2d 209 (7th Cir. 1966) succinctly stated the case for the neighborhood school:

> "Appellants, however, pose the question of whether the neighborhood system of pupil placement, fairly administered without racial bias, comports with the requirements of equal opportunity if it nevertheless results in the creation of schools with predominantly or even exclusively Negro pupils. The neighborhood system is in wide use throughout the nation and has been for many years the basis of school administration. This is so because it is acknowledged to have several valuable aspects which are an aid to education, such a minimization of safety hazards to children in reaching school, economy of cost in reducing transportation needs, ease of pupil placement and administration through the use of neutral, easily determined standards, and better home-school communication."

In his policy statement of March 24, 1970, entitled *SCHOOL DESEGREGATION: A Free and Open Society* (116 Cong. Rec. S4351, Daily Ed., March 24, 1970), the President of the United States addressed himself at length and in depth to the important role that the neighborhood school plays in the education of our public school children. He said in part:

> "In devising local compliance plans, primary weight should be given to the considered judgment of the local

school boards—provided they act in good faith, and within Constitutional limits.

The neighborhood school will be deemed the most appropriate base for such a system.

Transportation of pupils beyond normal geographical school zones for the purpose of achieving racial balance will not be required."

As previously noted, the trial court quite obviously disagreed with the import of the President's policy statement. The Court of Appeals, although not addressing itself *per se* to the neighborhood school concept, nevertheless disapproved the geographic zones at all three instructional levels which the Board in its considered judgment had proposed to achieve a unitary system while retaining the basic benefits of the neighborhood school.

On review, this Court should clearly address itself to the extent that the neighborhood school may be retained and employed as part of a fairly administered non-discriminatory plan for the establishment of a unitary system.

II.

The Constitution Does Not Require Racial Balancing in Schools or Busing of Children Outside Geographic Attendance Zones to Effect Such Balancing. The Court of Appeals Joined in the Error of the Trial Court by Requiring Such Balancing and Busing.

As previously noted, we approve the test of reasonableness adopted by the Court of Appeals—instead of one that calls for absolutes. Such a test is consistent with the equitable principles elucidated in *Brown II*, which made

it clear that desegregation plans and the means of implementing them should take into account a variety of local problems and conditions—including by implication those specifically itemized by the Court of Appeals (age of pupils, board resources, cost, effect of busing on traffic and the distance and time for transportation).

We agree with the Court of Appeals that the application of the Rule of Reason requires that school boards must use all reasonable means to integrate their schools and that, if these efforts prove unavailing, a system may nevertheless be unitary even though an "intractible remnant of segregation" and some predominantly black schools remain.

Further, we agree that transportation may be employed on a "reasonable" basis as a legitimate tool to effectively desegregate an otherwise dual system. However, this still leaves open to question the circumstances under which and the purposes for which busing may be or should be imposed upon a school system.

The net effect of the trial court order of February 5, 1970, was to require racial balancing at all three instructional levels and the busing necessary to implement it—regardless of cost or disruptions. The net effect of the Court of Appeals decision was to require racial balancing at the junior and senior high levels and to authorize it at elementary level—tempered only by its test of reasonableness with reference to the amount of busing involved.

We do not believe that the mandate of the Constitution requires racial balancing nor compulsory busing outside of normal attendance zones to achieve such balancing, assuming, of course, that the attendance areas are fairly drawn so as to maximize desegregation.

The circumstances of this case and the decisions of the trial court and Court of Appeals regarding the extent to which racial balancing and compulsory busing may or must be required are basic unresolved problems that are plaguing not only Charlotte-Mecklenburg, but courts and school systems everywhere. The sooner these problems are resolved, the sooner the costly uncertainties and disruptions in the field of school desegregation will be minimized or dispelled and school boards and administrators can get on with their primary task of providing quality education for all children, black and white. We urge this Court to take the opportunity afforded by this case to cope with these issues.

A. *Analysis of Racial Balancing and Busing Imposed Upon Charlotte-Mecklenburg Schools.*

At the heart of the controversy involved in this case is the lawfulness of the trial court's February 5, 1970, order requiring long distance busing in the senior high, junior high and elementary schools. In order to highlight the implications of the decisions of the trial court and the Court of Appeals with respect to balancing and busing, we discuss the problems and issues involved at each of the three instructional levels.

Senior High Schools

The Board's pupil assignment plan for senior high schools effectively desegregated each of the ten high schools; nine of them would have black ratios of 17%-36%. The student body of the remaining school, Independence High, would be 2% black. This plan was adopted by the court consultant and the trial court with one exception: A requirement was engrafted upon the Board plan that 300 black students residing in the inner core of the

City must be bused from the area of their residence through the center city traffic a distance of about 12 or 13 miles to Independence High School located in white suburbia. This arrangement in turn was approved by the Court of Appeals as a "reasonable" means of eliminating Independence as an almost totally white school. The Court of Appeals observed that the bus mileage involved for the black youngsters was about the same as the average one-way bus route of others attending that school —but neglected to take into account the fact that the existing bus routes were primarily in rural and suburban areas rather than in the congested inner-city areas which would be traversed by the 300 black students.

Under the plan as proposed by the Board, these 300 children would have attended a thoroughly desegregated high school having a racial composition of 36% black and 64% white. The only purpose served by the court directed shifting of these 300 was to make a white school less white.

We do not think that the Constitution requires this racial balancing nor the busing necessary to implement it. Neither do we feel these requirements fall within the purview of the Rule of Reason.

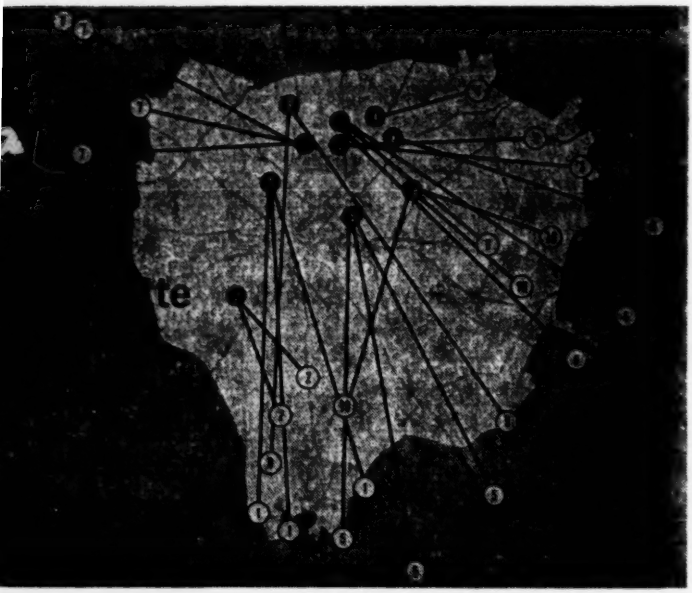
Junior High Schools

The Board plan proposed to restructure the attendance lines of the 22 junior high schools so that all but one of them would have not more than 38% black students. In spite of the Board's best efforts, the one remaining school (Piedmont Junior High) housing about 840 pupils was left 90% black and 10% white. In order to reduce the percentage of blacks in this one school from 90% (758 pupils) to 32% (243 pupils) the court consultant re-

shuffled the Board's proposed attendance zones for the junior high schools and provided for satellite busing of 1,372 additional (total of 2,760) inner-city black youngsters to nine predominantly white suburban schools. This proposal of Dr. Finger was approved by the trial court and the Court of Appeals.

By way of summary, the restructuring the Board's attendance lines and the busing of 1,372 additional black children were directed in order that the black student body at Piedmont would be reduced by 515 students. We do not think that this dislocation of 1,372 additional black pupils, nor the cost of busing required to accomplish this racial balancing, can stand up under the test of reasonableness or the requirements of the Constitution.

Elementary Schools[13]



The most burdensome part of the trial court's order was the long distance cross-busing of about 10,200 elementary children to eliminate the nine predominantly black inner-city schools by clustering them with 24 predominantly white suburban schools—requiring the busing of 5,100 black first, second, third and fourth graders to the white schools and 5,100 white fifth and six graders to the black schools. A schematic portrayal of the clustering and cross-busing ordered by the trial court follows on the next page. The particulars regarding the number and cost of the buses required to effectuate this arrangement are set forth in the opinion of the Court of Appeals (191a, 192a) and will not be repeated here.[14]

---

[13]The 76 elementary schools referred to by the Court of Appeals (191a) includes four child development centers and learning academy. The remaining 72 schools are conventional elementaries.

[14]There is a marked disparity between transportation cost estimates of the school staff and those set forth in the trial court's

A Maze of Bus Routes to Integrate Charlotte Schools

Copyright © 1970, U. S. News & World Report, Inc.

Under its test of reasonableness, the Court of Appeals properly held that, based on the trial court's estimate, the resulting increase of 39% in the number of elementary children bused and 32% in the present bus fleet was too extensive and too onerous. The Court of Appeals reversed the trial court's order with reference to this phase of the plan and remanded with instructions that the Board con-

---

Supplementary Findings of Fact (152a-157a), which drastically discounted those of the administrators and minimized the relevance of the cost increases for administration, bus parking, maintenance, driver education and similar items. In this opinion, the Court of Appeals set forth both sets of figures and observed that the findings of the district court and the evidence submitted by the Board rest on many variables (193a).

sult with HEW and consider methods other than geographic attendance areas, including rezoning with or without satellites, pairing, grouping and school consolidation.

In its remand, the Court of Appeals directed that any new elementary plan approved by the trial court be put into effect next September. We reiterate our fervent hope that this Court will give appropriate directions before the Board is faced with the disruptions and expenditures that may ultimately prove to be unnecessary.

B. *Racial Balancing as Basis for Decision of Trial Court and Court of Appeals.*

The trial court's February 5, 1970, order begins with the assertion: "The order which follows is ***not*** based on any requirement of 'racial balance.'" (Emphasis supplied) (115a). That it was the obvious purpose of the trial court, not only to eliminate each black school, but also to eliminate all-white schools by requiring a racial mix to make them less white is readily apparent from the following excerpt from Paragraph 12 of its December 1, 1969, Order (105a):

> "* * * (T)he Court will start with the thought, originally advanced in the Order of April 23, that efforts should be made to reach a 71-29 ratio in the various schools so that there will be no basis for contending that one school is racially different from the others, but to understand that variations from the norm may be unavoidable."

Further, Paragraph 13 of the trial court's February 5, 1970, order (118a) not only requires an initial establishment of racial ratios in the various schools but also implementation of a continuing program "computerized or

otherwise" of assigning pupils throughout the school year "for the conscious purpose of maintaining each school * * * in a condition of desegregation."[15]

This requirement that children be reshuffled periodically to maintain prescribed ratios makes of our children unwitting pawns in a colossal numbers game.

Although the majority of the Court of Appeals did not expressly confirm or deny that it was engaging in racial balancing (albeit tempering the absolutism of the trial court with its own rule of reasonableness), Bryan, Circuit Judge, in his dissent made his own appraisal of the main thrust of the majority's decision (215a-217a):[16]

> "The Court commands the Charlotte-Mecklenburg Board of Education to provide busing of pupils to its public schools for 'achieving *integration*'. (Accent added) '(A)chieving *integration*' is the phraseology used, but actually, achieving racial *balance* is the objective. Busing to prevent racial imbalance is not as yet a Con-

---

[15]The likely results of such a program were described in *Beckett v. School Board of City of Norfolk, supra.*:

> "If such a mandate requires the *mixing of racial bodies* in each and every school building, irrespective of any local problems confronting the School Board, the answer is obvious. Under such circumstances racial balancing, or some system approximating same, must be ordered, and it would be a waste of time and effort to file plans which may be educationally beneficial to the children. The Civil Rights Division conceded, in argument, that any approach to racial balancing would annually require a *constant shuffling and reshuffling of children throughout the school system.* It is agreed by all that such a shuffling process is most *detrimental to children.*" (Emphasis supplied)

[16]See also President Nixon's policy statement of March 24, 1970, entitled *SCHOOL DESEGREGATION: A Free and Open Society, supra.*

stitutional obligation. Therefore, no matter the prior or present utilization of busing for this or other reasons, and regardless of the cost considerations or duplication of the bus routes, I think the injunction cannot stand.

Without Constitutional origin, no power exists in the Federal courts to order the Board to do or not to do anything. I read no authority in the Constitution, or in the implications of Brown v. Board of Education, 237 U. S. 483 (1954), and its derivatives, requiring the authorities to endeavor to apportion the school bodies in the racial ratio of the whole school system.

The majority opinion presupposes this racial balance, and also busing to achieve it, as Constitutional imperatives, but the Chief Justice of the United States has recently suggested inquiry on whether 'any particular racial balance must be achieved in the school; . . . (and) to what extent transportation may or must be provided to achieve the ends sought by prior holdings of the Court.' * * *

I would not, as the majority does, lay upon Charlotte-Mecklenburg this so doubtfully Constitutional ukase." (Emphasis by Judge Bryan).

The concerns and dissent of Judge Bryan find expression in earlier cases. For example, in *Carr v. Montgomery County Board of Education,* — F. Supp. — (M.D. Ala. 1970):

"Plaintiffs' objections * * * appear to be based on a theory that racial balance and/or student ratios as opposed to the complete disestablishment of a dual system is required by the law. Such is not this Court's concept of what the law requires. *Complete disestablishment of the dual school system to the extent that it is based*

on race is required. While pairing of schools may sometimes be required to disestablish a dual system, the pairing of schools or *the busing of students to achieve a racial balance*, or to achieve a certain ratio of black and white students in a school is *not required by law.* * * *" (Emphasis supplied)

And even more succinctly in the dissent of Judge Gewin (Bell, J., concurring) in *U. S. v. Jefferson County Board of Education*, 380 F. 2d. 385, 403 (5th Cir. 1967):

"* * * No consideration is given to any distinction in any of the numerous school systems involved. Urban schools, rural ones, small schools, large ones, areas where racial imbalance is large or small, the relative number of Negro and white children in any particular area, or any of the other myriad problems which are known to every school administrator, are taken into account. All things must yield to speed, uniformity, percentages and proportional representation. There are no limitations and there are no excuses. This philosophy does not comport with the philosophy which has guided and been inherent in the segregation problem since Brown II. As the Court there stated:

> 'Because these cases arose under *different local conditions* and their disposition will involve a variety *of local problems*, we required further *argument* on the question of relief.' (349 U. S. p. 298, 75 S. Ct. p. 755)" (Emphasis added).

As suggested by Circuit Judge Bryan, it would be in order for this Court to address itself to this as yet unresolved problem.

C. *Role of School Boards and Administrators in Controlling the Destiny of Public Education.*

"In devising local compliance plans, primary weight should be given to the considered judgment of local school boards—provided they act in good faith, and within Constitutional limits." President Nixon's March 24, 1970, policy statement entitled *SCHOOL DESEGREGATION: A Free and Open Society, supra.*

If it were otherwise, the admonition of Judge Coleman in his dissenting opinion in *Bivins v. Bibb County Board of Education*, 419 F. 2d. 1211 (5th Cir. 1970), is pertinent:

"Some of these days, the Courts are going to have * * * to free themselves of their tragic failures in the role of school administrators and get back to their primary functions."

As expressed in its February 2, 1970, plan, it was the considered judgment of the Charlotte-Mecklenburg School Board that the benefits to be obtained from the use of extensive transportation to eliminate the 10 remaining black schools previously referred to would be far outweighed by the resulting burdens, inconvenience and cost:

"* * * Bussing in a school system as large as the Charlotte-Mecklenburg System is at best an expensive and complex operation. It is acknowledged that a large number of children are already being bussed to and from school. However, the burden, expense, hardship, inconvenience, hazards, expenditures of unproductive time and added administrative problems occasioned by any bussing program should be minimized. * * * The Board cannot justify on any reasonable basis the very substantial additional cost and burden of the compulsory bussing that would be required for the sole purpose of effecting a desired racial mix in the remaining 10 black schools. Under the best arrangement, the Board could envision to eliminate these black schools, massive

cross-bussing would require the transportation of about 10,300 black and white children, 5,150 into and 5,150 out of the inner-city at the elementary level and 590 into and 590 out of the inner-city at the secondary level. This involuntary bussing would involve an approximate 15-mile trip each way (30 miles round trip)[17] for each student moved through the heart of the business and residential sections of the City. * * * A plan that generates unnecessary transportation costs and occasions unnecessary burdens and inconveniences for parents and children alike would jeopardize the public support which provides the tax and bond money upon which our schools are totally dependent for financing the already high cost of education. * * * The burden of extra bussing that would be required to desegregate each of the 10 remaining predominantly black schools would fall primarily on elementary children. The major impact of this burden would be imposed upon children who, because of their tender years, are the most illogical candidates to bear this burden."

The Charlotte-Mecklenburg School Board is an elective body and, as such, is charged with the responsibility of exercising its own judgment regarding the needs of the System and the best interest of its children.

It is the School Board's duty to determine whether the dollars allocated to it by other elective officials (the Board of County Commissioners for Mecklenburg County) for the education of our children shall be spent for *books or buses*. It is for the Board to determine whether the existing transportation system shall be expanded or contracted, whether it is educationally good or bad to stagger the

---

[17]Compare findings of trial court; 8,000 students cross bussed, 7 miles one way and 14 miles round trip. (155a).

opening and closing of schools at any particular grade level, whether after school activities will suffer, whether inconvenience and disruptions to children and parents are justifiable, whether overloaded buses are acceptable or safe, whether the time of children in transit is justifiable and how the host of other value judgments and policies shall be made to administer effectively a large complex metropolitan school system charged with awesome responsibility of providing 84,500 school children in 103 schools with a quality education.

Books, bricks and buses (and all that they imply) are part of the tools to be used in the educational process. How and when these tools are used must be left to the good faith decision of local school boards or the boards should be disestablished and the administration of school systems should be turned over to the courts.

The fact that now the Charlotte-Mecklenburg school system transports 23,000 children with 280 buses, the opening and closing of some of its schools are staggered, in some schools after-school activities are impaired, some school buses travel over congested traffic arteries, some elementary children wait for the school bus by the side of the road at 6:30 in the morning and others get home at 5:00 in the afternoon, some buses are overloaded and some children must stand up, some buses are unsound and should be replaced—*is no answer* to the administrative and educational problem of how much of this is desirable, tolerable or necessary in a system as large and complex as Charlotte-Mecklenburg. A court mandate that edicts racial balancing and forced busing supplants the value judgments of the elected school board and the educators on its administrative staff. An overdose of judicial paternalism and control will ultimately sign the death warrant for public education.

We hope this Court will evolve standards and guidelines for desegregation plans sufficiently clear and definite that courts will not be tempted or required to rely on their personal educational and social philosophies.

D. *Racial Balancing and Compulsory Busing Infringe on the Personal Rights and Freedom of the Children Involved.*

In its February 2, 1970, plan, the School Board concluded with a statement of its conviction that its duty is to protect the rights of all children:

> "* * * The Board understandably is prone to *exercise caution lest, in protecting the rights of some of its citizens, it tramples on the rights of others* in the absence of a clear mandate from the Supreme Court." (Emphasis supplied)

The caution of the Board was well-founded. We believe that the busing requirements of the trial court and the Court of Appeals will violate the individual rights guarteed by the Fourteenth Amendment of those blacks and whites caught up in the forced mass movement of children away from their neighborhoods and out of their normal attendance zones for the sole purpose of achieving racial balancing.

It is obvious that a School Board must necessarily have wide latitude in the establishment of attendance zones for orderly administration of the various schools in its system and that, if these zones are fairly conceived on a nondiscriminatory basis, the children may be compelled to attend the school to which they are assigned under the applicable compulsory attendance laws. (See N.C.G.S. Secs. 115-116 *et seq.*) Absent an unlimited freedom of choice arrangement (which the Charlotte-Mecklenburg Board has not proposed), the right of a child to go to a

particular school is, of course, not absolute, but circumscribed by the inherent power of a School Board to make reasonable attendance assignments to conform to the needs of the school system and the community it serves.

Whether or not the Board itself could lawfully have required cross and satellite busing to effect the compulsory mass movement of children is an open question. But the resolution of that question is not before this Court—for the reason that the Board did not choose to go to this extreme. The point now at issue is whether the orders of the trial court and Court of Appeals infringe on the individual constitutional rights of the children and their parents—black and white—who do not want to be bused. These orders effectively exclude a child from attending the school in his attendance zone solely on account of the child's race.

From time immemorial, the public school has been a focal point of community and family life. The location of a particular school is a major consideration for parental decisions regarding the location of their homes and the neighborhood in which they choose to live. Obviously, affluent whites and blacks are normally better able to make this choice than poor whites and blacks. Nevertheless, some poor people prefer that their children attend the school serving the areas of their residence. To afford disadvantaged parents the flexibility of greater options for the education of their children than their existing economic or social status may permit and to bring these available options more in line with those enjoyed by the more affluent citizens are worthwhile objectives of any desegretion plan. But it is quite a different matter for a judicial decree to compel busing to a distant school outside the normal attendance zones—whether the parents like it or not. A court mandate that requires this coercion to achieve what it conceives to be a worthy social purpose (i. e. racial balance) is judicial paternalism.

The dissenting opinion of Judge Bell (concurred in by Judge Gewin) in *United States v. Jefferson County Board of Education*, 380 F. 2d. 385 (5th Cir. 1967) at p. 411, involving the desegregation of numerous deep south schools, speaks to the matter at hand:

> "Then there is the matter of personal liberty. *Under our system of government, it is not to be restricted except where necessary, in balance, to give others their liberty, and to attain order so that all may enjoy liberty.* History records that sumptuary laws have been largely unobserved because they failed to recognize or were needlessly restrictive of personal liberty. * * * They (the majority opinion) *cast a long shadow over personal liberty as it embraces freedom of association and a free society.* They do little for the cause of education." (Emphasis supplied)

In *Jefferson County, supra*, Judge Gewin in his own dissent (concurred in by Judge Bell) expressed similar views (at pp. 404-406):

> "* * * There must be a mixing of the races according to majority philosophy *even if such mixing can only be achieved under the lash of compulsion.* * * * Accordingly, *while professing to vouchsafe freedom and liberty to Negro children, they have destroyed the freedom and liberty of all students, Negro and white alike.* There must be a mixing of the races, or integration at all costs, or the plan does not work according to the opinion. Such has not been and is not now the spirit or the letter of the law. * * * *When our concepts as to proportions and percentages are imposed on school systems,* notwithstanding free choices actually made, *we have destroyed freedom and liberty by judicial fiat; and even worse, we have done so in the very name of that liberty and freedom we so avidly embrace.*" (Emphasis supplied)

The majority in *Jefferson, supra*, and other courts have sought to justify infringement on the rights of students in the majority where segregation is said to rest upon *de jure* action.

We respectfully suggest that the distinction between *de facto* and *de jure* is not a valid test by which to measure the constitutional rights of either black children or white children and that there is no valid reason for applying a more exacting standard to a *de jure* child than a *de facto* child in a consideration of his individual rights. We think it a fair assumption that both the black and white elementary (junior and senior high) child are blissfully unaware of the differences between *de facto* and *de jure* and suggest that the subtle difference between *de facto* and *de jure* has no pertinence when it comes to appraising the personal rights and liberties of a child.

This case presents for review the important question of whether court decreed compulsory racial balancing and busing unlawfully inroad upon the constitutional rights and freedoms of the children and parents involved.

E. *The Compulsory Busing Approved by the Court of Appeals is Violative of the Provisions of Section 401(b) and 407(a)(2) of the Civil Rights Act of 1964 (42 U.S.C. 2000c(b) and 6(a)(2)) which Expressly Prohibits a United States Court to Order Transportation to Achieve Racial Balance in Schools.*

The Court of Appeals has read into the Civil Rights Act of 1964 interpretations which are not fairly warranted by the plain and intelligible language of the Act or supported by its legislative history. In doing so, it has joined the error committed by the Court of Appeals for the Fifth Circuit in *Jefferson, supra*, which reached its conclusion by a strained illogical analysis of this Act and the legislative history.

The clear language of the Act makes no distinction between *de facto* and *de jure* segregation and the legislative history expressly disclaims any sectional or tenuous distinctions adopted by the Court of Appeals and the cases on which it relies. If it were otherwise, Congress would have expressly so stated and the proponents of the bill would have made it so known.

The courts have been unwilling to give any definitive statement with respect to the term "desegregation" and, therefore, it became incumbent upon Congress to supply answer in this void. 42 U.S.C. 2000c(b) provides as follows:

> " 'Desegregation' means the assignment of students to public schools and within such schools without regard to their race, color, religion or national origin, but 'desegregation' shall not mean the assignment of students to public schools in order to overcome racial imbalance."

It is therefore apparent that Congress in expressing a definition of "desegregation" in a positive manner stated that no student would be *excluded* from his school on account of race, color, religion or national origin. This is the language of *Alexander v. Holmes*, 396 U. S. 19 (1969). Congress also negatively stated "desegregation" does not mean assignment to overcome racial imbalance.

In order to give further meaning to its definition, Congress by 42 U.S.C. 2000c-6(a) provides in part as follows:

> "* * * (P)rovided that nothing herein shall empower any official or court of the United States to issue any order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another or one school district to another in order to achieve such racial balance, or other-

wise enlarge the existing power of the court to insure compliance with Constitutional standards.***"

The term "desegregation" has taken on such national concern and importance that a definition may properly be regarded as a statement of public policy. Although the courts may take action with reference to establishing public policy, it primarily rests with the lawmakers to determine public policy. In *Building Service Employees International Union v. Gazzam*, 339 U. S. 991, 70 S. Ct. 1019 (1950), the Supreme Court held:

"The public policy of any state is to be found in its Constitution, acts of the legislature, and decisions of its courts. *Primarily, it is for the lawmakers to determine the public policy of the state.* (p. 787) *Twin City Pipeline Company v. Harding Glass Co.*, 283 U. S. 353, 357, 51 S. Ct. 476, 478, 75 L. Ed. 1112, 83 A.L.R. 1168."

Having primary responsibility, and acting to fill a void left by the courts, the public policy as expressed by the Congress of the United States is binding upon the judiciary.

Obviously, the opinion and order of the Court of Appeals approving the order of the trial court, when measured with the attempt to achieve precise balances or ratios of students in the secondary level, clearly indicates that the effect of the order was directed unerringly to the premise of racial balance. If not, why would the court disturb desegregation on the senior high level where no school was more than 36% black. The answer is supplied by the Court of Appeals:

"The transportation of 300 high school students from the black residential areas to suburban Independence School will tend to stabilize the system by eliminating an almost totally white school in a zone to which other whites might move with consequent "tipping" or resegregation of other schools." (195a)

It is clear that the district court and the Court of Appeals were of the opinion that all high schools in the system should contain the same racial ratio or racial balances.

Similarly, the establishment of nine satellite zones in black areas for assignment to distant suburban white schools was devised for the purpose of achieving maximum racial balance. Of the 21 junior high schools, 16 of them would have black ratios of 27% to 33%, four a ratio of 21% to 25% and one at 9%. It is obvious that a system of this size having such ratios imposed has been "racially balanced" under the plain meaning of the Civil Rights Act of 1964.

Judge Bryan in his dissent clearly reveals congressional hostility to the principle of "racial balance:"

> "Even construed as only incidental to the 1964 Civil Rights Act, this legislation in 42 United States Code §2000c-6 is necessarily revealing of Congress' hostile attitude toward the concept of achieving racial balance by bussing. It unequivocally decried in this enactment "any order [of a Federal Court] seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another . . . to achieve racial baalnce. . .' "

Similarly, the North Carolina Legislature in North Carolina General Statute 115-176.1 adopted a state law expressing the public policy of this state to be such that involuntary transportation of students for the purpose of creating a balance or ratio of races is prohibited. The constitutionality of this statute is on appeal to the Supreme Court from the opinion of a three-judge court which held this statute to be unconstitutional on April 29, 1970. To have separate treatment herein is deemed unnecessary.

The *de jure-de facto* distinction adopted by certain courts of appeal (216a) defies all reason in applying

different standards to school systems solely because of their geographical location. The United States Commission on Civil Rights study concerning causes of segregation has found substantial similarity without regard to state laws. It is now time for the Supreme Court to address itself to this question, which unanswered, threatens to further divide this nation.

CONCLUSION

Therefore, the cross petitioners respectfully request that this Court grant this cross petition for a writ of certiorari to review the judgment of the United States Court of Appeals for the Fourth Circuit.

INTRODUCTORY STATEMENT REGARDING BRIEF	1
OPINIONS BELOW	2
JURISDICTION	2
QUESTIONS PRESENTED	3
CONSTITUTIONAL AND STATUTORY PROVISIONS INVOLVED	4
PRELIMINARY STATEMENT	4
STATEMENT OF THE CASE	7
SUMMARY OF ARGUMENT	24
ARGUMENT–	
I. General Discussion of Constitutional Problems and Concepts	26
A. A Child's Constitutional Right Guaranteed by the Fourteenth Amendment Is To Go to School in a Unitary System. If the School Is Part of Such a System, He Has Been Accorded that Right	26
B. A Unitary System Is One Within Which No Child Is Excluded from any School Because of Race. If a Desegregation Plan Promises Realistically To Accomplish This, It Is Constitutionally Acceptable Notwithstanding a Residue of Predominately Black or White Schools that Remain for Reasons Unrelated to Race	28
C. A "Rule of Reason" Rather than a "Rule of Absolutes" Should be the Standard by Which To Judge the Sufficiency of a Desegregation Plan	32
D. The Distinction Between De Facto and De Jure Is Not a Valid Standard by Which To Determine Whether a School System Is Unitary	41
E. The Constitution Does Not Require Racial Balancing in Schools or Bussing of Children Outside Geographic Attendance Zones To Effect Such Bal-	

ancing. Balancing and Compulsory Bussing Infringe on the Personal Rights and Liberties of the Children Involved . . . . . .

1. Racial Balancing and the Bussing To Achieve It Were the Bases for the Decisions of the Trial Court and Court of Appeals . . . . . .
2. Racial Balancing and Compulsory Bussing Required by the District and Circuit Courts Violate the Constitutional Rights of the Children Involved . . . . . .
3. A Neighborhood Plan Fairly Administered Without Racial Bias Satisfies the Constitutional Requirements of a Unitary System . . . . .
4. The Compulsory Bussing Approved by the Court of Appeals Is Violative of the Provisions of Section 401(b) and 407(a)(2) of the Civil Rights Act of 1964 [42 U.S.C. 2000c (b) and 2000c-6(a)(2)] Which Expressly Prohibits a United States Court To Order Transportation To Achieve Racial Balance in Schools . . . . . .

F. Racial Balance—the Harbinger of Massive Court Involvement in Social Theories . . . . . .

II. Discussion of Constitutional Principles Applied to Desegregation Plans . . . . . .

A. General Statement Regarding Desegregation Plans Involved in this Case . . . . . .

B. The Board Plan Converts the Charlotte-Mecklenburg Schools to a Unitary System. The Fourth Circuit Joined in the Error of the Trial Court by Disapproving that Plan . . . . . .

1. The Board Plan Squares With the Conversion Checklist Prescribed by Green . . . . . .
2. The Board Plan Based on Geographic Attendance Zones Gerrymandered To Achieve Maximum Racial Mix Fully Complies with Constitutional Requirements for Desegregation of the Charlotte-Mecklenburg Schools and Their Student Bodies . . . . . .

C. The Court Approved Finger Plan Exceeds Constitutional Requirements by Requiring Racial Balancing and the Bussing To Implement It. The Fourth Circuit Joined in the Trial Court's Errors by Disapproving the Board Plan and Misapplying Its Own Rule of Reason 76

1. An Analysis of the Court Approved Finger Plan Shows the Racial Balancing Imposed Upon the Charlotte-Mecklenburg Schools 77

(a) Elementary Schools 77

(b) Junior High Schools 78

(c) Senior High Schools 79

2. The Court-Approved Finger Plan Is Unreasonable and Proper Consideration Was Not Given to the Burdens Which that Plan Imposes on the Charlotte-Mecklenburg System 80

D. The HEW Elementary Plan Is Educationally Unsound, Requires Racial Balancing, Fosters Resegregation and Is Unreasonable .....

E. The Elementary Plan of the Board Minority Is Incomplete and Unlawfully Exceeds Constitutional Requirements by Requiring Complete Racial Balancing of Every Elementary School and the Bussing To Implement It. The District Court Erred in Approving that Plan as a Reasonable Alternative 88

F. The Earlier Draft of the Finger Elementary Plan Is Incomplete and Unlawfully Exceeds Constitutional Requirements by Requiring Racial Balancing. The District Court Erred in Approving that Plan as a Reasonable Alternative 90

G. In Assessing the Effectiveness of a Desegregation Plan, a Rule of Reason Requires that Due Consideration Should be Accorded School Boards and Administrators in Controlling the Destiny of Public Education 91

CONCLUSION 93

Brief Appendix

Statistical Data Relating to the Charlotte-Mecklenburg Schools and the Board Plan A-1

OCTOBER TERM, 1970

No. 349

CHARLOTTE-MECKLENBURG
BOARD OF EDUCATION, et al,

Cross Petitioners,

v.

JAMES E. SWANN, et al,

Cross Respondents.

BRIEF OF CROSS PETITIONERS

INTRODUCTORY STATEMENT REGARDING BRIEF

The briefs submitted in the companion cases Nos. 281 and 349 are identical. This statement is made so that this Court may be spared the inconvenience of a separate detailed analysis of both briefs.

Case No. 281 relates to the Petition filed by the plaintiffs for a review of the decision of the Circuit Court of Appeals

for the Fourth Circuit. Case No. 349 relates to the Cross-Petition of the defendants from the same decision. The plaintiff's Petition in case 281 was granted on June 29, 1970. Although action on the defendants' Cross-Petition has been deferred until the convening of this Court at its October 12, Term, 1970, this Court has advised that both cases will be heard on October 12, 1970, and has instructed the defendants to file briefs in both cases. The two cases have not been consolidated for briefing.

Each of the two cases involves the same school system, the same orders of the district court and Circuit Court and the same issues. In order to be of as much assistance as possible to this Court, it is prudent that one comprehensive presentation shall be made. It is for this reason that, although separate briefs are filed, their text and content are the same.

OPINIONS BELOW

The opinions of the courts below are set forth in Brief for Petitioners filed in No. 281 on pages 1 through 3 thereof.

JURISDICTION

The judgment of the Court of Appeals for the Fourth Circuit was entered on May 26, 1970. The jurisdiction of this court is invoked under 28 U.S.C. 1254(1). The Petition for Writ of Certiorari was filed in this court on July 2, 1970. On August 31, 1970, the Chief Justice deferred action on Cross Respondents' pending Petition for Writ of Certiorari and directed filing of briefs and set this case for oral argument on Monday, October 12, 1970.

QUESTIONS PRESENTED

1. Did the Court of Appeals join in the error of the trial court in rejecting the desegregation plan offered by the Board of Education where 68% of the black students would attend schools in which their race was in the minority and where the remaining 32% of the black students would attend schools having white ratios of 17% to 1% and these black students would be taught by a predominantly white faculty and further where such black students were offered more generous freedom of transfer than that offered by the customary majority to minority transfers?

2. Did the Court of Appeals join in the error of the trial court in rejecting the plan for desegregation of the 72 elementary schools prepared and offered by the Board of Education, where the plan left no all-black schools, though nine of 72 schools had white ratios of 1% to 17% and black students attending those schools would have an untrammeled right to transfer to any one of the 63 remaining elementary schools, and upon departure from elementary schools would be assured of a desegregated education during the remainder of their schooling?

3. Did the Court of Appeals join in the error of the trial court in rejecting (by the trial court's offering the Board a "Hobson's choice") the Board plan for desegregation of junior high schools where only one of 21 junior high schools would have more than a 39% black student ratio and the remaining predominately black school would house 758 black and 84 white students and have a predominately white faculty by imposing a requirement on the Board to create nine black satellite districts containing approximately 2,700 black students and assigning them to predominately white suburban junior high schools?

4. Did the Court of Appeals join in the error of the trial court in rejecting the Board plan for desegregation of senior high schools where the plan provided that no school would have more than a 36% black ratio and that each school would

have a predominately white faculty and in imposing a further requirement upon the Board that 300 black students residing in four designated grids would be bussed a substantial distance from the northwestern part of the city to a high school serving the extreme southeastern portion of the county?

5. Did the Court of Appeals join in the error of the trial court in imposing racial balances in junior and senior high schools in contravention of Title 42 U.S.C. 2000(c)(b) and 6(a)(2) (Sections 401(b) and 407(a)(2)) of the Civil Rights Act of 1964.

CONSTITUTIONAL AND STATUTORY PROVISIONS INVOLVED

This case involves the equal protection clause of the Fourteenth Amendment of the Constitution of the United States, Section 401(b) and 407(a)(2) of the Civil Rights Act of 1964 [42 U.S.C. 2000(c)(b) and 6(a)(2)].

PRELIMINARY STATEMENT

The principal question presented by the several appeals herein relates to whether or not the Charlotte-Mecklenburg public school system may retain one or more predominately black schools. If the absolutists are to prevail, then the presentation which follows is wholly irrelevant. The Court of Appeals held that no such absolute requirement exists as desegregation of the predominately black schools will be adjudged by the "test of reasonableness."

In order to answer the question, one must have an understanding of this school system. The system involves 103 schools, 4 kindergarten programs and one learning academy, which last year served approximately 84,500 students of which 29% were black and 71% were white. The system is expected to grow by an approximate 3,000 students this

school year. In comparison to other school systems in this nation, the system ranks 43rd largest.

As an urban school district, it shares the same problem of other urban school systems. Since 1954, the black student population has increased from 10,000 to 24,000 students and during this period eleven formerly all-white schools are now almost entirely black (691a). The transition has been rapid. In 1965 these eleven schools housed a 35% black student population. During the 1969-70 school year, these schools housed an 81% black population and the areas in which this transition has taken place are located generally in the older white neighborhoods. Charlotte has experienced phenomenal growth and, therefore, the older neighborhoods are primarily located near the center of the city, which serves as the base for the expanding black areas as whites on the economic move improve their position; blacks improving their position take over the white homes. This had led to the transition of schools from white to black. Today, 95% of the black students reside in the northwestern inner-city quadrant or the fringes thereof.

The Board was in the process of combating this problem by construction of schools in areas which would offer more stable desegregation, the most notable of which were Olympic High School, originally scheduled for construction in a predominately black neighborhood, and Randolph Junior High which was also scheduled for construction in a similar neighborhood (72a-73a).

Further efforts of the Board involved closing and consolidating of twenty schools; creation of a single athletic league; nondiscriminatory employment practices; substantial desegregation of school faculties with total desegregation to follow for the 1970-71 school year; cross racial assignment of principals; appointment of black professionals to ranking administrative positions; board appointment of a black member to the Board of Education; elimination of the dual bus system; nondiscrimination with respect to teacher salaries, school fees, school lunches, library books, instructional materials,

quality of school buildings, use of federal funds, course offerings and evaluation of students; merger of the black and white PTA Councils; operation of specialized and supplementary programs implemented to increase desegregation; redesigning of freedom of choice so that its only effect would increase desegregation and give racial stability to the schools; gerrymandering of attendance lines to promote maximum racial desegregation and other techniques designed to create and promote racial stability (681a-683a, 1265a-1266a).

The rural areas of the school system do not offer such difficult problems in desegregation as the races are scattered and, therefore, as with most rural systems, these schools present substantial stable desegregation (313a).

Freedom of choice has neither perpetuated nor made substantial inroads on the desegregation problem. The superintendent estimated that approximately 1,200 (565a) white students had left predominately black schools where they would have been mixed in varying degrees with approximately 16,000 blacks.

In 1957 Charlotte led the South in opening its schools to students of both races. However, it is admitted that there were few students who took advantage of this option. Consolidation of the city and county systems, the two largest in the state, occurred in 1961, creating a school system having an east-west span of 22 miles and a north-south span of 36 miles and comprised approximately 550 square miles. The City of Charlotte contains 64 square miles, making it larger than the District of Columbia. The county is nearly twice the size of the City of New York.

In 1965 a plan was devised by the Board embracing freedom of choice, rezoning and non-racial assignment of faculty which entirely abolished the former dual system under the law as then understood. That plan was approved by the district court in 1965 and by the Court of Appeals in 1966. The plan led to the abolition of all dual auxiliary programs and services, such as transportation, athletic leagues, PTA's, etc.

Consistent with racial anonymity, racial identification of students and faculty was completely removed from all school records. Because of this, during the course of this litigation, requests for racial information created a substantial burden on the school system in producing this data.

The plan proposed by the Board eliminates 8 of the 17 predominately black elementary schools, four of the five predominately black junior high schools and establishes ten senior high schools so that no high school will have more than a 36% black ratio. It reduces the number of blacks attending predominately black schools to 7,497. (Compare district court's finding of 16,000 previously). Faculties will be racially balanced.

These exemplary steps have been taken by a school board which petitioners variously label as "recalcitrant," "contemptuous," "lawless" and similar characterizations.

STATEMENT OF THE CASE

The plan for desegregation offered to the district court by the Charlotte-Mecklenburg Board of Education would place 68% of the 24,000 black students in predominately white schools and the remaining 32% would attend schools having a black ratio of 83% to 99%. No other school system of similar size and complexity in this nation has the degree and volume of desegregation offered by this plan.

The exemplary proposal of the Board was summarily rejected by the district court for the reason that this system would not be permitted to have a predominately black school. The district court therefore ordered racial balancing of the schools served by the system.

The present action was instituted in 1965 which resulted in the district court's approval of the plan then offered by the Board. The salient features of the plan related to school closings, school consolidation, freedom of choice (as suggested by *Goss v. Knoxville*, 373 U.S. 683 (1963)), rezoning, nonracial assignment of teachers, and nonracial records of students. Circuit Judge Craven, then district judge, noted:

> As a general proposition, it is undoubtedly true that one could deliberately sit down with the purpose in mind to change lines in order to increase mixing of the races and accomplish the same with some degree of success. I know of no such duty upon either the school board or the district court. The question is not whether zones can be gerrymandered for the assumed good purpose of racial mixing, but whether gerrymandering occurred for the unconstitutional purpose of preventing the mixing of races. I am unable to find from the evidence a sufficient showing of the unconstitutional purpose with respect to any school zone . . . *Swann v. Charlotte-Mecklenburg Board of Education,* 242 F. Supp. 667 (1965).

The holding of the district court was affirmed by the Court of Appeals for the Fourth Circuit in *Swann v. Charlotte-Mecklenburg Board of Education,* 369 F.2d 29 (1966).

Following the Supreme Court decision in *Green v. New Kent County,* 391 U.S. 430 (1968), and companion cases, the petitioners filed a motion for further relief alleging discrimination in teacher salaries, school plants, facilities and numerous other areas, and in addition sought further desegregation. During the course of the hearings conducted in March 1969, the district court noted that it was familiar with the fact that in this system black teachers as a group were paid higher salaries than white teachers for the reason that they had longer tenure and had more graduate education (93a).

In its order of April 23, 1969, the district court found there was no racial discrimination or inequality with reference to the use of federal funds for special aid to the disadvantaged, use of mobile classrooms, the quality of school buildings and equipment, coaching of athletics, parent-teacher association contributions and activities, school fees, school lunches, library books, elective courses, individual evaluation of students and gerrymandering (293a-302a).

The district court further noted that school location in Charlotte had followed residential development including its *de facto* patterns of segregation (305a).

With respect to the motives and judgment of the School Board, the district court found that the schools had been operating pursuant to ". . . the general understanding of 1965 about the law regarding desegregation." The Board had "achieved a degree and volume of desegregation of schools apparently unsurpassed in these parts, and have exceeded the performance of any school board whose actions have been reviewed in the appellate court decisions." The schools served by this system were "in many respects models for others", and "the rules of the game have changed and the methods and philosophies which in good faith the Board have followed are no longer adequate to complete the job which the courts now say must be done 'now'." (311a-312a).

The court then concluded:

> The school board has an affirmative duty to promote faculty desegregation and desegregation of pupils and to *deal* with the program of the all-black schools (313a). (Emphasis added)

Thereupon, the district court directed the Board to submit a plan for complete desegregation of teachers to be effective for the 1969-70 school year and to submit a plan and time table for the desegregation of pupils to be predominantly effective in the fall of 1969 and completed by the fall of 1970 (314a-315a). The plan submitted pursuant to the order of April 23 was found inadequate by the district court and submission of a new plan by August 4 was directed.

During the interim, this Court decided the case of *United States v. Montgomery*, 395 U.S. 225 (1969), which for the first time indicated limited racial ratios in faculty could be required by the courts.[1] In accordance with *Montgomery*,

[1] *In Montgomery, supra*, page 236, the court noted: ". . . Petitioners on the other hand, do not argue for precisely equal ratios in every school under all circumstances . . . . As the United States, Petitioner in

supra, the Board of Education proposed a plan for desegregation which would produce substantial faculty[2] and student desegregation for the school year 1969-70 and proposed a comprehensive computer-assisted study for the purpose of restructuring attendance lines for the year 1970-71. It was estimated that the study would require approximately six months to complete (487a). On August 15, 1969, the district court entered an order (579a) in which it noted the repudiation by the Fourth Circuit of the *Briggs v. Elliott* dictum on July 11 in *Hawthorne v. Lunenburg*, 413 F.2d 53 (4th Cir. 1969) (581a). The trial judge found that the Board had acknowledged its affirmative duty to desegregate pupils, teachers, principals, and staff members at the earliest possible date (583a) and had dramatically exceeded its goal in desegregating former all black faculties (584a). It approved the reassignment of consenting inner-city black students to outlying white schools for the school year 1969-70.[3] Further,

---

No. 798, recognizes in its brief, the district court's order is designed as a *remedy* for past racial assignment . . . . We do not, in other words, argue here that racially balanced faculties are constitutionally or legally required."

[2]The Board reported: "With reference to faculty desegregation, substantial changes have been made as indicated on Exhibit "A" (498a-502a). With few exceptions, schools having black or nearly all black students have white faculties ranging from 40 to 50 percent of the faculty of such schools. By the school term 1970-71, further faculty desegregation will be experienced." (495a).

[3]The Board proposed offering transportation to the reassigned black students and made extensive efforts to secure their acceptance of reassignment. The court stated:

> However, this part of the plan is not compulsory. Students who want to remain in the comfort of their area may elect to attend the Zebulon Vance School (Irwin Avenue) instead; alternatives also are provided for the junior high students. (587a).

In response to objections to reassignment of blacks, the district court stated:

> No legal authority is cited that the Constitution prohibits transportation of *consenting* black children from an inferior educational environment into a better environment for the

the court approved in principle the proposed restructuring of attendance lines and other factors for the 1970-71 school year, but rejected them for lack of specific detail and time table.[4] Results of the desegregation of faculties commended by the district court appears in the record (642a-649a).

In view of the fact that it was impossible to complete the computer restructuring of attendance lines within the time limited, motion was made for additional time in which to present the plan. The district court responded by presenting interrogatories to the Board and issuing its last benign statement on behalf of the Board as follows:

> Nearly six months after the original order, faculty desegregation is well along and there have been a number of substantial improvements in the stated policies of the Board, including the stated assumption of the duty by the Board to desegregate the schools "at the earliest possible date." Limited steps

---

purpose of complying with the constitutional requirement of equal protection of laws. (589a). (Emphasis added.)

The Board pointed out that it could not specify the number of students who might object to such assignments (493a).

Nevertheless, later the district court unjustly condemned the Board for not carrying out the plan as "advertised." (658a). "The performance gap is wide." (659a).

At the request of black community leaders, the Board proposed and secured a modification to permit substitution of Irwin Avenue Junior High School for the Zeb Vance school for black students exercising freedom of choice to attend a black elementary school in the inner city. The district court denied the Board the opportunity of upgrading the education for these black students by imposing restrictions on innovative programs for such students unless provided for all blacks who transfer to white schools (593a). The Board was forced to abandon innovative programs for these blacks as such programs require full student participation or segregation of black students in the white schools.

[4]The Board proposed completing the computer restructuring of attendance lines within six months or February 1, 1970 (487a). Furthermore, implementation was directed for the school year beginning 1970-71. (457a and 315a).

> have been taken toward compliance with pupil desegregation provisions of the original order . . . (601a).

Pending application for an extension of time, this Court announced its decision in *Alexander v. Holmes County*, 369 U.S. 19 (1969), and the district court held that as a result of *Alexander*, discretion to grant an extension was prohibited (667a). The district court in its November 7, 1969, order then proceeded to severely criticize the Board for not implementing its 1969-70 desegregation plan. The district court stated "the plan has not been carried out as advertised" (658a) and "the 'performance gap' is wide" (659a). It is difficult to reconcile this criticism in the face of the district court's previous defense of the right of the Board to transport consenting black students to outlying schools and in view of faculty desegregation that resulted in precisely the figures estimated by the Board (589a and 584a). The district court reversed its earlier finding ". . . Location of schools in Charlotte has followed the local pattern of residential development, including its *de facto* patterns of segregation" (305a) and substituted ". . . There is so much state action imbeded in the shaping of these events that the resulting segregation is not innocent or *'de facto'*, and the resulting schools are not 'unitary' or desegregated." The district court further found that freedom of choice had tended to perpetuate segregation by allowing children to leave schools where their race would be a minority (662a).[5] The district court noted that the school system ranked high with reference to desegregation in comparison with the 100 largest school systems, but held this to be immaterial (664a).

---

[5]The evidence clearly shows that only 1,200 white students had left predominately black schools (665a) (housing a total of 16,000 blacks). This would therefore appear to fall under the *de minimus* rule. Compare the limited number of students who sought freedom of choice and the infinitesimal effect it had on desegregation for the school year 1969-70 (635a-638a).

For reasons not understood, the attitude of the district court changed with increasing frequency to condemnation or misconstruction of whatever the Board proposed. It assumed that the Board's computer program, designed to promote stability by a 40% limitation on black student assignments, precluded white students from attending predominately black schools. Obviously, if the computer designed a school on a 50/50 ratio, the whites would soon leave the attendance district. The Board has no intention of devising attendance districts which would offer such instability. However, after the best efforts of the computer had been exhausted, those white students residing in the ultimate attendance zones populated predominately by blacks, would nevertheless be assigned to those schools. The district court simply misconstrued one step of the Board plan as constituting the final plan.

In fairness to the district court and the petitioners, the Board on October 19, 1969, gave advance notice that its plan would be unable to eliminate each all-black school (665a).[6] The district court, continuing its castigation of the Board, said the Board had "demonstrated a yawning gap between predictions and performance." (666a). The court thereupon directed the filing of a plan for desegregation ten days later on November 17, notwithstanding the fact that the Board had reaffirmed February 1, 1970, as the earliest date for presentation of a comprehensive plan.

Therefore, faced with this unrealistic time table, the Board was compelled to present an admittedly incomplete plan for desegregation (670a) and report (680a) in which the Board took a strong position for the purpose of attempting to determine the meaning of a "unitary system" and related terms. Attention is directed to the fact that the Board predictions with reference to desegregation of elementary schools was substantially accurate as disclosed by the following:

---

[6]At this point, the Board had been admonished to "deal with the problem of the all black schools" (313a).

Percentage Black Students	Projected No. of Schools Nov. 17, 1969	Board Final Plan, No. of Schools Feb. 2, 1970
0-10%	21	20
11-40%	44	43
41-100%	7	9

It would therefore appear that the Board performed as "advertised". There was no wide "performance gap" and there was no "yawning gap between predictions and performances." The court was further advised in August that the Board plan would be complete approximately the first of February 1970, and the Board performed (726a).

On December 1, 1969, the district court again misconstrued the computer instructions as being the results of a finalized plan. Although the Board proposed that each faculty would be predominately white at each school, the court seemed to take offense at the fact that there was no promise of total balance (700a). Compare *Montgomery, supra,* which countenances schools having 83% black faculties.

In response to the inquiries of the Board, the district court outlined some of the parameters of its notions of a desegregated system, which included pro rata distribution of teachers by race and that "all the black and predominately black schools in the system are illegally segregated" (711a and 714a). The district court further held that any plan should seek to reach a 71-29 ratio so that one school would not be racially different from the others though variations may be unavoidable (710a). It is believed that the absolutes of the district court's legal position began to crystalize with the order of November 7, 1969.[7] This has resulted in the

[7]In the order of November 7, 1969, and all subsequent orders, namely, December 1, 1969, February 5, 1970, March 21, 1970 and August 3, 1970, resulted in reversal of facts previously found in favor of the Board and many inferences resolved against the Board together with misconstruction of many of the facts presented to the court. The Board attempted to correct many of the findings by Objections and Exceptions thereto (1239a) and Objections and Exceptions to Findings of Fact dated August 14, 1970.

failure of the court to make any subsequent findings favorable to the Board.

The district court then disapproved the Board's plan for further desegregation and directed desegregation of faculties on a three-to-one ratio effective not later than September 1, 1970, and indicated that a court consultant would be appointed. This was accomplished by order of the court dated December 2, 1969, wherein the court appointed Dr. John Finger as the court's consultant, a witness who had previously testified on two occasions for the plaintiffs and had offered earlier desegregation plans. The order of December 1 did not suggest implementation of pupil desegregation would be advanced to a date earlier than September 1, 1970. The Board was invited to continue working on its plan (714a-716a).

The Board submitted its completed plan on February 2, 1970 (726a). The plan utilized computers to achieve a maximum racial mix of 71% white and 29% black in each school where possible by restructuring attendance lines. One hundred (100) of the 103 schools would have a racial mix, leaving only three all-white schools. Sixty-eight per cent (68%) of the black students would attend schools having less than 40% black population. Thirty-two per cent (32%) of the black students would attend nine elementary and one junior high schools which would have black ratios of 83% to 99% under the Board plan (R. Br. A-4-6, A-10). This plan reduced the number of blacks in predominately black schools from 16,197 to 7,497 and the number of predominately black schools from 22 to 10.

The plan for desegregation submitted by the Board included imposition of faculty ratios of approximately three-to-one, white predominating, in each school and proposed implementation of its plan for the school year 1970-71 in accordance with the various court orders. The Board plan would require the in-district transportation of approximately 5,000 additional students, who would qualify for such transportation under state law.

The court consultant's plan was submitted contemporaneously with that of the Board on February 2, 1970, which effectively adopted in many respects the Board's geographic zoning plan and engrafted upon it the features of pairing of distant elementary schools and creation of satellite districts in predominately black inner-city areas whose students were assigned to distant predominately white outlying secondary schools.

On February 2, 1970, the court conducted a hearing limited solely to the question of time required for implementation. It refused to hear any evidence with reference to the merits of the two plans before the court. On February 4, 1970, the Board made a motion for hearing on its plan and for the opportunity to examine the court consultant, who resides in Rhode Island and beyond the process available to the Board. In response thereto, the court permitted a short hearing severely limited as to time on the following day and declined to direct the consultant to be present for examination. The Board was compelled to submit substantial evidence nunc pro tunc (848a-900a).

On the same day, February 5, 1970, the court entered its order, in which the court found in part as follows:

> The Board plan, prepared by the school staff, relies almost entirely on geographic attendance zones, and is tailored to the Board's limiting specifications. It leaves many schools segregated. The Finger plan incorporates most of those parts of the Board plan which achieve desegregation in particular districts by rezoning; however, the Finger plan goes further and produces desegregation in all the schools in the system.
>
> Taken together, the plans provide adequate supplements to a final desegregation order (819a).

Although the court stated "the order which follows is not based on any requirement of 'racial balance' . . ." (821a), the court then adopted the entire plan of the court consultant and thereby directed racial balancing with reference to the various schools:

A. The Board's pupil assignment plan for senior high schools was approved[8] upon condition that 300 black students residing in four grids suggested by the court consultant would attend Independence High School. Therefore, the court consultant's sole recommendation with reference to high schools was approved, although no school under the Board plan would house more than a 36% black ratio.

B. With respect to junior high schools, the Board plan was approved[9] upon condition that the only junior high school out of 21 which would remain predominately black would be desegregated by giving the Board a "Hobson's choice" of furnishing transportation and increasing blacks in attendance at several outlying schools and in default of rezoning (which had been fully explored), two-way transportation of students (which is cross bussing to which the Board is opposed) or closing the junior high school (whose classrooms are desperately needed to minimize the already serious overcrowding which exists at the junior high level). None of the alternatives were accepted. Therefore, the Board was directed to implement the court consultant's plan, which provided for establishing nine satellite attendance districts (containing 2,760 students) in inner-city black areas for attendance at nine distant predominately white suburban schools.

C. With respect to elementary schools, the court adopted the court consultant's plan which utilized the Board's rezoning[10] and engrafted upon it the features of pairing and grouping nine inner-city black schools with 24 suburban white

---

[8]The Board plan for senior high schools eliminated the one all black senior high school, West Charlotte, and established black ratios of 17% to 36% for nine of the ten schools. The remaining school, Independence, would house a 2% black ratio. (748a).

[9]The Board plan for junior high schools eliminated four of the five predominately black schools and the remaining school, Piedmont, would have a 90% black ratio or 758 black students (747a).

[10]The Board plan reduced the number of predominately black elementary schools from 17 to 9 (744a-746a).

schools, thereby necessitating extensive cross-bussing.[11] Approximately 10,300 students would be involved in the elementary cross assignments.

The Board plan contemplated transporting only those students eligible for transportation under state law which would result in furnishing additional transportation to approximately 5,000 students (871a-875a). The order of desegregation imposed substantial additional transportation requirements upon the school system (880a-884a) which were compiled by the transportation office of the school system as follows:

Finger Plan

Additional Students	No. of Buses	First Year Cost
23,000	526	$4,199,439.00

Board Plan

Additional Students	No. of Buses	First Year Cost
4,935	104	$ 864,767.00

Supplementary findings of the court dated March 21, 1970, (1217a-1219a) reflect a finding that transportation as ordered by the court would show the following totals:

Court Estimates

Additional Students	No. of Buses	First Year Cost
13,300	138	$1,011,200.00[12]

[11]The Board transportation office estimated these students would travel fifteen miles each way per day (860a). The district court estimated the school to school distance at seven miles (1261a).

[12]The district court found that the cost of 138 buses would be $743,200.00. The annual operating cost of $532,000.00 was reduced by one-half in its order of April 3, 1970 (1259a), resulting in a total of $1,011,200. The district court amended its February 5 order by order dated March 3, 1970 (921a) to provide that transportation should be offered only to those city students who lived in an area which had been rezoned as a result of the court order. The Board accordingly submitted revised estimates which reduced the requirements for addi-

Extensive objections and exceptions (1239a) were filed by the Board with reference to the findings of the district court dated March 21, 1970, and the Court of Appeals noted that it was difficult to furnish reliable predictions with respect to transportation estimates (1271a).

On appeal, the Court of Appeals approved the provisions of the order of the district court with reference to assignment of faculty and assignment of students to secondary schools and reversed and remanded for further consideration the assignment of pupils attending elementary schools (1262a). In doing so the Court of Appeals noted that the voluntary faculty desegregation of the Board was in compliance with other orders of that court (1263a). The finding of the district court with reference to residential patterns leading to segregation resulting from federal, state and local government action was affirmed on "familiar principles of appellate review."[13]

---

tional transportation to 19,285 students and 422 buses at a first year cost of $3,406,687.00. Thereafter, State Board of Education, pursuant to *Sparrow v. Gill*, 304 F. Supp. 86 (MDNC 1969) authorized transportation of all city students residing a mile and a half from their school. Accordingly, this reinstated the original estimates of the local transportation staff.

[13]In view of the importance of other issues in this case, the Board does not deem it appropriate to fully controvert the very shallow and incompetent evidence upon which the district court's findings were made on November 7 reversing its prior findings without benefit of further evidence or hearing. We would point out several areas. With respect to racial restrictive covenants, the only evidence was a 1946 North Carolina Supreme Court case enforcing such restrictions. Other evidence of racial restrictions or the extent thereof is absent from the record. Blacks have for many years purchased homes in predominately white neighborhoods. Plaintiffs' evidence (31a-34a) discloses that relatively small black areas have taken over large white communities. As a result, blacks predominated in 11 former all white schools (591a). Although older black and white neighborhoods were zoned industrial in 1947, no substantial inroads were made in these neighborhoods by industry (254a), industrial zoning in residential areas was substantially curtailed (254a) and existing zoning generally follows existing land use (261a). Urban redevelopment assisted the displaced persons in finding

The reforms the Board undertook to create a unitary school system were applauded by the Court of Appeals (1265a). Noting the district court's holding "that the Board must integrate the student body of every school" (1266a) the Court of Appeals gave a partial answer to the unitary school question in holding:

> . . . first, that not every school in a unitary system need be integrated; second, nevertheless, school boards must use all reasonable means to integrate the schools in their jurisdiction; and third, if black residential areas are so large that not all schools can be integrated by using reasonable means, the school boards must take further steps to assure that pupils are not excluded from integrated schools on the basis of race . . . (1267a).

The Court of Appeals thereupon adopted ". . . the test of reasonableness–instead of one that calls for absolutes–because it has proved to be a reliable guide in other areas of the law . . ." (1267a).

Although Piedmont Junior High School was a formerly all white facility, and nearly all white in 1965 (25 blacks) (691a), the Court of Appeals noted that this school was now in the heart of the black residential area (1268a), a school which could not be desegregated by rezoning. This school precipitated the creation of nine satellite junior high school districts for the purpose of eliminating this one predominately black junior high school.

---

new homes but had no power to direct the location to which they moved (265a). Furthermore, there is no evidence that any citizen was so directed. Many other examples could be cited.

It is noted the findings of the district court, although largely unsupported, closely parallel those of the U.S. Commission on Civil Rights with respect to separation of races in 75 representative cities scattered throughout this nation. *Racial Isolation in the Public Schools–Summary Report by the Commission on Civil Rights (1967).*

The Court of Appeals, utilizing the district court's unrealistic transportation estimates, found its approval of the secondary portion of the desegregation plan precluded approval of the elementary plan. The combined plans would represent a 56% increase in pupils transported and the number of buses would be increased by 49%. The Circuit Court acknowledged that the Board ". . . should not be required to undertake such extensive additional busing to discharge its obligation to create a unitary school system." (1276a).

The Court of Appeals thereupon vacated the judgment of the district court and remanded ". . . the case for reconsideration of the assignment of pupils in the elementary schools, and for adjustments, if any, that this may require in plans for the junior and senior high schools." (1277a).

On remand, the district court had before it five elementary, two junior and two senior high school plans. An understanding of these plans will be facilitated by reviewing the separate map appendix to this brief.

Pursuant to the suggestion of the Court of Appeals, the Board met with representatives of HEW and sought to participate in the development of a new desegregation plan. Although the Department of Health, Education and Welfare obtained from the Board all the information it desired, it refused to accept the Board offers to assist it in developing a plan (Tr. 197, July 15, 1970). Nevertheless, the Board reconsidered all the techniques of desegregation in an effort to develop a new plan (Tr. 10-20, July 15, 1970). After presentation of the HEW plan on June 26, it was reviewed by the Board and rejected by a unanimous vote. Nevertheless, the Board presented the HEW plan to the district court for its consideration.

A hearing was convened on July 15, 1970, at which time the district court again reviewed the February 2, 1970 Board plan and the February 5, 1970 court approved Finger plan. The district judge also considered the HEW plan, a plan prepared by minority of Board members, and an earlier draft of a plan considered by the court consultant.

The Board and court approved plans have been described earlier herein.

The HEW plan's salient features involved utilization of the Board restructured lines and then clustering a group of school districts contiguous to each other for specialized grade assignment to a particular school, for instance, one school might house grades 1 and 2, a second school grade 3, etc. Many of the districts involved in these clusters were desegregated by the Board's rezoning.[14]

A four-member minority of the Board presented an elementary plan which utilized the 1969-70 school zones, grouped 72 elementary schools within eighteen separate clusters, many of which were far removed from each other. The court's attention is invited to the map (R. Map Appendix), which gives a clear picture of what this plan does to the elementary schools of the Charlotte-Mecklenburg system. It was an obvious successful attempt at racial balancing, as all 72 elementary schools would house black ratios ranging from 27% to 34%. Students chosen for attendance outside their district would be selected on a lottery basis. (R. Ex. 45, July 15, 1970). Dislocations and transportation requirements were essentially equivalent to those of the court ordered Finger plan (Order, August 3, 1970).

Petitioners, calling Dr. Finger as their witness, had him unveil a draft of a preliminary plan previously prepared by him. Basically, the plan was Dr. Finger's attempt to restructure attendance zones. Finding his rezoning attempts left

---

[14]Cluster or zone number IV of the HEW plan grouped all white Pinewood, nearly all black Marie Davis with Sedgefield (38% black) and Collinswood (33% black). This plan was roundly condemned for the reason that an elementary student in such a zone would attend four elementary schools in six years and it interfered with the educational programs and organizations of the school system. It also involved substantial transportation and utilized many schools that already had the approximate racial ratio of the entire system. Most of the groupings were near-black or predominately black (R. Ex. 1 and 2, July 15, 1970).

approximately 6,800 black elementary school children in inner-city black schools (Tr. 264, July 15, 1970), he then developed walk-in attendance zones for black students at those schools who would comprise approximately 30% of the capacity of the school. The blacks would attend these schools for six years. Whites residing generally in the inner perimeter of the city limits would be transported to such schools. Blacks who were not assigned to the inner city schools would be transported for six years to suburban white schools. The grade structure of the suburban schools was rearranged on a 3-3 basis with grades 1 - 3 in one school and a school in a contiguous area would have grades 4 - 6. Students in the contiguous zones would attend these two schools along with blacks from the inner city schools. Dr. Finger admitted the plan was incomplete (Tr. 263, July 15, 1970) and contains a complex grade structure (Tr. 258, July 15, 1970). The enormous amount of dislocation and transportation is apparent. As the district court found:

> 26. All plans which desegregate all the schools will require transporting approximately the same number of children. In overall cost, if a zone pupil assignment method is adopted, the minority Board plan may be a little cheaper than the Finger plan. (Order, August 3, 1970).

The district court characterized three of the plans as "reasonable": the court ordered (Finger) plan, the minority board plan and the earlier draft of a Finger plan. The Board was given the "option" of adopting any one of these plans for the elementary schools. The Board met and found the three alternate plans to be unreasonable and the court ordered (Finger) plan was thereupon imposed by order of August 7, 1970.

The Board filed notice of appeal to the Court of Appeals for the Fourth Circuit on August 14, 1970, and has made application to this Court for permission to supplement the record or, in the alternative, that the motion be considered as a writ of certiorari to the Court of Appeals for the Fourth Circuit pursuant to Rule 20 of the Rules of the Supreme Court. No action has been taken thereon at this writing.

SUMMARY OF ARGUMENT

Both the district court and the Fourth Circuit have misapplied the Constitutional imperatives of *Brown I, Brown II* and *Green* as they apply to the Charlotte-Mecklenburg schools. In doing so, both of these Courts erred in disapproving the Board plan and imposing upon this System requirements that are unlawful and unwarranted by the facts in this case.

The basic error stems from the misconception of the rights guaranteed black and white children by the Fourteenth Amendment and the goal to be achieved by a dismantling of a dual system and the establishment of a unitary one. Although disclaiming any intent to require racial balancing, the orders imposed upon the Charlotte-Mecklenburg System are based upon the proposition that student assignments at each school must be fashioned in a manner which will achieve or approximate the 70% white - 30% black racial ratio of the system at large. This false premise in turn is founded on the erroneous notion that each black or white child has an individual guaranteed right to attend a school having the prescribed racial mix. Any fair interpretation of the orders of the trial judge point unerringly to the conclusion that he deemed that presumed right to be an absolute one that cannot be diluted or denied by reason of circumstances, costs, disruptions or educational or administrative considerations. Tacitly, the Circuit Court also espoused racial balancing as its goal—but sought unsuccessfully to temper the absolutism of the district court with a test of reasonableness, to which on remand the trial judge gave only thinly veiled lip service. The Board is in general agreement with the employment of a Rule of Reason in appraising desegregation plans. But in this case, the Fourth Circuit misapplied its own Rule of Reason and in effect the district court ignored it. Racial balancing is not required by the Constitution and when imposed by a court violates the prohibitions of the Civil Rights Act of 1964.

Contrary to these erroneous views, the pronouncements of this Court make it clear that the guaranteed right of a child is to attend a school *system* within which discrimination originating from the old state-imposed dualty has been eliminated. If such discrimination has been eradicated and if schools are fairly operated and administered on a nonracial basis, a dual system has been dismantled and a unitary one has been established within which no child is excluded because of his race or color. Nondiscriminatory geographic attendance zones, including those promoting the neighborhood school concept, establish a unitary system—notwithstanding a residue of predominately black schools that remain for reasons totally unrelated to race.

A corollary to the requirement of racial balancing is the burden of massive bussing and dislocation of children to achieve the goal of 70% white–30% black ratio in the schools of the Charlotte-Mecklenburg System. This balancing and the bussing to implement it impinges upon the Constitutional rights of children, both black and white, who may not wish to be assigned and moved out of their neighborhood attendance zones for the sole purpose of promoting the presumed rights of other children.

The February 2, 1970, Board plan is based on geographic attendance zones that were drastically gerrymandered to promote desegregation. This plan severely strains, but maintains the basic benefits of the neighborhood school concept. By this technique, the Board satisfactorily desegregated all but 10 of its 103 schools. *All* but a small handfull of the black children who remain in these 10 schools will have a desegregated school experience for at least one-half of their 12 years of schooling. The Board itself sought to achieve in as many schools as possible a maximum racial mix. By doing so, the Board proposal exceeds Constitutional imperatives. The compulsion of court orders cannot be employed to coerce a school system to do what the Constitution does not require.

The Board plan is reinforced by majority to minority transfers to promote stable desegregation, prevent resegregation and afford blacks that remain in the 10 predominately black schools an opportunity to attend a predominately white school with free transportation to accomplish the move. The teachers at each school are assigned on a ratio of 3 to 1 which is the ratio of white to black teachers in the system. The staff, extra-curricular activities, transportation, facilities, programs and other facets of the system are nondiscriminatory and thoroughly desegregated, and are employed to promote integration throughout the system.

The Board plan effectively establishes a unitary system. Both the district court and the Fourth Circuit erred in disapproving that plan and supplanting it with one or more alternatives designed to racially balance each school, with the consequent bussing and movement of children that the Board considered unnecessary, impractical, costly, disruptive, educationally unsound and not required by the Constitution.

ARGUMENT

I. GENERAL DISCUSSION OF CONSTITUTIONAL PROBLEMS AND CONCEPTS.

A. A CHILD'S CONSTITUTIONAL RIGHT GUARANTEED BY THE FOURTEENTH AMENDMENT IS TO GO TO SCHOOL IN A UNITARY SYSTEM. IF THE SCHOOL IS PART OF SUCH A SYSTEM, HE HAS BEEN ACCORDED THAT RIGHT.

It is unarguable that the negro and white children in the Charlotte-Mecklenburg system must be and will be accorded their Constitutional rights in full measure. However, the district court's misconception of the nature of those rights is succinctly stated in its August 3, 1970, Order (Pets' Br. Al):

> The issue is not the validity of a "system", but the rights of individual people.

Of course, the Constitutional rights of a black or white child under the Fourteenth Amendment are individual and per-

sonal, but the question remains: What is the essence of that right–the right to do what? The trial judge concludes that the right is an absolute one of each child to be in a desegregated school and presumably in a desegregated classroom within the school–regardless of the rights of white children, circumstances, problems peculiar to urban areas, costs, disruptions, educational considerations and other factors which prevent a color blind school system from achieving the ideal racial mix in every one of its schools.

This view does not comport with the previous declarations of this Court. Briefly stated, it is our understanding that this Court has defined the right guaranteed a negro or white child by the Fourteenth Amendment as being the right to attend a school in a *system* where no state-imposed discrimination exists and has prescribed the attendant affirmative duty of a school board to establish such a *system*. This right and duty are summarized in *Green v. New Kent County*, 391 U.S. 430 (1968):

> [I]t was such dual *systems* that 14 years ago *Brown I* held unconstitutional and a year later *Brown II* held must be abolished; school boards operating such school systems were required by *Brown II* "to effectuate a transition to a racially nondiscriminatory school *system*" . . . *Id.* at 435. (Emphasis added)
>
> . . . *Brown II* commanded the abolition of such dual *systems* . . . *Id.* at 437. (Emphasis added)
>
> School boards such as the respondent then operating State-compelled dual systems were nevertheless clearly charged with the affirmative duty . . . to convert to a *unitary system* in which racial discrimination would be eliminated root and branch . . . The constitutional rights of Negro school children articulated in *Brown I* permit no less than this . . . *Id.* at 437-38 (Emphasis added)

The thrust of *Brown v. Board of Education*, 347 U.S. 483 (1954) and *Brown v. Board of Education*, 349 U.S. 294 (1955) and all that this Court has said since those landmark decisions point unerringly to the validity of this proposition:

State-imposed dual *systems* must be abolished and must be replaced with unitary *systems.* The Constitution does not guarantee to a child the right to attend a school having any particular racial complexion. The Fourteenth Amendment secures for him only the privilege to attend a school that is part of a unitary *system* which is comprised of "just schools" (*Green, supra,* at 442)–schools that are operated and administered without any vestige of discrimination. Once a conversion or transformation to a unitary nondiscriminatory *system* has been accomplished, every child in that *system* has been accorded his rights. Those who contend for a particular racial mix or balance in each school propose a perversion of the commands of *Brown I* and *II* and *Green.*

It is by these standards that the plan of the School Board in this case must be judged. An analysis of that plan clearly demonstrates that it realistically will achieve the nondiscriminatory unitary system the Constitution requires. The oppressive plan of the district court does not conform with these standards. In spite of disclaimers, its objective is the racial balancing of each one of the schools of the Charlotte-Mecklenburg system.

B. A UNITARY SYSTEM IS ONE WITHIN WHICH NO CHILD IS EXCLUDED FROM ANY SCHOOL BECAUSE OF RACE. IF A DESEGREGATION PLAN PROMISES REALISTICALLY TO ACCOMPLISH THIS, IT IS CONSTITUTIONALLY ACCEPTABLE NOTWITHSTANDING A RESIDUE OF PREDOMINATELY BLACK OR WHITE SCHOOLS THAT REMAIN FOR REASONS UNRELATED TO RACE.

The now familiar definition of a unitary system is one "within which no person is to be effectively excluded from any school because of race or color." *Alexander v. Holmes,* 396 U.S. 19 (1969); *Northcross v. Board of Education* (Burger, Chief Justice, concurring opinion) 397 U.S. 232 (1970). Unhappily for school boards charged with the responsibility of fashioning a unitary system, this definition only begins,

not ends, inquiry regarding the necessary ingredients and characteristics of a unitary system.

This Court is well aware of the diversity and change of opinion both among and within courts that have been wrestling with the scope and meaning of this definition. This ought not to be. We hope this Court will find an opportunity in this case to put some meat on the bare bones of this definition which will give instruction and guidance to school boards and will help dispel the disparity that presently characterizes the findings of fact, conclusions and opinions of the lower courts.

Brown I and *II*, the *Green* triad and *Alexander v. Holmes* are of some help—but not much for practical application "in the field." From these cases, we understand a unitary system to have at least these attributes: It is "nonracial." It is "racially nondiscriminatory." It is what is left after a "well-entrenched dual system" has been "dismantled." It is one in which "racial discrimination" is "eliminated root and branch." It is one within which no child is "effectively excluded because of race or color." Running through all of these criteria is one common theme: If a system is established that does not discriminate against the race of a child and thereafter operates on a color blind basis, a former dual system has been transformed, converted and, we presume, purged.

It is worth noting that the 2-school rural residentially mixed New Kent County involved in *Green* typifies the systems stricken down by *Brown I* and *II*, a fact which is specially commented upon at page 435:

> The pattern of separate "white" and "Negro" schools in the New Kent County school system established under the compulsion of state laws is precisely the pattern of segregation to which *Brown I* and *Brown II* were particularly addressed, and which *Brown I* declared unconstitutionally denied Negro school children equal protection of the laws. Racial identification of the system's schools was complete, extending not just to the composition of student bodies at the two

> schools but to every facet of school operations–faculty, staff, transportation, extracurricular activities and facilities. In short, the State, acting through the local school board and school officials, organized and operated a dual system, part "white" and part "negro."
>
> It was such dual systems that 14 years ago *Brown I* held unconstitutional and a year later *Brown II* held must be abolished; school boards operating such school systems were required by *Brown II* "to effectuate a transition to a racially nondiscriminatory school system." 349 U.S. at 301, 75 S.Ct. at 756.

The *Green* triology formed the primary vehicle for the last detailed pronouncements of this Court concerning some of the characteristics of a dual and non-dual system. The factual context within which the teachings of *Green* were made presents considerable difficulties when these guides are applied to a complex urban system like Charlotte-Mecklenburg–particularly when that system has long since abandoned the discriminatory practices that were so flagrantly involved in New Kent County.

In identifying a unitary system, the *Alexander v. Holmes* definition embodies two basic aspects: (1) effective exclusion and (2) the reason for exclusion–i.e. because of race.

The word "exclude" means to shut out. It implies keeping out hwat is already outside. That a person remains outside does not necessarily mean that he is excluded. The idea of shutting out suggests affirmative action on the part of someone to accomplish the exclusion. If a person outside is afforded an opportunity to come inside, he is not barred or excluded. This opportunity must be a reasonable one. If the opportunity accorded a person is unreasonable, he may be said to be effectively excluded.

The *Holmes* definition does not prohibit all exclusion–only invidious ones based on race or color. There are any number of reasons why a child can fairly be required to attend one school instead of another: capacity, distance,

cost, disruptions, location of residence, age, travel, safety, administrative problems, educational considerations and a host of other factors that have absolutely nothing to do with his race or color.

If, in the operation of a school system, these factors are honestly, realistically and reasonably applied without the slightest degree of racial discrimination, the system is nonetheless unitary even though by reason of these factors some black children remain in predominately black schools.

The Fourth Circuit correctly comes to this conclusion in the Charlotte-Mecklenburg case (1267a):

> . . . [W]e hold: First, not every school in a unitary system need be integrated . . .
>
> . . . [I]f a school board makes every reasonable effort to integrate the pupils under its control, an intractable remnant of segregation, we believe, should not void an otherwise exemplary plan for the creation of a unitary system. *Ellis v. Board of Public Instruction of Orange County*, 423 F.2d 203 (5th Cir. 1970).

This view agrees with the trend of lower court decisions which may be summarized as follows: The maintenance of some all-black or all-white schools in a given school system will not automatically invalidate a desegregation plan nor will it automatically indicate a shirking of responsibility by school board officials so long as the segregation is the result of housing patterns and means are made available whereby black children in the all-black areas may transfer to predominately white schools. The operation and maintenance of a particular school building, attended only by negro or white children, is not *per se* unconstitutional. *United States v. Greenwood Municipal Separate School District*, 406 F.2d 1085, 1093 (5th Cir. 1969), *Ellis v. Board of Public Instruction of Orange County*, 423 F.2d 203 (5th Cir. 1970), *Goss v. Board of Education, City of Knoxville, Tennessee*, 406 F.2d 1183 (6th Cir. 1969), *Deal v. Cincinnati Board of Education*, 419 F.2d, 1387 (6th Cir. 1969).

The trial judge who heard the Charlotte-Mecklenburg case is out of step with this trend and obviously disagreed with the opinion of the Court of Appeals for the Fourth Circuit. On February 5, 1970, the trial judge ordered (822a); "That no school be operated with an all-black or predominantly black student body." The district court did not retreat from this position in its August 3, 1970, Order (Pets.' Br. A1) issued after the conclusion of hearings held pursuant to the Circuit Court directives. This misconception of what the Constitution requires lies at the heart of the unlawful orders of the district court and the unwarranted findings of fact which the trial judge used to support his erroneous conclusions.

C. A "RULE OF REASON" RATHER THAN A "RULE OF ABSOLUTES" SHOULD BE THE STANDARD BY WHICH TO JUDGE THE SUFFICIENCY OF A DESEGREGATION PLAN.

We approve the test of reasonableness adopted by the Court of Appeals–instead of one that calls for absolutes (1267a-1268a):

> We adopted the test of reasonableness–instead of one that calls for absolutes–because it has proved to be a reliable guide in other areas of the law. Furthermore, the standard of reason provides a test for unitary school systems that can be used in both rural and metropolitan districts. All schools in towns, small cities, and rural areas generally can be integrated by pairing, zoning, clustering or consolidating schools and transporting pupils. Some cities, in contrast, have black ghettos so large that integration of every school is an improbable, if not an unattainable, goal. Nevertheless, if a school board makes every reasonable effort to integrate the pupils under its control, an intractable remnant of segregation, we believe, should not void an otherwise exemplary plan for the creation of a unitary school system. *Ellis v. Board of Public Instruc. of Orange County*, No. 29124, Feb. 17, 1970___ F.2d. ___ (5th Cir.)

Such a test is consistent with the equitable principles elucidated in *Brown II* which made it clear that desegregation plans and the means of implementing them should take into account a variety of local problems and conditions–including by implication those specifically itemized by the Court of Appeals (age of pupils, board resources, costs, effect of bussing on traffic and the distance and time for transportation).

In the name of common sense, what standards other than "reasonable" ones should be applied to test the efficacy of desegregation plans? In fashioning and effectuating decrees, *Brown II* directed that trial courts be guided by equitable principles. The very concept of equity presupposes the application of fairness, practicability and reason. Equity is employed where absolutes are inappropriate.

As stated in *Green, supra:*

> There is no universal answer to complex problems of desegregation; there is obviously no one plan that will do the job in every case. The matter must be assessed in the light of the circumstances present and the options available in each instance.[15] *Id.* at 439.

The August 3, 1970, Order of the district court (including its findings of fact) clearly shows that the trial judge gave only lip service to the test of reasonableness directed by the Court of Appeals. The recital of a few evidences of this lip service will suffice at this point: "The circuit court's reasonableness order is vague" (Pets.' Br. A7); "reservations" about the pertinence of a rule of reason are expressly acknowledged (Pets.' Br. A31); the size of a system is immaterial (Pets.' Br. A10); " 'Busing' is still an irrelevant issue" (Pets.' Br. A10); current long distance bussing of kindergarten children is cited as justification for bussing thousands

---

[15]With tongue-in-cheek solemnity, the district judge in *Ross v. Eckels, Houston Independent School District*, F. Supp. (S.D. Texas 1970), in commenting on the practical problem occasioned by Buffalo Bayou, proclaimed: "A child is not required to swim or fly to school."

of elementary youngsters (Pets.' Br. A16, A18); "There is no way to decide what remnant shall be determined intractable" (Pets.' Br. A18); "cost and inconvenience" are not pertinent considerations (Pets.' Br. A31).

In view of the reservations entertained by the district court about the pertinence of a Rule of Reason, it is not surprising that upon remand the trial judge concluded that his own prior orders were "reasonable"—notwithstanding the determination of the Fourth Circuit that the trial judge's earlier mandate regarding the elementary plan was unreasonable. This reaffirmation by the district court of its own prior conclusions evidences a subjectivity that does not square with either the directions of the Court of Appeals or with the equitable principles decreed by this Court.

It is incomprehensible that two dissenting members of the Court of Appeals (Judges Sobeloff and Winter) should find a "test of reason" so frightening. They find it undefined, subjective, ambiguous and pernicious (1288a, 1289a, 1290a, 1302a, 1303a). They say it threatens dire consequences of delay and exploitation. (1290a).

In his dissent Judge Sobeloff rejects what he calls (1291a) the "slippery test" of reasonableness because it implies that desegregation is not "worth the price" (1288a). This misconception is echoed by the plaintiffs' assertion (Br. 58) that the Circuit Court's reasonableness rule demonstrates a departure from the educational goal of desegregation laid down in *Brown I* and *II* and reinforced by *Green.*

This unwarranted conclusion misconstrues the goal sought to be achieved. *Green, supra,* succinctly defined that goal:

> [S]chool boards operating such school systems (i.e. dual systems) were *required* by *Brown II* "to effectuate a transition to a racially nondiscriminatory school system" . . . The transition to a unitary, nonracial system of public education was and is the ultimate end to be brought about . . . *Id.* at 435-36 (Emphasis by Court).

And at 437-38, school boards were charged with:

> [T]he affirmative duty to take whatever steps might be necessary to convert to a unitary system in which racial discrimination would be eliminated root and branch.

Regardless of the prior dualty of a school system previously operated under the authority of *Plessy v. Ferguson*, 163 U.S. 537 (1896) or otherwise, from these teachings it follows that if a current desegregation plan of a school board realigns its schools and its assignment policies in a fashion that effects a conversion to a nonracial, nondiscriminatory system, the commands of this Court have been obeyed. "Discrimination' is defined as "the act, practice, or an instance of discriminating categorically rather than individually." *Webster's Seventh New Collegiate Dictionary* (1967). Within the context of desegregation, if the operation and administration of a school system does not countenance such acts and practices on account of race, discrimination has been eliminated.

It is for the courts to appraise the plans proffered by a school board to determine whether the results achieved are genuinely founded on considerations that are completely disassociated from any degree of racial discrimination. When judged by the peculiarities of local problems, conditions and circumstances, the plan of the Charlotte-Mecklenburg School Board ought not to be supplanted by a court plan that comports with the subjective views of a trial judge that absolutes are required.

In his dissent in *United States v. Jefferson County Board of Education*, 380 F.2d 385 (5th Cir. 1967), Judge Gewin (Bell concurring) responded to the champions of absolutism:

> . . . No consideration is given to any distinction in any of the numerous school systems involved. Urban schools, rural ones, small schools, large ones, areas where racial imbalance is large or small, the relative number of Negro and white children in any particular area, or any of the other myriad problems which are known to every school administrator, are taken

into account. All things must yield to speed, uniformity percentages and proportional representation. There are no limitations and there are no excuses. This philosophy does not comport with the philosophy which has guided and been inherent in the segregation problem since Brown II. As the Court there stated:

> Because these cases arose under *different local conditions* and their disposition will involve a variety of *local problems*, we required further argument on the question of relief. (349 U.S. p. 298, 75 S.Ct. p. 755). *Id.* at 403.

In appraising the efficacy of desegregation plans, even courts espousing the Rule of Reason have been prone to place undue emphasis upon tangible factors such as numbers of buses and numbers of dollars–with very little direct consideration of the effect of such plans upon the educational processes of a particular system. After all, education is what *Brown I* and *II* professed to be all about.

We believe that judicial restraint should be employed in assessing the impact of a particular desegregation plan upon the educational program of a local system lest the excesses of plans devised by absolutists tear to shreds the fabric of the educational process that the decisions of this Court were designed to improve and promote for all children–black and white.

This is not meant to imply that courts should refrain from looking behind the judgments of school boards and administrators to ascertain whether or not they are in fact being employed as a guise to circumvent the commands of *Brown I* and *II* and *Green*. We suggest, however, that the judiciary should beware lest court-devised plans throw the education baby out with the bath water.

The Fourth Circuit (1267a) explained its reasons for adopting a Rule of Reason:

> We adopt the test of reasonableness–instead of one that calls for absolutes–*because it has proved to be a reliable guide in other areas of the law.* (Emphasis added)

The soundness of the explanation assigned by the Court of Appeals for its adoption of this test should require no documentation, except for those encumbered by a predisposition for absolutes.

The "other areas of the law" referred to by the Court of Appeals include the construction and application by this Court of a variety of fundamental individual rights guaranteed by the Constitution. By way of example we call attention to only a few.

Some of the limitations on Freedom of Religion are summarized in *Mohammad v. Sommers*, 238 F. Supp. 806 (E.D. Mich. 1964):

> [I]n the interest of the public weal, there are many limitations which bound religious freedom. Generally, it can be said that these limitations begin to operate whenever activities in the name of religion affect or collide with the liberties of others or of the public, or violate public policy. Witness this but partial lists of instances of such conflicts which have all been resolved against the claims of religion: Sunday closing, spiritualistic readings, selective service, parading in the streets, practice and advocacy of polygamy, vending periodicals in the streets, fluoridation of water, compulsory school attendance, child labor regulations, compulsory vaccination, blood transfusion, surgery and medical attention. *Id.* at 808.

Numerous limitations have been imposed upon the Right of Free Speech. For example, see *Cox v. Louisiana*, 379 U.S. 536 (1965); *Gitlow v. People of the State of New York*, 268 U.S. 652 (1925); *Times Film Corporation v. City of Chicago*, 365 U.S. 43 (1961)–"It has never been held that liberty of speech is absolute"; *Schenck v. United States*, 249 U.S. 47 (1919); *Gilbert v. Minnesota*, 254 U.S. 325 (1920)–"it is not absolute–it is subject to restriction and limitation;" *Dennis v. United States*, 341 U.S. 494 (1951).

The same is true of the Right to Trial by Jury. Of interest is what this Court said in *Duncan v. Louisiana*, 391 U.S. 145

(1968), holding that a jury trial for petty offenses was not required by the Sixth and Fourteenth Amendments:

> . . . [T]he *possible consequences to defendants* from convictions for petty offenses had been thought *insufficient to outweigh* the *benefits* to efficient law enforcement and simplify judicial administration resulting from the availability of speedy and *inexpensive nonjury adjudications.* These same considerations compel the same result under the Fourteenth Amendment. *Id.* at 1453. (Emphasis added)

And in *Baldwin v. State of New York,* ___ U.S. ___, 90 S.Ct. 1886 (1970)

> One who is threatened with the possibility of imprisonment for six months may find little difference between the potential consequences which face him, and the consequences which face appellant here. Indeed, the prospect of imprisonment for however short of time will seldom be viewed by the accused as trivial or "petty" matter and may well result in quite serious repercussions affecting his career and his reputation. *Where the accused cannot possibly face more than six months imprisonment, we have held that these disadvantages, onerous though they be, may be outweighed by the benefits which result from speedy and inexpensive nonjury adjudications. Id.* at , 90 S. Ct. at 1890. (Emphasis added)

With reference to the Right to Counsel as expounded by this Court in *Gideon v. Wainwright,* 372 U.S. 335 (1963), the Court in *Brinson v. State of Florida, County of Dade,* 273 F. Supp. 840 (S.D. Fla. 1967), at 845-47 had this to say:

> . . . The right to counsel should not be treated as an abstract theorem, but rather as a means of achieving the most perfect justice possible in a given situation. The essence of the right is to protect those charged with crimes from wrongful conviction. However, *that right is qualified by practical exigencies . . .*
>
> *The right to counsel guaranteed by the Sixth and Fourteenth Amendments is not an absolute right,*

> *nor are any of the rights guaranteed by the Constitution "absolute."* See *Creighton v. State of North Carolina*, 257 F. Supp. 806 (E.D.N.C. 1966). *As stated in that case, the Constitution was not written to provide an exercise in abstract idealism but as a practical guide for the management of the affairs of the country and the protection of the rights of its citizens. In today's complex society there can be no truly "absolute" rights.* Thus, the right to free exercise of the religion of one's choice is on its face absolute, but in application is limited since a religion requiring illegal activities would not be constitutionally protected. One cannot refuse to pay taxes because of religious scrupples, nor can one engage in polygamy or any other practice directly harmful to the safety, morals, health or general welfare . . . The "absolute" right to free speech has been qualified and curtailed by libel and slander laws. Such right, on occasion, must be subordinated to other values and considerations. *Dennis v. United States*, 341 U.S. 494, 71 S.Ct. 857, 95 L.Ed. 1137 (1950). It does not confer the right to persuade others to violate the law. *Bullock v. United States*, 265 F.2d 683 (6th Cir. 1958) . . . Neither does such right preclude Congress from excluding obscene matter from the mails or from punishing person advocating overthrow of the government by force. *United States v. Bryan*, 167 F.2d 241. *Likewise, the "absolute" right to counsel in all criminal prosecutions must be qualified by practical exigencies and, unless this is done, the necessities of sound judicial administration would be disregarded* and the administration of justice thrown into senseless chaos. (Emphasis added)

Without belaboring the point further, these examples are cited to demonstrate the futility of a Rule of Absolutes and the necessity for a Rule of Reason. As the dissenting opinion of Judges Sobeloff and Winter and the orders of the district court suggest, if a test of reasonableness is slippery and inapplicable to an evaluation of a school board's efforts to convert to a unitary system, a consideration of costs, disrup-

tions, buses, administrative problems, and impact on educational programs become totally unnecessary and irrelevant. If such be true, there would be no need for complex desegregation plans and much of the elapsed time since *Brown I* and *II* has been wasted.

To the contrary, we subscribe to what this Court said in *Dennis v. United States, supra:*

> Nothing is more certain in modern society than the principle that there are no absolutes, that a name, a phrase, a standard has meaning only when associated with the considerations which gave birth to the nomenclature. *Id.* at 866.

Green gave birth to a major portion of the nomenclature applied to measure school systems and desegregation plans. We find little evidence of any disposition on the part of the absolutists to heed the admonition suggested by *Dennis* that there are differences, which should reasonably be taken into account, between the 2 rural schools (1300 pupils) of New Kent County and the 103 primarily urban schools (84,500 pupils) of Charlotte-Mecklenburg.[16] The absolutists springboard from the nomenclature of *Green* to rationalize their own views, without taking into account the limitations of the ruling of this Court in that case:

> *[A]ll we decide today* is that in desegregating a dual system a plan utilizing "freedom of choice" is not an end in itself. *Id.* at 440. (Emphasis added)

If the review of the Charlotte-Mecklenburg case does nothing else, we hope standards and guidelines for desegregation

---

[16]The trial judge glibly dismisses the differences in his August 3 Order (Pets.' Br. A10): "The principal difference between New Kent County, Virginia, and Mecklenburg County, North Carolina, is that in New Kent County the number of children being denied access to equal education was only 740, whereas in Mecklenburg that number exceeds 16,000." Even this reference to 16,000 leaves an erroneous impression. Under the Board plan only 7,497 black youngsters will attend predominately black schools. See statistical data relating to the Charlotte-Mecklenburg schools and the Board plan attached hereto at A-3.

plans will be evolved that are sufficiently clear and definite to curtail the temptation of some lower courts to rely on their personal educational and social philosophies in judging plans and the system for which they are formulated.

D. THE DISTINCTION BETWEEN DE FACTO AND DE JURE IS NOT A VALID STANDARD BY WHICH TO DETERMINE WHETHER A SCHOOL SYSTEM IS UNITARY.

A major thrust of the district court's sweeping orders is based upon its findings that such segregation as remained in the Charlotte-Mecklenburg schools was the result of *de jure*, not innocent *de facto*, action of federal, state and local authorities. These findings are summarized in the opinion of the Court of Appeals (1264a):

> The district judge also found that residential patterns leading to segregation in the schools resulted in part from federal, state and local governmental action. These findings are supported by the evidence and we accept them under familiar principles of appellate review. The district judge pointed out that black residences are concentrated in the northwest quadrant of Charlotte as a result of both public and private action. North Carolina courts, in common with many courts elsewhere, enforced racial restrictive covenants on real property until *Shelley v. Kraemer*, 334 U.S. 1 (1948) prohibited this discriminatory practice. Presently the city zoning ordinances differentiate between black and white residential areas. Zones for black areas permit dense occupancy, while most white areas are zoned for restricted land usage. The district judge also found that urban renewal projects, supported by heavy federal financing and the active participation of local government, contributed to the city's racially segregated housing patterns. The school board, for its part, located schools in black residential areas and fixed the size of the schools to accommodate the

needs of immediate neighborhoods. Predominately black schools were the inevitable result. The interplay of these policies on both residential and educational segregation previously has been recognized by this and other courts.

These findings were employed as a justification by both the trial judge and the Court of Appeals for the disapproval of the Board's plan that would desegregate all but 10 of the system's 103 schools and place 100% of the black and white children in schools with thoroughly integrated teaching staffs and 68% of the blacks in 93 predominately white schools–with almost all of the remaining black children being scheduled to attend such schools for at least one-half of their 12 years of schooling. These *de jure* findings are in marked contrast to earlier findings of the district court in its April 23, 1969, Order (311a-312a):

> A word about the School Board.–The observations in this opinion are not intended to reflect upon the motives or the judgment of the School Board members. They have operated for four years under a court order which reflected the general understanding of 1965 about the law regarding desegregation. *They have achieved a degree and volume of desegregation of schools apparently unsurpassed in these parts, and have exceeded the performance of any school board whose actions have been reviewed in appellate court decisions.* The Charlotte-Mecklenburg schools in many respects are *models for others.* They are attractive to outside teachers and offer good education. The problem before this court is only one part (albeit a major part) of the educational problem. The purpose of this court is not to criticize the School Board, but to lay down some legal standards by which the Board can deal further with a most complex and difficult problem. The difference between 1965 and 1969 is simply the difference between *Brown* of 1965 and *Green v. New Kent County* of 1968. *The rules of the game have changed, and the methods and philosophies which in good faith the Board has followed* are no longer adequate to complete the job

> which the courts now say must be done "now". (Emphasis added)

Of particular interest is the district court's April 23, 1970, finding:

> . . . Location of schools in Charlotte has followed the local pattern of residential development, including its *de facto patterns of segregation.* (305a) (Emphasis added)

Six months later, in its November 7, 1969, Memorandum Opinion (661a-662a) the district court gratuitously and without the benefit of further evidentiary hearings reversed its previous findings that segregation in Charlotte was *de facto.* The trial judge attributed to the School Board every real or fancied ill that beset the Charlotte-Mecklenburg community and stemmed from federal, state, local and private action, including, among others, public accommodations and housing, racial restrictions in deeds, zoning ordinances, urban renewal, low rent housing and placement of neighborhood schools.

The unfairness and artificiality of these attributions is underscored by a comparison of the district court's findings in this case with those of the Sixth Circuit in *Deal v. Cincinnati Board of Education, supra,* wherein the Court considered the same factors, and arrived at a diametrically opposite result and concluded:

> In our opinion, the burden of righting wrongs alleged to have been committed by public or private agencies ought not to be foisted upon Boards of Education, which have enough problems of their own to solve in providing proper education for the young. *Id.* at 1392.

In *Deal, supra,* the Court observed that in Cincinnati due to residential patterns there was a large concentration of negroes in one portion of the city and schools had been located to serve the neighborhoods where the children live. The Court in *Deal* referred to an Ohio statute that *required* the selection of school sites in areas of the heaviest concentration of children and declared that:

> Even in the absence of such a statute, it would seem prudent to locate the schools where they will be easily accessible and convenient to most of the children and without the necessity of bussing the children or their crossing dangerous thoroughfares. The Board should consider locations in areas that are being developed where large population increases are anticipated, and locations in areas where the Board already owns property.

We, of course, are mindful of the holding of this Court in *Cooper v. Aaron*, 358 U.S. 1 (1958) which is frequently cited for the proposition that as agents of the state a local school board is responsible for conditions created by state officials. This holding was made within the context of the violent, disruptive and overt action generated by Governor Faubus and other state officials to thwart the rezoning efforts of the local school board. In the case of Charlotte-Mecklenburg it is manifestly unsound, unfair and unrealistic that the actions of others should be arbitrarily attributed to its School Board as justification for the excessive order approving the disruptive and costly plan of the district court and disapproving the plan proposed by the Board.

It is common knowledge that prior to 1954 Charlotte-Mecklenburg maintained a dual system, sanctioned by the laws of the State of North Carolina promulgated under the authority of the "separate but equal" doctrine of *Plessy v. Ferguson, supra,* stricken down by *Brown I* and *II,*

Following the mandates of *Brown I* and *II,* in order to achieve further racial mixing Charlotte-Mecklenburg adopted a plan of redistricting that in 1966 was found by the Court of Appeals for the Fourth Circuit to comply with the Constitution as then understood. *Swann v. Charlotte-Mecklenburg Board of Education,* 369 F.2d 29 (1966). Thereafter, in furtherance of additional desegregation, the Board initiated a number of actions which were applauded by the district court in its April 23, 1969, Order (298a-301a, 311a-312a). Following *Green* and in response to the orders of the district court the School Board submitted its plan that on

February 5, 1970, was disapproved by the district court in favor of its own—reciting in support of its action that the local system was tainted by the *de jure* factors referred to above.[17]

The history of this case, the 1966 Circuit Court approval of geographic zones, the Board's initiative to promote desegregation and the results which will be achieved by the February 2, 1970, plan of the Board compels an answer to this question: When, if ever, can a school system born under the ill-fated star of *Plessy v. Ferguson* purge itself of the *de jure* stigma reserved for systems that once-upon-a-time had the dualty that *Plessy* condoned?

We suggest that the distinction between *de jure* and *de facto* is invalid and artificially contrived. In doing so, it is not our purpose to whitewash the Charlotte-Mecklenburg system by pointing a finger at other systems in other parts of the nation that have escaped the lash of oppressive court orders because they operate behind the mask of *de facto* segregation. We do suggest, however, that the *de jure - de facto* standard is not an appropriate test by which to judge a school board's compliance with the commands of *Brown I, Brown II* and *Green*. Schools everywhere should be measured by the same yardstick.

---

[17]In Charlotte-Mecklenburg, 68% of the blacks during the school year 1969-70 attended predominately black schools. Under the Board plan this percentage is dramatically reduced to 32% (see A-3 Appendix attached to this brief). Comparable information derived from HEW figures reflects the following percentages of black students at predominately black schools: New York City, 86%; Los Angeles, 96%; Detroit, 91%; Philadelphia, 90%; Milwaukee, 88%; San Francisco, 54%; Boston, 77%; and Cincinnati, 78%.

The percentages of black students attending schools housing 95% to 100% black students in other cities is as follows: Baltimore, 76%; Cleveland, 80%; Washington, 89%; St. Louis, 86%; Newark, 75%; Buffalo, 61%; Gary, Indiana, 80%. In Chicago, 76% of the blacks attended schools less than 2% white. Source: United Press International *Release*, May 17, 1970.

The flaw in the *de jure - de facto* dichotomy is that from the moment *Brown I* was announced all federal, state and local laws requiring or permitting segregation were void and of no effect. On and after May 31, 1955, there plainly could be no *de jure* racial discrimination in any school system in the United States. What was left, North and South, was segregation in the schools in fact.

The *de jure* concept was never of any importance except as a handle upon which to hang state action and an affirmative duty to dismantle. If one accepts an affirmative conception of the Constitution, the *de jure* idea becomes worthless and the North and South distinctions intolerable.[18]

If separation by race in the public schools renders educational opportunities inherently unequal and if accomplishment of a social purpose is really the true goal, it ought to be purely of historical interest and wholly irrelevant how the practice originated, whether by law, custom or ghetto economics.

It is abundantly clear that social reform is the goal that the trial judge sought to achieve in Charlotte-Mecklenburg: Segregation *per se* is unlawful; educational opportunities and performances are not controlling–"Segregation would not become lawful, however, if all children scored equally on the [achievement] tests" (Pets.' Br. A15); "no school [shall] be operated with an all-black or predominately black student body" (822a); the "pupils of all grades [shall] be assigned in such a way that as nearly as practicable the various schools at various grade levels have about the same proportion of black and white students" (822a); the School Board shall "maintain a continuing control over the race of children in each school . . . to prevent any school from becoming racially identifiable" (823a); the School Board shall "implement a continuing program, computerized or otherwise, of assigning pupils and teachers during the school

---

[18]Senator Abraham Ribicoff, of Connecticut, has described this double standard as "monumental hypocricy."

year as well as at the start of each year for the conscious purpose of maintaining each school and each faculty in a condition of desegregation" (824a).[19] One embarked upon a crusade for social reform finds both opportunity and justification in the *de jure* precept. By way of illustration, it seems rather strained that private racial deed restrictions negated by *Shelley v. Kraemer*, 334 U.S. 1 in 1948 should be relied upon in support of nefarious state action now. The same is true of the purported effects of federal financing and other governmental action over which the school board has no control.

It is inescapable that an all-black school in Washington or Baltimore is just as unequal as an all-black school in Charlotte or Atlanta. People are pretty much the same everywhere and race prejudice now and in the past has not been confined to the southern part of the United States.[20]

If social reform were to be candidly admitted as the objective, we could more profitably concern ourselves with what is reasonably practicable for a school board to do to correct

---

[19]Even if *arguendo* the *de jure - de facto* distinction were to be accepted, such a requirement of continued maintenance and control over the race of children in each school would seem to exceed the authority of a district judge, once he concludes that a desegregation plan has dismantled a dual system and has established a unitary one. After this has been accomplished, any future segregation would be *de facto*–not *de jure*.

[20]*Racial Isolation in the Public Schools, Summary Report by the Commission on Civil Rights* (1967), at 3:

> Although school segregation was sanctioned by law and official policy in Southern cities until 1954, there is a legacy of governmentally sanctioned school segregation in the North as well. State statutes authorizing racially separate public schools were on the books in New York until 1938, in Indiana until 1949, and in New Mexico and Wyoming until 1954. Although not sanctioned by law in other States, separate schools were maintained for Negroes in some communities in New Jersey, Illinois, and Ohio, as late as the 1940s and 1950s. In some cities such as New Rochelle, N.Y. and Hillsboro, Ohio, the courts found that school district lines have been gerrymandered for the purpose of racial segregation.

social inequities–North and South–rather than having our attention diverted to how a particular school system may have gotten that way. Further, it would obviate the necessity for artifically contrived rationales to support a trial court desegregation order, which in this case the Court of Appeals accepted "under familiar principles of appellate review."

E. THE CONSTITUTION DOES NOT REQUIRE RACIAL BALANCING IN SCHOOLS OR BUSSING OF CHILDREN OUTSIDE GEOGRAPHIC ATTENDANCE ZONES TO EFFECT SUCH BALANCING. BALANCING AND COMPULSORY BUSSING INFRINGE ON THE PERSONAL RIGHTS AND LIBERTIES OF THE CHILDREN INVOLVED.

The test of reasonableness adopted by the Court of Appeals–instead of one that calls for absolutes–can be the only sensible standard. Transportation may be employed on a "reasonable" basis as a legitimate tool to effectively desegregate an otherwise dual system. However, this still leaves open to question the circumstances under which and the purposes for which bussing may be or should be imposed upon a school system.

The mandate of the Constitution does not require racial balancing or compulsory bussing outside of normal attendance zones to achieve such balancing if the attendance areas are fairly drawn.

1. Racial Balancing and the Bussing to Achieve It Were the Bases for the Decisions of the Trial Court and Court of Appeals.

The net effect of the trial court orders of February 5, 1970, and August 3, 1970, was to require racial balancing at all three instructional levels and the bussing necessary to implement it–regardless of cost or disruptions. The net effect of the Court of Appeals decision was to impose racial balancing at the junior and senior high levels and to authorize

it at elementary level—tempered only by its test of reasonableness with reference to the amount of bussing involved.

In its August 3, 1970, Order the district court asserts that " 'Racial balance' is not required by this court, merely racial diversity." (Pets.' Br. A10). This was merely a reaffirmation of its previous denials that its prior denials that its prior orders were not based upon a requirement of "racial balance" (710a, 821a). A careful consideration of the various orders of the district court clearly shows that contrary to the trial judge's disclaimers his rulings were in fact premised upon the proposition that a racial balancing of the Charlotte-Mecklenburg schools is required by the Law of the Land.

In its April 23, 1969, Order (310a) the trial court entertained doubts about its power to order a racial ratio in the various schools of the Charlotte-Mecklenburg system:

> Counsel for the Plaintiffs says that since the ratio of white to black students is about 70/30 the School Board should assign children on a basis of 70% white and 30% black and bus them to all schools. This Court does not feel that it has the power to make such a specific order.

In its December 1, 1969, Order (710a) the trial judge acknowledged that his previously expressed doubts had been dispelled:

> . . .[T]he court will start with the thought, originally advanced in the order of April 23, that efforts should be made to reach a 71/29 ratio in the various schools so that there would be no basis for contending that one school is racially different from the others, but to understand that variations from that norm may be unavoidable.

In his February 5, 1970, Order (822a) the trial judge abandoned temporarily any pretense concerning racial balancing as a requirement when he directed:

> That pupils of all grades be assigned in such a way that as nearly as practicable the various schools at

various grade levels have about the same proportion of black and white students.

The Court of Appeals likewise disavowed any purpose to require racial balancing of the Charlotte-Mecklenburg schools. In his dissent, Circuit Judge Bryan cut through the sematics employed by both the district court and his colleagues on the Court of Appeals (1293a-1294a):

> The Court commands the Charlotte-Mecklenburg Board of Education to provide busing of pupils to its public schools for "achieving *integration*". (Accent added) "[A]chieving integration" is the phraseology used, but actually, achieving racial *balance* is the objective. Busing to prevent racial imbalance is not as yet a Constitutional obligation. Therefore, no matter the prior or present utilization of busing for this or other reasons, and regardless of the cost consideration or duplication of the bus routes, I think the injunction cannot stand.
>
> Without Constitutional origin, no power exists in the Federal courts to order the Board to do or not to do anything. I read no authority in the Constitution, or in the implications of *Brown v. Board of Education*, 347 U.S. 483 (1954), and its derivatives, requiring the authorities to endeavor to apportion the school bodies in the racial ratio of the whole school system.
>
> The majority opinion presupposes this racial balance, and also busing to achieve it, as Constitutional imperatives, but the Chief Justice of the United States has recently suggested inquiry on whether "any particular racial balance must be achieved in the school; . . . (and) to what extent transportation may or must be provided to achieve the ends sought by prior holdings of the Court." . . .
>
> I would not, as the majority does, lay upon Charlotte-Mecklenburg this so doubtfully Constitutional ukase. (Emphasis by Judge Bryan.)

In expressing his approval of the district court's plan at all three instructional levels, Circuit Judge Winter in his dissenting opinion candidly acknowledges that racial balancing *per se* should be required and cites as his justification the teacher ratios discussed in *United States v. Montgomery Board of Education*, 395 U.S. 225 (1969). Judge Winter concludes: "if in a proper case strict application of a ratio is an approved device to achieve faculty integration, I know of no reason why the same should not be true to achieve pupil integration . . ." (1301a-1302a).

Having had substantial integration of its faculties in the past, with the opening of its schools this fall Charlotte-Mecklenburg has in each of its 103 schools a white-black teacher ratio of about 3 to 1, which is the racial ratio of faculty members throughout the system. The School Board believes these assignments to be beneficial for both black and white children. However, we do not agree with the district court or Circuit Judge Winter that racial balancing of teachers can be cited as support for the proposition that children can or should be racially balanced as a Constitutional requirement. Teachers are under no compulsion to teach in a particular system. Teacher assignments occasion little, if any, inconvenience for the teacher and no costs or disruptions are imposed upon the school system. By contract they are employed by a system to apply their teaching talents wherever needed. If dissatisfied, they are free to quit and move to a system where employment contracts and conditions are more to their personal likings. Children must attend the school to which they are assigned and have no option to escape the unpalatable effects of their forced participation in a program of racial balancing designed to accommodate others.

In *United States v. Montgomery County Board of Education, supra*, at 236, this Court observed that the petitioners in that case did not argue "for precisely equal ratios in every single school under all circumstances" and that the United States did not argue that "racially balanced faculties are constitutionally required." As noted above, in apparent

agreement with the principle of racial balancing of school children, Circuit Judge Winter sought to temper the import of the district court order with the mollifying comment that "deviations from the overall ratio" had been permitted to "accommodate circumstances" with respect to particular schools. To one wedded to the proposition that racial balancing and ratios is the desired objective, circumstances and practical problems will seldom be asserted to prevent the achievement of this goal.

2. Racial Balancing and Compulsory Bussing Required by the District and Circuit Courts Violate the Constitutional Rights of the Children Involved.

In its February 2, 1970, Plan the School Board concluded with a statement of its conviction that its duty is to protect the rights of all children (741a):

> . . . The Board understandably is prone to *exercise caution lest, in protecting the rights of some of its citizens, it tramples on the rights of others* in the absence of a clear mandate of the Supreme Court. (Emphasis added.)

This concern of the Board was well-founded. The compulsory cross and satellite bussing requirements of the district court and the Court of Appeals will violate the individual rights guaranteed by the Fourteenth Amendment of those blacks and whites caught up in the forced mass movement of children away from their neighborhoods and out of their normal attendance zones for the sole purpose of achieving the racial balancing prescribed by those orders. It is ironic that the counterpart of the compulsion outlawed by *Brown I* and *II* is now employed in the name of the Constitution. Is it trite to suggest that two wrongs do not make a right?

It is obvious that a school board must necessarily have wide latitude in the establishment of attendance zones for orderly administration of the various schools in its system

and that, if these zones are fairly conceived on a nondiscriminatory basis, the children may be compelled to attend the school to which they are assigned under the applicable compulsory attendance laws. (See N.C.G.S. Sec. 115-116 et seq.) Absent an unlimited freedom of choice arrangement (which the Charlotte-Mecklenburg Board has not proposed), the right of a child to go to a particular school is, of course, not absolute, but circumscribed by the inherent power of a school board to make reasonable attendance assignments to conform to the needs of the school system and the community it serves.

Whether or not the Board as an elective body could lawfully have required cross and satellite bussing to effect the compulsory mass movement of children may be open to question. Suffice it to say, the Board did not choose to go to this extreme. The point now at issue is whether the judiciary under the mandates of the district court and the Court of Appeals infringed upon the individual constitutional rights of the children and their parents–black and white–who do not want to be bussed or balanced. In requiring this compulsory bussing those orders exceeded any Constitutional requirement, by *excluding* children from attending nearby schools *solely* on account of their race.

Deal v. Cincinnati Board of Education, supra, at 1391-92 (6th Cir. 1969) addressed itself to this matter:

> It is the contention of appellants that the Board owed them a duty to bus white and Negro children away from the districts of their residences in order that the racial complexion would be balanced in each of the many public schools in Cincinnati. It is submitted that the Constitution imposes no such duty. *Appellants are not the only children who have constitutional rights.* There are Negro, as well as white, children who may not want to be bussed away from the school districts of their residences, and they have just as much right to attend school in the area where they live. They ought not to be forced against their will to travel out of their neigh-

> borhoods in order to mix the races. (Emphasis added.)

The district judge in *Ross v. Eckels, Houston Independent School District, supra*, asked an interesting question:

> Our hypothetical student well might say to the Superintendent of Instruction, "You are excluding me from School A, two blocks from my home, because I am black, and for no other reason. How can you do this when the Supreme Court of the United States in its latest pronouncement on the subject imposes on you the duty 'to operate as [a] unitary school system *within which no person is to be effectively excluded from any school because of race or color*?" I would be interested to know how this question would be answered. (Emphasis added.)

From time immemorial, the public school has been a focal point of community and family life. The location of a particular school is a major consideration for parental decisions regarding the location of their homes and the neighborhood in which they choose to live. Obviously, affluent whites and blacks are normally better able to make this choice than poor whites and blacks. Nevertheless, some poor people prefer that their children attend the school serving the areas of their residence. To afford disadvantaged parents the flexibility of greater options for the education of their children than their existing economic or social status may permit and to bring these available options made in line with those enjoyed by the more affluent citizens are worthwhile objects of any desegregation plan. But it is quite a different matter for a judicial decree to compel bussing to a distant school outside the normal attendance zones—whether the parents like it or not. A court mandate that requires this coercion to achieve what it conceives to be a worthy social purpose (i.e. racial balance) is judicial paternalism.

The dissenting opinion of Judge Bell (concurred in by Judge Gewin) in *United States v. Jefferson County Board of Education, supra*, involving the desegregation of numerous deep south schools, speaks to the matter at hand (at 411):

> Then there is the matter of personal liberty. *Under our system of government, it is not to be restricted except where necessary, in balance, to give others their liberty, and to attain order so that all may enjoy liberty.* History records that sumptuary laws have been largely unobserved because they failed to recognize or were needlessly restrictive of personal liberty . . . They (the majority opinion) *cast a long shadow over personal liberty as it embraces freedom of association and a free society.* They do little for the cause of education. (Emphasis added.)

In *Jefferson County, supra*, Judge Gewin in his own dissent (concurred in by Judge Bell) expressed similar views

> . . . There must be a mixing of the races according to majority philosophy *even if such mixing can only be achieved under the lash of compulsion* . . . Accordingly, *while professing to vouchsafe freedom and liberty to Negro children, they have destroyed the freedom and liberty of all students, Negro and white alike.* There must be a mixing of the races, or integration at all costs, or the plan does not work according to the opinion. Such has not been and is not now the spirit or the letter of the law . . . *When our concepts as to proportions and percentages are imposed on school systems*, notwithstanding free choices actually made, *we have destroyed freedom and liberty by judicial fiat; and even worse, we have done so in the very name of that liberty and freedom we so avidly . . . embrace.* (Emphasis added.)

The majority in *Jefferson, supra*, and other courts have sought to justify infringement upon the rights of students in the majority where segregation is said to rest upon *de jure* action.

The distinction between *de facto* and *de jure* is not a valid test by which to measure the liberties of either black children or white children. It is fair to assume that both black and white school children are blissfully unaware of any such distinction or of the circumstances that are relied

upon by some to justify unequal treatment. The personal rights and liberties of one child should not be sacrificed to promote those of another.

3. A Neighborhood Plan Fairly Administered Without Racial Bias Satisfies the Constitutional Requirements of a Unitary System.

The neighborhood school concept[21] is one that the Board considers to be beneficial to the children and enhances the support that comes when children and parents identify themselves with a particular school and its programs. Fragmentation of this type of association is not in the best interest of our schools.

In its April 23, 1969, Order the district court volunteered its own educational philosophy in opposition to the neighborhood school (306a):

> Today people drive as much as forty or fifty miles to work; five or ten miles to church; several hours to football games; all over the country for civic affairs of various types. The automobile has exploded the old-fashioned neighborhood . . . If this court were writing the philosophy of education, he would suggest that educators should concentrate on planning schools as educational institutions rather than as neighborhood proprietorships . . .

To the contrary, all too many of our present day relationships have become institutionalized and depersonalized. We believe this trend to be unwholesome. Close relationships among teachers, parents and children should to the maximum extent be encouraged and undergirded. The neighborhood school plays an important part in fostering such relationships–particularly at the elementary level where the

---

[21] Geographical zoning is the common method of determining school attendance and the neighborhood school is the predominant attendance unit. *Racial Isolation in the Public Schools–Summary of a Report by the Commission on Civil Rights*, page 3, (March 1967).

ties between home, school and after-class acitvities are an important part of the educational process of children in their early formative years. In a metropolitan system such as ours the ideal may not always be achieved. This should not be a reason for dismantling and abandoning the neighborhood school.[22]

From the beginning there has been this marked contrast between the views of the trial court and those of the Board regarding the pertinence of the neighborhood school. The School Board responded to the pressure of the trial court when it submitted its February 2, 1970, plan—a plan which retained, but severely strained, the principle of the neighborhood school. *Deal v. Cincinnati Board of Education*, 324 F.2d 209 (6th Cir. 1966) succinctly stated the case for the neighborhood school:

> Appellants, however, pose the question of whether the neighborhood system of pupil placement, fairly administered without racial bias, comports with the requirements of equal opportunity if it nevertheless results in the creation of schools with predominately or even exclusively Negro pupils. The neighborhood system is in wide use throughout the nation and has been for many years the basis of school administration. This is so because it is acknowledged to have several valuable aspects which are an aid to education, such as minimization of safety hazards to children in reaching school, economy of cost in reducing transportation needs, ease of pupil placement and

[22]It is interesting to note that in the brief filed by petitioners with this Court in *Green, supra*, October Term, 1967, No. 695, substantially the same view of the importance of the neighborhood school was expressed at page 14 of that brief: "Prior to the relatively recent controversy concerning segregation in large urban systems, assignment by geographic attendance zones was viewed as the soundest method of pupil assignment. This was not without good reason; for placing children in the school nearest their home would often eliminate the need for transportation, encourage the use of schools as community centers and generally facilitate planning for expanding school populations."

> administration through the use of neutral, easily determined standards, and better home-school communication.

This appraisal was reaffirmed in *Deal v. Cincinnati Board of Education* (1969) *supra*, wherein the Court observed that the neighborhood school concept was not only sanctioned, but required, by statute in the State of Ohio.

In his policy statement of March 24, 1970, entitled *SCHOOL DESEGREGATION: A Free and Open Society* (116 Cong. Rec. S4351, Daily Ed., March 24, 1970), the President of the United States addressed himself at length and in depth to the important role that the neighborhood school plays in the education of our public school children. He said in part:

> The neighborhood school will be deemed the most appropriate base for such a [unitary] system.
>
> Transportation of pupils beyond normal geographical school zones for the purpose of achieving racial balance will not be required.

An earlier statement[23] by Robert Finch, then Secretary of Health, Education and Welfare, with particular reference to the Charlotte case, underscored some of the ill-effects of a dismantling of the neighborhood schools:

> We have a very confused set of decisions—that go to both ends of the spectrum with regard to the question of bussing, for example. We have a decision out of the Fifth Circuit involving Orange County, Florida, which says in effect the neighborhood school is the important concept, and that must be preserved at all costs, and that's where the dollars ought to be allocated.
>
> Then you have decisions like Charlotte, in the Carolinas, in Los Angeles, which I think are totally unrealistic, because they say that you shall take the

---

[23] *PROFILE*, a production of Metromedia Radio News, Feb. 27, 1970, Transcript at 7-8.

> percentages in the district as a whole and apply those and force those on each district—or, each school within that district.
>
> And in the case of Charlotte, they have to buy 400 new buses; in the case of Los Angeles, they have to buy, I guess, better than 500 new buses, with all that goes with that, and when you have that kind of a situation, that's not the best use of your resources, because you're trying desperately to keep the doors open, to pay faculty, to pay janitors. But beyond that, it's not the best educational experience, because to haul young children, for an hour or more, across long distances, as you have particularly in the Los Angeles situation, means they can't get any tutoring after school, the parents can't—have great difficulty in getting to the teacher to talk about their child; they can't take part in athletic events, or dramatic events or extracurricular events, and it's not good educational policy.
>
> So that I feel very strongly that those decisions are moving in the wrong direction.

In the Charlotte-Mecklenburg case, the trial court quite obviously considered the neighborhood school to be unimportant and irrelevant. The Court of Appeals, though not addressing itself *per se* to the neighborhood school concept, nevertheless disapproved the geographic zones at all three instructional levels which the Board in its considered judgment had proposed to achieve a unitary system while retaining the basic benefits of the neighborhood school.[24]

---

[24]In commenting upon the complexities of ineffective freedom of choice plans, the petitioners in *Green, supra*, at page 15 of their brief, recommended the simplicity of disestablishing dual zones by conversion to compact attendance areas close to home: "The easiest method, administratively, was to convert the dual attendance zones into single attendance zones, without regard to race, so that assignment of all students would depend only on proximity and convenience. With rare exception, however, southern school boards, when finally forced to begin desegregation, rejected this relatively simple method . . . ."

The School Board plan clearly demonstrates a good faith, conscious and effective effort to keep its neighborhood school attendance areas—drastically gerrymandered to promote maximum desegregation. This plan satisfies the Constitutional requirement that a unitary system be established within which no child is excluded because of race or color.

4. The Compulsory Bussing Approved by the Court of Appeals Is Violative of the Provisions of Section 401(b) and 407(a)(2) of the Civil Rights Act of 1964 [42 U.S.C. 2000c(b) and 2000c-6(a)(2)] Which Expressly Prohibits a United States Court To Order Transportation To Achieve Racial Balance in Schools.

The Court of Appeals has read into the Civil Rights Act of 1964 interpretations which are not fairly warranted by the plain and intelligible language of the Act or supported by its legislative history. In so doing, it has joined the error committed by the Court of Appeals for the Fifth Circuit in *Jefferson, supra*, which reached its conclusion by a strained illogical analysis of this Act and the legislative history.

The clear language of the Act makes no distinction between *de facto* and *de jure* segregation and the legislative history expressly disclaims any sectional or tenuous distinctions adopted by the Court of Appeals and the cases on which it relies. If it were otherwise, Congress would have expressly so stated and the proponents of the bill would have made it so known.

The Courts have been unwilling to give any definitive statement with respect to the term "desegregation" and, therefore, it became incumbent upon Congress to supply an answer in this void. 42 U.S.C. 2000c(b) provides as follows:

> "Desegregation" means the assignment of students to public schools and within such schools without

> regard to their race, color, religion or national origin, but "desegregation" shall not mean the assignment of students to public schools in order to overcome racial imbalance.

It is therefore apparent that Congress in expressing a definition of "desegregation" in a positive manner stated that no student would be *excluded* from his school on account of race, color, religion or national origin. This is the language of *Alexander v. Holmes, supra*. Congress also negatively stated "desegregation" does not mean assignment to overcome racial imbalance.

In order to give further meaning to its definition, Congress by 42 U.S.C. 2000c(a) provides in part as follows:

> . . .[P]rovided that nothing herein shall empower any official or court of the United States to issue any order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another or one school district to another in order to achieve such racial balance, or otherwise enlarge the existing power of the court to insure compliance with Constitutional standards. . . .

The term "desegregation" has taken on such national concern and importance that a Congressional definition may properly be regarded as a statement of public policy. Although the courts may take action with reference to establishing public policy, it primarily rests with the lawmakers to determine public policy. In *Building Service Employees International Union v. Gazzam*, 339 U.S. 991 (1950), the Supreme Court held:

> The public policy of any state is to be found in its Constitution, acts of the legislature, and the decisions of its courts. *Primarily, it is for the lawmakers to determine the public policy of the state.* (p. 787) *Twin City Pipeline Company v. Harding Glass Co.*, 283 U.S. 353, 357, 51 S. Ct. 476, 478, 75 L. Ed. 1112, 83 A.L.R. 1168.

Having primary responsibility, and acting to fill a void left by the courts, the public policy as expressed by the Congress of the United States is binding upon the judiciary.

Shortly after the Civil Rights Act of 1964 became the law of the land, the Circuit Court for the Fifth Circuit by a three-judge panel in *United States v. Jefferson County Board of Education*, 372 F.2d 836 (1966) commonly referred to as *Jefferson I*, and *en banc* in *United States v. Jefferson County School Board*, 380 F.2d 385 (1967), commonly referred to as *Jefferson II*, undertook to dissect that Congressional enactment. In *Jefferson I* the Court acknowledged the supremacy of the legislature in the establishment of national policy in the constitutional scheme of things and the restraints that should be employed by the judiciary in running counter to such a declaration policy:

> More clearly and effectively than either of the other two coordinated branches of government Congress speaks as the voice of the nation. (at page 850) . . . When Congress declares national policy, the duty the other two coordinated branches owe to the nation requires that, within the law, the judicial and executive respect and carry out that policy. (at 856) . . . We shall not permit the Courts to be used to destroy or dilute the effectiveness of the Congressional policy. (at 856) . . .

Having made these pronouncements, the panel in *Jefferson I* abandoned these professed restraints and adopted a rationale by which it came to unwarranted conclusions that clearly thwarted the legislative policy as expressed in the Civil Rights Act of 1964[25] expressly forbidding racial balancing

---

[25]The remarks of Hubert Humphrey, then Majority Whip, made during the course of Senate deliberations are a clear down-to-earth expression of the legislative intent:

> . . .[T]he Constitution prohibits segregation, it does not require integration. The busing of children to achieve racial balance would be an act to effect the integration of schools. In fact, if the bill were to compel it, it would be a violation, because it would be handling the matter on the basis of race and we would be transporting children because of race. The

and the use of transportation to achieve it. This error was perpetuated by the majority in *Jefferson II* and other courts relying upon the ill-considered reasoning of these cases.

Judge Bryan in his dissent in the Charlotte-Mecklenburg case clearly recognizes congressional hostility to the principle of "racial balance":

> Even construed as only incidental to the 1964 Civil Rights Act, this legislation in 42 United States Code §2000c-6 is necessarily revealing of Congress' hostile attitude toward the concept of achieving racial balance by bussing. It unequivocally decried in this enactment "any order [of a Federal Court] seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another . . . to achieve racial balance . . .

The opinions and orders of the Court of Appeals and of the district court are based on the premise that balancing of the races in each of the Charlotte-Mecklenburg schools is the optimal objective. Those opinions and orders contravene the prohibition of the Civil Rights Act of 1964.

F. RACIAL BALANCE–THE HARBINGER OF MASSIVE COURT INVOLVEMENT IN SOCIAL THEORIES.

The Supreme Court is now being asked by petitioners to direct this School Board to engage in another experiment in efforts to seek some educational or social goal which has eluded them and will continue to do so for years to come. It is well known that social balance, social equivalence,

---

bill does not attempt to integrate the schools, but it does attempt to eliminate segregation in the school systems. The natural factors such as density of population, and the distance that students would have to travel are considered legitimate means to determine the validity of a school district, if the school districts are not gerrymandered, and in effect deliberately segregated. The fact that there is a racial imbalance per se is not something which is unconstitutional. 110 Cong. Rec. p. 12717, June 4, 1964.

educational equivalence and related concepts will not be accomplished by the blacks over night. All the sociologists and educators agree on this point.

The theory advanced by the petitioners in the original *Brown* case, *supra*, was not that every child would be entitled to go to a non-segregated school, but rather that the children would be distributed to the schools by drawing attendance lines on a natural basis. 21 U.S.L.W. 3164 (Dec. 16, 1952). This position was pursued in *Cooper v. Aaron*, 358 U.S. 1 (1958) where petitioners sought enforcement of a plan which proposed to "develop school attendance areas consistent with the location of white and colored pupils with respect to the present and future physical facilities of the Little Rock school district." *Norwood v. Tucker*, 287 F.2d 798 (8th Cir. 1961).

The theory of freedom of choice was successfully urged upon this Court in *Goss v. Knoxville*, 373 U.S. 683 (1963) and was openly embraced by the Department of Health, Education and Welfare under the Civil Rights Act of 1964 and by the Fifth Circuit in *United States v. Jefferson*, 380 F.2d 385 (1967).

Petitioners' attorneys in *Green, supra*, (Oct. term, 1967, #695), on page 15 of their brief, argued:

> After Brown, southern school boards were faced with the problem of "effectuating a transition to a racially non-discriminatory system" (Brown II at 301). *The easiest method*, administratively, was *to convert* the dual attendance zones *into single attendance zones*, without regard to race, so that assignment of all students would depend only on *proximity* and *convenience*.[16]

[16]Indeed, it was this method that this Court alluded in Brown II when it stated "[t]o that end, the courts may consider problems related to administration, arising from . . . revision of school districts and attendance areas into compact units to achieve a system of determining admission to the public schools on a non-racial basis" (349 U.S. at 300-301). (Emphasis added.)

Similar expressions appear throughout petitioners' brief in *Green*.

Notwithstanding petitioners' arguments in *Green*, and notwithstanding appellate approval of the existing attendance lines of the Charlotte-Mecklenburg system, the Board gerrymandered so as to produce a maximum racial mix in schools and proposed to totally desegregate faculties. It has gone far beyond the requirements of *Brown, Green* and the position of the NAACP throughout all Supreme Court proceedings. Now the NAACP seeks total racial balance. Why?

For years, the courts and school systems have been advised that dramatic improvement in the performance of black students could be expected upon the attainment of desegregation. The Coleman Report teaches there is a tendency for blacks to improve in desegregated schools. The achievement tests of this system (R. Ex. 64, July 15, 1970) disclose that the improvement brought about by desegregation is indeed slight. Perhaps the reason is that this system has been offering educational equivalence in its facilities and programs for some years (298a-302a).

The disappointing results of school desegregation brings to the forefront the environmentalists who have consistently maintained that the environment and attitudes of a child are the largest determinants in achieving equivalence. How will the courts meet this problem? Will it require massive economic assistance to families in the lower economic strata? Perhaps the court will be persuaded that the attitudes and environment of the blacks may be enhanced by enlarging the school board's responsibility with respect to food, clothing and shelter, all of which may best be resolved by placing these children in state maintained boarding educational centers. If the court has at that time accepted the racial balance theory, then in view of the substantial transportation times which children encounter in traveling to and from these centers, it is a simple step of mental gymnastics to require full attendance of whites in these educational centers so as to further satisfy the peer

group advocates. If this Court embraces the principle of racial balancing, it will have adopted the proposition that the constitutional rights of one child may be submerged to promote the presumed rights of another.

Even this will not produce total social mixing sought by petitioners and additional areas of court intervention will be requested which the court must be prepared to face. For instance, the district court conjectured that public housing has been concentrated by action of federal officials. Obviously, the concentration of blacks in large public housing projects would perpetuate segregation not only in the schools but in neighborhoods. Will the court limit the size of public housing projects and the distance between such projects so as to assure dispersal of blacks?

Related questions arise in the area of private residential housing which the district court said perpetuated segregation. Will this Court ultimately require a private owner of a subdivision to include a prescribed quota of homes for blacks only in each block of a residential development? Will transportation be required in remote suburban areas for those blacks who customarily use public transportation?

Numerous other questions relate to what extent this Court will require local public authorities to inaugurate plans for the racial residential balancing of entire communities. If community balancing is required, will judicial control over power possessed by local building licensing officials be used to establish and maintain such balancing? Will local governments be required to submit for court approval plans for desegregation of entire cities? Will such plans be subject to continued judicial review and supervision?

Another area which petitioners may pursue through the courts relates to school grading, IQ and achievement tests administered by the school system. Obviously, those students who perform poorly in school on such tests are less likely to get the desired employment positions. The remedy which may be urged upon the courts is that such grading is unfair to minority groups with different cultural back-

grounds. Therefore, all students should be automatically promoted as having received the same education and given the same certificate on graduation. In the eyes of the prospective employer, all students would possess the same educational qualifications. Is this Court prepared to foist this theory upon the nation?

Recently, this Court had occasion to pass upon the unconstitutionality of disproportionate district representation which resulted in the "one man one vote rule." *Reynolds v. Sims*, 377 U.S. 533 (1964). School boards are now being faced with demands by black students that student organizations, cheerleaders, school officers, class officers and other positions ordinarily determined by popular vote be accorded blacks pro rata and without regard to the vote of the majority. If this Court should direct pro rata representation in the schools, then this Court must be prepared to answer similar demands of these black students when they move into the adult world which does not permit racial ratios in elective offices. Will this Court direct that minority groups be permitted to select a pro rata number of seats in Congress, state legislatures and other positions of government?

It is quite obvious that this Court would be unwilling to order the adults of this society to such extremes in an attempt to attain social racial balances. Are children any less citizens by reason of their youth? Certainly not, as they are accorded the full spectrum of constitutional rights and obligations conferred on adults, other than the right to vote. This being true, this Court cannot justify taking from the children involved their personal preferences, their time, their right to free association and the host of other rights they possess as citizens which would be sacrificed in being involuntarily transported to a school beyond the area in which they reside–solely for the purpose of satisfying a racial balance numbers game. The rights of one child and the child's parents to be free of standardization by the state is clearly enunciated in *Pierce v. Society of Sisters*, 268 U.S. 510, 534 (1925):

> . . . The fundamental theory of liberty upon which all governments in this union repose excludes any general power of the state to *standardize its children* by forcing them to accept public instruction from public teachers only. *The child is not the mere creature of the state*. Those who nurture him and direct his destiny have the right, coupled with the high duty, to recognize and prepare him for additional obligations. (Emphasis added.)

In describing the word "liberty", this court held in *Meyer v. Nebraska*, 262 U.S. 390, 399 (1923), as follows:

> While this court has not attempted to define with exactness the liberty thus guaranteed, the term has received much consideration and some of the included things have been definitely stated. Without doubt, it denotes not merely freedom from bodily restraint, but also the right of the individual to contract, to engage in any of the common occupations of life, to acquire useful knowledge, to marry, establish a home and bring up children, to worship God according to the dictates of his own conscience and generally to enjoy those privileges long recognized at common law as essential to the orderly pursuit of the happiness of men . . . The established doctrine is that this liberty may not be interfered with under the guise of protecting the public interest by legislative action which is arbitrary or without reasonable relation to some purpose within the competency of the state to effect . . .

If this Court directs racial balance in the child's world, then there is no constitutional prohibition which would prevent the court ordering racial balance in the adult world. The Constitution as written and as developed contains no premise upon which to undergird such reckless appropriation of the constitutional rights of its citizens, be they children or adults. Mr. Justice Reynolds in *Meyer v. Nebraska, supra*, describing the totalitarian ancient state of Sparta, stated:

> . . . In order to submerge the individual and develop ideal citizens, Sparta assembled the males at seven into barracks and entrusted their subsequent education and training to official guardians. Although such measures have been deliberately approved by men of great genius, their ideas touching the relation between individual and state were wholly different from those upon which our institutions rest; and it hardly will be affirmed that any legislature could impose such restrictions upon the people of the state without doing violence to both the letter and spirit of the Constitution.

Will the courts tread where it has forbidden the legislature to walk?

II. DISCUSSION OF CONSTITUTIONAL PRINCIPLES TO DESEGREGATION PLANS.

A. GENERAL STATEMENT REGARDING DESEGREGATION PLANS INVOLVED IN THIS CASE.

When the Fourth Circuit heard this case, there were two plans before it, both of which related to all three instructional levels: The February 2, 1970, plan of the Board and the February 5, 1970, plan of the district court, which the trial judge later reapproved and reinstated in his orders of August 3 and August 7, 1970. After remand by the Court of Appeals, during the course of the hearings held pursuant to the Circuit Court directives, three other desegregation plans were presented for the elementary level: the HEW plan, a plan prepared by a minority of the Board and an earlier draft of a plan prepared by the court consultant Dr. John A. Finger. In his August 3, 1970, Order, the trial judge disapproved the HEW plan and found the other two to be reasonable alternatives. Having appealed to the Fourth Circuit from the August 3 and August 7 Orders, the School Board on September 3, 1970, filed with this Court a motion for leave to supplement the record, or in the alternative for a Writ of Certiorari to the Court of Appeals, so that this

Court would have before it the complete record of the proceedings that culminated in the August 3 and August 7 Orders–including the three additional plans referred to above. As this brief is being prepared no action has been taken by this Court upon the Board's motion of September 3. On the assumption that the motion will be granted, this brief addresses itself to all five plans.

In an effort to be of the greatest possible assistance to this Court, as a separate appendix to this brief the School Board has filed a total of 9 maps (color coded where appropriate) to show graphically the attendance areas, pairings, clusters and other information concerning all of the plans–with the exception of the earlier Finger draft that was too indefinite for adaption to a graphic portrayal. Careful consideration of these maps is earnestly invited with the hope that this Court will find them to be a convenient means of getting a quick accurate picture and comparison of the various desegregation proposals.

B. THE BOARD PLAN CONVERTS THE CHARLOTTE-MECKLENBURG SCHOOLS TO A UNITARY SYSTEM. THE FOURTH CIRCUIT JOINED IN THE ERROR OF THE TRIAL COURT BY DISAPPROVING THAT PLAN.

1. The Board Plan Squares with the Conversion Checklist Prescribed by Green.

In *Green, supra*, this Court (commenting upon the typical pattern of state-imposed dualty found in New Kent County and outlawed by *Brown I* and *II*) observed at 435:

> . . . Racial identification of the system's schools was complete, extending not just to the *composition of student bodies* at the two schools but to every facet of school operations–*faculty, staff, transportation, extracurricular activities and facilities* . . . (Emphasis added.)

This itemization has been used by courts as a checklist by which to measure the effectiveness of desegregation efforts.

The administrative staff and school faculties of the Charlotte-Mecklenburg system are now thoroughly integrated. In its April 23, 1970, Order the district judge made specific findings that there was no discrimination with respect to the "other facets" referred to in *Green*, as well as a number of others (298a-301a). The Fourth Circuit also took note of these (1265a-1266a). In addition the Board has inaugurated many other innovative programs.

Most of these policies and practices were undertaken by the Board on its own initiative, a circumstance that prompted the district court to state that nothing in its April 23, 1969 Order shall be construed as any reflection on the good faith motives or judgment of the School Board which had "achieved a degree and volume of desegregation of schools apparently unsurpassed in these parts and have exceeded the performance of any school board whose actions have been reviewed in appellate court decisions. The Charlotte-Mecklenburg schools in many respects are models for others." (311a-312a).

Since the petitioners do not controvert the findings of the trial judge in giving Charlotte-Mecklenburg a clean bill of health with respect to these "other facets," the only one at issue in this case involves the question of whether the Board plan effectively eliminates discrimination in the schools and student bodies of this system.

2. The Board Plan Based on Geographic Attendance Zones Gerrymandered to Achieve Maximum Racial Mix Fully Complies with Constitutional Requirements for Desegregation of the Charlotte-Mecklenburg Schools and Their Student Bodies.

The pivotal issue in this case is whether the School Board's desegregation plan based on comprehensively restructured geographic attendance zones satisfies the Constitutional requirement of a unitary system in a situation where these zones are established to promote the maximum amount of desegregation possible by the employment of this tech-

nique.[26] This issue involves a consideration of the extent to which a school board may employ this technique as a means of preserving some semblance of the neighborhood school concept which it, together with most school systems and educators, believe to be beneficial.[27]

Of the maps previously referred to, the Court's attention is invited to Map Nos. 1, 6 and 8 showing the elementary, junior high and senior high restructured zones of the Board

---

[26]The Board plan is supplemented by a majority to minority transfer program designed to promote desegregation and to prevent resegregation. It allows any black child in a school having more than 30% of his race to attend one that is less than 30% black, but permits a white child to transfer only if his present school is more than 70% white and the one to which he seeks assignment is less than 70% white. To encourage blacks to take advantage of this option, transportation is provided for those chosing to move from their neighborhoods.

[27]Compare article appearing in NATION'S SCHOOLS, June, 1970, page 100, entitled "*Forced Busing Vetoed by 90% of Schoolmen*":

> Although nearly 40 per cent of the nation's school superintendents think the Nixon Administration is vacillating on its enforcement of school desegregation, 90 per cent agree with the President's recently stated reservations about compulsory busing . . .
>
> Despite the various shadings of opinion on enforcement policy, most schoolmen reported unequivocal opposition to busing as a means for achieving desegregated schools. Judging form their comments, for a sizeable majority of superintendents the neighborhood school represents, as one New Yorker expressed it, "a fundamental principle in American public education." Objections to busing fell mainly into the following categories:
>
> Busing is an infringement on the rights of parents and students.
>
> Busing is a poor solution to the problem of desegregating the schools since the long-term answer depends on the alteration of residential housing patterns.
>
> Busing is too expensive a solution, when money could be better spent to upgrade educational programs in poverty area schools . . .
>
> How administrators voted: . . .

plan and Map No. 2 showing the new elementary zones superimposed upon the previous attendance areas.[28]

Under the Board plan, 100 of the 103 schools in the Charlotte-Mecklenburg System would have some degree of racial mix, leaving only three all-white schools. 68% (16,709) of the black students would attend 93 schools with less than 40% black student bodies[29]—leaving the remaining 32% of the black pupils in the 10 schools having white ratios of 17% to 1%.[30] These 10 predominately black schools remained in spite of the Board's best efforts to achieve a more satisfactory racial mix in them by means of the drastically gerrymandered attendance lines. Of these 10 schools, 9 are elementary[31] and 1 is a junior high school.[32]

---

2. Do you think busing of students should be implemented to achieve desegregation, even if it means a weakening of the neighborhood school concept?

10% Yes 90% No . . .

The opinion poll survey, conducted monthly by the editorial staff of NATION's SCHOOLS, is based on a five per cent proportional sampling of 14,000 school administrators in 50 states. This month's poll brought a 40 per cent response.

[28]Some of these maps reflect slight adjustments occasioned by "rounding off" the square corners of the computer lines to conform them to identificable landmarks.

[29]This represents a 100% increase over 1969-70, when 8,858 blacks attended 73 predominately white schools. In March of 1965 only 343 blacks attended 22 white schools. Several predominately white schools slightly exceed 40% black.

[30]See Appendix attached to this brief for statistical data pertaining to the Board plan.

[31]Under the Board plan, these 9 elementary schools have the following black-white ratios: Bruns Ave. (90-10); Marie Davis (88-12); Double Oaks (99-1); Druid Hills (96-4); First Ward (99-1); Lincoln Heights (99-1); Oaklawn (99-1); University Park (85-15); and Villa Heights (83-17). (*A Plan for Student Desegregation*–Systems Associates, Inc., page 31.)

[32]Under the Board plan, Piedmont Junior High has a black-white ratio of 90% (B)-10% (W). (*A Plan for Student Desegregation*–Systems Associates, Inc., page 31.)

The remaining predominately black schools are located in the inner-city core which is populated for the most part by blacks, many of whom due to shifting housing patterns had moved into previously white areas. In its March 21, 1970, Supplemental Findings of Fact (1208a), the trial court acknowledged:

> Both Dr. Finger and the school board staff appear to have agreed, and the *court finds as a fact*, that for the present at least, there is *no way to desegregate* the all-black schools in Northwest Charlotte *without providing* (or continuing to provide) *bus or other transportation* for thousands of children. All plans and all variations of plans considered for this purpose lead in one fashion or another to that conclusion. (Emphasis added.)

In formulating its plan, the Board to a very significant degree has elected to exceed Constitutional requirements. It materially altered the compactness of neighborhood school areas.[33] It introduced into each school a precise black-white teacher ratio. It sought to achieve a 70/30

---

[33] *Brown II* recognized that an acceptable desegregation plan may employ geographical rezoning if done fairly and in good faith to effect "a revision of school districts and attendance areas into compact units to achieve a system of determining admission to the public schools on a non-racial basis." A pertinent historical note is made by Alexander M. Bickell in his recent book, *The Supreme Court and the Idea of Progress:*

> At the first argument of *Brown v. Board of Education* in 1952, Justice Frankfurter asked the future Justice Thurgood Marshall, then counsel for the Negro children, whether a decision in his favor would "entitle every mother to have her child go to a non-segregated school?" Mr. Marshall replied in the negative. "What will it do?" Justice Frankfurter pursued. Mr. Marshall replied: "The School Board, I assume would find some other method of distributing the children by drawing district lines." The only requirement would be, Mr. Marshall added, that the lines be drawn "on a natural basis," and not be gerrymandered so as to enclose or exclude Negro neighborhoods. Bickell, *The Supreme Court and the Idea of Progress*, p. 117 (1970). See also 21 U.S.L.W. 3164 (1952).

racial mix in as many of the 103 schools as possible–a goal which the Board maintains cannot be required by judicial fiat. Because of neighborhood patterns, only an intractable remnant of black children will be assigned to the 10 inner-city black schools. Any of these who wish to leave their neighborhoods are encouraged to do so by the majority to minority transfer policy and are provided the transportation with which to accomplish the move. Of those who remain, almost all are assured of a desegregated school experience for one-half of their 12 years.[34]

By any reasonable standard the Board plan dismantles whatever remained of the old dual system that years ago was maintained under the permissiveness of *Plessy v. Ferguson* and the compulson of State law. Any vestige of racial discrimination or identification has been obliterated. All facets of the Charlotte-Mecklenburg schools–including student bodies, faculty, staff, transportation, extracurricular activities and facilities–are desegregated. No child is excluded from any of the 103 schools because of race or color. As stated by the Court of Appeals (1268a), an intractable remnant of segregation "should not void an otherwise exemplary plan for the creation of a unitary system."

A consideration of the pro-desegregation gerrymandered zones of the Board excludes any inference that they were formulated for any purpose other than a color conscious one to promote maximum desegregation of the Charlotte-Mecklenburg Schools. The Board has acquitted its affirmative duty to convert to a unitary system.

Both the trial judge and the Court of Appeals erred when

---

[34]Of the 32% black children who will remain in predominately black schools 6,739 are assigned to 9 (out of a total of 72) elementary schools and 758 will attend 1 (out of a total of 21) junior high school. All 10 of the high schools are desegregated. Under the Board plan all of the 758 junior high students will advance to the predominately white high schools and all but a small handful of the elementary youngsters will advance to the 20 desegregated junior high schools.

they disapproved the Board plan—errors premised upon the faulty notion that more racial balancing should be superimposed upon that which the Board itself elected to undertake. By so doing, the Circuit Court exceeded the bounds of its own test of reasonableness.

C. THE COURT APPROVED FINGER PLAN EXCEEDS CONSTITUTIONAL REQUIREMENTS BY REQUIRING RACIAL BALANCING AND THE BUSSING TO IMPLEMENT IT. THE FOURTH CIRCUIT JOINED IN THE TRIAL COURT'S ERRORS BY DISAPPROVING THE BOARD PLAN AND MISAPPLYING ITS OWN RULE OF REASON.

This controversy revolves around the trial court's February 5, 1970, Order requiring long distance bussing to racially balance the elementary, junior high and senior high schools of the Charlotte-Mecklenburg system. The plan adopted by the trial court and ordered into effect was prepared by Dr. John A. Finger, Jr., a Professor of Education at Rhode Island College, who had previously appeared as a witness for the plaintiffs.[35] The objectionable features of the Finger plan were basically occasioned by his adding to the Board plan the paired and clustered schools and satellite areas that he considered necessary to comply with trial court instructions to eliminate the 10 schools that remained predominately black under the Board plan and to create a racial balance in one senior high school (981a). Upon appeal, the Fourth Circuit approved the secondary plans of the district court, but disapproved its elementary plan as being unreasonably onerous. Upon remand (August 3, 1970, Order) contrary to the Circuit Court ruling the trial judge concluded

---

[35]The Fourth Circuit in commenting on the use of Dr. Finger as court consultant cautioned against the use of a partisan witness, but concluded that his dual role did not cause him to be faithless to the trust imposed on him and therefore, "the error, if any, in his selection, was harmless." (1279a).

that his own elementary plan was reasonable and reaffirmed his February 5 Order at all three instructional levels.

1. An Analysis of the Court Approved Finger Plan Shows the Racial Balancing Imposed Upon the Charlotte-Mecklenburg Schools.

The following is a brief summary of the consequences of balancing requirements at all three instructional levels which were prescribed by the February 5 and August 3 Orders of the district judge—those at the secondary level having been approved by the Circuit Court and those at the elementary level having been held by the Circuit Court to be unreasonable because too extensive and onerous.

(a) *Elementary Schools*

The most burdensome part of the trial court's order is the long distance cross-bussing of about 10,300 elementary children to eliminate 9 predominately black inner-city schools by pairing them with 24 predominately white suburban schools—requiring the bussing of 5,150 black first, second, third and fourth graders to the white schools and 5,150 white fifth and sixth graders to the black schools.

It is ironic that, under court compulsion it is proposed to reinstate the dual bus system Charlotte-Mecklenburg abandoned years ago. Once again, buses for whites only and buses for blacks only will be passing each other on the streets of Charlotte.

This Court's attention is invited to Map 3 which shows more clearly than can any written description the practical effect of the racial balancing edicted by the court plan at the elementary level. The long streamers on that map are designed to assist this Court in identifying the 9 inner-city predominately black schools that are paired with the 24 white suburban schools for the sole purpose of achieving the optimal 70/30 racial mix the trial judge adopted as his goal.

These are the 9 elementary schools in which the School Board was unable to attain a more satisfactory mix[36] because the concentration in black neighborhoods is so great that pulling in whites from adjoining areas would cancel out the desegregation achieved under the Board plan in the nearby schools.

In disapproving the trial judge's elementary plan, the Fourth Circuit did not quarrel with the racial balancing goal sought to be realized. Under its test of reasonableness, the Court of Appeals merely concluded that, based on the trial court's estimates, the resulting increase of 39% in the number of elementary students bussed and 32% in the present bus fleet was too extensive and too onerous (1276a). The dissenters, Judges Sobeloff and Winter, were delighted with the results and the means of attaining them.

(b) *Junior High Schools*

The Board plan proposed to restructure the attendance lines of the 21 junior high schools so that all but one of them would not have more than 38% black students. In spite of the Board's best efforts, the one remaining school (Piedmont Junior High) housing about 840 pupils was left 90% black and 10% white. As was the case with the 9 elementary schools, the Board was unable to achieve further mixing of Piedmont Junior High because of the adverse domino effect upon the nearby junior highs where satisfactory racial ratios had been accomplished.

In order to reduce the percentage of blacks in this one school from 90% (758 pupils) to 32% (243 pupils), the court consultant reshuffled the Board's proposed attendance zones for the junior high schools and provided for satellite bussing

---

[36]The results of the School Board plan regarding these 9 schools are summarized in footnote No. 31 at page 72 of this brief. Even under the Board plan in 4 of these 9 schools the student bodies would be comprised of 10%-17% whites, a mix considered completely acceptable by many courts.

of inner-city black youngsters to nine predominately white suburban junior high schools. This proposal of Dr. Finger was approved by the trial court and the Court of Appeals.

Map No. 7 shows the junior high zones restructured by district court and the streamers on that map identify the various inner-city schools from which black youngsters will be bussed to outlying schools. As indicated, all of these changes were occasioned by the insistence of both the district court and the Court of Appeals that the 90% black-10% white ratio at Piedmont is not good enough. The extensive court imposed surgery was undertaken notwithstanding the fact that the Board had already produced satisfactory ratios in all of the schools involved in the reshuffle, with the single exception of Piedmont, a school nearly all white 5 years ago (691a).

According to Board estimates these changes prescribed by Dr. Finger require the bussing of 4,741 additional children–6,129 under the Finger plan v. 1,388 under the Board plan (881a, 872a). All of this is directed to effect a reduction of black students at 1 of the 21 schools (Piedmont) by only 515 students. These dislocations and the cost of the bussing required to accomplish this racial balancing cannot stand up under the test of reason or the requirements of the Constitution.

(c) *Senior High Schools*

In some respects, the court action at the senior high school level evidences the most glaring, if not the most extensive, example of racial balancing. Under the Board plan all 10 high schools were desegregated–9 of them 17%-36% black and 1 (Independence High) with 2% black. This plan was adopted by the trial court and approved by the Circuit Court with one exception: 300 black students residing in the inner core of the City must be bussed from the area of their residence through center city traffic a distance of about 12 or 13 miles to Independence High School located in white suburbia.

Reference is made to Map No. 9 for a graphic illustration of the practical result of Dr. Finger's modification requiring the bussing of the 300 blacks from the inner city satellite area to Independence High.

The Court of Appeals referred to the bus mileage for the black youngsters as being about the same as the average of other bus routes serving Independence High (1273a)–but neglected to observe that the existing bus routes were primarily in rural and suburban areas, rather than in the congested inner city areas which would be traversed by the 300 black students.

Under the Board plan these 300 children would have attended a thoroughly desegregated high school having a racial composition of 36% black and 64% white. The only purpose served by the court-directed shifting of these 300 was to make a white school less white. Is the time and safety of these black children irrelevant? They were assured of a desegregated education.

2. The Court-Approved Finger Plan Is Unreasonable and Proper Consideration Was Not Given to the Burdens Which that Plan Imposes on the Charlotte-Mecklenburg System.

The reservations of the district court regarding the pertinence of the Fourth Circuit's Rule of Reason and its preference for a Rule of Absolutes impaired a proper and full consideration of the Board's evidence and the practical and educational problems confronting the Charlotte-Mecklenburg System within the context of a complex urban setting.

In his August 3 Order (Pets.' Br. Al *et seq*) after eight days of testimony at the hearing that the Circuit Court required, the district judge did not make a single finding of fact favorable to the School Board. The same is true with reference to the March 21, 1970 Supplemental Findings of Fact (1198a) made after hearings that were also held

pursuant to Circuit Court directions.[37] These findings indicate appalling disdain of the Board's evidence.

The School Board filed objections and exceptions to the findings of fact set forth in both of those Orders. The district court took no material action with respect to the Board's motions that these findings of fact be modified to conform to the evidence. The objections and exceptions to the March 21 findings appear at Appendix 1241a-1254a. Those submitted in response to the August 3 findings will be printed and filed with this Court as part of an additional appendix. A careful consideration of those objections and exceptions will assist this Court in appraising the conclusions of the district court.[38]

Due to limitation of space it is practical to discuss only a few of the areas wherein the findings of the trial judge failed to conform to the evidence.

There was a marked disparity between the estimates of the trial court and those of the experienced transportation staff of the schools regarding the additional number of children to be transported under the Finger plan and the number of busses required–13,300 (138 busses) according to the judge and 23,384 (526 busses) according to the staff. As the Court of Appeals observed (1271a), anyone's estimates rest on many variables. This is, of course true, but the judge's drastic discount factors (1215a) were unwarranted. The trial court's computations ignore the fact that

---

[37]At the February 5, 1970 hearing the trial judge repeatedly stated that the evidence regarding transportation costs and other such data was irrelevant and indicated his impatience with the whole subject. (For example, see Tr. 111-14, 128-30, 133-134, 150-151, 153.) On March 5, 1970, the Fourth Circuit granted a stay of the February 5, 1970 Order with directions that the district court make supplemental findings of fact regarding transportation, the stay being left undisturbed by this Court.

[38]Among other portions of the record that this Court may find particularly helpful are the affidavit of J. D. Morgan and its attachments (853a-890a), the affidavit of William C. Self (850a-852a) and affidavits of Herman J. Hoose (894a-897a, 1038a-1040a).

the long routes through the city traffic will hamper the use of multiple bus trips and will occasion the need for hard-to-get adult drivers unless class schedules of student drivers are severely staggered to accommodate transportation. The court presumes that a bus can make 1.8 trips per day which was the 1969-70 experience of the system with its rural routes. This conclusion disregards the evidence showing that the 1.8 average includes empty bus trips by the driver, that (excluding empty bus trips) last year's average on primarily rural trips were 1.49 overall and 1.06 at the elementary level, that the length of trips includes not only school to school but the meanderings of routes to pick up children, that some busses must operate with under-capacity loads when necessary to pick up pockets of children in out-of-the-way areas and that busses in inner-city traffic should not be overloaded. In computing the additional children to be transplanted, the trial judge ignores the evidence that a space must be provided for each child assigned to a bus whether or not he is absent on a particular day, that due to familiarity with specific schools and community areas the school staff reduced where appropriate the eligible children who would not utilize the busses and that almost all of the children in the low economic areas would be dependent upon school bus transportation.

The district court's justification of the great expansion of the existing fleet resulting from its order by reference to the pre-existing transportation (280 busses; 23,000 children) is unwarranted and ignores the problems occasioned by the mass movement of children and busses over the streets and arteries of the inner-city and its perimeter already saturated and glutted to the breaking point–particularly during rush hour traffic. School busses having a 35 mile speed limit will be thrown into the stream of arteries moving 40-50 miles per hour. The city traffic engineer acknowledged that at present some school busses are being operated in congested areas–but equated the practice to a tolerable amount of "smallpox" that should not be consciously turned into an "epidemic." Overloaded busses on

rural routes cannot sensibly be cited to support the wisdom of overloading busses operating cross-town in the congestion of inner-city rush hour traffic—particularly with immature drivers.

The trial judge's findings imply the availability of unlimited funds from State and local sources with which to defray the extensive cost of the additional bussing imposed upon the Charlotte-Mecklenburg System—citing in support the size of the budgets for the State of North Carolina, the County of Mecklenburg and the local school system and implying that, if the local community gets financial assistance from the State, it is therefore "free." The evidence shows that the School Board has no control over the State budget, that the funds it gets from Federal and State sources are nondiscretionary and earmarked primarily for teacher salaries, instructional services and special programs, that the current local school budget permits the educational programs (severely beset by inflation and growing pains) to just about stay even and that diversion of funds to finance a greatly expanded transportation system will curtail the availability of funds for educational pursuits. To the extent the judge implies money from the State is "free" he overlooks the fact that the State gets its money from the taxpaying public and the source thereof is immaterial in applying a Rule of Reason. In seeking to minimize the cost of busses to implement the Finger plan for the 1970-71 school year, the district court takes refuge in the willingness of the State to lend the Charlotte-Mecklenburg System obsolete busses (14 to 16 years old) on a one-year basis as a supplement to the existing fleet.[39] This overlooks the obvious fact that

[39]Paragraph 14 of the order dated August 3, 1970, carries with it an implication of the Board's prior concealment of ownership of additional busses totaling 107. Common sense dictates that a bus fleet of 280 would require approximately 20 spare busses which could not be used for regular runs as they are required for use as substitutes while other busses are out of service. The 29 activity busses, although titled in the Board, are owned by the individual schools and for limited use, 500 to 600 miles annually (Tr. 1043, July 15, 1970). Delivery of

the capital outlay burden of acquiring busses is merely postponed to another day. The judge minimizes the cost and problems of reconditioning these obsolete busses and ignores the lack of wisdom of using them in congested traffic.

The district judge completely discounts other increased costs occasioned by an extensive expansion of the System's bus fleet (1218a). For example, the costs of additional supervisory, mechanical and clerical personnel; of additional drivers (the expense being greatly increased to the extent adults are used); of additional service and gasoline trucks and other equipment; of improving and constructing bus parking areas for loading and unloading children where insufficient or non-existent; of new and improved rights of way for safe and efficient circulation to, from and within school grounds (R. Ex. 47, 49-53, 65-68; 853a; P. Ex. 15).

In finding No. 3 of the August 3, 1970 order, the district court implies that desegregation will close the gap in the academic performance of the blacks. The test results of this System disclose that the improvement is slight.

Popular attitudes, which are apparently shared by the district court, are that desegregation eliminates or nearly eliminates the disparity of educational achievement between black and white children. Results of desegregation are material on the question of reasonableness but the district court's comparisons are meaningless in this regard. The Coleman Report makes a general finding that desegregation *tends* to hold that blacks advance without retarding the whites. Achievement statistics compiled by the Board relating to the performance of black students attending schools which have been desegregated since 1965 reflect that the improvement of the black students is indeed slight. For example, elementary schools which have been so dese-

---

busses subsequent to the last hearings created the 30 used bus category, busses which are 14 to 15 years old. The 28 new busses were clearly scheduled for future delivery. This example is cited as an indication of the district court's predisposition to downgrade Board actions and representations.

gregated (Cornelius, Huntersville and Davidson) found that their black third-grade students performed on an average school level of second grade, first month, whereas predominantely black schools (First Ward, Irwin Avenue and Amay James) found that their third-grade black students performed at an average school level of first grade, ninth month, or a grade differential of one school month. Black students attending those schools at the sixth grade level performed at an average school level of fourth grade, third month at the desegregated schools; and third grade, ninth month at the predominantely black schools, or a difference of three school months improvement experienced by the blacks attending desegregated schools for a period of six years. In making these comparisons, the Board acknowledges that the sampling is small and that the performance of individual black students in some cases substantially exceeds the performance of the group, and conversely, other black students do not perform as well as the group. The primary purpose of the Board in reporting this information was to disclose to the district court that educators and courts must rely on other means to bring about educational equivalence. In determining priorities to bring about this equivalence, the courts are ill-fitted to adjudge the various techniques, including the very expensive and disruptive technique of long distance bussing. Determination of such priorities should be left with the educators, who after having made extensive efforts at desegregation, should be permitted judgments based on sound educational consideration. (R. Ex. 64, July 15, 1970).

In an attempt to justify findings that bussing is a desirable and safe practice, the court (Findings Nos. 2, 4, 6, 13 and 32 of August 3 Order) refers to the present transportation of elementary youngsters and of kindergarten children. This observation is irrelevant to the question of how much of such bussing should reasonably be required or permitted under the circumstances existing in the Charlotte-Mecklenburg School System. The implication of the trial judge's findings are at odds with the conclusions of the educators:

Bussing of elementary children away from their neighborhoods is educationally unsound and should be minimized, not increased; the school day of young children should be shortened and not lengthened to accommodate bus schedules; unattended immature children at bus pickup points is neither desirable nor safe; staggered schedules and multiple pickups should be minimized; bus transportation interferes with after-school activities which are an important part of the educational process; bussing of young children away from their neighboring schools dilutes the interchange between home and school which is most important at the elementary level. Transportation should be built around education, rather than make education serve transportation. Dr. Self stated the matter succinctly (Tr. 138, July 15, 1970):

> [O]ur computations have assumed that we would begin with the concept that the transportation system serves the educational program. And instead of operating our schools in such a way as to accommodate a bus fleet, we'd like to try to have the bus fleet serve the schools.

In submitting its estimates, the School Board readily acknowledged that if savings could be realized through educationally sound staggering of school schedules, the use of busses for multiple trips, a reasonable and safe degree of overloading and other economies it would do so.

The foregoing are recited as typical examples of the treatment that was accorded by the trial judge to the evidence of the School Board regarding the practicability and desirability of the massive bussing occasioned by the court approved Finger plan. The district court's findings clearly show its unreasonable view of the Rule of Reason.

D. THE HEW ELEMENTARY PLAN IS EDUCATIONALLY UNSOUND, REQUIRES RACIAL BALANCING, FOSTERS RESEGREGATION AND IS UNREASONABLE.

The HEW elementary plan was built upon the restructured lines of the Board plan which were used to form seven different clusters within each of which 3 or 4 elementary schools were grouped together. Each school within a cluster serves one, two or three grades. The clusters proposed by HEW are shown on Map No. 4. The HEW plan had the dubious distinction of being shot down in flames by the district court, Dr. Finger, the school staff, the Board majority and the Board minority—by everyone except the HEW representatives.

The trial court's August 3 Order (Pets.' Br. A28) outlines its objections to the plan. In rejecting the plan we agree that the trial judge was right—but for the wrong reasons. The district court's complaints are primarily based on the failure of the HEW plan to do a complete job of racial balancing.

The Board's rejection of the HEW plan was prompted by a variety of practical and educational reasons. The plan requires the bussing of about as many children as do the Finger and Minority plans (R. Ex. 47, Tr. 136). In terms of what is accomplished by the plan, the transportation costs are prohibitive (R. Ex. 47, 50, 52 and 61a).

The proposed grade structure which in 4 of the 7 proposed clusters would require children to attend 4 different schools during the course of their elementary education, was severely criticized as being educationally unsound (Tr. 24, 112, 265), imposing a rigidity that would effectively preclude experimentation with programs of ungraded classes (Tr. 24-27, 99) and would necessitate a complete change in teacher assignments (Tr. 110). The head of the HEW team admitted that aside from desegregation he would not recommend this organization of the elementary schools (P. Ex. 4, p. 68). The proposed grade structure unnecessarily increases transportation requirements (Finger, Tr. 228, 233).

Four of the 7 HEW clusters result in a 50-57% black enrollment, a condition that promises resegregation (Tr. 30, 100, 112, 229). The cluster arrangement brings together a predominately black school and several other schools which were already desegregated (Tr. 31-34, 111, 230, 267). It overpopulates some schools and underpopulates others, compounding the system's housing problem (Tr. 30).

As stated by Dr. Finger (Tr. 267), the HEW plan has little to recommend it. We agree.

E. THE ELEMENTARY PLAN OF THE BOARD MINORITY IS INCOMPLETE AND UNLAWFULLY EXCEEDS CONSTITUTIONAL REQUIREMENTS BY REQUIRING COMPLETE RACIAL BALANCING OF EVERY ELEMENTARY SCHOOL AND THE BUSSING TO IMPLEMENT IT. THE DISTRICT COURT ERRED IN APPROVING THAT PLAN AS A REASONABLE ALTERNATIVE.

The elementary plan was developed by a 4-member minority of the School Board. In his August 3 Order the trial judge approved the Minority plan as a reasonable alternative available for implementation by the Board. This plan was rejected by the Board.

The plan groups all of the 72 elementary schools within 18 separate clusters, many of which are far removed from each other and all of which occasion massive dislocation of elementary children. This Court's attention is invited to Map No. 5 which gives a clear picture of what this plan does to the elementary schools of the Charlotte-Mecklenburg System.

The authors of the plan acknowledge that its purpose is to racially balance the 72 elementary schools of the system. The plan is educationally unsound (Tr. 68, 174). In its various clusters the Minority plan includes schools that are already desegregated (Tr. 180-181, 297).

A random selection for the assignment of children is required within the clusters by the use of a complicated lottery system (Tr. 69, 118). The plan would occasion great administrative difficulties and would involve the problem of selecting children from year to year and could require elementary children of the same family to attend different schools (Tr. 120).

The plan will require the bussing of about the same number of children as would be transported under the Finger and HEW plans (August 3 Order). The burden of this amount of transportation had been declared by the Fourth Circuit, which accepted the district court's discounted estimates, to be too onerous and hence unreasonable with reference to the Finger plan. The transportation system required to implement the plan would be complex and cumbersome and would involve the mass movement of children within the congested areas of the city (Tr. 225, 239). Both Dr. Finger and the Superintendent observed that the Minority plan involved very long-distance bussing for a large number of children (Tr. 265) and could not be implemented without a heavy network of transportation (Tr. 119). Both Dr. Finger and the Superintendent agreed that education should be controlled by the educators rather than by a transportation system (Tr. 138, 303).[40]

The plan would require the closing of Double Oaks School in spite of the fact that the schools of the system are presently overcrowded with a 12% overcapacity.

The Board's objections to the Minority plan include all of the exceptions which it has to the court-approved Finger plan discussed elsewhere in this brief—as well as those peculiar to the Minority proposal. The racial balancing that this plan envisions is 100%. Every one of the 72 elementary schools are involved in this complete reshuffling to achieve the 70/30 racial mix of each student body. In spite of the

[40]This is a rather remarkable concession on the part of Dr. Finger, whose own plan occasions massive cross and satellite bussing of children through the most congested parts of the City.

weaknesses, defects, costs and disruptions of this plan that were pointed out by both the School staff and the court's consultant, Dr. Finger, the trial judge found it to be reasonable. This conclusion is unwarranted and underscores once again that racial balancing is the basic, but erroneous, precept which undergirds this and every other order of the district court.

F. THE EARLIER DRAFT OF THE FINGER ELEMENTARY PLAN IS INCOMPLETE AND UNLAWFULLY EXCEEDS CONSTITUTIONAL REQUIREMENTS BY REQUIRING RACIAL BALANCING. THE DISTRICT COURT ERRED IN APPROVING THAT PLAN AS A REASONABLE ALTERNATIVE.

This draft of Dr. Finger is illustrated by Plaintiff's Exhibit 10. At the hearings preceding the August 3 Order, only a minimal amount of attention was accorded this proposal which was prepared by Dr. Finger in the early days of his appointment as court consultant. It had been abandoned in favor of the one which the consultant evolved by the use of the restructured lines of the Board plan and which was adopted by the judge's February 5 Order.

Dr. Finger himself did not recommend this early draft (Tr. 263). He described it as an incomplete plan that he prepared only "to illustrate what some of the elements are that enter into the problem of determining how a desegregation plan should be prepared" (Tr. 263). Dr. Finger pointed out that the plan has a "complex grade structure" (Tr. 258). It will require transporting about the same number of elementary children as the court-approved February 5 and Board Minority plans (August 3, Order).

The purpose of this draft of Dr. Finger was to achieve racial balancing of elementary schools, which the court consultant admitted (981a). It is not a reasonable alternative.

G. IN ASSESSING THE EFFECTIVENESS OF A DESEGREGATION PLAN, A RULE OF REASON REQUIRES THAT DUE CONSIDERATION SHOULD BE ACCORDED SCHOOL BOARDS AND ADMINISTRATORS IN CONTROLLING THE DESTINY OF PUBLIC EDUCATION.

President Nixon defined the role of a school board:

> In devising local compliance plans, primary weight should be given to the considered judgment of local school boards—provided they act in good faith, and within Constitutional limits. President Nixon's March 24, 1970, policy statement entitled *SCHOOL DESEGREGATION: A Free and Open Society, supra.*

If it were otherwise, the admonition of Judge Coleman in *Bivins v. Bibb County Board of Education,* 419 F.2d. 1211 (5th Cir. 1970), is pertinent:

> Some of these days, the Courts are going to have . . . to free themselves of their tragic failures in the role of school administrators and get back to their primary functions.

The Charlotte-Mecklenburg School Board is an elective body and, as such, is charged with the responsibility of exercising its own judgment regarding the needs of the system and the best interest of its children.

It is the School Board's duty to determine whether the dollars allocated to it by other elective officials (the Board of County Commissioners for Mecklenburg County) for the education of our children shall be spent for *books or buses.* It is for the Board to determine whether the existing transportation system shall be expanded or contracted, whether it is educationally good or bad to stagger the opening and closing of schools at any particular grade level, whether after school activities will suffer, whether inconveniences and disruption to children and parents are justifiable, whether overloaded buses are acceptable or safe, whether the time of children in transit is justifiable and how the host of other value judgments and policies shall be made to administer

effectively a large complex metropolitan school system charged with awesome responsibility of providing 84,500 school children in 103 schools with a quality education.

Books, bricks and buses (and all that they imply) are part of the tools to be used in the educational process. How and when these tools are used must be left to the good faith decision of local school boards or the boards should be disestablished and the administration of school systems should be turned over the courts.

In his findings of fact, the trial court justified his rulings requiring extensive and disruptive transportation by calling attention to the extent that the system already was involved in burdensome bussing. This rationale is unsound. The reasonableness of a desegregation plan should not be measured by the worst aspects of a school program.

The fact that last year the Charlotte-Mecklenburg school system transported 23,000 children with 280 buses, the opening and closing of some of its schools were staggered, in some schools after-school activities were impaired, some school buses travelled over congested traffic arteries, some elementary children waited for the school bus by the side of the road at 6:30 in the morning and others got home at 5:00 in the afternoon, some buses were overloaded and some children had to stand up, some buses were unsound and should have been replaced—is no answer to the administrative and educational problem of how much of this is desirable, tolerable or necessary in a system as large and complex as Charlotte-Mecklenburg. A court mandate that edicts racial balancing and forced bussing supplants the value judgments of the elected school board and the educators on its administrative staff. An overdose of judicial paternalism and control will ultimately sign the death warrant for public education.

CONCLUSION

For the foregoing reasons, it is respectfully submitted that:

1. The judgment of the Fourth Circuit be affirmed only in so far as it vacated the judgment of the district court.

2. The judgment of the district court, including its Orders of August 3 and August 7, 1970, be reversed; and

3. This matter be remanded to the district court with instructions to approve the implementation of the February 2, 1970, plan of the School Board as one complying with the Constitutional requirements for a unitary school system.

SUPREME COURT OF THE UNITED STATES

Syllabus

SWANN ET AL. *v.* CHARLOTTE-MECKLENBURG BOARD OF EDUCATION ET AL.

CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE FOURTH CIRCUIT

No. 281. Argued October 12, 1970—Decided April 20, 1971*

The Charlotte-Mecklenburg school system, which includes the city of Charlotte, North Carolina, had more than 84,000 students in 107 schools in the 1968–1969 school year. Approximately 29% (24,000) of the pupils were Negro, about 14,000 of whom attended 21 schools that were at least 99% Negro. This resulted from a desegregation plan approved by the District Court in 1965, at the commencement of this litigation. In 1968 petitioner Swann moved for further relief based on *Green* v. *County School Board*, 391 U. S. 430, which required school boards to "come forward with a plan that promises realistically to work . . . *now* . . . until it is clear that state-imposed segregation has been completely removed." The District Court ordered the school board in April 1969 to provide a plan for faculty and student desegregation. Finding the board's submission unsatisfactory, the District Court appointed an expert to submit a desegregation plan. In February 1970, the expert and the board presented plans, and the court adopted the board's plan, as modified, for the junior and senior high schools, and the expert's proposed plan for the elementary schools. The Court of Appeals affirmed the District Court's order as to faculty desegregation and the secondary school plans, but vacated the order respecting elementary schools, fearing that the provisions for pairing and grouping of elementary schools would unreasonably burden the pupils and the board. The case was remanded to the District Court for reconsideration and submission of further plans. This Court granted certiorari and di-

*Together with No. 349, *Charlotte-Mecklenburg Board of Education et al.* v. *Swann et al.*, also on certiorari to the same court.

Syllabus

rected reinstatement of the District Court's order pending further proceedings in that court. On remand the District Court received two new plans, and ordered the board to adopt a plan, or the expert's plan would remain in effect. After the board "acquiesced" in the expert's plan, the District Court directed that it remain in effect. *Held:*

1. Today's objective is to eliminate from the public schools all vestiges of state-imposed segregation that was held violative of equal protection guarantees by *Brown* v. *Board of Education*, 347 U. S. 483, in 1954. Pp. 10–11.

2. In default by the school authorities of their affirmative obligation to proffer acceptable remedies, the district courts have broad power to fashion remedies that will assure unitary school systems. Pp. 11–12.

3. Title IV of the Civil Rights Act of 1964 does not restrict or withdraw from the federal courts their historic equitable remedial powers. The proviso in 42 U. S. C. § 2000c–6 was designed simply to foreclose any interpretation of the Act as expanding the existing powers of the federal courts to enforce the Equal Protection Clause. Pp. 12–13.

4. Policy and practice with regard to faculty, staff, transportation, extracurricular activities, and facilities are among the most important indicia of a segregated system, and the first remedial responsibility of school authorities is to eliminate invidious racial distinctions in those respects. Normal administrative practice should then produce schools of like quality, facilities, and staffs. P. 14.

5. The Constitution does not prohibit district courts from using their equity power to order assignment of teachers to achieve a particular degree of faculty desegregation. *United States* v. *Montgomery County Board of Education*, 395 U. S. 225, was properly followed by the lower courts in this case. Pp. 14–16.

6. In devising remedies to eliminate legally imposed segregation, local authorities and district courts must see to it that future school construction and abandonment are not used and do not serve to perpetuate or re-establish a dual system. Pp. 16–17.

7. Four problem areas exist on the issue of student assignment:

(1) *Racial quotas.* The constitutional command to desegregate schools does not mean that every school in the community must always reflect the racial composition of the system as a whole; here the District Court's very limited use of the racial ratio—not as an inflexible requirement, but as a starting point

Syllabus

in shaping a remedy—was within its equitable discretion. Pp. 18–21.

(2) *One-race schools.* While the existence of a small number of one-race, or virtually one-race, schools does not in itself denote a system that still practices segregation by law, the court should scrutinize such schools and require the school authorities to satisfy the court that the racial composition does not result from present or past discriminatory action on their part. Pp. 21–22.

An optional majority-to-minority transfer provision has long been recognized as a useful part of a desegregation plan, and to be effective such arrangement must provide the transferring student free transportation and available space in the school to which he desires to move. P. 22.

(3) *Attendance zones.* The remedial altering of attendance zones is not, as an interim corrective measure, beyond the remedial powers of a district court. A student assignment plan is not acceptable merely because it appears to be neutral, for such a plan may fail to counteract the continuing effects of past school segregation. The pairing and grouping of noncontiguous zones is a permissible tool; judicial steps going beyond contiguous zones should be examined in light of the objectives to be sought. No rigid rules can be laid down to govern conditions in different localities. Pp. 23–25.

(4) *Transportation.* The District Court's conclusion that assignment of children to the school nearest their home serving their grade would not effectively dismantle the dual school system is supported by the record, and the remedial technique of requiring bus transportation as a tool of school desegregation was within that court's power to provide equitable relief. An objection to transportation of students may have validity when the time or distance of travel is so great as to risk either the health of the children or significantly impinge on the educational process; limits on travel time will vary with many factors, but probably with none more than the age of the students. Pp. 25–27.

8. Neither school authorities nor district courts are constitutionally required to make year-by-year adjustments of the racial composition of student bodies once a unitary system has been achieved. Pp. 27–28.

431 F. 2d 138, affirmed as to those parts in which it affirmed the District Court's judgment. The District Court's order of August 7, 1970, is also affirmed.

BURGER, C. J., delivered the opinion for a unanimous Court.

NOTICE: This opinion is subject to formal revision before publication in the preliminary print of the United States Reports. Readers are requested to notify the Reporter of Decisions, Supreme Court of the United States, Washington, D.C. 20543, of any typographical or other formal errors, in order that corrections may be made before the preliminary print goes to press.

SUPREME COURT OF THE UNITED STATES

Nos. 281 AND 349.—OCTOBER TERM, 1970

James E. Swann et al., Petitioners,
281 *v.*
Charlotte-Mecklenburg Board of Education et al.

Charlotte-Mecklenburg Board of Education et al., Petitioners,
349 *v.*
James E. Swann et al.

On Writs of Certiorari to the United States Court of Appeals for the Fourth Circuit.

[April 20, 1971]

MR. CHIEF JUSTICE BURGER delivered the opinion of the Court.

We granted certiorari in this case to review important issues as to the duties of school authorities and the scope of powers of federal courts under this Court's mandates to eliminate racially separate public schools established and maintained by state action. *Brown* v. *Board of Education*, 347 U. S. 483 (1954).

This case and those argued with it [1] arose in states having a long history of maintaining two sets of schools in a single school system deliberately operated to carry out a

[1] *McDaniel* v. *Barresi*, No. 420; *Davis* v. *Board of School Commissioners of Mobile County*, No. 436; *Moore* v. *Charlotte-Mecklenburg Board of Education*, No. 444; *North Carolina State Board of Education* v. *Swann*, No. 498. For purposes of this opinion the cross-petitions in Nos. 281 and 349 are treated as a single case and will be referred to as "this case."

governmental policy to separate pupils in schools solely on the basis of race. That was what *Brown* v. *Board of Education* was all about. These cases present us with the problem of defining in more precise terms than heretofore the scope of the duty of school authorities and district courts in implementing *Brown I* and the mandate to eliminate dual systems and establish unitary systems at once. Meanwhile district courts and courts of appeals have struggled in hundreds of cases with a multitude and variety of problems under this Court's general directive. Understandably, in an area of evolving remedies, those courts had to improvise and experiment without detailed or specific guidelines. This Court, in *Brown I*, appropriately dealt with the large constitutional principles; other federal courts had to grapple with the flinty, intractable realities of day-to-day implementation of those constitutional commands. Their efforts, of necessity, embraced a process of "trial and error," and our effort to formulate guidelines must take into account their experience.

I

The Charlotte-Mecklenburg school system, the 43d largest in the Nation, encompasses the city of Charlotte and surrounding Mecklenburg County, North Carolina. The area is large—550 square miles—spanning roughly 22 miles east-west and 36 miles north-south. During the 1968–1969 school year the system served more than 84,000 pupils in 107 schools. Approximately 71% of the pupils were found to be white and 29% Negro. As of June 1969 there were approximately 24,000 Negro students in the system, of whom 21,000 attended schools within the city of Charlotte. Two-thirds of those 21,000—approximately 14,000 Negro students—attended 21 schools which were either totally Negro or more than 99% Negro.

This situation came about under a desegregation plan approved by the District Court at the commencement of the present litigation in 1965, 243 F. Supp. 667 (WDNC), aff'd, 369 F. 2d 29 (CA4 1966), based upon geographic zoning with a free transfer provision. The present proceedings were initiated in September 1968 by Petitioner Swann's motion for further relief based on *Green* v. *County School Board*, 391 U. S. 430 (1968), and its companion cases.[2] All parties now agree that in 1969 the system fell short of achieving the unitary school system that those cases require.

The District Court held numerous hearings and received voluminous evidence. In addition to finding certain actions of the school board to be discriminatory, the court also found that residential patterns in the city and county resulted in part from federal, state, and local government action other than school board decisions. School board action based on these patterns, for example, by locating schools in Negro residential areas and fixing the size of the schools to accommodate the needs of immediate neighborhoods, resulted in segregated education. These findings were subsequently accepted by the Court of Appeals.

In April 1969 the District Court ordered the school board to come forward with a plan for both faculty and student desegregation. Proposed plans were accepted by the court in June and August 1969 on an interim basis only, and the board was ordered to file a third plan by November 1969. In November the board moved for an extension of time until February 1970, but when that was denied the board submitted a partially completed plan. In December 1969 the District Court held that the board's submission was unacceptable and appointed an expert in education administration, Dr. John Finger,

---

[2] *Raney* v. *Board of Education*, 391 U. S. 443 (1968), and *Monroe* v. *Board of Commissioners*, 391 U. S. 450 (1968).

to prepare a desegregation plan. Thereafter in February 1970, the District Court was presented with two alternative pupil assignment plans—the finalized "board plan" and the "Finger plan."

The Board Plan. As finally submitted, the school board plan closed seven schools and reassigned their pupils. It restructured school attendance zones to achieve greater racial balance but maintained existing grade structures and rejected techniques such as pairing and clustering as part of a desegregation effort. The plan created a single athletic league, eliminated the previously racial basis of the school bus system, provided racially mixed faculties and administrative staffs, and modified its free transfer plan into an optional majority-to-minority transfer system.

The board plan proposed substantial assignment of Negroes to nine of the system's 10 high schools, producing 17% to 36% Negro population in each. The projected Negro attendance at the 10th school, Independence, was 2%. The proposed attendance zones for the high schools were typically shaped like wedges of a pie, extending outward from the center of the city to the suburban and rural areas of the county in order to afford residents of the center city area access to outlying schools.

As for junior high schools, the board plan rezoned the 21 school areas so that in 20 the Negro attendance would range from 0% to 38%. The other school, located in the heart of the Negro residential area, was left with an enrollment of 90% Negro.

The board plan with respect to elementary schools relied entirely upon gerrymandering of geographic zones. More than half of the Negro elementary pupils were left in nine schools that were 86% to 100% Negro; approximately half of the white elementary pupils were assigned to schools 86% to 100% white.

The Finger Plan. The plan submitted by the court-appointed expert, Dr. Finger, adopted the school board

zoning plan for senior high schools with one modification: it required that an additional 300 Negro students be transported from the Negro residential area of the city to the nearly all-white Independence High School.

The Finger plan for the junior high schools employed much of the rezoning plan of the board, combined with the creation of nine "satellite" zones.[3] Under the satellite plan, inner-city Negro students were assigned by attendance zones to nine outlying predominately white junior high schools, thereby substantially desegregating every junior high school in the system.

The Finger plan departed from the board plan chiefly in its handling of the system's 76 elementary schools. Rather than relying solely upon geographic zoning, Dr. Finger proposed use of zoning, pairing, and grouping techniques, with the result that student bodies throughout the system would range from 9% to 38% Negro.[4]

The District Court described the plan thus:

> "Like the Board plan, the Finger plan does as much by rezoning school attendance lines as can reasonably be accomplished. However, unlike the board plan, it does not stop there. It goes further and desegregates all the rest of the elementary schools by the technique of grouping two or three outlying schools

[3] A "satellite zone" is an area which is not contiguous with the main attendance zone surrounding the school.

[4] In its opinion and order of December 1, 1969, later incorporated in the order appointing Dr. Finger as consultant, the District Court stated:

"Fixed ratios of pupils in particular schools will not be set. If the board in one of its three tries had presented a plan for desegregation, the court would have sought ways to approve variations in pupil ratios. In default of such a plan from the school board, the court will start with the thought . . . that efforts should be made to reach a 71–29 ratio in the various schools so that there will be no basis for contending that one school is racially different from the others, but to understand that variations from that norm may be unavoidable."

> with one black inner city school; by transporting black students from grades one through four to the outlying white schools; and by transporting white students from the fifth and sixth grades from the outlying white schools to the inner city black school."

Under the Finger plan, nine inner-city Negro schools were grouped in this manner with 24 suburban white schools.

On February 5, 1970, the District Court adopted the board plan, as modified by Dr. Finger, for the junior and senior high schools. The court rejected the board elementary school plan and adopted the Finger plan as presented. Implementation was partially stayed by the Court of Appeals for the Fourth Circuit on March 5, and this Court declined to disturb the Fourth Circuit's order, 397 U. S. 978 (1970).

On appeal the Court of Appeals affirmed the District Court's order as to faculty desegregation and the secondary school plans, but vacated the order respecting elementary schools. While agreeing that the District Court properly disapproved the board plan concerning these schools, the Court of Appeals feared that the pairing and grouping of elementary schools would place an unreasonable burden on the board and the system's pupils. The case was remanded to the District Court for reconsideration and submission of further plans. This Court granted certiorari, 399 U. S. 926, and directed reinstatement of the District Court's order pending further proceedings in that court.

On remand the District Court received two new plans for the elementary schools: a plan prepared by the United States Department of Health, Education, and Welfare (the HEW plan) based on contiguous grouping and zoning of schools, and a plan prepared by four members of the nine-member school board (the minority plan) achieving substantially the same results as the Finger

plan but apparently with slightly less transportation. A majority of the school board declined to amend its proposal. After a lengthy evidentiary hearing the District Court concluded that its own plan (the Finger plan), the minority plan, and an earlier draft of the Finger plan were all reasonable and acceptable. It directed the board to adopt one of the three or in the alternative to come forward with a new, equally effective plan of its own; the court ordered that the Finger plan would remain in effect in the event the school board declined to adopt a new plan. On August 7, the board indicated it would "acquiesce" in the Finger plan, reiterating its view that the plan was unreasonable. The District Court, by order dated August 7, 1970, directed that the Finger plan remain in effect.

II

Nearly 17 years ago this Court held, in explicit terms, that state-imposed segregation by race in public schools denies equal protection of the laws. At no time has the Court deviated in the slightest degree from that holding or its constitutional underpinnings. None of the parties before us challenges the Court's decision of May 17, 1954, that

> "in the field of public education the doctrine of 'separate but equal' has no place. Separate educational facilities are inherently unequal. Therefore, we hold that the plaintiffs and others similarly situated . . . are, by reason of the segregation complained of, deprived of the equal protection of the laws guaranteed by the Fourteenth Amendment. . . .
>
> "Because these are class actions, because of the wide applicability of this decision, and because of the great variety of local conditions, the formulation of decrees in these cases presents problems of considerable complexity." *Brown* v. *Board of Education, supra,* at 495.

None of the parties before us questions the Court's 1955 holding in *Brown II*, that

> "[s]chool authorites have the primary responsibility for elucidating, assessing, and solving these problems; courts will have to consider whether the action of school authorities constitutes good faith implementation of the governing constitutional principles. Because of their proximity to local conditions and the possible need for further hearings, the courts which originally heard these cases can best perform this judicial appraisal. Accordingly, we believe it appropriate to remand the cases to those courts.
>
> "In fashioning and effectuating the decrees, the courts will be guided by equitable principles. Traditionally, equity has been characterized by a practical flexibilty in shaping its remedies and by a facility for adjusting and reconciling public and private needs. These cases call for the exercise of these traditional attributes of equity power. At stake is the personal interest of the plaintiffs in admission to public schools as soon as practicable on a nondiscriminatory basis. To effectuate this interest may call for elimination of a variety of obstacles in making the transition to school systems operated in accordance with the constitutional principles set forth in our May 17, 1954, decision. Courts of equity may properly take into account the public interest in the elimination of such obstacles in a systematic and effective manner. But it should go without saying that the vitality of these constitutional principles cannot be allowed to yield simply because of disagreement with them." *Brown* v. *Board of Education*, 349 U. S. 294, 299–300 (1955).

Over the 15 years since *Brown II*, many difficulties were encountered in implementation of the basic constitutional requirement that the State not discriminate

between public school children on the basis of their race. Nothing in our national experience prior to 1955 prepared anyone for dealing with changes and adjustments of the magnitude and complexity encountered since then. Deliberate resistance of some to the Court's mandates has impeded the good-faith efforts of others to bring school systems into compliance. The detail and nature of these dilatory tactics have been noted frequently by this Court and other courts.

By the time the Court considered *Green* v. *County School Board*, 391 U. S. 430, in 1968, very little progress had been made in many areas where dual school systems had historically been maintained by operation of state laws. In *Green*, the Court was confronted with a record of a freedom-of-choice program that the District Court had found to operate in fact to preserve a dual system more than a decade after *Brown II*. While acknowledging that a freedom-of-choice concept could be a valid remedial measure in some circumstances, its failure to be effective in *Green* required that

> "The burden on a school board today is to come forward with a plan that promises realistically to work . . . *now* . . . until it is clear that state-imposed segregation has been completely removed." *Green*, at 439.

This was plain language, yet the 1969 Term of Court brought fresh evidence of the dilatory tactics of many school authorities. *Alexander* v. *Holmes County Board of Education*, 396 U. S. 19, restated the basic obligation asserted in *Griffin* v. *School Board*, 377 U. S. 218, 234 (1964), and *Green*, *supra*, that the remedy must be implemented *forthwith*.

The problems encountered by the district courts and courts of appeals make plain that we should now try to amplify guidelines, however incomplete and imperfect,

for the assistance of school authorities and courts.[5] The failure of local authorities to meet their constitutional obligations aggravated the massive problem of converting from the state-enforced discrimination of racially separate school systems. This process has been rendered more difficult by changes since 1954 in the structure and patterns of communities, the growth of student population,[6] movement of families, and other changes, some of which had marked impact on school planning, sometimes neutralizing or negating remedial action before it was fully implemented. Rural areas accustomed for half a century to the consolidated school systems implemented by bus transportation could make adjustments more readily than metropolitan areas with dense and shifting population, numerous schools, congested and complex traffic patterns.

III

The objective today remains to eliminate from the public schools all vestiges of state-imposed segregation. Segregation was the evil struck down by *Brown I* as contrary to the equal protection guarantees of the Constitution. That was the violation sought to be corrected by the remedial measures of *Brown II*. That was the basis for the holding in *Green* that school authorities are "clearly charged with the affirmative duty to take whatever steps might be necessary to convert to a unitary system in which racial discrimination would be eliminated root and branch." 391 U. S., at 437–438.

---

[5] The necessity for this is suggested by the situation in the Fifth Circuit where 166 appeals in school desegregation cases were heard between December 2, 1969, and September 24, 1970.

[6] Elementary public school population (grades 1–6) grew from 17,447,000 in 1954 to 23,103,000 in 1969; secondary school population grew from 11,183,000 in 1954 to 20,775,000 in 1969. Digest of Educational Statistics, 1964 ed. 1, 6, Office of Education Publication # 10024–64; Digest of Educational Statistics, 1970 ed. Table 28, Office of Education Publication # 10024–70.

If school authorities fail in their affirmative obligations under these holdings, judicial authority may be invoked. Once a right and a violation have been shown, the scope of a district court's equitable powers to remedy past wrongs is broad, for breadth and flexibility are inherent in equitable remedies.

> "The essence of equity jurisdiction has been the power of the Chancellor to do equity and to mould each decree to the necessities of the particular case. Flexibility rather than rigidity has distinguished it. The qualities of mercy and practicality have made equity the instrument for nice adjustment and reconciliation between the public interest and private needs as well as between competing private claims." *Hecht Co.* v. *Bowles*, 321 U. S. 329–330 (1944), cited in *Brown II*, *supra*, at 300.

This allocation of responsibility once made, the Court attempted from time to time to provide some guidelines for the exercise of the district judge's discretion and for the reviewing function of the courts of appeals. However, a school desegregation case does not differ fundamentally from other cases involving the framing of equitable remedies to repair the denial of a constitutional right. The task is to correct, by a balancing of the individual and collective interests, the condition that offends the Constitution.

In seeking to define even in broad and general terms how far this remedial power extends it is important to remember that judicial powers may be exercised only on the basis of a constitutional violation. Remedial judicial authority does not put judges automatically in the shoes of school authorities whose powers are plenary. Judicial authority enters only when local authority defaults.

School authorities are traditionally charged with broad power to formulate and implement educational policy and might well conclude, for example, that in order to prepare students to live in a pluralistic society each school should have a prescribed ratio of Negro to white students reflecting the proportion for the district as a whole. To do this as an educational policy is within the broad discretionary powers of school authorities; absent a finding of a constitutional violation, however, that would not be within the authority of a federal court. As with any equity case, the nature of the violation determines the scope of the remedy. In default by the school authorities of their obligation to proffer acceptable remedies, a district court has broad power to fashion a remedy that will assure a unitary school system.

The school authorities argue that the equity powers of federal district courts have been limited by Title IV of the Civil Rights Act of 1964, 42 U. S. C. § 2000c. The language and the history of Title IV shows that it was not enacted to limit but to define the role of the Federal Government in the implementation of the *Brown I* decision. It authorizes the Commissioner of Education to provide technical assistance to local boards in the preparation of desegregation plans, to arrange "training institutes" for school personnel involved in desegregation efforts, and to make grants directly to schools to ease the transition to unitary systems. It also authorizes the Attorney General, in specified circumstances, to initiate federal desegregation suits. Section 2000c (b) defines "desegregation" as it is used in Title IV:

> " 'Desegregation' means the assignment of students to public schools and within such schools without regard to their race, color, religion, or national origin, but 'desegregation' shall not mean the assignment of

students to public schools in order to overcome racial imbalance."

Section 2000c–6, authorizing the Attorney General to institute federal suits, contains the following proviso:

"nothing herein shall empower any official or court of the United States to issue any order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another or one school district to another in order to achieve such racial balance, or otherwise enlarge the existing power of the court to insure compliance with constitutional standards."

On their face, the sections quoted purport only to insure that the provisions of Title IV of the Civil Rights Act of 1964 will not be read as granting new powers. The proviso in § 2000c–6 is in terms designed to foreclose any interpretation of the Act as expanding the *existing* powers of federal courts to enforce the Equal Protection Clause. There is no suggestion of an intention to restrict those powers or withdraw from courts their historic equitable remedial powers. The legislative history of Title IV indicates that Congress was concerned that the Act might be read as creating a right of action under the Fourteenth Amendment in the situation of so-called "de facto segregation," where racial imbalance exists in the schools but with no showing that this was brought about by discriminatory action of state authorities. In short, there is nothing in the Act which provides us material assistance in answering the question of remedy for state-imposed segregation in violation of *Brown I*. The basis of our decision must be the prohibition of the Fourteenth Amendment that no State shall "deny to any person within its jurisdiction the equal protection of the laws."

IV

We turn now to the problem of defining with more particularity the responsibilities of school authorities in desegregating a state-enforced dual school system in light of the Equal Protection Clause. Although the several related cases before us are primarily concerned with problems of student assignment, it may be helpful to begin with a brief discussion of other aspects of the process.

In *Green*, we pointed out that existing policy and practice with regard to faculty, staff, transportation, extracurricular activities, and facilities were among the most important indicia of a segregated system. 391 U. S., at 435. Independent of student assignment, where it is possible to identify a "white school" or a "Negro school" simply by reference to the racial composition of teachers and staff, the quality of school buildings and equipment, or the organization of sports activities, a *prima facie* case of violation of substantive constitutional rights under the Equal Protection Clause is shown.

When a system has been dual in these respects, the first remedial responsibility of school authorities is to eliminate invidious racial distinctions. With respect to such matters as transportation, supporting personnel, and extracurricular activities, no more than this may be necessary. Similar corrective action must be taken with regard to the maintenance of buildings and the distribution of equipment. In these areas, normal administrative practice should produce schools of like quality, facilities, and staffs. Something more must be said, however, as to faculty assignment and new school construction.

In the companion *Davis* case, the Mobile school board has argued that the Constitution requires that teachers be assigned on a "color blind" basis. It also argues that

the Constitution prohibits district courts from using their equity power to order assignment of teachers to achieve a particular degree of faculty desegregation. We reject that contention.

In *United States* v. *Montgomery County Board of Education*, 395 U. S. 225 (1969), the District Court set as a goal a plan of faculty assignment in each school with a ratio of white to Negro faculty members substantially the same throughout the system. This order was predicated on the District Court finding that

> "The evidence does not reflect any real administrative problems involved in immediately desegregating the substitute teachers, the student teachers, the night school faculties, and in the evolvement of a really legally adequate program for the substantial desegregation of the faculties of all schools in the system commencing with the school year 1968–69." Quoted at 395 U. S., at 232.

The District Court in *Montgomery* then proceeded to set an initial ratio for the whole system of at least two Negro teachers out of each 12 in any given school. The Court of Appeals modified the order by eliminating what it regarded as "fixed mathematical ratios" of faculty and substituted an initial requirement of "substantially or approximately" a five-to-one ratio. With respect to the future, the Court of Appeals held that the numerical ratio should be eliminated and that compliance should not be tested solely by the achievement of specified proportions. *Id.*, at 234.

We reversed the Court of Appeals and restored the District Court's order in its entirety, holding that the order of the District Judge

> "was adopted in the spirit of this Court's opinion in *Green* . . . in that his plan 'promises realistically to

> work, and promises realistically to work *now*.' The modifications ordered by the panel of the Court of Appeals, while of course not intended to do so, would, we think, take from the order some of its capacity to expedite, by means of specific commands, the day when a completely unified, unitary, nondiscriminatory school system becomes a reality instead of a hope. . . . We also believe that under all the circumstances of this case we follow the original plan outlined in *Brown II* . . . by accepting the more specific and expeditious order of [District] Judge Johnson . . . ." 395 U. S., at 235–236 (emphasis in original).

The principles of *Montgomery* have been properly followed by the District Court and the Court of Appeals in this case.

The construction of new schools and the closing of old ones is one of the most important functions of local school authorities and also one of the most complex. They must decide questions of location and capacity in light of population growth, finances, land values, site availability, through an almost endless list of factors to be considered. The result of this will be a decision which, when combined with one technique or another of student assignment, will determine the racial composition of the student body in each school in the system. Over the long run, the consequences of the choices will be far reaching. People gravitate toward school facilities, just as schools are located in response to the needs of people. The location of schools may thus influence the patterns of residential development of a metropolitan area and have important impact on composition of inner city neighborhoods.

In the past, choices in this respect have been used as a potent weapon for creating or maintaining a state-segregated school system. In addition to the classic

pattern of building schools specifically intended for Negro or white students, school authorities have sometimes, since *Brown*, closed schools which appeared likely to become racially mixed through changes in neighborhood residential patterns. This was sometimes accompanied by building new schools in the areas of white suburban expansion farthest from Negro population centers in order to maintain the separation of the races with a minimum departure from the formal principles of "neighborhood zoning." Such a policy does more than simply influence the short-run composition of the student body of a new school. It may well promote segregated residential patterns which, when combined with "neighborhood zoning," further lock the school system into the mold of separation of the races. Upon a proper showing a district court may consider this in fashioning a remedy.

In ascertaining the existence of legally imposed school segregation, the existence of a pattern of school construction and abandonment is thus a factor of great weight. In devising remedies where legally imposed segregation has been established, it is the responsibility of local authorities and district courts to see to it that future school construction and abandonment is not used and does not serve to perpetuate or re-establish the dual system. When necessary, district courts should retain jurisdiction to assure that these responsibilities are carried out. Cf. *United States* v. *Board of Public Instruction*, 395 F. 2d 66 (CA5 1968); *Brewer* v. *School Board*, 397 F. 2d 37 (CA4 1968).

V

The central issue in this case is that of student assignment, and there are essentially four problem areas:

(1) to what extent racial balance or racial quotas may be used as an implement in a remedial order to correct a previously segregated system;

(2) whether every all-Negro and all-white school must be eliminated as an indispensable part of a remedial process of desegregation;

(3) what are the limits, if any, on the rearrangement of school districts and attendance zones, as a remedial measure; and

(4) what are the limits, if any, on the use of transportation facilities to correct state-enforced racial school segregation.

(1) *Racial Balances or Racial Quotas.*

The constant theme and thrust of every holding from *Brown I* to date is that state-enforced separation of races in public schools is discrimination that violates the Equal Protection Clause. The remedy commanded was to dismantle dual school systems.

We are concerned in these cases with the elimination of the discrimination inherent in the dual school systems, not with myriad factors of human existence which can cause discrimination in a multitude of ways on racial, religious, or ethnic grounds. The target of the cases from *Brown I* to the present was the dual school system. The elimination of racial discrimination in public schools is a large task and one that should not be retarded by efforts to achieve broader purposes lying beyond the jurisdiction of school authorities. One vehicle can carry only a limited amount of baggage. It would not serve the important objective of *Brown I* to seek to use school desegregation cases for purposes beyond their scope, although desegregation of schools ultimately will have impact on other forms of discrimination. We do not reach in this case the question whether a showing that school segregation is a consequence of other types of state action, without any discriminatory action by the school authorities, is a constitutional violation requiring

remedial action by a school desegregation decree. This case does not present that question and we therefore do not decide it.

Our objective in dealing with the issues presented by these cases is to see that school authorities exclude no pupil of a racial minority from any school, directly or indirectly, on account of race; it does not and cannot embrace all the problems of racial prejudice, even when those problems contribute to disproportionate racial concentrations in some schools.

In this case it is urged that the District Court has imposed a racial balance requirement of 71%–29% on individual schools. The fact that no such objective was actually achieved—and would appear to be impossible—tends to blunt that claim, yet in the opinion and order of the District Court of December 1, 1969, we find that court directing:

> "that efforts should be made to reach a 71–29 ratio in the various schools so that there will be no basis for contending that one school is racially different from the others . . . , that no school [should] be operated with an all-black or predominantly black student body, [and] that pupils of all grades [should] be assigned in such a way that as nearly as practicable the various schools at various grade levels have about the same proportion of black and white students."

The District Judge went on to acknowledge that variation "from that norm may be unavoidable." This contains intimations that the "norm" is a fixed mathematical racial balance reflecting the pupil constituency of the system. If we were to read the holding of the District Court to require, as a matter of substantive constitu-

tional right, any particular degree of racial balance or mixing, that approach would be disapproved and we would be obliged to reverse. The constitutional command to desegregate schools does not mean that every school in every community must always reflect the racial composition of the school system as a whole.

As the voluminous record in this case shows,[7] the predicate for the District Court's use of the 71%–29% ratio was twofold: first, its express finding, approved by the Court of Appeals and not challenged here, that a dual school system had been maintained by the school authorities at least until 1969; second, its finding, also approved by the Court of Appeals, that the school board had totally defaulted in its acknowledged duty to come forward with an acceptable plan of its own, notwithstanding the patient efforts of the District Judge who, on at least three occasions, urged the board to submit plans.[8] As the statement of facts shows, these findings are abundantly supported by the record. It was because of this total failure of the school board that the District Court was obliged to turn to other qualified sources, and Dr.

[7] It must be remembered that the District Court entered nearly a score of orders, numerous sets of findings and for the most part each was accompanied by a memorandum opinion. Considering the pressure under which the court was obliged to operate we would not expect that all inconsistencies and apparent inconsistencies could be avoided. Our review, of course, is on the orders of February 5, 1970, as amended, and August 7, 1970.

[8] The final board plan left 10 schools 86% to 100% Negro and yet categorically rejected the techniques of pairing and clustering as part of the desegregation effort. As discussed below, the Charlotte board was under an obligation to exercise every reasonable effort to remedy the violation, once it was identified, and the suggested techniques are permissible remedial devices. Additionally, as noted by the District Court and Court of Appeals, the board plan refused to assign white students to any school unless the student population of that school was at least 60% white. This was an arbitrary limitation negating reasonable remedial steps.

Finger was designated to assist the District Court to do what the board should have done.

We see therefore that the use made of mathematical ratios was no more than a starting point in the process of shaping a remedy, rather than an inflexible requirement. From that starting point the District Court proceeded to frame a decree that was within its discretionary powers, an equitable remedy for the particular circumstances.[9] As we said in *Green*, a school authority's remedial plan or a district court's remedial decree is to be judged by its effectiveness. Awareness of the racial composition of the whole school system is likely to be a useful starting point in shaping a remedy to correct past constitutional violations. In sum, the very limited use made of mathematical ratios was within the equitable remedial discretion of the District Court.

(2) *One-Race Schools.*

The record in this case reveals the familiar phenomenon that in metropolitan areas minority groups are often found concentrated in one part of the city. In some circumstances certain schools may remain all or largely of one race until new schools can be provided or neighborhood patterns change. Schools all or predominately of one race in a district of mixed population will require close scrutiny to determine that school assignments are not part of state-enforced segregation.

---

[9] In his August 3, 1970, memorandum holding that the District Court plan was "reasonable" under the standard laid down by the Fourth Circuit on appeal, the District Court explained the approach taken as follows:

"This court has not ruled, and does not rule that 'racial balance' is required under the Constitution; nor that all black schools in all cities are unlawful; nor that all school boards must bus children or violate the Constitution; *nor that the particular order entered in this case would be correct in other circumstances not before this court.*" (Emphasis in original.)

In light of the above, it should be clear that the existence of some small number of one-race, or virtually one-race, schools within a district is not in and of itself the mark of a system which still practices segregation by law. The district judge or school authorities should make every effort to achieve the greatest possible degree of actual desegregation and will thus necessarily be concerned with the elimination of one-race schools. No *per se* rule can adequately embrace all the difficulties of reconciling the competing interests involved; but in a system with a history of segregation the need for remedial criteria of sufficient specificity to assure a school authority's compliance with its constitutional duty warrants a presumption against schools that are substantially disproportionate in their racial composition. Where the school authority's proposed plan for conversion from a dual to a unitary system contemplates the continued existence of some schools that are all or predominately of one race, they have the burden of showing that such school assignments are genuinely nondiscriminatory. The court should scrutinize such schools, and the burden upon the school authorities will be to satisfy the court that their racial composition is not the result of present or past discriminatory action on their part.

An optional majority-to-minority transfer provision has long been recognized as a useful part of every desegregation plan. Provision for optional transfer of those in the majority racial group of a particular school to other schools where they will be in the minority is an indispensable remedy for those students willing to transfer to other schools in order to lessen the impact on them of the state-imposed stigma of segregation. In order to be effective, such a transfer arrangement must grant the transferring student free transportation and space must be made available in the school to which he desires to move. Cf. *Ellis* v. *Board of Public Instruction*, 423

to schools nearest their homes. But all things are not equal in a system that has been deliberately constructed and maintained to enforce racial segregation. The remedy for such segregation may be administratively awkward, inconvenient and even bizarre in some situations and may impose burdens on some; but all awkwardness and inconvenience cannot be avoided in the interim period when remedial adjustments are being made to eliminate the dual school systems.

No fixed or even substantially fixed guidelines can be established as to how far a court can go, but it must be recognized that there are limits. The objective is to dismantle the dual school system. "Racially neutral" assignment plans proposed by school authorities to a district court may be inadequate; such plans may fail to counteract the continuing effects of past school segregation resulting from discriminatory location of school sites or distortion of school size in order to achieve or maintain an artificial racial separation. When school authorities present a district court with a "loaded game board," affirmative action in the form of remedial altering of attendance zones is proper to achieve truly nondiscriminatory assignments. In short, an assignment plan is not acceptable simply because it appears to be neutral.

In this area, we must of necessity rely to a large extent, as this Court has for more than 16 years, on the informed judgment of the district courts in the first instance and on courts of appeals.

We hold that the pairing and grouping of non-contiguous school zones is a permissible tool and such action is to be considered in light of the objectives sought. Judicial steps in shaping such zones going beyond combinations of contiguous areas should be examined in light of what is said in subdivisions (1), (2), and (3) of this

opinion concerning the objectives to be sought. Maps do not tell the whole story since non-contiguous school zones may be more accessible to each other in terms of the critical travel time, because of traffic patterns and good highways, than schools geographically closer together. Conditions in different localities will vary so widely that no rigid rules can be laid down to govern all situations.

(4) *Transportation of Students.*

The scope of permissible transportation of students as an implement of a remedial decree has never been defined by this Court and by the very nature of the problem it cannot be defined with precision. No rigid guidelines as to student transportation can be given for application to the infinite variety of problems presented in thousands of situations. Bus transportation has been an integral part of the public education system for years, and was perhaps the single most important factor in the transition from the one-room schoolhouse to the consolidated school. Eighteen million of the nation's public school children, approximately 39%, were transported to their schools by bus in 1969–1970 in all parts of the country.

The importance of bus transportation as a normal and accepted tool of educational policy is readily discernible in this and the companion case.[11] The Charlotte school authorities did not purport to assign students on the basis of geographically drawn zones until 1965 and then they

[11] During 1967–1968, for example, the Mobile board used 207 buses to transport 22,094 students daily for an average round trip of 31 miles. During 1966–1967, 7,116 students in the metropolitan area were bussed daily. In Charlotte-Mecklenburg, the system as a whole, without regard to desegregation plans, planned to bus approximately 23,000 students this year, for an average daily round trip of 15 miles. More elementary school children than high school children were to be bussed, and four- and five-year-olds travel the longest routes in the system.

alloved almost unlimited transfer privileges. The District Court's conclusion that assignment of children to the school nearest their home serving their grade would not produce an effective dismantling of the dual system is supported by the record.

Thus the remedial techniques used in the District Court's order were within that court's power to provide equitable relief; implementation of the decree is well within the capacity of the school authority.

The decree provided that the buses used to implement the plan would operate on direct routes. Students would be picked up at schools near their homes and transported to the schools they were to attend. The trips for elementary school pupils average about seven miles and the District Court found that they would take "not over 35 minutes at the most." [12] This system compares favorably with the transportation plan previously operated in Charlotte under which each day 23,600 students on all grade levels were transported an average of 15 miles one way for an average trip requiring over an hour. In these circumstances, we find no basis for holding that the local school authorites may not be required to employ bus transportation as one tool of school desegregation. Desegregation plans cannot be limited to the walk-in school.

An objection to transportation of students may have validity when the time or distance of travel is so great as to risk either the health of the children or significantly impinge on the educational process. District courts must weigh the soundness of any transportation plan in light

[12] The District Court found that the school system would have to employ 138 more buses than it had previously operated. But 105 of those buses were already available and the others could easily be obtained. Additionally, it should be noted that North Carolina requires provision of transportation for all students who are assigned to schools more than one and one-half miles from their homes. N. C. Stat. § 115–186 (b).

of what is said in subdivisions (1), (2), and (3) above. It hardly needs stating that the limits on time of travel will vary with many factors, but probably with none more than the age of the students. The reconcilation of competing values in a desegregation case is, of course, a difficult task with many sensitive facets but fundamentally no more so than remedial measures courts of equity have traditionally employed.

VI

The Court of Appeals, searching for a term to define the equitable remedial power of the district courts, used the term "reasonableness." In *Green, supra,* this Court used the term "feasible" and by implication, "workable," "effective," and "realistic" in the mandate to develop "a plan that promises realistically to work, and . . . to work *now.*" On the facts of this case, we are unable to conclude that the order of the District Court is not reasonable, feasible and workable. However, in seeking to define the scope of remedial power or the limits on remedial power of courts in an area as sensitive as we deal with here, words are poor instruments to convey the sense of basic fairness inherent in equity. Substance, not semantics, must govern, and we have sought to suggest the nature of limitations without frustrating the appropriate scope of equity.

At some point, these school authorites and others like them should have achieved full compliance with this Court's decision in *Brown I.* The systems will then be "unitary" in the sense required by our decisions in *Green* and *Alexander.*

It does not follow that the communities served by such systems will remain demographically stable, for in a growing, mobile society, few will do so. Neither school authorities nor district courts are constitutionally required to make year-by-year adjustments of the

racial composition of student bodies once the affirmative duty to desegregate has been accomplished and racial discrimination through official action is eliminated from the system. This does not mean that federal courts are without power to deal with future problems; but in the absence of a showing that either the school authorities or some other agency of the State has deliberately attempted to fix or alter demographic patterns to affect the racial composition of the schools, further intervention by a district court should not be necessary.

For the reasons herein set forth, the judgment of the Court of Appeals is affirmed as to those parts in which it affirmed the judgment of the District Court. The order of the District Court dated August 7, 1970, is also affirmed.

It is so ordered.
